

SORCERY SPELLS (May 11, 2024)

Link to the [index](#)

Ablative Barrier

Keywords: Buff.

Full Cost: 15 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You surround the subject with an ablative force screen. The subject gains DR 2 per level of this spell. This DR takes the form of a field projected a short distance from the subject's body. This protects his body – including the eyes – as well as anything he is carrying, and reduces the damage from attacks before armor DR. This DR is ablative - it stops damage once. Each point of DR stops one point of basic damage but is destroyed in the process. Lost DR “heals” at the same rate as lost HP (including the effects of Regeneration, p. B80).

Statistics: Affliction 1 (HT; Advantage, Ablative Barrier 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Ablative Barrier to the Advantage enhancement [+3]. *Note:* Each level of “Ablative Barrier” is DR 2 (Force Field, +20%; Ablative, -80%; Magical, -10%) [3].

Abominable Alteration

Keywords: Resisted (better of HT or Will).

Full Cost: 65 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This is a variant of Partial Shapeshifting that affects only one body part without preserving scale or function. Transforming a victim's head into a diminutive insect head will kill him instantly, as such head will not provide enough brainpower to sustain the body. A huge elephant head will snap the victim's neck, and so on. In each case, the death is instant, and the spell may be resisted with the higher of HT or Will. The corpse left behind is permanently transformed.

Statistics: Affliction 1 (HT or Will; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Sorcery, -15%) [65]. *Note:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies.

Absorb Book

Keywords: None.

Full Cost: 9 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

This spell lets the user devour the knowledge of a written work, effectively reading a book remotely. The caster must be able to see or touch the book to absorb it. Modify the casting roll for range penalties to the book (see p. B550). The caster must know the language of the book he is absorbing.

After a successful casting, the writing in the book gradually fades away (at a rate of 1 page per minute), leaving blank pages. The caster retains the information exactly as if he had carefully read the book.

The caster can maintain this spell for as long as he wishes without further concentration. If he switches to another book, he must stop reading his current book and cast the spell again.

If he fails to cast, he may try again, at a cumulative -2 per repeated attempt on that book in the past hour. Should he critically fail, he cannot absorb that book again for 24 hours.

Statistics: Mind Reading (Accessibility, Only on books, -50%; Nuisance Effect, Writing disappears, -5%; Sorcery, -15%) [9].

Absorb Impact

Keywords: Buff.

Full Cost: 15 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject gains DR 2 per level of this spell against fall and collision damage for the duration of the spell. The velocity of a falling subject is not altered. Reduced damage will be suffered upon landing on a normal surface (spikes, etc. would still do full damage). This DR counts as innate armor, i.e. is not considered flexible when calculating blunt trauma due to collisions and falls.

Statistics: Affliction 1 (HT; Advantage, Absorb Impact 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Absorb Impact to the Advantage enhancement [+3]. *Note:* Each level of "Absorb Impact" is DR 2 (Force Field, +20%; Limited, Fall and Collision Damage, -80%; Magical, -10%) [3].

Absorb Weapon

Keywords: None.

Full Cost: 1 point/level.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

You can harmlessly absorb a weapon you are touching (even a poisoned one) into your arm, so long as it is not in another creature's possession. The weapon must weigh no more than spell level * Basic Lift/10 lbs. The absorbed weapon cannot be felt under the skin and doesn't restrict your range of motion in any way. An absorbed weapon cannot be detected with even a careful search, although a Detect Magic spell reveals the presence of a magical aura. The only evidence of its presence is a faint blotch on your skin shaped vaguely like the weapon. Rather than being protected by your defensive advantages, your weapon actually is in another dimension entirely and can't be affected by any normal attack.

Getting it out takes one second or a Fast-Draw roll (aided by Talent). When the spell ends, the weapon is expelled.

Statistics: Payload 1 (Accessibility, Only a single object, -10%; Accessibility, Only for weapons, -20%; Cosmic, Extraplanar, +50%; Nuisance Effect, Detectable as a blotch, -5%; Sorcery, -15%) [1/level].

Abundant Step

Keywords: None.

Full Cost: 50 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

You can step through the fourth dimension, effectively teleporting to another place within 10 yards that you are able to see with your own eyes. You can carry up to Medium Encumbrance when you travel.

Take a step (you cannot cast this spell if you are immobilized) and make an IQ + Talent roll to cast this spell, modified as follows:

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus. Note that the caster must take a Step every second, if he is preparing!

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you.

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any space you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds!

Statistics: Warp (Accessibility, Step, -10%; Extra Carrying Capacity, Medium, +20%; No Strain, +25%; Range Limit, 10 yards, -50%; Sorcery, -15%; Vision-Based, Reversed, -20%) [50].

Accelerate Metabolism

Keywords: Resisted (HT).

Full Cost: 41 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

The subject gains one level of the Increased Consumption disadvantage (p. B139). If he had no Increased Consumption or Reduced Consumption, this makes him require to eat six meals per day. In addition, he suffers a -3 penalty to HT rolls made to resist metabolic hazards.

Statistics: Affliction 1 (HT; Disadvantage, Increased Consumption 1, +10%; Disadvantage, Susceptible to Metabolic Hazards 3*, +24%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [41]. *Note:* "Metabolic Hazards" is even more common than "Very Common" and costs -8 points per -1 to HT rolls.

Accelerate Pregnancy

Keywords: Buff.

Full Cost: 47 points for level 1 + 20 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent (until baby is born).

This spell speeds the safe development of an unborn child. At level 1, this spell doubles the rate of development, at level 2 the unborn baby develops thrice as fast, and so on.

Statistics: Affliction 1 (HT; Advantage, Accelerate Pregnancy 1, +200%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [47]. Additional levels add further Accelerate Pregnancy to the Advantage enhancement (+200%) [+20]. *Note:* Each level of "Accelerate Pregnancy" is Altered Time Rate 1 (Accessibility, Only to accelerate pregnancy, -80%; Magical, -10%) [20].

Accelerate Time

Keywords: Area (Leveled), Resisted (Will, Special).

Full Cost: 126 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

Time in the area accelerates. Every creature and object in the area acts as if they had Altered Time Rate 1 (p. B38). Anyone entering the area is accelerated as well. Anyone leaving the area enters the normal time stream again.

Unless everyone within the area is willing, the person with the highest effective Will resists. The spell is all-or-nothing; if that one person resists, then the spell fails, but if not, then it works. If the GM is uncertain of who has the best resistance roll (e.g., one person has high Will while another has modest Will but also Luck), he can pick two, roll for both, and average their margins of success for the Quick Contest.

Statistics: Affliction 1 (Will; Advantage, Accelerate Time, +900%; All-or-Nothing, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Extended Duration on Persistent, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Reduced Duration, 1/3, -10%; Reduced Duration, 1/180, Only after the target leaves the area, -35%; Sorcery, -15%; Variable, Area, +5%) [126]. Additional levels add more Area Effect (+50%) [+5]. *Note:* "Accelerate Time" is Altered Time Rate 1 (Magical, -10%) [90].

Accuracy

Keywords: Weapon Buff.

Full Cost: 14 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell gives the weapon +1 to skill rolls to hit per level. It is recommended that the GM allow at most a bonus equal to $[(\text{setting's TL})/2 + 1]$ for bonuses to skill rolls.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Accuracy 1, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [14]. Additional levels add further Accuracy to the Advantage enhancement [+4]. *Note:* Each level of "Accuracy" is DX 1 (Accessibility, Only attacks with this weapon, -80%; Magical, -10%) [4/level].

Accursed Triangle

Keywords: Resisted (Will).

Full Cost: 47 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell affects anything with a soul and causes the caster to swap bodies with the subject, then shifts the caster's mind into a mindless vessel in the environment (stone, tree, or similar), and *then* swaps the caster's consciousness back into his original body while moving the subject's to the object. This is instantaneous.

The subject's body will live indefinitely – as a mindless shell with IQ 0 – if cared for, but the mind dissipates after a mere Will/3 *seconds*, rounded down. While the mind survives, it can use psi abilities, spells it knows well enough to cast without ritual, and so on, although it can perceive nothing and can touch only whatever its vessel is touching. After that time, the victim's consciousness is *gone*. Magic capable of reuniting a mind and a body or possession magic can save the subject if cast in those Will/3 seconds. Dispel Possession won't work, as the subject is not possessed.

On a critical failure, the would-be subject may place the caster's mind and his own in his choice of the caster's body, his own body, and some random vessel. Most targets imprison their tormentor in an inanimate object, killing the wizard in Will/3 seconds. Some also hijack the caster's body.

Statistics: Affliction 1 (Will; Accessibility, Only on beings with a soul, -5%; Based on Will, +20%; Coma, Variant, +250%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Critical Failure, -50%; Sorcery, -15%) [47].

Ache

Keywords: Resisted (HT).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

The subject suffers trivial discomfort that gives no penalties – it is just a bit annoying. High Pain Threshold grants immunity to this spell.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; Mild Discomfort, +5%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [25].

Acid Arrow

Keywords: Missile, Obvious.

Full Cost: 16 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

An arrow of acid springs from your hand and speeds to its target. It does 1d impaling damage plus 1d follow-up corrosion damage per level. The target can dodge or block the missile.

Statistics: Impaling Attack 1d (Blockable, -5%; Sorcery, -15%) [7] + Corrosion Attack 1d (Magical, -10%; Follow-Up, +0%) [9/level].

Acid Ball

Keywords: Missile, Obvious.

Full Cost: 7 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 20 yards.

Duration: Instantaneous.

You launch an orb of acid at the target. It does 1d corrosion damage per level. The target can dodge or block the orb. This spell's 1/2D range is 10 yards.

Statistics: Corrosion Attack (Blockable, -5%; Increased 1/2D, 5x, +10%; Reduced Range, 1/5, -20%; Sorcery, -15%) [7/level].

Acid Fog

Keywords: Area (Leveled).
Full Cost: 39 points for level 1 + 10 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

You may fill a two-yard-radius area with thick acid fog. This gives -5 to all vision rolls made through it. To place fog at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

The fog deals everything within its area 1d corrosion damage every second.

The basic (39-point) version of this spell covers a two-yard radius. For each additional 10 points, you may double this radius; e.g., four yards for 49 points, 8 yards for 59 points, or 16 yards for 69 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 5 (Drifting, +20%; Link, +10%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%); [17] + Corrosion Attack 1d (Area Effect, 2 yards, +50%; Drifting, +20%; Link, +10%; Magical, -10%; Persistent, +40%; Variable, Area, +5%) [22]. Further levels add Area Effect (+50%) to both advantages [+10].

Acid Jet

Keywords: Jet, Obvious.
Full Cost: 15 points/level.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 10 yards.
Duration: One second.

A 10-yard jet of acid erupts from the caster's hand. It can be dodged or blocked, but not parried. Treat this as a long melee weapon rather than a ranged attack, and do not apply range or speed penalties.

The jet deals 1d corrosion damage per level of this spell, but it has 1/2D 5. The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the acid stream is not interrupted and the caster may continue to attack with it normally.

Statistics: Corrosion Attack (Destructive Parry, +10%; Jet, +0%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Sorcery, -15%) [15/level]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Acid Sheath

Keywords: Buff.
Full Cost: 22 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject is sheathed in acid that deals 1d-1 corrosion damage to enemies who touch their body.

Statistics: Affliction 1 (HT; Advantage, Acid Sheath, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Note:* "Acid Sheath" is Corrosion Attack 1d-1 (Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%) [10].

Acid Vulnerability

Keywords: Resisted (HT).
Full Cost: 29/30/32 points for levels 1-3.

Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

This spell makes the subject more vulnerable to acid attacks. The subject multiplies any damage from acid that penetrates its DR by 2 before applying any normal wounding multipliers. Level 2 of this spell increases the multiplier to 3, and level 3 increases the multiplier by 4.

Statistics: Affliction 1 (HT; Disadvantage, Vulnerability (Acid, x2), +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. Additional levels improve Disadvantage, Vulnerability (Acid, x2), +30% to Disadvantage, Vulnerability (Acid, x3), +45% and Disadvantage, Vulnerability (Acid, x4), +60%.

Acid Weapon

Keywords: Weapon Buff.
Full Cost: 18 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 1d of follow-up (p. B105) corrosion damage. The weapon will be visibly coated in pale green acid, but will not cause harm or discomfort to the wielder.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Acid Weapon, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Note:* "Acid Weapon" is Corrosion Attack 1d (Follow-Up, This weapon, +0%; Magical, -10%; Visible, -10%) [8].

Acid Whip

Keywords: Obvious.
Full Cost: 23 points.
Casting Roll: None. Use Force Whip to hit.
Range: Self.
Duration: Instantaneous.

While this spell is active, the caster has a whip of acid in their hand. It is wielded like a normal whip (p. B404), except that it always takes only one second to ready, and it cannot be used to parry or entangle. The whip has Reach 1-4 (changing Reach requires a Ready maneuver) and inflicts swing corrosion damage every time it strikes.

Statistics: Natural Weapon (Corrosion; Cannot Parry, -40%; Destructive Parry, +40%; Extra Reach, 1-4, Ready maneuver necessary, +90%; Intangible, +50%; Single, -20%; Sorcery, -15%; Swing-Capable, +20%) [23].

Acidic Tears

Keywords: Resisted (HT).
Full Cost: 29 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

You transform the subject's tears into a mildly corrosive acid. The victim gains a -4 penalty to Vision and suffers from moderate pain (p. B428). Nictitating Membrane does not protect, but Protected Vision does.

Statistics: Affliction 1 (HT; Disadvantage, Acute Vision -4, +8%; Fixed Duration, +0%; Malediction 2, +150%; Moderate Pain, +20%; No Signature, +20%; Sorcery, -15%) [29].

Ack

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Unlimited.

Duration: Instantaneous.

When receiving a magical message, be the channel one-way or two-way, this spell can be cast to send the sender the proof that the message was received, and by whom. Spoofing is impossible.

Statistics: Ping (Variant; Sorcery, -15%) [1].

Activate Runes

Keywords: None.

Full Cost: 20 points.

Casting Roll: IQ.

Range: 100 yards.

Duration: Instantaneous.

When this spell is successfully cast on a combination of runes, the effect presented in the chosen runes is manifested. This spell works with any rune language. Note that if the runes themselves were flawed, due to a failure on the part of the mage who created them, a successful Activate Runes roll will activate the runes, flaws and all!

Statistics: Control Magic 1 (Accessibility, Only to activate runes, -60%; Ranged, +40%; Sorcery, -15%) [20].

Adamant Hail

Keywords: Area (Leveled).

Full Cost: 14 points (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause chunks of adamant to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d(2) crushing damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected.

The basic (14-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. The upgraded (24-points) version increases the damage to 2d-1(2). This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	14 points	17 points	19 points	22 points	24 points	27 points	29 points
2d-1	24 points	28 points	32 points	37 points	45 points	49 points	54 points

Statistics: Crushing Attack 1d (Armor Divisor, (2), +50%; Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [14]. Improved versions add Area Effect (+50%/level) and/or improve to Crushing Attack 2d-1.

Adamant Missile

Keywords: Missile, Obvious.

Full Cost: 6.5 points/level*.

Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You throw a ball of adamant at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d(2) crushing damage per level of this spell. The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Statistics: Crushing Attack (Armor Divisor, (2), +50%; Blockable, -5%; Sorcery, -15%) [6.5/level*].

* Calculate the cost, then round up.

Adept Spirit

Keywords: Buff, Incarnum.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell's bonuses last for 3 minutes.

You bestow the soul of a great ancient spellcaster on the subject. The soul lies dormant within the subject's body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul's wisdom grants the subject a +1 bonus to Occultism, Ritual Magic, Thaumatology, and Symbol Drawing. The caster may pay an additional point of essentia during the casting to increase the bonuses provided to +2.

Statistics: Affliction 1 (HT; Advantage, Adept Spirit, +50%; Advantage, Adept Spirit (Accessibility, Costs 1 ER, -10%), +45%; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Adept Spirit" is Talent (Occultism, Ritual Magic, Thaumatology, Symbol Drawing; Magical, -10%) [5].

Adhesive Acid

Keywords: Missile, Obvious.

Full Cost: 69 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 10 seconds.

This spell conjures a sticky glob of acid, which will adhere to and corrode any creature it strikes. This missile can be dodged or blocked. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d-1 corrosion damage. The acid sticks to the target, damaging him again every second for 9 seconds. The cycles can be stopped only by washing the acid off with water.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own adhesive acid!

Statistics: Corrosion Attack 1d-1 (Blockable, -5%; Cyclic, 9 cycles, 1 second intervals, +900%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [69].

Adjuration

Keywords: Buff.

Full Cost: 38 points.

Casting Roll: None.

Range: Self.

Duration: Permanent (until fulfilled).

Give *yourself* a command to do one specific thing. It can even be something you could not feasibly, realistically accomplish; "destroy every tree in the world" *would* be valid, but you must speak the oath.

You must make this command his first priority at all times. You are free to decide how to go about it, however, and may approach the situation intelligently; e.g., rather than grabbing an axe, you could contact a temp agency to hire a small army of woodcutters. In effect, you have an Obsession (p. B146) with no self-control roll.

Once you accomplish the goal, the oath ends. The only way to remove the oath before then is with Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21); Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21) has no effect.

Statistics: Affliction 1 (HT; Accessibility, Self Only, -50%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; No Signature, +20%; Sorcery, -15%; Variable Enhancement, +125%) [38]. *Note:* Variable Enhancement provides +13% of enhancements (+250%) but is limited by "Accessibility, Only for Obsession with no self-control roll" (-50%) for a net +125%.

Adjustable Clothing

Keywords: Armor Buff.

Full Cost: 47 points for level 1 + 18 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

Causes an item of clothing to adjust to fit whoever wears it, within limits. The adjustment occurs as the wearer begins to put it on, so the enchantment won't be discovered if someone picks up the item and immediately discards it as "obviously" the wrong size. When removed, the item returns to its original size. The change in size does change weight as well; an object that doubled in size would increase in weight eightfold. If the duration runs out when the item is not of its original size, it returns to its original size as soon as the wearer takes it off. Each level of this spell allows the item to grow or shrink up to (1 – spell level) band of SM. For example, a pair of SM+0 pants affected by Adjustable Clothing 2 would be able to grow or shrink to fit a SM-1 or SM+1 being, and SM+0 suit affected by Adjustable Clothing 1 would be "one size fits all" as long as the wearer is SM+0.

This spell acts as if it were one level lower for rigid or metal armor (or *two* levels lower for both), and as two levels lower if the item covers all hit locations.

Statistics: Affliction 1 (HT; Accessibility, Only on clothing and armor, -20%; Advantage, Adjustable Clothing 1, +250%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [47]. Additional levels add further Adjustable Clothing to the Advantage enhancement (+180%) [+18]. *Notes:* "Adjustable Clothing 1" is 25 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -2 in effect penalties. This spell is based on the Adjustable Gear imbue skill from this [blog post](#).

Aerial Entombment

Keywords: Resisted (HT).

Full Cost: 112 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

If the subject fails to resist, he is instantly elevated into the clouds where he is imprisoned in a windy sphere. He remains in suspended animation (doesn't need to breathe, drink, eat, doesn't age) until somebody frees him (just flying into the clouds and pulling him out of the sphere physically is enough). A mage who casts Aerial Entombment on himself may elect to stay awake, but this is unwise unless he is able to fly! This spell can only be cast outdoors.

Statistics: Affliction 1 (HT; Advantage, Suspended Animation, +590%; Environmental, Outdoors, -20%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Selectivity, Only to remove suspended animation on yourself, +5%; Terminal Condition, Freeing physically, -10%; Sorcery, -15%) [112]. *Note:* "Suspended Animation" is Doesn't Breathe

(Magical, -10%) [18] + Doesn't Eat or Drink (Magical, -10%) [9] + Doesn't Sleep (Magical, -10%) [18] + Unaging (Magical, -10%) [14].

Aerial Flight

Keywords: Buff.

Full Cost: 46 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject can fly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, the subject will need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). He cannot fly in a trace atmosphere, vacuum, or water.

The subject's flight Move is Basic Speed x 2 (drop all fractions). Aerial Flight includes the ability to hover at Move 0 as well.

Statistics: Affliction 1 (HT; Advantage, Flight, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [46]. *Note:* "Flight" is Flight (Environmental, Air, -5%; Magical, -10%) [34].

Aerial Servant

Keywords: None.

Full Cost: 38 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned being's Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

Each time you cast this, you summon an [aerial servant](#) (the creature must be worth 150% or less of your point value). The GM will create this being. If you know a specific aerial servant you want to call, you can summon it (although without its True Name or some equally significant identifier, the casting roll is at -5). A penalty applies based on the extradimensional "distance": There is no distance penalty for casting this spell on the Elemental Plane of Air. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. Specifics of the dimensional structure depend on the setting.

The summoning itself requires a ritual that takes 1 hour. At the end of the ritual, the caster pays 1 FP and makes a Quick Contest of Will against the aerial servant to force it to appear. If the caster is victorious, the aerial servant arrives. The aerial servant hates its summoner. It will obey the caster, but try to subvert their commands or otherwise act against their interests. Quite often, it will try to kill the summoner after completing the assignment.

Unlike most sorcery with a duration, this spell must be maintained; thus, unless the caster can cast simultaneous spells, using another spell will make the caster lose control of the aerial servant, after which the latter will turn on the caster for the remainder of the spell's duration. However, there is no FP cost to maintain this spell, only to cast it. A summoned aerial servant is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, the caster must wait 24 hours before using this spell again; if dismissed, the caster must wait five minutes.

Statistics: Ally (Aerial Servant; Built on 150%; Constantly; Conjured, +100%; Immediate Preparation Required to 1 hour, -75%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%; Unwilling, -50%) [38]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional "range" penalties.

Aeromancy

Keywords: Information.

Full Cost: 39 or 89 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Aeromancy is divination by air. It is performed in solitude and requires that the diviner not be indoors, although he need not be on the ground. In fact, being on top of a large building might be an advantage! If the diviner is 50 yards from the ground, add +1 to skill; each time height doubles, add a further +1, to a maximum of +6. He must maintain this height for the entire casting. Air must be present, so divining in space is impossible.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (39-point) version of this spell requires 10 minutes to cast! The improved (89-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Environmental, Air, -5%; Environmental, Outdoors, -20%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%) [39]. The improved version adds Reduced Time 10 (+200%) [+50].

Affect Spirits

Keywords: Buff.

Full Cost: 27 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell allows the subject to interact with incorporeal spirits as if they were solid. Any weapon the subject wields has the ability to harm spirits.

Statistics: Affliction 1 (HT; Advantage, Affect Spirits, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [27]. *Notes*: "Affect Spirits" is Blessed (Ghost Weapon; Magical, -0%) [15]. Magical costs -0% because Blessed already includes the Divine power modifier. Magical, -0% just replaces it.

Afflict Animal

Keywords: Resisted (HT).

Full Cost: 41 points or 56 points

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent (basic) or Truly Permanent (improved).

This spell allows the caster to make the animal frail. The animal gets the Very Unfit disadvantage (p. B160). If the animal had Fit or Very Fit, it loses that advantage as well. The basic (41-point) version is permanent, but can be dispelled normally. The improved (56-point) version is truly permanent – it stays forever and cannot be dispelled.

Statistics: Affliction 1 (HT; Accessibility, Only on animals, -25%; Disadvantage, Very Unfit, +15%; Extended Duration, Permanent, +150%; Malediction 2, +150%; Negated Advantage, Very Fit, +15%; No Signature, +20%; Sorcery, -15%) [41]. The improved version replaces Extended Duration, Permanent, +150% with Extended Duration, Truly Permanent, +300% [+15].

Age

Keywords: Resisted (Will).

Full Cost: 116 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You make the living subject 1 year older. Only 1 attempt per month is allowed on a given subject.

Statistics: Affliction 1 (Will; Accessibility, Only on living creatures, -10%; Advantage, Age, +930%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [116]. *Note:* "Age" is Unaging (Age Control, Only Forwards, +10%; Magical, -10%; Reduced Time 26, +520%) [93].

Age (Variant)

Keywords: Resisted (HT).

Full Cost: 19 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You make the living subject 1 year older.

Statistics: [Ageing Attack 1](#) (Accessibility, Only on living creatures, -10%; Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [19].

Agonize

Keywords: Resisted (HT).

Full Cost: 35 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

Agony incapacitates the subject for 1 minute (see *Incapacitating Conditions*, p. B428). After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Agony, +100%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [35].

Aid

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster can perform First Aid (p. B424) at no penalty for a lack of equipment.

Statistics: Accessory (TK Bandages; Sorcery, -15%) [1].

Aide

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

When this spell is active, the caster adds this spell's level to their Healing spells' effective skill level for the purpose of *assisting* ceremonially cast Healing spells (p. B238). If using Sorcery, this spell increases the caster's Talent for Healing spells for the purpose of *Combining Powers* (*GURPS Powers*, pp. 171-172), but not when the caster is the leader.

Such a spell might exist for every college (GM's option), but it suits Healing best.

Statistics: Sorcery Talent (Accessibility, Only for combining powers, -35%; Limited Colleges, One College, -40%; Sorcery, -15%) [2/level]. For the magic-as-skills system replace it with Magery (Accessibility, Only to assist ceremonial casting, -50%; Limited Colleges, One College, -40%; Sorcery, -15%) [2/level].

Air Vision

Keywords: Buff.

Full Cost: 17 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the subject see through smoke, fog, dust, sand, etc. Each level of this spell allows the subject to see through up to six inches of smoke, fog, dust, sand, etc. The subject can just barely see the outline of the substance he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Air Vision 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Air Vision to the Advantage enhancement [+5]. *Note:* Each level of "Air Vision" is Penetrating Vision 1 (Magical, -10%; Specific, Air, -40%) [5].

Air Vortex

Keywords: Area (Leveled), Resisted (the higher of HT or DX).

Full Cost: 134 points for level 1 + 5 points/additional level.

Casting Roll: Will. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 9 seconds.

Whisks all persons within the original area of effect to somewhere else inside a giant swirling Air Vortex. The caster may exclude anyone in the area that he specifies during casting. Those whisked away by the Vortex are rendered temporarily vaporous, as per the Body of Air spell (see the footnote below for details). Clothing and gear weighing no more than the subject's BL change with him. A subject cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.) A vaporous subject cannot do any physical actions at all, he can only be moved with the vortex. He still can Dodge, if attacked. When the spell ends, the subjects are stunned until they can make a HT roll (roll once per second).

The caster can concentrate to move the Vortex with all the subjects at Move 8. The Vortex may not penetrate solid objects.

Statistics: Affliction 1 (HT; Advantage, Body of Air, +480%; Area Effect, 2 yards, +50%; Cosmic, Mobile allows moving subjects, +100%; Fixed Duration, +0%; Malediction 2, +150%; Mobile 8, +320%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Paralysis, Variant, +150%; Reduced Duration, 1/20, -25%; Selective Area, +20%; Sorcery, -15%) [137]. Additional levels add more Area Effect (+50%) [+5]. *Note:* "Body of Air" is Alternate Form (Body of Air*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [48]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

* A meta-trait from p. 262 of *GURPS Basic Set*: ST 0 [-100]; +10 HP [20]; Doesn't Breathe [20]; Flight (Lighter Than Air, -10%) [36]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Legs (Aerial) [0]; No Manipulators [-50]; Vulnerability (Vacuum and wind-based attacks x2) [-20]; and Taboo Trait (Fixed ST) [0]. 36 points.

Airtight

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 1 week.

Causes a reasonably well sealed container (such as a bottle, box or jar) to become airtight. This slows the decay of some materials and prevents dust and other airborne pollutants from getting into the container. This spell can't be used to pasteurize perishable materials unless the container and the material are rendered sterile (either by heating or by magic) after this spell has been cast.

Statistics: Affliction 1 (HT; Accessibility, Only on sealed containers, -70%; Advantage, Airtight, +60%; Extended Duration, 3,000x, +140%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Airtight" is Sealed (Accessibility, Only gases, -50%; Magical, -10%) [6].

Akashic Form

Keywords: Buff.
Full Cost: 53 points.
Casting Roll: None. Special casting time.
Range: Self.
Duration: One day.

You create a perfect record of your physical body in the Akashic Record at the time the spell is cast. The casting takes one hour of uninterrupted concentration. Make a copy of the your character sheet when this spell is cast. If you die, you revert to those statistics, losing any traits or character points acquired since then, and additionally losing 20 character points. When this happens, your corpse disappears, and you can either resume the place of your dead body (already wearing any clothing still attached to the corpse) or appear in any place you've been within 100 yards of where your corpse lies (but without any of your gear). You can have only one Akashic Form active at a time, any further attempts at casting this spell fail. Note that since the Akashic Form advantage has the Magical limitation, the subject will not revert to the clone if he dies in an area that negates magic or under similar circumstances.

Statistics: Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Akashic Form, +430%; Costs Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Immediate Preparation Required, 1 hour, -75%; No Signature, +20%; Sorcery, -15%) [53]. *Note:* "Akashic Form" is Extra Life 1 (Copy, -20%; Cosmic, Cannot be found and tampered with, +100%; Magical, -10%) [43].

Alarm

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Alerts the caster at a specified time in the future, awakening him if necessary. It will also remind him of one thing (in effect, delivering a message), provided he specified that thing at the time the Alarm spell was cast. Can be set to "go off" up to a week from time of casting. Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per hour, not minute.

Statistics: Accessory (Alarm Clock; Sorcery, -15%) [1].

Alcohol Tolerance

Keywords: Buff.
Full Cost: 25 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 1 day.

The subject's body metabolizes alcohol with remarkable efficiency. He can drink steadily while the spell lasts with no major detrimental effects. *Binging* affects him as it would anyone else. He gets +2 on all HT rolls related to drinking.

Statistics: Affliction 1 (HT; Advantage, Alcohol Tolerance, +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Alcohol Tolerance" is Alcohol Tolerance (Magical, -10%) [1].

Alertness

Keywords: Buff.

Full Cost: 20 points for level 1 + 4.5* points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You increase the target's Per by 1 per level of this spell for 3 minutes. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Alertness 1, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Notes:* Additional levels add further Alertness to the Advantage enhancement (+50%) [+4.5*]. Each level of "Alertness" is Per 1 (Magical, -10%) [4.5].

* Calculate the total cost, then round up.

Alkahest Jet

Keywords: Jet, Obvious.

Full Cost: 25 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of alkahest erupts from the caster's hand. It can be dodged or blocked, but not parried. Treat this as a long melee weapon rather than a ranged attack, and do not apply range or speed penalties.

The jet deals 1d corrosion damage per level of this spell, but it has 1/2D 5. This damage leaves a lingering effect that deals 1 point of corrosion damage per second, for a number of seconds equal to the number of dice. This effect can only be removed by rinsing the targeted zone with Essential Water. Resist Acid only halves the damage of this spell, instead of rendering the target immune. The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the alkahest stream is not interrupted and the caster may continue to attack with it normally.

Statistics: Corrosion Attack (Cosmic, Lingering Effect, +100%; Destructive Parry, +10%; Jet, +0%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Sorcery, -15%) [25/level]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Alkahest Sphere

Keywords: Missile, Obvious.

Full Cost: 17 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 20 yards.

Duration: Instantaneous.

You launch an orb of alkahest at the target. It does 1d corrosion damage per level. This damage leaves a lingering effect that deals 1 point of corrosion damage per second, for a number of seconds

equal to the number of dice. This effect can only be removed by rinsing the targeted zone with Essential Water. Resist Acid only halves the damage of this spell, instead of rendering the target immune. The target can dodge or block the orb. This spell's 1/2D range is 10 yards.

Statistics: Corrosion Attack (Blockable, -5%; Cosmic, Lingering Effect, +100%; Increased 1/2D, 5x, +10%; Reduced Range, 1/5, -20%; Sorcery, -15%) [17/level].

All-Eater

Keywords: Buff.

Full Cost: 29 points or 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

The basic (29-point) version of this spell allows the subject to eat derive nutrition from any nontoxic animal or plant protein, but does not grant any resistance to poison. The improved (44-point) version of this spell lets the subject eat anything organic or inorganic (but not antimatter), even if it's corrosive, toxic, or radioactive. The subject's body instantly converts it to something harmless.

Statistics: Affliction 1 (HT; Advantage, All-Eater, +50%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [29]. *Note:* "All-Eater" is Universal Digestion (Magical, -10%) [5]. The improved version replaces it with Universal Digestion (Magical, -10%; Matter Eater, +300%) [20].

Alloy Metal

Keywords: None.

Full Cost: 6 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to refine simple metals into alloys. It requires the proper amounts of metals commonly required for the intended alloy. Should improper amounts be present, excess raw metal is left over. To create an alloy, touch the metals you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Accessibility, Only simple metal to alloy, -10%; Transmute Metal to Metal, +50%; Transmutation Only, -100%; Magical, -10%) [6/level].

Alter Behavior

Keywords: Resisted (IQ).

Full Cost: 15 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to add the disadvantages.

Range: Unlimited.

Duration: Three days.

This spell lets the caster temporarily change an animal's behavior. In effect, you can add or remove any mundane mental disadvantage. If not, the animal resists with IQ and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of its head. You must then win a second Quick Contest of IQ – or make another unopposed IQ roll, for a willing subject. You may substitute Brainwashing for IQ, if better. You are at -1 per full -5 points of disadvantages changed.

Statistics: Mind Control (Accessibility, Only on animals, -25%; Based on IQ, +20%; Conditioning Only, -50%; Fixed Duration, +0%; Sorcery, -15%) [15].

Alter Body

Keywords: Buff.

Full Cost: 64 points or more; see text.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster alters the subject's body, as if using the Morph advantage (p. B84). The subject must be a substantial, living being with its body made of flesh – this spell will not affect ghosts, zombies, energy beings, plants, etc. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The subject retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The subject retains his mental characteristics and abilities. This spell includes the ability to make cosmetic changes. This lets the subject impersonate a specific member of any race he can turn into.

The caster can only grant forms with the same number of limbs, body layout, posture, etc. as the subject's native form. This would limit a human Morph to humanoids (e.g., elves and giants), a wolf Morph to horizontal quadrupeds, and a bird Morph to other birds.

The caster can always grant the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has granted a form, he can opt to memorize it by concentrating for one minute. This allows him to use this spell to grant that form at any time. The caster can memorize a number of forms equal to his IQ. If all his "slots" are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a "slot".

If the caster can grant any racial template worth no more than the subject's native one, Alter Body costs 64 points. If the caster can grant more powerful forms, add the difference between the maximum racial template cost and the cost of the subject's native template to the base 64 points. For instance, a caster who can give a human any racial template worth up to 36 points would pay 100 points for Alter Body.

Statistics: Affliction 1 (HT; Accessibility, Only on living beings made of flesh, -20%; Advantage, Alter Body, +500%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [64]. *Note:* "Alter Body" is Morph (Accessibility, Only physical features, -20%; Retains Shape, -20%; Magical, -10%) [50]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

Alter Dreamscape

Keywords: Resisted (highest of Will or Dreaming).

Full Cost: 24 points.

Casting Roll: IQ.

Range: Touch.
Duration: Instantaneous.

This spell alters a person's dream in any way. The sorcerer must either be in the subject's dream via the Dream Visit or Dream Travel spell, or make a physical skin-to-skin contact with the sleeping subject.

Statistics: Illusion (Accessibility, Only on sleeping subjects, -20%; Contact Agent, -30%; Melee Attack, Reach C, -30%; Mental, +100%; Requires IQ Roll, -10%; Sorcery, -15%) [24].

Alter Gender

Keywords: Resisted (HT).
Full Cost: 35 points or 51 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 30 minutes or Permanent (see text).

You can alter the subject's gender. The process takes 10 seconds.

The basic (35-point) version of this spell lasts for 30 minutes and can be dispelled normally. The improved (51-point) version of this spell is permanent and cannot be dispelled normally (but Remove Curse lifts the effect). If the caster knows the improved version, they can still cast the basic version, if they wish.

Statistics: Affliction 1 (HT; Advantage, Alter Gender, +50%; Extended Duration, 10x, +40%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [35]. *Notes:* "Alter Gender" is Hermaphromorph (Magical, -10%) [5]. The improved version adds Cosmic, Immune to Dispel Magic, +50%, adds Variable, +5%, and replaces Extended Duration, 10x, +40% with Extended Duration, Permanent, +150% [+16].

Alter Nanovirus

Keywords: Buff.
Full Cost: 89 points or more.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Permanent.

This spell alters the nature of a particular nanovirus that is either dormant and contained or is within a host but has not yet finished transforming its subject. Each casting of this spell allows the caster to transform a nanovirus into another nanovirus of the same point cost or lower, or add a 0-point feature to the nanovirus. If the caster wants to improve nanoviruses with this spell, he must buy a more powerful version of this spell. For example, if the caster wishes to make the nanovirus grant a +1 bonus to ST in addition to its normal effects, he would have to pay 10 more points to purchase this spell (99 total).

Statistics: Affliction 1 (HT; Accessibility, Only on nanoviruses, -80%; Advantage, Alter Nanovirus, +700%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [89]. *Note:* "Alter Nanovirus" is Morph (Accessibility, Only nanoviruses, -100%; Reduced Time 4, +80%; Magical, -10%) [70].

Alter Poison

Keywords: Buff.
Full Cost: 41 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

The caster casts the spell on a container with poison and changes the poison's type. The types are – blood agent, contact agent, respiratory agent poison. If the caster makes a respiratory inhaled, it becomes gaseous or aerosol, affecting an area with a 2-yard radius for 10 seconds.

Statistics: Affliction 1 (HT; Accessibility, Only on poisons, -50%; Advantage, Alter Poison, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [41]. *Notes:* "Alter Poison" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Altering a poison's type seems roughly equivalent to a transformative imbue that requires Imbue 3.

Alter Self

Keywords: None.

Full Cost: 18 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can assume a second, distinct appearance with no change in abilities or racial template. Your second form's racial template cost must not be higher than the cost of your native racial template. You can only assume forms with the same number of limbs, body layout, posture, etc. as your native form. To shift between forms, you must concentrate for 1 second. If you are knocked out or killed, you immediately revert to your native form (which will also be unconscious or dead).

Every form is a separate spell. For example, a human sorcerer could take Alter Self (Human) to assume a form of a human with a different appearance and Alter Self (Elf) to assume a form of an elf.

Statistics: Alternate Form (Cosmetic, -50%; Reduced Time 4, +80%; Sorcery, -15%) [18].

Alter Terrain

Keywords: Area (Special).

Full Cost: 90 points for level 1 + 75 points/additional level.

Casting Roll: IQ. Special casting time.

Range: 100 yards.

Duration: One day.

Can be used to completely transform vast amounts of terrain. If cast over a large enough area, this spell can turn a city into a lake or sea, or an offshore island into a mountain range. The profile of the ground (including sea, lake, or river beds) within the affected area can be raised, lowered, or reshaped as the caster chooses (1 yard per second), or changed in texture to anything between soft earth and sand to hard granite. The GM should require Architecture, Artist, or Engineer rolls if the caster tries to alter the area into something specific.

The caster can only shape terrain in a natural way. He cannot make shapes, for example, that defy gravity, or other unstable elements, even if he keeps concentrating on the spell.

This spell can affect an area up to spell level yards in radius.

Statistics: Control Terrain (Accessibility, Cannot make unstable shapes, -15%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 10,000x, +160%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [90]. Additional levels add Control Terrain (Accessibility, Cannot make unstable shapes, -15%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 10,000x, +160%; Only increases area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [75/level].

Alter Visage

Keywords: Buff.

Full Cost: 38 points.

Casting Roll: None or Disguise. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five hours.

You can alter the subject's facial features (but not clothing or makeup) to duplicate those of another member of your race or a very similar race. This requires a Disguise roll if you try to duplicate a particular individual. This ability gives +4 to all Disguise rolls made by the subject.

Statistics: Affliction 1 (HT; Advantage, Alter Visage, +180%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [38]. *Note:* "Alter Visage" is Elastic Skin (Magical, -10%) [18].

Ambidexterity

Keywords: Buff.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You subject gains the Ambidexterity (p. B39) advantage for the duration of this spell.

Statistics: Affliction 1 (HT; Advantage, Ambidexterity, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Ambidexterity" is Ambidexterity (Magical, -10%) [5].

Amphibian Control

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single amphibian – or of one square yard of a swarm of smaller amphibians. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only amphibians with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for amphibians with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Amphibians only, -40%; Sorcery, -15%) [23].

Analgesic

Keywords: Buff.

Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One minute.

The subject becomes more resistant to *persistent* pain (shock in combat does not count), ignoring -1 in penalties from effects that cause it.

Statistics: Affliction 1 (HT; Advantage, Analgesic, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Analgesic" is Analgesic (Magical, -10%) [1].

Analyze Heredity

Keywords: Information.
Full Cost: 13 points.
Casting Roll: Per. Use IQ for analysis.
Range: Touch.
Duration: Instantaneous.

The caster can discern the concentration of generic material of the subject with a Per roll. A follow-up IQ roll can determine if some hereditary defects will pass on to the subject's children, if the subject is a blood relative of another subject the caster has cast this spell upon, or provide information equivalent to genetic profiling on high TLs.

Statistics: Detect (DNA; Analyzing, +100%; Melee Attack, Reach C, -30%; Nondirectional, -25%; Sorcery, -15%) [13].

Analyze Magic

Keywords: Information.
Full Cost: 12 points.
Casting Roll: None.
Range: Unlimited.
Duration: Instantaneous.

Identifies the spells cast on the subject; enchanted items do count. The caster must be able to see or touch the subject. If the sorcerer is familiar with the spells in question, this will reveal them. Otherwise, the GM will provide a clue, for example, "some kind of a protection spell".

Statistics: Detect (Magic; Analysis, +100%; Analysis Only, -50%; Sorcery, -15%; Touch- or Vision-Based, -15%) [12].

Analyze Poison

Keywords: Information.
Full Cost: 12 points.
Casting Roll: None.
Range: Unlimited.
Duration: Instantaneous.

Identifies poisons affecting the subject, poisons innate to the subject, or poisons in a container. The caster must be able to see or touch the subject. The caster learns its origin (plant poison, fungal poison, animal poison, alchemical poison, etc.), type (contact agent, blood agent, respiratory agent, etc.), and its effects (amount of damage, number of cycles, symptoms, etc.).

Statistics: Detect (Poison; Analysis, +100%; Analysis Only, -50%; Sorcery, -15%; Touch- or Vision-Based, -15%) [12].

Analyze Psi

Keywords: Information.
Full Cost: 12 points.
Casting Roll: None.
Range: Unlimited.
Duration: Instantaneous.

Identifies ongoing psionic abilities on the subject; psionic items do count. The caster must be able to see or touch the subject. If the sorcerer is familiar with the abilities in question, this will reveal them. Otherwise, the GM will provide a clue, for example, "some kind of a telepathic ability".

Statistics: Detect (Psionics; Analysis, +100%; Analysis Only, -50%; Sorcery, -15%; Touch- or Vision-Based, -15%) [12].

Analyze Raw Magic

Keywords: Information.
Full Cost: 6 points.
Casting Roll: None.
Range: Unlimited.
Duration: Instantaneous.

Identifies the quantity and nature of raw magic (*GURPS Thaumatology*, pp. 227-229) – including its flavor. The caster must be able to see or touch the source of raw magic.

Statistics: Detect (Raw Magic; Analysis, +100%; Analysis Only, -50%; Sorcery, -15%; Touch- or Vision-Based, -15%) [6]. *Note:* This spell originally appeared in *GURPS Thaumatology*.

Anarchic Weapon

Keywords: Weapon Buff.
Full Cost: 11 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

Allows the weapon enchanted to ignore DR (Not vs. Chaotic) of some creatures, such as modrons, inevitables, etc., and deal additional damage to creatures with Vulnerability to anarchic weapons.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Anarchic Weapon, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11]. *Note:* “Anarchic Weapon” is Anarchic Touch (Magical, -10%) [1].

Ancient History

Keywords: Information.
Full Cost: 16 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

When cast on any inanimate object (or a 1-yard-radius section of a large object), Ancient History lets the caster get a general impression of an item’s history over a much greater time.

To cast Ancient History, you must touch the subject item or location, concentrate for one second, and make an IQ roll. This roll is at no penalty for an event that occurred the same day, -1 for one that occurred up to 10 days ago, -2 if up to 100 days ago, -3 if up to 3 years ago, -4 if up to 30 years ago, -5 if up to 300 years ago, and so on. The limit is 1,000 years.

On a success, you receive the general impression of an item’s history. On a critical success, you experience an actual vision. No matter how well you roll, you cannot detect magic, spirits, etc. Still, a magic item, ghostly haunt, or ritual site is likely to have an emotionally charged history, giving strong impressions.

On a failure, you receive no impressions at all, and cannot attempt to read that object or place again for 24 hours.

Statistics: Psychometry (Accessibility, Limited to 1,000 years of the past, -5%; Accessibility, Only a general impression, -10%; Active Only, -20%; Sensitive, +30%; Sorcery, -15%) [16].

Androgyny

Keywords: Buff.
Full Cost: 17 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject retains his original gender, but his physical appearance is altered. If male, he becomes less masculine in appearance; if female, she becomes more masculine in appearance. The subject can be mistaken for whatever gender is convenient. The subject's looks appeal equally to both sexes. He gets a flat reaction modifier instead of a gender-dependent bonus: +3 for Handsome, +4 for Very Handsome, or +5 for Transcendent.

Statistics: Affliction 1 (HT; Advantage, Androgyny, +10%; Extended Duration, 10x, +40%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Androgyny" is Androgynous (Magical, -10%) [1].

Animal Ageing

Keywords: Resisted (HT).

Full Cost: 18 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Each application of this spell ages an animal by one year.

Statistics: [Ageing Attack 1](#) (Accessibility, Only on animals, -25%; Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [18].

Animal Attraction

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 110 points for level 1 + 25 points/additional level.

Casting Roll: IQ.

Range: Unlimited.

Duration: 1 hour.

This spell creates an area of musk, pheromones, or other chemicals that have the effect of arousing or enraging animals that are susceptible to pheromones. The caster can select the sort of animals he wishes to effect and what sort of emotion he wishes to invoke, limited only by what chemicals the animal would naturally respond to. For example, the mage could produce a chemical that causes bees to become angry and defend their hive to enrage a colony of bees. He could produce deer musk to attract stags to a hunting blind, or he could produce scent markings that mark a certain territory as belonging to a specific wolf.

It is up to the GM to determine how domestic animals might react to scents. Each animal resists with Will. If it fails to resist, it acts as appropriate for the created scent. If the animal resists, it cannot be affected by this spell again within 24 hours.

Statistics: Mind Control (Accessibility, Only on animals, -25%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Independent, +70%; Persistent, +40%; Smell-Based, -20%; Sorcery, -15%; Suggestion, -40%) [110]. Additional levels add Area Effect (+50%) [+25].

Animal Emotion

Keywords: Resisted (Will).

Full Cost: 35 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: One minute.

Instills an animal with any one emotion the caster chooses. Allowed emotions include anger, boredom, depression, disgust, fear, greed, hate, jealousy, joy, love, lust, patriotism, peace, sadness, and unrest.

Statistics: Mind Control (Accessibility, Only on animals, -25%; Emotion Control, -50%; Fixed Duration, +0%; Independent, +70%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [35].

Animal Growth

Keywords: Resisted (HT).

Full Cost: 19 points for level 1 + 9 points/level + ST to support the new size.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

If the subject animal fails to resist, the caster may enlarge it. As the subject's size increases, so must his ST (or he would collapse under his own weight). His equipment doesn't change size!

Each level of Animal Growth lets the caster increase his subject's Size Modifier by +1. Find the subject's final height from the *Size Modifier Table* (p. B19). Increases in SM affect the subject's arm and leg length when calculating reach and determining whether he can negotiate obstacles; see *Size Modifier and Reach* (p. B402).

If the caster attempts to enlarge the subject in a room, vehicle, container, etc. that isn't large enough to hold him, his growth normally stops. However, if maximum thrust damage for the subject's current ST is greater than the wall or ceiling's DR, he bursts through it. This takes one second per point of DR.

The caster must buy the ST necessary to support the subject's enlarged form and add it to the Advantage enhancement. This is 5 x final height in yards. This ST is only available when the subject grows, and the caster must buy it with the Size limitation (see *Strength*, p. B14). Use the subject's maximum SM to determine the limitation value. Note that if this additional ST is not enough to support the enlarged form of the subject, the spell fails!

Statistics: Affliction 1 (HT; Accessibility, Animals Only, -25%; Advantage, Animal Growth, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Notes:* "Animal Growth" is Growth (Magical, -10%; Maximum Size Only, +0%) [9]. Additional levels add further Animal Growth to the Advantage enhancement [+9].

Animal Messenger

Keywords: Resisted (Will).

Full Cost: 42 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent (until fulfilled).

Give an animal a command to carry an item that the caster gives it during the casting to a specific person named by the caster. The animal then tries to reach that person as fast as possible, using its own senses – it does not gain insight on the destination. Since many animals track their prey by scent, a sample of the target is recommended.

Once the animal delivers the item, the compulsion ends.

Statistics: Affliction 1 (Will; Accessibility, Animals Only, -25%; Based on Will, +20%; Disadvantage, Obsession (No self-control roll; Deliver the item), +13%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [42].

Animal Sleep

Keywords: Resisted (Will).

Full Cost: 40 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The subject animal falls asleep for 3 minutes, if it fails to resist. After this, it can be woken normally, but it will not necessarily wake up right away, especially if already tired. Upon waking up, the animal is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on animals, -25%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sleep, +150%; Sorcery, -15%) [40].

Animal Spirit

Keywords: Buff, Incarnum.

Full Cost: 34 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell's bonuses last for 3 minutes.

You bestow a small portion of the soul-energy of the animal kingdom on the subject. The soul energy lies dormant within the subject's body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul energy grants the subject a +1 bonus to Per and Night Vision 5. The caster may pay an additional point of essentia during the casting to increase the bonuses provided to +2 and Night Vision to 7.

Statistics: Affliction 1 (HT; Advantage, Animal Spirit, +100%; Advantage, Animal Spirit Bonus (Accessibility, Costs 1 ER, -10%), +65%; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Sorcery, -15%) [33]. *Notes:* "Animal Spirit" is Per+1 (Magical, -10%) [5] + Night Vision 5 (Magical, -10%) [5]. "Animal Spirit Bonus" is Per+1 (Magical, -10%) [5] + Night Vision 2 (Magical, -10%) [2].

Animate Fungus

Keywords: None.

Full Cost: 21 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Summon a spirit (IQ 9) to animate an existing living non-intelligent fungus. Its abilities and attributes depend on its body. This is entirely up to the GM. At the end of the casting, you must pay 1 FP and make a Will roll to animate the fungus. If you are victorious, the fungus is animated for margin of success hours.

If the animated fungus is destroyed, the summoner must wait a full day to call replacements. Dismissing the animating spirit is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the fungus'.

Statistics: Ally (Animated Fungus; Built on 50%; Constantly, no roll required; Adjustable, Fungi, +25%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [21]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Animate Machine

Keywords: Resisted (Will).

Full Cost: 53 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 3 minutes.

You can summon a spirit to possess and control a machine you can see or touch. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550).

If you win, your animated machine will obey your every command for 3 minutes. In effect, it temporarily gains the Reprogrammable disadvantage (B150), with you as his master. You do not have to maintain concentration to control the machine.

If you attempt to force the subject to act against its principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the machine wins, it breaks free. Roll at the moment of truth – you can march it to the edge of a cliff, but it doesn't roll until it's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Cybernetic Only, -50%; Fixed Duration, +0%; Independent, +70%; Sorcery, -15%) [53].

Animate Object

Keywords: None.

Full Cost: 13 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

This spell enables an inanimate object to flex. The minimum level required to animate an object equals its HP/4 if the object has Injury Tolerance (Unliving) or its HP/8 if its object has Injury Tolerance (Homogenous). An animated object can grab, lift, strike, and throw with ST equal to (4*Animate Object level needed to animate it). It has your DX. It can walk and jump if it isn't fixed in place; Move equals to 4*Animate Object level minus the level needed to animate it. You can use skills through animated objects – but note that object usually have No Fine Manipulators. Objects return to their rest state once you give up control. Animate Object requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn.

Statistics: Telekinesis 4 (Animation, -20%; Sorcery, -15%) [13]. Every additional level adds 4 more levels of Telekinesis [+13].

Animate Plant

Keywords: None.

Full Cost: 21 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Summon a spirit (IQ 9) to animate an existing living non-intelligent plant. Its abilities and attributes depend on its body. This is entirely up to the GM. At the end of the casting, you must pay 1 FP and make a Will roll to animate the plant. If you are victorious, the plant is animated for margin of success hours.

If the animated plant is destroyed, the summoner must wait a full day to call replacements. Dismissing the animating spirit is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the plant's.

Statistics: Ally (Animated Plant; Built on 50%; Constantly, no roll required; Adjustable, Plants, +25%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [21]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Animate Shadow

Keywords: None.

Full Cost: 50 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

The caster touches his subject and animates the subject's shadow that attacks him. The shadow has IQ 9, HT 10, DX equal to the caster's DX, and ST and Move equal to the subject's ST and Move. The shadow inflicts thrust-based fatigue damage with a touch, treating its Will as ST for the purpose of determining basic damage (pp. B15-16). When the subject's FP reaches zero, he falls unconscious and the spell is broken. An animated shadow may be attacked as per a Body of Shadow subject (see p. B114); if its HP reaches zero, it is "killed" and the subject regains his normal shadow. If the animated shadow is destroyed, the summoner must wait a full day to summon another one. Dismissing the animate shadow is a free action, but you may only dismiss him if it is physically present. You can only cast this spell if your character's point total is equal or bigger than the subject's.

Statistics: Ally (Animated Shadow; Built on 100%; Constantly, no roll required; Adjustable, Shadows, +25%; Conjured, +100%; Minion, +50%; Sorcery, -15%; Terminal Condition, Subject is out of FP, -10%) [50].

Animation

Keywords: None.

Full Cost: 23 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Summon a spirit (IQ 9) to animate an existing statue, painting, or other item. The object that is animated must depict or represent a human or animal. Its abilities and attributes depend on its body. This is entirely up to the GM – for instance, a painting could talk, but not move around while a statue might leave its base and move freely. At the end of the casting, you must pay 1 FP and make a Will roll to animate the object. If you are victorious, the object is animated for margin of success hours.

If the animated object is destroyed, the summoner must wait a full day to call replacements. Dismissing the animating spirit is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the object's.

Statistics: Ally (Animated Object; Built on 50%; Constantly, no roll required; Adjustable, Humanoid or animal-shaped object, +50%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [23]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Annihilation

Keywords: Resisted (HT).

Full Cost: 64 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

This spell instantly and irrevocably disintegrates a living being. Someone slain by Annihilation is turned to dust. Carried items are unaffected. A critical failure with this spell costs *the caster* 1 HT permanently!

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Based on IQ, Own Roll, +20%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Critical Failure, -30%; Sorcery, -15%) [64]. *Note:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies.

Ant Haul

Keywords: Buff.

Full Cost: 18.7 points for level 1 + 2.7 points/additional level.
Full Cost (KYOS): 22.7 points for level 1 + 6.3 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

This spell optimizes the subject's musculature for lifting, granting them Lifting ST 1 (p. B65) for each spell level.

Statistics: Affliction 1 (HT; Advantage, Ant Haul 1, +27%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18.7]. *Note:* Each level of "Ant Haul" is Lifting ST 1 (Magical, -10%) [2.7]. Additional levels add more Ant Haul (+27%) to the Advantage enhancement [+2.7].

Statistics (KYOS): Affliction 1 (HT; Advantage, Ant Haul 1, +63%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22.7]. *Note:* Each level of "Ant Haul" is Lifting ST 1 (Magical, -10%) [6.3]. Additional levels add more Ant Haul (+63%) to the Advantage enhancement [+6.3].

Anticipate

Keywords: Buff.
Full Cost: 26 points for level 1 + 15 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: One minute.

The subject defends against tricky attacks more easily. The *total* penalty to defend against attacks from the side, Deceptive Attacks, Dual-Weapon Attacks, and flails, and from Feints, is -1 less severe per level of this spell. Never gives a bonus.

Statistics: Affliction 1 (HT; Advantage, Anticipate 1, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [26]. Additional levels add further Anticipate to the Advantage enhancement [+15]. *Note:* Each level of "Anticipate" is Defense Bonus 1 (Accessibility, Only to eliminate penalties against attacks from the side, Deceptive Attacks, Dual-Weapon Attacks, flails, and Feints, -40%; Magical, -10%) [15], a meta-trait from *GURPS Supers*.

Anticipate Thoughts

Keywords: Resisted (Will).
Full Cost: 11.5 points/level.
Casting Roll: IQ.
Range: Unlimited.
Duration: 1 minute.

This spell taps into the target's mind so you get an impression of the actions it will take. The casting roll takes *no* range penalties. If the casting is successful, you gain a +1 bonus per level of this spell on to-hit rolls against the target and on all active defenses against attacks performed by the target. This spell can affect only one target at a time – recasting it to affect another target removes the previous effects.

Statistics: Defense Bonus 1 (Accessibility, Only against a single target, -50%; Fixed Duration, +0%; Link, +10%; No Signature, +20%; Reduced Duration, 1/3, -10%; Requires IQ vs. Will Roll, -20%; Sorcery, -15%; Takes Extra Time 1, -10%) [7.5/level] + DX+1 (Accessibility, Only attacks against the subject, -60%; Fixed Duration, +0%; Link, +10%; Magical, -10%; No Signature, +20%; Reduced Duration, 1/3, -10%; Requires IQ vs. Will Roll, -20%; Takes Extra Time 1, -10%) [4/level].

Antiemetic

Keywords: Buff.
Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: One minute.

The subject becomes more resistant to nausea, ignoring -1 in penalties from effects that cause it.

Statistics: Affliction 1 (HT; Advantage, Antiemetic, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Antiemetic" is Antiemetic (Magical, -10%) [1].

Antihistamine

Keywords: Buff.
Full Cost: 12 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: One minute.

The subject becomes more resistant to sneezing and itching, ignoring -1 in penalties from effects that cause it.

Statistics: Affliction 1 (HT; Advantage, Antihistamine, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Antihistamine" is Antihistamine (Magical, -10%) [1].

Antilife Shell

Keywords: Area (Leveled), Resisted (IQ).
Full Cost: 45 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Self.
Duration: 50 minutes.

Living creatures become unwilling to enter the area around you; any already within the area leave immediately. You may reduce the area effect if you wish to. A successful resistance roll allows the creature to remain within the area for three minutes, after which it must roll again.

Statistics: Affliction 1 (IQ; Accessibility, Living Creatures Only, -10%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Emanation, -20%; Extended Duration on Persistent, 100x, +80%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [45]. Additional levels add Area Effect (+50%) [+5].

Antimagic Field

Keywords: Area (Leveled).
Full Cost: 70 points for level 1 + 15 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

This spell creates a zone that negates magic. It completely prevents all magical powers from affecting anything in the area. Antimagic Field affects friendly and hostile abilities equally.

Antimagic Field only interferes with attempts to affect creatures and objects in the area directly. For instance, a mage could not cast Mental Stun on a creature in the area, but he could cast Poltergeist outside the area to throw rocks at the creature in the area.

Statistics: Static (Magic; Area Effect, 2 yards, +100%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%) [68] + Rules Exemption (Anti-magic Static can coexist with magical abilities) [1]. Additional levels increase Area Effect (+50%) [+15].

Antimagic Touch

Keywords: Resisted (Will).

Full Cost: 43 points.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 3 minutes.

This spell lets the caster neutralize all of his victim's magical abilities. He must touch the subject. This requires an Attack maneuver in melee combat. On a hit, roll a Quick Contest of Will. The victim gets a bonus equal to his best Talent (Sorcery Talent or Magery).

If the caster wins, he neutralizes his victim's powers for 3 minutes. If the caster loses or ties, there's no effect – but critical failure on the caster's Will roll cripples this spell for 1d hours.

Once the caster has neutralized a given subject, he can't affect him again until his powers recover. Multiple attackers can use Antimagic Touch or similar neutralizing abilities on the same target. Use only the longest duration; their abilities don't "add" in any way.

This spell only deprives the subject of the magical abilities, it doesn't affect Talent.

Statistics: Neutralize Magic (Fixed Duration, +0%; Sorcery, -15%) [43].

Antimatter Beam

Keywords: Missile, Obvious.

Full Cost: 39 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 1,000 yards.

Duration: Instantaneous.

You fire a beam of antimatter at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. Antimatter Beam range in atmosphere is 1,000 yards divided by atmospheric pressure, 1/2D range is 200 yards divided by atmospheric pressure. It does 2d(3) crushing radiation surge damage per level of this spell. The attack produces an explosion at the point of impact (on a miss, check for scatter; see p. B414). The target takes damage normally; anything nearby receives "collateral damage" equal to basic damage divided by (3 x distance in yards from the blast). The GM must determine what the maximum level available in the campaign is.

Statistics: Crushing Attack 2d (Armor Divisor, (3), +100%; Explosion 1, +50%; Increased 1/2D, 2x, +5%; Increased Range, 10x, +30%; Radiation, +100%; Sorcery, -15%; Surge, +20%) [39/level].

Antimatter Blast

Keywords: Missile, Obvious.

Full Cost: 504,408 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 10,000 yards.

Duration: Instantaneous.

You launch a 0.1 microgram of antimatter at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 6dx4 burning explosion surge damage plus 6dx10,000 toxic radiation damage. This spell has no 1/2D range – it does full damage at any range. The attack produces an explosion at the point of impact (on a miss, check for scatter; see p. B414). The target takes burning damage normally; anything nearby receives "collateral damage" equal to basic damage divided by distance in yards from the blast, but the toxic radiation damage is divided by square of the distance.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own antimatter blast!

Statistics: Burning Attack 6dx4 (Explosion 3, +150%; Increased 1/2D, 10x, +15%; Increased Range, 100x, +60%; Link, +10%; Magical, -10%; Nuisance Effect, Dangerous to be parried, -5%; Surge, +20%) [408] + Toxic Attack 6dx10,000 (Explosion, Variant, +20%; Increased 1/2D, 10x, +15%; Increased

Range, 100x, +60%; Link, +10%; Nuisance Effect, Dangerous to be parried, -5%; Radiation, +25%; Sorcery, -15%) [504000].

Antimetal Arm

Keywords: None.

Full Cost: 9 or 18 points.

Casting Roll: None. Use any unarmed Parry+3 to defend.

Range: Self.

Duration: Indefinite.

Like Iron Arm (*GURPS Sorcery: Protection & Warning Spells*, p. 7), but can only be used against metal weapons.

Statistics: Enhanced Parry 3 (Bare Hands; Accessibility, Only against metal weapons, -20%; Accessibility, Striker only, -20%; Magical, -10%) [8] + Striker (Crushing; Accessibility, Only against metal weapons, -20%; Cannot attack, -80%; Limb, Arm, -20%; Magical, -10%) [1]. The improved version adds Trained by a Master (Accessibility, Only to reduce penalty for multiple unarmed Striker parries, -60%; Magical, -10%) [9].

Antiplant Shell

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 42 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: 50 minutes.

Plant creatures become unwilling to enter the area around you; any already within the area leave immediately. You may reduce the area effect if you wish to.

While this spell is technically resisted by each plant's IQ, in practice the GM should bother only for extraordinary plants. If so, victory allows the plant to remain within the area for three minutes, after which it must roll again.

Statistics: Affliction 1 (IQ; Accessibility, Plants Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Emanation, -20%; Extended Duration on Persistent, 100x, +80%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [42]. Additional levels add Area Effect (+50%) [+5].

Antipsi Weapon

Keywords: Weapon Buff.

Full Cost: 59 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim. Use Will to suppress abilities.

Range: 100 yards.

Duration: 30 minutes.

This spell imbues the weapon with antipsionic properties. When the wielder hits a psi with this weapon, he must roll a Quick Contest of Will. The victim gets a bonus equal to his best psionic Talent.

If the wielder wins, he neutralizes his victim's psionic powers for 3 minutes. If the wielder loses or ties, there's no effect – but critical failure on the wielder's Will roll disables this property for 1d hours.

Once the wielder has neutralized a given subject, he can't affect him again until his powers recover. Multiple attackers can use Antipsi Weapon or similar neutralizing abilities on the same target. Use only the longest duration; their abilities don't "add" in any way.

This enchantment only deprives the subject of the psionic abilities, it doesn't affect Talent.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Antipsi Weapon, +450%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [59]. *Note:* "Antipsi Weapon" is Neutralize Psi (Fixed Duration, +0%; Follow-Up, This weapon, +0%; Magical, -10%) [45].

Antistatic

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell gives the subject a negative electrical charge that diverts incoming electrical attacks, giving him +2 to dodge them.

Statistics: Affliction 1 (HT; Advantage, Antistatic, +150%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [31]. *Note:* "Antistatic" is Enhanced Dodge 2 (Limited, Electricity, -40%; Magical, -10%) [15].

Anvil Strike

Keywords: Missile.

Full Cost: 161 points.

Casting Roll: None. Use Artillery (Bombs) to hit.

Range: 100 yards.

Duration: Instantaneous.

You create an iron anvil 100 yards above the ground and drop it at a single target. Use Artillery (Bombs) to hit, applying normal range penalties. On a critical failure, the caster hits himself! It does 28d crushing damage. Since the anvil falls from above, it bypasses any cover that does not provide overhead protection, and negates attack penalties to hit crouching, kneeling, sitting, or prone targets. This spell has no 1/2D range – it deals full damage at any range. The anvil disappears two minutes after it hits.

Note that the "anvil" does not have to take the shape of an anvil; the mage creates the shape of the "anvil" at casting time. Common forms are round balls, rectangular and pyramidal prisms, and, of course, the obligatory anvil shape.

Statistics: Crushing Attack 28d (Increased 1/2D, 10x, +15%; Nuisance Effect, Critical Failure, -15%; Overhead, +30%; Sorcery, -15%) [161].

Apocalypse

Keywords: Area (Leveled), Obvious.

Full Cost: 6 points for level 1 + 2.5 points/additional level (or more).

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You create a blazing inferno of flames that emanates from you and deals everything around you 1d burning damage. You are unharmed by this attack. The GM may allow versions of this spell that deal higher damage.

Statistics: Burning Attack 1d (Area Effect, 2 yards, +50%; Emanation, -20%; Sorcery, -15%; Variable, +5%) [6]. Further levels add more Area Effect (+50%) [+2.5].

Apply Poison

Keywords: None.

Full Cost: 12 points.

Casting Roll: None.

Range: 10 yards.

Duration: Instantaneous.

The caster touches a source of poison (a flask or another container, or teeth dripping with venom, etc.) and instantly applies the poison to the target weapon. Note that one dose of poison is

required to envenom the *tip* of a piercing or impaling weapon. Poisoning the edge of a weapon, so that a cutting attack can deliver it, requires three doses per yard of reach. This also works on natural weapons, such as teeth or claws.

Statistics: Telekinesis 1 (One Task, Applying poison, -60%; Reduced Time 10, +200%; Sorcery, -15%) [12].

Apportation

Keywords: None.

Full Cost: 2 points for level 1 + 1 point/additional level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can move objects without touching them. You lift and move distant objects just as if you were grasping them in a pair of hands with ST equal to your Apportation level. You can move any object you have strength enough to lift at Move 1, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17). Regardless of level, maximum range is 10 yards.

Apportation requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Apportation may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pick up an object or a Move maneuver to lift and carry it.

No rolls are necessary for ordinary lifting and movement. In situations where you would roll against ST, roll against your Apportation level instead.

Statistics: Telekinesis 1 (Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; No Fine Manipulations, -20%; Sorcery, -15%) [2]. Each additional level adds Telekinesis 1 (Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; Lift Only, -20%; No Fine Manipulations, -20%; Sorcery, -15%) [1].

Arachnid Control

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single arachnid – or of one square yard of a swarm of smaller arachnids. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only arachnids with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for arachnids with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Arachnids only, -40%; Sorcery, -15%) [23].

Arboreal Immurement

Keywords: Resisted (HT).

Full Cost: 110 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

If the subject fails to resist, he is instantly swallowed by the nearest tree within 5 yards large enough to contain him. He remains in suspended animation (doesn't need to breathe, drink, eat, doesn't age) in a tiny cylindrical chamber inside the tree, until rescued by chopping through the tree or the cancellation of the spell.

A mage who casts Arboreal Immurement on himself may elect to stay awake, but this is unwise unless he can create air!

Statistics: Affliction 1 (HT; Advantage, Suspended Animation, +590%; Environmental, Target within 5 yards of a large enough tree, -40%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Selectivity, Only to remove suspended animation on yourself, +5%; Terminal Condition, Freed by chopping through the tree, -10%; Sorcery, -15%) [110]. *Note:* "Suspended Animation" is Doesn't Breathe (Magical, -10%) [18] + Doesn't Eat or Drink (Magical, -10%) [9] + Doesn't Sleep (Magical, -10%) [18] + Unaging (Magical, -10%) [14].

Arc

Keywords: Jet, Obvious.

Full Cost: 15 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of lightning erupts from your hand. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning surge damage with dice equal to your level of this spell. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover. The spell has no 1/2D range. Lightning behaves unpredictably around conductors; see *Lightning (GURPS Magic, p. 196)* for more details. The GM must determine what the maximum level available in the campaign is.

This jet lasts until the beginning of your next turn, allowing you to parry incoming attacks with it. If a parry is successful, your jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if you cast it every turn, it never "flickers out" and you can continue to attack with it normally.

Statistics: Burning Attack (Destructive Parry, +10%; Increased 1/2D, 2x, +5%; Jet, +0%; Melee-Capable, Reach 1, +15%; Nuisance Effect, Behaves erratically around conductors, -5%; Reflexive, +40%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [15/level]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Arcane Suppression

Keywords: Area (Leveled).

Full Cost: 55 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

This spell creates a zone that interferes with magic. Anyone attempting to use a magical ability that requires a roll into or through the area of Arcane Suppression immediately loses 1 FP (1d FP on a critical failure), in addition to any other effects. Creatures with passive magical abilities lose 1 FP per minute in the area of Arcane Suppression.

Statistics: Static (Magic; Area Effect, 2 yards, +100%; Doesn't provide immunity, -100%; Ranged, +40%; Sorcery, -15%; Tiring, +50%; Variable, Area, +5%) [54] + Rules Exemption (Anti-magic Static can coexist with magical abilities) [1]. Additional levels increase Area Effect (+50%) [+15].

Arching Weapon

Keywords: Weapon Buff.

Full Cost: 40 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

This spell lets a ranged weapon arch up over the target and strike from the top, regardless of its normal ballistics. Effects are identical to Overhead (p. B107): the attack bypasses any cover that doesn't offer overhead protection, negates penalties to hit for low target postures, and gives the victim -2 to defend the first time he's attacked (after that, he'll be on the lookout!).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Arching Weapon, +260%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [40]. *Notes:* "Arching Weapon" is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Arching Shot imbuelement skill.

Archmagi's Recuperation

Keywords: None.
Full Cost: 90 points.
Casting Roll: None. Does not cost FP.
Range: Self.
Duration: Indefinite.

While this spell is active, you recover 1 FP per second. This spell does not cost any FP and does not need to be maintained.

Statistics: Regeneration (Very Fast; Fatigue Only, -0%; Magical, -10%) [90].

Arctic Blast

Keywords: Obvious.
Full Cost: 16 points/level.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 10 yards.
Duration: Instantaneous.

You fire a cone of intense cold that does 1d non-incendiary burning damage per level. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell's maximum range. This spell has the 1/2D range of 5 yards. It causes large-area injury (p. B400), on top of which victims must make a HT roll at -1 per full two points of injury or be paralyzed for (HT – 20) seconds: too cold to move, encased in ice, frozen solid, nearly extinguished, etc., as fits the target.

Statistics: Burning Attack 1d (Cone 5, +100%; Increased 1/2D, x5, +10%; No Incendiary Effect, -10%; Reduced Duration on Side Effect, 1/60, -35%; Reduced Range, 1/10, -30%; Side Effect, Paralysis, +200%; Sorcery, -15%) [16/level].

Arrow

Keywords: Missile, Obvious.
Full Cost: 9 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You launch an iron arrow at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d impaling damage or 1d-1(2) piercing damage (for a bodkin point) per level of this spell. The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Statistics: Impaling Attack 1d (Blockable, -5%; Sorcery, -15%) [7] + Piercing Attack 1d-1 (Armor Divisor, (2), +50%; Blockable, -5%; Sorcery, -15%) [6/5 = 2].

Ashen Path

Keywords: Area (Fixed).

Full Cost: 7 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster makes himself the center of a small, powerful area of fire and destructive energy that ignites flammable objects in his hex and adjacent hexes. Every second, consult *Making Things Burn* (p. B433) – a target rated from Super-Flammable to Resistant ignites immediately. Anything more resistant to fire may catch if it stays in the area of effect for a longer time. Roll 3d after every 10 seconds of uninterrupted presence in the area; Highly Resistant materials (including flesh) catch on a 16 or less, while Nonflammable ones catch only on a 6 or less. This spell does no actual damage to the targets, though they will likely take damage from the resultant fire.

Statistics: Burning Attack 3 points (Area Effect, 2 yards, +50%; Aura, +80%; Incendiary, +10%; Melee Attack, Reach C, -30%; No Signature, +20%; No Wounding, -50%; Sorcery, -15%) [7].

Assassin's Bane

Keywords: Buff.

Full Cost: 29 points for level 1 + 17 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject, and all of his carried gear, is protected by an invisible field of pure force, but *only from the back*. This increases his DR by twice the level of this spell (e.g., Assassin's Bane 3 adds DR 6), cumulative with that from actual armor against attacks made from the back.

In addition, this spell reflects any damage it stops at the subject's attacker. The remaining damage affects the subject normally. The attacker doesn't get an active defense against the first attack the spell reflects back at him, but gets his usual defenses against subsequent reflected attacks. Reflection only works vs. direct hits!

Statistics: Affliction 1 (HT; Advantage, Assassin's Bane 1, +170%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. Additional levels add further Assassin's Bane to the Advantage enhancement [+17]. *Notes:* Each level of "Assassin's Bane" is Damage Resistance 2 (Directional, Back, -40%; Force Field, +20%; Magical, -10%; Reflection, +100%) [17].

Assassin's Weapon

Keywords: Weapon Buff.

Full Cost: 90 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Turns a melee weapon or a round of ammunition (e.g., arrow or bullet) into a vehicle of death. Cannot be cast on a missile weapon such as a bow or a gun – only on its ammo. Any living being hit by an Assassin's Weapon must resist with HT. Failure means a fatal wound causing immediate death, however improbable. Check for the weapon's mundane effects (penetration, wounding, etc.) only after the resistance roll.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Assassin's Weapon, +800%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [90]. *Note:* "Assassin's Weapon" is Affliction 1 (HT; Accessibility, Only on living beings, -10%; Cosmic, Irresistible

Attack, +300%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Follow-Up, This weapon, +0%; Heart Attack, +300%; Magical, -10%; No Signature, +20%) [80].

Astragyromancy

Keywords: Information.

Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Astragyromancy is divination through reading dice marked with various symbols, numbers and letters. A special set of dice is required, costing \$25.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires special dice, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Astral Block

Keywords: Area (Leveled), Obvious.

Full Cost: 167 points for level 1 + 40 points/additional level (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Indefinite.

The sorcerer conjures a translucent dome that repels (or at least slows) all insubstantial creatures and attacks. Any insubstantial, astral, or ethereal creature wishing to cross the barrier may try to force its way through it as a free action (one attempt per turn): the foe rolls thrust damage and if this overcomes the Astral Block’s DR, it gets through. This does not dispel the dome, which simply seals closed behind it. Slams and collisions with the dome inflict their usual damage for the purpose of breaking through, but the collider takes no damage, as the dome absorbs kinetic force.

The dome gives DR against all insubstantial attacks.

In addition, insubstantial creatures within an Astral Block cannot become substantial, and vice versa. Thus, a sorcerer could not cast Ethereal Body within the area of a spell, while a ghost would be unable to use Solidify. A ghost already in a tangible state could not become insubstantial!

By default, Astral Block provides DR 10. However, more potent versions are available that multiply DR and full cost (actually 112.5 before rounding) by the same amount:

DR	Full Cost
10	167 points for level 1 + 40 points/additional level
20	262 points for level 1 + 65 points/additional level
30	357 points for level 1 + 90 points/additional level
50	547 points for level 1 + 140 points/additional level
100	1022 points for level 1 + 265 points/additional level

Statistics: Damage Resistance 10 (Affects Others, +50%; Area Effect, 2 yards, +50%; Force Field, +20%; Limited, Insubstantial, -60%; Link, +10%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%; Visible, -10%) [95] + Static (Substantiality Changes; Area Effect, 2 yards, +100%; Link, +10%; Ranged, +40%; Magical, -10%) [72]. Additional levels increase Area Effect (+50%) to both advantages [+40]. More powerful versions multiply DR by 2, 3, 5, or 10. *Notes*: “Does not damage those colliding with it” is a 0-

point special effect of DR with Affects Others, Area Effect, and Force Field. As a special effect, this forms a hemispherical dome, not a cylinder.

Astral Projection

Keywords: None.

Full Cost: 30 points.

Casting Roll: IQ. Special casting time (see below).

Range: Self.

Duration: Indefinite.

You leave your body behind, unconscious, while projecting your spirit to the Astral Plane. While there, you cannot cast spells or otherwise affect the world in any meaningful way. Your spirit form is visible, but insubstantial. This spell can be maintained indefinitely, but your body's need to eat, drink, sleep, etc. effectively limits the duration to a day or so – longer if your body is left with friends, in a hospital, or otherwise cared for.

On the Astral Plane, projectors (but not native astral denizens) are attached to their body by a slim silver cord, which fades to invisible after about 20 feet. The cord always "points" in the direction of the projector's body.

Unlike most spells, Astral Projection takes 10 or 11 seconds to cast instead of one or two. You can speed this up by taking -1 to skill for each second omitted (maximum -10).

Statistics: Jumper (World; Improved, +10%; Limited Access, -20%; Magical, -10%; Projection, Cannot affect new world, -50%) [30]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Astral Vision

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell allows the subject to see invisible insubstantial entities. Examples include ghosts and subjects of Ethereal Body, Projection, or Astral Trip spells.

Statistics: Affliction 1 (HT; Advantage, Astral Vision, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. Notes: "Astral Vision" is See Invisible (Insubstantial; Magical, -10%) [14].

Astrology

Keywords: Information.

Full Cost: 40 or 90 points.

Casting Roll: Astronomy. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Astrology is divination through examination of the heavens, including weather. Observation of the sky is necessary; the caster must be outside, and is at a -5 penalty unless it is a clear night, away from city lights. Without a reference library (cost \$2,000; weight 200 pounds), all rolls are at -5. If the divination involves an individual, however, his birthplace and birthdate must be known, or all rolls are at -5.

The basic (40-point) version of this spell requires 10 minutes to cast! The improved (90-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Environmental, Outdoors, -20%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a reference library, -10%) [40]. The improved version adds Reduced Time 10 (+200%) [+50].

Attract Flames

Keywords: Area (Special).

Full Cost: 38 points for level 1 + 28 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Special.

This spell draws flames towards the subject, as if the mage cast a Shape Fire spell with the focus on the victim's current hex. Flames within yards equal to the spell level will be drawn towards the victim's hex at a rate of 1 yard per turn, as long as the caster concentrates and for 10 seconds after he stops.

In addition, the victim is at +1 to be hit with flame spells, flame weapons, and other flame attacks and he is at -1 to all rolls (including resistance rolls) to avoid flames and fire magic or to put out fires.

Statistics: Control Fire 1 (Accessibility, Only to attract flames to the target, -60%; Cannot concentrate to extend duration, -10%; Collective, +100%; Nuisance Effect, Cannot exempt people from effects, -5%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [38]. Additional levels add Control Fire +1 (Accessibility, Only to attract flames to the target, -60%; Cannot concentrate to extend duration, -10%; Collective, +100%; Nuisance Effect, Cannot exempt people from effects, -5%; Persistent, +40%; Only increases area of effect, -50%; Ranged, +40%; Sorcery, -15%) [28]. *Note:* As this is one advantage (Control Fire) with the Sorcery limitation, not two, it costs only 1 FP to use.

Augury

Keywords: Information.

Full Cost: 42 or 92 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Augury is the study of portents or omens. The exact nature of the omens is dependent on the culture of the diviner. The GM must roll against the caster's Vision in secret. On a failed roll, the roll to cast Augury is made at -5.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks." Augury is not ideal for divining the past; time modifiers are doubled when using augury to ask questions about past events.

The basic (42-point) version of this spell requires 10 minutes to cast! The improved (92-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, doubled for the past, -15%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires Vision Roll, -10%) [42]. The improved version adds Reduced Time 10 (+200%) [+50].

Aura

Keywords: Information.

Full Cost: 20 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

The caster sees an aura around living beings. This aura gives the caster a general insight into the subject's personality – the better the follow-up IQ roll, the better the insight. On a successful IQ roll, the aura also shows whether the subject has Magery, Magic Resistance, or Magic Susceptibility (and what level); whether the subject is possessed or controlled in any way; and whether the subject is in the

grip of any violent emotion. A critical success on the IQ roll will detect “secret” traits, such as lycanthropy, vampirism, and unnatural longevity.

All living beings have auras; inanimate things do not. A zombie is detectable by his faint, death-haunted aura, while a vampire retains the aura he had in life. Illusions and created beings have no aura, so a successful casting of this spell distinguishes them from real persons.

Statistics: Detect Aura (Sorcery, -15%; Vision-Based, -20%) [20].

Aura of Unluck

Keywords: None.

Full Cost: 31 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster surrounds himself with a baleful aura of misfortune. Creatures using mundane and supernatural senses to perceive you attack you at -2. Golems, robots, and other machines are not affected by this, as long as they use technological sensors.

Statistics: Obscure 2 (Anti-Targeting, -20%; Cosmic, All Mundane Senses, +300%; Cosmic, All Supernatural Senses, +300%; Defensive, +50%; No Area Effect, -50%; Sorcery, -15%; Stealthy, +100%) [31].

Automatic Reloading

Keywords: None.

Full Cost: 7 points/level.

Casting Roll: None.

Range: 1 yard.

Duration: Indefinite.

While this spell is active, the caster effectively has a second pair of hands with ST equal to (4*spell level) that can only be used to reload bows, crossbows, or firearms. The weapon being reloaded and the ammunition must be within 1 yard of the caster. This will allow him to draw an arrow and Ready a bow in 1 second, reload a crossbow in 2 seconds, etc.

Statistics: Telekinesis 4 (Independent, +40%; Reduced Range, 1/10, -30%; One Task, Reloading, -60%; Sorcery, -15%) [7]. Each additional level adds Telekinesis 4 [+7].

Avatar

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

Whenever the subject is mentally contacted by a Communication & Empathy spell, his identity is reliably validated via a clear mental image. The same applies to the subject contacting others with such spells.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Avatar (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Avatar, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* “Avatar” is Avatar (Magical, -10%) [1].

Avoid

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 128 points for level 1 + 25 points/additional level.
Casting Roll: IQ.
Range: Unlimited.
Duration: 1 hour.

Makes the subject area unattractive to all sapient (IQ 6+) creatures except the caster. Entering characters will feel an intense unease, an urge to be somewhere else. The spell resists attempts to enter its area (roll caster's IQ vs. searcher's Will). Victims won't be aware of the repulsion if it can act in a subtle way (e.g., you just felt like sitting in front rather than in the middle...).

This is a subtle spell, and GMs should roll in secret to see if it works. If it does, the victims should not be told "You can't look in that closet," but just "you see nothing." The spell made them think they had checked the closet, or made each searcher think that another one had checked it... and so on.

If the subject resists, he cannot be affected by this spell again within 24 hours.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to compel the subject to avoid the area, -60%; Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Independent, +70%; Persistent, +40%; Rationalization, +20%; Sorcery, -15%) [128]. Additional levels add Area Effect (+50%) [+25].

Awaken

Keywords: None.
Full Cost: 66 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

You can neutralize ongoing sleep or unconsciousness caused by spells, powers, Afflictions, Affliction-like effects of the Side Effect and Symptoms enhancements. This requires a touch and a successful IQ roll, and costs 1 FP. Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP! This spell also instantly wakes creatures that are asleep naturally.

Statistics: Healing (Accessibility, Only to stop sleep and unconsciousness, -60%; Affliction Only, -40%; Capped, 8 FP, -10%; Magical, -10%; Reduced Fatigue Cost 7, +140%; Reliable 4, +20%; Xenohealing, Anything Alive, +80%) [66].

Awaken Animal

Keywords: Buff.
Full Cost: 210 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Truly Permanent.

You imbue an animal with sentience. The animal is granted additional 2d levels of IQ and loses the Wild Animal meta-trait. This spell is Truly Permanent – it cannot be dispelled, even with Remove Curse, and the effects do not stop working in no-mana zones.

Statistics: Affliction 1 (HT; Accessibility, Animals Only, -25%; Advantage, Awaken Animal, +1,400%; Extended Duration, Truly Permanent, +300%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Wild Animal, +300%; No Signature, +20%; Sorcery, -15%) [210]. *Note:* "Awaken Animal" is IQ+7 [140].

Awaken Building

Keywords: Buff.
Full Cost: 138 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.
Duration: 30 minutes.

This spell grants a building awareness and sapience. It can perceive structural stresses and compensate for them, giving it +2 to HT. In addition, it can open or shut doors or windows, make creaking noises with its floorboards, and, at higher TLs, turn faucets or switches on and off. Including bells, organ pipes, or other sound generators during construction can give a structure more ways to communicate.

An awakened building can help secure itself against intruders, using its control of the structure to perform hostile actions. A building spirit that isn't treated with respect by the legitimate occupants may start treating them as intruders.

Statistics: Affliction 1 (HT; Accessibility, Only buildings, -50%; Advantage, Awaken Building, +1,220%; Disadvantage, Intolerance (Intruders and disrespectful occupants), +5%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [138].
Note: "Awaken Building" is HT+2 (Magical, -10%) [18] + IQ+6 (Magical, -10%) [108].

Awaken Construct

Keywords: Buff.
Full Cost: 230 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Truly Permanent.

You imbue a construct (golem, robot, etc.) with sentience. The construct is granted additional 2d levels of IQ and loses the Reprogrammable and Slave Mentality disadvantages, if it had them. This spell is Truly Permanent – it cannot be dispelled, even with Remove Curse, and the effects do not stop working in no-mana zones.

Statistics: Affliction 1 (HT; Accessibility, Constructs Only, -25%; Advantage, Awaken Construct, +1,400%; Extended Duration, Truly Permanent, +300%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Reprogrammable, +100%; Negated Disadvantage, Slave Mentality, +400%; No Signature, +20%; Sorcery, -15%) [230]. *Note:* "Awaken Construct" is IQ+7 [140].

Awaken Craft Spirit

Keywords: Resisted (HT).
Full Cost: 19 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

Every well-crafted object, whether a tool, a weapon, or a work of art, may contain a spirit slumbering within it, if the setting has them. This spell allows the caster to awaken the spirit of any item created by an artisan with a margin of success by 5 or more (the GM can assume this was the case for an artisan with skill of at least 15, or for any fine or very fine item). Any item created with Inspired Creation has a craft spirit.

By touching a well-crafted object, the caster can force it to answer any one specific question that the craft spirit can answer with a brief sentence.

The subject spirit resists with the item's HT. If you win, you awaken the craft spirit and force it to give you the answer. The answer is what the spirit believes to be true – if he doesn't know, he'll tell you.

Statistics: Mind Probe (Accessibility, Only on well-crafted objects, -60%; Cosmic, Works on inanimate things, +50%; Based on HT, +20%; Sorcery, -15%) [19].

Awaken Plant

Keywords: Buff.
Full Cost: 208 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Truly Permanent.

You imbue a plant with sentience. The plant is granted additional 2d levels of IQ and loses the Wild Animal meta-trait, if possible. This spell is Truly Permanent – it cannot be dispelled, even with Remove Curse, and the effects do not stop working in no-mana zones.

Statistics: Affliction 1 (HT; Accessibility, Plants Only, -40%; Advantage, Awaken Plant, +1,400%; Extended Duration, Truly Permanent, +300%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Wild Animal, +300%; No Signature, +20%; Sorcery, -15%) [208]. *Note:* “Awaken Plant” is IQ+7 [140].

Awe

Keywords: Area (Fixed).
Full Cost: 42 points for level 1 + 14 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous.

You strike awe into the hearts of sapient (IQ 6+) beings. You can target any area within 100 yards and affect everyone within a 10-yard radius – this is not selective and (unlike most Area spells) you cannot reduce the area! Those in the area must roll a Fright Check, applying any Magic Resistance as a bonus. Your victims get +1 per Fright Check after the first within 24 hours, and anyone who succeeds is immune to this spell for an hour. Use the Awe variant table from *GURPS Powers*, page 85.

Each additional level of this spell imposes -1 to the Fright Check. For example, with Terror 4, the subjects must make Fright Checks at -3.

This spell is not Resisted; the chance to succeed at the Fright Check takes the place of a normal resistance roll.

Statistics: Terror (Awe; Accessibility, Only sapient beings, -10%; Presence, +25%; Ranged, +40%; Sorcery, -15%) [42]. Additional levels add -1 to the Fright Check [+14].

Axiomatic Weapon

Keywords: Weapon Buff.
Full Cost: 11 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

Allows the weapon enchanted to ignore DR (Not vs. Lawful) of some creatures, such as slaadi, and deal additional damage to creatures with Vulnerability to axiomatic weapons.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Axiomatic Weapon, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11]. *Note:* “Axiomatic Weapon” is Axiomatic Touch (Magical, -10%) [1].

Babble

Keywords: Resisted (Will).
Full Cost: 46 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Nine seconds.

This spell causes the target to break into a fit of bizarre, uncontrollable babbling. The target loses its ability to speak coherently. The babbling gives +4 to Sense rolls to hear the target or -2 to its Stealth rolls, as the situation warrants. In some circumstances, it might also give -2 to reactions. In

addition, anyone who hears the target's babbling must roll a Fright Check. Creatures get +1 per Fright Check after the first within 24 hours, and anyone who succeeds is immune to the Fright Checks caused by this spell for an hour. Use the Confusion variant table from *GURPS Powers*, page 85.

Statistics: Affliction 1 (Will; Advantage, Babble, +210%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [46]. *Note:* "Babble" is Terror (Confusion; Hearing; Magical, -10%; Temporary Disadvantage, Cannot Speak, -15%; Temporary Disadvantage, Noisy 2, -8%) [21].

Backtrack

Keywords: None.

Full Cost: 7 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can rewind time for just a moment to try to defend against an attack one more time.

Once per hour of *play* (or once per day of game time, if you prefer to use game time), the caster may reroll a single active defense die roll twice and take the best of the three rolls! He must declare that he is using this spell immediately after he rolls the dice. Once he or anyone else has made another die roll, it is too late to use Backtrack. If the caster already has used Backtrack in the last hour of play (or day of game time, if you prefer to use game time) or other forms of the Luck advantage, he cannot use it again, until enough time passes, even if he switches to a different spell.

Statistics: Luck (Defensive, Only active defenses, -40%; Sorcery, -15%) [7].

Badger Paws

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

Subject can use their bare hands dig as if equipped with a shovel. See *Digging* (p. B350) for speed.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Burrower (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Badger Paws, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Badger Paws" is Burrower (Magical, -10%) [1].

Balance

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You subject gains the Perfect Balance (p. B74) advantage for the duration of this spell.

Statistics: Affliction 1 (HT; Advantage, Balance, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Balance" is Perfect Balance (Magical, -10%) [14].

Baleful Polymorph

Keywords: Resisted (Will).
Full Cost: 63 points or more.
Casting Roll: Will.
Range: Unlimited.
Duration: Permanent.

The caster transforms the subject into an animal. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to be dispelled. This spell cannot be dispelled by Dispel Magic – it requires Remove Curse. Also, even if the polymorphed subject walks into a no-mana zone, he will not revert back – the changed shape is not considered a magical effect for these purposes. Each animal form is a different spell, to be learned separately. The caster may only learn the form of an animal with which he is familiar. If the subject is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The subject retains his intelligence, but gains all the physical attributes of the new form.

Statistics: Affliction 1 (Will; Advantage, Baleful Polymorph, +150%; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [63]. *Notes:* “Baleful Polymorph” is Alternate Form (Animal) [15]. This spell costs 63 points for a racial template worth no more than the subject’s native racial template. A more powerful form costs 63 points plus 90% of the difference in cost between the subject’s native template and that of the animal form. The caster may learn to affect more powerful subjects by investing more points into this spell.

Ball Lightning

Keywords: Missile, Obvious.
Full Cost: 14 points/level.
Casting Roll: None. Use Innate Attack (Projectile) to «lock on».
Range: 50 yards.
Duration: Instantaneous.

A sphere of lightning flies off your fingertips towards your target. A successful hit does 1d burning surge damage per level of this spell. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover.

You steer the sphere to the target using your own skill. This lets you ignore all range penalties to hit! If the target is so distant that the sphere needs multiple turns to reach it, you must take a Concentrate maneuver each turn. If you lose sight of the target while the attack is en route, your attack automatically misses. The sphere illuminates a 2-yard-radius area around itself when it moves.

The sphere moves 5 yards per second (this is its 1/2D characteristic). The sphere can hit a target at up to its 1/2D range on the turn you launch it. It requires multiple turns to reach more distant targets. Do not halve damage, but defer the attack roll until the attack reaches its target. For more information, see *Guided and Homing Weapons* (p. B412).

Statistics: Burning Attack 1d (Guided, +50%; Illumination, +5%; Reduced Range, x1/2, -10%; Side Effect, Stunning, +50%; Sorcery, -15%; Surge, Arcing, +100%) [14/level].

Ball of Annihilation

Keywords: Area (Fixed).
Full Cost: 512 points for level 1 + 44 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

You may create a microscopic black hole that can devour anything, including magic. This affects a single hex. To place the area at a distance, use Innate Attack (Gaze), with normal range penalties, but

at +4 for affecting an area. The black hole is under caster's control. The caster can Concentrate to move the black hole at Move equal to the spell's level. The singularity can pass through anything except a stasis field.

If the ball intersects someone, the victim must dodge *and* retreat to avoid being hit. Parrying or blocking is useless. Someone hit by the ball will suffer damage as a result of the tidal stresses and radiation it emits. The ball inflicts 7d corrosion damage with an infinite armor divisor, plus 1 rad per point of basic damage rolled. (See *Radiation*, p. B435, for effects of being irradiated.) The area surrounding the Ball of Annihilation is a one-yard no-mana area (although mana recovers if the ball moves away).

Statistics: Corrosion Attack 7d (Area Effect, 1 yard, +25%; Cosmic, Irresistible Attack, +300%; Link, +10%; Mobile 1, +40%; Persistent, +40%; Radiation, +100%; Sorcery, -15%) [420] + Mana Damper 4 (Area Effect, 1 yard, +50%; Ranged, +40%; Link, +10%; Magical, -10%; Mobile 1, +40%) [92]. Further levels add Mobile (+40%) to both advantages [+44].

Ball of Lightning

Keywords: Missile, Obvious.

Full Cost: 26 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to «lock on».

Range: 20 yards.

Duration: Instantaneous.

A ball of lightning flies off your fingertips towards your target. The ball floats right through windows, curtains, walls, and other nonmetallic obstacles. The ball explodes on the mental command of the caster or upon contact with a living being or metallic object. An explosion does 1d burning surge damage per level of this spell to everyone within four yards of the explosion point. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. The projectile is homing, so it steers itself. As it uses normal vision to seek its target, it does not ignore darkness penalties. To “lock on,” you must Aim at the target and make an unmodified skill roll. Do not roll against your skill to hit. Instead, use the attack's skill of 10 – plus Accuracy, if you made your skill roll – and ignore all range penalties. The projectile moves 4 yards per second. For more information, see *Guided and Homing Weapons* (p. B412).

Statistics: Burning Attack 1d (Area Effect, 4 yards, +100%; Cosmic, Passes through nonmetallic obstacles, +100%; Homing, +50%; Increased 1/2D, 2x, +5%; Reduced Range, x1/5, -20%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%; Triggered Delay, +50%) [26/level].

Balor's Eye Fire

Keywords: Jet, Obvious.

Full Cost: 7.5 points/level*.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of flame erupts from your eyes, much like the long tongue of a flamethrower. Use Innate Attack (Gaze) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning damage with dice equal to your level of this spell. The spell treats the flammability class (*Making Things Burn*, p. B433) of the subject as one step higher than it actually is. The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack (Cosmic, Higher Incendiary Level, +50%; Incendiary 1, +10%; Increased 1/2D, 2x, +5%; Jet, +0%; Sorcery, -15%) [7.5/level*].

* Calculate the total cost, then round up.

Bands of Steel

Keywords: Resisted (DX).

Full Cost: 81 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent, until destroyed, or until the victim breaks free.

You conjure bands of steel that bind the victim, pinning his arms to his torso, and tying the legs together. An additional steel band covers his mouth, preventing him from speaking. On a hit, your victim is pinned (see p. B370) and rooted in place. He cannot move his limbs or speak; his only options are to use purely mental abilities, to attack the bands with an Innate Attack, or to try to break free using ST (not Escape skill). The ST of this effect is equal 12, but you can layer additional attacks on a successfully bound victim. Each extra layer gives +1 to ST.

To break free, the victim must win a Quick Contest of ST against the ST of this spell. Each attempt takes one second. If he tries to break free and fails, he loses 1 FP and is only allowed a repeated attempt every 10 seconds – and on a 17 or 18, he becomes so entangled that he cannot escape on his own! Alternatively, he may try to destroy the bands with an Innate Attack (they hit automatically). External attacks on the bands of steel take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, p. B392).

The bands of steel have DR 4. Each point of damage reduces ST by one. At ST 0, the bonds are destroyed and the victim is freed

Statistics: Binding 12 (Based on DX, +20%; Engulfing, +60%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [81].

Banefire

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 76 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of sickly green fire – fire from the Realms of the Dead - that expands to cover an area; it is not technically an explosion, but the term has long since entered common use. Banefire only affects living creatures, causing them to age rapidly. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes 1d burning damage and ages 1d years. The banefire sticks to the target, damaging him again every 10 second for 4 more cycles. Each instance of damage, including the initial one, can be negated with a successful Will roll. If a victim successfully resists, the flames go out.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid dropping this at your own feet, where it detonates!

Statistics: [Ageing Attack](#) 1d (Accessibility, Only on living, -10%; Area Effect, 4 yards, +100%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Link, +10%; Nuisance Effect, Dangerous to be parried, -5%; Resistible, Will, -30%; Sorcery, -15%) [63] + Burning Attack 1d (Accessibility, Only on living, -10%; Area Effect, 4 yards, +100%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Link, +10%; Magical, -10%; Nuisance Effect, Dangerous to be parried, -5%; Resistible, Will, -30%) [13].

Banefire Dart

Keywords: Missile, Obvious.

Full Cost: 45 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a dart of sickly green banefire – fire from the Realms of the Dead - at a single target. The dart can be blocked or dodged. Banefire only affects living creatures, causing them to age rapidly.

Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d burning damage and ages the victim 1d years. The banefire sticks to the target, damaging him again every 10 second for 4 more cycles. The cycles can be stopped by dousing the flames with holy water. This is *injury* that comes right off HP – not damage that must penetrate DR again, be multiplied for damage type, and so forth. Each instance of damage, including the initial one, can be negated with a successful Will roll. If a victim successfully resists, the flames go out.

Statistics: [Ageing Attack](#) 1d (Accessibility, Only on living, -10%; Blockable, -5%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Link, +10%; Resistible, Will, -30%; Sorcery, -15%) [37] + Burning Attack 1d (Accessibility, Only on living, -10%; Blockable, -5%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Link, +10%; Magical, -10%; Resistible, Will, -30%) [8].

Banefire Jet

Keywords: Jet, Obvious.

Full Cost: 67 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of sickly green flame erupts from your hand, much like the long tongue of a flamethrower. Banefire only affects living creatures, causing them to age rapidly. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does 1d burning damage and ages the victim 1d years, but has 1/2D 5. The banefire sticks to the target, damaging him again every 10 second for 4 more cycles. The cycles can be stopped by dousing the flames with holy water. This is *injury* that comes right off HP – not damage that must penetrate DR again, be multiplied for damage type, and so forth. Each instance of damage, including the initial one, can be negated with a successful Will roll. If a victim successfully resists, the flames go out.

The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the acid stream is not interrupted and the caster may continue to attack with it normally.

Statistics: [Ageing Attack](#) 1d (Accessibility, Only on living, -10%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Destructive Parry, +10%; Jet, +0%; Link, +10%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Resistible, Will, -30%; Sorcery, -15%) [55] + Burning Attack 1d (Accessibility, Only on living, -10%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Destructive Parry, +10%; Jet, +0%; Link, +10%; Magical, -10%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Resistible, Will, -30%) [12]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Banefire Shield

Keywords: Buff.

Full Cost: 60 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is sheathed in banefire – sickly green fire from the Realms of the Dead - that deals 1d-1 burning damage to enemies who touch his body and ages them 1d-1 years. Banefire only affects living creatures, causing them to age rapidly. The banefire sticks to the target, damaging him again every 10 second for 4 more cycles. The cycles can be stopped by dousing the flames with holy water. This is *injury* that comes right off HP – not damage that must penetrate DR again, be multiplied for damage type, and so forth. Each instance of damage, including the initial one, can be negated with a successful Will roll. If a victim successfully resists, the flames go out.

Statistics: Affliction 1 (HT; Advantage, Banefire Shield, +480%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [60]. *Note:* "Banefire Shield" is [Ageing Attack](#) 1d-1

(Accessibility, Only on living, -10%; Aura, +80%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Magical, -10%; Melee Attack, Reach C, -30%; Resistible, Will, -30%) [38] + Burning Attack 1d-1 (Accessibility, Only on living, -10%; Aura, +80%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Magical, -10%; Melee Attack, Reach C, -30%; Resistible, Will, -30%) [9] + Illumination (Magical, -10%) [1].

Banefire Weapon

Keywords: Weapon Buff.

Full Cost: 57 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The target weapon is sheathed in banefire – sickly green fire from the Realms of the Dead - that deals 1d follow-up burning damage to living enemies and ages them 1d years. The banefire sticks to the target, damaging him again every 10 second for 4 more cycles. The cycles can be stopped by dousing the flames with holy water. This is *injury* that comes right off HP – not damage that must penetrate DR again, be multiplied for damage type, and so forth. Each instance of damage, including the initial one, can be negated with a successful Will roll. If a victim successfully resists, the flames go out. The wielder will find the weapon hot to the touch, but not uncomfortable to use. The weapon also will give off light as a torch.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Banefire Weapon, +470%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [57]. *Note:* “Banefire Weapon” is [Ageing Attack](#) 1d (Accessibility, Only on living, -10%; Follow-Up, This weapon, +0%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Magical, -10%; Resistible, Will, -30%; Visible, -10%) [38] + Burning Attack 1d (Accessibility, Only on living, -10%; Follow-Up, This weapon, +0%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Magical, -10%; Resistible, Will, -30%; Visible, -10%) [8] + Illumination (Magical, -10%) [1].

Banish

Keywords: Resisted (Will).

Full Cost: 58 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous, the subject cannot return for 1 month.

If the subject fails to resist, they are plane shifted back to their native plane, from where they cannot return for one month.

Statistics: Affliction 1 (Will; Based on Will, +20%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [58].

Battering Barrage

Keywords: Missile, Obvious.

Full Cost: 9.5 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You launch a barrage of force missiles at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. This attack has RoF 7 and Recoil 1. It does 1d crushing damage per level of this spell, affecting even insubstantial targets. Damage is doubled for the purpose of knockback. The missiles can be blocked.

Statistics: Crushing Attack 1d (Affects Insubstantial, +20%; Blockable, -5%; Double Knockback, +20%; Rapid Fire, RoF 7, +70%; Sorcery, -15%) [9.5/level].

Battering Ram

Keywords: Obvious.

Full Cost: 13 points.

Casting Roll: None. Use DX or Brawling to hit.

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster's arm is surrounded with a translucent arcane force that appeared in the form of a ram's head over their hand. He may use this magical weapon to strike creatures or objects, including insubstantial ones, but cannot parry with it. Battering Ram deals thrust+5 crushing damage, has Reach C, and benefits from the damage bonus from having Brawling at DX+2 or higher.

Statistics: Natural Weapon (Crushing; Affects Insubstantial, +20%; Cannot Parry, -40%; Increased Damage 5, +150%; Intangible, +50%; Single, -20%; Sorcery, -15%) [13].

Beacon

Keywords: Area (Special).

Full Cost: 120 points for level 1 + 19 points/additional level (or more).

Casting Roll: IQ.

Range: 100 yards.

Duration: 1 day.

Anyone attempting to magically teleport into the area is at +5 to skill. This includes spells or magical abilities to travel through time, dimensions, or gates. The first level of this spell covers an area five yards in radius; each additional level increases this by one yard.

More potent versions of this spell bestow a greater bonus to teleportation rolls and increase the initial area of effect. In all cases, further levels add the same +1 yard/level.

Bonus	Initial Radius	Full Cost
+5	Five yards	120 points for level 1 + 19 points/additional level
+10	10 yards	240 points for level 1 + 19 points/additional level
+15	15 yards	360 points for level 1 + 19 points/additional level

Statistics: Control Teleportation Magic 5 (Accessibility, Only to ease use when teleporting into the area, -70%; Cannot concentrate to extend duration, -10%; Extended Duration, x10,000, +160%; Nuisance Effect, Cannot exempt people from effects, -5%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [120]. Additional levels add Control Teleportation Magic +1 (Accessibility, Only to ease use when teleporting into the area, -70%; Cannot concentrate to extend duration, -10%; Extended Duration, x10,000, +160%; Nuisance Effect, Cannot exempt people from effects, -5%; Only increases area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [19/level]. The two stronger versions change the initial Control level to 10 [240] or 15 [360]. *Note:* As this is one advantage (Control Teleportation Magic) with the Sorcery limitation, not two, it costs only 1 FP to use.

Bear Hug

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell optimizes the subject's musculature for squeezing, granting the subject the Constriction Attack advantage (p. B43).

Statistics: Affliction 1 (HT; Advantage, Bear Hug, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Bear Hug" is Constriction Attack (Magical, -10%) [14].

Beast Link

Keywords: Resisted (Will).
Full Cost: 47 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Permanent (see text).

Establishes a mental link with an animal. The animal will not stray far from the caster after that (generally not more than a half-hour's travel). It will then come, once, whenever the caster wishes, at a fast but not killing pace. It must find the caster with its own senses, be it smell, sight, or hearing – it does not gain knowledge of the caster's location upon being called; it only gets the urge to find the caster. If it is a wild beast, any reactions must be re-determined when the creature arrives. Once the beast arrives, or once the caster casts this spell on another beast, the effect ends.

Statistics: Affliction 1 (Will; Accessibility, Only on animals, -25%; Based on Will, +20%; Disadvantage, Obsession (Stay close to the caster; No self-control roll), +12%; Disadvantage, Obsession (Follow the caster; No self-control roll), +12%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Terminal Condition, Called, -10%; Triggered Delay on the second Disadvantage, +50%) [47].

Beast Possession

Keywords: Resisted (Will).
Full Cost: 20 points.
Casting Roll: IQ.
Range: Touch.
Duration: 1 minute.

The caster moves his consciousness to an animal's body. Should his current body die, he will die! Thus, he must keep his current host alive.

To possess an animal, the caster must concentrate for one second and physically touch it. The victim resists at +5 if it is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that animal again – it is "immune" to him. If the caster wins, he takes over the animal's body, completely suppressing its personality. His previous host regains control of its body after 1d seconds of mental stun, and "comes to" with no memory of the possession.

The caster gains his new host's ST, DX, and HT (and secondary characteristics calculated from these scores), as well as its physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster's social traits may apply, depending on the laws and values of his society. The caster's IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

The caster can freely access the memories of the animal at any time. To recall a specific fact from the subject's memories requires a straight IQ roll, at no penalty for the time since takeover.

Statistics: Possession (Accessibility, Animals Only, -25%; Full Memory Access, +10%; Maximum Duration, 1 minute, -65%; Sorcery, -15%) [20].

Beast Seeker

Keywords: Information.
Full Cost: 7 points.
Casting Roll: Per.
Range: Unlimited.
Duration: Instantaneous.

The caster "homes in" on any animal, provided he has a piece of it (or something deeply connected to it) to attune to. "Homing in" requires a Per roll, modified by what "source of connection" the caster has and normal range penalties (p. B550). A piece of the animal (e.g., its fur or blood)

provides +2; a photograph provides +0; and a fresh footprint provides -4. On a success, the caster knows the direction, though not the distance, to his attuned subject.

Statistics: Slotted Cosmic Power 1 (5) (Limited, Trait, Detect Animals, -60%; Nuisance Effect, Must have something related to subject, -5%; Sorcery, -15%) [7].

Beast Shape

Keywords: None.

Full Cost: 60 points or 140 points or more; see text.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume different animal forms, as if using the Morph advantage (p. B84). The transformation requires 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. Such changes raise the cost of animal templates, which are cheap due to limited mental capabilities. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any animal species he can turn into.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his “slots” are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a “slot”.

If the caster can assume any racial template worth no more than his native one, Beast Shape costs 60 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 60 points. For instance, a human who can take on any animal racial template worth up to 75 points would pay 135 points for Beast Shape.

In addition, the caster may purchase the improved (140-point) version of this spell. This shortens the transformation time to 1 second.

Statistics: Morph (Accessibility, Animals Only, -25%; Sorcery, -15%) [60]. The improved version adds Reduced Time 4, +80% [+80].

Beast Speech

Keywords: None.

Full Cost: 22 points.

Casting Roll: None.

Range: Personal.

Duration: Indefinite.

You can converse with animals. The quality of information you receive depends on the beast’s IQ and the GM’s decision on what the animal has to say. It takes one minute to ask one question and get the answer – if the animal decides to speak at all.

Statistics: Speak with Animals (Sorcery, -15%) [22].

Beast Summoning

Keywords: Resisted (Will).

Full Cost: 114 points.

Casting Roll: Per to detect, IQ to analyze, IQ to assume control.

Range: Unlimited.

Duration: 3 minutes.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest animal. This spell uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the animal, and may first make a follow-up IQ roll with the same penalty to analyze the target (for example, to determine its health) and another follow-up IQ roll to call it to himself. It moves towards the caster as fast as it can, until the spell ends or the animal reaches the immediate vicinity of the caster.

Once the animal reaches the caster, it stays nearby, without attacking, until the spell ends. The spell is broken if the caster or one of his companions attacks the animal.

Statistics: Detect Animal (Link, +10%; Lock-On, +50%; Long-Range 1, +50%; Magical, -10%; Precise, +100%; Selective Effect, +20%) [64] + Mind Control (Accessibility, Animals Only, -25%; Accessibility, Only to make the animal travel to you, -80%; Fixed Duration, +0%; Independent, +70%; Link, +10%; Long-Range 1, +50%; Sorcery, -15%; Terminal Condition, Broken if attacked, -10%) [50].

Beast-Rouser

Keywords: Resisted (Will).

Full Cost: 25 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 3 minutes.

You can enrage any single animal – or of one square yard of a swarm of smaller animals (including insects). Only creatures with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for animals with IQ 6 and Bestial.

Statistics: Mind Control (Accessibility, Animals only, -25%; Accessibility, Only to enrage, -30%; Emotion Control, -50%; Independent, +70%; Sorcery, -15%) [25].

Beast-Soother

Keywords: Resisted (Will).

Full Cost: 25 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 3 minutes.

You can calm down any single animal – or of one square yard of a swarm of smaller animals (including insects). Only creatures with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for animals with IQ 6 and Bestial.

Statistics: Mind Control (Accessibility, Animals only, -25%; Accessibility, Only to calm down, -30%; Emotion Control, -50%; Independent, +70%; Sorcery, -15%) [25].

Bedtime Reading

Keywords: None.

Full Cost: 39 points.

Casting Roll: IQ.

Range: Touch.

Duration: One period of sleep.

Cast on a particular book, scroll, or other written work the caster is touching before he goes to sleep, this creates a dream analog of the work, which he may continue to read as he sleeps and dreams. This can allow the caster to count sleep time as study time.

Statistics: Mind Reading (Accessibility, Only on books, -50%; Accessibility, Only when going to sleep, -30%; Extended Duration, 1,000x, +120%; Independent, +40%; Maximum Duration, One night, -5%; Melee Attack, Reach C, -30%; Sorcery, -15%) [39].

Belch

Keywords: Resisted (HT).
Full Cost: 22 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

This spell causes the subject to burp loudly, giving +2 to Hearing to notice the victim and, usually, -1 to reaction towards them, if cast at an appropriate moment. Variants exist that cause flatulence and other body noises.

Statistics: Affliction 1 (HT; Disadvantage, Noisy 1, +2%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [22].

Bend Light

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

When this spell is active, the may bend light to see over obstacles and around corners. This requires continuous Aim maneuvers, and the caster cannot see directly in front of them while doing so. The length of this “periscope” is two yards.

Statistics: Periscope (Sorcery, -15%) [1].

Bender Defender

Keywords: Buff.
Full Cost: 22 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 5 hours.

The subject gains the Alcohol Tolerance (p. B100) and No Hangover (p. B101) perks.

Statistics: Affliction 1 (HT; Advantage, Bender Defender, +20%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Note:* “Bender Defender” is Alcohol Tolerance (Magical, -10%) [1] + No Hangover (Magical, -10) [1].

Berserker

Keywords: Resisted (Will).
Full Cost: 30 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

The victim gains the Berserk (6) disadvantage (p. B124) for the duration of this spell. He goes berserk in any combat situation, regardless of whether he was wounded or not. This only affects sapient (IQ 6+) creatures.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Berserk, +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* “Berserk” is Berserk (6) (Battle Rage, +50%) [-30].

Bibliomancy

Keywords: Information.
Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Bibliomancy requires either a lengthy and poetic or literary work containing a wide variety of knowledge, stories, and parables; a complex and obscure work of literature; or a more focused work associated with the question being asked. The spell will provide a passage from the book that answers the question, or at least provides a clue to that answer.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a book, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Bilocation

Keywords: None.

Full Cost: 84 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

By using this spell, the mage can literally be in two places at once! When the spell is cast, the mage creates a duplicate of himself. The duplicate possesses the caster's full knowledge and powers, but no gear. The duplicate is under caster's mental control, and both of them experience whatever the other one experiences with all the senses. If you are stunned, knocked out, mind-controlled, buffed with a spell, etc., your duplicate is similarly affected. The reverse is true – in effect you are a single body in two places.

When the spell ends, the caster and the duplicate merge. The caster will have the average FP and HP of himself and his duplicate at that time. The combined self remembers everything experienced by both "components."

If the caster or the double dies, the other one takes 2d injury and is mentally stunned. Rolls to recover are made at -6. After that, the next casting of this spell will cost extra 10 FP (this does not apply to maintenance, only to casting). It is possible for the caster to live on "after death" through his duplicate! If both the caster and the duplicate are killed, the duplicate vanishes and "merges" into the body of the original caster.

Statistics: Duplication 1 (Construct, +60%; Cosmic, Shared effects, +50%; Sorcery, -15%; Sympathetic Injury and Effects, -40%) [55] + Mindlink (Duplicate; Magical, -10%) [5] + Telesend (Accessibility, Only the duplicate, -80%; Always On, -10%; Magical, -10%; Sensie, +80%) [24].

Bind Spirit (Type)

Keywords: Resisted (Will).

Full Cost: 48 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 3 minutes.

You can bind a spirit you can see or touch. Each class of spirits (banshees, spectres, manitous, etc.) requires its own spell. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550).

If you win, your bound subject will obey your every command for 3 minutes. In effect, he temporarily gains the Reprogrammable disadvantage (B150), with you as his master. You do not have to maintain concentration to control the spirit.

If you attempt to force the subject to act against its principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the subject wins, it breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but it doesn't roll until it's about to leap.

If you lose, you cannot attempt to control that spirit again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Class of Spirits, -60%; Fixed Duration, +0%; Independent, +70%; Sorcery, -15%) [48].

Bird Control

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single bird – or of one square yard of a swarm of smaller birds. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only birds with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for birds with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Birds only, -40%; Sorcery, -15%) [23].

Birth Control

Keywords: None or Buff.

Full Cost: 5 or 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 30 minutes.

The subject becomes sterile for the duration of this spell.

The basic (5-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. However, unlike most other maintainable spells, maintaining this one costs 1 FP per 30 minutes, not 1 FP per minute. The improved (21-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Fertility Control (Variant; Extended Duration, 30x, +60%; Reduced Time 17, +340%; Sorcery, -15%) [5]. The improved version is Affliction 1 (HT; Advantage, Birth Control, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Birth Control" is Fertility Control (Variant; Magical, -10%; Reduced Time 17, +340%) [5].

Biting Shadow

Keywords: Area (Leveled).

Full Cost: 41 points for level 1 + 6.5 point/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

This spell creates a smoky cloud in which spectral dark mouths lined with glittering black fangs appear and disappear. These have only momentary solidity, yet they bite as if they were very powerful, very real creatures. It imposes a -5 penalty to Vision rolls made through it (including Infravision and Ultravision), and deals 1d-2 cutting damage to creatures within its area per turn. While this spell is active, the caster can take a Concentrate maneuver to move the area of effect at Move 3 within the maximum range of the spell.

Statistics: Cutting Attack 1d-2 (Area Effect, 2 yards, +50%; Link, +10%; Magical, -10%; Mobile 3, +120%; Persistent, +40%; Variable, Area, +5%) [10] + Obscure Vision 5 (Extended, Infravision and Ultravision, +40%; Link, +10%; Mobile 3, +120%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [31]. Further levels add Area Effect (+50%) to the advantages [+6.5*].

* Calculate the total cost and then round down (because the base ability costs just 40.45 points before rounding).

Black Tentacles

Keywords: Area (Leveled).

Full Cost: 66 points for level 1 + 14 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You conjure a field of black rubbery tentacles that try to grab and constrict everyone in the area. Placing the effect requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). Each turn, the tentacles try to grab every creature in the area with an effective skill level of 12. On a hit, the victim is grappled (see p. B370) with ST 14 and rooted in place. He cannot select the Move or Change Posture maneuvers or change facing, and is at -4 to DX. The Black Tentacles actively constrict the victim. Until he breaks free, the Black Tentacles attack him each turn with a Constriction Attack (p. B43), at ST 14.

The effect lasts for 10 seconds, continuing to grab new people who blunder into it. To break free, the victim must win a Quick Contest of ST or Escape skill against the ST of your Black Tentacles. Each attempt takes one second. If the victim fails to break free, he loses 1 FP but may try again. Alternatively, he may try to destroy the tentacles. Innate Attacks hit automatically; other attacks are at -4. External attacks on the Black Tentacles take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, p. B392). The Black Tentacles have DR 4. Each point of damage reduces ST by one. At ST 0, the Black Tentacles are destroyed and the victim is freed.

The basic (66-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 14 to full cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum.

Statistics: Binding 14 (Area Effect, 2 yards, +50%; Bombardment, Effective Skill 12, -10%; Constricting, +75%; One-Shot, -10%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [66]. Each additional level adds more Area Effect [+14].

Blackbolt

Keywords: Missile, Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 300 yards.

Duration: Instantaneous.

You fire a beam coherent ultraviolet light that does 1d(2) burning damage per level! This is a tight-beam burning attack; see p. B399. It has 1/2D 150, Max 300.

Blackbolt is not a projectile attack, and is thus not affected normally by spells like Reverse Missiles. Deflect Energy protects against it normally.

Statistics: Burning Attack (Armor Divisor, (2), +50%; Increased 1/2D, x5, +10%; Increased Range, x3, +15%; Sorcery, -15%) [8/level].

Blackout

Keywords: Area (Leveled).

Full Cost: 36 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with utter darkness. No one can see into the affected area, and no one within the affected area can see anything; see p. B394 for combat rules. The Dark Vision advantage lets you see through a Blackout spell, but Night Vision, Infravision, and Ultravision do not. To place the area at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

The basic (36-point) version of this spell covers a two-yard radius. For each additional 10 points, you may double this radius; e.g., four yards for 46 points, 8 yards for 56 points, or 16 yards for 66 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 10 (Extended, Infravision and Ultravision, +40%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [36]. Further levels add Area Effect (+50%) to the advantage [+10].

Blacksphere

Keywords: Area (Leveled), Obvious.

Full Cost: 236 points for level 1 + 35 points/additional level (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

The caster conjures a black force dome that repels (or at least slows) all attacks and traps everyone within, including insubstantial creatures. Anyone wishing to cross the barrier may try to force his way through it as a free action (one attempt per turn): the foe rolls thrust damage and if this overcomes the Blacksphere's DR, he gets through. This does not dispel the dome, which simply seals closed behind him. Slams and collisions with the dome inflict their usual damage for the purpose of breaking through, but the collider takes no damage, as the dome absorbs kinetic force.

The dome gives DR against all attacks, as well as against Jet and Missile spells. It offers no protection against any other spells, however, which may be cast freely across the barrier. (Those that require touch are out of luck unless the caster can first break through!)

In addition, no one can see into the affected area from outside, and no one within the affected area can see anything outside of it; see p. B394 for combat rules. The Dark Vision advantage lets you see through the Blacksphere spell, but Night Vision, Infravision, and Ultravision do not.

By default, Blacksphere provides DR 10. However, more potent versions are available:

DR	Full Cost
10	236 points for level 1 + 35 points/additional level
20	421 points for level 1 + 60 points/additional level
30	606 points for level 1 + 85 points/additional level
50	976 points for level 1 + 135 points/additional level
100	1,901 points for level 1 + 260 points/additional level

Statistics: Damage Resistance 10 (Affects Insubstantial, +20%; Affects Others, +50%; Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Force Field, +20%; Link, +10%; Persistent, +40%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%; Visible, -10%) [185] + Obscure Vision 10 (Extended, Infravision and Ultravision, +40%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Only around the border of the area, -0%; Ranged, +50%; Variable, Area, +5%) [51]. Additional levels increase Area Effect

(+50%) [+25 and +10]. More powerful versions multiply DR and the cost of DR by 2, 3, 5, or 10. As a special effect, this forms a hemispherical dome, not a cylinder.

Blade Barrier

Keywords: Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is surrounded by a horizontal barrier of transparent blades of force. Everyone adjacent to the subject or in close combat with the subject is attacked each second with an effective skill of 14, modified only for size. This attack deals 1d+1 cutting damage. The blade barrier affects even insubstantial creatures.

Statistics: Affliction 1 (HT; Advantage, Blade Barrier, +210%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Note:* "Blade Barrier" is Cutting Attack 1d+1 (Affects Insubstantial, +20%; Area Effect, 2 yards, +50%; Aura, +80%; Bombardment, Skill 14, -5%; Magical, -10%; Melee Attack, Reach C, -30%) [21].

Blade of Grass

Keywords: Obvious.

Full Cost: 9 points.

Casting Roll: None. Use appropriate sword skill to hit.

Range: Self.

Duration: Indefinite.

This spell transforms a single blade of grass into a knife or sword. The sword reverts into grass when the spell becomes inactive or when the sword leaves your hand. The weapon is well-crafted, with a blade that shines pale green in sunlight. It appears to be metallic, but it's composed entirely of vegetable matter. A piece of grass 6" to 11" creates a small knife. Between 12" and 17" makes a large knife. A length of 18" to 29" inches turns into a shortsword. Between 30" and 47" transforms into a broadsword. Any length of 48" to 53" creates a bastard sword. Any length of 54" or longer makes a greatsword. The item has all of the stats of its type (same weight, Reach, etc.) except cost.

Statistics: Cutting Attack 3 (Breakable, DR 7, -10%; Melee Attack, Reach 1-2, -25%; Nuisance Effect, Limited by grass length, -15%; Nuisance Effect, Weight, -5%; Requires grass, -10%; Sorcery, -15%; ST-Based, +100%; Thrusting Blade, +15%) [9].

Blade Wind

Keywords: Area (Leveled), Missile, Obvious.

Full Cost: 16 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to aim.

Range: 100 yards.

Duration: Instantaneous.

The caster throws a huge swarm of whirling blades towards his enemies. Use Innate Attack (Projectile), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d+1 cutting damage. This is an overhead attack – victims may raise their shields as cover, at the risk of damaging them (p. B484).

Statistics: Cutting Attack 1d+1 (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Overhead, +30%; Sorcery, -15%; Variable, Area, +5%) [16]. Additional levels add more Area Effect (+50%) [+5].

Bladestorm

Keywords: Weapon Buff.

Full Cost: 44 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Attacks with the enchanted melee weapon become storms of blows. The wielder hits an extra time per 2 points of margin of success in his attack roll. A successful defense roll avoids one attack, plus one extra attack per point of margin of success. All hits from this attack do half damage (rounded down), but see the table below. The 1st level of this spell limits this effect to a single extra hit, but you can increase this by taking additional levels, as shown on the table below.

Level	Cost	Effect	Level	Cost	Effect
1	44 points	1 additional hit	4	108 points	4 additional hits
2	68 points	2 additional hits	5	124 points	5 additional hits
3	84 points	3 additional hits	6	204 points	5 additional hits + full damage

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Bladestorm, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Bladestorm" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -2 (for levels 3 and 5) [+16], -3 (for levels 2 and 4) [+24], or -10 [+80] in penalties. This spell is based on the Multistrike imbue skill from *Pyramid* #3-60.

Blast Ball

Keywords: Missile, Obvious.

Full Cost: 11.5 points/level*.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of fire at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does burning damage with dice equal to your level of this spell. The attack produces an explosion at the point of impact (on a miss, check for scatter; see p. B414). The target takes damage normally; anything nearby receives "collateral damage" equal to basic damage divided by the distance in yards from the blast. The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own fireball!

Statistics: Burning Attack 1d (Explosion 3, +150%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [11.5/level*].

* Calculate the total cost then round up.

Bleed

Keywords: Resisted (HT).

Full Cost: 4 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell deals 1 point of cutting damage to an unconscious living being.

Statistics: Cutting Attack 1 (Accessibility, Only on unconscious living creatures, -65%; Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; No Blunt Trauma, -20%; No Knockback, -10%; Sorcery, -15%) [4].

Blend In

Keywords: Buff.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

It becomes easy for the subject to blend in. The subject's face is hard to pick out or remember. They get +1 to Shadowing in crowds, while others have -1 to rolls made to recognize them from a lineup or mug shots – or even to recall meeting them! Fails automatically on subjects with Distinctive Features (p. B165), Unnatural Features (p. B22), or Appearance above Attractive or below Unattractive.

Statistics: Affliction 1 (HT; Advantage, Blend In, +10%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Blend In" is Forgettable Face (Magical, -10%) [1].

Bless

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 90 minutes.

Once per hour of play (or once per day of game time, if the GM prefers that option), the subject may reroll one of their undesirable rolls two more times and take the best of the three rolls. They must declare that they are using their Bless immediately before rolling the dice. Once the subject or anyone else has made another die roll, it is too late to use Bless. If the subject already has used Bless in the last hour of play (or day of game time, if the GM prefers that option) or other forms of the Luck (p. B66) advantage, they cannot use it again until enough time passes, even if they are affected by this spell.

Statistics: Affliction 1 (HT; Advantage, Bless, +80%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Notes:* "Bless" is Luck (Active, -40%; Magical, -10%) [8]. The Game Time, +0% enhancement is optional – discuss with the GM which version is in use in the game.

Bless Fungus

Keywords: Area (Leveled), Buff.

Full Cost: 54 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 6 months.

Fungi in the area grow more fast and strong: mushrooms grow twice as tall, and any mundane HT rolls made by the fungi are at +2. This spell affects only inanimate fungi; mobile or sentient ones are immune.

Bless Fungus lasts for 6 months. Once the fungi die or are harvested, the fungi lose this effect.

Statistics: Affliction 1 (HT; Accessibility, Sessile fungi only, -30%; Advantage, Bless Fungus, +190%; Area Effect, 2 yards, +50%; Extended Duration, 100,000x, +200%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [54]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Bless Fungus" is Rapid Healing (Variant; Magical, -10%) [5] + Very Fit (Variant; Magical, -10%) [14].

Bless Plants

Keywords: Area (Leveled), Buff.

Full Cost: 54 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.
Duration: 6 months.

Plants in the area grow more fast and strong: Crops produce twice the usual yield, vegetation grows twice as tall, and any mundane HT rolls made by the plants are at +2. This spell affects only inanimate plants; mobile or sentient ones are immune.

Bless Plants lasts for 6 months. Once the plants die or are harvested, the plants lose this effect.

Statistics: Affliction 1 (HT; Accessibility, Sessile plants only, -30%; Advantage, Bless Plants, +190%; Area Effect, 2 yards, +50%; Extended Duration, 100,000x, +200%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [54]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Bless Plants" is Rapid Healing (Variant; Magical, -10%) [5] + Very Fit (Variant; Magical, -10%) [14].

Blessing of Ale/Wine

Keywords: Area (Leveled), Obvious.

Full Cost: 18 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +3 bonus to HT for the purpose of resisting poison for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Ale/Wine, +50%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [18]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Ale/Wine" is Resistant to Poison (+3) (Magical, -10%) [5].

Blessing of Art/Music

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become immune to noxious non-damaging sonic effects for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Art/Music, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Art/Music" is Immunity to Noxious Sonic Effects (Magical, -10%) [9].

Blessing of Battle/Wrath

Keywords: Area (Leveled), Obvious.

Full Cost: 27 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of Combat Reflexes (p. B43) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Battle/Wrath, +140%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Battle/Wrath" is Combat Reflexes (Magical, -10%) [14].

Blessing of Beauty/Love/Lust

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become immune to charming effects based on fascination or physical attractiveness (such as a nymph's blinding beauty and stunning glance abilities) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Beauty/Love/Lust, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Beauty/Love/Lust" is Immunity to Charming Effects Based on Fascination or Physical Attractiveness (Magical, -10%) [9].

Blessing of Bravery/Valor

Keywords: Area (Leveled), Obvious.

Full Cost: 21 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of Fearlessness 4 (p. B55) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Bravery/Valor, +80%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [21]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Bravery/Valor" is Fearlessness 4 (Magical, -10%) [8].

Blessing of Death

Keywords: Area (Leveled), Obvious.

Full Cost: 21 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of *Hard to Kill* 4 (p. B58) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Death, +80%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [21]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Death" is *Hard to Kill* 4 (Magical, -10%) [8].

Blessing of Destruction

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points (KYOS: 15) for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +2 bonus to ST for the purpose of dealing damage for 1 minute. Usually, this results in a +2 bonus to swing and +1 bonus to thrust damage (KYOS: +2 to both). If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Destruction, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22] (KYOS: 15). Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Destruction" is *Striking ST* 2 (Magical, -10%) [9] (KYOS: 2).

Blessing of Disease

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become immune to disease for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Disease, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Disease" is *Immunity Disease* (Magical, -10%) [9].

Blessing of Duty

Keywords: Area (Leveled), Obvious.

Full Cost: 41 points for level 1 + 5 points/additional level.

Casting Roll: Will.
Range: Self.
Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of 360° Vision (p. B34) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Duty, +280%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [41]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of Duty” is 360° Vision (Magical, -10%; Panoptic 1, +20%) [28].

Blessing of Envy

Keywords: Area (Leveled), Obvious.
Full Cost: 22 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Self.
Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of High Manual Dexterity 2 (p. B59) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Envy, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of Envy” is High Manual Dexterity 2 (Magical, -10%) [9].

Blessing of Farming

Keywords: Area (Fixed), Obvious.
Full Cost: 58 points.
Casting Roll: Will.
Range: Self.
Duration: Three minutes and Instantaneous, see text.

You channel positive energy through your body that appears as a white flash. When this spell is cast, all plants within four yards are imbued with healing energies, regenerating 1 HP per minute for 3 minutes. Casting this spell again does not improve the healing rate, only resetting the duration. If a particular plant possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Accessibility, Only on plants, -40%; Advantage, Blessing of Farming, +450%; Area Effect, 4 yards, +100%; Emanation, -20%; Fixed Duration, +0%; Sorcery, -15%) [58]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of Farming” is Regeneration (Fast; Magical, -10%) [45].

Blessing of Fate

Keywords: Area (Leveled), Obvious.
Full Cost: 27 points for level 1 + 5 points/additional level.
Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of Luck (p. B66) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Fate, +140%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Fate" is Luck (Magical, -10%) [14].

Blessing of Freedom

Keywords: Area (Leveled), Obvious.

Full Cost: 20 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +1 bonus to all rolls made to free themselves from grapple, paralysis, or other physical or supernatural restraints for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Freedom, +70%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [20]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Freedom" is Higher Purpose (Don't fence me in; Cosmic, Not limited to one level, +50%; Magical, -10%) [7].

Blessing of Freedom (2)

Keywords: Buff.

Full Cost: 23 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject becomes hard to hold. This effect grants the subject +6 to all ST, DX, and Escape rolls to slip restraints, break free in close combat, or squeeze through narrow openings.

Statistics: Affliction 1 (HT; Advantage, Blessing of Freedom, +110%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. *Note:* "Blessing of Freedom" is Slippery 6 (Magical, -10%) [11].

Blessing of Hunting

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster

gain the benefits of Telescopic Vision 2 (p. B92) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Hunting, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Hunting" is Telescopic Vision 2 (Magical, -10%) [9].

Blessing of Justice/Law

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +2 bonus to Per for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Justice/Law, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Justice/Law" is Per+2 (Magical, -10%) [9].

Blessing of Knowledge

Keywords: Area (Leveled), Obvious.

Full Cost: 31 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +1 bonus to IQ for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Knowledge, +180%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [31]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Knowledge" is IQ+1 (Magical, -10%) [18].

Blessing of Luck

Keywords: Area (Leveled), Obvious.

Full Cost: 21 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster

receive the benefits of Luck (p. B66) for 1 minute. Each subject must declare that they are using it before they roll the dice. It cannot be used “after the fact” to reroll a bad result. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Luck, +80%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [21]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of Luck” is Luck (Active, -40%; Magical, -10%) [8].

Blessing of Madness

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become immune to hallucinations for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Madness, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of Madness” is Immunity to Hallucinations (Magical, -10%) [9].

Blessing of Magic

Keywords: Area (Leveled), Obvious.

Full Cost: 23 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Magic Resistance 2 (p. B67) with the Improved enhancement for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Magic, +100%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [23]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of Magic” is Magic Resistance 2 (Improved, +150%; Magical, -10%) [10].

Blessing of Murder

Keywords: Area (Leveled), Obvious.

Full Cost: 31 points (KYOS: 17) for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +4 bonus to ST for the purpose of dealing damage for 1 minute. Usually, this results in a +4 bonus to swing and +2 bonus to thrust damage (KYOS: +4 to both). If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Murder, +180%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [31] (KYOS: 17). Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Murder" is Striking ST 4 (Magical, -10%) [18] (KYOS: 4).

Blessing of Nature

Keywords: Area (Fixed), Obvious.

Full Cost: 64 points.

Casting Roll: Will.

Range: Self.

Duration: Three minutes and Instantaneous, see text.

You channel positive energy through your body that appears as a white flash. When this spell is cast, all animals and fey within four yards are imbued with healing energies, regenerating 1 HP per minute for 3 minutes. Casting this spell again does not improve the healing rate, only resetting the duration. If a particular plant possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Accessibility, Only on animals and fey, -20%; Advantage, Blessing of Nature, +450%; Area Effect, 4 yards, +100%; Emanation, -20%; Fixed Duration, +0%; Sorcery, -15%) [64]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Nature" is Regeneration (Fast; Magical, -10%) [45].

Blessing of Pain

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of High Pain Threshold (p. B59) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Pain, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Pain" is High Pain Threshold (Magical, -10%) [9].

Blessing of Poison

Keywords: Area (Leveled), Obvious.

Full Cost: 27 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become immune to poisons for 1 minute. Subjects that are already poisoned do not take damage from it while the spell lasts, but the poison resumes when the spell ends, if its own duration did not end. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Poison, +140%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Poison" is Immunity to Poison (Magical, -10%) [14].

Blessing of Protection

Keywords: Area (Leveled), Obvious.

Full Cost: 19 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain DR 1 with the Force Field enhancement for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Protection, +60%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [19]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Protection" is DR 1 (Force Field, +20%; Magical, -10%) [6].

Blessing of Revenge/Vengeance

Keywords: Area (Leveled), Obvious.

Full Cost: 24 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain DR 1 with the Force Field and Reflection enhancements for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Revenge/Vengeance, +110%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [24]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Revenge/Vengeance" is DR 1 (Force Field, +20%; Magical, -10%; Reflection, +100%) [11].

Blessing of Rulership

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of Charisma 2 (p. B41) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Rulership, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Rulership" is Charisma 2 (Magical, -10%) [9].

Blessing of Self-Perfection

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +1 bonus to HT for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Self-Perfection, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Self-Perfection" is HT+1 (Magical, -10%) [9].

Blessing of Sexuality

Keywords: Area (Leveled), Obvious.

Full Cost: 23 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of Charisma 1 (p. B41) and Flexibility (p. B56) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Sexuality, +100%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [23]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Sexuality" is Charisma 1 (Magical, -10%) [5] + Flexibility (Magical, -10%) [5].

Blessing of Slavery/Tyranny

Keywords: Area (Leveled), Obvious.

Full Cost: 21 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of Hard to Subdue 4 (p. B59) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Slavery/Tyranny, +80%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [21]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Slavery/Tyranny" is Hard to Subdue 4 (Magical, -10%) [8].

Blessing of Strategy

Keywords: Area (Leveled), Obvious.

Full Cost: 18 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of the Team Player power-up (*GURPS Dungeon Fantasy 11: Power-Ups*, p. 16) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Strategy, +50%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [18]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Strategy" is Higher Purpose (Assist Allies; Magical, -10%) [5].

Blessing of Strength

Keywords: Area (Leveled), Obvious.

Full Cost: 21 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +1 bonus to their Lifting ST and Striking ST for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of Strength, +80%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [21]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of Strength" is Lifting ST 1 (Magical, -10%) [3] + Striking ST 1 (Magical, -10%) [5].

Blessing of Trickery

Keywords: Area (Leveled), Obvious.

Full Cost: 18 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Air/Sky/Wind, +140%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Air/Sky/Wind" is Perfect Balance (Magical, -10%) [14].

Blessing of the Cities

Keywords: Area (Leveled), Obvious.

Full Cost: 18 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of Absolute Direction (p. B34) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Cities, +50%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [18]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Cities" is Absolute Direction (Magical, -10%) [5].

Blessing of the Contracts/Oaths

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +3 to Will rolls made to resist mind control abilities for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Contracts/Oaths, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Contracts/Oaths" is Resistant to Mind Control (+3) (Magical, -10%) [9].

Blessing of the Darkness

Keywords: Area (Leveled), Obvious.

Full Cost: 36 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of Dark Vision (p. B47) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Darkness, +230%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [36]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Darkness" is Dark Vision (Magical, -10%) [23].

Blessing of the Dreams

Keywords: Area (Leveled), Obvious.

Full Cost: 31 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of *Doesn't Sleep* (p. B50) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Dreams, +180%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [31]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Dreams" is *Doesn't Sleep* (Magical, -10%) [18].

Blessing of the Earth

Keywords: Area (Leveled), Obvious.

Full Cost: 16 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain DR 1 with the Tough Skin limitation for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Earth, +30%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [16]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Earth" is DR 1 (Magical, -10%; Tough Skin, -40%) [3].

Blessing of the Fire

Keywords: Area (Fixed), Obvious.

Full Cost: 57 points.

Casting Roll: Will.

Range: Self.

Duration: Three minutes and Instantaneous, see text.

You channel positive energy through your body that appears as a white flash. When this spell is cast, all fire creatures (efreet, fire elementals, etc.) within four yards are imbued with healing energies, regenerating 1 HP per minute for 3 minutes. Casting this spell again does not improve the healing rate, only resetting the duration. If a particular plant possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Accessibility, Only on fire creatures, -50%; Advantage, Blessing of the Fire, +450%; Area Effect, 4 yards, +100%; Emanation, -20%; Fixed Duration, +0%; Sorcery, -15%) [57]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Fire" is Regeneration (Fast; Magical, -10%) [45].

Blessing of the Flying Creatures

Keywords: Area (Leveled), Obvious.

Full Cost: 21 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +4 bonus to their Air Move (this does not affect creatures that have no Air Move) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Flying Creatures, +80%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [21]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Flying Creatures" is Air Move +4 (Magical, -10%) [8].

Blessing of the Forge

Keywords: Area (Fixed), Obvious.

Full Cost: 59 points.

Casting Roll: Will.

Range: Self.

Duration: Three minutes and Instantaneous, see text.

You channel positive energy through your body that appears as a white flash. When this spell is cast, all metal creatures and objects within four yards are imbued with healing energies, regenerating 1 HP per minute for 3 minutes. Casting this spell again does not improve the healing rate, only resetting the duration. If a particular plant possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Accessibility, Only on metal creatures and objects, -30%; Advantage, Blessing of the Forge, +450%; Area Effect, 4 yards, +100%; Emanation, -20%; Fixed Duration, +0%; Sorcery, -15%) [59]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Forge" is Regeneration (Fast; Magical, -10%) [45].

Blessing of the Journeys

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a +2 bonus to Basic Move for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Journeys, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Journeys" is Basic Move +2 (Magical, -10%) [9].

Blessing of the Monsters

Keywords: Area (Fixed), Obvious.

Full Cost: 60 points.

Casting Roll: Will.

Range: Self.

Duration: Three minutes and Instantaneous, see text.

You channel positive energy through your body that appears as a white flash. When this spell is cast, all aberrations, dragons, magical beasts, and monstrous humanoids within four yards are imbued with healing energies, regenerating 1 HP per minute for 3 minutes. Casting this spell again does not improve the healing rate, only resetting the duration. If a particular plant possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Accessibility, Only on aberrations, dragons, magical beasts, and monstrous humanoids, -20%; Advantage, Blessing of the Monsters, +450%; Area Effect, 4 yards, +100%; Emanation, -20%; Fixed Duration, +0%; Sorcery, -15%) [60]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Monsters" is Regeneration (Fast; Magical, -10%) [45].

Blessing of the Moonlight

Keywords: Area (Leveled), Obvious.

Full Cost: 18 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Night Vision 5 (p. B71) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Moonlight, +50%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [18]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Moonlight" is Night Vision 5 (Magical, -10%) [5].

Blessing of the Monuments

Keywords: Area (Leveled), Obvious.

Full Cost: 22 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become immune to effects that reduce their Basic Move for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Monuments, +90%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [22]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Monuments" is Immunity to Slowing (Magical, -10%) [9].

Blessing of the Nightmares

Keywords: Area (Leveled), Obvious.

Full Cost: 27 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of *Unfazeable* (p. B95) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Nightmares, +140%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of the Nightmares” is *Unfazeable* (Magical, -10%) [14].

Blessing of the Ocean/Sea/Water

Keywords: Area (Leveled), Obvious.

Full Cost: 21 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become able to breathe water for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Ocean/Sea/Water, +80%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [21]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of the Ocean/Sea/Water” is *Doesn’t Breathe* (Gills, -50%; Magical, -10%) [8].

Blessing of the Secrets

Keywords: Area (Leveled), Obvious.

Full Cost: 36 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of *Hyperspectral Vision* (p. B60) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Secrets, +230%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [36]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* “Blessing of the Secrets” is *Hyperspectral Vision* (Magical, -10%) [23].

Blessing of the Sun

Keywords: Area (Leveled), Obvious.

Full Cost: 18 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster receive the benefits of Protected Vision (p. B78) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Sun, +50%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [18]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Sun" is Protected Vision (Magical, -10%) [5].

Blessing of the Weapons

Keywords: Area (Leveled), Obvious.

Full Cost: 41 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of Extra Attack 1 (p. B53) with the Multi-Strike enhancement for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Weapons, +280%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [41]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Weapons" is Extra Attack 1 (Magical, -10%; Multi-Strike, +20%) [28].

Blessing of the Weather

Keywords: Area (Leveled), Obvious.

Full Cost: 14 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a white flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain the benefits of the Eye of the Storm perk (*GURPS Dungeon Fantasy 11: Power-Ups*, p. 25) for 1 minute. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Blessing of the Weapons, +10%; Area Effect, 2 yards, +50%; Emanation, -20%; Fixed Duration, +0%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [14]. Additional levels add more Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* "Blessing of the Weather" is Eye of the Storm (Magical, -10%) [1].

Blinding Armor

Keywords: Armor Buff.

Full Cost: 36 points or 76 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

Enchanted armor or shield flares brilliantly when struck, momentarily blinding attackers. Treat this as Obscure (p. B40) directed at vision. The Vision penalty equals half the damage stopped (round down), to a maximum of -10.

Against a melee attack, this affects everyone within a two-yard radius of the wearer after he is struck. Against a ranged attack, it affects a two-yard radius around the distant foe instead. These effects last until the wearer's next turn.

The basic (36-point) version penalizes the wearer's Vision as well. The improved (76-point) version does not affect the wearer.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Blinding Armor, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Blinding Armor" is 26 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). The improved removes a -5 penalty [+40]. This spell is based on the Blinding Defense imbuelement skill from *Pyramid #3-4*.

Blindsight

Keywords: Buff.
Full Cost: 25 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject can detect the location and size of objects by sensing the minute disturbances of air around him. He can locate an opponent in the dark, but you cannot detect details (e.g., whether he is armed). In a perfectly still environment, he would be able to sense a barrier before he runs into it, and could find openings by sensing the flow of air.

To use Blindsight, the subject must make a Sense roll. Consult the *Size and Speed/Range Table* (p. B550) and apply separate bonuses for the target's size and speed, and a penalty for the range to the target. A successful roll reveals the rough size, location, speed, and direction of movement of the target. It does not provide any information about the object's shape, color, etc. Once the subject has detected something, he may target it with an attack. The modifiers that applied to his Sense roll also apply to his attack roll, but can never give him a bonus to hit.

If the subject is wearing a sealed suit, this ability does not work at all!

Statistics: Affliction 1 (HT; Advantage, Blindsight, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Blindsight" is Vibration Sense (Air; Magical, -10%) [9].

Blink

Keywords: None.
Full Cost: 35 points.
Casting Roll: IQ.
Range: Self.
Duration: Instantaneous.

While this spell is active, once per turn, you can "dodge" an incoming attack by teleporting away from it. Roll randomly for direction. You appear in the first safe open space in that direction. If there's no place like that within 10 yards, you go nowhere and your dodge fails.

Statistics: Warp (Blink Only, -60%; Gyroscopic, +10%; Sorcery, -15%) [35].

Blink Other

Keywords: Buff.

Full Cost: 48 points.

Casting Roll: Power Dodge (DX/2+3). Use Innate Attack (Gaze) to aim. IQ to teleport.

Range: 100 yards.

Duration: Instantaneous.

If the subject fails to resist, the caster may try an immediate IQ roll to teleport the subject away from an incoming attack. Roll randomly for direction. The subject appears in the first safe open space in that direction. If there's no place like that within 10 yards, the subject goes nowhere and the dodge fails. This spell may only be used as an active defense.

Statistics: Affliction 1 (HT; Active Defense, -40%; Advantage, Blink Other, +400%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [48]. *Note:* "Blink Other" is Warp (Blink Only, -60%; Gyroscopic, +10%; Magical, -10%) [40].

Blistering Touch

Keywords: Obvious.

Full Cost: 1 point.

Casting Roll: None. Use unarmed combat skill or DX to hit.

Range: Touch.

Duration: Instantaneous.

Your touch deals 1 point of burning damage as a follow-up. Can be used with punches and kicks as well.

Statistics: Blistering Touch (Sorcery, -15%) [1].

Block

Keywords: None.

Full Cost: 7.5 points/level.

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can momentarily create an invisible shield of pure force that moves to protect them from any frontal attack. Every time the caster is attacked from the front, they may make a casting roll as an active defense. Success grants a Defense Bonus against that attack equal to the level of the spell (up to four levels maximum), which is cumulative with that granted from an actual shield.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Block, they cannot cast this spell until *all* FP are replenished.

Statistics: Defense Bonus 1 (Active Defense, -40%; Directional, Front, -20%; Sorcery, -15%) [7.5/level]. *Note:* Defense Bonus is a meta-trait from *GURPS Supers*.

Block Heat

Keywords: Area (Leveled).

Full Cost: 28 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You block heat emanation in the area, making things within invisible to Infravision. No one can see into the affected area with Infravision, and no one within the affected area can see anything with Infravision; see p. B394 for combat rules. The area of this spell stands out to Infravision from outside, looking like a black spot.

Statistics: Obscure Infravision 10 (Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [28]. Further levels add Area Effect (+50%) to the advantage [+10].

Blood Drinker

Keywords: Weapon Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

The weapon draws life energy from the damage it does. For every attack that penetrates DR and does damage, the weapon gains a point in an energy reserve. The maximum capacity is 5. However, the energy can only be used for mundane physical exertion such as extra effort, long-distance running, and making up for lost sleep – not for spellcasting, chi-related efforts, or other more-or-less supernatural efforts.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Blood Drinker, +110%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Note:* “Blood Drinker” is ER 5 (Physical; Affects Others 1, Only the wielder, +50%; Magical, -10%; Special Recharge, -70%) [11].

Blood Lust

Keywords: Buff.

Full Cost: 39 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell grants the subject Discriminatory Smell (p. B49), Fearlessness 2 (p. B55), and High Pain Threshold (p. B59).

Statistics: Affliction 1 (HT; Advantage, Blood Lust, +270%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Note:* “Blood Lust” is Discriminatory Smell (Magical, -10%) [14] + Fearlessness 2 (Magical, -10%) [4] + High Pain Threshold (Magical, -10%) [9].

Bloodfire

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 9 seconds.

Covers the subject in a white fire that heals damage caused by any sort of fire. The subject must make a HT roll, as the tissue regeneration is very painful. A failed HT roll indicates that the subject is stunned and may recover normally on his next turn. Regardless of the result, the subject experiences severe pain (p. B428) for the duration of this spell, healing 1 HP per second and emitting light equivalent to a torch.

This is also a Healing spell.

Statistics: Affliction 1 (HT; Advantage, Bloodfire, +210%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [31]. *Note:* “Bloodfire” is Illumination (Magical, -10%) [1] + Regeneration (Very Fast; Backlash, Severe Pain, -40%; Backlash, Stunning, Resistible, -5%; Limited, Heat/Fire, -40%; Magical, -10%) [20].

Bloodsucking Branches

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 18 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may temporarily transform a two-yard-radius area of rooted, branching plants into vampiric organisms. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Every creature in the area of effect is attacked by the animated branches at an effective skill of 12. The branches sting their victims and suck their blood out, dealing 1d-2 points of fatigue damage each hit. Any DR, except Tough Skin, stops this damage. The blood flows down to the roots, where it is expelled into the soil. A creature that took damage from the bloodsucking branches, must make an IQ roll or be mentally stunned. A stunned creature can recover normally. Any creature moving at Move 4 or greater is too fast to be stung.

If using the *Density of Vegetation* rules (*GURPS Magic: Plant Spells*, p. 6) alter the rate of FP loss as follows: Sparse (1 FP per hit), Normal (no change), Dense (1d-1 FP per hit), Impenetrable (1d FP per hit).

Statistics: Affliction 1 (IQ; Accessibility, Only against creatures with blood traveling at Move 3 or less, -20%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Bombardment, Skill 12, -10%; Contact Agent, -30%; Environmental, Branching Vegetation, -40%; Limited by vegetation density, -15%; Link, +10%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [10] + Fatigue Attack 1d (Accessibility, Only against creatures with blood traveling at Move 3 or less, -20%; Area Effect, 2 yards, +50%; Bombardment, Skill 12, -10%; Contact Agent, -30%; Environmental, Branching Vegetation, -40%; Fixed Duration, +0%; Limited by vegetation density, -15%; Link, +10%; Magical, -10%; Persistent, +40%; Variable, Area, +5%) [8]. Further levels add Area Effect (+50%) to both advantages [+10].

Bloody Iron

Keywords: Resisted (HT).

Full Cost: 38 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 5 seconds.

This spell extracts the iron in the subject's blood from his body. A subject who fails to resist submits to the spell and is overcome with agony (p. B428). Over the 5 seconds, he can resist again each second. Victory here doesn't end the spell but merely staves off harm; each loss deals 1 point of toxic damage. The metal extracted appears as a fine red mist near the target, but cannot generate more than a few grams of iron from a given person.

Statistics: Toxic Attack 1 point (Accessibility, Only on beings with blood, -10%; Based on HT, +20%; Cyclic, 1 second interval, 4 seconds, Resistible, +200%; Link, +10%; Magical, -10%; Malediction 2, +150%; No Signature, +20%) [5] + Affliction 1 (HT; Accessibility, Only on beings with blood, -10%; Agony, +100%; Fixed Duration, +0%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [33].

Blunderbuss

Keywords: Missile, Obvious.

Full Cost: 8 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You launch a spread of iron pellets at a single target; use the Shotgun rules (p. B409) for determining damage and penetrating DR at various ranges. Use Innate Attack (Projectile) to hit, applying normal range penalties. Each hit does 1d+1 small piercing damage. The spell's RoF depends on its level:

Spell Level	RoF	Cost
1	1x9	8 points

2	2x9	10 points
3	4x9	12 points
4	8x9	14 points
5	17x9	16 points

Statistics: Small Piercing Attack 1d+1 (Rapid Fire, 1x9, +100%; Sorcery, -15%) [8]. Additional levels add more Rapid Fire, +50% [+2].

Blunt Weapon

Keywords: Weapon Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell blunts the weapon, converting the damage of a non-crushing attack from its usual damage type to crushing. This lets improves knockback (p. B378) and blunt trauma (p. B379), and lets a deadlier weapon “merely” beat a victim senseless.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Blunt Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* “Blunt Weapon” is 22 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Crushing Strike imbue ment skill.

Blunting Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes armor more resistant to cutting. The armor’s DR is multiplied against cutting damage, as shown on the table below.

Level	D R
1	x2
2	x3
3	x4

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Blunting Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Blunting Armor” is 34 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Blunting Armor imbue ment skill from *Pyramid #3-4*.

Blur

Keywords: Buff.

Full Cost: 24 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject and all of his carried equipment become blurred for the duration of the spell. This gives a -3 penalty to Vision rolls to see the subject with normal vision and -3 penalty to attacks against the subject that rely on normal vision. Infravision is not fooled by this spell.

Statistics: Affliction 1 (HT; Advantage, Blur, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [24]. *Note:* “Blur” is Obscure 3 (Vision; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [12].

Blossom

Keywords: Buff.

Full Cost: 66 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour.

If the subject plant blooms or bears fruit at least one per year, then this spell causes it to bloom and bear fruit within the one-hour duration of the spell. The plant remains in this condition for 24 hours, at the end of which it enters its fall phase – leaves of deciduous trees will turn color, blossoms and fruit drop off, etc. If the plant bears fruit less often than once per year, then this spell fails to work.

Statistics: Affliction 1 (HT; Accessibility, Only on plants, -40%; Advantage, Blossom, +560%; All-or-Nothing, -10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Nuisance Effect, Stops one bears fruit, -20%; Nuisance Effect, Enters fall phase after a day, -15%; Sorcery, -15%) [66]. *Notes:* “Blossom” is Unaging (Doesn’t actually age the plant, -10%; Age Control, Only Forwards, +10%; Magical, -10%; Reduced Time 14, +280%) [56].

Body Blades

Keywords: Buff.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject’s body grows metal blades. If he is wearing clothing or armor up to his Heavy Encumbrance, then these blades appear on it without harming the gear. This is defensive weaponry, intended to discourage attackers; the subject cannot use his body blades actively. However, he gets a DX-4 roll to hit each foe in close combat with him once per turn, as a free action. Roll at +2 against foes who attacked the subject from behind. Those who grapple or slam the subject are hit immediately and automatically – and those who slam the subject take maximum damage! The thorns have Reach C and do 1d impaling damage.

Statistics: Affliction 1 (HT; Advantage, Body Blades, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Note:* “Body Blades” is Long Spines (Can Carry Objects, Heavy, +100%; Magical, -10%) [6].

Body of Acid

Keywords: Buff.

Full Cost: 217 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Acid meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Acid, +2,010%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [217]. *Notes:* “Body of Acid” is Alternate Form (Body of Acid*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [201]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Amphibious [10]; Constriction Attack [15]; Corrosion Attack 1d-1 (Always On, -40%; Aura, +80%; Melee Attack, Reach C, -30%) [8]; DR 10 (Limited, Acid, -40%; Tough Skin, -40%) [10]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Immunity to Noxious Acidic Effects [10]; Injury Tolerance (Diffuse) [100]; Internal Sealed (Acid-Resistant Only, -60%) [2]; Pressure Support 3 [15]; Sealed (Acid-Resistant Only, -60%) [6]; Slippery 5 [10]; Invertebrate [-20]; and Vulnerability (Dehydration attacks x2) [-10]. *206 points.*

Body of Air

Keywords: Buff.

Full Cost: 64 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Air meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Air, +480%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [64]. *Notes:* "Body of Air" is Alternate Form (Body of Air*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [48]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 262 of *GURPS Basic Set*: ST 0 [-100]; +10 HP [20]; Doesn't Breathe [20]; Flight (Lighter Than Air, -10%) [36]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Legs (Aerial) [0]; No Manipulators [-50]; Vulnerability (Vacuum and wind-based attacks x2) [-20]; and Taboo Trait (Fixed ST) [0]. *36 points.*

Body of Earth

Keywords: Buff.

Full Cost: 189 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Earth meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Earth, +1,730%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [189]. *Notes:* "Body of Earth" is Alternate Form (Body of Earth*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [173]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 262 of *GURPS Basic Set*: Doesn't Breathe [20]; DR 2 [10]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Pressure Support 3 [15]; Sealed [15]; Vacuum Support [5]; and Invertebrate [-20]. *175 points.*

Body of Flames

Keywords: Buff.

Full Cost: 37 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Fire meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Flames, +210%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [37]. *Notes:* “Body of Flames” is Alternate Form (Body of Fire*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [21]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 262 of *GURPS Basic Set*: ST 0 [-100]; +10 HP [20]; Burning Attack 1d (Always On, -40%; Aura, +80%; Melee Attack, Reach C, -30%) [6]; Doesn’t Breathe (Oxygen Combustion, -50%) [10]; DR 10 (Limited: Heat/Fire, -40%) [30]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Manipulators [-50]; Weakness (Water; 1d/minute) [-40]; and Taboo Trait (Fixed ST) [0]. *6 points.*

Body of Fluid

Keywords: Buff.

Full Cost: 199 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Air meta-trait *or* the Body of Water meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Alternative Enhancements (Advantage, Body of Air, +480% and Advantage, Body of Water, +1,730%), +1,826%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [199]. *Notes:* “Body of Air” is Alternate Form (Body of Air*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [48]. “Body of Water” is Alternate Form (Body of Water**); Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [173]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 262 of *GURPS Basic Set*: ST 0 [-100]; +10 HP [20]; Doesn’t Breathe [20]; Flight (Lighter Than Air, -10%) [36]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Legs (Aerial) [0]; No Manipulators [-50]; Vulnerability (Vacuum and wind-based attacks x2) [-20]; and Taboo Trait (Fixed ST) [0]. *36 points.*

** A meta-trait from p. 262 of *GURPS Basic Set*: Amphibious [10]; Chameleon 1 [5]; Constriction Attack [15]; Doesn’t Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Pressure Support 3 [15]; Slippery 5 [10]; Invertebrate [-20]; and Vulnerability (Dehydration attacks x2) [-10]. *175 points.*

Body of Fungus

Keywords: Buff.

Full Cost: 100 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Fungus meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Fungus, +840%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [100]. *Notes:* “Body of Fungus” is Alternate Form (Body of Fungus*; Can Carry Objects, No Encumbrance, +10%; Magical, -

10%) [84]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A variant of the meta-trait from p. 165 of *GURPS Magic*: Basic Speed-1 [-20]; Blunt Claws [3]; DR 2 (Semi-Ablative, -20%) [8]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous) [40]; Lifting ST 5 [15]; Numb [-20]; and Affected by Fungus Spells [0]. 76 points.

Body of Glass

Keywords: Buff.

Full Cost: 128 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Glass meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Glass, +1,120%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [128]. *Notes*: “Body of Glass” is Alternate Form (Body of Glass*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [112]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 18 of *Pyramid #3-114*: Chameleon 1 (Always On, -10%) [5]; Doesn't Breathe [20]; DR 1 [5]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; Slippery 1 [2]; Vacuum Support [5]; Fragile (Brittle) [-15]; and Vulnerability (Sonic or Vibratory Attacks x2) [-20]. 107 points.

Body of Ice

Keywords: Buff.

Full Cost: 121 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Ice meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Ice, +1,050%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [121]. *Notes*: “Body of Ice” is Alternate Form (Body of Ice*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [105]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 262 of *GURPS Basic Set*: Doesn't Breathe [20]; DR 3 [15]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; Slippery 3 [6]; Terrain Adaptation (Ice) [5]; Vacuum Support [5]; Fragile (Brittle) [-15]; Vulnerability (Heat/fire attacks, x2) [-30]; and Weakness (Intense normal heat; 1d/minute; Variable, -40%) [-12]. 99 points.

Body of Illusion

Keywords: Resisted (HT).

Full Cost: 61 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

This spell transforms the subject and whatever they are carrying into a perfect illusion under the caster's control for the duration of the spell. The subject has neither memory nor volition of what they did while turned into an illusion. Once transformed, the subject is treated as the creation of a Perfect Illusion spell (*GURPS Magic*, p. 96) for all purposes. If the illusion is dispelled (the caster ends the spell, or it is dispelled by Dispel Illusion or Dispel Magic), the subject reverts back to normal. Note that the caster cannot control the illusion if he casts this spell on himself.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [41] + Mind Control (Accessibility, This illusion only, -80%; Based on Will, Own Roll, +20%; Link, +10%; Magical, -10%) [20].

Body of Leaves

Keywords: Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject's body transmogrifies into a mound of leaves, roughly hemispheric with an 18" peak. He has the Body of Leaves meta-trait for the duration of the spell. He is inconspicuous in most outdoor environments. Clothes and carried items, up to the target's BL, are subsumed into the new form. To determine what gets left behind, begin with the heaviest items. Subsumed magic items are temporarily inoperable. The subject may cast any spells that have no ritual requirement. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

A body of leaves is useful for sneaking, for hiding, and to survive a fall. The spell is not limited to the caster – it may be cast on someone else to terrify him, slow him down, or injure him using wind attacks and fire. (If this is his first transformation, roll a Fright Check at -6.) This spell is susceptible to Know True Shape, Remove Curse, and Suspend Curse. Likewise, the spell ends if the subject loses consciousness.

Statistics: Affliction 1 (HT; Advantage, Body of Leaves, +170%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Notes:* "Body of Leaves" is Alternate Form (Body of Leaves*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [17]. If turned into a "usually on" magical item (Sorcery, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 11 of *GURPS Magic: Plant Spells*: ST -10 [-100]; HP +10 [20]; Chameleon 6 (Limited to locations where a pile of leaves could be found, -60%) [12]; Doesn't Breathe [20]; Double-Jointed [15]; Fragile (Combustible) [-5]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Mute [-25]; No Legs (Slithers) [0]; No Fine Manipulators [-30]; Numb [-20]; Reduced Move -4 [-20]; Silence 5 [25]; Vulnerable (Wind Attacks, x2) [-20]. Affected by Plant spells [0]; Taboo Trait (Fixed ST) [0]. *2 points.*

Body of Light

Keywords: Buff.

Full Cost: 89 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Light meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Stop Power acts as Glue and Steal Power acts as Steal Strength on the subject.

Statistics: Affliction 1 (HT; Advantage, Body of Light, +730%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [89]. *Notes:* "Body

of Light” is Alternate Form (Body of Light*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [73]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 21 of *Pyramid #3-115*: Doesn’t Breathe [20]; Doesn’t Eat or Drink [10]; Doesn’t Sleep [20]; Flight [40]; Immunity to Metabolic Hazards [30]; Nocturnal (Diurnal,** +0%; Permanent Paralysis, +100%) [-40]; Shadow Form (Damaged by darkness-based attacks rather than light, -25%) [-15]; Supernatural Features (Glow in the dark) [-1]. *64 points*.

** Diurnal means you are paralyzed if your entire body is in darkness (as opposed to in sunlight); with this, Permanent Paralysis requires total darkness, not merely the absence of sunlight.

Body of Lightning

Keywords: Buff.

Full Cost: 82 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Lightning meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Stop Power acts as Glue and Steal Power acts as Steal Strength on the subject.

Statistics: Affliction 1 (HT; Advantage, Body of Lightning, +660%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [82]. *Notes*: “Body of Lightning” is Alternate Form (Body of Lightning*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [66]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 198 of *GURPS Basic Set*: ST 0 [-100]; HP +10 [20]; Burning Attack 1d (Always On, -40%; Aura, +80%; Melee Attack, Reach C, -30%) [6]; Doesn’t Breathe [20]; DR 10 (Limited: Electricity, -40%) [30]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Manipulators [-50]; Feature (Affected by Energy Spells (*GURPS Magic*, p. 178) [0]; and Taboo Trait (Fixed ST) [0]. *56 points*.

Body of Metal

Keywords: Buff.

Full Cost: 188 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains a slightly altered Body of Metal meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Metal, +1,720%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [188]. *Notes*: “Body of Metal” is Alternate Form (Body of Metal*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [172]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A slightly altered meta-trait from p. 262 of *GURPS Basic Set*: Affected by Magnetism [-1]; Doesn’t Breathe [20]; DR 9 [45]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; and Vacuum Support [5]. *174 points*.

Body of Plastic

Keywords: Buff.

Full Cost: 144 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject gains the Body of Plastic meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Plastic, +1,280%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [144]. *Notes:* “Body of Plastic” is Alternate Form (Body of Plastic*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [128]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 183 of *GURPS Magic*: Doesn’t Breathe [20]; DR 1 [5]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 1 [5]; Sealed [15]; Vacuum Support [5]. 125 points.

Body of Shadow

Keywords: Resisted (HT).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

The subject becomes a two-dimensional shadow. This lets him slip along walls and floors – and through the thinnest cracks (anything wide enough to fit his shoulders through) – at his usual ground Move. He can also defy gravity, creeping up walls and across ceilings at half Move.

Physical attacks do half damage to the subject in this form. Energy attacks do normal damage, except for light-based attacks, which do 50% extra damage. Magic, psi, and other purely mental abilities affect the subject normally.

The subject is subject to a few major restrictions while in this form. He cannot walk through three-dimensional space; he *must* slide along an object. Furthermore, he cannot perform any purely physical attacks or actions, and he cannot carry ordinary items or affect them in any way. He can use magic, psi, and similar abilities, however.

Statistics: Affliction 1 (HT; Disadvantage, Shadow Form, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [28].

Body of Slime

Keywords: Buff.
Full Cost: 85 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject gains the Body of Slime meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Slime, +690%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [85]. *Notes:* “Body of Slime” is Alternate Form (Body of Slime*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [69]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 165 of *GURPS Magic*: Amphibious [10]; Doesn’t Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous) [40]; Bad Smell [-10]; Disturbing Voice [-10]; Invertebrate [-20]; Affected by Plant spells [0]. 60 points.

Body of Stone

Keywords: Buff.

Full Cost: 157 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Stone meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Stone, +1,260%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [157]. *Notes:* "Body of Stone" is Alternate Form (Body of Stone*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [126]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 262 of *GURPS Basic Set*: Doesn't Breathe [20]; DR 5 [25]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; Vacuum Support [5]; and Fragile (Brittle) [-15]. 140 points.

Body of Water

Keywords: Buff.

Full Cost: 189 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Water meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Water, +1,730%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [189]. *Notes:* "Body of Water" is Alternate Form (Body of Water*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [173]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait from p. 262 of *GURPS Basic Set*: Amphibious [10]; Chameleon 1 [5]; Constriction Attack [15]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Pressure Support 3 [15]; Slippery 5 [10]; Invertebrate [-20]; and Vulnerability (Dehydration attacks x2) [-10]. 175 points.

Body of Wind

Keywords: Buff.

Full Cost: 308 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject gains the Body of Wind meta-trait; see the footnote below for details. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Body of Wind, +2,920%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [308]. *Notes:* "Body of Wind" is Alternate Form (Body of Wind*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%)

[292]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: ST+6 [60]; +10 HP [20]; Doesn't Breathe [20]; Flight (Lighter Than Air, -10%) [36]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Legs (Aerial) [0]; No Fine Manipulators [-30]; Storm** [71]; and Taboo Trait (Fixed ST) [0]. *307 points.*

** “Storm” is Crushing Attack 4d (Always On, -20%; Aura, +80%; Area Effect, 2 yards, +50%; Double Knockback, +20%; Emanation, -20%; Environmental, Air, -5%; Link, +10%; Magical, -10%; Melee Attack, Reach C, -30%; No Blunt Trauma, -20%; No Wounding, -50%) [21] + Enhanced Dodge 2 (Affects Others 1, +50%; Area Effect, 2 yards, +50%; Environmental, Air, -5%; Force Field, +20%; Limited, Projectiles, -40%; Magical, -10%) [50]. *First, for every creature or unattended object within 2 yards of you, roll 4d as for crushing damage, determine knockback, and then double the distance; however, the victim suffers no actual damage or blunt trauma from the effect – just the consequences of being hurled around. As a special effect, knockback from this moves victims sideways (all clockwise or all anticlockwise; decide when triggering the attack) rather than away from you. Second, Dodge of you and all creatures within 2 yards of you is increased by 2 against projectile attacks.*

Body-Reading

Keywords: Information.

Full Cost: 14 points.

Casting Roll: IQ or Diagnosis.

Range: Unlimited.

Duration: Instantaneous.

Allows the caster to scan the subject's body for internal damage – ruptured organs, internal bleedings, bone fractures, and even the sex of an unborn child. The GM will secretly roll against the caster's IQ or Diagnosis minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the illnesses in question, this will reveal them. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

The spell does not reveal the exact nature of any poisons or diseases that may be affecting the subject, but it gives a +2 to any subsequent Poisons or Diagnosis roll. Note that this spell is more difficult to cast on subjects of different species. It takes a -2 penalty if the subject is of a different species than the caster (an Elven wizard reading a human subject, for instance), -4 or worse if totally alien!

Statistics: Detect (Internal Damage; Sorcery, -15%; Touch- or Vision-Based, -15%) [14].

Boil Blood

Keywords: Resisted (HT).

Full Cost: 43 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 5 seconds.

This spell boils the subject's blood. A subject who fails to resist submits to the spell and is overcome with agony (p. B428). Over the 5 seconds, he can resist again each second. Victory here doesn't end the spell but merely staves off harm; each loss deals 1 point of non-incendiary burning damage.

This is also a Water spell.

Statistics: Burning Attack 1 point (Accessibility, Only on beings with blood, -10%; Based on HT, +20%; Cyclic, 1 second interval, 4 seconds, Resistible, +200%; Link, +10%; Magical, -10%; Malediction 2, +150%; No Incendiary, -10%; No Signature, +20%) [10] + Affliction 1 (HT; Accessibility, Only on beings with blood, -10%; Agony, +100%; Fixed Duration, +0%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [33].

Boil Water

Keywords: None.

Full Cost: 2 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: Permanent.

This spell allows you to turn water into steam. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The initial matter can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. The produced steam has the same volume in cubic yards. For example, with Boil Water 2 you could transform 40 lbs. of water into 40 cubic yards of steam.

Statistics: Create (Transmute Water to Steam, +50%; Transmutation Only, -100%; Magical, -10%) [2/level].

Bone Splinters

Keywords: Area (Fixed).
Full Cost: 12 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous.

You cause bones of an SM-2 to SM+2 corpse to explode, showering everyone around it with bone shards. Use Innate Attack (Gaze), but without the +4 to target an area – you must hit the corpse. Everyone in a 4-yard-radius area is attacked with an effective skill of 14, modified only for their SM. Anyone hit takes 1d impaling damage. The corpse is destroyed in the process.

Statistics: Impaling Attack 1d (Accessibility, Must target the corpse, -10%; Area Effect, 4 yards, +100%; Bombardment, Skill-14, -5%; Sorcery, -15%; Trigger, SM-2 to SM+2 corpse with bones, -20%) [12].

Bone Stakes

Keywords: Buff.
Full Cost: 21 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The target grows sharp stakes from its arms, provided it has an internal skeleton. The stakes deal thrust impaling damage at range C, using DX or Brawling to attack and parry. For parrying purposes, the bone stakes have an effective weight equal to the subject's ST/10. While others can't disarm the subject, they can still strike the bone stakes; they have DR 1 and are considered cheap for the purpose of parrying. They also have HP according to a homogeneous material with its weight (see p. B557). If broken, the bone stakes recover their HP at the same rate as the subject's body.

Statistics: Affliction 1 (HT; Accessibility, Only on creatures with a skeleton, -10%; Advantage, Bone Stakes, +60%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Bone Stakes" is Natural Weapon (Impaling; Fragile, -20%; Magical, -10%) [6].

Book Binding

Keywords: Buff.
Full Cost: 32 points.
Casting Roll: None.
Range: Touch.

Duration: Permanent.

This seals a book so that its cover cannot be opened unless the opener touches it and speaks a particular password that is selected when the spell is cast. The password must be one that appears within the pages of the book itself. Lockmaster can counter this spell.

Statistics: Affliction 1 (HT; Accessibility, Only books, -50%; Extended Duration, Permanent, +150%; Melee Attack, Reach C, -30%; No Signature, +20%; Nuisance Effect, Can be overcome by Lockmaster, -5%; Paralysis, Variant, +150%; Sorcery, -15%) [32].

Book Lock

Keywords: None.

Full Cost: 27 points or 34 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Five hours.

The sorcerer must touch a closed book to cast this spell. Book Lock causes the pages and the binding to stick together and refuse to come apart regardless of how much physical effort is exerted. The caster can specify creatures that may open the book normally when he casts this spell.

The basic (27-point) version of this spell has a duration of five hours. The improved (34-point) version has a permanent duration.

Statistics: Affliction 1 (HT; Accessibility, Only books, -50%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Melee Attack, Reach C, -30%; No Signature, +20%; Nuisance Effect, Can be overcome by Lockmaster, -5%; Paralysis, Variant, +150%; Selective Effect, +20%; Sorcery, -15%) [27]. The improved version replaces Extended Duration, 100x, +80% with Extended Duration, Permanent, +150% [+7]. *Note:* Book Lock resists the Lockmaster spell as a Quick Contest, using Will plus the higher of Sorcerous Empowerment or Sorcery Talent.

Boost Dexterity

Keywords: Buff.

Full Cost: 30 points for level 1 + 18 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One second.

This spell raises the subject's DX by 1 per level of the spell for one second. It cannot be used to increase a roll that represents several seconds of effort, such as a Regular Contest. The boosted attribute affects all secondary characteristics. This spell can be cast *instantaneously* while it is active, allowing the caster to use it as a response to an attack.

Statistics: Affliction 1 (HT; Advantage, Boost Dexterity 1, +180%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Reflexive, +40%; Sorcery, -15%) [30]. *Notes:* Each level of "Boost Dexterity" is DX 1 (Magical, -10%) [18]. Additional levels add additional levels of Boost Dexterity to the Advantage enhancement [+18].

Boost Health

Keywords: Buff.

Full Cost: 18 points for level 1 + 6 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One second.

This spell raises the subject's HT by 1 per level of the spell for one second. It cannot be used to increase a roll that represents several seconds of effort, such as a Regular Contest. The boosted

attribute affects all secondary characteristics except FP. This spell can be cast *instantaneously* while it is active, allowing the caster to use it as a response to an attack.

Statistics: Affliction 1 (HT; Advantage, Boost Health 1, +60%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Reflexive, +40%; Sorcery, -15%) [18]. *Notes:* Each level of “Boost Health” is HT 1 (Does not increase FP, -30%; Magical, -10%) [6]. Additional levels add additional levels of Boost Health to the Advantage enhancement [+6].

Boost Intelligence

Keywords: Buff.

Full Cost: 29 points for level 1 + 18 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One second.

This spell raises a sapient subject’s IQ by 1 per level of the spell for one second. It cannot be used to increase a roll that represents several seconds of effort, such as a Regular Contest. The boosted attribute affects all secondary characteristics. This spell can be cast *instantaneously* while it is active, allowing the caster to use it as a response to an attack.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Boost Intelligence 1, +180%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Reflexive, +40%; Sorcery, -15%) [29]. *Notes:* Each level of “Boost Intelligence” is IQ 1 (Magical, -10%) [18]. Additional levels add additional levels of Boost Intelligence to the Advantage enhancement [+18].

Boost Strength

Keywords: Buff.

Full Cost: 19 points for level 1 + 7 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One second.

This spell raises the subject’s ST by 1 per level of the spell for one second. It cannot be used to increase a roll that represents several seconds of effort, such as a Regular Contest. The boosted attribute affects all secondary characteristics except HP. This spell can be cast *instantaneously* while it is active, allowing the caster to use it as a response to an attack.

Statistics: Affliction 1 (HT; Advantage, Boost Strength 1, +70%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Reflexive, +40%; Sorcery, -15%) [19]. *Notes:* Each level of “Boost Strength” is ST 1 (Doesn’t Grant HP, -20%; Magical, -10%) [7]. Additional levels add additional levels of Boost Strength to the Advantage enhancement [+7].

Borrow Language

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: 1 mile.

Duration: Indefinite.

You can “tap into” the mind of a sapient subject you can see or hear, and borrow their language. You gain a language at the subject’s comprehension level or Accented – whichever is less. The subject must know the language in question. If the distance between you and the subject becomes more than a mile, you lose the language!

Statistics: Telepathic Learning 4 (Limited, One Language, -50%; Reduced Time 2, +40%; Sorcery, -15%; Vision- or Hearing-Based, -15%) [13].

Borrow Skill

Keywords: None.

Full Cost: 21 points.

Casting Roll: None.

Range: 1 mile.

Duration: Indefinite.

You can “tap into” the mind of a sapient subject you can see or hear, and borrow their knowledge. You can borrow the equivalent of 4 character points (e.g., if you learned a Hard skill, you would know it at IQ+0). You cannot have more points in the skill than the person you’re borrowing it from does. If the distance between you and the subject becomes more than a mile, you lose the skill!

Statistics: Telepathic Learning 4 (Limited, One Skill, -10%; Reduced Time 2, +40%; Sorcery, -15%; Vision- or Hearing-Based, -15%) [21].

Botanomancy

Keywords: Information.

Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Botanomancy requires the burning of the branches and leaves of a tree, about 2 pounds worth, and the observation of the burning and of the ashes.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Trigger, Burning leaves, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Bottle

Keywords: Area (Fixed).

Full Cost: 31 points for level 1 + 11 points/additional level.

Casting Roll: IQ.

Range: 10 yards.

Duration: Instantaneous.

This spell automatically takes food or drink from a common pot, portions it out into available glass or tin containers (caster's choice of shape and type), sterilizes the containers, and seals them allowing the mage to quickly preserve food for later use. All containers to be used must fit within a single hex. The spell's effective ST equals its level. To find out the mass of food or drinks portioned by a single casting look up the spell's ST on the *Basic Lift and Encumbrance Table* (p. B17) and find the corresponding mass value for light encumbrance.

Statistics: Create Contaminants 1 (Accessibility, Only containers that were used for food portioning, -30%; Destruction Only, +0%; Link, +10%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 1, +20%; Reduced Range, 1/10, -30%) [20] + Telekinesis 1 (Link, +10%; Magical, -10%; One Task, Portioning food or drinks, -80%; Reduced Time 10, +200%) [11/level].

Boulder Barrage

Keywords: Area (Leveled).

Full Cost: 11 points (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You cause boulders to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone in the area is attacked with an effective skill of 12, modified only for their SM. Success means one hit plus one more per two full points of success; e.g., for an SM 0 target, one hit on 11-12, two hits on 9-10, three on 7-8, and so on, but no more than four hits. Each hit deals 1d crushing damage.

Victims may block or dodge, at -2 for an attack from above (p. B402), but not parry; shield DB adds normally. Success avoids one hit plus additional hits equal to margin of success. Determine hit location randomly. Overhead cover provides its usual benefits; *Dodge and Drop* (p. B377) is only effective if there's cover to dive for!

You may always choose (when casting) to scale back the damage or the area affected.

The basic (12-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 2.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +5 to base cost, the damage can be upgraded to 2d or 3d crushing. This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	11 points	14 points	16 points	19 points	21 points	24 points	26 points
2d	22 points	27 points	32 points	37 points	42 points	47 points	52 points
3d	33 points	41 points	48 points	56 points	63 points	71 points	78 points

Statistics: Crushing Attack 1d (Area Effect, 2 yards, +50%; Blockable, -5%; Bombardment, Skill-12, -10%; Extra Recoil 1, -10%; Overhead, +30%; Rapid Fire, RoF 4, +70%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [11]. Improved versions add Area Effect (+50%/level) and/or improve to Crushing Attack 2d or 3d.

Branch Fingers

Keywords: Buff.

Full Cost: 13 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject's digits become elongated and covered in bark. When the subject targets the eyes with a barehanded strike or eye gouge, he gets the x4 wounding modifier for the skull.

Statistics: Affliction 1 (HT; Advantage, Branch Fingers, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [13]. *Note:* "Branch Fingers" is Long Fingers (Magical, -10%) [1].

Bravery

Keywords: Buff.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You make the subject braver. The subject adds 4 level to his Will whenever he makes a Fright Check or must resist the Intimidation skill (p. B202) or a supernatural power that induces fear. He also subtracts 1 from all Intimidation rolls made against him. However, this bravery makes the subject overconfident. Treat this as having Overconfidence (p. B148) with a self-control number of 12. The spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Bravery, +70%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Note:* “Bravery” is Fearlessness 4 (Magical, -10%; Temporary Disadvantage, Overconfidence (12), -5%) [7].

Break Rock

Keywords: None.

Full Cost: 11 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell allows you to reduce a volume of rock to smaller pieces. To break rock, you must touch it, take a Concentrate maneuver, and pay 1 FP. Then make an IQ roll. Success means the target is reduced to smaller boulders (averaging one cubic foot and 150 lbs.), rubble suitable for construction, or gravel; only gravel can be shoveled out. The mass of rock will collapse naturally after it breaks. This spell only affects inanimate objects.

The destroyed rock can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create Rock (Destruction Only, Variant, +0%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [11/level].

Breakfall Plants

Keywords: Buff.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject subtracts five yards from a fall automatically, if he falls onto some form of living plant material (treat this as an automatic Acrobatics success – don’t check again for it). In addition, a successful DX roll halves damage from any fall.

Statistics: Affliction 1 (HT; Advantage, Breakfall Plants, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Note:* “Breakfall Plants” is Catfall (Accessibility, Only when falling onto living plants, -50%; Feather Fall, +20%; Magical, -10%) [6].

Breath Adaptation

Keywords: Buff.

Full Cost: 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject’s lungs can adapt to great pressure, permitting him to breathe unhindered (and avoid the bends) at up to 10 atmospheres. This allows him to travel as deep as 12.5 miles underground. This effect does *not* work underwater.

Statistics: Affliction 1 (HT; Advantage, Breath Adaptation, +30%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* “Breath Adaptation” is Pressure Support 1 (Accessibility, Not under water, -30%; Magical, -10%) [3].

Breath of Life

Keywords: Buff.

Full Cost: 215 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 1 minute.

You can temporarily bring a formerly living creature back from the dead, if his body is not completely destroyed (-10xHP or worse). You must touch the corpse to affect it. If the subject does not want to come back (GM's opinion, for NPCs), the spell fails automatically. This subject recovers 60 HP in 1 minute – if this brings him back above -HP before the duration ends, he returns to life! But if it's not enough, or if the initial HT roll fails, he cannot be resurrected. When the duration runs out, the subject immediately dies! He cannot be brought back to life ever again.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Advantage, Breath of Life, +2,250%; Aftermath, Heart Attack, -150%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [215]. *Notes:* "Breath of Life" is Regeneration (Very Fast; Cosmic, Works on the dead, +50%) [150] + Unkillable 1 (Cosmic, Works on the dead, +50%) [75]. This version of Cosmic means it *only* works on the dead – not injured living creatures – and gives one try, ever.

Breathe Air

Keywords: Buff.

Full Cost: 20 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject becomes able to breathe air as though it were water. He does not lose his ability to breathe water.

Statistics: Affliction 1 (HT; Accessibility, Only on water-breathing creatures, -40%; Advantage, Breathe Air, +80%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Note:* "Breathe Air" is Doesn't Breathe (Gills, -50%; Magical, -10%) [8].

Breathe Fire

Keywords: Jet, Obvious.

Full Cost: 4.5 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of flame erupts from your mouth, much like the long tongue of a flamethrower. Use Innate Attack (Breath) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning damage with dice equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack (Increased 1/2D, 2x, +5%; Jet, +0%; Sorcery, -15%) [4.5/level].

Breathe Plasma

Keywords: Jet, Obvious.

Full Cost: 7 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of plasma erupts from your mouth, much like the long tongue of a plasma flamethrower. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does 1d(2) burning damage per level of this spell. The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack (Armor Divisor, (2), +50%; Increased 1/2D, 2x, +5%; Jet, +0%; Sorcery, -15%) [7/level].

Breathe Radiation

Keywords: Jet, Obvious.

Full Cost: 5.4 points/level*.

Casting Roll: None. Use Innate Attack (Breathe) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of invisible radiation erupts from your mouth, much like the long tongue of a flamethrower. Use Innate Attack (Breath) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does radiation damage (p. B435) with dice equal to your level of this spell, ignoring DR. The GM must determine what the maximum level available in the campaign is.

Statistics: Toxic Attack (Increased 1/2D, 2x, +5%; Jet, +0%; No Signature, +20%; Radiation, +25%; Sorcery, -15%) [5.4/level*].

* Calculate the total cost and round up.

Breathe Steam

Keywords: Jet, Obvious.

Full Cost: 37 points for level 1 + plus 13 points per additional level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 20 yards.

Duration: Instantaneous.

You shoot a thin jet of steam from your fingertip, which can strike any target up to 20 yards away (without range or speed penalties). It can be dodged or blocked, but not parried. This jet does 1d burning non-incendiary damage per level, and 1d crushing damage *doubled*, for the purposes of knockback only.

Against enemies with Injury Tolerance (Diffuse), such as gaseous beings and swarms, this becomes a *much* more potent attack, doing full crushing damage – including the doubling (in addition to burning damage)! Ignore the usual injury cap of 2 HP (*Injury to Unliving, Homogenous, and Diffuse Targets*, p. B380).

If the spell strikes the face, it also blinds the target for 3 seconds unless he makes a HT roll. Thick goggles, closed helmets, ultra-tech visors protect against this spell.

Statistics: Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Blockable, -5%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Reduced Duration, 1/60, -35%; Sorcery, -15%; Vision-Based, +150%) [25] + Burning Attack 1d (Blockable, -5%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; No Incendiary Effect, -10%) [5/level] + Crushing Attack 1d (Blockable, -5%; Cosmic, Does knockback-based damage against diffuse targets, +50%; Double Knockback, +20%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; No Blunt Trauma, -20%; No Wounding*, -25%) [6.75/level].

* Except versus diffuse targets, an exception which decreases the value of this limitation.

Breathe Water

Keywords: Buff.

Full Cost: 23 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject becomes able to breathe water as though it were air. He does not lose his ability to breathe air.

Statistics: Affliction 1 (HT; Accessibility, Only on air-breathing creatures, -10%; Advantage, Breathe Water, +80%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. *Note:* "Breathe Water" is Doesn't Breathe (Gills, -50%; Magical, -10%) [8].

Bright Vision

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject's vision is protected against overload. It rapidly adapts to the most intense of stimuli, allowing him to function normally after a maximum of two seconds of impairment. He will never suffer permanent damage to vision as a result of excessive sensory input, and he gets +5 to rolls to resist temporary damage and Vision-Based attacks. This spell resists glare and eye damage from lasers, and lets Dark Vision, Infravision, and Night Vision adjust instantly from bright light to darkness.

Statistics: Affliction 1 (HT; Advantage, Bright Vision, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Bright Vision" is Protected Vision (Magical, -10%) [5].

Brighten Fire

Keywords: Area (Special).

Full Cost: 45 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can make a fire with a radius up to spell level in yards burn more bright. It doubles the area of illumination and doubles the decrease of illumination penalties. This does not affect either fuel consumption or damage caused by the fire.

This is also a Light and Darkness spell.

Statistics: Control Fire 1 (Only to increase brightness, -80%; Ranged, +40%; Sorcery, -15%) [9] + Control Fire +9 (Does not increase area, -50%; Only to increase brightness, -80%; Ranged, +40%; Sorcery, -15%) [36]. Each additional level adds Control Fire +1 (Only increases area, -50%; Only to increase brightness, -80%; Ranged, +40%; Sorcery, -15%) [4].

Brilliant Energy Weapon

Keywords: Weapon Buff.

Full Cost: 36 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell turns the weapon into a blade of destructive brilliant energy. The affected damaging melee weapon automatically gets to roll its usual damage against any weapon that parries it – in effect, it's destructive for parrying purposes, just like a force sword. Roll its damage normally and apply it to the parrying weapon (or body part, if your opponent made an unarmed parry).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Brilliant Energy Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Brilliant Energy Weapon" is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Annihilating Weapon imbue skill.

Brittle Bones

Keywords: Resisted (HT).
Full Cost: 28/29/31 points for levels 1-3.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

This spell makes the subject's bones brittle and hence more vulnerable to crushing attacks. The subject multiplies any crushing damage that penetrates its DR by 2 before applying any normal wounding multipliers. Level 2 of this spell increases the multiplier to 3, and level 3 increases the multiplier by 4. This spell does not affect creatures without an internal skeleton.

Statistics: Affliction 1 (HT; Accessibility, Only on creatures with a skeleton, -10%; Disadvantage, Vulnerability (Crushing, x2), +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [28]. Additional levels improve Disadvantage, Vulnerability (Crushing, x2), +30% to Disadvantage, Vulnerability (Crushing, x3), +45% and Disadvantage, Vulnerability (Crushing, x4), +60%.

Brittleness

Keywords: Resisted (HT).
Full Cost: 32 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

You freeze the subject's flesh, making it brittle. Whenever an injury cripples one of the subject's limbs or extremities, it *breaks off*. If the subject can make a HT roll, it falls off in one piece; otherwise, it shatters irrecoverably. Furthermore, should the subject fail any HT roll to avoid death, he is instantly shattered and instantly goes to -10xHP.

Additionally, the subject takes double damage from crushing attacks.

If you wish, you can choose to affect only specific body parts instead of the whole subject. For example, you could affect only his left arm, or anything except his head.

Statistics: Affliction 1 (HT; Disadvantage, Brittle, +15%; Disadvantage, Vulnerability (Crushing; x2), +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Effect, +20%; Sorcery, -15%) [32].

Bullet Protection

Keywords: Buff.
Full Cost: 15 points for level 1 + 3 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

The subject, and all of his carried gear, is protected from bullets by an invisible field of pure force. This increases his DR against bullets by 2 per level of this spell (e.g., Bullet Protection 3 adds DR 6), cumulative with that from actual armor. This only affects firearm bullets, granting no protection against laser beams, sling bullets, bullets flung by telekinesis, etc.

Statistics: Affliction 1 (HT; Advantage, Bullet Protection 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Bullet Protection to the Advantage enhancement [+3]. *Note:* Each level of "Bullet Protection" is Damage Resistance 2 (Force Field, +20%; Limited, Firearm Bullets, -80%; Magical, -10%) [3].

Bullet Shield

Keywords: Buff.
Full Cost: 13 points for level 1 + 1 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.

Duration: Three minutes.

The subject, and all of his carried gear, is protected from bullets by an invisible field of pure force, but *only from the front*. This increases his DR against bullets by 1 per level of this spell (e.g., Bullet Shield 3 adds DR 3), cumulative with that from actual armor against attacks made from the front. This only affects firearm bullets, granting no protection against laser beams, sling bullets, bullets flung by telekinesis, etc.

Statistics: Affliction 1 (HT; Advantage, Bullet Shield 1, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [13]. Additional levels add further Bullet Shield to the Advantage enhancement [+1]. *Note:* Each level of "Bullet Shield" is Damage Resistance 1 (Directional, Front, -20%; Force Field, +20%; Limited, Firearm Bullets, -80%; Magical, -10%) [1].

Buoyant Plant Life

Keywords: Area (Leveled), Buff.

Full Cost: 25 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

All vegetable material floating on water in the area of effect becomes supernaturally buoyant. Choose one of three levels at the time of the spell's casting.

Can be temporarily held below the surface: The plant life cannot stay submerged for more than 1d+9 seconds. Roll once, for all plants in the area.

Never fully under: The plant life can be 90% submerged, but never fully.

Always on the surface: The plant life floats, with no more than 10% of its mass under water, and cannot go deeper.

Note that the vegetation is not fixed to its current location, so anyone who wants to hop between lily pads or walk across floating logs risks falling down. Treat this as if the person was walking on objects laid over a greased surface (*GURPS Magic*, p. 142).

The basic (26-point) version of this spell affects subjects in a two-yard radius. For each additional 5 points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Accessibility, Plants Only, -40%; Advantage, Buoyant Plant Life, +110%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%; Variable, +5%; Variable Area, +5%) [26]. *Notes:* "Buoyant Plant Life" is Walk on Liquid (Always On, -20%; Magical, -10%) [11]. The additional levels add more levels of Area Effect (+50%) [+5].

Burden of Time

Keywords: Area (Leveled).

Full Cost: 80 points for level 1 + 9 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds; see text.

This spell causes the target area to wither everyone contained within. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect.

All living creatures within the area age 1d-1 years each second they remain in the area. This aging is temporary. Every time the victim would heal 1 HP but is at full HP, he can instead roll against his or her "Original HT" meaning that if the victim had 13 HT originally, but lost a couple to aging rolls he would still roll against 13 not his "new" HT. Success returns 1 year, failure and critical failure do nothing.

Statistics: [Ageing Attack 1d-1](#) (Accessibility, Only on living creatures, -10%; Area Effect, 2 yards, +50%; Cosmic, Irresistible Attack, +300%; No Signature, +20%; Persistent, +40%; Sorcery, -15%;

Temporary, -50%; Variable, Area, +5%) [80]. Additional levels add Area Effect (+50%) to the advantage [+9].

Burning Death

Keywords: Resisted (HT).

Full Cost: 20 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 5 seconds.

The caster must touch the subject to cast this spell. The subject begins to burn from within, taking 1d-1 burning damage each second for 5 seconds. DR does not protect. Each second the subject may resist the damage by making a successful HT roll. If the roll is a critical success, then the spell stops.

If the subject loses ½ of his HP or more to this spell, he begins experiencing terrible pain (B428) until he is healed above this threshold. Once the subject dies from this spell, his body bursts into flame and burns until only a little pile of ashes remains.

Undead beings are not affected by this spell.

Statistics: Burning Attack 1d-1 (Accessibility, Only on living beings, -10%; Based on HT, +20%; Cyclic, 1 second interval, 4 seconds, +200%; Melee Attack, Reach C, Cannot Parry, -35%; Malediction 1, +100%; Sorcery, -15%; Symptoms, ½ HP, Terrible Pain, +120%) [20].

Burning Hands

Keywords: Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous.

You fire a cone of flame that does 1d burning damage per level. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell's maximum range. This spell has the 1/2D range of 2 yards.

Statistics: Burning Attack 1d (Cone 5, +100%; Increased 1/2D, x2, +5%; Reduced Range, 1/10, -30%; Sorcery, -15%) [8/level].

Burning Touch

Keywords: Obvious.

Full Cost: 2.5 points/level*.

Casting Roll: None. Use unarmed combat skill or DX to hit.

Range: Touch.

Duration: Instantaneous.

This spell charges the caster's hand with fire. The caster must touch the subject to trigger this spell. The touch deals 1d burning damage per level of this spell.

Statistics: Burning Attack 1d (Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%) [2.5/level*].

* Calculate the total cost and round up.

Burning Weapon

Keywords: Weapon Buff.

Full Cost: 36 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell turns the weapon or projectiles it fires to flame, converting the damage of a non-burning attack from its usual damage type to burning. For impaling or piercing weapons, you end up with a tight-beam burning attack, which can target vital areas.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Burning Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* “Burning Weapon” is 26 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Burning Strike imbue skill.

Butcher

Keywords: Resisted (HT).

Full Cost: 76 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell painlessly slaughters an animal and then separates the carcass into handy packages. Subjects with IQ 5 or less resist with HT. Failure means they die painlessly. As the corpse collapses to the ground, it falls into neat piles of meat, hide, bones, guts, and so on.

Subjects with IQ 6+ add (IQ - 5) to their resistance roll: HT+1 at IQ 6, HT+2 at IQ 7, and so on. Average humans, with IQ 10, resist at HT+5 and are *almost* immune. Dead bodies can't resist. On them, this is just a costly Prepare Game variant.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, +300%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, IQ Bonuses to resistance rolls, -20%; Sorcery, -15%) [64] + Telekinesis 1 (Link, +10%; Magical, -10%; One Task, Prepare Game, -60%; Reduced Time 10, +200%) [12]. *Note:* See *GURPS Thaumatology: Sorcery*, p. 14 for the One Task limitation. Here, Reduced Time is used to shorten a 10-minute process to one second, which was chosen because it costs the same as an Average technique to buy off the -10 for “instant use.”

Cadence

Keywords: Buff.

Full Cost: 38 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 hour.

Doubles the rate of production of *mundane* crafted items by both hastening the craftsman's movements and making them surer, eliminating wasted strokes. The spell is broken if the subject interrupts his work.

Statistics: Affliction 1 (HT; Advantage, Cadence, +200%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [38]. *Note:* “Cadence” is Altered Time Rate 1 (Accessibility, Only for mundane crafting, -80%; Magical, -10%; Nuisance Effect, Broken if interrupted, -10%) [20].

Call

Keywords: Obvious.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

Caster calls any one *known, trained* animal (like a pet or mount) from afar. The beast receives +3 to its Hearing roll to notice this, which gives eight times the usual distance. However, it is not obliged to respond.

Statistics: Accessory (Pet Whistle; Sorcery, -15%) [1].

Call Lightning

Keywords: Missile, Obvious.

Full Cost: 11 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

When you have storm clouds above your head, you can cause a lightning to strike your victim, dealing 1d burning surge damage per level. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Lightning behaves unpredictably around conductors; see *Lightning (GURPS Magic, p. 196)* for more details.

This spell bypasses any cover that does not provide overhead protection, and negates attack penalties to hit crouching, kneeling, sitting, or prone targets. (If you are already above or below your target, adjust this appropriately.)

Statistics: Burning Attack 1d (Environmental, Storm, -40%; Nuisance Effect, Behaves erratically around conductors, -5%; Overhead, +30%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [11/level].

Call Monster

Keywords: Resisted (Will).

Full Cost: 129 points.

Casting Roll: Per to detect, IQ to assume control.

Range: Unlimited.

Duration: 3 minutes.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest non-sapient monster. This spell uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the monster, and may make a follow-up IQ roll with the same penalty to call it to himself. It moves towards the caster as fast as it can, until the spell ends or the monster reaches the immediate vicinity of the caster.

Statistics: Detect Monster (Link, +10%; Lock-On, +50%; Long-Range 1, +50%; Magical, -10%; Precise, +100%; Selective Effect, +20%) [64] + Mind Control (Accessibility, Monsters Only, -35%; Accessibility, Only to make the monster travel to you, -50%; Fixed Duration, +0%; Independent, +70%; Link, +10%; Long-Range 1, +50%; Sorcery, -15%) [65].

Calm Emotions

Keywords: Resisted (Will).

Full Cost: 33 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 3 minutes.

You can calm down a single creature. Only creatures with a racial IQ 6+ or less can be affected. This spell stops Berserk and prevents the subject from doing any destructive actions (he can still defend himself). Should the creature be attacked or injured, the compulsion breaks.

Statistics: Mind Control (Accessibility, IQ 6+ creatures only, -10%; Accessibility, Only to calm down, -30%; Emotion Control, -50%; Independent, +70%; Sorcery, -15%) [33].

Calm Spirit

Keywords: Resisted (Will).

Full Cost: 18 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 3 minutes.

This spell calms down any single spirit.

Statistics: Mind Control (Accessibility, Spirits Only, -40%; Accessibility, Only to calm down, -30%; Emotion Control, -50%; Independent, +70%; Sorcery, -15%) [18].

Cancel Pregnancy

Keywords: None.

Full Cost: 1 point.

Casting Roll: Will.

Range: Self.

Duration: Instantaneous.

You can absorb an early fetus back into the womb.

Statistics: Reabsorption (Sorcery, -15%) [1].

Capturing Vines

Keywords: Area (Leveled).

Full Cost: 45 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You can direct existing vines to entangle and restrain everyone within an area. It requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). The binding has ST 15 and lasts for 10 seconds, continuing to entangle new people who blunder into it. Those already caught grow more tightly entangled, with +1 to the ST of their bonds for each additional second they remain grappled. If the vines are reaching out laterally (from a wall or fence), targets may use active defenses. If the attack comes up from the ground, limit active defenses to parries with feet or a dodge at -3. This spell has no effect on sapient plants.

The basic (45-point) version of this spell affects subjects in a two-yard radius. For each additional 15 points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to omit specific targets from the area of effect.

Statistics: Binding 15 (Area Effect, 2 yards, +50%; Can be defended against, -5%; Environmental, Vines, -40%; Persistent, +40%; Selective Area, +20%; Sorcery, -15%) [45]. The additional levels add more levels of Area Effect (+50%) [+15].

Carnivory

Keywords: Resisted (HT).

Full Cost: 48 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

This spell makes the subject's digestive system only be able to digest animal matter. If the subject is an herbivorous creature, they lose Restricted Diet (Herbivore). This spell only works on living creatures, not on machines that may consume fuel or energy.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Disadvantage, Restricted Diet (Carnivore), +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; Negated Disadvantage, Restricted Diet (Herbivore), +100%; No Signature, +20%; Sorcery, -15%) [48].

Cartomancy

Keywords: Information.

Full Cost: 42 or 92 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Cartomancy is divination using the tarot or other fortune-telling cards. The only equipment required is a tarot deck (hand-painted and worth \$1,000 at TL3 and below, but mass-produced inexpensively at higher tech levels). Cartomancy is highly personal; any attempt to ask questions about people other than the subject is at -5.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (42-point) version of this spell requires 10 minutes to cast! The improved (92-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Penalty for impersonal questions, -5%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a tarot deck, -10%) [42]. The improved version adds Reduced Time 10 (+200%) [+50].

Cast-Iron Stomach

Keywords: Buff.

Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell allows the subject to eat spoiled food and drink contaminated water. This reduces the subject's demands on life support and food costs to 1% normal, and gives the subject +4 to resist effects of food-borne poisons or diseases not tailored expressly for them, but -3 on reactions from anyone watching them eat.

Statistics: Affliction 1 (HT; Advantage, Cast-Iron Stomach, +40%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* “Cast-Iron Stomach” is Reduced Consumption 4 (Cast-Iron Stomach, -50%; Magical, -10%) [4].

Catch Spell

Keywords: None.

Full Cost: 63 points/level.

Casting Roll: DX/2 + 3. Use Innate Attack (Projectile) to aim the caught spell.

Range: Self.

Duration: Instantaneous.

This spell may be cast as an immediate reaction against Missile spells that have been projected at the caster of this spell, allowing them to catch the missile as it comes within reach. So long as the casting roll is successful and the spell's basic damage is less than (Catch Spell level)x2 dice, the spell is physically caught in the caster's free hand. Convert all flat damage to dice (as per p. B269) for this determination. Catch Spell also allows the caster to catch non-damaging Missile spells; each level of Catch Spell can repel two levels of Affliction or 10 levels of Binding. However, the caster cannot catch area spells.

Once caught, the spell can be held by the caster to be thrown later, as if they had cast it themselves. If the caster switches to another spell, the caught spell dissipates harmlessly. Regardless of the skill used by the original caster, the caught spell is aimed with Innate Attack (Projectile). The caster does not have to spend FP to throw the caught spell.

The casting roll is modified by Talent and Combat Reflexes. If the caster tries to cast Catch Missile more than once in a turn, the casting roll takes a cumulative -4 penalty per attempt after the first within a turn. The caster rolls at -4 if stunned and cannot cast Catch Missile in situations where they would not get an active defense. If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Catch Missile, they cannot cast this spell until *all* FP are replenished. This spell does count as an active defense for the purpose of cumulative defense penalties and cannot be combined with other active defenses.

Statistics: Damage Resistance 7 (Accessibility, Requires gestures, -10%; Active Defense, -40%; All-or-Nothing, -10%; All-Out, -25%; Cosmic, Can change the target for Reflection, +50%; Force Field, +20%; Limited, Missile Spells, -40%; Reflection, +100%; Sorcery, -15%; Triggered Delay on Reflection, +50%) [63/level]. *Notes:* Each DR 7 is converted into 2d per p. B269. The ruling on Affliction and Binding is from p. 168 of *GURPS Powers*. All-Out turns the casting into an actual active defense, prohibiting the caster from using this spell in conjunction with another active defense. The requirement of a free hand restricts the sorcerer's options when using Alternative Rituals (*GURPS Thaumatology: Sorcery*, p. 7).

Catfall

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject subtracts five yards from a fall automatically, if their body and limbs are free to move and twist (treat this as an automatic Acrobatics success – don't check again for it). In addition, a successful DX roll halves damage from any fall.

Statistics: Affliction 1 (HT; Advantage, Catfall, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Catfall" is Catfall (Magical, -10%) [9].

Cause Pain

Keywords: Resisted (HT).

Full Cost: 31 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

The subject is wracked with pain for 1 minute. He must make a Will roll to avoid crying out. He has a -6 penalty to all DX, IQ, skill, and self-control rolls. High Pain Threshold halves these penalties; Low Pain Threshold doubles them. The caster can decrease the pain penalties to -4 or -2 when casting the spell.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Terrible Pain, +60%; Variable, +5%) [31].

Celestial Aid

Keywords: Buff.

Full Cost: 20 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You make the subject braver and slightly more resistant to damage. The subject gains DR 4. This DR takes the form of a field projected a short distance from the subject's body. This protects his body – including the eyes – as well as anything he is carrying, and reduces the damage from attacks before armor DR. This DR is ablative - it stops damage once. Each point of DR stops one point of basic damage but is destroyed in the process. Lost DR “heals” at the same rate as lost HP (including the effects of Regeneration, p. B80).

Additionally, the subject adds 1 to his Will whenever he makes a Fright Check or must resist the Intimidation skill (p. B202) or a supernatural power that induces fear. He also subtracts 1 from all Intimidation rolls made against him.

Statistics: Affliction 1 (HT; Advantage, Celestial Aid, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Note:* “Celestial Aid” is Fearlessness 1 (Magical, -10%) [2] + DR 4 (Force Field, +20%; Ablative, -80%; Magical, -10%) [6].

Celestial Shotgun

Keywords: Area (Leveled).

Full Cost: 7 points (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause balls of lead, resembling those of a shotgun, to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d small piercing damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected.

The basic (7-point) version of this spell lets you affect an area up to 16 yards across. Each additional doubling of area adds to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +100% to cost (including any increased area), rounded up, the damage can be upgraded to 2d small piercing. This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	7 points	9 points	10 points	12 points	13 points	15 points	16 points
2d	14 points	17 points	20 points	23 points	26 points	29 points	32 points

Statistics: Small Piercing Attack 1d (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [7]. Improved versions add Area Effect (+50%/level) and/or improve to Small Piercing Attack 2d.

Censure

Keywords: Resisted (Will).

Full Cost: 41 points.

Casting Roll: Will.

Range: Touch.

Duration: One day.

This spell is only appropriate for divine spellcasters that are part of an organized church. If the subject fails to resist, the creature is marked by the spell. The mark is visible to the casting priest and all followers of the same faith. Priests of the same alignment who worship other deities cannot see the mark, but instinctively react to a censured creature with aversion. Regardless of whether they can see the mark or not, priests of the same alignment react to the marked creature at -3.

To beings of the caster's faith, the mark shines clearly through clothing and disguises including disguising magic, and even invisibility. However, the mark is invisible to the one bearing it - who may not even know of its existence if it was bestowed in a battle or while the creature was asleep or

unconscious. Worshipers can thus readily spy upon and follow those marked as enemies even in crowds or busy city streets. Priests are warned that misuse of such a spell brings about swift divine disfavor.

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Extends to similar faiths, +50%; Disadvantage, Social Stigma (Excommunicated), +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, -30%; Negated Advantage, Invisibility, Only to the caster's faith, +30%; No Signature, +20%; Sorcery, -15%) [41].

Chain Lightning

Keywords: Missile, Obvious.

Full Cost: 15 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a coruscating discharge of electricity that does 1d burning surge damage per level. The discharge leaps to other available targets after hitting the initial target! If that attack succeeds, immediately consult your margin of success. If the margin is high enough to hit a separate target *after* accounting for range penalties *plus* -2, the next target is struck unless they make an appropriate active defense. If the target is hit then check the margin again until the attack fails to hit or seven targets (the maximum) are hit.

Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Chain Lightning behaves unpredictably around conductors; see Lightning (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Nuisance Effect, Behaves erratically around conductors, -5%; Rapid Fire, Chaining, 7 targets, +70%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [15/level]. *Note:* *Rapid Fire, Chaining* is taken from Ravens N' Pennies [blog post](#).

Chains of Light

Keywords: Resisted (DX).

Full Cost: 103 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent or until the victim breaks free.

You conjure chains of coalesced light that bind the victim. If the victim fails to resist, he is grappled (see p. B370) and rooted in place. He cannot select the Move or Change Posture maneuvers or change facing, and is at -4 to DX. The ST of this effect is equal 10, but each successful successive casting adds another layer. Each extra layer gives +1 to ST.

To break free, the victim must win a Quick Contest of ST or Escape skill against the ST of your Chains of Light. Each attempt takes one second. If the victim fails to break free, he loses 1 FP but may try again. The bonds cannot be destroyed by attacks.

In addition, while this spell is active, you may use the Concentrate maneuver to perform a takedown (p. B370) on the bound victim. Your effective ST is 10 for this purpose. This roll is modified by Talent, but does *not* take range penalties.

Statistics: Binding 10 (Based on DX, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Unbreakable, +40%) [63] + Telekinesis 10 (Increased Range, LOS, +70%; Magical, -10%; One Task, Takedown of foes bound by the chains of light, -80%) [40].

Chameleon Skin

Keywords: Buff.

Full Cost: 20 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject's skin changes its surface pattern to blend into the surroundings. In any situation where being seen is a factor, the subject gets +2 per level to Stealth skill when perfectly still, or +1 per level if moving. Clothing reduces this bonus to +1 per level when he is motionless, with no bonus if he is moving (unless the clothing is, in the GM's opinion, camouflaged relative to the subject's current environment). Chameleon Skin does not normally help in the dark or against someone relying upon senses other than sight. The subject cannot turn this ability off - strangers react at -1; the flickering effect is irritating.

Statistics: Affliction 1 (HT; Advantage, Chameleon Skin 1, +40%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Notes:* Each level of "Chameleon Skin" is Chameleon 1 (Vision; Always On, -10%; Magical, -10%) [4]. Additional levels add further Chameleon Skin to the Advantage enhancement (+40%) [+4].

Change Air

Keywords: None.

Full Cost: 16 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell allows you to turn gas in the area with a radius up to the spell level in yards into another gas, including breathable air. To do so, touch the gas you wish to transform or stand amidst it, take a Concentrate maneuver and roll vs. IQ. Success means you transform the gas successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Statistics: Create (Transmute Gas to Gas, +50%; Transmutation Only, -100%; Magical, -10%) [16/level].

Change Animal

Keywords: Resisted (HT).

Full Cost: 41 points or more.

Casting Roll: Will

Range: Unlimited.

Duration: 30 minutes.

The caster transforms one animal into another animal. The subject cannot shift back on its own; it must wait for the spell to expire or be dispelled. Each animal form is a different spell, to be learned separately. The caster may only learn the form of an animal with which he is familiar. If the subject is knocked out or killed, it immediately reverts to its native form (which will also be unconscious or dead).

The subject retains its intelligence, but gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Accessibility, Only on animals, -25%; Advantage, Change Animal, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [41]. *Notes:* "Change Animal" is Alternate Form (Animal; Magical, -10%) [14]. This spell costs 41 points for a racial template worth no more than the subject's native racial template. A more powerful form costs 41 points plus 90% of the difference in cost between the subject's native template and that of the animal form. The caster may learn to affect more powerful subjects by investing more points into this spell.

Change Coloration

Keywords: Resisted (HT).

Full Cost: 43 points or 67 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Five hours (basic) or Truly Permanent (improved).

This spell allows the mage to change an animal's coloration to any color or pattern naturally found in creatures of that species. For example, a cat could be turned from black to gray tabby, but it couldn't be turned purple. The basic (43-point) version lasts for five hours. The improved (67-point) version is permanent and irreversible.

Statistics: Affliction 1 (HT; Accessibility, Only on animals, -25%; Advantage, Change Coloration, +120%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [43]. *Note:* "Change Coloration" is Elastic Skin (Accessibility, Only natural coloration, -30%; Magical, -10%) [12]. The improved version replaces Elastic Skin (Accessibility, Only natural coloration, -30%; Magical, -10%) [12] with Elastic Skin (Accessibility, Only natural coloration, -30%) [14] and Extended Duration, 100x, +80% with Extended Duration, Truly Permanent, +300% [+24].

Change Species

Keywords: Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster changes the species of a plant – sunflower to tulip, acorn to walnut, birch tree to grapevines, etc., as if using the Morph advantage (p. B84). The mass cannot be altered by more than $\pm 20\%$.

Statistics: Affliction 1 (HT; Accessibility, Only on plants, -40%; Advantage, Change Species, +200%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Note:* "Change Species" is Morph (Accessibility, Plants Only, -50%; Magical, -10%; Mass Conservation, -20%) [20].

Changestaff

Keywords: None.

Full Cost: 16 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

The caster plants his wooden staff into the ground, and the staff transforms into a twigling (*GURPS Dungeon Fantasy 9: Summoners*, page 31). At the end of the casting, you must pay 1 FP and make a Will roll to animate the twigling. If you are victorious, the twigling is animated for margin of success hours. If it is killed, the summoner must wait a full day to call replacements. Dismissing the twigling is a free action, but the caster may only dismiss him if it is physically present. The twigling then reverts into the staff form. The caster can only cast this spell if his character's point total is at least 2 times bigger than the twigling's. The summoned twigling obeys all orders issued by the caster.

Statistics: Ally (Twigling; Built on 50%; Constantly, no roll required; Conjured, +100%; Environmental, Ground, -20%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires a wooden staff, -10%; Requires Will Roll, -5%) [16]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Channel Negative Energy

Keywords: Area (Fixed), Obvious.

Full Cost: 47 or 128 points.

Casting Roll: Will.

Range: Self.

Duration: Three minutes and Instantaneous, see text.

You channel negative energy through your body that appears as a black flash.

When the basic (47-point) version of this spell is cast, every living being within four yards immediately takes 2d crushing damage, regardless of DR, insubstantiality, etc. When the improved (128-point) version is cast, there is an additional effect - undead creatures in this area instead are imbued with healing energies, regenerating 1 HP per minute for 3 minutes. Casting this spell again does not improve the healing rate, only resetting the duration. If a particular undead subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Crushing Attack 2d (Accessibility, Only on living creatures, -10%; Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; No Knockback, -10%; Sorcery, -15%) [47]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Notes:* The improved version adds Link, +10% to Crushing Attack replaces Sorcery, -15% with Magical, -10%, and adds Affliction 1 (HT; Accessibility, Only on undead, -50%; Advantage, Channel Negative Energy, +450%; Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Emanation, -20%; Fixed Duration, +0%; Link, +10%; Negated Disadvantage, Unhealing (Total), Only for this spell, +200%; Sorcery, -15%) [80] [+81]. "Channel Negative Energy" is Regeneration (Fast; Magical, -10%) [45].

Channel Negative Energy (Affinity Variant)

Keywords: Area (Fixed), Obvious.

Full Cost: 32 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You channel negative energy through your body that appears as a black flash. When this spell is cast, every living or undead being within four yards immediately takes 2d negative energy damage. Undead creatures or other creatures with Negative Energy Affinity are healed instead as described in the ability. Treat any excess damage (or all damage, for living beings) as crushing damage with no knockback. This spell cannot affect Sealed beings, but can affect insubstantial beings.

Statistics: Crushing Attack 2d (Accessibility, Only on undead and living creatures, -5%; Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Contact Agent, +150%; Emanation, -20%; No Knockback, -10%; Sorcery, -15%) [32].

Channel Positive Energy

Keywords: Area (Fixed), Obvious.

Full Cost: 43 or 108 points.

Casting Roll: Will.

Range: Self.

Duration: Three minutes and Instantaneous, see text.

You channel positive energy through your body that appears as a white flash.

When the basic (43-point) version of this spell is cast, every undead being within four yards immediately takes 2d crushing damage, regardless of DR, insubstantiality, etc. When the improved (108-point) version is cast, there is an additional effect - living creatures in this area instead are imbued with healing energies, regenerating 1 HP per minute for 3 minutes. Casting this spell again does not improve the healing rate, only resetting the duration. If a particular living subject possesses DR with no Tough Skin limitation, your casting roll is penalized by their DR. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Crushing Attack 2d (Accessibility, Undead Only, -50%; Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; No Knockback, -10%; Sorcery, -15%) [43]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll. *Note:* The improved version adds Link, +10% to Crushing Attack replaces Sorcery, -15% with Magical, -10%, and adds Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Advantage,

Channel Positive Energy, +450%; Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Emanation, -20%; Fixed Duration, +0%; Link, +10%; Sorcery, -15%) [64] [+65]. "Channel Positive Energy" is Regeneration (Fast; Magical, -10%) [45].

Channel the Mishtai

Keywords: Buff, Incarnum.

Full Cost: 57 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell's bonuses last for 3 minutes.

You bestow the soul of a long-departed mishtai on the subject. The soul lies dormant within the subject's body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first.

The soul is chosen randomly, roll 1d on the table below. If the subject is a skarn or rilkan, roll 2d instead.

While awoken, the soul's wisdom grants the subject the listed bonuses.

1d or 2d	Mishtai Spirit; effect of awakening
1	Inbred moron. The subject takes a -2 penalty to IQ. Make a Will roll or be mentally stunned for 1 second
2	Hearty serf. The subject gains a +2 bonus to HT, but loses ability to read and write.
3	Mishtai noblewoman. The subject gains Charisma 1, but takes a -1 penalty to HT.
4	Mishtai sage. The subject gains a +2 bonus to IQ, but takes a -2 penalty to ST.
5	Royal scout. The subject gains a +2 bonus to Per, but takes a -1 penalty to ST.
6	Bonded wizard. The subject gains a +1 bonus to Occultism and Thaumatology, but takes a -1 penalty to HT.
7-8	Knight-defender. The subject gains a +2 bonus to ST, but takes a -1 penalty to IQ.
9	Famed female rogue. The subject gains Silence 2, but takes a -2 penalty to ST.
10	Mishtai curator. The subject gains a +1 bonus to Leadership and Expert Skill (Incarnum), but takes a -1 penalty to HT.
11-12	Mishtai paladin. The subject gains Fearlessness 4, but takes a -1 penalty to Per.

The caster may pay a point of essentia during the casting to choose the spirit from the first 6 instead of rolling randomly. If the subject is a skarn or rilkan, then the caster may choose any spirit.

Statistics: Affliction 1 (HT; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Sorcery, -15%; Variable Enhancements, Mishtai Spirits (Up to 20 points; Limited Scope, Mishtai Spirits, -80%; Limited Selection unless the subject is a skarn or rilkan, -20%; Can choose if pays 1 essentia, +20%; Random, -30%), +400%) [57].

Chaos Hammer

Keywords: Missile, Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You launch a dark red spinning hammer of chaotic energies that does 1d crushing damage per level. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or have their Move in all mediums reduced to x0.4 for (20 – HT) minutes. This slowdown effect does not affect chaotic creatures, such as slaadi.

Statistics: Crushing Attack 1d (Sorcery, -15%; Side Effect, Slower Move, x0.4, Not against chaotic creatures, +75%) [8/level].

Charge Powerstone

Keywords: None.
Full Cost: 21 points.
Casting Roll: IQ. Special casting cost (see below).
Range: Touch.
Duration: Instantaneous.

The caster recharges a Powerstone (*GURPS Magic*, p. 69), transferring their own FP into it. Each FP spent to cast this spell (this spell may cost any amount of FP to cast, unlike normal spells) restores one point of energy to the stone. If used more than once per day on a given stone, apply a cumulative -3 penalty to the casting roll per successful energy restoration on that stone. This penalty accumulates until a full day has passed since the most recent restoration.

Every point restored is counted as an “advance” against future natural recharging. For example, if a 4-point Powerstone is recharged with this spell in a low-mana area, it will not begin to recharge for 4 weeks after it is used. If it is used, and then recharged again using this spell, it will be 8 weeks until the stone begins to recharge normally, and so on. The presence of multiple Powerstones does not inhibit the casting of this spell, but recharging requirements imposed by the quirks must be met. Attempts to ignore those requirements may cause the Powerstone to shatter.

On any ordinary failure with this spell, the Powerstone gains a new quirk. On a critical failure, the Powerstone cracks and is destroyed.

Statistics: Healing (Accessibility, Only on Powerstones, -10%; Heals Fatigue Only, -0%; Magical, -10%; Nuisance Effect, Quirk on a failure and destruction on a critical failure, -10%) [21]. *Note:* The Heals Fatigue Only, -0% allows restoring FP at the rate of 1:1.

Charm

Keywords: Resisted (Will).
Full Cost: 73 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: 3 minutes.

You can charm a sapient subject you can see or touch. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550).

If you win, your charmed subject will obey your every command for 3 minutes. In effect, he temporarily gains the Reprogrammable disadvantage (B150), with you as his master. You do not have to maintain concentration to control the subject.

If you attempt to force the subject to act against its principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the subject wins, it breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but it doesn't roll until it's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Fixed Duration, +0%; Independent, +70%; Sorcery, -15%) [73].

Cheese

Keywords: None.
Full Cost: 3 points/level.
Casting Roll: IQ or Professional Skill (Cheesemaker).
Range: Touch.
Duration: Permanent.

This spell allows you to turn milk into cheese. Critical failure on the casting roll means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Milk can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. The resulting cheese will weight one fourth of that value. This gives the approximate milk-to-cheese ratio of 1 gallon to 2 pounds.

Statistics: Create (Reduced Fatigue Cost 1, +20%; Transmute Milk to Cheese, +50%; Transmutation Only, -100%; Magical, -10%) [3/level].

Chill Metal

Keywords: Resisted (HT).

Full Cost: 28 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

When you cast this spell on a metal object, it becomes very cold to the touch. It deals 1 point of burning damage per second to everyone touching it. This damage comes from extreme cold, not heat, so it cannot set anything on fire. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). Useful when cast on foe's plate armor or metal weapon.

Statistics: Affliction 1 (HT; Accessibility, Only on metal objects, -30%; Advantage, Chill Metal, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Chill Metal" is Burning Attack 1 point (Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%; No Incendiary Effect, -10%; Side Effect, DX-2 and Numb, +90%) [5].

Chill Touch

Keywords: Obvious.

Full Cost: 61 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 10 seconds.

The caster must touch the subject to cast this spell. The subject begins to freeze from within, taking 1d-1 fatigue damage each second for 10 seconds, ignoring DR. Each second the subject may resist the damage by making a successful HT roll. If the roll is a critical success, then the spell stops. Treat FP lost to the attack identically to FP lost to cold for *all* purposes, notably recovery (see *Cold*, B430). Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute).

Only living beings are affected by this spell.

Statistics: Fatigue Attack 1d-1 (Accessibility, Only on living, -10%; Cosmic, Irresistible Attack, +300%; Cyclic, 9 cycles, 1 second intervals, Resistible, +450%; Freezing, +20%; Melee Attack, Reach C, Cannot Parry, -35%; Resistible, HT, -30%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [61].

Choke

Keywords: Resisted (HT).

Full Cost: 34 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

The subject loses his ability to breathe or speak for 30 seconds. He may do nothing but drop. While the choking endures, he suffers the effects of suffocation (see *Suffocation*, p. B436). After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover. The subjects with Doesn't Breathe or Injury Tolerance (Homogenous) are immune to this spell!

Statistics: Affliction 1 (HT; Choking, +100%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/6, -15%; Sorcery, -15%) [34].

Circle of Death

Keywords: Area (Leveled), Resisted (HT).

Full Cost: 63 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell makes the creatures in the area suffer a heart attack (p. B429). You can omit any creatures from the effect.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [63]. Additional levels add Area Effect (+50%) [+5].

Claws

Keywords: None or Buff.

Full Cost: 5 or 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 3 minutes.

The subject grows sharp claws. Change the damage they inflict with a punch or kick from crushing to cutting.

The basic (5-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (17-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Sharp Claws (Sorcery, -15%) [5]. The improved version is Affliction 1 (HT; Advantage, Claws, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Claws" is Sharp Claws (Magical, -10%) [5].

Clean

Keywords: Area (Special).

Full Cost: 5 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

Cleans the subject area up to the spell's level in radius (i.e., removes dirt and stains, and polishes surfaces which can hold a polish). Does not remove lingering odors (use Purify Air for that).

Statistics: Control Grime 1 (Accessibility, Only to clean, -20%; Cosmetic, -80%; Ranged, +40%; Sorcery, -15%) [5] + Control Grime 1 (Accessibility, Only to clean, -20%; Cosmetic, -80%; Only increases the area of effect, -50%; Ranged, +40%; Sorcery, -15%) [4/level]. *Note:* As this is one advantage (Control Grime) with the Sorcery limitation, not two, it costs only 1 FP to use.

Clean Breath

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject's respiratory system becomes able to filter out ordinary contaminants; e.g., dust, pollen, smoke, and even tear gas (but not nerve gas or other contact agents). The subject suffers no ill effects from such things.

Statistics: Affliction 1 (HT; Advantage, Clean Breath, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Clean Breath" is Filter Lungs (Magical, -10%) [5].

Cleanliness

Keywords: None or Buff.

Full Cost: 2 or 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 30 minutes.

The subject's body produces minimal, sanitized waste products. The lack of excessive perspiration and bad breath gives +1 to reaction rolls in close confines and -1 to attempts to track the subject by scent.

The basic (2-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. However, unlike most other maintainable spells, maintaining this one costs 1 FP per 30 minutes, not 1 FP per minute. The improved (17-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Sanitized Metabolism (Extended Duration, 30x, +60%; Sorcery, -15%) [2]. The improved version is Affliction 1 (HT; Advantage, Cleanliness, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Cleanliness" is Sanitized Metabolism (Magical, -10%) [1].

Cleanse Corruption

Keywords: Resisted (HT or Will).

Full Cost: 23 points for level 1 + 7 points/additional level.

Casting Roll: Will.

Range: Touch.

Duration: 3 minutes or permanent.

This spell temporarily cleanses the effects of corruption. Unwilling subjects resist with HT for physical corruption and Will for mental corruption. If the caster cleanses both types of corruption, then the subject makes both rolls.

This spell negates disadvantages that were gained via corruption that cost more character points than this spell's level. For example, one could use Cleanse Corruption 5 to remove up to 5 points of disadvantages gained via corruption. This lasts only for 3 minutes, but the subject or the caster may spend character points to make these changes permanent, removing a point of disadvantage for each character point spent.

Statistics: Affliction 1 (Will or HT; Accessibility, Only to cleanse corruption, -20%; Based on Will, Only for mental corruption, +10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%; Variable Enhancement, +70%) [23]. *Note:* Variable Enhancement provides +10% of enhancements (+100%) but is limited by "Accessibility, Only for Negated Disadvantage" (-30%) for a net +70%. Additional levels add more Variable Enhancement, +80% [+7].

Cleansing

Keywords: Resisted (HT).

Full Cost: 36 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell allows you to destroy foreign matter inside a living creature's body. To destroy the foreign matter, you must touch the subject, take a Concentrate maneuver, and pay 1 FP. Then make an IQ roll. Success means the foreign matter is gone. This spell only affects inanimate foreign objects, such

as cactus spines, arrowheads, bullets, and external (but not internal) bacteria and parasites. It has no effect against diseases, poisons, or drugs. Unwilling subjects resist with a Quick Contest of the caster's IQ against the subject's HT.

The destroyed foreign matter can weigh up to $10 \times (\text{level squared})$ lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create Foreign Matter (Accessibility, Only inside living creatures, -10%; Destruction Only, +0%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Requires IQ vs. HT roll, -10%) [36/level].

Cleansing Light

Keywords: Area (Fixed), Jet, Obvious, Resisted (HT).

Full Cost: 86 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous (the jet) and 5 seconds (blind).

Emit a beam of bright light from one finger. This beam can be used like a flashlight. It gives good illumination for 10 yards in the direction it is pointed, and some vision will be possible up to 30 yards away. It can be used as a signal for up to a mile if visibility is good.

You can strike any target up to 10 yards away (without range or speed penalties). It can be dodged, but not blocked or parried.

If the spell strikes the subject, roll 2d burning damage. This damage ignores DR. Should this harm kill the subject, the subject flares up in a brief blaze of light and then vanished forever, regardless of DR and other protective advantages. The subject's possessions are affected with him.

Everyone within 4 yards of the target who sees a target hit by Cleansing Light is blinded for 5 seconds, if he fails to resist with a HT roll. This includes a victim who survives such an attack.

Statistics: Affliction 1 (HT; Area Effect, 4 yards, +100%; Based on HT, +20%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Link, +10%; Reduced Duration, 1/30, -30%; Sorcery, -15%; Vision-Based, +150%) [39] + Burning Attack 2d (Cosmic, Irresistible Attack, +300%; Cosmic, Leaves no trace of subject and gear, +50%; Increased 1/2D, 2x, +5%; Jet, +0%; Link, +10%; Magical, -10%) [46] + Illumination (Beam; Link, +10%; Magical, -10%) [1].

Clenched Fist

Keywords: None.

Full Cost: 31 points.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

Creates a SM+0 hand made of shimmering pinkish force that appears between the caster and one of his opponents. This floating, disembodied hand moves automatically to remain between them, regardless of where the caster moves or how the opponent tries to get around it, providing cover for the caster against that opponent (and other opponents, if they are close enough). The opponent firing at the caster risks hitting the hand instead. See *Firing Through an Occupied Hex*, p. B389.

The hand has HP 20 and DR 20. The caster can Concentrate to move the hand at Move 4, but only towards him or the designated opponent, and the hand cannot move closer than 3 yards to the caster. The caster may Concentrate to make the Clenched Fist shove (p. B372) or punch the designated opponent.

The designated opponent must evade (p. B368) the hand, if he wants to approach the caster. The hand is considered a standing creature, and has DX of the caster and ST 12. The hand can even stop insubstantial opponents from approaching. Getting past the hand or destroying it dispels it.

The caster can Concentrate to redirect the hand to another opponent.

Statistics: Telekinesis 4 (Affects Insubstantial, +20%; Independent, +40%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing, shoving, punching, -50%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [13] + Telekinesis 8 (Affects Insubstantial,

+20%; Independent, +40%; Lift Only, -20%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing, shoving, punching, -50%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [18].

Climbing

Keywords: Buff.

Full Cost: 15 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You increase the subject's Move when climbing or using the Clinging (p. B43) advantage by 1 per level of this spell for 3 minutes.

Statistics: Affliction 1 (HT; Advantage, Climbing, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Climbing to the Advantage enhancement (+30%) [+3]. *Note:* Each level of "Climbing" is Super Climbing 1 (Magical, -10%) [3].

Cloak Undead

Keywords: Area (Leveled), Buff.

Full Cost: 87 points for level 1 + 5 points/additional level or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You make undead creatures in an area invisible. You may exclude any creatures from this effect. The subjects still make noise, leave footprints, and has a scent – and anything the subjects are carrying (up to the Medium encumbrance) becomes invisible too. The subjects get a +9 to Stealth in any situation where being seen would matter, if they are carrying no more than their Medium encumbrance.

Individuals using paranormal remote viewing (crystal balls, Clairvoyance, etc.) cannot see the subjects if the subjects would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see the subjects.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). The subjects do not cast shadows and do not show up in mirrors.

The basic (87-point) version of this spell affects subjects in a two-yard radius and ends if the subject attacks any creature. For each additional 5 points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If the subject attacks directly, however, it immediately becomes visible along with all its gear. The improved (95-point) version of this spell eliminates this limitation.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Version	2 yards	4 yards	8 yards	16 yards	x2
Basic	87 points	92 points	97 points	102 points	+5/level
Improved	95 points	100 points	105 points	110 points	+5/level

Statistics: Affliction 1 (HT; Accessibility, Undead only, -50%; Advantage, Cloak Undead, +680%; Area Effect, 2 yards, +50%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%; Variable Area, +5%) [87]. *Notes:* "Cloak Undead" is Invisibility (Affects Machines, +50%; Can Carry Objects, Medium, +50%; Disperses after an

attack, -20%; Magical, -10%) [68]. The improved version removes the Dispel after an attack limitation from the advantage [+8]. The additional levels add more levels of Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Clone

Keywords: Buff.

Full Cost: 46 points.

Casting Roll: None. Special casting time.

Range: Touch.

Duration: Truly Permanent.

This spell creates a clone of the subject and puts it into a state of suspended animation. When the subject dies, he reverts to this “backup copy.” The cloning takes 8 hours of uninterrupted work. Make a copy of the subject’s character sheet when this spell is cast. If he dies, he reverts to those statistics, losing any traits or character points acquired since then, and additionally losing 20 character points. Note that a copy exists before the subject dies. He must tell the GM where he stores it. He will return to life at that location, and if his enemies discover where he stores his clone, they may tamper with it! A character can have only one clone simultaneously, any further attempts at cloning fail. Note that since the Clone advantage has the Magical limitation, the subject *will not* revert to the clone if he dies in an area that negates magic or under similar circumstances.

Statistics: Affliction 1 (HT; Advantage, Clone, +180%; Extended Duration, Truly Permanent, +300%; Immediate Preparation Required, 8 hours, -90%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [46]. *Note:* “Clone” is Extra Life 1 (Copy, -20%; Magical, -10%) [18].

Cloud

Keywords: Resisted (Will).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

A miniature cloud coalesces a few inches above the subject and follows them around. This doesn’t do anything, but it’s a useful way to mark someone: +1 to Vision rolls to notice them and -1 to their Stealth. It’s also annoying.

Statistics: Affliction 1 (HT; Disadvantage, Obvious, +1%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [25].

Cloud of Doom

Keywords: Area (Leveled).

Full Cost: 19 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 5 seconds.

You may fill a two-yard-radius area with a greenish cloud of contact poison. This gives -1 to all vision rolls made through it. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. The gas doesn’t persist for long enough for displacement or dissipation by wind to become an issue.

Anyone in the area must roll vs. HT-4 every second to avoid 1d toxic injury; DR has no effect. After losing 1/2 of their HP this way, victims are nauseated (see p. B428) until the injury is healed above that threshold. Cloud of Doom cannot injure those with Immunity to Poison or Sealed. Resistant to Poison grants its bonus to the HT rolls. Doesn’t Breathe and Filter Lungs (and holding one’s breath) are ineffective – the gas needn’t be inhaled to be harmful!

The basic (19-point) version of this spell covers a two-yard radius. For each additional 3 points, you may double this radius; e.g., four yards for 22 points, 8 yards for 25 points, or 16 yards for 28 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 1 (Link, +10%; Magical, -10%; Ranged, +50%; Reduced Duration, ½, -5%; Variable, Area, +5%) [3] + Toxic Attack 1d (HT-4; Area Effect, 2 yards, +50%; Contact Agent, +150%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Reduced Duration, ½, -5%; Resistible, HT-4, -10%; Sorcery, -15%; Symptoms, ½ HP, Nauseated, +60%; Variable, Area, +5%) [16]. Further levels add Area Effect (+50%) to both advantages [+3].

Cloudkill

Keywords: Area (Leveled).

Full Cost: 67 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with deadly gases. This gives -3 to all vision rolls made through it. To place the gas cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every creature that inhales the gas, suffers a heart attack (B429), if it fails a HT roll.

The basic (67-point) version of this spell covers a two-yard radius. For each additional 8 points, you may double this radius; e.g., four yards for 75 points, 8 yards for 83 points, or 16 yards for 91 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 3 (Drifting, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [11] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Drifting, +20%; Heart Attack, +300%; Link, +10%; Persistent, +40%; Respiratory Agent, +50%; Sorcery, -15%; Variable, Area, +5%) [56]. Further levels add Area Effect (+50%) to both advantages [+8].

Clouds

Keywords: Area (Special).

Full Cost: 28 points for level 1 + 21 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can create or dispel normal outdoor cloud cover in the area around yourself. This spell's area of effect has a radius of 0.1 miles per level.

Statistics: Control Clouds 1 (Natural Phenomenon, +100%; Sorcery, -15%) [28/level]. Additional levels add Control Clouds +1 (Only increases area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [21/level]. *Note:* As this is one advantage (Control Clouds) with the Sorcery limitation, not two, it costs only 1 FP to use.

Cloud-Vaulting

Keywords: None.

Full Cost: 45 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

You can travel great distances with a few movements. You flip into the sky and bounces to your destination using clouds like trampolines. Cloud-Vaulting can only be cast in open air.

You can transport yourself to any place you are able to see with your own eyes, or view it remotely, or visualize it clearly (which is only possible if you have visited it previously in person). You can carry up to Medium Encumbrance when you travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the jump affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you have a “second-hand” view of the destination, you are at -2 per level of removal. For instance, seeing it on TV or through someone else’s eyes would give -2, while seeing it on a television set that you are viewing through someone else’s eyes would give -4. There is an additional -2 to teleport to a place you have visited but cannot see.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere and strain your cloud-vaulting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

If there are no clouds at all in the sky (a frequent occurrence over deserts), the subject cannot go farther than 100 miles. Storms will likewise block the subject’s path. An Acrobatics roll is required every 100 miles, at a penalty equal to the subject’s encumbrance level. On a failure, the subject falls

3dx3 yards (p. B431) and lands at a random location along the intended path – Slow Fall will save the subject from damage, but the Cloud-Vaulting spell is still broken

Statistics: Warp (Accessibility, Destination must be reachable via clouds, -10%; Accessibility, Only in open air, -10%; Extra Carrying Capacity, Medium, +20%; No Blinking, -10%; Nuisance Effect, Acrobatics Rolls, -15%; Requires Concentrate, -15%; Sorcery, -15%) [45].

Cloud-Walking

Keywords: Buff.

Full Cost: 22 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Clouds are like solid ground beneath subject's feet, allowing it to walk on them at its ground Move. If the subject gets knocked down or slips, it falls! The subject may attempt one DX roll per second of falling. If he succeeds, he stops in the clouds, unharmed, if there are still any clouds beneath him. Otherwise, he hits the ground for normal falling damage (see Falling, B431).

Statistics: Affliction 1 (HT; Advantage, Cloud-Walking, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Notes:* "Cloud-Waling" is Walk on Air (Magical, -10%; Specific, Cloud, -40%) [10].

Clumsiness

Keywords: Resisted (HT).

Full Cost: 31 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim suffers temporary DX loss equal to your margin of victory (maximum -10). Lower all skills based on DX by a like amount. Secondary characteristics are not affected.

Statistics: Affliction 1 (HT; Attribute Penalty, DX-10, +100%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [31].

Cognitive Block

Keywords: Resisted (Will).

Full Cost: 47 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

You create a mental block in the target's mind, impeding the flow of his thought process. The target gains the Absent-Mindedness (p. B122) disadvantage, loses the Single-Minded (p. B85) advantage if they had it, and can only cast spells by performing an All-Out Concentrate (or All-Out Attack in case of attack spells) maneuver.

Statistics: Affliction 1 (HT; Based on Will, +20%; Disadvantage, Absent-Mindedness, +15%; Disadvantage, Divine Curse (Can only cast by performing an All-Out maneuver), +50%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Single-Minded, +5%; No Signature, +20%; Sorcery, -15%) [47].

Cold (Unofficial Sorcery Errata)

Keywords: Resisted (HT).

Full Cost: 25 points for level 1 + 1 point/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

This spell lowers the ambient temperature in a 2-yard-radius area around an object, which usually causes the object to become colder as well. The temperature can be decreased by up to 20°F per level of the spell at a rate of 2°F per level of this spell. This will never do damage directly, but see *Cold* (p. B430) for effects. Upon casting the spell, the caster may decide to use a lower rate of temperature change and a lower maximum change.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Cold 1, +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/6, -15%; Sorcery, -15%; Variable, +5%) [25]. *Note:* Each level of “Cold” is Temperature Control 1 (Cold, -50%; Emanation, -20%; Magical, -10%) [1]. Additional levels add more Cold to the Advantage enchantment (+10%) [+1].

Cold Fire

Keywords: Area (Special).

Full Cost: 25 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can make a fire with a radius up to spell level in yards produce light without generating heat. It does half damage and consumes fuel at half the normal rate. Fuel is consumed at half the normal rate. For the duration of the spell, the flame can't set other objects on fire. Objects already set alight by the flame take half normal damage for the duration of the spell.

Since this spell makes ignition due to heat transfer impossible, explosives or weapons that are triggered by heat won't work. For example, explosives triggered by fuses or slow matches won't go off, and black powder weapons won't fire. Explosives and weapons triggered by chemical reactions (e.g., contact fuses, or modern bullet primers) will still fire, but heat damage from explosions is negated in the area of effect. For conventional explosives, the net effect is that the blast won't start secondary fires. Modern bullets are unaffected by this spell, though certain specialty rounds such as tracers or incendiaries won't function properly.

Statistics: Control Fire 1 (Only to remove heat, -80%; Ranged, +40%; Sorcery, -15%) [9] + Control Fire +4 (Does not increase area, -50%; Only to remove heat, -80%; Ranged, +40%; Sorcery, -15%) [16]. Each additional level adds Control Fire +1 (Only decreases area, -50%; Only to remove heat, -80%; Ranged, +40%; Sorcery, -15%) [4].

Cold Stare

Keywords: Jet, Obvious.

Full Cost: 8.5 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of intense cold erupts from your eyes. Use Innate Attack (Gaze) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning damage with dice equal to your level of this spell, but as the damage comes from intense cold, it cannot set anything on fire. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack 1d (Increased 1/2D, 2x, +5%; Jet, +0%; No Incendiary Effect, -10%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [8.5/level].

Cold Vulnerability

Keywords: Resisted (HT).

Full Cost: 29/30/32 points for levels 1-3.

Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

This spell makes the subject more vulnerable to cold attacks. The subject multiplies any damage from cold that penetrates its DR by 2 before applying any normal wounding multipliers. Level 2 of this spell increases the multiplier to 3, and level 3 increases the multiplier by 4.

Statistics: Affliction 1 (HT; Disadvantage, Vulnerability (Cold, x2), +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. Additional levels improve Disadvantage, Vulnerability (Cold, x2), +30% to Disadvantage, Vulnerability (Cold, x3), +45% and Disadvantage, Vulnerability (Cold, x4), +60%.

Collision

Keywords: Area (Fixed).
Full Cost: 46 points for level 1 + 27 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous.

You may create an instant pulling force in an 8-yard-radius area that throws everything towards the center. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Everything in the area takes 4d knockback damage per level of this spell directed towards the center of the area. There's no time to grab anything, but people already hanging onto any person or object the spell cannot affect may add +2 ST per hand used, while anyone grappled by a foe too heavy to budge rolls only if their rival chooses to let them go. Losing the Contest means being yanked into the center; victims and their possessions are pulled (or not) as a unit.

If there are no movable objects nearby and just one victim, the only effect is being hauled into the center. If there are two or more people and/or solid objects, though, they crash together at the center. Don't work out detailed collision damage from speed and HP – damage is a flat 2d+2 crushing for everyone involved (and important objects). This is large-area injury (p. B400).

After the collision, victims are clustered around the center. On a battle map, the GM may position them in the center hex or adjacent hexes. Combatants retain their original facings, but those whose injuries haven't caused them to fall down must roll against the highest of DX, Acrobatics, or Judo to avoid falling down.

Statistics: Crushing Attack 2d (Area Effect, 8 yards, +150%; Cosmic, Knockback to the center, +50%; Double Knockback, +20%; Link, +10%; No Wounding, -50%; Sorcery, -15%; Variable, Area, +5%) [27/level] + Crushing Attack 2d+2 (Accessibility, Only on those who collide, -10%; Area Effect, 2 yards, +50%; Link, +10%; Magical, -10%) [19].

Color Spray

Keywords: Obvious.
Full Cost: 31 point.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 10 yards.
Duration: Instantaneous or 5 seconds.

You create a spray of flashing colors. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 6 yards at the spell's maximum range. This spell has no 1/2D range. Each sighted creature in the area resists with its HT, and is stunned on a failed resistance roll. Should a creature fail by 5 or more or roll a critical failure, it is additionally blinded for 5 seconds. Creatures with Protected Vision resist at +5.

Statistics: Affliction 1 (HT; Cone 6, +110%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; Reduced Duration on Blindness, 1/30, -30%; Reduced Range, 1/10, -30%; Secondary Blindness, +10%; Sorcery, -15%; Vision-Based, +150%) [31].

Colors

Keywords: Area (Special).

Full Cost: 27 points for level 1 + 17 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Five minutes.

You can change the color of light in an area with a radius equal to the spell's level.

Statistics: Control Light 1 (Cannot concentrate to extend duration, -10%; Cosmetic, -80%; Extended Duration, 30x, +60%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [27]. Additional levels add Control Light +1 (Cannot concentrate to extend duration, -10%; Cosmetic, -80%; Extended Duration, 30x, +60%; Only increases area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [17/level]. *Note:* As this is one advantage (Control Light) with the Sorcery limitation, not two, it costs only 1 FP to use.

Coma

Keywords: Resisted (Will).

Full Cost: 52 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell induces a coma in a sapient creature. The victim collapses, profoundly unconscious, and will likely die in days unless treated; see Mortal Conditions (p. B429).

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Coma, +250%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [52].

Command

Keywords: Resisted (Will).

Full Cost: 43 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 1 second.

Give a sapient subject one immediate command – a word and a gesture, or at most two words – which the subject must obey. If the subject is unable to fulfill the command immediately or on his next turn, the spell has no effect. You must be able to see or touch the subject to cast this spell. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550).

Examples:

"Drop it!" – the subject drops whatever he was holding.

"Look!" – the subject looks in the direction the caster indicates.

"Wait!" – the subject takes the Wait maneuver on his next turn.

If you win, your charmed subject will obey your command. If you attempt to force the subject to act against its principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the subject wins, the spell has no effect.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, At most two words, -20%; Fixed Duration, +0%; Independent, +70%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [43].

Command Spirit (Type)

Keywords: Resisted (Will).

Full Cost: 13 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can mentally dominate spirits you can see or touch. Each class of spirits (banshees, spectres, manitous, etc.) requires its own spell. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will. Use the following modifiers: Range penalties to the subject (see B550); -1 per slave already under your control; +2 if you concentrate for a full minute, or +4 if you concentrate for a full hour.

If you win, your victim will obey your every command until you free him. In effect, he temporarily gains the Reprogrammable disadvantage (B150), with you as his master. Your control persists for as long as you take uninterrupted Concentrate maneuvers.

Once you stop, your control lingers for one minute per point by which you won the Quick Contest. If you are incapacitated (stunned, knocked out, etc.), or attempt to force the subject to act against his principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If your victim wins, he breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but he doesn't roll until he's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you. On a critical failure, you also lose control of anyone else under the influence of this ability!

Statistics: Mind Control (Accessibility, Class of Spirits, -60%; Sorcery, -15%) [13].

Communication

Keywords: None.

Full Cost: 35 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

The caster can set up a two-way conversation with another person. Range is theoretically unlimited, but the IQ roll to cast this spell takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see or otherwise sense his subject, he has an additional penalty: -1 for family, lovers, or close friends; -3 for casual friends and acquaintances; or -5 for someone met only briefly.

If successful, each participant sees an image of the other, allowing "real-time" conversation. If he does not wish to speak with the caster, it's a free action for him to mute the caster's voice to a whisper and reduce the caster's image to a faint light. The caster may maintain a connection with that subject for as long as he'd like. No further rolls are normally required unless the range penalty worsens.

Others can join the "conference" at any time – a new casting of the spell (by anyone involved) is required for each new person to enter.

Statistics: Mind Reading (Accessibility, Said words only, -20%; Link, +10%; Magical, -10%; Telecommunication, -20%) [18] + Telesend (Accessibility, Requires Words, -10%; Hearing-Based, -20%; Link, +10%; Sorcery, -15%; Visible, -10%) [17].

Compel Lie

Keywords: Resisted (Will).

Full Cost: 30 points.

Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

The sapient subject becomes unable to tell a truth, though he may keep silent or tell partial truths (this must be roleplayed). The spell does not force him to volunteer incorrect information; he merely cannot say anything he believes to be true.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Compel Lie, +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* "Compel Lie" is Compulsive Lying (No Self-Control Roll, x2.5; Can keep silent, -20%) [-30].

Compel Truth

Keywords: Resisted (Will).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

The sapient subject becomes unable to lie, though he may keep silent or tell partial truths (this must be roleplayed). The spell does not force him to volunteer information; he merely cannot say anything he believes to be untrue.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Compel Truth, +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Compel Truth" is Truthfulness (No Self-Control Roll, x2.5; Can keep silent, -20%) [-10].

Compel Written Truth

Keywords: Resisted (Will).
Full Cost: 31 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 30 minutes.

The sapient subject becomes unable to *write* a lie, though he may refuse to write or write partial truths (this must be roleplayed). The spell does not force him to volunteer information; he merely cannot write anything he believes to be untrue.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Compel Written Truth, +5%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [31]. *Note:* "Compel Written Truth" is Truthfulness (No Self-Control Roll, x2.5; Can refuse to write, -20%; Written Only, -40%) [-5].

Compulsive Reader

Keywords: Buff.
Full Cost: 56 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Permanent.

This spell enchants a book so that a person who reads even a word inside it will feel a strong compulsion to continue studying it until he has read the entire thing. It has no effect on someone who cannot comprehend the language the book is written in. The victim gets a Will resistance roll. If he fails, he is compelled to do nothing but read until finished. He may make one additional resistance roll if

his life is in immediate danger. He will resist removing the book using his own ST, but if the book is destroyed or snatched away from him, the effect is broken.

Statistics: Affliction 1 (HT; Accessibility, Only on books, -50%; Advantage, Compulsive Reader, +340%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [56]. *Note:* “Compulsive Reader” is Affliction 1 (Will; Aura, +80%; Based on Will, +20%; Disadvantage, Compulsive Reading (No self-control, x2.5), +13%; Extended Duration, Permanent, +150%; Melee Attack, Reach C, -30%; No Signature, +20%; Vision-Based, Variant, -20%) [34].

Conceal

Keywords: Area (Leveled).

Full Cost: 9 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

The sorcerer causes the local vegetation to grow quickly over any objects in the area, concealing them from casual inspection. This gives -5 to all vision rolls made to notice the hidden objects.

The basic (9-point) version of this spell covers a two-yard radius. For each additional 5 points, you may double this radius; e.g., four yards for 14 points, 8 yards for 19 points, or 16 yards for 24 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 5 (Accessibility, Only on objects, -10%; Environmental, Dense Vegetation, -40%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [9]. Additional levels add Area Effect (+50%) to the advantage [+5].

Conceal Magic

Keywords: Buff.

Full Cost: 63 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five hours.

The subject becomes nearly impossible to detect, sense, or divine with any Information spells, regardless of the magic system used to cast them. Conceal Magic reduces the diviner’s effective margin of success by 10 for these purposes – so a spell that succeeded by 0-9 completely fails to find the subject, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it’s resisted.

Unlike Scryguard, this spell’s presence is completely undetectable by Detect Magic (*GURPS Thaumatology: Sorcery*, p. 19) and similar abilities.

Statistics: Affliction 1 (HT; Advantage, Conceal Magic, +430%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [63]. *Note:* “Conceal Magic” is Obscure 10 (Information Spells; Defensive, +50%; Low Psychic Signature 5, +25%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [43].

Conceal Temporal Anomaly

Keywords: Area (Leveled).

Full Cost: 54 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 5 minutes.

You can split the flow of time around a temporal disturbance. This reduces the turbulence it causes and shields it from magical detection. You can affect a two-yard-radius area. No one can detect the temporal anomalies in the area with such spells as Detect Temporal Anomaly or similar advantages.

To place the area at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Statistics: Obscure Detect 10 (Defensive, +50%; Extended Duration, 30x, +60%; Limited, Temporal Anomalies, -80%; Ranged, +50%; Sorcery, -15%; Stealthy, +100%; Variable, Area, +5%) [54]. Further levels add Area Effect (+50%) to the advantage [+10].

Condense Steam

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell allows you to turn steam into water. To do so, touch the matter you wish to transform or stand amidst it, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The spell affects an area with a radius up to the spell level in yards. One cubic yard of steam is condensed into 1 lb. of water.

Statistics: Create (Transmute Steam to Water, +50%; Transmutation Only, -100%; Magical, -10%) [2/level].

Conduct Power

Keywords: Area (Special).

Full Cost: 23 points for level 1 + 13 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 30 seconds.

Powers a device in the area of effect by transferring power from an active power source that also must be in the area of effect.

This spell affects an area with a radius equal to (9 + spell level) yards.

Statistics: Control Power 10 (Accessibility, Only to conduct power, -60%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [23]. Additional levels add Control Power (Accessibility, Only to stop the flow of power, -60%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [13/level].

Conducting Non-Conductor

Keywords: Resisted (HT).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: One minute.

The target, who may be an object or a creature, becomes able to conduct electricity.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Immunity to Electrical Conduction, +5%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [25].

Conduction

Keywords: Resisted (HT).

Full Cost: 34 points.

Casting Roll: Will.
Range: Unlimited.
Duration: 90 minutes.

This spell improves the transfer of heat through an object improving its heat conduction properties. Use of this spell can make clothing conduct heat more efficiently in hot weather, or speed the transfer of heat through a metal object. Transfer of heat through the material is greatly improved. "Normal" heat transfer (like loss of body heat through clothing) is increased by 50% over normal.

Clothing affected by this spell is treated as if it were one level cooler. I.e., arctic clothing is treated as winter clothing, winter clothing is treated as heavy clothing, and heavy clothing is treated as light clothing.

Damage from fire or heat through a conductive material is increased. For each level of this spell, armor and clothing only provides half its normal DR against heat and flame damage. Flammable materials won't necessarily be destroyed by this heat transfer, but they will conduct heat through their material before they are completely consumed.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Disadvantage, Vulnerability (Heat/Fire, x2; Variant), +30%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [34].

Cone of Cold

Keywords: Obvious.
Full Cost: 12.5 points/level.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 10 yards.
Duration: Instantaneous.

You fire a cone of intense cold that does 1d burning damage per level. This damage comes from extreme cold, so it cannot set anything on fire. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 6 yards at the spell's maximum range. This spell has the 1/2D range of 2 yards.

Statistics: Burning Attack 1d (Cone 6, +110%; Increased 1/2D, 2x, +5%; No Incendiary Effect, -10%; Reduced Range, 1/10, -30%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [12.5/level].

Cone of Corrosion

Keywords: Obvious.
Full Cost: 16 points/level.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 10 yards.
Duration: Instantaneous.

You fire a cone of acid that does 1d corrosion damage per level. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell's maximum range. This spell has the 1/2D range of 2 yards.

Statistics: Corrosion Attack 1d (Cone 5, +100%; Increased 1/2D, x2, +5%; Reduced Range, 1/10, -30%; Sorcery, -15%) [16/level].

Confuse Memory

Keywords: Resisted (Will).
Full Cost: 41 points.
Casting Roll: Will.
Range: Unlimited.

Duration: Permanent.

This spell causes the subject's awareness of a single fact or event to become confused. Every time the subject thinks or talks about the event, he will need to make a successful roll against Will to be sure that what he remembers isn't a dream, and to keep the details consistent.

Statistics: Affliction 1 (Will; Accessibility, One fact at a time, -10%; Based on Will, +20%; Disadvantage, Total Amnesia, +25%; Extended Duration, Permanent, +150%; Limited, Inconsistency, -50%; Malediction 2, +150%; No Signature, +20%; Selective Effect, +20%; Sorcery, -15%) [41].

Confusion

Keywords: Area (Fixed).

Full Cost: 42 points for level 1 + 14points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You confuse sapient (IQ 6+) minds. You can target any area within 100 yards and affect everyone within a 10-yard radius – this is not selective and (unlike most Area spells) you cannot reduce the area! Those in the area must roll a Fright Check, applying any Magic Resistance as a bonus. Your victims get +1 per Fright Check after the first within 24 hours, and anyone who succeeds is immune to this spell for an hour. Use the Confusion variant table from *GURPS Powers*, page 85.

Each additional level of this spell imposes -1 to the Fright Check. For example, with Terror 4, the subjects must make Fright Checks at -3.

This spell is not Resisted; the chance to succeed at the Fright Check takes the place of a normal resistance roll.

Statistics: Terror (Confusion; Accessibility, Only on sapient beings, -10%; Presence, +25%; Ranged, +40%; Sorcery, -15%) [42]. Additional levels add -1 to the Fright Check [+14].

Conic Blast

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the affected ranged weapon convert ranged attacks into a cone that originates from the weapon, similar to a blast of grapeshot; see *Area and Spreading Attacks* (p. B413). The 1st level of this spell gives a cone that's RoF yards wide at the attack's Max range. High RoF weapons get broader cones – not multiple cones. Each additional spell level increases the maximum width by 1 yard.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Conic Blast, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Conic Blast" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Conic Blast imbuelement skill.

Conjure Dart

Keywords: Missile, Obvious.

Full Cost: 4.8 points/level*.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw an iron dart at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d-1 impaling damage per level of this spell. The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Statistics: Impaling Attack 1d-1 (Blockable, -5%; Sorcery, -15%) [4.8/level*].

* Calculate the total cost and then round up.

Conjure Midnight Construct

Keywords: Incarnum.

Full Cost: 27 points.

Casting Roll: Will. Special casting time, see below.

Range: Special, see below.

Duration: Margin of success hours.

Each time you cast this, you conjure a midnight construct (worth 75% or less of your point value). The GM will create this being, but you can request one that meets broad criteria. The conjuration itself requires 10 minutes of preparation and ritual. At the end of the casting, you must pay 1 FP *and* 1 point of essentia. If you are victorious, the construct is conjured. It then makes a reaction roll. On Poor or worse, treat it as an Unwilling Ally – it will obey you, but try to subvert your commands or otherwise act against your interests. If the reaction is Neutral or better, it will serve you reasonably faithfully.

Unlike most sorcery with a duration, this spell must be maintained; thus, unless you can cast simultaneous spells, using another spell will immediately dismiss the conjured being. However, there is no FP cost to maintain this spell, only to cast it. A conjured being is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, you must wait 24 hours before using this spell again; if dismissed, you must wait five minutes.

Midnight Construct [*Magic of Incarnum*, page 184]

10 points

Attribute Modifiers: ST+3 [30]; IQ-10 [-200]; HT+2 [20].

Secondary Characteristic Modifiers: HP+4 [8]; Will+10 [50]; Per+10 [50]; Basic Move +1 [5].

Advantages: DR 3 [15]; DR 2 (Not vs. Magic, -15%) [9]; Doesn't Breathe [20]; Doesn't Eat or Drink [10]; Doesn't Sleep [20]; High Pain Threshold [10]; Infravision [10]; Immunity to Metabolic Hazards [30]; Immunity to Mind Control [30]; Injury Tolerance (Homogenous, No Blood, No Eyes) [50]; Night Vision 5 [5]; Unaging [15]; Unfazeable [15]; Vacuum Support [5].

Disadvantages: Automaton [-85]; No Sense of Smell/Taste [-5]; Unhealing (Total) [-30]; Unnatural [-50].

Features: Taboo Trait (Fixed IQ) [0]; Has no FP [0].

Creature Type: Construct.

Typical Stats

ST:	13	HP:	17	Speed:	5.5
DX:	10	Will:	10	Move:	6
IQ:	0	Per:	10		
HT:	12	FP:	N/A	SM:	+0
Dodge:	8	Parry:	N/A	DR:	5 (3 vs magic)

Punch (12): 1d crushing (KYOS: 1d+1 crushing). Reach C.

Traits: Automaton; Doesn't Breathe; Doesn't Eat or Drink; Doesn't Sleep; High Pain Threshold; Immunity to Metabolic Hazards; Immunity to Mind Control; Infravision; Injury Tolerance (Homogenous, No Blood, No Eyes); Night Vision 5; No Sense of Smell/Taste; Taboo Trait (Fixed IQ); Unaging; Unfazeable; Unhealing (Total); Unnatural; Vacuum Support.

Skills: Brawling-12; Stealth-12.

Creature Type: Construct.

Statistics: Ally (Midnight construct; Built on 75%; Constantly; Adjustable, +50%; Conjured, +100%; Costs 1 ER, -10%; Immediate Preparation Required, 10 minutes, -45%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Requires Will Roll, -5%; Special Abilities, +50%) [27]. As

a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by requiring a reaction roll.

Conjure Shield

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell conjures a round steel shield on the subject's free arm. The caster specifies at conjuration whether the shield is small, medium, or large. The small shield is exactly like a small heavy shield: DB 1, 6 lbs., DR 4, HP 15, Cover DR 7. The medium shield is exactly like a medium heavy shield: DB 2, 14 lbs., DR 4, HP 20, Cover DR 9. The large shield is exactly like a large heavy shield: DB 3, 20 lbs., DR 4, HP 22, Cover DR 9. It is in its ready state upon conjuring, but it can be unreadied and handed to others. It can be damaged, attacks, and grabbed as a normal shield. See *Damage to Shields* (p. B484) and *Striking at Shields* (*GURPS Martial Arts*, p. 112) for details.

Statistics: Affliction 1 (HT; Advantage, Conjure Shield, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%; Variable, +5%) [31]. *Note:* "Conjure Shield" is Defense Bonus 3 (Cannot Wear Armor, -40%; Directional, Front, -20%; Gadget, DR 4, SM-1, Must be forcibly removed, -55%; Magical, -10%; Nuisance Effect, Weight, -5%) [18], a meta-trait from *GURPS Supers*.

Continual Flame

Keywords: Buff.

Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

A flame, equivalent in brightness to a torch, springs forth from the target object. The effect looks like a regular flame, but it creates no heat and doesn't use oxygen. A continual flame can be covered and hidden but not smothered or quenched.

Statistics: Affliction 1 (HT; Advantage, Continual Flame, +10%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Continual Flame" is Illumination (Magical, -10%) [1].

Continual Light

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 2d days.

When cast on a small object (up to fist-sized or 1 pound) or a small part of a larger object, makes that object glow with white light equivalent to a torch. The light lasts for 2d days (the GM rolls in secret).

Statistics: Affliction 1 (HT; Advantage, Continual Light, +10%; Extended Duration, 30,000x, +180%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [31]. *Note:* "Continual Light" is Illumination (Magical, -10%) [1].

Continual Mage Light

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.
Duration: 2d days.

When cast on a small object (up to fist-sized or 1 pound) or a small part of a larger object, makes that object glow with white light equivalent to a torch. However, the illumination that it provides is only perceptible to mages, magical creatures, and those under the influence of Mage Sight. The light lasts for 2d days (the GM rolls in secret).

Statistics: Affliction 1 (HT; Advantage, Continual Mage Light, +10%; Extended Duration, 30,000x, +180%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [31]. *Note:* “Continual Mage Light” is Illumination (Accessibility, Only visible to mages and magical creatures, -30%; Magical, -10%) [1].

Continual Sunlight

Keywords: None.
Full Cost: 38 points.
Casting Roll: IQ.
Range: 100 yards.
Duration: 2d days.

You can summon a pillar of light equivalent to full daylight; you may make this light manifest anywhere within 100 yards. The area extends skyward, stopping only when it hits some sort of ceiling. The light is bright enough to eliminate all darkness penalties in a 10-yard radius.

Statistics: Create Visible Light 1 (Accessibility, Limited to lighting a 10-yard, -40%; Cosmic, Extends skyward, +50%; Extended Duration on Persistent, 30,000x, +180%; Magical, -10%; Persistent, +40%; Ranged, +40%; Reduced Fatigue Cost 1, +20%) [38].

Contract Object

Keywords: Resisted (HT).
Full Cost: 29 points for level 1 + 4 points/level.
Casting Roll: Will
Range: Unlimited.
Duration: 3 minutes.

If the subject object fails to resist, it shrinks in one dimension. Each level of Shrink lets the caster change his subject’s Size Modifier in one dimension by -2. The subject changes to its minimum size in one second.

When the subject shrinks, find its new height from the *Size Modifier Table* (p. B19). Every -6 to SM reduces height by a factor of 10. Reduce Move, reach, damage (with unarmed attacks, Innate Attacks, or shrunken weapons), HP, and DR in proportion to height. Every full -2 to SM also reduces weight by a factor of 10; for odd-numbered levels, treat the extra -1 as an additional factor of 3 (e.g., -3 to SM reduces weight by a factor of 30).

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Contract Object 1, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. *Notes:* Each level of “Contract Object” is Shrinking 2 (Magical, -10%; Minimum Size Only, +0%; One dimension only, -50%) [4]. Each additional level adds further Contract Object to the Advantage enhancement [+4].

Contragrav Flight

Keywords: Buff.
Full Cost: 46 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject can fly by pushing off against the local gravity field. It is useless in the absence of a planet or another celestial body with a gravity field.

The subject's flight Move is Basic Speed x 2 (drop all fractions). Contragrav Flight includes the ability to hover at Move 0 as well.

Statistics: Affliction 1 (HT; Advantage, Contragrav Flight, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [46]. *Note:* "Contragrav Flight" is Flight (Magical, -10%; Planetary, -5%) [34].

Control Creation

Keywords: Resisted (master's Will).

Full Cost: 10 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can mentally dominate magical creations you can see or touch. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's master's Will. Use the following modifiers: Range penalties to the subject (see B550); -1 per slave already under your control; +2 if you concentrate for a full minute, or +4 if you concentrate for a full hour.

If you win, your victim will obey your every command until you free him. In effect, he temporarily gains the Reprogrammable disadvantage (B150), with you as his master. Your control persists for as long as you take uninterrupted Concentrate maneuvers.

Once you stop, your control lingers for one minute per point by which you won the Quick Contest. If you are incapacitated (stunned, knocked out, etc.), or attempt to force the subject to act against his principles (e.g., commit suicide or harm his former master), roll another Quick Contest. If your victim wins, he breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but he doesn't roll until he's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you. On a critical failure, you also lose control of anyone else under the influence of this ability!

Your victims have no initiative while under your control, and temporarily acquire Slave Mentality (B154).

Statistics: Mind Control (Accessibility, Only on magical creations, -50%; Based on master's Will, +20%; Puppet, -40%; Sorcery, -15%) [10].

Control Elemental

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: One minute.

This spell allows the caster to mentally control a particular type of elementals, chosen when they learn this spell, that the caster can see or touch. If the elemental fails to resist, it will obey every command of the caster until freed. It has no initiative under this control, effectively gaining the Reprogrammable (p. B150) and Slave Mentality (p. B154) disadvantages with the caster as the master. If the caster attempts to force the elemental to act against its principles, roll another Quick Contest. Roll immediately before the principles would be violated, not when the caster gives the command. If the elemental wins, it breaks free.

If the caster fails to control the elemental, they cannot attempt to control that subject again for 24 hours, and the elemental feels a sense of mental coercion emanating from the caster.

Statistics: Mind Control (Accessibility, Elementals of a Particular Type Only, -60%; Fixed Duration, +0%; Independent, +70%; Puppet, -40%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [23].

Control Gate

Keywords: None.

Full Cost: 12.5 points for level 1 + 7.5 points/additional level*.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can force an open gate to close, a closed gate to open, or tilt and move the subject, with a Move equal to your spell level. Closing a permanent gate does not destroy it; closing a temporary one does (to destroy a permanent gate, use Remove Enchantment). Control Gate can also be used to "choose" a particular destination of a multiple-destination gate. Once control is relinquished, the Gate reverts to its "programmed" state, moving back to its original place at top speed and by the shortest path.

The subject gate must have an initial radius (in yards) no greater than your level of this spell. You must actively concentrate while shaping or moving the gate, but may otherwise maintain this spell normally (no concentration required).

Statistics: Control Gate 1 (Ranged, +40%; Sorcery, -15%) [12.5]. Additional levels add Control Gate +1 (Only to increase area, -50%; Ranged, +40%; Sorcery, -15%) [7.5/level*].

* Calculate the total cost and round up.

Control Illusion

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You attempt to take control of an illusion that someone else has cast. Roll a Quick Contest of IQ vs. the original caster's Will. If you win, you gain control of the illusion, but you must concentrate on it to change its behavior and other parameters that depend on the spell in question. The original caster may recast the spell normally.

Once you stop, your control lingers for one minute per point by which you won the Quick Contest.

Statistics: Mind Control (Accessibility, Illusions Only, -80%; Cosmic, Can affect illusions, +50%; Puppet, -40%; Sorcery, -15%) [10].

Control Lava Lizard

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

You can mentally dominate a lava lizard (*GURPS Dungeon Fantasy Monsters 3: Born of Myth & Magic*, page 12) that you can see or touch. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will. Use the following modifiers: Range penalties to the subject (see p. B550); -1 per slave already under your control; +2 if you concentrate for a full minute, or +4 if you concentrate for a full hour.

If you win, your victim will obey your every command until you free him. In effect, he temporarily gains the Reprogrammable disadvantage (p. B150), with you as his master. Your control persists for as long as you take uninterrupted Concentrate maneuvers.

Once you stop, your control lingers for one minute per point by which you won the Quick Contest. If you are incapacitated (stunned, knocked out, etc.), or attempt to force the subject to act against his principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If your

victim wins, he breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but he doesn't roll until he's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you. On a critical failure, you also lose control of anyone else under the influence of this ability!

Your victims have no initiative while under your control, and temporarily acquire Slave Mentality (p. B154).

Statistics: Mind Control (Accessibility, Lava Lizards Only, -80%; Puppet, -40%; Sorcery, -15%) [10].

Control Limb

Keywords: Resisted (ST).

Full Cost: 19 points/level.

Casting Roll: ST.

Range: 10 yards.

Duration: Indefinite.

The caster can take control of a subject's limb. This requires a Quick Contest. For this initial "takeover attempt" only, the caster rolls against his Control Limb spell level multiplied by 4. He adds a +2 bonus if he is trying to control an arm or leg, or a +4 bonus to control just a hand or foot, and applies normal range penalties (p. B550) to the target. The subject (who must be within 10 yards) resists with his ST.

If successful, the caster has control over that limb for as long as he concentrates. This should be interpreted liberally. In all cases, treat the limb as having DX equal to the caster's and its normal ST.

He can use an arm to attack – including making the subject hit himself! He can drop weapons, pull triggers, push buttons, and so on, as long as the subject is already holding onto the appropriate item or he's within arm's reach of it. Control of just the hand limits the caster to dropping items or manipulating those already held – though if the subject goes to punch someone, the caster can splay his fingers so he hits for half damage while taking full punching damage to his own hand. Control of a leg allows the caster to kick any subject within range – the caster can make the subject kick himself, but at -1 damage due to the awkwardness. More effectively, the caster can make the subject fall down, automatically, by removing support. If the caster controls just the foot, he can halve the subject's Move, or twist it suddenly so the subject must make a DX-3 roll to avoid falling while walking.

Statistics: Telekinesis 4 (Accessibility, Limbs Only, -10%; Animate Life-forms, Partial, +20%; Sorcery, -15%) [19]. Each additional level adds 4 extra levels of Telekinesis [+19].

Control Person

Keywords: Resisted (Will).

Full Cost: 40 points.

Casting Roll: IQ.

Range: Touch.

Duration: 1 minute.

The caster can use all the victim's senses and control all the victim's physical actions (the caster has no access to the subject's memories, skills, spells, etc.). The subject retains his memory and wits and is aware of what is happening – though not of the caster's identity. The subject must be a sapient creature.

To control a creature, the caster must concentrate for one second and physically touch him. The victim resists at +5 if he is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to control that subject again – he is "immune" to him. If the caster wins, he takes over his victim's body.

The caster remotely controls his victim as if he were a puppet, leaving the caster's original body in a trance. He may choose to return to his body at any time, and must do so if his host falls unconscious or dies (but not if he sleeps). As a result, he does not die if his host dies.

The caster gains his new host's ST, DX, and HT (and secondary characteristics calculated from these scores), as well as his physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster's social traits may apply, depending on the laws and values of his society. The caster's IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

Statistics: Possession (Accessibility, Only on sapient creature, -10%; Maximum Duration, 1 minute, -65%; No Memory Access, -10%; Sorcery, -15%; Subject remains aware, -10%; Telecontrol, +50%) [40].

Control Plants

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can mentally dominate a sentient plant creature, even if it is normally immune to mind control. You must be able to see or touch the victim. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will. Use the following modifiers: Range penalties to the subject (see p. B550); -1 per slave already under your control; +2 if you concentrate for a full minute, or +4 if you concentrate for a full hour.

If you win, your victim will obey your every command until you free him. In effect, he temporarily gains the Reprogrammable disadvantage (p. B150), with you as his master. Your control persists for as long as you take uninterrupted Concentrate maneuvers.

Once you stop, your control lingers for one minute per point by which you won the Quick Contest. If you are incapacitated (stunned, knocked out, etc.), or attempt to force the subject to act against his principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If your victim wins, he breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but he doesn't roll until he's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you. On a critical failure, you also lose control of anyone else under the influence of this ability!

Your victims have no initiative while under your control, and temporarily acquire Slave Mentality (p. B154).

Statistics: Mind Control (Accessibility, Plants Only, -50%; Cosmic, Affects plants, +50%; Puppet, -40%; Sorcery, -15%) [23].

Control Weather

Keywords: Area (Special).

Full Cost: 91 points for level 1 + 81 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can change the weather within the 0.1-mile-radius area around you – change the direction and strength of wind, cause clouds to gather, make precipitation fall, calm or cause storms. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by weather, relative to the prevailing conditions. This can help with rolls for Boating, Farming, Seamanship, Survival and anything the GM allows.

Statistics: Control Weather 1 (Natural Phenomenon, +100%; Sorcery, -15%) [37] + Control Weather +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [54]. Additional levels add Control Weather +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [81/level]. *Note:* As this is one advantage (Control Weather) with the Sorcery limitation, not two, it costs only 1 FP to use.

Control Zombie

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can mentally dominate an undead creature raised with the Zombie spell by some other wizard. You must be able to see or touch the victim. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will. Use the following modifiers: Range penalties to the subject (see p. B550); -1 per slave already under your control; +2 if you concentrate for a full minute, or +4 if you concentrate for a full hour.

If you win, your victim will obey your every command until you free him. In effect, he temporarily gains the Reprogrammable disadvantage (p. B150), with you as his master. Your control persists for as long as you take uninterrupted Concentrate maneuvers.

Once you stop, your control lingers for one minute per point by which you won the Quick Contest. If you are incapacitated (stunned, knocked out, etc.), or attempt to force the subject to act against his principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If your victim wins, he breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but he doesn't roll until he's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you. On a critical failure, you also lose control of anyone else under the influence of this ability!

Your victims have no initiative while under your control, and temporarily acquire Slave Mentality (p. B154).

Statistics: Mind Control (Accessibility, Zombies Only, -50%; Cosmic, Affects zombies, +50%; Puppet, -40%; Sorcery, -15%) [23].

Conversion

Keywords: Missile, Obvious.

Full Cost: 83 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a beam that converts a miniscule portion of the target into antimatter. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 2d(10) corrosion per level of this spell plus 2d burning surge explosion radiation follow-up damage. The follow-up attack produces an explosion at the point of impact (on a miss, check for scatter; see p. B414). The target takes damage normally; anything nearby receives "collateral damage" equal to basic damage divided by (3 x distance in yards from the blast). The GM must determine what the maximum level available in the campaign is.

Statistics: Corrosion Attack 2d (Armor Divisor, (10), +200%; Sorcery, -15%) [57/level] + Burning Attack 2d (Explosion 1, +50%; Follow-Up, Corrosion Attack, +0%; Magical, -10%; Radiation, +100%; Surge, +20%) [26/level].

Cook

Keywords: Area (Fixed).

Full Cost: 1 point/level.

Casting Roll: None.

Range: 2 yards.

Duration: Indefinite.

You can alter the ambient temperature inside cooking vessels. Heating is limited to 20° per level, and occurs at a rate of 4° per level per second of concentration. You can affect a cooking vessel of a two-yard radius or smaller at a distance of up to 2 yards. This ability never does damage directly.

Statistics: Temperature Control (Accessibility, Inside cooking vessels only, -30%; Heat Only, -50%; Reduced Range, 1/5, -20%; Reduced Time 1, +20%; Sorcery, -15%; Variable, +5%) [1/level].

Cool Water

Keywords: Area (Leveled).

Full Cost: 4 points for level 1 + 5 points/additional level (or more).

Casting Roll: None.

Range: 100 yards.

Duration: Indefinite.

This spell lowers the temperature of water in the area. The basic version can increase the temperature by up to 40°F. This will never do damage directly, but see *Cold* (p. B430) for effects.

More potent versions of Cool Water exist. Increasing the full cost of the spell increases the degree of potential temperature change by the same factor, as indicated by the table below.

Spell Strength	Full Cost
Cool Water (40°F)	4 points for level 1 + 5 points/additional level.
Cool Water (80°F)	8 points for level 1 + 10 points/additional level.
Cool Water (120°F)	12 points for level 1 + 15 points/additional level.
Cool Water (160°F)	16 points for level 1 + 20 points/additional level.
Cool Water (200°F)	20 points for level 1 + 25 points/additional level.

Statistics: Temperature Control 2 (Accessibility, Only water, -30%; Cold, -50%; Increased Range, 10x, +30%; Sorcery, -15%; Variable, Area, +5%) [4]. Additional levels add Area Effect (+50%) [+5]. The expanded versions raise the Temperature Control level.

Copy

Keywords: None.

Full Cost: 14 points.

Casting Roll: None.

Range: 10 yards.

Duration: Instantaneous.

Makes one copy of a single page of writing. Paper or parchment must be supplied for the copies to be made on. Copies of magical scrolls, rune parchments, and so on do not have magic power.

Statistics: Telekinesis 1 (Accessibility, Requires paper, -10%; Independent, +40%; One Task, Copying, -70%; Reduced Time 10, +200%; Sorcery, -15%) [13] + Accessory (TK Pen) [1]. *Note:* Here, Reduced Time is used to shorten a 10-minute writing to one second, which was chosen because it costs the same as an Average technique to buy off the -10 for “instant use.”

Cornucopia

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

While this spell is active, you can create any mundane projectile (arrow, bolt, sling bullet, armor-piercing tracer shell, etc.) weighing 1 lbs. or less; it appears in your quiver, bag of pellets, or other container of ammunition, but it must be taken out by hand. Projectiles created this way vanish when the spell ends, so they cannot be sold.

Statistics: Cinematic Option (Infinite Ammunition; Magical, -10%) [1].

Corona of Cold

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is sheathed in cold that deals 1d-1 non-incendiary burning damage to enemies who touch their body. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute).

Statistics: Affliction 1 (HT; Advantage, Corona of Cold, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Corona of Cold" is Burning Attack 1d-1 (Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%; No Incendiary Effect, -10%; Side Effect, DX-2 and Numb, +90%) [9].

Corona of Frost

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is sheathed in frost that deals 1d-1 fatigue damage to enemies who touch their body. Treat FP lost to the attack identically to FP lost to cold for *all* purposes, notably recovery (see *Cold*, p. B430). Targets who took damage from this spell must make an HT roll, at -1 per 2 points of FP lost, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute).

Statistics: Affliction 1 (HT; Advantage, Corona of Frost, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* "Corona of Frost" is Fatigue Attack 1d-1 (Aura, +80%; Freezing, +20%; Magical, -10%; Melee Attack, Reach C, -30%; Side Effect, DX-2 and Numb, +90%) [18].

Corporeal Instability

Keywords: Resisted (HT).

Full Cost: 42 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

The subject's body transforms into an amorphous mass for 1 minute. His Basic Move is reduced by 2, he gains Injury Tolerance (Homogenous, No Blood, No Head, No Neck), Invertebrate, Mute, No Legs (Slithers), and No Manipulators. He cannot wear any armor or use any items in this state - they all become useless and fall from the victim's body. In addition, the victim constantly experiences terrible pain (p. B428). The victim can negate this effect and return to its natural form by taking a Concentrate maneuver a making a successful Will-4 roll. If successful, he retains his shape until the end of his next turn.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Advantage, Corporeal Instability, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Terrible Pain, +60%) [42]. *Notes:* "Corporeal Instability" is Alternate Form (Amorphous Mass; Magical, -10%; Nuisance Effect, Can be negated for a second via a Will-4 check, -10%) [12]. "Amorphous Mass" is a new meta-trait: Basic Move -2 [-10]; Injury Tolerance (Homogenous, No Blood, No Head, No Neck) [57]; Invertebrate [-20]; Mute [-25]; No Legs (Slithers) [0]; No Manipulators [-50].

Corpulence

Keywords: Resisted (HT).

Full Cost: 24 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The subject's girth temporarily increases by one level, going from Skinny to Normal, from Normal to Overweight, from Overweight to Fat, or from Fat to Very Fat, as applicable (see *Build*, p. B18, for details). In addition to the normal effects of the increased weight, ordinary clothes will rip; each piece of rigid armor will constrict, inflicting DR/3 points of crushing damage (round down), and then suffocate (p. B436). Once the subject is incapable of moving, he may be suffocated by his own weight.

Statistics: Affliction 1 (HT; Disadvantage, Very Fat, +5%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; One category shift only, -20%; Sorcery, -15%) [24].

Corrode

Keywords: Resisted (HT).

Full Cost: 28 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Three minutes.

This spell conjures acid that temporarily corrodes an object or a creature's natural armor, reducing DR of the victim by 4. When casting the spell on an armored creature, you must choose whether to affect the creature itself or the armor it is wearing.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Reduced DR 4, +20%; No Signature, +20%; Sorcery, -15%) [28].

Corrosive Weapon

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell turns the weapon to acid, converting the damage of a non-corrosion attack from its usual damage type to corrosion. The damage is reduced according to the following table.

Level	Damage	Level	Damage
1	50%	4	80%
2	60%	5	90%
3	70%	6	Full damage

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Corrosive Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Corrosive Weapon" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -2 in penalties [+16]. This spell is based on the Corrosive Strike imbuement skill.

Countersong

Keywords: Area (Leveled), Beneficial Song.

Full Cost: 35 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. Subjects roll vs. Per minus any Magic Resistance they have. The song's effects last for margin of success seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Allies affected by Countersong gain DR 5 against sonics, including effects that bypass normal DR to cause direct, internal damage. Eyes are also protected. The subjects also get a +3 bonus to their HT or Will when resisting non-damaging sonic effects.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Per; Advantage, Countersong, +130%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [35]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Countersong" is DR 5 (Limited, Sound, -40%; Includes Eyes, +10%; Includes Internal, +20%; Magical, -10%; Tough Skin, -40%) [10] + Resistant to Noxious Sonic Effects (+3) (Magical, -10%) [3].

Counterspell

Keywords: Resisted (Will or spell).

Full Cost: 43 points or fewer.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to nullify a single ongoing spell. Counterspell can target either the person who cast that spell or the subject of the spell, which can be a person, object, or area. For areas, calculate range to the center of the area. The sorcerer must state which spell he is attempting to counter. To counter a given spell, the caster must also know the spell (or its close sorcerous equivalent if countering a spell using some other magic system) they are countering, i.e. be able to cast it as a known spell or via normal or hardcore improvisation.

Treat the resistance roll as for Dispel Magic. This spell cannot end Truly Permanent effects, such as the magic of enchanted items.

Statistics: Neutralize Magic (Accessibility, One spell at a time, -5%; Accessibility, Only spells the caster could cast, -5%; Interruption, -50%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [43]. *Note:* The limitation value of Accessibility, Only spells the caster could cast is equal to -5% if the caster's Sorcerous Empowerment is not limited in scope. If their Sorcerous Empowerment has the Limited Colleges or Limited Scope limitation, increase the value by the same number. Thus, this spell costs 38 points if the caster is limited to four colleges or the equivalent, 33 points if they are limited to three colleges, 28 points if they are limited to two colleges, and 23 points if they are limited to a single college.

Crawling Darkness

Keywords: None.

Full Cost: 40 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell brings into being a shroud of dark, writhing tentacles around the caster that cover his entire hex. This hides the caster completely, concealing his identity, but still lets the enemies know his location for sure. See *Visibility* on p. B394 for more details. If the caster attacks with a Reach C weapon, the defender may be penalized as well.

Statistics: Obscure 10 (Vision; Area Effect, 1 yard, -25%; Defensive, +50%; Extended, Infravision, Ultravision, +40%; Sorcery, -15%) [40].

Create Acid

Keywords: None.
Full Cost: 22 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: 10 seconds or permanent; see text.

This spell allows you to create corrosive acid. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the acid coalesces in hand (which will probably hurt you) or within arm's reach (for example, within a flask you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced acid can weigh up to $10 \times (\text{level squared})$ lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created acid is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

You can opt to create a minuscule amount of acid in combat without worrying about long-term stability. It just produces its effects and vanishes. Acid appears in quantity and concentration sufficient to inflict 1d corrosion damage per level, once, on a single subject. You must immerse a victim in the substance or throw it at him to do damage.

Statistics: Create Acid (Magical, -10%; Reduced Fatigue Cost 1, +20%) [22/level].

Create Air

Keywords: None.
Full Cost: 5.5 points/level*.
Casting Roll: IQ.
Range: Touch.
Duration: 10 seconds or permanent; see text.

This spell allows you to create breathable air where none exists. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the air appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The caster can fill an area up to one yard in radius per level with air. 1 cubic foot of air is enough for one person to breathe for 1 minute.

Statistics: Create Air (Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost and round up.

Create Animal

Keywords: None.
Full Cost: 23 points.
Casting Roll: Will.
Range: Touch.
Duration: Hours equal to margin of success on the casting roll.

Create an animal (IQ 5 or less) that does your mental bidding while it exists. The animal appears within the arm's reach. A living creation must be identical to a “real” living being with which the caster is

familiar. You cannot create an imaginary being, or even a real creature of which you have only heard stories. Neither can you create a bear with poison fangs . . . but some wizards occasionally research private variations on the spell to make unusual creatures. At the end of the casting, you must pay 1 FP and make a Will roll to create the animal. If you are victorious, the created animal serves you for margin of success hours.

Create Animal may also be used to create a swarm of small creatures (p. B461).

If the animal is killed, the summoner must wait a full day to call replacements. Dismissing the animal is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the animal's.

Statistics: Ally (Animal; Built on 50%; Constantly, no roll required; Adjustable, Animals, +50%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [23]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Create Animated Plant

Keywords: None.

Full Cost: 23 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Create an animated plant creature (IQ 5 or less) that does your mental bidding while it exists. The animated plant appears within the arm's reach. A living creation must be identical to a "real" living being with which the caster is familiar. You cannot create an imaginary being, or even a real creature of which you have only heard stories. At the end of the casting, you must pay 1 FP and make a Will roll to create the plant. If you are victorious, the created plant serves you for margin of success hours.

Create Animated Plant may also be used to create a swarm of small plant creatures (p. B461).

If the plant is killed, the summoner must wait a full day to call replacements. Dismissing the plant is a free action, but you may only dismiss him if it is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the plant's.

Statistics: Ally (Animated Plant; Built on 50%; Constantly, no roll required; Adjustable, Animals, +50%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [23]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Create Aquatic Servant

Keywords: None.

Full Cost: 12 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Creates a stupid but obedient servitor (all attributes equal to 9) to do the caster's bidding. The caster determines the servant's appearance, but the servant has a humanoid shape with a fish tail instead of its legs. It can breathe underwater, but cannot breathe air. The servant appears within the arm's reach. This same spell can also create a Brute – a servant with ST of 16, and all other attributes at 9. Or it can create a servant with attributes at 9 and one noncombat non-IQ-based skill at level 16. Any created servant follows simple spoken commands, delivers verbal messages, etc. It is under the GM's control. It cannot fight or handle confusing situations; it has no skills. Faced with danger, it whimpers, flees, or simply vanishes. If questioned, it knows only who its master is and what its orders are. At the end of the casting, you must pay 1 FP and make a Will roll to create the servant. If you are victorious, the created servant serves you for margin of success hours.

If the servant is killed, the summoner must wait a full day to call replacements. Dismissing the servant is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 4 times bigger than the servant's.

Statistics: Ally (Aquatic Servant; Built on 25%; Constantly, no roll required; Adjustable, Servants, +50%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [12]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Create Aquatic Warrior

Keywords: None.

Full Cost: 21 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Creates a warrior to fight as the caster commands. The warrior appears within the arm's reach. The warrior has a humanoid shape with a fish tail instead of its legs. He has IQ 10; ST, DX, and HT 12; and skill 16 with any single weapon (or unarmed combat ability) the caster desires. He can breathe underwater, but cannot breathe air. He has no weapons or armor when created, but uses what he is given. At the end of the casting, you must pay 1 FP and make a Will roll to create the warrior. If you are victorious, the created warrior serves you for margin of success hours.

If the warrior is killed, the summoner must wait a full day to call replacements. Dismissing the warrior is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the warrior's.

Statistics: Ally (Aquatic Warrior; Built on 50%; Constantly, no roll required; Adjustable, Warriors, +25%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [21]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Create Book

Keywords: None.

Full Cost: 12 points for level 1 + 6 points/additional level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create a stack of paper sheets and bind them into a book. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the book appears in hand or within arm's reach. Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced book can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. Note that a stack of 1818 A5 sheets of paper weighs 10 lbs., so a single level of this spell is usually more than enough.

Created book is unstable. It vanishes in 10 seconds unless you use character points to "stabilize" it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts

naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Paper (Link, +10%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [6/level] + Control Paper 1 (Link, +10%; Magical, -10%; Only to bind books, -40%) [6].

Create Chimera

Keywords: Obvious.

Full Cost: 37 points.

Casting Roll: IQ.

Range: Touch.

Duration: Truly Permanent.

This spell allows the caster to fuse together two or more very early embryos (no more than week-old if human) of different species into a single organism. The subject may be a living host or a growth tank, and all the embryos must be implanted into the subject surgically or magically. The process of fusion is identical to the process of enchanting (see Chapter 3 of *GURPS Thaumatology: Sorcery*), but the enchanter must imbue the subject with the traits of the mixed racial template instead of spells. The GM may assign a penalty to the IQ rolls, if the embryos are not very close crosses, and if there are many embryos.

Statistics: Affliction 1 (HT; Accessibility, Only to create chimeras, -50%; Based on IQ, Own Roll, +20%; Cumulative, +400%; Extended Duration, Truly Permanent, +300%; Limited Use, 1/day, -40%; Melee Attack, Reach C, -30%; Sorcery, -15%; Special Enhancements, see *GURPS Thaumatology: Sorcery*, p. 31, +1,080%) [36] + Extra Option (Limited access to meditative study for chimera creation) [1]. Note: The actual cost of 177 points is divided by five due to this ability being character-point powered.

Create Door

Keywords: None.

Full Cost: 130 points.

Casting Roll: IQ.

Range: Touch.

Duration: 3d seconds.

When cast at the near side of a solid obstruction (wall, hedge, cliff, etc.), this spell creates a short-term, short-range gate leading to the other side. The intervening distance is not actually traversed by the door's users – they are simultaneously teleported from the near side to the far one. The travelers can carry up to Extra-Heavy Encumbrance when they traverse the door. The obstacle must not be thicker than 10 yards.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

On a success, you appear at your target destination. On a failure, you go nowhere and strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily "burns out" and will not function again for 1d hours.

Statistics: Warp (Accessibility, Only to create a door through an obstacle, -20%; Blind Only, -50%; Cannot Spend Extra FP, -10%; Extra Carrying Capacity, Extra-Heavy, +50%; No Preparation, -10%; Range Limit, 10 yards, -50%; Reliable 10, +50%; Requires Concentrate, -15%; Sorcery, -15%; Tunnel, Before, +100%) [130].

Create Earth

Keywords: None.

Full Cost: 22 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create earth, mud, stone, or sand. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the earth appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced earth can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created earth is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Earth (Magical, -10%; Reduced Fatigue Cost 1, +20%) [22/level].

Create Elemental

Keywords: None.

Full Cost: 39 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned being's Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

Each time you cast this, you create an elemental (worth 75% or less of your point value) of a particular type: air, earth, fire, water, magma, ether, etc. (chosen when you pick this spell). *You* create this being, adjusting the base elemental template. A penalty applies based on the planar “distance”: There is no distance penalty to create an elemental on the appropriate Elemental Plane. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. The Prime Material Plane is considered adjacent to the Ethereal Plane, and the Ethereal Plane is adjacent to the Inner Planes, where most of the elementals come from.

The creation itself requires 10 minutes of preparation and ritual. At the end of the casting, you must pay 1 FP and make a Quick Contest of Will against the elemental to force it to appear. If you are victorious, the elemental appears. It then makes a reaction roll. On Poor or worse, treat it as an Unwilling Ally – it will obey you, but try to subvert your commands or otherwise act against your interests. If the reaction is Neutral or better, it will serve you reasonably faithfully.

Unlike Summon Elemental, this spell cannot be used to make the elemental answer questions. It's a newly created being, it does not know anything.

Unlike most sorcery with a duration, this spell must be maintained; thus, unless the caster can cast simultaneous spells, using another spell will immediately make the caster lose control of the created elemental. Once control is relinquished, the elemental returns to its native plane. However, there is no FP cost to maintain this spell, only to cast it. A created elemental is vulnerable to being banished or warded off with occult techniques, but cannot be dispelled. If it is killed, the caster must wait 24 hours before using this spell again; if the control was relinquished, the caster must wait five minutes.

See *GURPS Magic*, p. 28 or *GURPS Dungeon Fantasy 9: Summoners*, p. 27 for statistics of air elementals.

See *GURPS Magic*, p. 55 or *GURPS Dungeon Fantasy 9: Summoners*, p. 27 for statistics of earth elementals.

See *GURPS Magic*, p. 55 or *GURPS Dungeon Fantasy 9: Summoners*, p. 30 for statistics of ether elementals.

See *GURPS Magic*, p. 76 or *GURPS Dungeon Fantasy 9: Summoners*, p. 28 for statistics of fire elementals.

See *GURPS Magic*, p. 55 or *GURPS Dungeon Fantasy 9: Summoners*, p. 29 or *Pyramid #3-91*, p. 28 for statistics of metal elementals.

See *GURPS Magic*, p. 191 or *GURPS Dungeon Fantasy 9: Summoners*, p. 30 for statistics of water elementals.

See *GURPS Magic*, p. 191 or *GURPS Dungeon Fantasy 9: Summoners*, p. 31 for statistics of wood elementals.

See *Pyramid #3-114*, p. 18 for statistics of glass elementals.

See *GURPS Locations: Metro of Madness*, p. 26 for statistics of plastic elementals.

Statistics: Ally (A type of elementals; Built on 75%; Constantly; Adjustable, a relatively narrow group with similar capabilities, provides no information, +50%; Conjured, +100%; Cosmic, The caster creates the elemental instead of the GM, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%) [39]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional “range” penalties.

Create Fire (Unofficial Sorcery Errata)

Keywords: Area (Leveled).

Full Cost: 10 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

You may create a patch of fire, which will burn regardless of fuel for the next five minutes. If there is fuel available, it will begin spreading immediately and will continue to burn on its own afterward.

The basic (10-point) version of this spell lets you create fire in up to a two-yard radius. Every additional 2 points doubles this radius: four yards for 10 points, eight yards for 12 points, and so on. You may always choose to affect a smaller area.

Statistics: Burning Attack 1d-1 (Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [10]. Improved versions add Area Effect (+50%/level).

Create Fluid

Keywords: None.

Full Cost: 11 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create breathable air or pure water where none exists. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the substance appears in hand or within arm’s reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

The caster can fill an area up to one yard in radius per level with air. 1 cubic foot of air is enough for one person to breathe for 1 minute. The produced water can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create Fluid (Magical, -10%; Reduced Fatigue Cost 1, +20%) [11/level].

Create Food

Keywords: None.

Full Cost: 40 points for level 1 + 4 points/additional level.

Casting Roll: IQ or Cooking. Special casting time (see below).

Range: Touch.

Duration: Indefinite.

You can create any mundane food weighing 3 lbs. or less; it appears in your hand. Note that (e.g.) “a stew” would be a single object; you do not have to create all the ingredients separately!

Unlike most spells, Create Food requires 10 or 11 seconds to cast instead of the normal one or two seconds. If your roll fails, you create the wrong thing. The difference depends on your margin of failure; if you’re trying to conjure fried dumplings, failure by 1 might give you cooked dumplings, while failure by 5 would give you a piece of dough! If you fail, you can try again, but repeated attempts cost 3 FP (instead of the usual 1 FP) and take a cumulative -1 to the IQ roll, until you succeed or wait an hour.

A created object lasts indefinitely. That means, however, that if you want to cast this spell again, the first object goes away as soon as you begin casting to create the second one. If you can maintain multiple spells (*Simultaneous Spells*, *Sorcery*, p. 8), you can keep multiple versions of Create Food “on” to get around that problem.

Higher levels of this spell allow you to create heavier, larger objects. However in no case can you create an object weighting more than 2xBL; it must always be something you could hold in one hand.

Spell Level	Weight	Min. ST
1	3 lbs.	3
2	5 lbs.	4
3	7 lbs.	5
4	10 lbs.	5
5	15 lbs.	7
6	20 lbs.	8
7	30 lbs.	9
8	50 lbs.	12
9	70 lbs.	14
10	100 lbs.	16

For higher levels, look up the spell level in the “Size” column of the Size and Speed/Range Table (p. B550) and then read the corresponding “Linear Measurement” as pounds instead of yards. (Or note that every +6 levels corresponds to 10x weight.) See p. B17 to find minimum ST.

Statistics: Snatcher (Accessibility, Only mundane food, -40%; Improved, +10%; Less Weight, 3 lbs., -5%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Unpredictable, -25%) [40]. Level 2 removes Less Weight (+5%) [+4] and additional levels add More Weight (+5%) [+4]. *Note:* The Improved enhancement eliminates the auto-fail on 14+.

Create Foreign Body

Keywords: Resisted (HT).

Full Cost: 46 points.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Instantaneous.

This spell creates a foreign body within the subject’s circulatory system or other parts of the body. If the target fails to resist, the result is stroke. Treat this as a mortal wound (p. B423): The victim immediately falls unconscious and must roll vs. HT every 30 minutes, with any failure meaning death. At TL6+, trauma maintenance can help.

Natural recovery occurs only if one of those HT rolls critically succeeds. Otherwise, surgery (roll as if the subject were at -HP), Dispel Creation (at -5 without a way to see the obstruction), or Remove

Curse is needed. Neither Counterspell nor Dispel Magic is effective. A victim who recovers is at the lower of -HP or current HP.

The above is the fastest this spell can kill. Slower options (like coma) are possible, as are nonlethal ones (e.g., crippled body parts); effects vary, but the cure is identical. The condition – mortal or not – must be one that a penny-sized foreign body could cause. The GM should forbid anything that targets organs the subject lacks: mortal wounds require a heart and blood; coma, a brain; and so on.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures with organs, -15%; Heart Attack, Variant, +300%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%; Variable, +5%) [46].

Create Fuel

Keywords: None.

Full Cost: 32 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn any natural solid or liquid substance into the primary solid or liquid fuel for the spell's TL. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Transmute Liquid to Fuel, +45%; Transmute Solid to Fuel, +45%; Transmutation Only, -100%; Magical, -10%) [32/level].

Create Fungus

Keywords: None.

Full Cost: 15 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to bring forth fungi where nothing grew before. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the fungi appears within arm's reach. Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced fungus can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. For fungal molds the GM can convert this into an area with a radius equal to the spell's level.

If the created fungi are worth money (for example, if they possess supernatural properties or can be used as alchemical reagents), they are unstable and will decay after 10 seconds unless you stabilize them with your character points – in which case point cost depends on their value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Fungus (Magical, -10%; Reduced Fatigue Cost 3, +60%; Vital Creation, +0%) [15/level].

Create Gate

Keywords: None.

Full Cost: 220 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Touch.

Duration: 3d seconds.

This spell creates a magical portal leading to another place you are able to see with your own eyes, or view remotely, or visualize clearly (which is only possible if you have visited it previously in person). Creatures that traverse the gate can carry up to Extra-Heavy Encumbrance when they travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1

2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you have a “second-hand” view of the destination, you are at -2 per level of removal. For instance, seeing it on TV or through someone else’s eyes would give -2, while seeing it on a television set that you are viewing through someone else’s eyes would give -4. There is an additional -2 to teleport to a place you have visited but cannot see.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, the gate appears leading to your target destination. On a failure, the gate does not appear and you strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, the gate appears, but it leads to the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

Statistics: Warp (Extra Carrying Capacity, Extra-Heavy, +50%; Requires Concentrate, -15%; Sorcery, -15%; Tunnel, Before, +100%) [220].

Create Ice

Keywords: None.

Full Cost: 5.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create ice. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the ice appears in hand or within arm’s reach (for example, within a drink you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

The produced ice can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created ice is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign’s average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Ice (Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost and round up.

Create Implausible Material

Keywords: None.
Full Cost: 48 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: 10 seconds or permanent; see text.

This spell allows you to create solid implausible materials, such as those described in GURPS Dungeon Fantasy 8: Treasure Tables and GURPS Dungeon Fantasy Treasures 1: Glittering Prizes. Creating such materials requires the “raw” material to be present – solidifying lightning requires you to be within an active thunderstorm, solidifying screams requires a screaming person, etc. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the material appears in hand or within arm’s reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

The produced sand can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created sand is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign’s average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Solid (Accessibility, Implausible Materials Only, -20%; Cosmic, Exotic Materials, +50%; Environmental, Proper conditions, -20%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [48/level].

Create Life

Keywords: Obvious.
Full Cost: 38 points.
Casting Roll: IQ or Bioengineering.
Range: Touch.
Duration: Truly Permanent.

This spell allows the caster to create a living being (a bio-gadget that can fling spines, a skullcat (*GURPS Bio-Tech*, p. 96), an owlbear, etc.) from nothing but internal magical energies. The process of creation is identical to the process of enchanting (see Chapter 3 of *GURPS Thaumatology: Sorcery*), but instead of spells, the enchanter “enchants” a racial template. Form multipliers should be ignored for this sort of enchantment. The enchanter cannot use this spell on an already living being, he can only create new ones from scratch. Each failed casting roll accumulated one point of additional disadvantages. The GM determines the nature of these disadvantages in secret, and they may not even be obvious once the creation is complete. Genetic defects from *GURPS Bio-Tech* could be used for inspiration. In any case, the racial template of the created being must be approved by the GM – each setting can have its own assumptions on what life forms can be created this way.

Statistics: Affliction 1 (HT; Accessibility, Only to create life, -10%; Based on IQ, Own Roll, +20%; Cumulative, +400%; Extended Duration, Truly Permanent, +300%; Limited Use, 1/day, -40%; Melee Attack, Reach C, -30%; Sorcery, -15%; Special Enhancements, see *GURPS Thaumatology: Sorcery*, p. 31, +1,080%) [37] + Extra Option (Limited access to meditative study for life creation) [1]. *Note:* The actual cost of 182 points is divided by five due to this ability being character-point powered.

Create Metal

Keywords: None.

Full Cost: 22 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: 10 seconds or permanent; see text.

This spell allows you to create metal. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the metal appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced metal can weigh up to $10 \times (\text{level squared})$ lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created metal is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Metal (Magical, -10%; Reduced Fatigue Cost 1, +20%) [22/level].

Create Mindscape

Keywords: Resisted (Will).
Full Cost: 366 points for level 1 + 10 points/additional level
Casting Roll: IQ.
Range: Unlimited.
Duration: Instantaneous.

By making a successful casting roll, you leave your body behind, unconscious, while projecting your mind and the mind of the subject to a mindscape of your creation. Failure means you both stay in your current world, and you are at -5 to cast this spell for the next 10 minutes. Critical failure results in this spell burning out for 1d hours. While in the mindscape, you and the subject can use spells, mental abilities, and Maledictions to affect the mindscape or each other. The projected forms are visible, but insubstantial and vulnerable to all abilities that affect insubstantial beings. All HP and FP losses come out of the same pool, regardless of which form suffers them – physical or projected. The projection suffers any negative effects: shock, stunning, etc. If the projection would become “unconscious,” it vanishes instead. The mind snaps back to the body, which remains unconscious until it recovers. If death results, consequences depend on which form suffered the killing injury. If this was the projection, the personality and mind are gone, but the body may survive as a mindless husk; use the *Mortal Wounds* rules (p. B423), but the victim can never awaken.

This spell can be maintained indefinitely, but the bodies' need to eat, drink, sleep, etc. effectively limits the duration to a day or so – longer if the bodies are left with friends, in a hospital, or otherwise cared for.

Those who know this spell or Mindscape Door can “hitch a ride” to the mindscape as per the rules for Jumper (World) (p. B64).

At level 1, your mindscape is the size of a small bedroom (or the equivalent of the best Status -2 dwelling in your campaign setting) but has no other features. It does have a breathable atmosphere and takes whatever shape you initially desire, but from that point onward is fixed, unless changed by spells and abilities used by the projecters. Each additional level improves this “virtual Status” for the purpose of determining the size of the mindscape (see *What Cost of Living Gets You* box (p. B266)).

When you want to leave your mindscape, cast this spell again. Success means you return your mind to the body. Failure means you go nowhere. Critical failure means you are trapped in your mindscape for 1d hours or you arrive as normal but your spell burns out for 1d hours. The subject that was pulled in does that with an IQ roll.

Should you die, your mindscape disappears, ejecting any living non-native beings to the last place they were before entering the mindscape. Alternatively, the GM might allow the mindscape to exist on its own, choose a new “owner,” (perhaps, the subject) or something similar.

If you do not want to pull anyone into your mindscape, you can cast this spell to project only your own mind.

Statistics: Affliction 1 (Will; Advantage, Create Mindscape, +1,450%; Based on IQ, Own Roll, +20%; Based on Will, +20%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Malediction 2, +150%; No Signature, +20%) [176] + Jumper (Pocket Dimension; Gyroscopic, +10%; Improved, +10%; Faster Concentration 5, +25%; Link, +20%; Magical, -10%; No Settling, +10%; Projection, Can affect the new world, -0%) [165]. Each additional level adds a level of Larger Size (+10%) to the Jumper advantage [+10]. *Note:* “Create Mindscape” is Jumper (Pocket Dimension; Gyroscopic, +10%; Improved, +10%; Faster Concentration 5, +50%; Magical, -10%; No Settling, +10%; Projection, Can affect the new world, -0%) [145].

Create Mount

Keywords: None.

Full Cost: 21 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Create a stupid but obedient mount on which to ride while it exists. It can also be used as a draft animal. The mount appears within the arm’s reach. The mount’s traits are equivalent to a pony (p. B460), but the caster sets its appearance at casting time; it can be a horse, camel, dolphin, dwarf elephant, huge ostrich, or anything else the GM agrees to (use the Create Animal guidelines). The mount can only understand very simple spoken commands, such as stop, go, left, right, about face, etc. It is under the GM’s control and cannot fight or handle confusing situations; it has no skills. Faced with danger, it will whimper, bolt, or simply vanish. At the end of the casting, you must pay 1 FP and make a Will roll to create the mount. If you are victorious, the created mount serves you for margin of success hours.

The caster may also choose to create a Brute mount with ST 35, a Winged mount with Move 7/14, a Racing mount with Move 18, or a War-Trained mount that remains calm in dangerous situations and can be ordered to trample or attack.

If the mount is killed, the summoner must wait a full day to call replacements. Dismissing the mount is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character’s point total is at least 2 times bigger than the mount’s.

Statistics: Ally (Mount; Built on 50%; Constantly, no roll required; Adjustable, Mounts, +25%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [21]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Create Paper

Keywords: None.

Full Cost: 5.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create sheets of paper or stacks of them. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the paper appears in hand or within arm's reach. Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced paper can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. Note that a stack of 907 A4 sheets of paper weighs 10 lbs., so a single level of this spell is usually more than enough.

Created paper is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Paper (Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost then round up.

Create Planar Gate

Keywords: None.

Full Cost: 230 points or 250 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: 3d seconds.

This spell creates a magical portal leading to another plane of existence that you are able visualize clearly (which is only possible if you have visited it previously in person). Creatures that traverse the gate can carry up to Extra-Heavy Encumbrance when they travel.

To create a gate, you must visualize your destination, concentrate for 10 seconds, and make a IQ roll. You may hurry the creation, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, the gate appears leading to your target destination. On a failure, the gate does not appear. On a critical failure, the gate opens, but leads to the wrong destination, which can be any plane the GM wishes!

The creatures using the gate appear at the target destination at exactly the same place they left their previous plane – or as close as possible. This means the same place, but on a parallel world. If there is no corresponding “safe” location within 100 yards of their destination – for instance, if they use the gate while on an airplane to a destination with no plane at their location, or from a half-mile deep mine to a destination with no corresponding mine – the plane shift will fail and they will know why it failed. This does not prevent them from jumping into other types of danger, such as radiation, gunfire, or wild animals. If they have Danger Sense, the GM should roll before they make a hazardous jump; on a success, they get a warning.

The basic (230-point) version of this spell allows you create gates to one other plane, chosen when you learn the spell. The improved (250-point) version opens this up to any dimension you are familiar with. You can become familiar with new planes by hitching a ride there – with another sorcerer using this spell, a magician using an equivalent spell, a creature with an innate ability, etc. – or via tomes of knowledge which contain detailed instructions on where and how to travel.

Statistics: Jumper (Interplanar; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Limited Access, -20%; Magical, -10%; Tunnel, Before, +100%) [230]. The improved version removes Limited Access [+20]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Create Plant

Keywords: None.
Full Cost: 15 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: 10 seconds or permanent; see text.

This spell allows you to bring forth vegetation where nothing grew before. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the vegetation appears within arm's reach. Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced plant can weigh up to $10 \times (\text{level squared})$ lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. For grass the GM can convert this into an area with a radius equal to the spell's level.

Statistics: Create Wood (Magical, -10%; Reduced Fatigue Cost 3, +60%; Vital Creation, +0%) [15/level].

Create Sand

Keywords: None.
Full Cost: 5.5 points/level*.
Casting Roll: IQ.
Range: Touch.
Duration: 10 seconds or permanent; see text.

This spell allows you to create sand. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the sand appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced sand can weigh up to $10 \times (\text{level squared})$ lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created sand is unstable. It vanishes in 10 seconds unless you use character points to "stabilize" it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Sand (Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost, then round up.

Create Servant

Keywords: None.
Full Cost: 12 points.
Casting Roll: Will.
Range: Touch.
Duration: Hours equal to margin of success on the casting roll.

Creates a stupid but obedient servitor (all attributes equal to 9) to do the caster's bidding. The caster determines the servant's appearance. The servant appears within the arm's reach. This same spell can also create a Brute – a servant with ST of 16, and all other attributes at 9. Or it can create a servant with attributes at 9 and one noncombat non-IQ-based skill at level 16. Any created servant follows

simple spoken commands, delivers verbal messages, etc. It is under the GM's control. It cannot fight or handle confusing situations; it has no skills. Faced with danger, it whimpers, flees, or simply vanishes. If questioned, it knows only who its master is and what its orders are. At the end of the casting, you must pay 1 FP and make a Will roll to create the servant. If you are victorious, the created servant serves you for margin of success hours.

If the servant is killed, the summoner must wait a full day to call replacements. Dismissing the servant is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 4 times bigger than the servant's.

Statistics: Ally (Servant; Built on 25%; Constantly, no roll required; Adjustable, Servants, +50%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [12]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Create Spellstitched Undead

Keywords: Obvious.

Full Cost: 37 points.

Casting Roll: IQ.

Range: Touch.

Duration: Truly Permanent.

This spell allows the caster to etch runic markings into the body of a corporeal undead creature. The process of creation is identical to the process of enchanting (see Chapter 3 of *GURPS Thaumatology: Sorcery*), but the enchanter must imbue the subject with the spellstitched creature lens and spells that the caster knows.

Statistics: Affliction 1 (HT; Accessibility, Only to create spellstitched undead, -50%; Based on IQ, Own Roll, +20%; Cumulative, +400%; Extended Duration, Truly Permanent, +300%; Limited Use, 1/day, -40%; Melee Attack, Reach C, -30%; Sorcery, -15%; Special Enhancements, see *GURPS Thaumatology: Sorcery*, p. 31, +1,080%) [36] + Extra Option (Limited access to meditative study for spellstitched undead creation) [1]. *Note:* The actual cost of 177 points is divided by five due to this ability being character-point powered.

Create Spring

Keywords: None.

Full Cost: 19 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Permanent.

The spell increases the output of a spring. Note, however, that the local geology may eventually shift, restoring the spring's output to its previous level. This spell can also create a spring where none exist, if there are underground waters in the area.

Spring Magnitude	Flow (ft ³ /s, gal/min, pint/min)	Flow (L/s)
1 st magnitude	>100 ft ³ /s	2800 L/s
2 nd magnitude	10 to 100 ft ³ /s	280 to 2800 L/s
3 rd magnitude	1 to 10 ft ³ /s	28 to 280 L/s
4 th magnitude	100 US gal/min to 1 ft ³ /s (448 US gal/min)	6.3 to 28 L/s
5 th magnitude	10 to 100 gal/min	0.63 to 6.3 L/s
6 th magnitude	1 to 10 gal/min	63 to 630 mL/s
7 th magnitude	2 pint to 1 gal/min	8 to 63 mL/s
8 th magnitude	Less than 1 pint/min	8 mL/s
0 magnitude	No flow (sites of past/historic flow)	

Spell Level	Output Increase in Gallons/Hour
1	10 lbs. * 3600 / 8.35 = 4,311 gallons/hour
2	40 lbs. * 3600 / 8.35 = 17,245 gallons/hour
3	90 lbs. * 3600 / 8.35 = 38,802 gallons/hour
4	160 lbs. * 3600 / 8.35 = 68,982 gallons/hour
5	250 lbs. * 3600 / 8.35 = 107,784 gallons/hour
6	360 lbs. * 3600 / 8.35 = 155,209 gallons/hour
7	490 lbs. * 3600 / 8.35 = 211,257 gallons/hour
8	640 lbs. * 3600 / 8.35 = 275,928 gallons/hour
9	810 lbs. * 3600 / 8.35 = 349,221 gallons/hour
10	1000 lbs. * 3600 / 8.35 = 431,137 gallons/hour
+1	=10*lvl ² * 3600 / 8.35

Statistics: Control Water (Accessibility, Only to increase the output of springs, -85%; Extended Duration on Persistent, Permanent, +150%; Persistent, +40%; Sorcery, -15%) [19/level].

Create Steam

Keywords: None.

Full Cost: 5.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create scalding-hot steam where none exists. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the steam appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The caster can fill an area up to one yard in radius per level with steam. The steam deals 1 point of burning non-incendiary damage per second per level of the spell. DR protects normally.

Statistics: Create Steam (Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost and round up.

Create Temporal Gate

Keywords: None.

Full Cost: 250 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: 3d seconds.

This spell creates a magical portal leading to another time that you are able visualize clearly (which is only possible if you have visited it previously in person). Creatures that traverse the gate can carry up to Extra-Heavy Encumbrance when they travel.

To create a gate, you must visualize your destination, concentrate for 10 seconds, and make a IQ roll. You may hurry the creation, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, the gate appears leading to your target destination. On a failure, the gate does not appear. On a critical failure, the gate opens, but leads to the wrong destination, which can be any time the GM wishes!

The creatures that move through the gate appear at the destination at exactly the same place they left their previous time – or as close as possible. This means the same place, but in a different time. If there is no corresponding “safe” location within 100 yards of their destination – the timeport will fail and they will know why it failed.

The creator must specify if the gate merely displaces its users in time by a fixed amount (1 year into the past, for example) or if it sends its users to a specific, unchanging point in time (December 25, 1066, say). In the latter case, since subjects that step into the gate at various departure times can't all

arrive at the same time, the gate either “drifts” slowly in time so as to space the arrivals at least a second apart, or the various subjects arrive in different “pasts” (GM’s decision).

Statistics: Jumper (Time; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Magical, -10%; Tunnel, Before, +100%) [250]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Create Trap

Keywords: Area (Leveled).

Full Cost: 25 points for level 1 + 3.5 point/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Fills the area with artificial hazards of the caster’s choice – not beings, deadly energies (electricity, fire, lasers, etc.), or diffuse fluids (acid, lava, steam, and so on), but artifacts of the sort possible for Create Object. This means things like razor-edged wire, whirring saw blades of enormous size, and toothed snap-traps. The specifics don’t change the spell’s effects. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Anybody moving across the ground must roll vs. DX or DX-based Traps, every second. Failure deals dice of cutting damage equal to half the margin of failure, rounded up: 1d on failure by 1 or 2, 2d on failure by 3 or 4, and so on. This is large-area injury (p. B400); there are too many simultaneous dangers for any one piece of armor to protect fully.

Travel is also slowed, as victims tiptoe around or extract themselves from trap after trap: Ground movement costs +1 movement point per hex; see *Movement Point Costs* (p. B387).

Although Traps skill can help avoid the area’s perils, it cannot disarm them. While the spell endures, any trap triggered or defeated is replaced instantly!

The basic (25-point) version of this spell covers a two-yard radius. For each additional 3.5 points, you may double this radius; e.g., four yards for 28 points, 8 yards for 32 points, or 16 yards for 35 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Cutting Attack 1d (Area Effect, 2 yards, +50%; Cosmic, Slows Travel, +50%; Half-Margin-Based, +150%; Persistent, +40%; Resisted, DX, -30%; Sorcery, -15%; Variable, Area, +5%) [25]. Further levels add Area Effect (+50%) to the advantage [+3.5*].

* Calculate the total cost and then round down (because the base ability costs just 24.5 points before rounding). Level 2 of the *spell* costs 28 points, level 3 costs 32 points, level 4 costs 35 points, level 5 costs 39 points, and so on.

Create Warrior

Keywords: None.

Full Cost: 21 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Creates a warrior to fight as the caster commands. The warrior appears within the arm’s reach. He has IQ 10; ST, DX, and HT 12; and skill 16 with any single weapon (or unarmed combat ability) the caster desires. He has no weapons or armor when created, but uses what he is given. At the end of the casting, you must pay 1 FP and make a Will roll to create the warrior. If you are victorious, the created warrior serves you for margin of success hours.

If the warrior is killed, the summoner must wait a full day to call replacements. Dismissing the warrior is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character’s point total is at least 2 times bigger than the warrior’s.

Statistics: Ally (Warrior; Built on 50%; Constantly, no roll required; Adjustable, Warriors, +25%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [21]. *Notes:* The Maximum Duration limitation is priced based on

Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Create Water

Keywords: None.

Full Cost: 5.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell allows you to create pure water. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the water coalesces in hand or within arm's reach (for example, within a flask you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced water can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create Water (Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost and round up.

Creation Summoning

Keywords: None.

Full Cost: 30 or 75 points.

Casting Roll: IQ or Bioengineering.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

This spell manifests a magical creation into being to act as the caster commands. The term "creation" here encompasses any living being that the caster has created via the Create Life spell or any other living being that the GM find appropriate for such summoning. It is suggested for the GM to require the summoner to take a perk for every type of being that he can summon, but haven't created with Create Life. Otherwise, this spell may be *too* flexible.

The creation appears within the arm's reach. It has no weapons or armor when created, but uses what it is given. At the end of the casting, you must pay 1 FP and make a IQ roll to create the being. If you are victorious, the created being serves you for margin of success hours.

If the creation is killed, the summoner must wait a full day to call replacements. Dismissing the creation is a free action, but the creation can only be dismissed if it is physically present. The summoner can only cast the basic (30-point) version of this spell if his point total is at least 2 times bigger than the creation's. The improved (75-point) version lets the summoner conjure creations with point totals equal or lower than his own.

Statistics: Ally (Creation; Built on 50%; Constantly, no roll required; Adjustable, Creations, +150%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires IQ Roll, -10%) [30]. The improved version increases the maximum point value of the ally to 100% [+45]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Creeping Plague

Keywords: Area (Leveled).

Full Cost: 16 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with a carpet of crawling, venomous vermin. Water offers no refuge – it's teeming with jellyfish, leeches, stinging echinoderms, and other horrors. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. Everyone on the ground or swimming in the area is engulfed and attacked.

Clothing (DR 0 garments) protects completely against the pests for two turns; armor (DR 1+) protects for five. After that, DR becomes irrelevant and the victim suffers 1d toxic injury per turn in the area, halved (round down) on a successful HT roll. Resistant to Poison aids this HT roll, while Immunity to Poison or Sealed prevents harm.

This swarm doesn't move on its own. By taking a Concentrate maneuver, the caster can shift the area along the ground at Move 2 (though not change its shape). Also unlike a mundane swarm, this one is unaffected by damage. For the spell's duration, new creepy-crawlers appear within the area to replace slain ones.

The basic (16-point) version of this spell covers a two-yard radius. For each additional 2 points, you may double this radius; e.g., four yards for 18 points, 8 yards for 20 points, or 16 yards for 22 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Toxic Attack 1d (Area Effect, 2 yards, +50%; Contact Agent, +150%; Fixed Duration, +0%; Mobile 2, +80%; Nuisance Effect, Armor protects temporarily, -15%; Persistent, +40%; Resistible, HT, Halved, -15%; Sorcery, -15%; Underwater, +20%; Variable, Area, +5%) [16]. Further levels add Area Effect (+50%) to the advantage [+2].

Cremate

Keywords: Resisted (HT).

Full Cost: 26 points/level.

Casting Roll: IQ. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Instantaneous.

This spell instantly incinerates a victim from within. If the subject fails to resist, roll 2d burning damage per level of this spell. Should this harm equal or exceed the victim's (HP score * 6), it's immediately fatal regardless of HT or advantages, turning the victim into a pillar of flame. If it's not enough to kill the victim, the victim still takes this much damage, ignoring DR.

Victims killed by this spell – whether by its instant death effect or total injury – leave behind flaming remains. Treat this as ordinary fire (p. B433) that blazes for one minute if not extinguished or fueled. Possessions are unaffected by the magic but likely to burn in the aftermath unless fished out quickly.

Statistics: Burning Attack 2d (Cosmic, Leaves no trace of the victim, leaves fire, +50%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [26/level].

Crushing Despair

Keywords: Area (Fixed).

Full Cost: 42 points for level 1 + 14 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You cause sapient (IQ 6+) beings to experience crushing despair. You can target any area within 100 yards and affect everyone within a 10-yard radius – this is not selective and (unlike most Area spells) you cannot reduce the area! Those in the area must roll a Fright Check, applying any Magic Resistance as a bonus. Low Self-Image gives -3 to the check *and* to all Will rolls to recover. Chronic Depression similarly gives -2 for a self-control number of (15), -4 for (12), -6 for (9), and -8 for (6). Your victims get

+1 per Fright Check after the first within 24 hours, and anyone who succeeds is immune to this spell for an hour. Use the Despair variant table from *Pyramid #3-92*, page 29.

Each additional level of this spell imposes -1 to the Fright Check. For example, with Terror 4, the subjects must make Fright Checks at -3.

This spell is not Resisted; the chance to succeed at the Fright Check takes the place of a normal resistance roll.

Statistics: Terror (Despair; Accessibility, Only on sapient beings, -10%; Presence, +25%; Ranged, +40%; Sorcery, -15%) [42]. Additional levels add -1 to the Fright Check [+14].

Crushing Fist

Keywords: Missile, Obvious.

Full Cost: 23 points or more.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: 50 yards.

Duration: Instantaneous.

The caster enlarges and projects his punch. Use DX or unarmed combat skill to hit. This has 1/2D -, Max 50, Acc 3. This attack deals normal punch damage and explodes on impact (check for *Scatter*, p. B414). Treat the punch's damage as if it had the Explosion modifier (p. B104), regardless of damage type. Divide damage by three times the distance in yards to each target.

At level one, this spell can only be used once per 10 seconds. Additional levels reduce this recharge time.

Level	Recharge	Point cost	Level	Recharge	Point cost
1	10 seconds	23 points	6	5 seconds	77 points
2	9 seconds	34 points	7	4 seconds	88 points
3	8 seconds	45 points	8	3 seconds	99 points
4	7 seconds	56 points	9	2 seconds	110 points
5	6 seconds	67 points	10	1 second	121 points

Statistics: Imbue 3 (Limited Skill Access, Combination Skill (Project Blow (VH) + Shockwave (VH)), -80%) [8] + Unusual Training [1] + Combination Skill (Project Blow (VH) + Shockwave (VH)) DX+0 [8] modified with Accessibility, Only fist, -80%; Cosmic, No die roll required, +100%; Increased 1/2D, x10, +15%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Reduced Range, 1/2, -10% for a final cost of 22.95 points. Additional levels add more skill [+8 to base cost].

Crushing Hand

Keywords: None.

Full Cost: 49 points.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

Creates a SM+0 hand made of shimmering pinkish force that appears between the caster and one of his opponents. This floating, disembodied hand moves automatically to remain between them, regardless of where the caster moves or how the opponent tries to get around it, providing cover for the caster against that opponent (and other opponents, if they are close enough). The opponent firing at the caster risks hitting the hand instead. See *Firing Through an Occupied Hex*, p. B389.

The hand has HP 20 and DR 20. The caster can Concentrate to move the hand at Move 4, but only towards him or the designated opponent, and the hand cannot move closer than 3 yards to the caster. The caster may Concentrate to make the Crushing Hand shove (p. B372) or grapple the

designated opponent. The Crushing Hand can constrict the victim, as if it has Constriction Attack (p. B43).

The designated opponent must evade (p. B368) the hand, if he wants to approach the caster. The hand is considered a standing creature, and has DX of the caster and ST 12. The hand can even stop insubstantial opponents from approaching. Getting past the hand or destroying it dispels it.

The caster can Concentrate to redirect the hand to another opponent.

Statistics: Constriction Attack (Telekinesis, -10%; Magical, -10%) [12] + Telekinesis 4 (Affects Insubstantial, +20%; Independent, +40%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing, shoving, grappling, -40%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [15] + Telekinesis 8 (Affects Insubstantial, +20%; Independent, +40%; Lift Only, -20%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing, shoving, grappling, -40%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [22].

Crustacean Control

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single crustacean – or of one square yard of a swarm of smaller crustaceans. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only crustaceans with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for crustaceans with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Crustaceans only, -40%; Sorcery, -15%) [23].

Crystal-Gazing

Keywords: Information.

Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Crystal-Gazing is the use of a crystal ball or mirror to facilitate a divinatory vision. If it works, the GM describes a scene; it is up to the player to interpret it! The caster may use clear, still water for this divination, but at a -10 to skill.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a crystal ball, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Cure Dehydration

Keywords: None.

Full Cost: 21 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By making physical contact with a subject, you may immediately heal him 1 FP per 1 FP spent to cast this spell (this spell may cost any amount of FP to cast, unlike normal spells). You can only restore FP lost to dehydration, and any FP used to cast this spell will be treated as FP lost to dehydration. You may cure dehydration of subjects of your own race and any "similar" races (GM's call); e.g., a human can cure other humans but not dogs or plants. This spell cannot increase the subject's FP score above its normal maximum.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful lending. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only dehydration, -20%; Heals Fatigue Only, +0%; Magical, -10%) [21].

Cure Disease

Keywords: None.
Full Cost: 54 points.
Casting Roll: IQ; special FP cost.
Range: Touch.
Duration: Instantaneous.

You can cure disease of a living creature with your touch. This takes a second of concentration, physical contact with the subject, and an IQ roll. Your IQ is at a cumulative -3 penalty for every successful use on the same subject within 24 hours, at a flat -2 penalty if the patient is unconscious, and at an additional modifier to cure disease (see below). Failure costs you 1d FP.

Your skill roll is at a modifier set by the GM, from +1 for a common cold to -15 for bone marrow cancer. If successful, the FP cost is equal to twice the absolute value of the penalty, minimum 1. For example, if a kidney infection causes a -3 penalty to skill, the cost to cure it would be 6 FP.

Statistics: Healing (Affects Self, +50%; Disease Only, -40%; Magical, -10%; Xeno-Healing, Anything Alive, +80%) [54].

Cure Fungal Disease

Keywords: None.
Full Cost: 39 points.
Casting Roll: IQ; special FP cost.
Range: Touch.
Duration: Instantaneous.

You can cure fungal disease of a living creature with your touch. This takes a second of concentration, physical contact with the subject, and an IQ roll. Your IQ is at a cumulative -3 penalty for every successful use on the same subject within 24 hours, at a flat -2 penalty if the patient is unconscious, and at an additional modifier to cure fungal disease (see below). Failure costs you 1d FP.

Your skill roll is at a modifier set by the GM, from +1 for a foot fungus to -8 for blastomycosis. If successful, the FP cost is equal to twice the absolute value of the penalty, minimum 1. For example, if a fungal lung infection causes a -3 penalty to skill, the cost to cure it would be 6 FP.

Statistics: Healing (Accessibility, Fungal Diseases Only, -50%; Affects Self, +50%; Disease Only, -40%; Magical, -10%; Xeno-Healing, Anything Alive, +80%) [39].

Cure Radiation

Keywords: Buff.
Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 5 hours.

You cause the subject's body to heal its radiation damage. The subject sheds 10 accumulated rads per hour. This *will* heal "permanent" radiation damage (p. B435).

Statistics: Affliction 1 (HT; Advantage, Cure Radiation, +80%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Cure Radiation" is Regeneration (Regular; Magical, -10%; Radiation Only, -60%) [8].

Cure Starvation

Keywords: None.
Full Cost: 21 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By making physical contact with a subject, you may immediately heal him 1 FP per 1 FP spent to cast this spell (this spell may cost any amount of FP to cast, unlike normal spells). You can only restore FP lost to starvation, and any FP used to cast this spell will be treated as FP lost to starvation. You may cure starvation of subjects of your own race and any "similar" races (GM's call); e.g., a human can cure other humans but not dogs or plants. This spell cannot increase the subject's FP score above its normal maximum.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful lending. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only starvation, -20%; Heals Fatigue Only, +0%; Magical, -10%) [21].

Cure Wounds

Keywords: None.
Full Cost: 45 points.
Casting Roll: IQ for healing. Use DX or unarmed combat skills to hit.
Range: Touch.
Duration: Instantaneous.

When casting this spell, you must declare whether you are trying to heal a living subject or harm an undead subject. Thus, if you are somehow deceived by the appearance and try to heal an undead subject or harm a living subject, the spell fails.

On living subjects, this spell works identically to Minor Healing (*GURPS Thaumatology: Sorcery*, p. 17). However, it can affect *any* living creature, not only humans and similar races, and the caster cannot affect himself.

On undead subjects, this spell deals 1d injury regardless of DR and insubstantiality.

Statistics: Crushing Attack 1d (Accessibility, Only undead, -50%; Affects Insubstantial, +20%; Cosmic, Irresistible Attack, +300%; Melee Attack, Reach C, Cannot Parry, -35%; No Knockback, -10%; Sorcery, -15%) [16/5=4] + Healing (Cannot restore crippled limbs, -10%; Capped, 2 FP, -25%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Xenohealing, Anything Alive, +80%) [41]. *Notes:* The 4 HP of healing has been converted to dice per p. B269. These abilities are taken as alternative abilities.

Current

Keywords: Area (Special).
Full Cost: 69 points for level 1 + 61 points/additional level.
Casting Roll: IQ.

Range: Self.
Duration: Indefinite.

You can change the direction and speed of currents of any large body of water within the 0.1-mile-radius area around you. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by currents, relative to the prevailing conditions. This can help with rolls for Boating, Seamanship, Survival and anything the GM allows.

Statistics: Control Currents 1 (Natural Phenomenon, +100%; Sorcery, -15%) [28] + Control Currents +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [41]. Additional levels add Control Currents +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [61/level]. *Note:* As this is one advantage (Control Currents) with the Sorcery limitation, not two, it costs only 1 FP to use.

Curse

Keywords: Resisted (Will).
Full Cost: 55 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Permanent.

The subject gains the Cursed (p. B129) disadvantage. When anything goes wrong for the subject's party, it happens to the subject. If something goes right, it does not affect the subject. This can cover vital die rolls, enemy appearance, and other bad happenings. These harmful events may be not only inconvenient, but also *lethal*.

This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Cursed, +75%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [55].

Curse Magic

Keywords: Resisted (Will).
Full Cost: 46 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 1 day.

This spell curses the subject, making spells harmful to him. This grants him the Twisted Mana Generator disadvantage (*GURPS Thaumatology*, p. 61). This spell cannot be dispelled by Dispel Magic, but Remove Curse or an equivalent effect removes it.

Statistics: Affliction 1 (Will; Advantage, Twisted Mana Generator, +15%; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [46].

Curse Mana

Keywords: Area (Leveled).
Full Cost: 27 points for level 1 + 7.5 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

You temporarily curse mana in the area, creating a zone of twisted mana (*GURPS Thaumatology*, p. 60).

Statistics: Twisted Mana Generator (Area Effect, 2 yards, +50%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%) [27]. Additional levels add Area Effect (+50%) [+7.5].

Curse of Ale/Wine

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become tipsy for 1 minute (p. B428).

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%; Topsy, +10%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of Art/Music

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 28 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become vulnerable to sonic damage for 1 minute. Whenever a sonic attack hits the subject, the GM applies a special x2 wounding multiplier to damage that penetrates the DR. Regular wounding multipliers (for cutting, impaling, etc.) *further* multiply the damage.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Vulnerability (Sound, x2), +30%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [28]. Additional levels add more Area Effect (+50%) [+5].

Curse of Battle/Wrath

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 27 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster get a -2 penalty to ST for 1 minute. This reduces BL and damage. In addition, the victims lose Combat Reflexes, if they had this advantage in the first place.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Attribute Penalty, -2 to ST, +10%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Negated Advantage, Combat Reflexes, +15%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5].

Curse of Beauty/Love/Lust

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 29 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Lecherousness (p. B142) with no self-control roll for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Lecherousness, No self-control roll, +37%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [29]. Additional levels add more Area Effect (+50%) [+5].

Curse of Bravery/Valor

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Fearfulness 5 (p. B136) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Fearfulness 5, +10%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of Death

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Easy to Kill 5 (p. B134) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Easy to Kill 5, +10%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of Destruction

Keywords: Area (Leveled), Obvious.

Full Cost: 39 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, every unattended object within the area around the caster immediately takes 2d crushing damage, regardless of DR. This damage causes no knockback.

Statistics: Crushing Attack 2d (Accessibility, Only on unattended objects, -20%; Area Effect, 2 yards, +50%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; No Knockback, -10%; Sorcery, -15%) [39]. Additional levels add more Area Effect (+50%) [+5].

Curse of Disease

Keywords: Area (Leveled), Obvious, Resisted (Will).
Full Cost: 26 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Self.
Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Susceptible to Disease 2 (p. B158) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Susceptible to Disease 2, +8%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of Duty

Keywords: Area (Leveled), Obvious, Resisted (Will).
Full Cost: 27 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Self.
Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Indecisive (6) (p. B140) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Indecisive (6), +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5].

Curse of Envy

Keywords: Area (Leveled), Obvious, Resisted (Will).
Full Cost: 28 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Self.
Duration: One minute.

Curse of the Air/Sky/Wind

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 27 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster are buffeted by strong winds. Their Move in all mediums is reduced to 0.4x (to a minimum of 1), but only when they are moving towards the caster. This effect lasts for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Slower Move, 0.4x, Only when moving towards the caster, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Cities

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 28 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Demophobia (6) (p. B149) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Demophobia (6), +30%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [28]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Contracts/Oaths

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Compulsive Vowing (6) (p. B129) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Compulsive Vowing (6), +10%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Darkness

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 29 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster have their eyes clouded by a veil of darkness for 1 minute. This blinds them, unless they possess Infravision, Dark Vision, or Ultravision.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Blindness, +50%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Nuisance Effect, Only affects normal vision, -10%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [29]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Dreams

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 40 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster fall asleep for 1 minute (p. B428). After this, they can be woken normally, but they will not necessarily wake up right away, especially if already tired. Upon waking up, each subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sleep, +150%; Sorcery, -15%) [40]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Earth

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 28 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster have their Move in all mediums is reduced to 0.4x (to a minimum of 1). This effect lasts for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Slower Move, 0.4x, +30%; Sorcery, -15%) [28]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Fire

Keywords: Area (Leveled), Obvious.

Full Cost: 37 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, every cold-aspected creature (ice paraelementals, white dragons, frost giants, etc.) within the area around the caster immediately takes 2d crushing incendiary damage, regardless of DR. This damage causes no knockback.

Statistics: Crushing Attack 2d (Accessibility, Only on cold creatures, -50%; Area Effect, 2 yards, +50%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; Incendiary, +10%; No Knockback, -10%; Sorcery, -15%) [37]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Flying Creatures

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 29 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster loses its ability to fly for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Negated Advantage, Flight, +40%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [29]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Forge

Keywords: Area (Leveled), Obvious.

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, every metal creature or object within the area around the caster immediately takes 2d crushing damage, regardless of DR. This damage causes no knockback.

Statistics: Crushing Attack 2d (Accessibility, Only on metal creatures and objects, -30%; Area Effect, 2 yards, +50%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; No Knockback, -10%; Sorcery, -15%) [38]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Journeys

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 35 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Decreased Time Rate (p. B129) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Decreased Time Rate, +100%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [35]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Monsters

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 28 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become vulnerable to direct damage dealt by summoned creatures for 1 minute. Whenever such an attack hits the subject, the GM applies a special x2 wounding multiplier to damage that penetrates the DR. Regular wounding multipliers (for cutting, impaling, etc.) *further* multiply the damage.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Vulnerability (Summoned Creatures, x2), +30%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [28]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Moonlight

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Night Blindness (p. B144) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Night Blindness, +10%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Monuments

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a -1 penalty to DX for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Attribute Penalty, -1 to DX, +10%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Ocean/Sea/Water

Keywords: Area (Leveled), Obvious.

Full Cost: 37 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, every aquatic or water creature (water elementals, fish, etc.) within the area around the caster immediately takes 2d crushing incendiary damage, regardless of DR. This damage causes no knockback.

Statistics: Crushing Attack 2d (Accessibility, Only on aquatic and water creatures, -50%; Area Effect, 2 yards, +50%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; Incendiary, +10%; No Knockback, -10%; Sorcery, -15%) [37]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Secrets

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Easy to Read (p. B134) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Easy to Read, +10%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Sun

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain a -5 penalty to Vision rolls for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Negative Acute Vision 5, +10%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Weapons

Keywords: Area (Leveled), Obvious, Resisted (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster gain Bad Grip 2 (p. B123) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Bad Grip 2, +10%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [26]. Additional levels add more Area Effect (+50%) [+5].

Curse of the Weather

Keywords: Area (Leveled), Obvious, Resisted (Will).
Full Cost: 27 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Self.
Duration: One minute.

You channel divine energy through your body that appears as a dark flash. When this spell is cast, creatures within the area around the caster that were not excluded from this effect by the caster become more vulnerable to electricity, gaining Electrical (p. B134) for 1 minute.

Statistics: Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Electrical, +20%; Emanation, -20%; Fixed Duration, +0%; Malediction 1, +100%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add more Area Effect (+50%) [+5].

Curse-Missile: Clumsiness

Keywords: Missile, Obvious.
Full Cost: 15 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: 3 minutes.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the victim fails, he suffers temporary DX loss equal to his margin of failure (maximum -10). Lower all skills based on DX by a like amount. Secondary characteristics are not affected.

Statistics: Affliction 1 (HT; Attribute Penalty, DX-10, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [15].

Curse-Missile: Curse

Keywords: Missile, Obvious.
Full Cost: 40 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Permanent.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with Will + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails, he gains the Cursed (p. B129) disadvantage. When anything goes wrong for the subject's party, it happens to the subject. If something goes right, it does not affect the subject. This can cover vital die rolls, enemy appearance, and other bad happenings. These harmful events may be not only inconvenient, but also *lethal*.

This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Cursed, +75%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [40].

Curse-Missile: Frailty

Keywords: Missile, Obvious.
Full Cost: 10 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: 3 minutes.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the victim fails to resist, he suffers temporary HT loss equal to his margin of failure (maximum -10). Lower all skills based on HT by a like amount. Secondary characteristics are not affected.

Statistics: Affliction 1 (HT; Attribute Penalty, HT-10, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [10].

Curse-Missile: Hunger

Keywords: Missile, Obvious.

Full Cost: 6 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The victim takes 1d-2 fatigue damage, reduced by DR. Treat FP lost to the spell identically to FP lost to starvation (B426). Thus, the lost FP can only be recovered by eating a meal, but someone with Doesn't Eat or Drink is immune to this spell.

Statistics: Fatigue Attack 1d-2 (Increased 1/2D, 10x, +15%; Sorcery, -15%; Starvation, +40%) [6].

Curse-Missile: Itch

Keywords: Missile, Obvious.

Full Cost: 10 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 30 seconds.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. Should he fail, he will be at -2 to DX for 30 seconds. Scratching for one full second relieves the itch, but he can do nothing else while scratching; this requires a Do Nothing maneuver in combat.

Statistics: Affliction 1 (HT; Itching, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/6, -15%; Sorcery, -15%) [10].

Curse-Missile: Pain

Keywords: Missile, Obvious.

Full Cost: 10 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 1 second.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If he fails, he feels a stab of agonizing pain. He must make a Will roll to avoid crying out. If he is in a precarious position (climbing, for instance), he must make a DX roll to avoid catastrophe! He has a -4 penalty to all DX, IQ, skill, and self-control rolls for the next second only. High Pain Threshold halves these penalties; Low Pain Threshold doubles them.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/180, -40%; Severe Pain, +40%; Sorcery, -15%) [10].

Curse-Missile: Perfume

Keywords: Missile, Obvious.

Full Cost: 16 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.
Duration: 30 minutes.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If he fails, the subject begins to smell strongly of any odor that the caster desires. The subject can detect the odor, but does not find it especially offensive (although his companions certainly might), regardless of its nature. The smell may be pleasant to elicit a +1 to Reaction from those who like the smell, or repulsive, granting the subject a -2 to Reaction from everyone who can smell him.

Statistics: Affliction 1 (HT; Alternative Enhancements, +12%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [16]. *Note:* Alternative Enhancements are Advantage, Perfume, +10%, where "Perfume" is Perfume (Magical, -10%) [1] and Disadvantage, Bad Smell, +10%.

Curse-Missile: Retch

Keywords: Missile, Obvious.
Full Cost: 13 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: 9 seconds.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails, he loses his lunch, retching for 9 seconds (see *Incapacitating Conditions*, p. B428). After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/20, -25%; Retching, +50%; Sorcery, -15%) [13].

Curse-Missile: Spasm

Keywords: Missile, Obvious.
Full Cost: 12 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the orb hits a hand and the subject fails to resist, it causes the subject to drop whatever he is holding (usually a weapon). If the subject is in the middle of a lengthy spell requiring gestures, he must make a DX roll or start over. If it hits the leg or foot, the subject must roll against DX or fall.

Statistics: Affliction 1 (HT; Accessibility, Voluntary muscles only, -20%; Caster is allowed a DX roll to continue casting, -5%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No fatigue loss from Seizure, -20%; Seizure, +100%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [12].

Curse-Missile: Strike Anosmic

Keywords: Missile, Obvious.
Full Cost: 8 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: 9 seconds.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails, he temporarily loses his sense of smell and taste.

Statistics: Affliction 1 (HT; Disadvantage, No Sense of Taste/Smell, +5%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [8].

Curse-Missile: Strike Barren

Keywords: Missile, Obvious.

Full Cost: 35 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Permanent.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails, they become infertile, if they were capable of producing offspring. Used on a plant, this spell prevents it from ever bearing pollen, fruit, or seed. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Restoration (*GURPS Magic*, p. 93).

Statistics: Affliction 1 (HT; Advantage, Strike Barren, +50%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [35]. *Note:* "Strike Barren" is Fertility Control (Variant; Magical, -10%; Reduced Time 17, +340%) [5].

Curse-Missile: Strike Blind

Keywords: Missile, Obvious.

Full Cost: 13 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 9 seconds.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails to resist, he becomes temporarily blinded. See *Blindness*, p. B124, for a full description of the effects; the most important is that he is at -10 to attack anyone physically, and cannot see to target spells.

Statistics: Affliction 1 (HT; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [13].

Curse-Missile: Strike Deaf

Keywords: Missile, Obvious.

Full Cost: 10 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 9 seconds.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails to resist, he becomes temporarily deafened.

Statistics: Affliction 1 (HT; Disadvantage, Deafness, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [10].

Curse-Missile: Strike Dumb

Keywords: Missile, Obvious.

Full Cost: 9 points or 10 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 9 seconds.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails to resist, he temporarily loses its ability to speak. The basic (9-point) version of this spell makes the subject lose its ability to speak intelligently (the subject can still bark, growl, trill, etc.) The improved (10-point) version of this spell makes the subject completely mute and unable to make vocal sounds.

Statistics: Affliction 1 (HT; Disadvantage, Cannot Speak, +15%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [9]. The improved version improves Cannot Speak to Mute [+1].

Curse-Missile: Strike Numb

Keywords: Missile, Obvious.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 9 seconds.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The subject can resist with HT + DR of the location hit. DR with the Tough Skin limitation is ignored for this purpose. If the subject fails to resist, he temporarily loses his sense of touch as per the Numb disadvantage (p. B146). This also includes immunity to pain (the subject does not suffer shock penalties when injured; can withstand lesser physical discomfort without distraction; does not suffer pain penalties to DX, IQ, skills, and self-control; becomes immune to agony, knockdown, physical stunning, and torture).

If you wish, you can choose to affect only specific body parts instead of the whole subject. For example, you could affect only his left arm, or anything except his head.

Statistics: Affliction 1 (HT; Advantage, Numbness, +210%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/20, -25%; Selective Effect, +20%; Sorcery, -15%) [31]. *Note:* "Numbness" is Immunity to Pain (Magical, -10%; Temporary Disadvantage, Numb, -20%) [21].

Curse-Missile: Thirst

Keywords: Missile, Obvious.

Full Cost: 5 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster creates an orb of greenish light in his hand, then throws it at the subject. The victim takes 1d-2 fatigue damage, reduced by DR. Treat FP lost to the spell identically to FP lost to dehydration (p. B426). Thus, the lost FP can only be recovered after a day of rest with ample water supplies.

Statistics: Fatigue Attack 1d-2 (Dehydration, +20%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [5].

Cushion

Keywords: None.

Full Cost: 1 point/level.

Casting Roll: IQ

Range: Self.

Duration: Instantaneous.

This spell breaks a fall or softens a collision. When successfully cast at the moment of the impact, it grants the caster DR 1 per level of this spell against fall and collision damage. The velocity is not altered. Reduced damage will be suffered upon landing on a normal surface (spikes, etc. would still

do full damage). This DR counts as innate armor, i.e. is not considered flexible when calculating blunt trauma due to collisions and falls.

Statistics: Damage Resistance 1 (Force Field, +20%; Limited, Fall and Collision Damage, -80%; Requires IQ Roll, -10%; Sorcery, -15%) [1/level].

Cybermancy

Keywords: Information.

Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Cybermancy is divination using computer networks. The user is drawn to specific items of information on the net that hint at future events. Requires net access.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires net access, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Dactylomancy

Keywords: Information.

Full Cost: 35 or 85 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Dactylomancy is divination by movement of a pointer around a board with all the letters of the alphabet, plus Yes and No. Dactylomantic divinations are usually straightforward, but extremely unsubtle; a complex question (indeed, almost any question that cannot be answered in five words or less) is likely to produce cryptic gibberish.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (35-point) version of this spell requires 10 minutes to cast! The improved (85-point) version requires only the usual one or two seconds.

Statistics: Precognition (Accessibility, Only simple questions, -30%; Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a dactylomantic board, -10%) [35]. The improved version adds Reduced Time 10 (+200%) [+50].

Dancing Object

Keywords: None.

Full Cost: 21 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

Animates an object that will fly and do repetitive work on its own as if wielded by an invisible set of arms. It can accomplish roughly the same sorts of tasks as a man with ST equal to 4*(spell level): a bucket could carry water from a stream to a barrel, a broom could sweep a building over and over again,

a crossbow could cock itself, etc. The object's program cannot be changed or respond to events. The object has ST and Move equal to the 4*(spell level), and the caster's skills.

Statistics: Telekinesis 4 (Independent, +40%; One Task, Object's Function, -20%; Sorcery, -15%) [21]. Each additional level adds Telekinesis 4 [+21].

Dancing Shield

Keywords: Armor Buff.

Full Cost: 21 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

Animates a shield that will fly and fight on its own as if wielded by an invisible set of arms. The shield has ST and Move equal to the 4*(spell level), and the caster's Shield skill.

Statistics: Telekinesis 4 (Independent, +40%; One Task, Wielding Shields, -20%; Sorcery, -15%) [21]. Each additional level adds Telekinesis 4 [+21].

Dancing Weapon

Keywords: Weapon Buff.

Full Cost: 21 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

Animates a weapon that will fly and fight on its own as if wielded by an invisible set of arms. The weapon has ST and Move equal to the 4*(spell level), and the caster's weapon skills.

Statistics: Telekinesis 4 (Independent, +40%; One Task, Wielding Weapons, -20%; Sorcery, -15%) [21]. Each additional level adds Telekinesis 4 [+21].

Dark Road

Keywords: None.

Full Cost: 128 points.

Casting Roll: None.

Range: Touch.

Duration: 3d seconds.

This spell creates a temporary passage through earth, stone, or metal that is big enough for you to pass through, and has a depth of your Basic Move in yards.

Statistics: Permeation (Earth; Can Carry Objects, Heavy Encumbrance, +100%; Extended, Metal and Stone, +40%; Finite Thickness, Basic Move, -5%; Sorcery, -15%; Tunnel, Before, +100%) [128].

Dark Vision

Keywords: Buff.

Full Cost: 39 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell allows the subject to see even in pitch darkness, as if he had the Dark Vision advantage.

Statistics: Affliction 1 (HT; Advantage, Dark Vision, +230%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Note:* "Dark Vision" is Dark Vision (Magical, -10%) [23].

Dark Way

Keywords: Obvious.

Full Cost: 82 points for level 1 + 10 points/additional level (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell instantly brings into being a ribbonlike, weightless but unbreakable black bridge that acts as Utter Wall (*GURPS Sorcery: Protection and Warning Spells*, p. 14). The matte black strip of force is straight, 2 feet wide, an inch thick, has no side rails, and can be as long in yards as 9 yards x the spell level. Its length may be only inches, or it may stretch to the maximum allowed by the spell range—but the dark way must be created so that both ends are magically anchored to stationary, stable solid objects such as roofs, wall, or cliff-faces, not dirt slopes or tree branches. It may not bend, but can climb or dip if the caster desires. A dark way need not span a chasm, but can be created inches above the floor of a room (running from wall to wall) to allow its caster to take advantage of its other properties.

While on the dark way, the caster benefits from Perfect Balance (p. B74), is immune to knockback, and has his Lifting ST increased by 10.

By default, the dark way has DR 12 and HP 2. However, more potent versions are available that multiply DR, HP, and cost by the same amount:

DR	HP	Full Cost
12	2	82 points for level 1 + 10 points/additional level
24	4	136 points for level 1 + 20 points/additional level
36	6	190 points for level 1 + 30 points/additional level
60	10	298 points for level 1 + 50 points/additional level
120	20	568 points for level 1 + 100 points/additional level

Statistics: Crushing Attack 4d (Accessibility, Only a 2-foot-wide anchored horizontal plane, -50%; Affects Insubstantial, +20%; Area Effect, 2 yards, +50%; Cosmic, Interferes with spellcasting, +50%; Extended Duration, 30x, +60%; No Wounding, -50%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [54] + Immunity to Knockback (Environmental, Dark Way, -40%; Magical, -10%) [5] + Lifting ST 10 (Environmental, Dark Way, -40%; Magical, -10%) [15] + Perfect Balance (Environmental, Dark Way, -40%; Magical, -10%) [8]. Additional levels increase Area Effect (+50%) to the Crushing Attack [+10]. More powerful versions multiply dice and Full Cost by 2, 3, 5, or 10. If using KYOS, the spell costs 35 points more.

Darkness

Keywords: Area (Leveled).

Full Cost: 40 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with darkness. A person inside the area can see out normally, but can see nothing else within the area. Those outside the area can see only darkness within. Thus, attacks out of darkness suffer no penalty, but attacks into darkness are at a penalty; see p. B394 for combat rules. The Dark Vision advantage lets you see through a Darkness spell, but Night Vision, Infravision, and Ultravision do not. To place the area at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

The basic (40-point) version of this spell covers a two-yard radius. For each additional 10 points, you may double this radius; e.g., four yards for 50 points, 8 yards for 60 points, or 16 yards for 70 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 10 (Defensive, Limited, +20%; Extended, Infravision and Ultravision, +40%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [40]. Further levels add Area Effect (+50%) to the advantage [+10].

Daybook Reading

Keywords: Information.

Full Cost: 40 or 90 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Daybook Reading determines if a day is lucky or unlucky for a specific event or enterprise. A Daybook is required; a diviner casting from memory is at -8 to skill. A good copy costs \$50 and weighs 5 lbs. in settings with primitive printing presses. Entirely handwritten copies weigh twice as much and cost \$500 or more. A TL 8 copy costs \$20 and weighs one pound. The subject's daysign must be known or else the casting is at a -8.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (40-point) version of this spell requires 10 minutes to cast! The improved (90-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, Only when daysign is known, +30%; Requires a daybook, -10%) [40]. The improved version adds Reduced Time 10 (+200%) [+50].

Daze

Keywords: Resisted (Will).

Full Cost: 32 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

You daze a sapient creature for 3 minutes. If the subject is standing, it remains upright, but can do nothing. If the subject is struck, slapped, or shaken, it recovers on its next turn. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Daze, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [32].

Dazzling Weapon

Keywords: Weapon Buff.

Full Cost: 36 points or 76 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell enchants a weapon, converting its damaging attack to Obscure (p. B40) directed at vision. A melee weapon becomes a shaft of brilliance, affecting a two-yard radius or a radius equal to its Reach, whichever is larger; this effect is centered on the wielder. A projectile fills a two-yard radius with glare where it hits, which lasts 10 seconds.

Roll your usual damage dice and halve the result (round down). Read this as the Vision penalty, to a maximum of -10. No actual damage occurs.

The basic (36-point) version penalizes the wielder's Vision as well. The improved (76-point) version does not affect the wielder.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Dazzling Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* “Dazzling Weapon” is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). The improved removes a -5 penalty [+40]. This spell is based on the Dazzling Display imbuelement skill.

Deadly Performance

Keywords: Area (Leveled), Baneful Song, Resistible (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: Instantaneous.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. Roll a Quick Contest of Will vs. Will plus any Magic Resistance the subject has. This is a mind control effect, so anyone with Immunity to Mind Control is immune to the effects of this song, and this spell can only affect sapient beings. The bard can play constantly, causing a roll every turn. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

A roll to resist failed by less than 5 mentally stuns the target, allowing them to roll again once per second to recover. If the victim fails by 5 or more, or rolls a critical failure, they immediately die from joy or sorrow. If a victim successfully resists, they cannot be affected by Deadly Performance for 24 hours.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Baneful Song, +105%; Costs Fatigue, 1 FP, -5%; Increased Immunity 3, -30%; No Signature, +20%; Secondary Disadvantage, Fragile (Enhanced Unnatural), +20%; Secondary Heart Attack, +60%) [26]. Additional levels add Area Effect (+50%) [+5]. *Notes:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target’s HP to 0, the target dies.

Deafening Weapon

Keywords: Weapon Buff.

Full Cost: 36 points or 76 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell enchants a weapon, converting its damaging attack to Obscure (p. B40) directed at hearing. A melee weapon hums, affecting a two-yard radius or a radius equal to its Reach, whichever is larger; this effect is centered on the wielder. A projectile fills a two-yard radius with humming where it hits, which lasts 10 seconds.

Roll your usual damage dice and halve the result (round down). Read this as the Hearing penalty, to a maximum of -10. No actual damage occurs.

The basic (36-point) version penalizes the wielder’s Hearing as well. The improved (76-point) version does not affect the wielder.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Deafening Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* “Deafening Weapon” is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). The improved removes a -5 penalty [+40]. This spell is based on the Deafening Display imbuelement skill.

Death

Keywords: Resisted (HT).

Full Cost: 56 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

This spell makes the subject suffer a heart attack (p. B429).

Statistics: Affliction 1 (HT; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [56].

Death Blossom

Keywords: Area (Leveled).
Full Cost: 15 points for level 1 + 5 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous.

You launch a large stone in the air that explodes one second later, raining stones down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone in the area is attacked with an effective skill of 14, modified only for their SM. Anyone hit takes 2d crushing damage. If the victims know what this spell does, they may raise their shields as cover during the delay, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected.

Statistics: Crushing Attack 2d (Area Effect, 2 yards, +50%; Bombardment, Skill-14, -5%; Delay, 1 second, +0%; Environmental, Outdoors, -20%; Overhead, +30%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [15]. Additional levels add more Area Effect (+50%) [+5/level].

Death Field

Keywords: Area (Leveled), Resisted (HT).
Full Cost: 18.5 points/level*.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

All victims in the area who fail the HT roll to resist take 1d crushing damage per level of this spell, ignoring DR. This damage does not cause knockback. This spell *does* affect the undead.

Statistics: Crushing Attack 1d (Area Effect, 4 yards, +100%; Based on HT, +20%; Malediction 2, +150%; No Knockback, -10%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [18.5/level*].

* Calculate the total cost, then round up.

Death Knell

Keywords: Area (Leveled), Resisted (HT).
Full Cost: 23 points for level 1 + 6 points/additional level.
Casting Roll: Will.
Range: Self.
Duration: Instantaneous.

With an audible knell, the caster damages already dying creatures. All creatures at -1xHP or lower take 3d toxic damage, ignoring DR. Damage can be resisted with a Quick Contest of caster's Will against the subject's HT.

Statistics: Toxic Attack 3d (Accessibility, Creatures at -1xHP or lower, -80%; Area Effect, 2 yards, +50%; Emanation, -20%; Malediction 2, +150%; Sorcery, -15%; Variable, Area, +5%) [23]. Further levels add Area Effect (+50%) to the advantage [+6].

Death Link

Keywords: Resisted (Will).
Full Cost: 90 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Five hours.

This spell connects the caster with a target creature in such a way that damage, healing, and other effects to one also affected the other. Whenever one party benefits from any positive supernatural effect (healing spell, temporary attribute bonus, and so on), the other is also affected. If the caster is stunned, knocked out, mind-controlled, etc., the connected creature is similarly affected. The reverse is also true. Should one of the linked creatures die, the other must make an HT roll. Success at the HT roll means they're still conscious, but they suffer the effects of a Mortal Wound (p. B423). Critical success means you suffer no ill effects.

Statistics: Affliction 1 (Will; Advantage, Death Link, +180%; Based on Will, +20%; Disadvantage, Death Link, +10%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [56] + Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Death Link, +180%; Disadvantage, Death Link, +10%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Link, +10%; Magical, -10%; No Signature, +20%) [34]. *Notes:* "Death Link" is Death Link (Magical, -10%) [18]. The base price of 10 points was derived from the Ally advantage, assuming the most expensive variant (built on 150% points, constantly available). Adding Cosmic, Shared Effects, +50% would translate into 20 points for the virtual Ally advantage. Disadvantage, Death Link, +10% was priced in a similar way, but with the Sympathy, Resistible Death, -25% limitation that translates into a -10-point disadvantage.

Death Ray

Keywords: Missile, Obvious.
Full Cost: 16 points/level.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 50 yards.
Duration: Instantaneous.

You fire particle beam that does 1d(5) burning surge damage per level. The spell strikes all targets in a 50-yard line. On a hit, the line is on target; otherwise, use the *Scatter* rule (see p. B414) to determine a new target point. Once you know the target point, imagine (or trace on a battle map) a line between the attacker and that point. This attack has no 1/2D.

Statistics: Burning Attack 1d (Armor Divisor, (5), +150%; Cone 1, +60%; Increased 1/2D, x10, +15%; Reduced Range, 1/2, -10%; Sorcery, -15%; Surge, +20%) [16/level].

Death Vision

Keywords: Resisted (Will).
Full Cost: 33 points for level 1 + 11 points/additional level.
Casting Roll: Will.
Range: 10 yards.
Duration: Instantaneous.

The subject sees a vivid apparition of his own death. This might be a vision of the future or a false vision from another possible future – but it is always chilling. You can target any creature within 10 yards. Roll a Quick Contest of Will with your subject. If you win, roll 3d for the result, as usual, but add your margin of victory instead of his margin of failure. Your victim gets +1 per Fright Check after the first within 24 hours. If a victim succeeds at his Fright Check, he will be unaffected by your Death Vision for one hour. Each additional level of this spell imposes -1 to the Fright Check. For example, with Death Vision 4, the subjects must make Fright Checks at -3.

This spell can also be useful to the subject, by pointing out a possibly deadly hazard.

Statistics: Terror (Active, +0%; Presence, +25%; Sorcery, -15%) [33]. Additional levels add -1 to the Fright Check [+11].

Death Ward

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject becomes immune to death curses. This includes death spells, direct-damage Necromantic magic (Burning Death, Rotting Death, etc.), and elixirs of Death (*GURPS Magic*, p. 215), plus non-magical equivalents such as Afflictions enhanced with Coma or Heart Attack, when they're chi, divine, psionic, or spirit abilities, or something similar.

Statistics: Affliction 1 (HT; Advantage, Death Ward, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Death Ward" is Immunity to Death Curses (Magical, -10%) [9].

Death's Banquet

Keywords: Buff.

Full Cost: 81 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

Introduces a deadly physical poison into food. This poison remains indefinitely, but can be detected by Test Food. Anyone eating the poisoned food must make a HT roll. On a failed roll, he is seized by painful stomach cramps, taking 8d toxic damage; he is at -3 to DX and IQ for 1 hour. The poison is not magical, Magic Resistance does not help.

Statistics: Affliction 1 (HT; Accessibility, Can only be cast into food, -30%; Advantage, Death's Banquet, +570%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [81]. *Note:* "Death's Banquet" is Affliction 1 (HT; Aura, +80%; Attribute Penalty, DX-3, IQ-3, +60%; Blood Agent, -40%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Link, +10%; Melee Attack, Reach C, -30%; No Signature, +20%) [28] + Toxic Attack 8d (Aura, +80%; Blood Agent, -40%; Link, +10%; Melee Attack, Reach C, -30%; Resistible, HT, -30%) [29].

Deathtouch

Keywords: Resisted (HT).

Full Cost: 9 points/level.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

The caster must touch the subject to trigger this spell. Armor does not protect. If the subject fails his HT roll to resist, he takes 1d crushing damage per level of this spell. This damage does not cause knockback. This spell *does* affect the undead.

Statistics: Crushing Attack 1d (Based on HT, +20%; Melee Attack, Reach C, Cannot Parry -35%; Malediction 1, +100%; No Knockback, -10%; No Signature, +20%; Sorcery, -15%) [9/level].

Debility

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim suffers temporary ST loss equal to your margin of victory (maximum -10). Lower all skills based on ST by a like amount. ST penalties also reduce BL and damage. HP is not otherwise affected.

Statistics: Affliction 1 (HT; Attribute Penalty, ST-10, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [26].

Decapitation

Keywords: Buff.

Full Cost: 82 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent until reattached.

The subject's head comes off! When this spell is cast, the subject's head (or one of them, if the subject has several) comes free of its body, but continues to live on its own. The subject is not harmed, but the head takes falling damage if it is not carefully removed or caught! The head can talk, see, and control the actions of its body normally. If the head is somehow blinded (put in a bag, for instance), then it will have trouble telling its body where to walk.

The head has your DX and HT, HP/2, and Move and Dodge 0. It can bite at full ST in close combat. If the head is the subject's seat of consciousness, his body fights as its ally. If it isn't (for instance, if the subject has No Brain), it fights as an ally of his body.

The head may be reattached to the body by holding them in place for a second. Reattaching the head ends the spell.

Should the body die, the head lives on!

Statistics: Affliction 1 (HT; Advantage, Decapitation, +550%; Extended Duration, Permanent, Until reattached, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [82]. *Note:* "Decapitation" is Injury Tolerance (Independent Body Parts; Cosmic, Voluntary, +50%; Detachable Head, +15%; Instant Reattachment, +50%; Magical, -10%; Partial, Head Only, -50%) [55].

Decay

Keywords: None.

Full Cost: 20 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell allows you to make food rot away immediately. To make food rot, you must touch it, take a Concentrate maneuver, and pay 1 FP. Then make an IQ roll. Success means the target rots away. It can be saved if a Counterspell is cast, or Purify Food is cast, within a minute.

You can make all food in an area up to one yard in radius per level of this spell rot away.

Statistics: Create Food (Can be saved, -10%; Destruction Only, +0%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [20/level].

Decrease Potency

Keywords: Area (Fixed).

Full Cost: 21 points for level 1 + 13.5 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Five minutes.

You can make poisons less potent. It can be cast on a poisoned creature, venomous creature, a container of poison, or an area of poison. If cast on a liquid or gaseous poison, it only affects one hex.

This spell makes the affected poison easier to resist – add +1 to HT of all creatures resisting it per level of this spell.

Statistics: Control Poison 1 (Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 30x, +60%; Only to decrease potency, -75%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [21]. Additional levels add Control Poison +1 (Cannot concentrate to extend duration, -10%; Does not increase area, -50%; Extended Duration on Persistent, 30x, +60%; Only to decrease potency, -75%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [13.5/level]. *Note:* As this is one advantage (Control Poison) with the Sorcery limitation, not two, it costs only 1 FP to use.

Decrepify

Keywords: Resisted (HT).

Full Cost: 40 points/level.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

The caster must touch the subject to cast this spell. The living subject permanently ages 1d years per level of this spell.

Statistics: [Ageing Attack 1d](#) (Accessibility, Only on living beings, -10%; Based on HT, +20%; Melee Attack, Reach C, Cannot Parry, -35%; Malediction 1, +100%; Sorcery, -15%) [40/level].

Defending Shield

Keywords: Armor Buff.

Full Cost: 15 points for level 1 + 4.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject shield permits its wielder to block more skillfully; each level of enchantment will give the wielder a +1 to Block, up to a maximum of +3.

Statistics: Affliction 1 (HT; Accessibility, Only on shields, -30%; Advantage, Defending Shield, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [14]. Each additional level adds further Defending Shield to the Advantage enhancement [+4.5]. *Note:* “Defending Shield” is Enhanced Block 1 (This shield only; Magical, -10%) [4.5].

* Calculate the total cost and round *down*.

Defending Weapon

Keywords: Weapon Buff.

Full Cost: 15 points for level 1 + 4.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject weapon permits its wielder to parry more skillfully; each level of enchantment will give the wielder a +1 to Parry, up to a maximum of +3.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Defending Weapon, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Each additional level adds further Defending Weapon to the Advantage enhancement [+4.5]. *Note:* “Defending Weapon” is Enhanced Parry 1 (This weapon only; Magical, -10%) [4.5].

* Calculate the total cost and round *down*.

Defenestrating Sphere

Keywords: Missile, Obvious.

Full Cost: 15 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You launch a sphere of compressed air at the target. It does 4d knockback damage per level of this spell, causing no injury or blunt trauma. However, the knockback is always directed towards the closest window! If there is no windows available, then the target is knocked back normally. This spell has no 1/2D range.

Statistics: Crushing Attack 2d (Cosmic, Knockback directed towards the closest window, +100%; Double Knockback, +20%; Increased 1/2D, 10x, +15%; No Blunt Trauma, -20%; No Wounding, -50%; Sorcery, -15%) [15/level].

Deflect

Keywords: Armor Buff.
Full Cost: 37 points for level 1 + 27 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

Adds a Defense Bonus to armor, clothing, or a shield. This adds to all active defense rolls made by the user; each level of enchantment will give the wearer a +1 to active defenses, up to a maximum of +3.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Deflect 1, +270%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [37]. Each level adds additional Deflect to the Advantage enhancement (+270%) [+27]. *Note:* Each level of "Deflect" is Defense Bonus 1 (Magical, -10%) [27].

Deflect Missile

Keywords: None.
Full Cost: 12.25 points/level.
Casting Roll: IQ/2 + 3
Range: Self.
Duration: Instantaneous.

While this spell is active, the caster can turn aside incoming missiles. When the caster is targeted by a ranged attack, they may roll to cast this spell as an active defense. If the spell succeeds, and if the attack's basic damage is less than (Deflect Missile level) x 2 dice, the attack automatically misses. Convert all flat damage to dice (as per p. B269) for this determination. The GM should conceal the existence of this spell from the subject's foes for as long as possible, saying that they just missed!

This spell protects against all types of damaging ranged attacks, from thrown weapons to energy-beam spells. It also deflects non-damaging ranged attacks; each level of Deflect Missile can negate two levels of Affliction or 10 levels of Binding. Against most area effects and explosions, it stops only the fragmentation damage (shrapnel), not the explosion itself.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Deflect Missile, they cannot cast this spell until *all* FP are replenished.

Statistics: Damage Resistance 7 (Active Defense, -40%; All-or-Nothing, -10%; Force Field, +20%; Limited, Ranged, -20%; Sorcery, -15%) [12.25/level] with each DR 7 converted into 2d per p. B269. The ruling on Affliction and Binding is from p. 168 of *GURPS Powers*.

Dehydrate

Keywords: Resisted (HT).
Full Cost: 30 points.
Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

If the victim fails to resist, he takes 1d fatigue damage, as water is being removed from the tissues of his body. Treat FP lost to the spell identically to FP lost to dehydration (p. B426). Thus, the lost FP can only be recovered after a day of rest with ample water supplies.

Statistics: Fatigue Attack 1d (Based on HT, +20%; Dehydration, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30].

Deja Vu

Keywords: Resisted (Will).

Full Cost: 43 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: One second.

This spell creates a compulsion in the subject's mind that causes it to repeat this turn's action in the next second. If the subject attacked, it attacks the same person in the same exact way, if possible. If it drank a potion, it drinks from the same bottle again (if the bottle is empty, it tries to drink another instance of this potion). Even if something happens to prevent this attempt (the opponent is dead, or someone takes the bottle away), the subject still strives to repeat its last action.

You can only affect a subject you can see or touch. If you lose, you cannot attempt to control that subject again for 24 hours, and it feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Only to repeat actions, -30%; Fixed Duration, +0%; Independent, +70%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [43].

Delay Damage

Keywords: Weapon Buff.

Full Cost: 36 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell gives the weapon a type of Delay enhancement (p. B105). Resolve the weapon attack normally and work out what injury or other baneful effects your victim *would* suffer, given the damage roll, DR, damage type, etc. But don't apply these when the wielder deals the blow! Instead, they happen on the wielder's command, at any future point and from any distance. This pending effect can be neutralized with the Remove Curse spell or a similar effect. The wielder can always cancel the pending effect permanently at any time, from any distance, *instead* of activating it. The pending effect *does not* expire when the spell expires.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Delay Damage, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Delay Damage" is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11). This spell is based on the Sudden Death imbuelement skill.

Delay Image

Keywords: Buff.

Full Cost: 61 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 9 seconds.

The subject is surrounded by a thin magical aura that bends time slightly, causing the person's image to appear half a second behind actual motion. This gives him +1 to all active defenses, and the subject's opponents defend against the subject's attacks at a -1 penalty.

Statistics: Affliction 1 (HT; Advantage, Delay Image, +510%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [61]. *Note:* "Delay Image" is Defense Bonus 1* (Magical, -10%) [27] + DX+2 (Only for Deceptive Attacks, Always On, -30%; Magical, -10%) [24].

* A meta-trait from *GURPS Supers*.

Delayed Blast Fireball

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 10 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Until discharged.

You throw a tiny ball of fire that stays in the point of impact for some time, and then expands to cover an area; it is not technically an explosion, but the term has long since entered common use. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area.

When casting the spell, you must set a delay – from "no delay" to seconds, minutes, hours, and even days. When the set time passes, everyone within four yards of the impact point takes dice of burning damage equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid dropping this at your own feet, where it detonates later!

Statistics: Burning Attack (Area Effect, 4 yards, +100%; Delay, Variable, Long, +20%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [10/level].

Delayed Damage

Keywords: None.

Full Cost: 60 points.

Casting Roll: IQ.

Range: Self.

Duration: 2d seconds.

This spell creates a field of temporal flux about the caster. This field intercepts attacks and shifts all of the effects into the future, allowing the caster time to prepare. If the attack does damage, the caster does not receive any, but when the spell ends, all accumulated damage is applied at once. If the attack produces a different non-beneficial effect (Affliction, for example), this effect is also delayed until the spell ends. If the effect has a duration, it does not start until it actually starts affecting the caster.

This spell gives the caster time to prepare for the delayed effects, and delays the need for healing. But the caster should be cautious, because the spell can end at any time. The GM rolls the duration in secret. When the spell runs out, the caster cannot cast it again for 5 minutes.

Statistics: Control Time 1 (Accessibility, Self Only, -50%; Accessibility, Only to delay damage and other effects, -35%; Cannot concentrate to extend duration, -10%; Nuisance Effect, Cannot cast again for 5 minutes, -10%; Persistent, +40%; Sorcery, -15%) [6] + Control Time 9 (Accessibility, Self Only, -50%; Accessibility, Only to delay damage and other effects, -35%; Cannot concentrate to extend duration, -10%; Does not increase area, -50%; Nuisance Effect, Cannot cast again for 5 minutes, -10%; Persistent, +40%; Sorcery, -15%) [54].

Demagnetize

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.
Range: Unlimited.
Duration: One minute.

The target, who may be an object or a creature, cannot be affected by magnetism for the duration of this spell.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; Negated Disadvantage, Affected by Magnetism, +10%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [26].

Demand Offering

Keywords: Resisted (Will).
Full Cost: 38 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: 1 second.

The subject is compelled to hand you whatever object it's currently wielding or holding. You must be able to see or touch the subject to cast this spell. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550).

If the subject resists successfully, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Only to force to give an item the subject is holding, -40%; Fixed Duration, +0%; Independent, +70%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [38].

Despoil Seed

Keywords: Resisted (HT).
Full Cost: 27 points.
Casting Roll: Will. Use DX or unarmed combat skills to hit.
Range: Touch.
Duration: Permanent until birth.

This abhorrent spell can only be cast on a woman at least five months pregnant. The caster must touch the victim's belly to cast this spell. After the usual time, the victim gives birth to the animal chosen when the spell was cast. The creature is born almost mature, but smaller than a natural specimen. Its facial features are subtly distorted to resemble those of the "father." It comes to its senses an hour after birth and begins acting like a natural animal, with a child's affection for its mother.

Statistics: Affliction 1 (HT; Accessibility, Only on pregnant women, -80%; Disadvantage, Divine Curse (Animal Progeny), +30%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [27].

Destabilization

Keywords: Resisted (HT).
Full Cost: 54 points/level.
Casting Roll: IQ.
Range: Unlimited.
Duration: Instantaneous.

This spell instantly and irrevocably destabilizes a living being. If the subject fails to resist, roll 4d per level of this spell and assess that many HP of injury. Should this harm equal or exceed the victim's (HP score * 6), it's immediately fatal regardless of HT or advantages. If it's not enough to kill the victim, the victim still takes this much damage, ignoring DR. Someone slain by Destabilization explodes, doing [1d] cutting fragmentation damage (pp. B414-415). The GM may make this damage crushing for soft

creatures, corrosion for acid slimes, and so on. Possessions fall to the ground, but roll 1d for clothing or armor. A result greater than the item's DR means it's shredded (destroyed).

A critical failure with this spell costs *the caster* 1 HT permanently!

Statistics: Crushing Attack 4d (Accessibility, Only on living creatures, -10%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Fragmentation [1d] on death, +15%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Critical Failure, -30%; Sorcery, -15%) [54/level].

Destabilize Magic

Keywords: Resisted (Will).

Full Cost: 123 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Three minutes.

This spell destabilizes the subject's magical abilities, granting him the Wild Mana Generator advantage (*GURPS Thaumatology*, p. 61).

Statistics: Affliction 1 (Will; Advantage, Destabilize Magic, +950%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [123]. *Notes:* "Destabilize Magic" is Wild Mana Generator (Magical, -5%) [95]. Magical costs -5% in this case, because the advantage relies on ambient mana by default – if there is no ambient mana, there is nothing to destabilize.

Destabilize Mana

Keywords: Area (Leveled).

Full Cost: 180 points for level 1 + 50 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You temporarily destabilize mana in the area, creating a zone of wild mana (*GURPS Thaumatology*, p. 59).

Statistics: Wild Mana Generator (Area Effect, 2 yards, +50%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%) [180]. Additional levels add Area Effect (+50%) [+50].

Destroy Air

Keywords: None.

Full Cost: 5.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell allows you to destroy air. To destroy air, you must stand amidst it, take a Concentrate maneuver, and pay 1 FP. Then make an IQ roll. Success means the target is gone. This spell only affects inanimate objects.

You can destroy all air in an area up to one yard in radius per level of this spell.

Statistics: Create Air (Destruction Only, +0%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost and round up.

Destroy Earth

Keywords: None.

Full Cost: 22 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell allows you to destroy earth (including stone, sand, mud, and dust). To destroy earth, you must touch it, take a Concentrate maneuver, and pay 1 FP. Then make an IQ roll. Success means the target is gone. This spell only affects inanimate objects.

The destroyed earth can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create Earth (Destruction Only, +0%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [22/level].

Destroy Water

Keywords: None.

Full Cost: 5.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell allows you to destroy water (including ice and steam). To destroy water, you must touch it (or stand amidst it, for liquid water), take a Concentrate maneuver, and pay 1 FP. Then make an IQ roll. Success means the target is gone. This spell only affects inanimate objects.

The destroyed water can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create Water (Destruction Only, +0%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [5.5/level*].

* Calculate the total cost and round up.

Detect Banestorm

Keywords: Information.

Full Cost: 6 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a long-distance (p. B421) penalty based on the distance to the nearest banestorm. If successful, this spell confirms or denies any current banestorm activity within the range, specified by the caster.

Any known sources of magic may be excluded if the caster mentions them before casting.

Statistics: Detect Banestorm (Long-Range 1, +50%; Selective Effect, +20%; Sorcery, -15%; Vague, -50%) [6].

Detect Curse

Keywords: Information.

Full Cost: 7 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the subject (person, object, or area) is under the effects of a curse. Curses are supernatural negative effects that cannot be removed via Dispel Magic or an equivalent of a different power source, and require a specific spell or ability (Remove Curse, Stone to Flesh, etc.) to dispel. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the curse in question, this will reveal them. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Curse; Sorcery, -15%; Touch- or Vision-Based, -15%) [7].

Detect Golems

Keywords: Information.

Full Cost: 4 or 9 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby golems, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest golem, and inform you if you succeed.

The improved (9-point) version of this spell works as above, except that you know the precise location of each golem. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Golems; Cannot Analyze, -10%; Sorcery, -15%) [4]. The improved version adds Precise (+100%) [+5].

Detect Incarnum

Keywords: Information.

Full Cost: 7 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the subject (person, object, or area) is infused with Incarnum; meldshapers and totemists count. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the soulmelds in question, this will reveal them. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Incarnum; Sorcery, -15%; Touch- or Vision-Based, -15%) [7].

Detect Mindscape

Keywords: Information.

Full Cost: 5 or 10 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

With the basic (5-point) version of this spell, you can immediately sense all nearby minds that have a mindscape (they have the Psi Realm ability, know the Create Mindscape spell, etc.), sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate being, and inform you if you succeed.

If you do succeed, you may immediately make a follow-up IQ roll (plus Talent) to analyze what you're detecting. If successful, the GM will give you details for each mindscape based on your margin of success (e.g., success by 0-1 might just give "mindscape with two projecting minds," while success by 4-5 could be "a village-sized mindscape with seven minds inside"). Any level of success here allows you to weed out "false positives" from known mindscapes.

The improved (10-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Mindscape; Sorcery, -15%) [5]. The improved version adds Precise (+100%) [+5].

Detect Plant Sapience

Keywords: Information.

Full Cost: 1 point.

Casting Roll: IQ+4. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Instantaneous.

With a touch and an IQ+4 roll, you can determine if a plant is sapient. This includes any tree that is currently the subject of Arboreal Immurement.

Statistics: Detect Plant Sapience (Sorcery, -15%) [1].

Detect Psi

Keywords: Information.

Full Cost: 7 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the subject (person, object, or area) is under the effects of psionics; psionic items definitely count. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the psionic abilities in question, this will reveal them. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Psionics; Sorcery, -15%; Touch- or Vision-Based, -15%) [7].

Detect Psychic Significance

Keywords: Information.

Full Cost: 4 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the subject (object or area) has significant psychic imprints or histories that can be read by the Psychometry advantage or similar abilities. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch.

Statistics: Detect (Psychic Significance; Sorcery, -15%; Touch- or Vision-Based, -15%; Vague, -50%) [4].

Detect Raw Magic

Keywords: Information.

Full Cost: 4 or 9 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby sources of raw magic (*GURPS Thaumatology*, pp. 227-229), sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest source of raw magic, and inform you if you succeed.

The improved (9-point) version of this spell works as above, except that you know the precise location of each source of raw magic. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Raw Magic; Cannot Analyze, -10%; Sorcery, -15%) [4]. The improved version adds Precise (+100%) [+5]. *Note:* This spell originally appeared in *GURPS Thaumatology*.

Detect Scrying

Keywords: Information.

Full Cost: 4 or 9 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby scrying or remote sensors, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest sensor, and inform you if you succeed. This will detect the presence of a scrying effect and will tell you the direction to the point from which the scryer is viewing you.

The improved (9-point) version of this spell works as above, except that you know the precise location of each scrying or remote sensor. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Remote Viewing; Cannot Analyze, -10%; Sorcery, -15%) [4]. The improved version adds Precise (+100%) [+5].

Detect Snares and Pits

Keywords: Information.

Full Cost: 4 or 9 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby primitive traps, such as snares, tripwires, and camouflaged pits, sorted by the direction to each one. It won't detect anything more complex. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest trap, and inform you if you succeed.

The improved (9-point) version of this spell works as above, except that you know the precise location of each trap. This allows you to cast spells on any of them for as long as each remains in that location.

Statistics: Detect (Primitive Traps; Cannot Analyze, -10%; Sorcery, -15%) [4]. The improved version adds Precise (+100%) [+5].

Detect Temporal Anomaly

Keywords: Information.

Full Cost: 4 or 9 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby temporal anomalies, such as objects in stasis, temporal gates, creatures under effects of Great Haste, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest temporal anomaly, and inform you if you succeed.

The improved (9-point) version of this spell works as above, except that you know the precise location of each temporal anomaly. This allows you to cast spells on any of them for as long as each remains in that location.

Statistics: Detect (Temporal Anomalies; Cannot Analyze, -10%; Sorcery, -15%) [4]. The improved version adds Precise (+100%) [+5].

Detect Undead

Keywords: Information.
Full Cost: 4 or 9 points.
Casting Roll: Per.
Range: Unlimited.
Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby undead creatures, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest undead creature, and inform you if you succeed.

The improved (9-point) version of this spell works as above, except that you know the precise location of each undead creature. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Undead; Cannot Analyze, -10%; Sorcery, -15%) [4]. The improved version adds Precise (+100%) [+5].

Devil's Dust

Keywords: Area (Leveled).
Full Cost: 15 points for level 1 + 2 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 5 seconds.

You may fill an area with a cloud of magically allergenic pollen. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. The cloud doesn't persist for long enough for displacement or dissipation by wind to become an issue.

Living beings in the area must roll vs. HT every second to avoid 1d toxic injury; DR has no effect. After losing 1/3 of their HP this way, victims get a -2 penalty to DX until the injury is healed above that threshold. This is a contact agent; it needn't be inhaled to be harmful. Thus, Doesn't Breathe, Filter Lungs, and breath-holding are ineffective! Resistant and Immunity to Poison don't help against Devil's Dust. Resistant to Metabolic Hazards does add its bonus to resist, and Immunity to Metabolic Hazards or Sealed grants immunity.

The basic (15-point) version of this spell covers a two-yard radius. For each additional 2 points, you may double this radius; e.g., four yards for 17 points, 8 yards for 19 points, or 16 yards for 21 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Toxic Attack 1d (HT; Area Effect, 2 yards, +50%; Contact Agent, +150%; Fixed Duration, +0%; Persistent, +40%; Reduced Duration, ½, -5%; Resistible, HT, -30%; Sorcery, -15%; Symptoms, 1/3 HP, -2 to DX, +60%; Variable, Area, +5%) [15]. Further levels add Area Effect (+50%) to the advantage [+2].

Devitalize Air

Keywords: Area (Leveled).
Full Cost: 14 points for level 1 + 2 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Permanent or until living air diffuses back into the affected area.

You may remove the life-sustaining essence from a two-yard-radius area of air. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Every subject that inhales the devitalized air, takes 1d-2 fatigue damage. Treat this damage as coming from suffocation (see *Suffocation*, p. 436).

The spell lasts until living air diffuses back into the affected area. This takes 1 minute per yard of radius in an unventilated area, or as little as 10 seconds on a windy day outdoors. In an airtight room, the air stays devitalized indefinitely! Purify Air reverses this spell's effects.

The basic (14-point) version of this spell covers a two-yard radius. For each additional 2 points, you may double this radius; e.g., four yards for 16 points, 8 yards for 18 points, or 16 yards for 20 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Fatigue Attack 1d-2 (Area Effect, 2 yards, +50%; Drifting, +20%; Extended Duration on Persistent, Permanent, Dissipating, +100%; Persistent, +40%; Respiratory Agent, +50%; Sorcery, -15%; Suffocation, +0%; Variable, Area, +5%) [14]. Further levels add Area Effect (+50%) to the advantage [+2].

Dexterous Arm

Keywords: Buff.

Full Cost: 23 points for level 1 + 11 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

You make one of the subject's arms more dexterous compared to the rest of their body. This increases the DX of one arm chosen at the time of casting by the caster by 1 per level of this spell (up to the maximum of 4). Note that this increase does not affect tasks that require bodily DX (combat included), and tasks that require arms of varied DX levels. A subject cannot benefit from two different instances of Dexterous Arm at the same time, the last casting overrides all previous ones.

Statistics: Affliction 1 (HT; Advantage, Dexterous Arm 1, +110%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. Additional levels add further Dexterous Arm to the Advantage enhancement (+110%) [+11]. *Note:* Each level of "Dexterous Arm" is Arm DX 1 (One Arm; Magical, -10%) [11].

Digger

Keywords: Buff.

Full Cost: 56 points for level 1 + 11 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject becomes able to dig tunnels wide enough for them to pass through by just walking through the earth at Move equal to twice this spell's level. This does not require the use of hands. The subject may tunnel through stone at half normal Tunneling Move. The GM may wish to assess a chance that the tunnel collapses behind the subject. Roll each minute vs. the highest of Engineer (Mining), Prospecting-3, and IQ-4 to dig a stable tunnel, modified by Talent. This can be modified upward for hard rock and downward for soft rock or loose earth. Each halving of the subject's Tunneling Move gives +1 on this roll.

Statistics: Affliction 1 (HT; Advantage, Digger 1, +440%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [56]. *Note:* "Digger 1" is Tunneling (Move 2; Hands-Free, +20%; Magical, -10%) [44]. Each additional level adds 2 to Tunneling move [+11].

Dimension Door

Keywords: None.

Full Cost: 60 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

You teleport to another place within 10 yards that you able to see with your own eyes. You can carry up to Medium Encumbrance when you travel.

Modify the casting roll as follows:

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you.

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any space you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds!

Statistics: Warp (Extra Carrying Capacity, Medium, +20%; No Strain, +25%; Range Limit, 10 yards, -50%; Sorcery, -15%; Vision-Based, Reversed, -20%) [60].

Dimensional Dissection

Keywords: Resisted (HT or Will).

Full Cost: 61 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to send some of the subject to another place, time, or plane of existence. The target resists with the better of HT or Will. Failure means random chunks go elsewhere. This is instantly fatal!

This spell can affect anyone with a physical body. Subjects who have the Duplication advantage and an unused Dupe can sacrifice one copy to ensure the survival of the rest. This is instead of trying to resist. It costs a Dupe but guarantees survival.

If this spell critically fails, the caster becomes the point of arrival for a Dimensional Dissection spell cast elsewhere in creation. A forceful jet of gore with roughly half the mass of his intended subject blasts him for dice of crushing damage equal to the would-be victim's HP/2, rounded up. No active defense is possible.

Statistics: Affliction 1 (HT or Will; Accessibility, Only on beings with a physical body, -5%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Backlash, -30%; Nuisance Effect, Multiple ways to resist, -10%; Sorcery, -15%) [61].

Dimensional Lock

Keywords: Area (Leveled).

Full Cost: 84 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell creates a shimmering emerald dome that completely blocks interdimensional travel. No form of teleportation, plane shifting, time travel, summoning, or astral projection can be used into or from the area. This spell does not prevent summoned creatures from disappearing at the end of a summoning spell.

Statistics: Static (Dimensional Travel; Area Effect, 2 yards, +100%; Extended Duration, 30x, +60%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%; Visible, -10%) [84]. Additional levels increase Area Effect (+50%) [+15]. *Note:* As a special effect, this forms a hemispherical dome, not a cylinder.

Diminishing Dome

Keywords: Area (Leveled).

Full Cost: 64 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 second.

Creates a Force Dome that lasts for just long enough to appear, shrink (squashing its contents), and then collapse. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. Once the spell is cast, the dome takes a full second to form. This is obvious, and everybody within the area has one turn to leave.

On the caster's next turn, the dome shrinks out of existence. Magical creatures inside it – anything Pentagram could affect, including creations, demons, elementals, golems, spirits, and undead – are unaffected as the moving surface of force washes past them. But everybody else in the dome is dragged into the center, regardless of ST.

Everyone remaining in the area suffers 4d crushing damage as large-area injury (p. B400). The GM decides how cramped things get before the dome expires, as well as where people end up. On a battle map, five human-sized victims per hex works. The number of hexes in radius R is $3xR^2 - 3xR + 1$. Multi-hex figures count as one victim per hex of size, and may be forced into unnatural positions. Anybody crushed into the same hex as a being with Spines or an Aura is affected.

The basic (64-point) version of this spell covers a two-yard radius. For each additional 10 points, you may double this radius; e.g., four yards for 74 points, 8 yards for 84 points, or 16 yards for 94 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Crushing Attack 4d (Accessibility, Not on magical beings, -10%; Area Effect, 2 yards, +50%; Cosmic, Clusters subjects up, +200%; Delay, 1 seconds, +0%; No Knockback, -10%; Sorcery, -15%; Variable, Area, +5%) [64]. Further levels add Area Effect (+50%) to the advantage [+10].

Dirge of Doom

Keywords: Baneful Song.

Full Cost: 30 points for level 1 + 10 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. This is a mind control effect, so anyone with Immunity to Mind Control is immune to the effects of this song. This spell can only affect sapient creatures.

The subjects that can hear the bard play or sing must roll a Fright Check, applying any Magic Resistance as a bonus. The victims get +1 per Fright Check after the first within 24 hours, and anyone who succeeds is immune to this spell for an hour.

Each additional level of this spell imposes -1 to the Fright Check. For example, with *Dirge of Doom* 4, the subjects must make Fright Checks at -3. The bard can tone down the frightening qualities of the song to make the penalty lower than the maximum, or even give a bonus to resist.

This spell is not Resisted; the chance to succeed at the Fright Check takes the place of a normal resistance roll.

Statistics: Terror (Hearing; Accessibility, Only on sapient beings, -10%; Bard-Song, -30%; Costs Fatigue, 1 FP, -5%; No Hearing-Based, +20%; Selective Area, +20%; Variable, +5%) [30]. Additional levels add -1 to the Fright Check [+10].

Disarm

Keywords: Missile.

Full Cost: 2 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

This spell creates a telekinetic burst that may force a hand-held item to be dropped and flung away. To do this, attack the weapon or other item as usual (pp. B400-401) with this spell. The telekinetic missile is invisible and hence is often hard to dodge. Roll 1d per level of this spell. The holder of the item must then make an ST roll modified as follows: +2 for a two-handed weapon; +2 once he knows that his item is being targeted by this spell; -1 per 2 points of basic damage that the caster rolled. On a failure, he drops his weapon or other item he is holding! On success by 0-2, his weapon or item becomes unready. Success by 3+ causes him no ill effects.

Statistics: Crushing Attack (Accessibility, Only on hand-held items, -15%; No Signature, +20%; No Wounding, -50%; Sorcery, -15%) [2/level]. The damage-to-disarm rule unifies those from p. 11 of *GURPS Gun Fu* and p. B401.

Disbelieve

Keywords: None.

Full Cost: 4 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

While this spell is active, the caster enjoys a bonus equal to the spell's level to IQ, Per, and Will rolls made to disbelieve or resist illusions or phantoms.

Statistics: IQ+1 (Accessibility, Only for resisting illusions and phantoms, -65%; Sorcery, -15%) [4/level].

Discern Undead

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

When this spell is active, the caster can recognize any undead on sight, if it is not disguised magically. Thus, the caster always can distinguish between a corpse and a zombie, or a zombie and a flesh golem.

Statistics: Corpse Smart (Sorcery, -15%) [1].

Discord

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 34 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

Every sapient (IQ 6+) being in the area when the spell is cast must resist or be overcome with hostility. In effect, they acquire the Bully (9) (p. B125) and Intolerance (Total) disadvantages (p. B148).

The basic (34-point) version of this spell covers a two-yard radius. For each additional 5 points, you may double this radius; e.g., four yards for 39 points, 8 yards for 44 points, or 16 yards for 49 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Affliction 1 (Will; Accessibility, Only sapient beings, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Bully (9), +20%; Disadvantage, Intolerance (Total), +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Variable Area, +5%) [34]. Additional levels add Area Effect (+50%) [+5].

Disguise Undead

Keywords: Buff.

Full Cost: 71 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim. Special casting time.

Range: 100 yards.

Duration: 3 minutes.

You make one undead - including its clothing, armor, weapons, and equipment - look different. You cannot change the creature's body type. For example, a wight could look human, humanoid, or like any other generally human-shaped bipedal creature. Otherwise, the extent of the apparent change is up to you. You could add or obscure a minor feature, such as a mole or a beard, or make it look like an entirely different creature.

The spell does not provide the abilities or mannerisms of the chosen form. It does not alter the perceived tactile (touch) or audible (sound) properties of the undead or its equipment. An axe made to look like a dagger still functions as an axe.

This spell also foils magical means of detecting undead. Disguise Undead reduces the detector's effective margin of success by 10 for these purposes - so a spell that succeeded by 0-9 completely fails to find the subject, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it's resisted.

Unlike most other spells, this one takes 10 seconds to cast.

Statistics: Affliction 1 (HT; Accessibility, Undead Only, -50%; Advantage, Disguise Undead, +520%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [71]. *Note:* "Disguise Undead" is Elastic Skin (Force Field, +20%; Magical, -10%) [22] + Obscure 10 (Detect; Defensive, +50%; Limited, Detect Undead, -20%; Limited, Magic, -20%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [30].

Disinfect

Keywords: Area (Fixed), Resisted (HT).

Full Cost: 18 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This extreme version of Remove Contagion doesn't limit itself to mere microbes. It aggressively cleanses a 4-yard radius area in a way that's no safer for living beings than being autoclaved, bleached, fumigated, and irradiated. All living victims in the area who fail to resist take 1d toxic damage, ignoring DR. Additionally, the area is rendered sterile from microbes.

Statistics: Toxic Attack 1d (Area Effect, 4 yards, +100%; Based on HT, +20%; Cosmic, Sterilization, +50%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [18].

Disjunction

Keywords: Area (Leveled), Resisted (Will or spell).

Full Cost: 170 points for level 1 + 25 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to negate every instance of magic within the area, even if it is normally immune to Dispel Magic or Remove Curse. It even attempts to permanently disenchant enchanted items. Disjunction dispels all magical effects, both beneficial and harmful. Casting Disjunction on another magician will remove any Buff spells and such that he'd previously cast upon himself, but does not affect any of his more distant ongoing spells nor his spellcasting ability.

Note how much the sorcerer's Will roll (minus range penalties) succeeds by; every spell in the area resists separately with a Quick Contest. Use the spell's level (if a skill) or the caster's Will + Talent (if a power); for the latter, the Talent is usually Sorcery Talent or some type of Magery. If the sorcerer wins, the spell dissipates; it may be recast normally. Magical items lose their enchantments permanently.

You even have a small chance to dispel an Antimagic Field. Antimagic Field resists Disjunction at +8. If the Antimagic Field survives the disjunction, no items within it are disjoined.

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Area Effect, 2 yards, +50%; Cosmic, Can affect spells normally immune to Dispel Magic, +50%; Cosmic, Can affect spells normally immune to Remove Curse, +50%; Extended Duration, Permanent (Accessibility, Only on magic items, -20%), +120%; Interruption, Not on magic items, -50%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%) [170]. Additional levels add Area Effect (+50%) [+25].

Dismembering Weapon

Keywords: Weapon Buff.

Full Cost: 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 3d of follow-up (p. B105) cutting damage on limb, extremity, and neck hits, but only if the weapon deals cutting damage. This additional damage causes no blunt trauma and no knockback.

Statistics: Affliction 1 (HT; Accessibility, Only on cutting weapons, -40%; Advantage, Dismembering Weapon, +110%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Dismembering Weapon" is Cutting Attack 3d (Accessibility, Only on limb, extremity, and neck hits, -10%; Follow-Up, This weapon, +0%; Magical, -10%; No Blunt Trauma, -20%; No Knockback, -10%) [11].

Disorient

Keywords: Resisted (Will).

Full Cost: 38 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent until restored.

The subject loses his bearings. He will not immediately feel lost, but as soon as it becomes necessary to remember the path he has taken, or remember his position relative to a landmark, he will draw a blank. Subjects with Absolute Direction resist at +5. The subject can regain his bearings in the usual fashion (Navigation roll, back-tracking, comparing notes, etc.) This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Total Amnesia (Only about the location, -80%), +5%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Can be restored normally, -40%; Sorcery, -15%) [38].

Dispel Creation

Keywords: Resisted (master's Will).

Full Cost: 63 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You attempt to dispel a magical creation. Roll a Quick Contest of your Will versus the subject's master's Will. If you win, the creation immediately dies.

Statistics: Affliction 1 (Master's Will; Accessibility, Only on magical creations, -50%; Based on master's Will, +20%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [63].

Dispel (Ethical Category)

Keywords: Resisted (Will).

Full Cost: 52 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous, the subject cannot return for 1 month.

If the subject fails to resist, they are plane shifted back to their native plane, from where they cannot return for one month. This spell can only affect creatures of a particular ethical category – evil, good, law, chaos, etc.

Statistics: Affliction 1 (Will; Accessibility, Only on a certain ethical category, -60%; Based on Will, +20%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [52].

Dispel Gravity

Keywords: Area (Special).

Full Cost: 100 points for level 1 + 9 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 10 seconds.

This spell dispels gravity in an area, turning it into a zone of zero gravity. See *Different Gravity* (p. B350) for details on zero gravity. This may trigger space sickness (p. B434). The area of effect has a radius equal to spell level in yards and height of 4 yards.

Statistics: Control Gravity 1 (Accessibility, Only to create zones of zero gravity, -60%; Cannot concentrate to extend duration, -10%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [19] + Control Gravity +9 (Accessibility, Only to create zones of zero gravity, -60%; Cannot concentrate to extend duration, -10%; Does not increase area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [81]. Additional levels add Control Gravity +1 (Accessibility, Only to create zones of zero gravity, -60%;

Cannot concentrate to extend duration, -10%; Only increases area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [9].

Dispel Illusion

Keywords: Area (Leveled), Resisted (Will or spell).

Full Cost: 20 points for level 1 + 25 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to negate every magical illusion within the area. Casting Dispel Illusion on another magician will remove any Illusion spells and such that he'd previously cast upon himself, but does not affect any of his more distant ongoing illusions nor his ability to cast illusions.

Note how much the sorcerer's Will roll (minus range penalties) succeeds by; every illusion in the area resists separately with a Quick Contest. Use the spell's level (if a skill) or the caster's Will + Talent (if a power); for the latter, the Talent is usually Sorcery Talent or some type of Magery. If the sorcerer wins, the illusion dissipates; it may be recast normally.

Dispel Illusion has no effect on instantaneous illusions (which don't stick around) or on the secondary effects of lasting illusions (e.g., if a phantom bear has caused injury to a person, their wounds don't go away).

Statistics: Neutralize Magic (Accessibility, Illusions Only, -80%; Accessibility, Must target subject, not caster, -10%; Area Effect, 2 yards, +50%; Interruption, -50%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%) [20]. Additional levels add Area Effect (+50%) [+25].

Dispel Possession

Keywords: Resisted (Will or spell).

Full Cost: 18 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to reverse the effects of any Soul Rider, Control, Possession spell (or any similar spells or ability). Treat the resistance roll as for Dispel Magic (see *GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Interruption, -50%; One Power, Possession, -50%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [18].

Dispel Psi

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 60 points for level 1 + 25 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to negate every instance of psionics within the area. Dispel Psi does not care if the psionic effect is beneficial or harmful; if the subject of that ability is within the area, this spell attempts to counter it. Casting Dispel Psi on another psi will remove any ongoing psionic effect he had used previously on himself, but does not affect any of his more distant ongoing psionic effect nor his ability to use psionics.

Note how much the sorcerer's Will roll (minus range penalties) succeeds by; every psionic effect in the area resists separately with a Quick Contest. Use the psionic ability's skill level or the user's Will + Talent (if it is power without a skill). If the sorcerer wins, the psionic effect dissipates; it may be reused normally.

Dispel Psi has no effect on instantaneous psionic effects (which don't stick around) or on the secondary effects of lasting effects (e.g., if a mind-controlled person has stabbed people, their wounds don't go away). It also cannot end Truly Permanent effects, such as the psionic items.

Statistics: Neutralize Psi (Accessibility, Must target subject, not user, -10%; Area Effect, 2 yards, +50%; Interruption, -50%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%) [60]. Additional levels add Area Effect (+50%) [+25].

Dispel Spark

Keywords: Resisted (better of HT or Will).

Full Cost: 32 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell snuffs the magical spark of life. The subject resists with the better of HT or Will. A roll to resist failed by less than 5 stuns the target, allowing them to roll again once per second to recover. If the victim fails by 5 or more, or rolls a critical failure, they die on the spot as if of natural causes. This spell affects not only living creatures, but also beings animated or reanimated by magic.

In most settings, this spell treads on ground claimed by the Higher Powers. If that is the case, beings with Power Investiture add their Power Investiture level to their resistance roll.

Statistics: Affliction 1 (HT or Will; Accessibility, Only on living creatures and beings animated or reanimated by magic, -5%; Disadvantage, Secondary Fragile (Enhanced Unnatural), +20%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Secondary Heart Attack, +60%; Sorcery, -15%) [32]. *Notes:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies. This spell originally appeared in *GURPS Magic: Death Spells*.

Dispelling Touch

Keywords: Obvious, Resisted (Will or spell).

Full Cost: 13 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit,

Range: Touch.

Duration: Instantaneous.

Attempts to negate every instance of magic affecting the subject. Dispelling Touch does not care if the spell is beneficial or harmful; this spell attempts to counter everything. Casting Dispelling Touch on another magician will remove any Buff spells and such that he'd previously cast upon himself, but does not affect any of his more distant ongoing spells nor his spellcasting ability.

Note how much the sorcerer's Will roll succeeds by; every spell affecting the subject resists separately with a Quick Contest. Use the spell's level (if a skill) or the caster's Will + Talent (if a power); for the latter, the Talent is usually Sorcery Talent or some type of Magery. If the sorcerer wins, the spell dissipates; it may be recast normally.

Dispel Magic has no effect on instantaneous spells (which don't stick around) or on the secondary effects of lasting spells (e.g., if a mind-controlled bear has mauled people, their wounds don't go away). Also, some spells explicitly state that they are unaffected by Dispel Magic; such spells cannot be dispelled by Dispelling Touch as well – they require more powerful countermagic, usually Remove Curse (see *GURPS Thaumatology: Sorcery*, p. 21). It also cannot end Truly Permanent effects, such as the magic of enchanted items.

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Interruption, -50%; Sorcery, -15%) [13].

Dispelling Weapon

Keywords: Weapon Buff.

Full Cost: 44 points or 76 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell lets the weapon neutralize magic instead of causing damage. If the attack hits, roll its usual damage dice. Treat the result as the effective skill of the “dispel.” If the attack was made by the caster, he adds his Talent. Roll a Quick Contest of this “dispel skill” vs. the skill used to activate each ongoing magical effect on the target; victory means that a temporary effect (like most spells) is dissipated for good while a permanent one (like an enchantment) ceases to work for minutes equal to margin of victory. If the target has active, ongoing magical effects due to advantages, also roll a Quick Contest against his Will. Victory means that all such advantages are shut off until he reactivates them.

This spell offers a unique option: if the user is capable of two or more attacks per turn with his Dispellng Weapon, and one of these hits and wounds the target, then he can waive a later attack on that turn to roll the Quick Contests above. Effective skill of the “dispel” is the earlier attack’s basic damage roll or the injury that attack caused, whichever is higher.

The basic (44-point) version attempts to dispel all ongoing effects on the target. The improved (76-point) version lets the user target one specific ongoing effect.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Dispellng Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Dispellng Weapon” is 34 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). The improved version buys off the -4 penalty [+32]. This spell is based on the Strike of Negation imbueement skill.

Displace Spell

Keywords: Area (Special).
Full Cost: 33 points for level 1 + 6 points/additional level.
Casting Roll: IQ.
Range: 100 yards.
Duration: Indefinite.

The caster can move an Area spell, which must have an initial radius (in yards) no greater than the caster’s level of this spell, and which center must be within 100 yards. This allows the caster to “walk” the spell, with Move 3. They must actively concentrate while moving the spell. The caster cannot move Truly Permanent spell effects, such as Drain Mana or Restore Mana.

If the spell is already under someone else’s direct control (for example, if the spell has the Mobile enhancement and the original caster can concentrate to move it, or if someone else has cast Displace Spell on it), roll a Quick Contest of the caster’s IQ against the other person’s IQ or appropriate spell skill, if the control was established by a spell of another magic system. The caster must win to establish control.

Statistics: Control Magic 1 (Accessibility, Only to move Area spells, -55%; Ranged, +40%; Sorcery, -15%) [21] + Control Magic +2 (Accessibility, Only to move Area spells, -55%; Does not increase area of effect, -50%; Ranged, +40%; Sorcery, -15%) [12]. Additional levels add Control Magic +1 (Accessibility, Only to move Area spells, -55%; Only increases area of effect, -50%; Ranged, +40%; Sorcery, -15%) [6/level]. *Note:* As this is one advantage (Control Magic) with the Sorcery limitation, not two, it costs only 1 FP to use.

Disrupt Undead

Keywords: Missile, Obvious.
Full Cost: 1 points/level.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 100 yards.
Duration: Instantaneous.

You fire a white beam that damages undead creatures. This attack deals 1d crushing damage per level with no blunt trauma or knockback. The beam travels slow enough to be blocked, but not parried.

Statistics: Crushing Attack 1d (Accessibility, Undead only, -50%; Blockable, -5%; No Blunt Trauma, -20%; No Knockback, -10%; Sorcery, -15%) [1/level].

Disrupting Weapon

Keywords: Weapon Buff.

Full Cost: 11 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 1d of follow-up (p. B105) crushing damage with no knockback or blunt trauma to undead creatures. The weapon glows with a dim light.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Disrupting Weapon, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11]. *Note:* "Disrupting Weapon" is Crushing Attack 1d (Accessibility, Undead only, -50%; Follow-Up, This weapon, +0%; Magical, -10%; No Blunt Trauma, -20%; No Knockback, -10%; Visible, -10%) [1].

Disruption

Keywords: Resisted (HT).

Full Cost: 14 points/level.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Induces intense, chaotic forces within the target. If the subject fails to resist, it takes 1d crushing damage. This damage ignores DR, but does not cause knockback. This spell does not work on Diffuse creatures.

Statistics: Crushing Attack 1d (Accessibility, Does not work on Diffuse subjects, -5%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Malediction 2, +150%; No Knockback, -10%; No Signature, +20%; Sorcery, -15%) [14/level].

Dissipate

Keywords: Resisted (HT).

Full Cost: 63 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell causes a subject made mostly of water (living beings that require water – humans, elves, animals, trees, fungi, etc., flesh golems, water elementals, rotting undead, wet nanotech robots) to lose structural integrity, melting to thick fluid.

Remove Curse can reverse it if the victim's residue is collected within a minute. As the residual matter is a liquid, Shape Water is useful here. Dissipate doesn't affect even a small amount of clothing – only the subject.

Statistics: Affliction 1 (HT; Accessibility, Only on water-based lifeforms, -20%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Can be reversed, -10%; Sorcery, -15%) [63]. *Note:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies.

Distance Manipulation

Keywords: None.

Full Cost: 33 points for level 1 + 18 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 10 seconds.

You can warp space between your hex and one other hex within 100 yards to increase or decrease distance between them. Each level of this spell lets you increase or decrease the distance penalties between the affected hexes by up to your spell level. Thus, a caster with Distance Manipulation 5 could cast this spell on an adjacent hex that contains an enemy (1 yard distance imposes no range penalties) to increase this distance up to 15 yards (-5 penalty on the *Speed/Range Table*, p. B550), but only between these two hexes. If the enemy steps into a different hex, he could still approach the caster. However, if he takes the straight path, he would have to move whole 15 yards. In the same way, a caster with Distance Manipulation 5 could make a hex up to 15 yards away become effectively adjacent, allowing him to strike the enemy standing there in melee.

Statistics: Control Space 1 (Accessibility, Only to manipulate distance, -45%; Cannot concentrate to extend duration, -10%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [33]. Each additional level adds Control Space 1 (Accessibility, Only to manipulate distance, -45%; Cannot concentrate to extend duration, -10%; Does not increase the area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [18].

Distant Blow

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The melee weapon enhanced delivers its usual damage from a distance by magically projecting force. This ranged attack has Acc 3, Range 10/100, RoF 1, Shots N/A, Bulk -2, and Recoil 1. Use the usual melee combat skill for the attack, not a ranged combat skill. Distant Blow doesn't unready the weapon for melee use.

At level one, this spell can only be used once per 10 seconds. Additional levels reduce this recharge time.

Level	Recharge	Level	Recharge
1	10 seconds	6	5 seconds
2	9 seconds	7	4 seconds
3	8 seconds	8	3 seconds
4	7 seconds	9	2 seconds
5	6 seconds	10	1 second

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Distant Blow, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Distant Blow" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Additional levels add more skill [+8].

Distill

Keywords: None.

Full Cost: 4 points/level.

Casting Roll: IQ or Professional Skill (Distiller).

Range: Touch.

Duration: Permanent.

Concentrates a liquid by removing water from it. This spell is mostly used to make strong alcoholic beverages, but alchemists also employ it for other purposes. To cast the spell, the caster touches the liquid he wishes to transform, takes a Concentrate maneuver and makes his casting roll. Success means he transforms it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transformation costs 1 FP per use.

The caster can transform an amount of liquid weighing up to $10 \times (\text{level squared})$ lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Accessibility, Only to concentrate, -25%; Transmute Alcoholic Beverage to Alcoholic Beverage, +50%; Transmutation Only, -100%; Magical, -10%; Variable, +5%) [4/level].

Distraction Song

Keywords: Area (Leveled), Beneficial Song.

Full Cost: 24 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. This song can only affect sapient creatures. Subjects roll vs. Per minus any Magic Resistance they have. The song's effects last for margin of success seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Allies affected by Distraction Song gain a +3 bonus to their HT or Will when resisting Vision-based effects that do *not* overload vision, such as the petrifying gaze of a medusa, but not a flashbang grenade.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Per; Accessibility, Only on sapient beings, -10%; Advantage, Distraction Song, +30%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [24]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Distraction Song" is Resistant to Noxious Vision-Based Effects (+3) (Magical, -10%) [3].

Diver's Blessing

Keywords: Buff.

Full Cost: 10 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 second.

This spell grants the subject one level of Breath-Holding (p. B41) for one second. Thus, the subject must hold their breath on the turn that follows the casting to benefit from this spell.

Statistics: Affliction 1 (HT; Advantage, Diver's Blessing, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [10]. *Note:* "Diver's Blessing" is Breath-Holding 1 (Magical, -10%) [2].

Divert Plane Shift

Keywords: Resisted (Will).

Full Cost: 214 points or 234 points.

Casting Roll: Will. IQ to plane shift. Special casting cost.

Range: Unlimited.

Duration: Instantaneous.

If this spell is active, and if the caster witnesses a subject planeshifting, he may cast this spell instantly to divert the plane shift. If the subject fails to resist, the caster may try an immediate IQ roll to shift the subject to another plane of existence as if using the Jumper advantage (B97). The basic (214-point) version of this spell allows caster to send the subject and his gear up to his Extra-Heavy encumbrance to one other plane, chosen when you learn the spell. The improved (234-point) version opens this up to any dimension the caster is familiar with. He can become familiar with new planes by hitching a ride there – with another sorcerer using this spell, a magician using an equivalent spell, a creature with an innate ability, etc. – or via tomes of knowledge which contain detailed instructions on where and how to travel.

Statistics: Affliction 1 (Will; Accessibility, Only to divert planeshifters, -80%; Advantage, Divert Plane Shift, +1,900%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Reflexive, +40%; Sorcery, -15%) [214]. *Notes:* "Divert Plane Shift" is Jumper (Interplanar; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Limited Access, -20%; Reliable +10, +50%) [190]. The +10 for Reliable cancels the -10 for no preparation. The improved version removes Limited Access [+20]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Divert Teleport

Keywords: Resisted (Will).

Full Cost: 224 points.

Casting Roll: Will. IQ to teleport. Special casting cost.

Range: Unlimited.

Duration: Instantaneous.

If this spell is active, and if the caster witnesses a subject teleporting, he may cast this spell instantly to divert the teleportation. If the subject fails to resist, the caster may try an immediate IQ roll to teleport the subject as if using the Warp advantage (p. B97). The caster can send the subject and his gear up to his Extra-Heavy encumbrance to any place he can see or has visited and can cancel range modifiers by spending his own FP.

Statistics: Affliction 1 (Will; Accessibility, Only to divert teleporters, -80%; Advantage, Divert Teleport, +2,000%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Reflexive, +40%; Sorcery, -15%) [224]. *Notes:* "Divert Teleport" is Warp (Extra Carrying Capacity, Extra-Heavy, +50%; Reliable +10, +50%) [200]. The +10 for Reliable cancels the -10 for no preparation.

Divert Timeport

Keywords: Resisted (Will).

Full Cost: 234 points.

Casting Roll: Will. IQ to timeport.

Range: Unlimited.

Duration: Instantaneous.

If this spell is active, and if the caster witnesses a subject timeporting, he may cast this spell instantly to divert the timeport. If the subject fails to resist, the caster may try an immediate IQ roll to shift the subject to another time as if using the Jumper advantage (p. B64).

Statistics: Affliction 1 (Will; Accessibility, Only to divert timeporters, -80%; Advantage, Divert Timeport, +2,100%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Reflexive, +40%; Sorcery, -15%) [234]. *Notes:* "Divert Timeport" is Jumper (Time; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Reliable +10, +50%) [210]. The +10 for Reliable cancels the -10 for no preparation. Note: The Improved enhancement removes the auto-fail on 14+.

Divest Essentia

Keywords: Resisted (HT).

Full Cost: 28 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

By delivering a jolt of magical energy to your target, you scramble his personal essence, causing all essentia he has currently invested to return to his essentia pool. This disables the abilities that are activated by spending essentia, returns the spent essentia to the ER pool of the target, but does not prevent the target from spending this essentia again on the next turn.

Statistics: Neutralize Incarnum (Based on HT, +20%; Interruption, -50%; Nuisance Effect, Essentia is returned to the pool, -40%; Ranged, +40%; Sorcery, -15%) [28].

Divine Purpose

Keywords: Information.

Full Cost: 13 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

When cast on any object, this spell lets the caster determine its functions. If the subject has more than one function, the spell reveals them in order of complexity (simplest first), and tells the caster "there are more functions." Later castings will reveal the remaining functions.

On a success, you learn one function per point of margin of success. On a critical success, you learn all functions.

On a failure, you do not learn anything, and cannot attempt to read that object again for 24 hours.

Statistics: Psychometry (Accessibility, Only to reveal functions, -30%; Active Only, -20%; Sensitive, +30%; Sorcery, -15%) [13].

Dominate Animal

Keywords: Resisted (Will).

Full Cost: 51 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can mentally temporarily enslave an animal you can see or touch. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550).

If you win, the dominated animal will obey your every command. In effect, it gains the Reprogrammable disadvantage (p. B150), with you as its master. This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the

margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

If you attempt to force the animal to act against its principles (e.g., commit suicide or harm a mate), roll another Quick Contest. If the animal wins, it breaks free. Roll at the moment of truth – you can march it to the edge of a cliff, but it doesn't roll until it's about to leap.

If you lose, you cannot attempt to control that animal again for 24 hours, and it feels a sense of mental coercion emanating from you.

The caster can also establish a mental link with his dominated animal by taking a Concentrate maneuver and making an IQ roll. This allows him to send verbal orders to his slave, even if he cannot see the animal. Range is theoretically unlimited, but the IQ roll to establish the link takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see or otherwise sense his dominated animal, he has an additional -1 penalty.

If successful, the dominated animal hears the caster's voice but may not respond. The caster can also tap into the animal's senses. This lets him experience everything the animal experiences. If it is tortured, knocked out, or killed, the GM may require a Will roll to avoid stunning – or perhaps even a Fright Check! The caster may maintain a connection with that animal for as long as he'd like. No further rolls are normally required unless the range penalty worsens.

Statistics: Mind Control (Accessibility, Animals Only, -25%; Sorcery, -15%) [30] + Mind Reading (Accessibility, Only with dominated animals, -50%; Link, +10%; Magical, -10%; Sensory Only, -20%; Telecommunication, -20%) [6] + Telesend (Accessibility, Only with dominated animals, -50%; Link, +10%; Magical, -10%) [15].

Doomtouch

Keywords: Resisted (HT).

Full Cost: 9 points/level.

Casting Roll: IQ. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

If the subject fails to resist, he takes 1d toxic damage per level of this spell, ignoring DR. This spell only works on living creatures.

Statistics: Toxic Attack 1d (Based on HT, +20%; Based on IQ, Own Roll, +20%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%) [9/level].

Doppelgänger

Keywords: None.

Full Cost: 54 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite, see text.

A Doppelgänger is a duplicate of a person, fabricated through powerful magic. The Doppelgänger must be prepared for a specific target; both a sample of the target's body (hair, blood, etc.) and a cherished personal possession of the target are required. A statue of the original must be sculpted, using some pure elemental "material" – pure ice or snow from a mountaintop, stone or fire from the bowels of a volcano, and so on are all appropriate materials. The likeness is achieved with an appropriate Shape spell or Artist (Sculpting) skill roll at -10.

The Doppelgänger has all the attributes, skills, and knowledge of the original, with the exception of magic; it has no Magery and cannot cast any spells. It gets its knowledge from the embedded object; anything that the History spell could divine, it will know. It acts as the original would, had the Doppelgänger's creator enslaved him. Suspend Curse paralyzes it, and Remove Curse destroys it.

When destroyed, all that is left is a mass of the original material (a puddle of water, a mound of earth, a sudden rush of flames) and the personal possession.

It is very difficult to detect the trickery. Whenever the GM judges an Information spell does not altogether fail to tell the copy from the original, he should let the Doppelgänger spell resist. The Aura spell and the Empathy advantage would be Resisted, for example.

If the doppelgänger is destroyed, the caster must wait a full day to create a new one. You can only cast this spell if your character's point total is equal or bigger than the doppelgänger's.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Doppelgänger; Built on 100%; Constantly, no roll required; Adjustable, Doppelgängers, +150%; Magical, -10%; Minion, +50%; Requires preparation, -20%) [54].

Dragon Breath

Keywords: Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: Instantaneous.

You breathe a cone of flame that does 1d burning damage per level. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell's maximum range. This spell has the 1/2D range of 2 yards.

Statistics: Burning Attack 1d (Cone 5, +100%; Increased 1/2D, x2, +5%; Reduced Range, 1/10, -30%; Sorcery, -15%) [8/level].

Dragon Master

Keywords: Resisted (Will).

Full Cost: 283 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Two days.

This spell allows the caster to mentally dominate a particular type of dragons (red, gold, white, etc.), chosen when they learn this spell, that the caster can see, touch, or sense with another spell. The casting roll takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the dragon fails to resist (this spell *ignores* Magic Resistance, Mind Shield, and other similar defensive abilities), it will obey every command of the caster until freed, effectively gaining the Reprogrammable (p. B150) disadvantage with the caster as the master. If the caster attempts to force the dragon to act against its principles, roll another Quick Contest. Roll immediately before the principles would be violated, not when the caster gives the command. If the dragon wins, it breaks free.

If the caster fails to control the dragon, they cannot attempt to control that subject again for 24 hours, and the dragon feels a sense of mental coercion emanating from the caster.

Statistics: Mind Control (Accessibility, Dragons of a Particular Type Only, -60%; Cosmic, Irresistible Attack, +300%; Extended Duration, x1,000, +120%; Fixed Duration, +0%; Independent, +70%; Long-Range 1, +50%; Sorcery, -15%) [283].

Drain Magery

Keywords: Resisted (Will + Magery).

Full Cost: 85 or 90 points.

Casting Roll: Will. Special casting time (see below).

Range: Touch.

Duration: Truly Permanent.

This spell permanently removes one level of Magery of any kind from the victim. The subject adds their level of Magery to their resistance roll. Effects of subsequent casting are *cumulative*. Casting

the basic (85-point) version of this spell takes 10 minutes, and the caster must touch the subject throughout the casting. Thus, this spell typically can only be used on helpless subjects. The improved (90-point) version of this spell can be cast in one second, making the spell viable when the victim is not restrained. The victim does not lose his knowledge of spells, but loses the ability to cast those that require a higher level of Magery than their new one.

This spell's effect is Truly Permanent – it cannot be dispelled, even with Remove Curse. However, a critical failure with this spell costs the *caster* a level of Sorcery Talent and a point of IQ!

Statistics: Affliction 1 (Will; Based on Will, +20%; Cumulative, +400%; Extended Duration, Truly Permanent, +300%; Immediate Preparation Required, 10 minutes, -45%; Malediction 1, +100%; Melee Attack, Reach C, -30%; Negated Advantage, Magery 1, +10%; No Signature, +20%; Nuisance Effect, The caster loses a level of Sorcery Talent and a point of IQ on critical failure, -10%; Sorcery, -15%) [85]. The improved version removed Immediate Preparation Required, 10 minutes, -45% [+5]. *Notes:* The victim adding their Magery level to their resistance roll is a special feature. If Sorcery is the only magic system in use, Magery can be replaced by Sorcery Talent for the purpose of this spell without changing its cost. The GM may even allow to replace Magery with Sorcerous Empowerment, but this will increase the value of the Negated Advantage enhancement to +20%, making the spell's full cost equal to 86 points.

Drain Mana

Keywords: Area (Leveled).

Full Cost: 123 points for level 1 + 15 points/additional level.

Casting Roll: None. Special casting time (see below).

Range: Self.

Duration: Truly Permanent.

The caster performs a ritual that requires one hour of unbroken concentration, and drains mana from the area around them, making it difficult or impossible for others to cast spells and use magical abilities. This spell reduces the local mana level in the area by three steps. The area of effect stays stable with respect to the earth, but not to objects. Thus, if the spell is cast in a moving vehicle, the effect will stay at its point of origin, rather than moving with the vehicle.

This is a Truly Permanent effect that cannot be dispelled, lifted with Remove Curse, or displaced with Displace Spell.

For details, see *Mana* (p. B235) and *Mana (GURPS Thaumatology: Sorcery, p. 23)*.

Statistics: Mana Damper 3 (Area Effect, 2 yards, +50%; Extended Duration, Truly Permanent, +300%; Immediate Preparation Required, 1 hour, -75%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [122] + Rules Exemption (Magical abilities can coexist with Mana Damper) [1]. Additional levels add Area Effect (+50%) [+15].

Drain Psionics

Keywords: Resisted (Will).

Full Cost: 87 or 92 points.

Casting Roll: Will. Special casting time (see below).

Range: Touch.

Duration: Truly Permanent.

This spell permanently removes one level of psionic Talent of any kind from the victim. The subject adds the level of the Talent being removed to their resistance roll. Effects of subsequent casting are *cumulative*. Casting the basic (87-point) version of this spell takes 10 minutes, and the caster must touch the subject throughout the casting. Thus, this spell typically can only be used on helpless subjects. The improved (92-point) version of this spell can be cast in one second, making the spell viable when the victim is not restrained. The victim does not lose his knowledge of psionic abilities.

This spell's effect is Truly Permanent – it cannot be dispelled, even with Remove Curse. However, a critical failure with this spell costs the *caster* a level of Sorcery Talent and a point of IQ!

Statistics: Affliction 1 (Will; Based on Will, +20%; Cumulative, +400%; Extended Duration, Truly Permanent, +300%; Immediate Preparation Required, 10 minutes, -45%; Malediction 1, +100%; Melee

Attack, Reach C, -30%; No Signature, +20%; Nuisance Effect, The caster loses a level of Sorcery Talent and a point of IQ on critical failure, -10%; Sorcery, -15%; Variable Enhancement, +25%) [87]. The improved version removed Immediate Preparation Required, 10 minutes, -45% [+5]. *Notes:* The victim adding their Talent level to their resistance roll is a special feature. Variable Enhancement provides +5% of enhancements (+50%) but is limited by "Accessibility, Only for Negated Advantage, Psionic Talent" (-50%) for a net +25%.

Drama

Keywords: None.
Full Cost: 4 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell acts like the Acting skill (p. B174), but only allows counterfeiting one strong emotion: anger, despair, fear, hate, joy, love, etc. Body Language and Detect Lies are useless against Drama, but such spells as Aura or Sense Emotion work.

Statistics: Acting (A) IQ [2] modified with Accessibility, Only to counterfeit strong emotions, -20%; Cosmic, No die roll required, +100%, Sorcery, -15% for a final cost of 4 points.

Dramatic Departure

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Instantaneous.

If this spell is active and the caster dies, his departure becomes visually impressive: exploding head, dissolving flesh, etc. These effects cause no harm, but prevent the caster from being resurrected by anything that requires intact body.

Statistics: Covenant of Rest (Variant; Sorcery, -15%) [1].

Draw Power

Keywords: Resisted (HT).
Full Cost: 81 points for level 1 + 3 points/additional level.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

You can steal power from an active power source (such as a battery) to gain energy. You gain an ER pool equal to (5 x spell level) that can only be recharged with this spell and that bleeds away at a rate of 1 point/second. Energy from this pool can only be spent on spellcasting.

Each casting of this spell grants this ER pool 3 energy points. The power source must produce at least 0.3 kWh to be eligible for draining. Some settings may have different assumptions, however.

You *cannot* cast this spell using its own ER.

Statistics: Leech 3 (Mechanical; Accelerated Healing, +25%; Accessibility, Only active power sources, -40%; Based on HT, +20%; Malediction 2, +150%; Only Heals FP, -20%; Ranged, +40%; Sorcery, -15%; Steal FP, -25%) [78] + Energy Reserve 5 (Magical; Special Recharge, Leech, Bleeds away 1 point/second, -80%) [3]. Additional levels add 5 additional levels of the Energy Reserve advantage [+3].

Draw Together Shards

Keywords: Buff.
Full Cost: 177 points.
Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 1 minute.

This spell must be cast on a ceramic shard. The shards of the item (clay pot, cuneiform tablet, clay statue or golem, etc.) begin moving quietly toward the ensorcelled piece. It might take days, months, or even years for all of the bits to arrive, especially if the bits have to crawl out of the sea, extricate themselves from a wall, or assemble themselves from dust. When all of the components come together, the item begins to regenerate 1 HP per second for 1 minute.

The time required for an item to reassemble itself is the number of pieces squared, in hours. Thus, a tablet broken into 12 pieces would take six days to gather. Double the time if the pieces are scattered over an area of a large city or county. Triple the time if even a single piece must cross the face of a large nation; quintuple the time if the pieces have to come through an ocean or large continent.

Statistics: Affliction 1 (HT; Accessibility, Only on ceramic, -50%; Advantage, Draw Together Shards, +1,750%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [177]. *Notes:* "Draw Together Shards" is Regeneration (Very Fast; Cosmic, Works on destroyed objects, +50%; Onset, Variable, -50%) [100] + Unkillable 1 (Cosmic, Works on destroyed objects, +50%) [75]. This version of Cosmic means it *only* works on destroyed objects.

Dread Curse

Keywords: Resisted (Will).

Full Cost: 77 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Until the subject fails a roll.

This spell curses the subject (who must be a living creature or a being animated by magic) to certain doom. The next success roll the subject fails for anything creates a fatal chain of events for them, that doesn't have to be probable, plausible, or especially sensible. The only limit is the GM's imagination, though this should be colored by the failure.

This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Affliction 1 (Will; Accessibility, Only on living creatures and beings animated or reanimated by magic, -5%; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Triggered Delay, Failed roll, +50%) [77]. *Notes:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies. This spell originally appeared in *GURPS Magic: Death Spells*.

Dream Projection

Keywords: None.

Full Cost: 18 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

The caster can set up a two-way conversation with a sleeping person. Range is theoretically unlimited, but the IQ roll to cast this spell takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see or otherwise sense his subject, he has an additional penalty: -1 for family, lovers, or close friends; -3 for casual friends and acquaintances; or -5 for someone met only briefly.

If successful, the caster projects his presence into the subject's dreams to converse with him, allowing "real-time" conversation. If the subject does not wish to speak with the caster, he can break the spell with a successful Dreaming roll. Once broken, no further contact is possible that night. The

caster may maintain a connection with that subject for as long as he'd like. No further rolls are normally required unless the range penalty worsens.

This is a Communication and Empathy and a Mind Control spell. When this spell is cast as a Mind Control spell, it can only affect sapient creatures.

Statistics: Avatar (Magical, -10%) [1] + Mind Reading (Accessibility, Only on sleepers, -20%; Accessibility, Projected thoughts only, -20%; Increased Immunity 3, -30%; Link, +10%; Magical, -10%; Telecommunication, -20%) [6] + Telesend (Accessibility, Only on sleepers, -20%; Increased Immunity 3, -30%; Link, +10%; Sorcery, -15%; Visible, -10%) [11]. *Note:* When using this spell as a Mind Control spell, add Accessibility, Only on sapient beings, -10% to both advantages. This makes the spell cost 15 points.

Dream Search

Keywords: Resisted (higher of Will and Dreaming).

Full Cost: 12 points.

Casting Roll: IQ or Dreaming.

Range: Touch or Unlimited (see text).

Duration: Instantaneous.

This spell, when cast on a sleeping subject, searches the subject's mind to find deep thoughts and knowledge of things the subject is not thinking about at the moment. In effect, the caster can force the subject to answer any one specific question that he can answer with a brief sentence. To attempt a search, the caster must first either touch his subject or be present in the subject's dream via Dream Visit or Dream Travel or a similar spell or ability. He must also share a language with the subject.

If the casting is successful, the caster brings out the answer from the subject's mind, but also alters the subject's dream so that the answer is shown to the subject as well. This way, the subject may remember being interrogated by this spell with a successful Dreaming roll. The answer is what the subject believes to be true – if he doesn't know, the caster will know that. If the casting has failed, the caster may try again, at a cumulative -2 per repeated attempt to ask the same (or very similar) question in the past hour. Should he critically fail, he cannot search that person again for 24 hours.

This spell may be used to ask as many questions as the caster wishes, but each question is a new casting.

Statistics: Mind Probe (Accessibility, Only on sleepers, -20%; Nuisance Effect, Causes a vivid dream, -5%; Sorcery, -15%) [12].

Dream Sending

Keywords: None.

Full Cost: 17 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

You can send a message (up to 1 minute long) over a long distance as a dream vision to the subject. The message is seen in dream-symbols by the subject, who must roll vs. IQ-5 or a skill such as Fortune-Telling (Dream Interpretation) (p. B196) to interpret it correctly. The margin of success of the roll indicates how well the message is understood. Use of the Dreaming skill by the subject could distort or obliterate the message (GM's discretion).

Range is theoretically unlimited, but the IQ roll to use this spell takes the range penalties given under *Long-Distance Modifiers* (p. B241). If you cannot see or otherwise sense your subject, you have an additional penalty: -1 for family, lovers, or close friends; -3 for casual friends and acquaintances; or -5 for someone met only briefly.

This is a Communication and Empathy and a Mind Control spell. When this spell is cast as a Mind Control spell, it can only affect sapient creatures.

Statistics: Telesend (Accessibility, Only on sleepers, -20%; Nuisance Effect, Must be interpreted, -10%; Sorcery, -15%) [17]. *Note:* When using this spell as a Mind Control spell, add Accessibility, Only on sapient beings, -10%. This makes the spell cost 14 points.

Dream Travel

Keywords: None.

Full Cost: 80 or 130 points.

Casting Roll: IQ. Special casting time (see below).

Range: Self.

Duration: Instantaneous.

You bodily move yourself into the Region of Dreams. Concentrate for 10 seconds, and make a IQ roll. You may hurry the jump, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, you physically move into the Region of Dreams, where your subconscious mind shapes a dreamscape for you. Alternatively, if you were touching a sleeping creature when casting this spell, you may transport yourself into that creature's dreamscape. On a failure, you go nowhere. On a critical failure, you are transported into the Demiplane of Nightmares.

The basic (80-point) version of this spell allows you to take equipment up to your Basic Lift with you. The improved (130-point) version of this spell does not have a weight limit.

Statistics: Jumper (World; Improved, +10%; Limited Access, -20%; Magical, -10%) [80]. The improved version adds Extra Carrying Capacity, Extra-Heavy, +50% [+50]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Dream Viewing

Keywords: Resisted (Will).

Full Cost: 14 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

The caster can view his sleeping subject's dreams. If he is experiencing a nightmare, the GM may require a Will roll to avoid stunning – or perhaps even a Fright Check! The caster must be able to see or touch the subject to view his dreams. Modify the casting roll for range penalties to the subject (see p. B550).

The caster can maintain this spell for as long as he wishes without further concentration. If he switches to another person, he must stop viewing his current subject's dreams and roll a Quick Contest with the new subject.

If he loses, he may try again, at a cumulative -2 per repeated attempt on that subject in the past hour. Should he critically fail, he cannot view that person's dreams again for 24 hours.

Statistics: Mind Reading (Accessibility, Only on sleepers, -20%; Sensory Only, -20%; Sorcery, -15%) [14].

Dream Visit

Keywords: None.

Full Cost: 50 points.

Casting Roll: IQ. Special casting time (see below).

Range: Self.

Duration: Instantaneous.

You project your mind into the Region of Dreams. Concentrate for 10 seconds, and make a IQ roll. You may hurry the projection, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, you mentally move into the Region of Dreams, where your subconscious mind shapes a dreamscape for you. Alternatively, if you were touching a sleeping creature when casting this spell, you may project your mind into that creature's dreamscape. In any case, your body is left unconscious and helpless until you return. You do not bring any equipment with you. You may "clothe" yourself as you wish, but it offers no protection.

Statistics: Jumper (World; Improved, +10%; Limited Access, -20%; Magical, -10%; Naked, -30%; Projection, -0%) [50]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Drown

Keywords: Resisted (HT).

Full Cost: 33 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

You fill the subject's lungs with water. The subject loses his ability to breathe or speak for 30 seconds. He may do nothing but drop. While the drowning endures, he suffers the effects of suffocation (see *Suffocation*, p. B436). After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover. The subjects with Doesn't Breathe, Doesn't Breathe (Gills), or Injury Tolerance (Homogenous) are immune to this spell!

Statistics: Affliction 1 (HT; Accessibility, Not on water-breathers, -10%; Choking, +100%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/6, -15%; Sorcery, -15%) [33].

Druid's Panacea

Keywords: None or Resisted (Will).

Full Cost: 42 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous, the poison flushes in 1d hours. Addictions and insanity are removed for 3 days. Memories are restored permanently.

By making physical contact with a subject – who must be resting at the foot of a large (SM +2 or more), living tree - you may immediately heal him an amount of HP equal to the tree's SM, but no more than 8 HP. This also automatically stops any bleeding. You may heal subjects of your own race and any "similar" races (GM's call); e.g., a human can heal other humans but not dogs or plants.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Alternatively, the caster may cure the subject in other ways:

1. The caster may cure some disease this way. The casting roll is penalized by the severity of the disease – from +1 for the common cold to -2 for severe flu. He cannot cure a disease that imposes a worse penalty. The penalty for repeated attempt applies to this option too.

2. This caster may flush poisons from the subject's body. The caster must first roll against Poisons (or Alchemy, Pharmacy, etc., as appropriate) to identify the poison. He cannot attempt this roll until he knows that the subject has been poisoned. In most cases, this can be discovered when the first symptoms show! This spell flushes the poison in 1d hours, after which it has no further effect.

3. You can temporarily remove any addictions or mental disadvantages that represent insanity in a subject. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head, where you can "see" his addiction and/or insanity; the GM will reveal his Addiction or "insane" disadvantages. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject – at -1 for every full -5 points in disadvantages you wish to remove. You may substitute Brainwashing for IQ, if better. A critical success here gives the subject an excuse to buy off his problem, if he has the character points!

4. The caster can permanently restore any lost memories of the subject. This works the same as above, but the duration is permanent.

Statistics: Healing (Affects Self, +50%; Cannot restore crippled limbs, -10%; Capped, 4 FP, -20%; Environmental, Large Tree, -50%; Magical, -10%; Reduced Fatigue Cost 3, +60%) [36] + Affliction 1 (HT;

Advantage, Druid's Panacea (Neutralize Poison), +180%; Environmental, Large Tree, -50%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [16/5=4] + Mind Control (Accessibility, Only to remove addictions, amnesia, or insanity, -10%; Conditioning Only, -50%; Environmental, Large Tree, -50%; Extended Duration, Permanent, Only when restoring memories, +50%; Fixed Duration, +0%; Melee Attack, Reach C, -30%; Sorcery, -15%) [10/5=2]. Notes: "Druid's Panacea (Neutralize Poison)" is Unusual Training (Body Control, only to flush poisons) [1] + Body Control (VH) HT [8] modified with Cosmic, No die roll required, +100% and Magical, -10% for a final cost of 18 points. All three advantages are built as Alternative Abilities.

Drunkenness

Keywords: Resisted (Will).

Full Cost: 28 points or 29 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

You intoxicate the subject for 3 minutes. The basic (28-point) version makes the subject tipsy. He gets -1 to DX and IQ, and -2 to self-control rolls except those to resist Cowardice. Reduce Shyness by one level, if he has it. The improved (29-point) version makes the subject drunk. He gets -2 to DX and IQ, and -4 to self-control rolls except those to resist Cowardice. Reduce Shyness by two levels, if he has it. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Tipsy, +10%) [28]. The improved version replaces Tipsy, +10% with Drunk, +20% [+1].

Dry Spring

Keywords: None.

Full Cost: 19 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Permanent.

The spell dries and blocks the waterflow within a spring, reducing its output. Note, however, that the local geology may eventually shift, restoring the spring's output to its previous level.

Spring Magnitude	Flow (ft ³ /s, gal/min, pint/min)	Flow (L/s)
1 st magnitude	>100 ft ³ /s	2800 L/s
2 nd magnitude	10 to 100 ft ³ /s	280 to 2800 L/s
3 rd magnitude	1 to 10 ft ³ /s	28 to 280 L/s
4 th magnitude	100 US gal/min to 1 ft ³ /s (448 US gal/min)	6.3 to 28 L/s
5 th magnitude	10 to 100 gal/min	0.63 to 6.3 L/s
6 th magnitude	1 to 10 gal/min	63 to 630 mL/s
7 th magnitude	2 pint to 1 gal/min	8 to 63 mL/s
8 th magnitude	Less than 1 pint/min	8 mL/s
0 magnitude	No flow (sites of past/historic flow)	

Spell Level	Output Reduction in Gallons/Hour
1	10 lbs. * 3600 / 8.35 = 4,311 gallons/hour
2	40 lbs. * 3600 / 8.35 = 17,245 gallons/hour
3	90 lbs. * 3600 / 8.35 = 38,802 gallons/hour
4	160 lbs. * 3600 / 8.35 = 68,982 gallons/hour
5	250 lbs. * 3600 / 8.35 = 107,784 gallons/hour
6	360 lbs. * 3600 / 8.35 = 155,209 gallons/hour
7	490 lbs. * 3600 / 8.35 = 211,257 gallons/hour

8	640 lbs. * 3600 / 8.35 = 275,928 gallons/hour
9	810 lbs. * 3600 / 8.35 = 349,221 gallons/hour
10	1000 lbs. * 3600 / 8.35 = 431,137 gallons/hour
+1	=10*lvl ² * 3600 / 8.35

Statistics: Control Water (Accessibility, Only to dry springs, -80%; Extended Duration on Persistent, Permanent, +150%; Persistent, +40%; Sorcery, -15%) [19/level].

Dull Hearing

Keywords: Resisted (HT).

Full Cost: 22 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim gains a penalty to Hearing equal to your margin of victory (maximum -10). This spell can only affect sapient beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient subjects, -10%; Disadvantage, Acute Hearing -10, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [22].

Dull Taste and Smell

Keywords: Resisted (HT).

Full Cost: 22 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim gains a penalty to Taste and Smell equal to your margin of victory (maximum -10). This spell can only affect sapient beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient subjects, -10%; Disadvantage, Acute Taste and Smell -10, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [22].

Dull Touch

Keywords: Resisted (HT).

Full Cost: 22 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim gains a penalty to Touch equal to your margin of victory (maximum -10). This spell can only affect sapient beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient subjects, -10%; Disadvantage, Acute Touch -10, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [22].

Dull Vision

Keywords: Resisted (HT).

Full Cost: 22 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim gains a penalty to Vision equal to your margin of victory (maximum -10). This spell can only affect sapient beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient subjects, -10%; Disadvantage, Acute Vision -10, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [22].

Dullness

Keywords: Resisted (HT).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim suffers temporary Per loss equal to your margin of victory (maximum -10). Lower all skills based on Per by a like amount. This spell can only affect sapient beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient subjects, -10%; Disadvantage, Per-10, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [25].

Duodimensional Weapon

Keywords: Weapon Buff.

Full Cost: 36 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell transforms the weapon into a two-dimensional version of itself, converting the damage of a non-cutting attack from its usual damage type to cutting.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Duodimensional Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Duodimensional Weapon" is 26 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Cutting Strike imbue skill.

Duplicate

Keywords: None.

Full Cost: 116 points for level 1 + 4 points/additional level.

Casting Roll: IQ. May require other skills to make alterations. Special casting time (see below).

Range: Touch.

Duration: Indefinite.

This spell duplicates an actual item weighing 3 lbs. or less, which must be held or touched by you while the spell is cast; the duplicate appears in your hand. Note that (e.g.) "a loaded gun" would be a single object; you do not have to duplicate the gun and bullets separately!

This permits a mage with no knowledge of Armoury to create a gun – if he has another one handy to copy. It also permits perfect forgeries of works of art, money, documents, and so on.

The mage may also attempt to alter the creation. For instance, he could copy a sword and add inscribed runes, or forge a passport with a different name or picture, etc. In this case, normal rules for the caster's abilities apply; Forgery skill rolls may be required. A mage with no knowledge of guns could gold-plate a duplicate, but he couldn't modify the firing mechanism or ammunition capacity.

Unlike most spells, Duplicate requires 10 or 11 seconds to cast instead of the normal one or two seconds. If your roll fails, you fail to duplicate the object. If you fail, you can try again, but repeated attempts cost 3 FP (instead of the usual 1 FP) and take a cumulative -1 to the IQ roll, until you succeed or wait an hour.

A duplicate lasts indefinitely. That means, however, that if you want to cast this spell again, the first duplicate goes away as soon as you begin casting to create the second one. If you can maintain multiple spells (*Simultaneous Spells*; Sorcery, p. 8), you can keep multiple versions of Duplicate “on” to get around that problem.

Higher levels of this spell allow you to duplicate heavier, larger objects. However in no case can you duplicate an object weighting more than 2xBL; it must always be something you could hold in one hand.

Spell Level	Weight	Min. ST
1	3 lbs.	3
2	5 lbs.	4
3	7 lbs.	5
4	10 lbs.	5
5	15 lbs.	7
6	20 lbs.	8
7	30 lbs.	9
8	50 lbs.	12
9	70 lbs.	14
10	100 lbs.	16

For higher levels, look up the spell level in the “Size” column of the Size and Speed/Range Table (p. B550) and then read the corresponding “Linear Measurement” as pounds instead of yards. (Or note that every +6 levels corresponds to 10x weight.) See p. B17 to find minimum ST.

Statistics: Snatcher (Cosmic, Allows alterations, +50%; Improved, +10%; Less Weight, 3 lbs., -5%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Requires a sample object, -20%) [116]. Level 2 removes Less Weight (+5%) [+4] and additional levels add More Weight (+5%) [+4]. *Note:* The Improved enhancement eliminates the auto-fail on 14+.

Dust to Dust

Keywords: Resisted (HT).

Full Cost: 70 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Turns a living subject and all of that person’s gear into a fine dust that has no hope of reassembly into its old form.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Cosmic, Leaves no trace of the victim, +50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [70].

Dwarvish Reinforcement

Keywords: Buff.

Full Cost: 24 points for level 1 + 13.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell increases the DR and HT of a stone or metal item by 1 per level. The GM may impose a cap on the maximum level of this spell.

Statistics: Affliction 1 (HT; Accessibility, Only on stone or metal items, -20%; Advantage, Dwarvish Reinforcement, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [24]. *Notes:* “Dwarvish Reinforcement” is DR 1 (Magical, -10%) [5] + HT 1 (Magical, -10%) [9]. Each level adds additional Dwarvish Reinforcement to the Advantage enhancement (+50%) [+13.5*].

* Calculate the total cost then round *down*.

Dye

Keywords: Area (Special).

Full Cost: 18 points for level 1 + 6 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

Changes the color of any unliving material, as desired by the caster (note that hair is unliving, as is a thin outer layer of skin!). One the caster stops maintaining the spell, the color fades in 2d days, but is unaffected by ordinary washing or application of solvents.

Only a single, uniform, color can be produced – patterns are not possible, but only part of the subject may be affected if the caster desires.

You can change the color in an area up to the spell's level in radius.

Statistics: Control Solids 1 (Accessibility, Only to an uniform color, -5%; Cosmetic, Only to change color, -80%; Ranged, +40%; Selective Area, +20%; Sorcery, -15%) [18/level]. Each additional level adds Control Solids +1 (Accessibility, Only to an uniform color, -5%; Cosmetic, Only to change color, -80%; Only increases area of effect, -50%; Ranged, +40%; Selective Area, +20%; Sorcery, -15%) [6/level].

Dye Yellow

Keywords: Area (Special).

Full Cost: 6 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

Changes the color of any unliving material to yellow (note that hair is unliving, as is a thin outer layer of skin!). For the purposes of the spell, "yellow" includes amber, gold, light shades of yellow such as beige and cream, green-yellow shades including chartreuse yellow, and orange-yellow shades like dark goldenrod and golden poppy. One the caster stops maintaining the spell, the color fades in 2d days, but is unaffected by ordinary washing or application of solvents.

Only a single, uniform, color can be produced – patterns are not possible, but only part of the subject may be affected if the caster desires.

You can change the color in an area up to the spell's level in radius.

Statistics: Control Solids 1 (Accessibility, Only to yellow, -70%; Cosmetic, Only to change color, -80%; Ranged, +40%; Selective Area, +20%; Sorcery, -15%) [6/level]. Each additional level adds Control Solids +1 (Accessibility, Only to yellow, -70%; Cosmetic, Only to change color, -80%; Only increases area of effect, -50%; Ranged, +40%; Selective Area, +20%; Sorcery, -15%) [6/level].

Earth to Air

Keywords: None.

Full Cost: 6 points/level or 14 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

The basic (6 point/level) version of this spell allows you to turn earth or clay into breathable air. The improved version (14 points/level) also allows you to turn metal into breathable air. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The initial matter can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the volume of produced air as shown in the table below. 1 cubic foot of air is enough for one person to breathe for 1 minute.

Level	Mass	Sand (90 lbs./ft ³)	Dirt/Clay (100 lbs./ft ³)	Stone (140 lbs./ft ³)	Iron (490 lbs./ft ³)
1	10 lbs.	0.11 ft ³	0.10 ft ³	0.07 ft ³	0.02 ft ³
2	40 lbs.	0.44 ft ³	0.40 ft ³	0.29 ft ³	0.08 ft ³
3	90 lbs.	1.00 ft ³	0.90 ft ³	0.64 ft ³	0.18 ft ³
4	160 lbs.	1.78 ft ³	1.60 ft ³	1.14 ft ³	0.33 ft ³
5	250 lbs.	2.78 ft ³	2.50 ft ³	1.79 ft ³	0.51 ft ³
6	360 lbs.	4.00 ft ³	3.60 ft ³	2.57 ft ³	0.73 ft ³
7	490 lbs.	5.44 ft ³	4.90 ft ³	3.50 ft ³	1.00 ft ³
8	640 lbs.	7.11 ft ³	6.40 ft ³	4.57 ft ³	1.31 ft ³
9	810 lbs.	9.00 ft ³	8.10 ft ³	5.79 ft ³	1.65 ft ³
10	1000 lbs.	11.11 ft ³	10.00 ft ³	7.14 ft ³	2.04 ft ³
+1	=10*lvl ²	=mass/density			

Statistics: Create (Transmute Earth to Air, +40%; Transmutation Only, -100%; Magical, -10%) [6/level]. Improved version adds Transmute Metal to Air, +40% [+8/level].

Earth to Fluid

Keywords: None.

Full Cost: 22 points/level or 46 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

The basic (22 point/level) version of this spell allows you to turn earth or clay into breathable air, mud, or water. The improved version (46 points/level) also allows you to turn metal into breathable air, mud, or water. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The initial matter (and final matter, when transforming earth to mud or water) can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the volume of produced air as shown in the table below. 1 cubic foot of air is enough for one person to breathe for 1 minute.

Level	Mass	Sand (90 lbs./ft ³)	Dirt/Clay (100 lbs./ft ³)	Stone (140 lbs./ft ³)	Iron (490 lbs./ft ³)
1	10 lbs.	0.11 ft ³	0.10 ft ³	0.07 ft ³	0.02 ft ³
2	40 lbs.	0.44 ft ³	0.40 ft ³	0.29 ft ³	0.08 ft ³
3	90 lbs.	1.00 ft ³	0.90 ft ³	0.64 ft ³	0.18 ft ³
4	160 lbs.	1.78 ft ³	1.60 ft ³	1.14 ft ³	0.33 ft ³
5	250 lbs.	2.78 ft ³	2.50 ft ³	1.79 ft ³	0.51 ft ³
6	360 lbs.	4.00 ft ³	3.60 ft ³	2.57 ft ³	0.73 ft ³
7	490 lbs.	5.44 ft ³	4.90 ft ³	3.50 ft ³	1.00 ft ³
8	640 lbs.	7.11 ft ³	6.40 ft ³	4.57 ft ³	1.31 ft ³
9	810 lbs.	9.00 ft ³	8.10 ft ³	5.79 ft ³	1.65 ft ³
10	1000 lbs.	11.11 ft ³	10.00 ft ³	7.14 ft ³	2.04 ft ³
+1	=10*lvl ²	=mass/density			

Statistics: Create (Transmute Earth to Air, +40%; Transmute Earth to Mud, +40%; Transmute Earth to Water, +40%; Transmutation Only, -100%; Magical, -10%) [22/level]. Improved version adds

Transmute Metal to Air, +40%; Transmute Metal to Mud, +40%; Transmute Metal to Water, +40% [+24/level].

Earth to Glass

Keywords: None.

Full Cost: 14 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn earth, sand or clay into glass or obsidian. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Transmute Earth to Glass, +40%; Transmute Earth to Obsidian, +40%; Transmutation Only, -100%; Magical, -10%) [4/level].

Earth to Stone

Keywords: None.

Full Cost: 8 points/level or 18 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

The basic (8 point/level) version of this spell allows you to turn earth or clay into hard stone (but not gemstone). The improved version (18 points/level) also allows you to turn stone into simple metal like bronze or iron. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.)

The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Transmute Earth to Stone, +50%; Transmutation Only, -100%; Magical, -10%) [8/level]. Improved version adds Transmute Stone to Metal, +50% [+10/level].

Earth to Water

Keywords: None.

Full Cost: 14 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell allows you to turn earth or clay into mud or water. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Transmute Earth to Mud, +40%; Transmute Earth to Water, +40%; Transmutation Only, -100%; Magical, -10%) [14/level].

Earth Vision

Keywords: Buff.

Full Cost: 17 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the subject see through solid earth and stone. Each level of this spell allows the subject to see through up to six inches of earth and stone. The subject can just barely see the outline of the substance he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject’s other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Earth Vision 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Earth Vision to the Advantage enhancement [+5]. *Note:* Each level of “Earth Vision” is Penetrating Vision 1 (Magical, -10%; Specific, Earth, -40%) [5].

Earthbind

Keywords: Resisted (HT).

Full Cost: 29 points.

Casting Roll: Will.

Range: Unlimited.

Duration: One minute.

This spell paralyzes the subject’s wings, causing the subject to plummet to the ground.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Flight with Winged or Small Wings, +36%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [29].

Earthquake

Keywords: Area (Leveled).

Full Cost: 54 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

The caster causes the ground to shake for 10 seconds. Any creatures standing in the area of effect, must make a DX roll each second to remain standing.

Statistics: Affliction 1 (DX; Accessibility, Legs and similar supportive body parts only, -20%; Area Effect, 2 yards, +50%; Based on DX, +20%; Cosmic, Irresistible Attack, +300%; Environmental, Ground, -20%; Fixed Duration, +0%; No fatigue loss from Seizure, -20%; Persistent, +40%; Seizure, +100%; Sorcery, -15%; Variable, Area, +5%) [54]. Additional levels add further levels of Area Effect (+50%) to the advantage [+5].

Ease Labor

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell makes birth painless and trouble-free.

Statistics: Affliction 1 (HT; Accessibility, Only on pregnant women, -80%; Advantage, Ease Labor, +50%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Ease Labor" is Immunity to Childbirth Complications (Magical, -10%) [5].

Easy Rider

Keywords: Buff.

Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One minute.

The subject becomes easier to affect with all forms of teleportation, time travel, and plane shifting. Rolls to use such abilities on them are at +1.

Statistics: Affliction 1 (HT; Advantage, Easy Rider, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Easy Rider" is Easy Rider (Magical, -10%) [1].

Eat Crow

Keywords: Buff.

Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 minute.

The subject loses their sense of taste for the duration of this spell.

Statistics: Affliction 1 (HT; Disadvantage, No Sense of Smell/Taste (Taste Only, -50%), +2%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12].

Ecstasy

Keywords: Resisted (Will).

Full Cost: 35 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 10 seconds.

Sapient subject is incapacitated with overwhelming pleasure. Treat as Agony (p. B428), but neither Low Pain Threshold nor High Pain Threshold has any effect – and instead of a bonus for torture, someone offering to continue the pleasure gets +3 to any Influence roll! If the subject has Killjoy, he is immune. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Ecstasy, +100%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/10, -20%; Sorcery, -15%) [35].

Effulgent Epuration

Keywords: Buff.

Full Cost: 71 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes or until used up.

When you cast this spell, you bring forth one floating, silvery sphere about the size of your head. The sphere floats around the chosen subject, but by taking a Concentrate maneuver you can shift it to a different subject within one yard from the current subject. This spell “stacks” with itself – a subject can have more than one sphere at once. Each sphere negates one harmful spell or magical ability cast or used on the subject, then evaporates.

Statistics: Affliction 1 (HT; Advantage, Effulgent Epuration, +150%; Cumulative, +400%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Mobile 1, +40%; No Signature, +20%; Sorcery, -15%) [71].
Notes: “Effulgent Epuration” is Static (Magic; Discriminatory, +150%; Magical, -10%; Single Use, x1/5; Visible, -10%) [14] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1].

Ego Whip

Keywords: Resisted (Will).

Full Cost: 40 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

This spell overwhelms the sapient target’s ego, leaving the target feeling hopeless and unsure of itself. The target gains the Low Self-Image (p. B143) disadvantage.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Low Self-Image, +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [40].

Electric Vision

Keywords: Information.

Full Cost: 7 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

The caster can see electrical currents as glowing outlines. Electric lines are visible through a few inches of cover (drywall, wood, soil, etc.). This spell also reveals hidden electric devices.

Statistics: Detect Electric Fields (Sorcery, -15%; Vision-Based, -20%) [7].

Electric Burn

Keywords: Missile, Obvious.

Full Cost: 48 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: 10 seconds.

You fire a coruscating discharge of electricity that does 1d-1 burning surge damage. The electric charge continues to jump and sparkle across the target's body, damaging him again every second for 9 seconds. The cycles stop if the target physically touches another conductive target, making it suffer the remaining cycles. Metallic armor counts as DR 1 against this spell, but nonmetallic armor protects normally. Targets stuck by this spell must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Electric Burn behaves unpredictably around conductors; see *Lightning* (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d-1 (Cosmic, Contagious Cycles, +50%; Cyclic, 9 cycles, 1 second intervals, +900%; Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [48].

Electricity Vulnerability

Keywords: Resisted (HT).

Full Cost: 29/30/32 points for levels 1-3.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell makes the subject more vulnerable to electrical attacks. The subject multiplies any damage from electricity that penetrates its DR by 2 before applying any normal wounding multipliers. Level 2 of this spell increases the multiplier to 3, and level 3 increases the multiplier by 4.

Statistics: Affliction 1 (HT; Disadvantage, Vulnerability (Electricity, x2), +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. Additional levels improve Disadvantage, Vulnerability (Electricity, x2), +30% to Disadvantage, Vulnerability (Electricity, x3), +45% and Disadvantage, Vulnerability (Electricity, x4), +60%.

Elemental Body

Keywords: None.

Full Cost: 60 points or 140 points or more; see text.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume different elemental forms, as if using the Morph advantage (p. B84). The transformation requires 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any elemental creature he can turn into.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his “slots” are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a “slot”.

If the caster can assume any racial template worth no more than his native one, Elemental Body costs 60 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 60 points. For instance, a human who can take on any elemental racial template worth up to 75 points would pay 135 points for Elemental Body.

In addition, the caster may purchase the improved (140-point) version of this spell. This shortens the transformation time to 1 second.

Statistics: Morph (Accessibility, Elementals Only, -25%; Sorcery, -15%) [60]. The improved version adds Reduced Time 4, +80% [+80].

Ember

Keywords: Missile, Obvious.

Full Cost: 1 point.

Casting Roll: None. Use Innate Attack (Projectile) to aim.

Range: 10 yards.

Duration: Instantaneous.

This spell launches a spark from your hand. Consult *Making Things Burn* (p. B433) – a target rated from Super-Flammable to Highly Flammable ignites immediately. Anything more resistant to fire may catch if this spell is cast repeatedly and continuously. Roll 3d after every 10 seconds of uninterrupted casting; Flammable materials (including dry wood) catch on a 16 or less, while Resistant ones catch only on a 6 or less.

This spell does no actual damage to the object, though it will likely take damage from the resultant fire.

Statistics: Burning Attack 1 point (Increased 1/2D, 10x, +15%; No Wounding, -50%; Reduced Range, 1/10, -30%; Sorcery, -15%) [1].

Embolism

Keywords: Resisted (HT).

Full Cost: 54 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell creates a bubble of air within the subject’s circulatory system. If the target fails to resist, the result is stroke. Treat this as a mortal wound (p. B423): The victim immediately falls unconscious and must roll vs. HT every 30 minutes, with any failure meaning death. At TL6+, trauma maintenance can help.

Natural recovery occurs on a critical success on the HT roll. Otherwise, the only cure is brain surgery or an Instant Restoration spell. A victim who recovers is at -HP or current HP, whichever is worse. Critical failure on the HT roll required after recovering from a mortal wound costs the subject a level of IQ as well as the usual level of HT.

This can harm only living, breathing beings that have blood and brains. Doesn’t Breathe – or any form of Injury Tolerance that includes No Blood or No Brain – grants immunity.

Statistics: Affliction 1 (HT; Accessibility, Only on breathing living creatures, -15%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [54].

Emergency Flight

Keywords: None.

Full Cost: 8 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Used in case of an emergency by novice sorcerers, this spell lets you slowly fly by flapping your arms around like wings. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, you'll need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). You cannot fly in a trace atmosphere or vacuum.

Your flight Move is equal to your Basic Speed with all fractions dropped. You can also "fly" at half-speed underwater. You cannot hover - you must always move at least 1/4 your top airspeed (round up) when flying. You steer with your arms, if your arms are crippled in flight, roll against Aerobatics skill (or default) to land safely. You cannot use your arms for anything else when flying, you cannot even hold any items.

Statistics: Flight (Cannot Hover, -15%; Slow, Basic Speed, -25%; Small Wings, -10%; Sorcery, -15%; Temporary Disadvantage, No Fine Manipulators, -30%) [8].

Emergency Staff

Keywords: Buff.
Full Cost: 6 points.
Casting Roll: None. Use DX or unarmed combat skills to hit.
Range: Touch.
Duration: Three seconds.

Temporarily enchants a magic staff – see *Magic Staffs* (*GURPS Magic*, p. 13) for just enough time to switch to a different spell and cast it.

Statistics: Affliction 1 (HT; Advantage, Emergency Staff, +10%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [6]. *Note:* "Emergency Staff" is Magic Staff (Magical, -10%) [1].

Emotion Control

Keywords: Resisted (Will).
Full Cost: 68 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: 30 minutes.

Instills the subject(s) with any one emotion the caster chooses. There is no "game system" effect unless the GM feels it necessary, but subjects should roleplay it! Allowed emotions include anger, boredom, depression, disgust, fear, greed, hate, jealousy, joy, love, lust, patriotism, peace, sadness, and unrest. This spell can only affect sapient (IQ 6+) beings.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Emotion Control, -50%; Extended Duration, 10x, +40%; Independent, +70%; Sorcery, -15%) [68].

Emotive Block

Keywords: Buff.
Full Cost: 44 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

This spell grants to subject Indomitable (p. B60) and Unfazeable (p. 95).

Statistics: Affliction 1 (HT; Advantage, Emotive Block, +280%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Note:* “Emotive Block” is Indomitable (Magical, -10%) [14] + Unfazeable (Magical, -10%) [14].

Emperor’s New Clothes

Keywords: Armor Buff.

Full Cost: 43 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes a suit of armor or clothes invisible to creatures with IQ lower than provided by their racial template. For humans, this will affect humans with IQ 9 or lower.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Emperor’s New Clothes, +330%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [43]. *Notes:* “Emperor’s New Clothes” is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11) with a bought off -4 penalty [+32] and the Accessibility, Only against low IQ creatures, -40%. This spell is based on the Subtle Defense imbuelement skill from *Pyramid* #3-4.

Encrypt

Keywords: Buff.

Full Cost: 52 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 weeks.

When cast on any writing or other visual information medium, this spell makes it unreadable to any but the caster. Anyone can see the writing, but they will be convinced that it is hopelessly arcane, complex, or foreign.

Statistics: Affliction 1 (HT; Accessibility, Only on visual information mediums, -60%; Advantage, Encrypt, +300%; Extended Duration, 10,000x, +160%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [52]. *Note:* “Encrypt” is Obscure 10 (Reading; Magical, -10%; No Area of Effect, -50%; Selective Effect, Does not affect the caster, +10%; Stealthy, +100%) [26].

Endure Elements

Keywords: Buff.

Full Cost: 18 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject’s temperature comfort zone (between 35° and 90° for humans) extends by HT degrees in both directions per level of this spell.

Statistics: Affliction 1 (HT; Advantage, Endure Elements 1, +20%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. Additional levels add further Endure Elements to Advantage (+20%) [+2]. *Note:* Each level of “Endure Elements” is Temperature Tolerance 2 (Magical, -10%) [2].

Energizing Armor

Keywords: Armor Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The caster enchants the armor or shield so that it absorbs the energy it stops and reinvigorates the wearer. Each point of damage that the armor's DR stops – or the full damage of an attack that the wearer successfully blocks with his shield – becomes one character point that he can immediately use to improve his HP or FP. He can use points to heal lost FP (3 points per FP) or HP (2 points per HP); healing doesn't drain away, but the points are immediately removed from the pool. The wearer cannot reallocate points once they're spent. This effect cannot be combined with Vengeful Armor.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Energizing Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Energizing Armor" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Energizing Defense imbue skill from *Pyramid* #3-4.

Energy Transformation Field

Keywords: Area (Leveled), Obvious.

Full Cost: 248 points for level 1 + 33 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

The caster conjures a shimmering dome that transforms any energy attacks that cross its border into another type of energy. This resulting energy type must be chosen when this spell is cast, and it cannot be changed later. The energy types that can be affected or chosen as the output are the following:

Acid: Acid deals corrosion damage. If acid damage is the resulting damage type, then any attack transformed this way deals -2 damage per die.

Cold: Cold attacks deal non-incendiary burning damage or fatigue damage with the Freezing modifier. You must specify the exact variation when casting this spell.

Electricity: Electrical attacks deal burning damage and gain the surge modifier. It treats metallic armor with DR over 1 as DR 1. Any target that suffers even 1 point of damage from it must make a HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. If electricity is the resulting type of damage, then any attack transformed this way deals -2 damage per die.

Fire: Fire attacks deal burning damage.

Sound: Sonic attacks either deal non-incendiary burning damage or corrosion damage. If the corrosive sonic damage is the resulting damage type, then any attack transformed this way deals -2 damage per die. You must specify the exact variation when casting this spell.

Statistics: Energy Transformation Field (Accessibility, Energy type is determined upon casting, -10%; Accessibility, Only energy attacks, -20%; Affects Others, +50%; Area Effect, 2 yards, +50%; Cosmic, No die roll required, +100%; Extended Duration, 3x, +20%; Force Field, +20%; Magical, -10%; Persistent, +40%; Ranged, +40%; Variable, Area, +5%; Visible, -10%) [248]. Additional levels increase Area Effect (+50%) [+33]. *Note:* "Energy Transformation Field" is Imbue 3 (Limited Access, Four Skills, -20%) [32] + Unusual Training [1] + Burning Strike (VH) DX [8] + Chilling Strike (VH) DX [8] + Corrosive Strike (VH) DX [8] + Fulminating Strike (VH) DX [8] + Frost Strike [1] as per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11).

Energy Vulnerability

Keywords: Resisted (HT).

Full Cost: 30 points for level 1 + 2 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell makes the subject more vulnerable to energy attacks. The subject multiplies any energy damage that penetrates its DR by 2 before applying any normal wounding multipliers. Level 2 of this spell increases the multiplier to 3, and level 3 increases the multiplier by 4.

Statistics: Affliction 1 (HT; Disadvantage, Vulnerability (Energy, x2), +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30]. Additional levels improve Disadvantage, Vulnerability (Energy, x2), +40% to Disadvantage, Vulnerability (Energy, x3), +60% and Disadvantage, Vulnerability (Energy, x4), +80% [+2/level].

Enervation

Keywords: Resisted (HT).

Full Cost: 40 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim suffers temporary ST, DX, and HT loss equal to your margin of victory (maximum -10). Lower all skills based on these attributes by a like amount. ST penalties also reduce BL and damage. HP is not otherwise affected. FP and Basic Speed are not affected. Only living creatures can be affected by this spell.

Statistics: Affliction 1 (HT; Accessibility, Living creatures only, -10%; Attribute Penalty, ST-10, DX,-10, HT-10, +200%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [40].

Enlarge

Keywords: None.

Full Cost: 8.5/level* + ST to support the new size.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster grows in size! As his size increases, so must his ST (or he would collapse under his own weight). His equipment doesn't change size!

Each level of Enlarge lets the caster increase his Size Modifier by +1. Find his final height from the *Size Modifier Table* (p. B19). Increases in SM affect the caster's arm and leg length when calculating reach and determining whether he can negotiate obstacles; see *Size Modifier and Reach* (p. B402).

If the caster attempts to grow in a room, vehicle, container, etc. that isn't large enough to hold him, his growth normally stops. However, if maximum thrust damage for his current ST is greater than the wall or ceiling's DR, he bursts through it. This takes one second per point of DR.

The caster must buy the ST necessary to support his enlarged form. This is 5 x final height in yards. This ST is only available when he grows, and he must buy it with the Size limitation (see *Strength*, p. B14). Use the caster's maximum SM to determine the limitation value.

Statistics: Growth (Maximum Size Only, +0%; Sorcery, -15%) [8.5/level*].

* Calculate the total cost and round up.

Enlarge Object

Keywords: Resisted (HT).

Full Cost: 20 points for level 1 + 9 points/level + ST to support the new size.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

If the subject object fails to resist, the caster may enlarge it. As the subject's size increases, so must its ST (or it would collapse under its own weight).

Each level of Enlarge Object lets the caster increase his subject's Size Modifier by +1. Find the subject's final height from the *Size Modifier Table* (p. B19). If the caster attempts to enlarge the object in a room, vehicle, container, etc. that isn't large enough to hold it, its growth normally stops. However, if maximum thrust damage for the subject's current ST is greater than the wall or ceiling's DR, it bursts through it. This takes one second per point of DR.

The caster must buy the ST necessary to support the subject's enlarged form and add it to the Advantage enhancement. This is 5 x final height in yards. This ST is only available when the subject grows, and the caster must buy it with the Size limitation (see *Strength*, p. B14). Use the subject's maximum SM to determine the limitation value. Note that if this additional ST is not enough to support the enlarged form of the subject, the spell fails!

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Enlarge Object 1, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Notes:* Each level of "Enlarge Object" is Growth (Magical, -10%; Maximum Size Only, +0%) [9]. Additional levels further Enlarge Object to the Advantage enhancement [+9].

Enlarge Other

Keywords: Resisted (HT).

Full Cost: 20 points for level 1 + 9 points/level + ST to support the new size.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

If the subject creature fails to resist, the caster may enlarge it. As the subject's size increases, so must his ST (or he would collapse under his own weight). His equipment doesn't change size!

Each level of Enlarge Other lets the caster increase his subject's Size Modifier by +1. Find the subject's final height from the *Size Modifier Table* (p. B19). Increases in SM affect the subject's arm and leg length when calculating reach and determining whether he can negotiate obstacles; see *Size Modifier and Reach* (p. B402).

If the caster attempts to enlarge the subject in a room, vehicle, container, etc. that isn't large enough to hold him, his growth normally stops. However, if maximum thrust damage for the subject's current ST is greater than the wall or ceiling's DR, he bursts through it. This takes one second per point of DR.

The caster must buy the ST necessary to support the subject's enlarged form and add it to the Advantage enhancement. This is 5 x final height in yards. This ST is only available when the subject grows, and the caster must buy it with the Size limitation (see *Strength*, p. B14). Use the subject's maximum SM to determine the limitation value. Note that if this additional ST is not enough to support the enlarged form of the subject, the spell fails!

Statistics: Affliction 1 (HT; Accessibility, Only on creatures, -10%; Advantage, Enlarge Other 1, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Notes:* Each level of "Enlarge Other" is Growth (Magical, -10%; Maximum Size Only, +0%) [9]. Additional levels add further Enlarge Other to the Advantage enhancement [+9].

Enslave

Keywords: Resisted (Will).

Full Cost: 169 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Permanent.

You can mentally enslave a sapient subject you can see or touch. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550).

If you win, your charmed subject will obey your every command. In effect, he gains the Reprogrammable disadvantage (p. B150), with you as his master. You do not have to maintain concentration to control the subject.

If you attempt to force the subject to act against its principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the subject wins, it breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but it doesn't roll until it's about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

The caster can also establish a mental link with his slave by taking a Concentrate maneuver and making an IQ roll. This allows him to send verbal orders to his slave. Range is theoretically unlimited, but the IQ roll to establish the link takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see or otherwise sense his slave, he has an additional -1 penalty.

If successful, the slave hears the caster's voice but may not respond. The caster can also tap into his slave's senses. This lets him experience everything the slave experiences. If he is tortured, knocked out, or killed, the GM may require a Will roll to avoid stunning – or perhaps even a Fright Check! The caster may maintain a connection with that subject for as long as he'd like. No further rolls are normally required unless the range penalty worsens.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Independent, +70%; Sorcery, -15%) [148] + Mind Reading (Accessibility, Only with slaves, -50%; Link, +10%; Magical, -10%; Sensory Only, -20%; Telecommunication, -20%) [6] + Telesend (Accessibility, Only with slaves, -50%; Link, +10%; Magical, -10%) [15].

Entangling Staff

Keywords: Obvious.

Full Cost: 3 points/level.

Casting Roll: None. Use Staff to hit.

Range: Staff's Reach.

Duration: Permanent, until destroyed, or until the victim breaks free.

You cause a quarterstaff or a long staff to extrude writhing vines that grapple the subject that you successfully strike with the staff. Roll the Staff skill to hit your subject. On a hit, you deal normal damage, and your victim is grappled (see p. B370) and rooted in place. He cannot select the Move or Change Posture maneuvers or change facing, and is at -4 to DX. The ST of this effect is equal to your spell level, but you can recast this spell on a successfully bound victim to layer additional vines. Each extra layer gives +1 to ST.

To keep the victim grappled, you have to take a Ready maneuver every turn.

The vines actively constricts the victim. Until he breaks free, the vines attack him each turn with a Constriction Attack (p. B43), at a ST equal to the spell level.

To break free, the victim must win a Quick Contest of ST or Escape skill against the ST of your Entangling Staff. Each attempt takes one second. If the victim fails to break free, he loses 1 FP but may try again. Alternatively, he may try to destroy the vines. Innate Attacks hit automatically; other attacks are at -4. External attacks on the vines take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, p. B392).

The vines have DR equal to 1/3 your spell level (rounded down). Each point of damage reduces ST by one. At ST 0, the *staff* is destroyed and the victim is freed.

Statistics: Binding 1 (Constricting, +75%; Follow-Up, Staff, +0%; Requires Ready, -10%; Sorcery, -15%) [3/level].

Enthrall

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 39 points for level 1 + 5 points/additional level.

Casting Roll: Will or Public Speaking.

Range: Unlimited.

Duration: 1 hour.

The caster tells an enthralling tale. Sapient creatures within 2 yards (each additional levels doubles this radius) who knows the language and pays attention falls under the spell, resisting with Will. An hour of real time passes, but the victims notice only a minute slipping by. Anyone who resists will perceive the caster and his victims as paralyzed, although prolonged examination will reveal they are moving, very slowly. You can omit any creatures from the effect. Both the subjects and the caster are stunned (p. B420) when the effect ends and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures that share a language with the caster, -20%; Accessibility, Requires Words, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Daze, Variant, +50%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Hearing-Based, -20%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Caster is dazed too, -20%; Selective Area, +20%; Sorcery, -15%) [39]. Additional levels add Area Effect (+50%) [+5].

Entombment

Keywords: Resisted (HT).

Full Cost: 112 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

If the subject fails to resist, he is instantly swallowed by the earth. He remains in suspended animation (doesn't need to breathe, drink, eat, doesn't age) in a tiny spherical chamber 50 feet underground, until rescued by tunneling or the reverse of this spell.

A mage who casts Entombment on himself may elect to stay awake, but this is unwise unless he can create air!

Statistics: Affliction 1 (HT; Advantage, Suspended Animation, +590%; Environmental, Ground, -20%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Selectivity, Only to remove suspended animation on yourself, +5%; Terminal Condition, Freed by tunneling, -10%; Sorcery, -15%) [112]. *Note:* "Suspended Animation" is Doesn't Breathe (Magical, -10%) [18] + Doesn't Eat or Drink (Magical, -10%) [9] + Doesn't Sleep (Magical, -10%) [18] + Unaging (Magical, -10%) [14].

Entrap Spirit

Keywords: Area (Leveled), Obvious.

Full Cost: 70 points for level 1 + 25 points/additional level (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Indefinite.

The sorcerer conjures a ward that repels (or at least slows) all spirits. This ward must be cast on a watertight sealed container, chamber, or building, and does not extend beyond it. Thus, the affected object must be fully within the area of effect. Any spirit wishing to cross the barrier may try to force its way through it as a free action (one attempt per turn): the foe rolls thrust damage and if this overcomes the Entrap Spirit's DR, it gets through. This dispels the ward. If another creature from without opens the container or chamber, the ward dispels. Slams and collisions with the ward inflict their usual damage for the purpose of breaking through, but the collider takes no damage, as the dome absorbs kinetic force.

The ward gives DR against all attacks made by spirits.

By default, Entrap Spirit provides DR 10. However, more potent versions are available that multiply DR and full cost (actually 112.5 before rounding) by the same amount:

DR	Full Cost
10	70 points for level 1 + 25 points/additional level
20	140 points for level 1 + 50 points/additional level
30	210 points for level 1 + 75 points/additional level

50	350 points for level 1 + 125 points/additional level
100	700 points for level 1 + 250 points/additional level

Statistics: Damage Resistance 10 (Accessibility, Only on watertight containers, -40%; Affects Others, +50%; Area Effect, 2 yards, +50%; Force Field, +20%; Limited, Spirits, -60%; Ranged, +40%; Sorcery, -15%; Terminal Condition, Opening the container, -10%; Variable, Area, +5%) [70]. Additional levels increase Area Effect (+50%) [+25]. More powerful versions multiply DR by 2, 3, 5, or 10. *Note:* “Does not damage those colliding with it” is a 0-point special effect of DR with Affects Others, Area Effect, and Force Field.

Enveloping Winds

Keywords: None.

Full Cost: 14 points/level.

Casting Roll: IQ

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can momentarily envelop themselves in winds to turn aside incoming physical projectiles. When the caster is targeted by a physical projectile attack, they may roll to cast this spell. If the spell succeeds, and if the attack’s basic damage is less than (Enveloping Winds level) x 2 dice, the attack automatically misses. Convert all flat damage to dice (as per p. B269) for this determination.

This spell also deflects non-damaging physical projectiles; each level of Enveloping Winds can negate two levels of Affliction or 10 levels of Binding. Against most area effects and explosions, it stops only the fragmentation damage (shrapnel), not the explosion itself.

This spell only works in the presence of air – it will not work underwater or in vacuum.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Enveloping Winds, they cannot cast this spell until *all* FP are replenished.

Statistics: Damage Resistance 7 (All-or-Nothing, -10%; Environmental, Air, -5%; Force Field, +20%; Limited, Physical Projectiles, -40%; Requires IQ Roll, -10%; Sorcery, -15%) [14/level] with each DR 7 converted into 2d per p. B269. The ruling on Affliction and Binding is from p. 168 of *GURPS Powers*.

Essentia Lock

Keywords: Resisted (HT).

Full Cost: 33 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell freezes the subject’s essentia in place, preventing the subject from spending essentia to activate abilities, but also making it impossible to increase or decrease the subject’s essentia amount by other means.

Statistics: Neutralize Incarnum (Based on HT, +20%; One Ability, ER, -80%; Ranged, +40%; Sorcery, -15%) [33].

Essential Acid

Keywords: None.

Full Cost: 32 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create essential acid, also called alkahest (*GURPS Magic*, page 220). To do so, take a Concentrate maneuver and roll vs. IQ. Success means the alkahest coalesces in hand (which will probably hurt you) or within arm's reach (for example, within a flask you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced alkahest can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created alkahest is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

You can opt to create a minuscule amount of alkahest in combat without worrying about long-term stability. It just produces its effects and vanishes. Alkahest appears in quantity and concentration sufficient to inflict 1d corrosion damage per level, once, on a single subject, and leaves a lingering effect that deals 1 point of corrosion damage per second, for a number of seconds equal to the number of dice. This effect can only be removed by rinsing the targeted zone with Essential Water. Resist Acid only halves the damage of alkahest spells, instead of rendering the target immune. You must immerse a victim in the substance or throw it at him to do damage.

Statistics: Create Acid (Cosmic, Essential Element, +50%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [32/level].

Essential Air

Keywords: None.

Full Cost: 8 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create essential air where none exists. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the air appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The caster can fill an area up to one yard in radius per level with air. 1 cubic foot of essential air is enough for one person to breathe for 3 minutes.

Essential air is “purer” and can be used (breathed or consumed) three times as long before becoming foul. Fire burns hotter (but not faster) in essential air, adding an extra point of damage to each die (this will even increase the heat of Essential Flame!). If the air is created in an open area, it disperses within 5 seconds.

Statistics: Create Air (Cosmic, Essential Element, +50%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [8/level].

Essential Earth

Keywords: None.

Full Cost: 32 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create the magical essence of earth. Essential Earth is three times as fertile: plants germinate three times faster and grow three times taller or bigger than normal. To create essential earth, take a Concentrate maneuver and roll vs. IQ. Success means the essential earth appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced essential earth can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created essential earth is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Essential Earth (Cosmic, Essential Material, +50%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [32/level].

Essential Fire

Keywords: Area (Leveled).

Full Cost: 17 points for level 1 + 2.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

You may create a patch of Essential Fire, which will burn regardless of fuel for the next five minutes. Any mage can tell the difference by looking. It cannot be extinguished by ordinary water or ordinary magic, but only by a similar quantity of Essential Water or by a Dispel Magic spell. If there is fuel available, it will begin spreading immediately and will continue to burn on its own afterward.

The basic (17-point) version of this spell lets you create fire in up to a two-yard radius. Every additional 2.5 points double this radius: four yards for 20 points, eight yards for 22 points, and so on. You may always choose to affect a smaller area.

Statistics: Burning Attack 1d (Area Effect, 2 yards, +50%; Cosmic, Cannot be extinguished by normal means, +100%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [17]. Improved versions add Area Effect (+50%/level) [+2.5*].

* Calculate the total cost and round up.

Essential Food

Keywords: None.

Full Cost: 80 points for level 1 + 4 points/additional level.

Casting Roll: IQ or Cooking. Special casting time (see below).

Range: Touch.

Duration: Indefinite.

You can create any mundane food weighing 3 lbs. or less; it appears in your hand. Note that (e.g.) “a stew” would be a single object; you do not have to create all the ingredients separately! After it is created, it immediately becomes Essential Food! It never spoils and is incredibly nutritious. Six meals of Essential Food weigh only a pound.

Unlike most spells, Essential Food requires 10 or 11 seconds to cast instead of the normal one or two seconds. If your roll fails, you create the wrong thing. The difference depends on your margin of failure; if you're trying to conjure fried dumplings, failure by 1 might give you cooked dumplings, while failure by 5 would give you a piece of dough! If you fail, you can try again, but repeated attempts cost 3 FP (instead of the usual 1 FP) and take a cumulative -1 to the IQ roll, until you succeed or wait an hour.

A created object lasts indefinitely. That means, however, that if you want to cast this spell again, the first object goes away as soon as you begin casting to create the second one. If you can maintain multiple spells (*Simultaneous Spells*, *Sorcery*, p. 8), you can keep multiple versions of Essential Food "on" to get around that problem.

Higher levels of this spell allow you to create heavier, larger objects. However in no case can you create an object weighting more than 2xBL; it must always be something you could hold in one hand.

Spell Level	Weight	Min. ST
1	3 lbs.	3
2	5 lbs.	4
3	7 lbs.	5
4	10 lbs.	5
5	15 lbs.	7
6	20 lbs.	8
7	30 lbs.	9
8	50 lbs.	12
9	70 lbs.	14
10	100 lbs.	16

For higher levels, look up the spell level in the "Size" column of the Size and Speed/Range Table (p. B550) and then read the corresponding "Linear Measurement" as pounds instead of yards. (Or note that every +6 levels corresponds to 10x weight.) See p. B17 to find minimum ST.

Statistics: Snatcher (Accessibility, Only mundane food, -40%; Cosmic, Essential, +50%; Improved, +10%; Less Weight, 3 lbs., -5%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Unpredictable, -25%) [80]. Level 2 removes Less Weight (+5%) [+4] and additional levels add More Weight (+5%) [+4]. *Note:* The Improved enhancement eliminates the auto-fail on 14+.

Essential Fuel

Keywords: None.

Full Cost: 18 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn any fuel into the magical essence of fuel. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

Essential Fuel burns 10 times as long as regular fuel, with one-third the usual pollution (smoke, radiation, etc.). Vehicles running on Essential Fuel have 10 times the Range.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Cosmic, Essential, +50%; Transmute Fuel to Essential Fuel, +50%; Transmutation Only, -100%; Magical, -10%) [18/level].

Essential Glass

Keywords: None.

Full Cost: 8 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create the magical essence of glass. Essential Glass is three times as strong (DR and HP) and utterly flawless. In addition to being stronger, optics that are made from such glass get an extra level of Telescopic Vision, Acute Vision, or Microscopic Vision compared to similar, mundane versions of the same size, weight, and TL. To create essential glass, take a Concentrate maneuver and roll vs. IQ. Success means the essential glass appears in hand or within arm’s reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

The produced essential glass can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created essential glass is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign’s average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Essential Glass (Cosmic, Essential Material, +50%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [8/level].

Essential Gunpowder

Keywords: None.

Full Cost: 4.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn regular gunpowder into the magical essence of gunpowder. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

Essential Gunpowder does not spoil, get wet, or ever go bad. This improves the Malfunction number by 3 when using ammo that contains Essential Gunpowder. If used in the manufacture of match-grade or extra powerful ammunition, it doubles the normal benefits and drawbacks. This can also be incorporated into explosive powders, but not something like C4 or detonating cord. For explosive powders enhanced with Essential Gunpowder, only double the REF.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Cosmic, Essential, +50%; Transmute Gunpowder to Essential Gunpowder, +50%; Transmutation Only, -100%; Magical, -10%) [4.5/level*].

* Calculate the total cost, then round up.

Essential Metal

Keywords: None.

Full Cost: 32 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create the magical essence of metal. To do so, take a Concentrate maneuver and roll vs. IQ. Success means the Essential Metal appears in hand or within arm's reach (for example, within a container you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced Essential Metal can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Essential Metal is three times as strong (HP and DR) as iron, and a framework or beam of Essential Metal supports three times as much weight. This metal is also lighter and brighter than ordinary metals, having many of the properties of orichalcum.

Created Essential Metal is unstable. It vanishes in 10 seconds unless you use character points to "stabilize" it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Metal (Cosmic, Essential Material, +50%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [32/level].

Essential Paper

Keywords: None.

Full Cost: 4.5 points/level*.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn paper into the magical essence of paper. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. Note that a stack of 907 A4 sheets of paper weighs 10 lbs., so a single level of this spell is usually more than enough.

Essential Paper is three times as strong as and has twice the HP of regular paper. It is one step harder to ignite, but if lit burns three times as long. It does not become moldy even in damp, and thus is immune to the depredations of booklice and similar pests. Anyone using Writing, Poetry, Typing, or Artist (Drawing or Illumination) to compose a work on a page, book, or parchment that is made of Essential Paper adds +3 to his skill. The created work often seems unusually alive, ready to leap off the page. Paper airplanes made from essential paper fly three times as far as usual.

Essential paper is unstable. It reverts back in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Cosmic, Essential, +50%; Transmute Paper to Essential Paper, +50%; Transmutation Only, -100%; Magical, -10%) [4.5/level*].

* Calculate the total cost then round up.

Essential Water

Keywords: None.

Full Cost: 8 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create essential water. It extinguishes any type of fire in the same proportion that ordinary water extinguishes ordinary fire. It is also three times as thirst-quenching as ordinary water – in other words, a mere quart of Essential Water will keep someone hydrated for a full day of exertion in hot climates (p. B426). To do so, take a Concentrate maneuver and roll vs. IQ. Success means the essential water coalesces in hand or within arm's reach (for example, within a flask you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced essential water can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created essential water is unstable. It vanishes in 10 seconds unless you use character points to “stabilize” it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Water (Cosmic, Essential Element, +50%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [8/level].

Essential Wood

Keywords: None.

Full Cost: 9 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn any dead wood into the magical essence of wood. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

Essential Wood is three times as strong as regular wood, with three times the HP and DR listed on p. B558, and three times the ability to support weight. It is difficult to ignite with regular flames (Highly Resistant, according to the chart on p. B433), but once lit burns three times as long. It also burns hotter, adding an extra point of damage to each die (this will even increase the heat of Essential Flame!).

If the product is worth more than what you started with, it’s unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign’s average starting wealth. (This is just the tradeoff used for *Trading Points for Money*, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Cosmic, Essential, +50%; Transmute Wood to Essential Wood, +50%; Transmutation Only, -100%; Magical, -10%) [9/level].

Ethereal Body

Keywords: Buff.

Full Cost: 92 points or 172 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Your subject slips into the space between worlds and becomes intangible, passing through solid objects as though they weren’t there. In this state the subject makes no noise when he moves. The

subject can perceive the tangible world, and speak normally to those within it, but he cannot pick up normal objects or affect them in any way.

Physical and energy attacks cannot harm the subject, but he is still vulnerable to psionic and (nonmaterial) magical attacks. Likewise, his physical and energy attacks cannot affect physical opponents. His psi abilities and magic spells can affect the physical world.

Although the subject can pass through solids, he must still breathe. When moving through a solid object, treat this as if he was swimming underwater for purposes of suffocation. He cannot materialize inside a solid object.

The subject can carry objects up to his light encumbrance while insubstantial, including clothing and armor. They become physical if dropped. He cannot materialize these objects inside other objects or characters.

The subject can't disregard gravity. He must move across a horizontal surface, or along a slope that wouldn't require Climbing rolls. He still weighs nothing, so he doesn't leave footprints and can walk on surfaces that wouldn't support a solid body, such as the surface of a body of water.

The basic (92-point) version of this spell cannot affect targets that have any abilities that can affect the substantial world when they are insubstantial – including magic, psionics, or powers with the Affects Substantial enhancement (p. B102). The improved (172-point) version can affect such creatures.

Statistics: Affliction 1 (HT; Advantage, Ethereal Body, +800%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [92]. *Notes:* "Ethereal Body" is Insubstantiality (Can Carry Objects, Light Encumbrance, +20%; No Vertical Move, -10%; Magical, -10%) [80]. The improved version adds the Affects Substantial, +100% to Insubstantiality [+80].

Euphoria

Keywords: Resisted (Will).

Full Cost: 30 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The sapient subject experiences euphoria. While under effects of this spell, the subject has a -3 penalty to all DX, IQ, skill, and self-control rolls.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Euphoria, +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30].

Euthanize

Keywords: None.

Full Cost: 40 points.

Casting Roll: None. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

The caster painlessly kills a living *willing* subject.

Statistics: Affliction 1 (HT; Accessibility, Only on living willing beings, -50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, +300%; Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%) [40].

Everchanging Self

Keywords: None.

Full Cost: 4 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell causes the caster's body to change shape and appearance constantly, with skin hue and texture, number of limbs, and all other physical attributes changing continually. The everchanging "slides" of shape ruin most clothing and armor (rigid armor will linger for seconds equal to its DR, dealing the caster 1 point of injury per second, then fall off, as the caster's body slides out of it), but effectively conceal the caster's identity. The constantly changing body shape gives the caster DR 1 with the Tough Skin limitation and Flexibility (p. B56). However, the caster also suffers a -1 penalty to DX and is terrible to behold – everyone reacts at -5 to him.

Statistics: DR 1 (Cannot Wear Armor, -40%; Magical, -10%; Temporary Disadvantage, Appearance (Monstrous) and -1 DX, -40%; Tough Skin, -40%) [1] + Flexibility (Sorcery, -15%; Temporary Disadvantage, Appearance (Monstrous) and -1 DX, -40%) [3].

Evisceration

Keywords: Resisted (HT).

Full Cost: 51 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

Reach with one hand into a subject's body and withdraw a vital organ, leaving an open cavity. The caster must touch the bare skin of the appropriate body part, armor prevents organ extraction.

Extracting the brain instantly kills the body, but the brain itself may survive for a few minutes! Roll vs. HT each second; on a success, the brain remains alive and conscious but loses 1 FP; on a failure, it dies. While it survives, it can cast any spells it knows well enough to cast without ritual. Remember that the brain has no senses of its own and is therefore casting blindly.

Extracting the heart demands a HT-6 roll each turn from the victim; on a failure he falls unconscious and dies five seconds later.

Extracting other organs requires a HT roll at a penalty from 0 to -5 to remain conscious. Most extractions kill within a minute; however, some organ losses can be survived – a lung, a kidney, etc. In this case, the victim will still bleed seriously.

Restoration is required to replace a lost organ. An extracted organ dies within a minute.

Statistics: Affliction 1 (HT; Accessibility, Only on beings with organs, -10%; Contact Agent, -30%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%) [51].

Exacting Shot

Keywords: Weapon Buff.

Full Cost: 13 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell gives a ranged weapon +1 to skill rolls to hit per level. It is recommended that the GM allow at most a bonus equal to $[(\text{setting's TL})/2 + 1]$ for bonuses to skill rolls.

Statistics: Affliction 1 (HT; Accessibility, Only on ranged weapons, -30%; Advantage, Exacting Shot 1, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [13]. Additional levels add further Exacting Shot to the Advantage enhancement [+4]. *Note:* Each level of "Exacting Shot" is DX 1 (Accessibility, Only attacks with this weapon, -80%; Magical, -10%) [4/level].

Exchange Bodies

Keywords: Resisted (Will).

Full Cost: 85 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

The caster can move his consciousness from body to body. In theory, he could live forever this way, moving from dying bodies to healthy ones. However, he cannot survive outside a living host. Should his current body die, he will die! Thus, he must keep his current host alive.

To possess a creature, the caster must concentrate for one second and physically touch him. The victim resists at +5 if he is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that subject again – he is “immune” to him. If the caster wins, he takes over his victim’s body, and his host’s mind moves into the caster’s previous body – in effect, the caster and the victim “trade places.” The caster can remain swapped indefinitely, though the GM may charge him character points if he decides to retain an “upgraded” body – see *Mind Transfer* (p. B296) for more.

The caster gains his new host’s ST, DX, and HT (and secondary characteristics calculated from these scores), as well as his physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster’s social traits may apply, depending on the laws and values of his society. The caster’s IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

The caster has no access to the victim’s memories.

Statistics: Possession (Mind Swap, +10%; No Memory Access, -10%; Sorcery, -15%) [85].

Exclude (Ethical Category)

Keywords: Area (Leveled).

Full Cost: 203 points for level 1 + 25 points/additional level (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The sorcerer conjures a translucent dome that repels (or at least slows) all attacks (both mundane and magical) made by beings of a specific ethical alignment (evil, chaos, good, order, etc.), contains such beings inside, even if they are insubstantial. Any being of the specified ethical alignment wishing to cross the barrier may try to force its way through it as a free action (one attempt per turn): the creature rolls thrust damage and if this overcomes the spell’s DR, it gets through. This does not dispel the spell, which simply seals closed behind the creature. Slams and collisions with the spell inflict their usual damage for the purpose of breaking through, but the collider takes no damage, as the barrier absorbs kinetic force.

Spells can be cast within the dome, but no spell, except for the summoning ones, can cross its barrier in either direction. Jet and Missile spells that hit the dome simply dissipate rather than contesting its DR.

This spell must be cast on a star-shaped figure drawn on the floor or ground. If part of the pentagram is cut or erased, its power will be lost until the caster can rejoin the pentagram – all this requires is a piece of chalk and time (usually just a second) to draw the line.

By default, Exclude (Ethical Category) provides DR 10. However, more potent versions are available that multiply DR and full cost by the same amount:

DR	Full Cost
10	203 points for level 1 + 25 points/additional level
20	363 points for level 1 + 50 points/additional level
30	523 points for level 1 + 75 points/additional level
50	843 points for level 1 + 125 points/additional level
100	1686 points for level 1 + 250 points/additional level

Statistics: Damage Resistance 10 (Accessibility, Must be cast on a pentagram, -40%; Affects Insubstantial, +20%; Affects Others, +50%; Area Effect, 2 yards, +50%; Extended Duration, 300x, +100%; Force Field, +20%; Limited, Ethical Category, -40%; Ranged, +40%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Visible, -10%) [160] + Rules Exemption (Magical abilities can coexist with anti-

magical Static) [1] + Static (Magic; Accessibility, Ethical Category, -40%; Accessibility, Must be cast on a pentagram, -40%; Area Effect, 2 yards, +100%; Only around the border of the area, -0%; Ranged, +40%; Magical, -10%; Visible, -10%) [42]. Additional levels increase Area Effect (+50%) [+25 and +15]. More powerful versions leave Rules Exemption and Static as is but multiply DR and the cost of DR by 2, 3, 5, or 10. As a special effect, this forms a hemispherical dome, not a cylinder.

Explode

Keywords: Resisted (HT).

Full Cost: 29 points/level.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Deals 2d damage to the subject (works only on inanimate items) per level of the spell. See p. B557, for DR and HP of various items. DR does not protect against this! If the spell destroys the subject, it explodes violently, doing [2d] cutting fragmentation damage.

Statistics: Crushing Attack 2d (Accessibility, Fragmentation only upon destruction, -10%; Accessibility, Only on objects, -10%; Based on HT, +20%; Fragmentation [2d], +30%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29/level].

Explode Head

Keywords: Resisted (Will).

Full Cost: 34 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell causes incredible pressure to build in the target's head; this spell works only on a material creature that has a head. A roll to resist failed by less than 5 mentally stuns the target, allowing them to roll against IQ again once per second to recover. If the victim fails by 5 or more, or rolls a critical failure, their head explodes. The target immediately dies, unless it can survive without a head.

Statistics: Affliction 1 (Will; Accessibility, Only on material targets with a head, -15%; Based on Will, +20%; Disadvantage, Secondary Fragile (Enhanced Unnatural), +20%; Malediction 2, +150%; No Signature, +20%; Secondary Heart Attack, +60%; Sorcery, -15%) [34]. *Note:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies.

Exploding Vegetable

Keywords: Resisted (HT).

Full Cost: 12 points/level.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Deals 1d damage to the subject (works only on tomatoes, ears of corn, heads of lettuce, grapefruits, oranges, and similar products) per level of the spell. See p. B557, for DR and HP of various items. DR does not protect against this! If the spell does not do enough damage to actually break the subject, the subject takes no harm.

If the spell destroys the subject, it explodes violently, doing [2d] cutting fragmentation damage.

Statistics: Crushing Attack 1d (Accessibility, Only on vegetables, -75%; All-or-Nothing, -10%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Fragmentation [2d], +30%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [12/level].

Explosive Hellfire Orb

Keywords: Area (Fixed), Missile, Obvious.
Full Cost: 12.5 points/level.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You throw an orb of hellfire that expands to cover an area; it is not technically an explosion, but the term has long since entered common use. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes dice of burning damage equal to your level of this spell with an armor divisor of (2). In addition, hellfire can harm insubstantial beings. The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid dropping this at your own feet, where it detonates!

Statistics: Burning Attack (Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Armor Divisor, (2), +50%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [12.5/level].

Explosive Lightning

Keywords: Area (Fixed), Missile, Obvious.
Full Cost: 16.5 points/level*.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 100 yards.
Duration: Instantaneous.

You fire a coruscating discharge of electricity that expands to cover an area; it is not technically an explosion, but the term has long since entered common use. Use Innate Attack (Beam) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes dice of burning surge damage equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Explosive Lightning behaves unpredictably around conductors; see Lightning (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Area Effect, 4 yards, +100%; Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [16.5/level*].

* Calculate the total cost and then round up.

Explosive Mine

Keywords: None.
Full Cost: 8 points/level.
Casting Roll: None. Use DX or unarmed combat skill to hit.
Range: Touch.
Duration: Permanent or until discharged.

A small patch of ground – one hex on a battle map – becomes magically unstable. There's no mundane way to spot the trap, but it's obvious to Detect Magic, Mage Sight, and so on.

The first time anyone or anything weighing at least 5 lbs. moves onto the subject hex, the ground itself explodes and the spell ends. This does 1d crushing explosive (see *Explosions* (p. B414) for rules for explosive damage) damage per level of this spell, plus incidental fragmentation (1d-4 cutting per fragment) to everyone within five yards.

Falling onto an Explosive Mine is deadly! This is a contact explosion, meaning the victim takes maximum possible damage (but protects others with "cover DR" equal to torso DR + HP).

Also roll the spell's damage dice against the ground or floor itself. If this reduces the surface to 0 or fewer HP, it leaves a crater that counts as bad footing. If there's open space underneath, this is an actual hole to the level below, 2" in diameter per damage die.

Statistics: Crushing Attack (Environmental, Ground, -20%; Explosion 1, +50%; Fragmentation, [1d-4 cut], +10%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Triggered Delay, Stepping, +50%; Sorcery, -15%) [8/level].

Explosive Runes

Keywords: Area (Fixed), Obvious.

Full Cost: 12 points/level.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent or until discharged.

You touch a surface, casting magical runes into being. When read by anyone you did not specify during casting, the runes explode. Everyone within four yards of the impact point takes dice of crushing damage equal to your level of this spell. This force damages insubstantial beings as well as substantial ones. The GM must determine what the maximum level available in the campaign is.

Statistics: Crushing Attack (Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Melee Attack, Reach C, Cannot Parry, -35%; Triggered Delay, Reading, +50%; Selective Effect, +20%; Sorcery, -15%) [12/level].

Explosive Weapon

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell allows the weapon to produce shockwaves. With a melee weapon, the wielder drives it into the ground. This causes a blast that is centered on the wielder but doesn't harm him; the wielder makes a combat skill roll to execute this move, but does not attack a specific foe. For a ranged weapon, the projectile blows up or causes a massive shockwave wherever it hits; check for scatter (p. B414).

Treat the weapon's damage as if it had the Explosion modifier (p. B104), regardless of damage type. Divide damage by three times the distance in yards to each target. This divisor may be reduced by taking additional spell levels, as shown on the table below.

Level	Damage Division
1	By three times the distance in yards
2	By twice the distance in yards
3	By the distance in yards

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Explosive Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Explosive Weapon" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Shockwave imbue skill.

Extend Object

Keywords: Resisted (HT).

Full Cost: 15 points for level 1 + 4 points/level + ST to support the new size.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

If the subject object fails to resist, the caster may enlarge it in one dimension. As the subject's size increases, so must its ST (or it would collapse under its own weight).

Each level of Extend Object lets the caster increase his subject's Size Modifier in one dimension by +1. Find the subject's final height or length from the *Size Modifier Table* (p. B19). If the caster attempts to enlarge the object in a room, vehicle, container, etc. that isn't large enough to hold it, its growth normally stops. However, if maximum thrust damage for the subject's current ST is greater than the wall or ceiling's DR, it bursts through it. This takes one second per point of DR.

The caster must buy the ST necessary to support the subject's enlarged form and add it to the Advantage enhancement. This is 5 x final height in yards. This ST is only available when the subject grows, and the caster must buy it with the Size limitation (see *Strength*, p. B14). Use the subject's maximum SM to determine the limitation value. Note that if this additional ST is not enough to support the enlarged form of the subject, the spell fails!

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Extend Object 1, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. *Notes:* Each level of "Extend Object" is Growth (Magical, -10%; Maximum Size Only, +0%; One dimension only, -50%) [4]. Additional levels add further Extend Object to the Advantage enhancement [+4].

Extended Hearing

Keywords: None or Buff.

Full Cost: 2 or 20 points.

Casting Roll: Hearing-3 for the basic version. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

The subject becomes able to barely hear sounds covered by Ultrahearing and Subsonic Hearing. The environment must be silent in the normal audible range, and the subject must make an active Hearing roll at -3. This never gives skill bonuses

The basic (2-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (20-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Extended Hearing (High; Sorcery, -15%) [1] + Extended Hearing (Low; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Extended Hearing, +20%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Notes:* "Extended Hearing" is Extended Hearing (High; Magical, -10%) [1] + Extended Hearing (Low; Magical, -10%) [1]. The two advantages in the basic version act as a single advantage that only costs 1 FP total.

Extinguish Radiation

Keywords: Area (Special).

Full Cost: 30 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Instantaneous.

Within a radius equal to your level in this spell, all radiation immediately goes out and stays out. If you can only affect part of a larger radiation source, you may put it out one patch at a time; there is no risk of the existing radiation spreading back into the extinguished areas. (However, if someone creates a new source of radiation, unrelated to the initial one, it may spread there.)

Statistics: Create Radiation (Destruction Only, +0%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 1, +20%) [30/level].

Extispicy

Keywords: Information.

Full Cost: 39 or 89 points.
Casting Roll: IQ. Special casting time (see below).
Range: Touch.
Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Extispicy is divination by examining the entrails of a slaughtered animal (must be at least 20 pounds). It is illegal in many areas. Only one question can be asked per animal. Extispicy is most useful in divining matters of life and death: sickness and health, war and peace, victory and defeat – all are good candidates for extispicy. When asking a question regarding something else, roll at -4.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (39-point) version of this spell requires 10 minutes to cast! The improved (89-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 4, +20%; Reliable 4, Only when asking about life and death, +10%; Trigger, Animal corpse, -15%) [39]. The improved version adds Reduced Time 10 (+200%) [+50].

Extract Poison

Keywords: None.
Full Cost: 12 points.
Casting Roll: Poisons/TL.
Range: 10 yards.
Duration: Instantaneous.

The caster casts this spell on a poisonous animal, fungus, plant, or other substance, and instantly extracts it, containing it to a container he is holding. Note that it only applies to poisonous creatures, not *poisoned* creatures.

Statistics: Telekinesis 1 (One Task, Extracting poison, -60%; Reduced Time 10, +200%; Sorcery, -15%) [12].

Extradimensional Shift

Keywords: None.
Full Cost: 282 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

The caster shifts his body – or part of it – into four-dimensional space, along with objects weighing up to 2xBL. He can always breathe while in four-dimensional space.

He can bypass three-dimensional obstacles. He can attempt a Power Dodge against any three-dimensional attack, sidestepping in the fourth dimension.

He can become invisible by moving into the fourth dimension – but because electromagnetic radiation, including light, is three-dimensional, he loses the ability to see unless he can also cast Hypervision. Finding his way through hyperspace blind requires a roll against Body Sense (*GURPS Powers – The Weird*, p. 5). If the caster is adjacent to three-dimensional space, he can reach into it and manipulate objects (at -5 to skill for working by touch; see p. B233) or even strike or grapple foes (at -6 to the attack roll if he is used to hyperspace, -10 otherwise; see p. B547). He can't speak or make sounds while hyperspatial.

He has the option of skimming along three-dimensional space, catching glimpses of his position and tactical situation. This gives your invisibility the equivalent of a fringe effect: others can spot you at -6 to Vision and attack you at -6 to hit. However, it opens up a variety of combat options (*Four-*

Dimensional Combat, GURPS Powers – The Weird, p. 26). He gets +4 to Shadowing attempts if he can make a Body Sense roll for each Shadowing roll.

Statistics: Insubstantiality (Hyperspatial; Can Carry Objects, Light Encumbrance, +20%; Ghost Air, +10%; Partial Change, Can turn carried objects substantial, +100%; Sorcery, -15%) [172] + Invisibility (Hyperspatial; Accessibility, Only to three-dimensional beings, -10%; Accessibility, Only while insubstantial, -10%; Affects Machines, +50%; Can Carry Objects, Light Encumbrance, +20%; Extended, All senses, +100%; Fringe, -10%; Switchable, +10%; Magical, -10%) [96] + Invisibility (Hyperspatial; Accessibility, Only to three-dimensional beings, -10%; Accessibility, Only while insubstantial, -10%; Affects Machines, +50%; Can Carry Objects, Light Encumbrance, +20%; Extended, All senses, +100%; Switchable, +10%; Temporary Disadvantage, Blindness (Only to three-dimensional space, -10%), -45%; Temporary Disadvantage, Mute, -25%; Magical, -10%) [15]. The second instance of Invisibility is an alternative ability (x1/5 cost) to the first.

Eye Ray: Animate Dead

Keywords: Obvious.

Full Cost: 32 points.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can animate corpses without touching them, using a gray eye ray. The corpse should have no more than 18 HP (corpses are Unliving objects). An inhabited corpse can grab, lift, strike, and throw with ST equal to its HP. It has the caster's DX. Move equals to 18 – the corpse's HP.

Statistics: Telekinesis 18 (Accessibility, Corpses only, -20%; Animation, -20%; Sorcery, -15%; Visible, -10%) [32].

Eye Ray: Boneshatter

Keywords: Missile, Obvious.

Full Cost: 18 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a gray eye ray that shatters the victim's bones or chitin. If the victim fails an unpenalized HT roll to resist (DR does not add a bonus), he takes 1d crushing damage per level of the spell, ignoring DR.

Statistics: Crushing Attack 1d (Accessibility, Only creatures with a skeleton or chitin, -10%; Cosmic, Irresistible Attack, +300%; Increased 1/2D, 10x, +15%; Resistible, HT, -30%; Sorcery, -15%) [18/level].

Eye Ray: Charm

Keywords: Missile, Obvious.

Full Cost: 55 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 3 minutes.

You fire a purple eye ray that charms the subject it hits. On hit, the subject resists with an unopposed Will roll. This spell can only affect sapient creatures.

If he fails, he will obey your every command for 3 minutes. In effect, he temporarily gains the Reprogrammable disadvantage (B150), with you as his master. You do not have to maintain concentration to control the subject.

If you attempt to force the subject to act against its principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the subject wins, it breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but it doesn't roll until it's about to leap.

If he resists, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Independent, +70%; Sorcery, -15%; Weaponized, -50%) [55].

Eye Ray: Death

Keywords: Missile, Obvious.

Full Cost: 40 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a dark purple eye ray that causes the subject to suffer a heart attack (B429), if he fails to resist with an unopposed HT roll.

Statistics: Affliction 1 (HT; Heart Attack, +300%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [40].

Eye Ray: Disintegrate

Keywords: Missile, Obvious.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Three minutes or instantaneous.

The sorcerer fires an orange eye ray that has the potential to turn any inanimate object to dust! On hit, the target resists with an unopposed (HT+SM) roll. If the target's HT is unknown, assume that machines have HT 10 and simple objects have HT 12, modified for quality: -2 for cheap, +1 for fine, +2 for very fine.

If the target fails by 5 or more, the target immediately disintegrates. It cannot be repaired or recovered by any mundane means. If it fails by less, the object survives, but for the next three minutes, its HT is at -5 and its DR is reduced by 10; if it's a weapon, treat it as cheap for breakage purposes, or an extra +2 to break if already cheap. (Most casters will follow up with a second Disintegrate casting, as the target is nearly guaranteed to lose by a large margin.) If he loses or ties, there is no effect.

Disintegrate must affect objects as a whole; it cannot target part of an object. The GM has the final say over what constitutes a "whole" object.

Statistics: Affliction 1 (HT; Accessibility, Inanimate objects only, -10%; Attribute Penalty, HT-5, +50%; Cosmic, Object disintegrates if destroyed, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Advantage, Reduced DR 10, +50%; Secondary Destruction, +60%; Sorcery, -15%) [30]. Note: "Destruction" is a variant of Heart Attack appropriate for inanimate objects, which simply break rather than suffering mortal conditions.

Eye Ray: Dispel

Keywords: Missile, Obvious, Resisted (Will or spell).

Full Cost: 23 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a light blue eye ray that attempts to dispel a single instance of magic. The ray must target the subject of the spell, which can be a person, object, or area. For areas, calculate range to the center of the area. The caster must state which spell he is attempting to counter.

Treat the resistance roll as for Dispel Magic (see *GURPS Thaumatology: Sorcery*, p. 21), but instead of a Quick Contest resolve it as an unopposed roll. This spell cannot end Truly Permanent effects, such as the magic of enchanted items.

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Accessibility, One spell at a time, -5%; Increased 1/2D, 10x, +15%; Interruption, -50%; Precise, +20%; Ranged, +40%; Sorcery, -15%; Weaponized, -50%) [23].

Eye Ray: Enervation

Keywords: Missile, Obvious.

Full Cost: 24 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 3 minutes.

You fire a black eye ray that drains energy from your target. On hit, the victim resists with an unopposed (HT+DR) roll. If he loses, the victim suffers temporary ST, DX, and HT loss equal to his margin of failure (maximum -10). Lower all skills based on these attributes by a like amount. ST penalties also reduce BL and damage. HP is not otherwise affected. FP and Basic Speed are not affected. Only living creatures can be affected by this spell.

Statistics: Affliction 1 (HT; Accessibility, Living creatures only, -10%; Attribute Penalty, ST-10, DX,-10, HT-10, +200%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [24].

Eye Ray: Exhaustion

Keywords: Missile, Obvious.

Full Cost: 10 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a gray eye ray that inflicts 1d fatigue damage per level of the spell.

Statistics: Fatigue Attack 1d (Increased 1/2D, 10x, +15%; Sorcery, -15%) [10/level].

Eye Ray: Fear

Keywords: Missile, Obvious.

Full Cost: 29 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a black eye ray that terrifies your subject. On hit, the subject resists with an unopposed Will roll. If he fails, roll 3d for the result, as usual, and add his margin of failure. Your victim gets +1 per Fright Check after the first within 24 hours. If a victim succeeds at his Fright Check, he will be unaffected by your Eye Ray: Fear for one hour.

Statistics: Terror (Accessibility, Only on sapient beings, -10%; Active, +0%; Increased 1/2D, 10x, +15%; Increased Range, x10, +30%; Presence, +25%; Sorcery, -15%; Weaponized, -50%) [29].

Eye Ray: Flesh Sear

Keywords: Missile, Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a red eye ray that magically sears away flesh from the bone, inflicting 1d corrosion damage per level of the spell, but only to organic matter.

Statistics: Corrosion Attack 1d (Accessibility, Only against organics, -20%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [8/level].

Eye Ray: Flesh to Stone

Keywords: Missile, Obvious.

Full Cost: 45 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Permanent.

You fire a brown eye ray that can turn a living subject into stone! If he fails to resist with an unopposed HT roll, his body and anything he is carrying become stone. This cannot be undone via Dispel Magic (*GURPS Thaumatology - Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology - Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53).

Statistics: Affliction 1 (HT; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; Paralysis, Variant, +150%; Sorcery, -15%) [45].

Eye Ray: Inflict Wounds

Keywords: Missile, Obvious.

Full Cost: 4 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a black eye ray that inflicts 1d toxic damage per level of the spell.

Statistics: Toxic Attack 1d (Increased 1/2D, 10x, +15%; Sorcery, -15%) [4/level].

Eye Ray: Insanity

Keywords: Missile, Obvious.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Permanent.

The caster fires a white eye ray that makes the subject permanently insane, if he fails to resist with a (Will+DR) roll. The subject gains Phantom Voices (Annoying) (p. B148) and Berserk (6) with the Battle Rage enhancement (p. B124).

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Berserk (6), Battle Rage, +30%; Disadvantage, Phantom Voices (Annoying), +5%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [31].

Eye Ray: Paralysis

Keywords: Missile, Obvious.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 3 minutes.

The caster fires a white eye ray that paralyses the subject for 3 minutes, if he fails to resist with a (HT+DR) roll. After that, the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Paralysis, +150%; Sorcery, -15%) [25].

Eye Ray: Scorch

Keywords: Missile, Obvious.

Full Cost: 5 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a red eye ray that inflicts 1d tight-beam burning damage per level of the spell.

Statistics: Burning Attack 1d (Increased 1/2D, 10x, +15%; Sorcery, -15%) [5/level].

Eye Ray: Sleep

Keywords: Missile, Obvious.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 3 minutes.

The caster fires a green eye ray that makes the subject fall asleep for 3 minutes, if he fails to resist with a (Will+DR) roll. After this, he can be woken normally, but he will not necessarily wake up right away, especially if already tired. Upon waking up, the subject is stunned (p. B420) and may roll vs. Will once per second to recover. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Sleep, +150%; Sorcery, -15%) [26].

Eye Ray: Slow

Keywords: Missile, Obvious.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 9 seconds.

You fire a white eye ray that slows the subject down, if he fails to resist with an unopposed Will roll. Decrease Move in all mediums by 40%, rounding down, to a minimum of 1, apply a -4 penalty to DX and a -1 penalty to Dodge. The penalty to DX affects all DX-based skills, but does not decrease Basic Speed or Basic Move.

Statistics: Affliction 1 (Will; Attribute Penalty, DX-4, +40%; Based on Will, +20%; Disadvantage, Reduced Dodge 1, +15%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Reduced Duration, 1/20, -25%; Slower Move, 0.6x, +20%; Sorcery, -15%) [17].

Eye Ray: Stun

Keywords: Missile, Obvious.

Full Cost: 11 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a dark blue eye ray that mentally stuns the subject, if he fails to resist with a (Will+DR) roll. On subsequent turns, he can recover normally by making an unpenalized IQ roll. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [11].

Eye Ray: Telekinesis

Keywords: Obvious.

Full Cost: 4 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Indefinite.

You can move objects without touching them, using a yellow eye ray. To affect something, you must first hit it with the eye ray – this is a ranged attack with Acc 3 that uses your Innate Attack (Gaze) roll. You lift and move distant objects just as if you were grasping them in a pair of hands with ST equal to your Eye Ray: Telekinesis level. You can move any object you have strength enough to lift at Move 1, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17). Regardless of level, maximum range is 100 yards.

Eye Ray: Telekinesis requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Eye Ray: Telekinesis may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pick up an object, a Move maneuver to lift and carry it, or Attack to grapple or punch somebody, etc.

No rolls are necessary for ordinary lifting and movement. In situations where you would roll against ST, roll against your Eye Ray: Telekinesis level instead. DX-based rolls use the caster's DX.

Statistics: Telekinesis 1 (Cannot Affect Self, -20%; Increased Range, 10x, +30%; Requires Innate Attack Roll, -5%; Sorcery, -15%; Visible, -10%) [4]. Each additional level adds Telekinesis 1 (Cannot Affect Self, -20%; Increased Range, 10x, +30%; Lift Only, -20%; Requires Innate Attack Roll, -5%; Sorcery, -15%; Visible, -10%) [3].

Eye Ray: Unholy Blight

Keywords: Missile, Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a black eye ray of unholy energy. This does not affect unholy beings, but when it strikes any other creature, it deals 1d non-incendiary burning damage per level. If it strikes a holy being, it deals double damage and forces the victim to make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Burning Attack 1d (Accessibility, Not against unholy beings, -5%; Double damage against holy beings, +50%; Increased 1/2D, 10x, +15%; No Incendiary Effect, -10%; Side Effect, Stunning, Only against holy beings, +25%; Sorcery, -15%) [8/level].

Faerie Fire

Keywords: Resisted (Will).

Full Cost: 30 points.

Casting Roll: Will.

Range: 100 yards.

Duration: 3 minutes.

This spell causes the subject to emit blue, green, or purple (chosen by the caster) light equivalent to a torch. This light makes the subject very obvious – the spell gives +10 to Vision rolls to see him or -10 to your Stealth rolls, as the situation warrants.

Statistics: Affliction 1 (Will; Advantage, Faerie Fire, +10%; Based on Will, +20%; Disadvantage, Noisy 5, Visual, +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* "Faerie Fire" is Illumination (Magical, -10%) [1].

Faith Magic Zone

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 49 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

This spell causes the casting of all arcane spells in the area of effect to be slowed. Every creature and object in the area acts as if they had Decreased Time Rate (p. B129), but only for the purpose of casting arcane spells or using other magical abilities. Anyone entering the area must resist each second or become slowed likewise. Anyone leaving the area stops being affected by this spell.

In addition, any creature under this slowing effect also benefits from Magic Resistance 1 with the Improved enhancement (p. B67).

Statistics: Affliction 1 (Will; Advantage, Faith Magic Zone, +50%; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Decreased Time Rate, Only for the purpose of using magic, +80%; Extended Duration on Persistent, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; Low Signature, +10%; Persistent, +40%; Reduced Duration, 1/3, -10%; Reduced Duration, 1/180, Only after the target leaves the area, -35%; Sorcery, -15%; Variable, Area, +5%) [49]. Additional levels add more Area Effect (+50%) [+5]. *Note:* "Faith Magic Zone" is Magic Resistance 1 (Magical, -10%; Improved, +150%) [5].

Falling Sky

Keywords: Area (Leveled).

Full Cost: 11 points for level 1 + 2.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You may instantaneously raise air pressure in a two-yard-radius area to extreme levels. Pressure Support has no effect against this large-area injury (p. B400). To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect.

Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, +1 for earplugs, +5 for Protected Hearing. Failure inflicts a Hearing penalty equal to margin of failure; failure by 10+, or critical failure, causes deafness. Either effect lasts (20 - HT) minutes, minimum one minute. After that, roll vs. HT each turn to recover. Critical failure on a recovery roll indicates a permanent injury (*Duration of Crippling Injuries*, p. B422): Hard of Hearing if the penalty was -1 to -9, Deafness if deafness occurred. Protected Hearing cuts duration to two seconds and makes recovery automatic. Any failure on the initial HT roll also stuns the victim; roll vs. HT each turn to recover.

This spell is ineffective in vacuum, underwater, in solid earth, etc. – there must be a gaseous atmosphere of some kind.

The basic (11-point) version of this spell covers a two-yard radius. For each additional 2.5 points, you may double this radius; e.g., four yards for 14 points, 8 yards for 16 points, or 16 yards for 19 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Crushing Attack 1d (Area Effect, 2 yards, +50%; Environmental, Air, -5%; Side Effect, Deafness, Margin-Based, +35%; Side Effect, Stunning, +50%; Sorcery, -15%; Variable, Area, +5%) [11]. Further levels add Area Effect (+50%) to the advantage [+2.5*].

* Calculate the total cost, then round up.

False Aura

Keywords: Area (Leveled).

Full Cost: 34 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use IQ or Artist (Illusion) to determine how convincing the illusion is.

Range: 100 yards.

Duration: Indefinite.

This illusion replaces magical emanations in the area with false ones. For instance, humans in the area could be made to have the auras of Zombies, weapons could appear to be enchanted with Penetrating Weapon, the area itself could appear to be under the effects of Grease, etc. The caster must concentrate to change the illusion.

The caster must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per or Information spell skill of anyone they want to fool; otherwise something “off” is noticed. Do not apply range penalties to the caster’s roll. Creatures inspecting the False Aura roll at +4 if they have reason to be alert for illusions or +10 if the caster replaced the emanations from out of nowhere (for example, if the original aura was already under the inspection of the Detect Magic spell). However, even if they successfully “disbelieve,” the illusion does not disappear. Thus, even an obviously false aura can be useful to disguise the true aura of in the area.

Statistics: Illusion (Alters magical auras instead of creating visible images, -0%; Independence, +40%; Ranged, +40%; Sorcery, -15%; Visual Only, -30%) [34]. Additional levels add Area Effect (+50%) to the False Aura advantage [+12.5*].

* Calculate the total cost and then round down (because the base ability costs just 12.5 points before rounding). Level 2 of the spell costs 41 points, level 3 costs 54 points, level 4 costs 66 points, level 5 costs 79 points, and so on.

False Life

Keywords: Buff.

Full Cost: 18 points for level 1 + 6 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You imbue the subject with false life. He gains DR 5 per level of this spell. This DR covers eyes as well as the whole body. This DR is ablative - it stops damage once. Each point of DR stops one point of basic damage but is destroyed in the process. Lost DR “heals” at the same rate as lost HP (including the effects of Regeneration, p. B80).

Statistics: Affliction 1 (HT; Advantage, False Life 1, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Notes:* Each level of “False Life” is DR 5 (Ablative, -80%; Magical, -10%) [5] + Nictitating Membrane 5 (Ablative, -80%; Magical, -10%) [1]. Each additional level adds more levels of False Life to the Advantage enhancement [+6].

False Memory

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to add the disadvantage.

Range: Unlimited.

Duration: Three days.

You can implant a temporary false memory in the subject’s mind, adding him the Delusions (see p. B130) disadvantage. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject. You may substitute Brainwashing for IQ, if better. You are at -1 per full -5 points of disadvantages applied. This spell can only affect sapient beings.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to add Delusions, -40%; Conditioning Only, -50%; Fixed Duration, +0%; Sorcery, -15%) [10].

False Resurrection

Keywords: Buff.

Full Cost: 227 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 1 minute.

You can temporarily bring a formerly living creature back from the dead, if his body is not completely destroyed (-10xHP or worse). You must touch the corpse to affect it. If the subject does not want to come back (GM's opinion, for NPCs), the spell fails automatically. This subject recovers 60 HP in 1 minute – if this brings him back above -HP before the duration ends, he returns to life! But if it's not enough, or if the initial HT roll fails, he cannot be resurrected. The subject only remains alive for as many days as his HT. After this time, he must make a HT-4 every hour, with failure indicating that he crumples to dust. He cannot be brought back to life ever again.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Advantage, False Resurrection, +2,250%; Aftermath, Delayed Death, -50%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [227]. *Notes:* "False Resurrection" is Regeneration (Very Fast; Cosmic, Works on the dead, +50%) [150] + Unkillable 1 (Cosmic, Works on the dead, +50%) [75]. This version of Cosmic means it *only* works on the dead – not injured living creatures – and gives one try, ever.

False Tracks

Keywords: Buff.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject leaves tracks that appear to be those of some animal or other being, determined by the caster during the casting. A Quick Contest between a tracker's Tracking skill and the caster's Naturalist skill determines whether or not the tracker is fooled.

Statistics: Affliction 1 (HT; Advantage, False Tracks, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "False Tracks" is Different Footprints (Magical, -10%) [1].

Far-Feeling

Keywords: None.

Full Cost: 65 points.

Casting Roll: IQ.

Range: 10 yards.

Duration: Indefinite.

You can displace your touch to a point outside your body. This "viewpoint" must be a specific location within 10 yards. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if your desired viewpoint is out of sight.

On a success, you can use your touch as if you were physically present at the viewpoint. You can touch the environment around your body while using your ability. You can still only pay attention to one touch. At the start of each turn in combat, state whether you're giving priority to your natural touch or your remote one. All tasks that depend on the touch you aren't prioritizing – including Sense rolls – are at -4.

If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Far-Feeling for as long as you like.

On failure by 1, your touch goes to some other viewpoint of the GM's choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced touch, move it elsewhere, or change its facing as a free action. A viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part.

Statistics: Clairsentience (Aware, +50%; Clairtelligence, -70%; Fixed Range, -5%; Second Nature, +70%; Sorcery, -15%) [65]. Notes: *Clairtelligence* is taken from Ravens N' Pennies [blog post](#).

Far-Tasting

Keywords: None.

Full Cost: 65 points.

Casting Roll: IQ.

Range: 10 yards.

Duration: Indefinite.

You can displace your taste to a point outside your body. This "viewpoint" must be a specific location within 10 yards. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if your desired viewpoint is out of sight.

On a success, you can use your taste as if you were physically present at the viewpoint. You can taste the environment around your body while using your ability. You can still only pay attention to one taste. At the start of each turn in combat, state whether you're giving priority to your natural taste or your remote one. All tasks that depend on the taste you aren't prioritizing – including Sense rolls – are at -4.

If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Far-Tasting for as long as you like.

On failure by 1, your taste goes to some other viewpoint of the GM's choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced taste, move it elsewhere, or change its facing as a free action. A viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part.

Statistics: Clairsentience (Aware, +50%; Clairgustance, -70%; Fixed Range, -5%; Second Nature, +70%; Sorcery, -15%) [65]. Notes: *Clairgustance* is taken from Ravens N' Pennies [blog post](#).

Far Shot

Keywords: Weapon Buff.

Full Cost: 36 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell gives a ranged weapon more range, according to the following table. The progression is open-ended – one can determine the range modifiers for higher levels, if necessary.

Level	1/2D and Max	Level	1/2D and Max
1	x2	4	x20
2	x5	5	x50
3	x10	6	x100

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Far Shot, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. Notes: "Far Shot" is 26 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -2 in penalties [+16]. This spell is based on the Far Shot imbue ment skill.

Fascinate

Keywords: Resisted (Will).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

Holds the subject (a sapient being) motionless and unaware of the passage of time as long as the caster maintains eye contact and concentration, up to the spell's duration. If the subject is struck, slapped, or shaken, they recover on their next turn. When the spell ends, the subject is stunned until they can make a Will roll (roll once per second).

Statistics: Affliction 1 (Will; Accessibility, Sapient beings only, -10%; Based on Will, +20%; Daze, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Have to maintain eye contact, -15%; Requires Concentrate, -15%; Sorcery, -15%; Vision-Based, -20%) [27].

Fascinating Song

Keywords: Area (Leveled), Baneful Song, Resistible (Will).

Full Cost: 26 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. Roll a Quick Contest of Will vs. Will plus any Magic Resistance the subject has. This is a mind control effect, so anyone with Immunity to Mind Control is immune to the effects of this song. This song can only affect sapient creatures. The song's effects last for margin of victory seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Victims who fail to resist may do nothing, standing and listening to the Fascinating Song for the duration. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover. If attacked, otherwise harmed, or simply shaken by an ally, they recover at once and are fine until they fail another resistance roll.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures, -10%; Baneful Song, +105%; Costs Fatigue, 1 FP, -5%; Daze, +50%; No Signature, +20%) [26]. Additional levels add Area Effect (+50%) [+5].

Fast Fire (Unofficial Sorcery Errata)

Keywords: Area (Special).

Full Cost: 45 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can make a fire with a radius up to spell level in yards burn more quickly. It does double damage and consumes fuel at twice the normal rate.

Statistics: Control Fire 1 (Only to increase potency, -80%; Ranged, +40%; Sorcery, -15%) [9] + Control Fire +9 (Does not increase area, -50%; Only to increase potency, -80%; Ranged, +40%; Sorcery, -15%) [36]. Each additional level adds Control Fire +1 (Only increases area, -50%; Only to increase potency, -80%; Ranged, +40%; Sorcery, -15%) [4].

Fast Plant Growth

Keywords: Resisted (HT).

Full Cost: 15 points for level 1 + 9 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

If the subject non-intelligent plant or a hex of non-intelligent plants fails to resist, the caster may enlarge it.

Each level of Fast Plant Growth lets the caster make the plants in the target hex stretch and monstrosly sprout to fill an adjacent hex. With the *Density of Vegetation* rules (*GURPS Magic – Plant Spells*, p. 6), the caster may raise the density level of a hex *instead* of adding a new one (except an Impenetrable hex, which will not change). A newly filled hex has the same density as the hex from which it spread.

Plants that pile up against a fixed object do (1d x Talent) crushing damage per minute. Use the rules for structural damage on pp. B558-559. Movable objects are shoved as per *Lifting and Moving Things* (p. B353); BL is 15 x Talent. Any ambulatory being can evade the expanding plant life. Those who cannot are shoved as inanimate objects. If pushed against a solid barrier, the shoved individual suffers 1/10 of the crushing damage inflicted each turn.

Statistics: Affliction 1 (HT; Accessibility, Only on non-intelligent plants, -60%; Advantage, Fast Plant Growth, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. *Notes*: “Fast Plant Growth” is Growth (Variant; Magical, -10%; Maximum Size Only, +0%) [9]. Additional levels add additional levels of Fast Plant Growth to the Advantage enhancement [+9].

Fasten

Keywords: None.

Full Cost: 45 points/level.

Casting Roll: None. Use DX or Knot-Tying+4 to tie knots.

Range: 10 yards.

Duration: Instantaneous.

Ties up the subject with a length of rope or chain (which is not created by the spell, only animated). Roll against DX or Knot-Tying+4. (Add Talent, as usual.) This is an instantaneous attempt. The effective ST of this spell is equal to 4*spell level. An actively resisting subject can use any active defense to dodge the bindings.

Statistics: Telekinesis 4 (One Task, Tying Up, -60%; Reduced Time 10, +200%; Sorcery, -15%) [45]. Each additional level adds Telekinesis 4 (One Task, Tying Up, -60%; Reduced Time 10, +200%; Sorcery, -15%) [+45]. *Note*: The +4 is the usual fine-work task bonus for tying up.

Fate of Oedipus

Keywords: Buff.

Full Cost: 141 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject becomes protected from scrying. Every creature viewing the subject via remote senses, such as scrying spells, Clairvoyance, etc. must roll a Quick Contest of its HT against the subject's Will every second, using *Long-Distance Modifiers* (p. B241). A failure causes the scryer's eyes to burn out, blinding him permanently. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or Restore Sight.

Statistics: Affliction 1 (HT; Advantage, Fate of Oedipus, +1,290%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [141]. *Note*: “Fate of Oedipus” is Affliction 1 (HT; Area Effect, 32,768 yards*, +700%; Aura, +80%; Cosmic, Immune to Dispel Magic, +50%; Disadvantage,

Blindness, +50%; Extended Duration, Permanent, +150%; Malediction 3, +200%; Melee Attack, Reach C, -30%; Magical, -10%; No Signature, +20%; Scrying-Based, -20%) [129].

* This level of Area Effect is enough to cover a planet with a radius of 10,435 yards or below, Earth included.

Fatigue

Keywords: Resisted (HT).

Full Cost: 11 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

If the victim fails to resist, he takes 1d-2 fatigue damage.

Statistics: Fatigue Attack 1d-2 (Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [11].

Fatiguing Weapon

Keywords: Weapon Buff.

Full Cost: 36 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell imbues the weapon with life-draining qualities. It converts the damage of a non-fatigue attack from its usual damage type to fatigue.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Fatiguing Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Fatiguing Weapon" is 26 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Fatiguing Strike imbue skill.

Fear

Keywords: Resisted (Will).

Full Cost: 3 points.

Casting Roll: Will.

Range: Self.

Duration: 1 minute.

The caster can radiate an aura of fear. Every sapient being he wishes to affect resists with Will, at a bonus based on their distance from the caster (use the bonus under *Size on the Size and Speed/Range Table*, p. B550). If a subject resists, the caster has his attention, but he reacts normally. Those the caster chooses not to affect see nothing special about the caster.

Anyone who fails rolls on the Reaction Table (p. B560) with a +3 bonus – or the caster can add +3 to an Influence Roll (p. B359) against that person. All other modifiers, such as situational modifiers, apply. This bonus can be used *only* in situations where threats are effective (such as potential combat situations). In other situations, it may even provide a -3 penalty!

Statistics: Charisma 3 (Accessibility, Only on sapient beings, -10%; Accessibility, Only in situations where threats are effective, -35%; Nuisance Effect, May provide a penalty in inappropriate situations, -15%; Requires Will vs. Will Roll, -15%; Selective Area, +20%; Short-Range 2, -20%; Sorcery, -15%) [3].

Feather Fall

Keywords: Buff.

Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject becomes able to glide through the air. He cannot gain altitude. With a running leap, he can launch himself with an air Move equal to Basic Move. Each turn, he can change velocity by up to 10 yards/second x local gravity in Gs. To accelerate, he must descend by 1 yard for each 1 yard/second added to velocity; top speed is Basic Move x 4 (but he can go faster if towed). To decelerate, he must fly level. If he does not descend at least 1 yard, he automatically decelerates by 1 yard/second that turn. When working out turning radius, the subject's basic air Move is 10 x local gravity in Gs.

Statistics: Affliction 1 (HT; Advantage, Feather Fall, +160%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Feather Fall" is Flight (Gliding, -50%; Magical, -10%) [16].

Feathers

Keywords: Buff.

Full Cost: 19 or 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 90 minutes.

The subject grows feathers. These prevent sunburn and help shed water, eliminating up to -2 in penalties for being wet – notably for *Cold* (p. B430). The improved (26-point) version makes the subject grow thick feathers that also provide DR 2*.

Statistics: Affliction 1 (HT; Advantage, Feathers, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Notes:* "Feathers" is Feathers (Magical, -10%) [1]. The improved version adds DR 2 (Flexible, -20%; Magical, -10%) [+7].

Feed

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

This spell creates an invisible force that can use whatever kitchen utensils are available to feed somebody within the range. If no utensils are available, then it can feed as if using a pair of hands. The caster can switch targets at any time. In situations where ST is important (force-feeding, cutting tough meat, etc.) this spell has effective ST 4.

Statistics: Telekinesis 4 (Independent, +40%; One Task, Feeding, -80%; Sorcery, -15%) [9].

Fertilize Egg

Keywords: None.

Full Cost: 20 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent.

This spell makes any egg that is whole, and not broken, cooked or rotten, fresh and viable. If properly incubated and tended, eventually it will hatch. If not properly tended, it will eventually die or rot, though this spell can be used to refresh the egg again.

Statistics: Affliction 1 (HT; Accessibility, Only on eggs, -80%; Advantage, Fertilize Egg, +50%; Extended Duration, Permanent, +150%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%) [20]. *Note:* "Fertilize Egg" is Fertility Control (Variant; Magical, -10%; Reduced Time 17, +340%) [5].

Fetch

Keywords: None.
Full Cost: 37 points.
Casting Roll: Will. Special casting time, see below.
Range: Special, see below.
Duration: Instantaneous.

Each time you cast this, you summon an outsider (worth 75% or less of your point value) from a particular plane of existence (chosen when you pick this spell). The GM will create this being, but you can request one that meets broad criteria. You cannot summon a specific being. A penalty applies based on the planar “distance”: There is no distance penalty for creatures that are currently on the same plane of existence. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. The Prime Material Plane is considered adjacent to the Astral Plane, and the Astral Plane is adjacent to the Outer Planes, where most of the outsiders come from. Thus, preparations that mitigate the penalty usually are required.

The summoning itself requires 10 minutes of preparation and ritual. At the end of the casting, you must pay 1 FP and make the casting roll. If the roll is successful, you must also pay a certain number of Summoning Points to force the outsider to appear. This summoned entity then becomes a free-willed, permanent resident of the summoner’s world, not his Ally, but on a Good or better reaction, it will grant its summoner a minor favor or service before departing.

You get a pool of 5 Summoning Points that recover at a rate of one point per week of game time. Consult the following table to determine how many Summoning Points you must spend. “Point Total” is the summoned being’s point total expressed as a percentage of your starting points; “Cost” is the number of Summoning Points required. If the summoned being’s point total falls between two percentages, use the *higher*.

Point Total	Cost
25%	2 points
50%	4 points
75%	5 points
100%	8 points
150%	16 points

Two other versions of this spell summon beings of different potency. Lesser Fetch has a full cost of 14 points, calls forth an outsider worth up to 25% of your point value, has a casting time of one minute, and gives you a pool of only 2 Summoning Points. Greater Fetch has a full cost of 110 points, calls an outsider worth up to 150% of your point value, requires one hour to cast, and provides a pool of 16 Summoning Points.

Statistics: Ally (A type of outsiders; Built on 75%; Constantly; Adjustable, +50%; Conjured, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Will Roll, -5%; Magical, -10%; Nuisance Effect, Can only be used with Impulse Points, -15%; Special Abilities, +50%) [27] + Impulse Points 5 (Game Time, +0%; Triply Aspected, Changing the world, Allies, -60%) [10]. Lesser Fetch has Ally, built on 25%, Immediate Preparation Required decreased to 1 minute, -30%, and has 2 levels of Impulse Points. Greater Fetch is built on 150%, increases Immediate Preparation Required to 1 hour, -75%, and has 16 levels of Impulse Points. *Note:* As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional “range” penalties.

Feverish Visions

Keywords: Resisted (HT).
Full Cost: 29 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 1 minute.

You increase the subject's body temperature, causing feverish visions. The subject hallucinates (p. B429) for 1 minute. After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Fixed Duration, +0%; Hallucinating, +50%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [29].

Fiery Stare

Keywords: Jet, Obvious.

Full Cost: 4.5 points/level*.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of fire erupts from your eyes. Use Innate Attack (Gaze) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning damage with dice equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack 1d (Increased 1/2D, 2x, +5%; Jet, +0%; Sorcery, -15%) [4.5/level*].

* Calculate the total cost and then round up.

File Transfer

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

The caster can touch a computer or a similar device and instantly copy or move up to 16 GB of data and magically store it in his memory. The caster must know the path to the data in question to transfer it. He cannot access the files, while they are in his memory. By touching another device the caster can transfer the stored data to the device. When he switches to another spell, the data stored in his memory is deleted instantly and permanently.

Statistics: Accessory (USB Drive; Sorcery, -15%) [1].

Final Rest

Keywords: Buff.

Full Cost: 41 points.

Casting Roll: IQ. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Truly Permanent.

When cast on a dead body, this spell renders the subject immune to all Necromantic magic, if the caster makes a successful IQ roll. The spirit of the deceased cannot be summoned, nor can the body be animated (or Resurrected). It has no physical effect on the body. The spell may be cast at any time after the subject dies, but the IQ roll has a penalty for the time gap between the casting and the subject's death. Use *Long-Distance Modifiers* (p. B241) and substitute "days" for "miles". This spell takes 8 or 9 seconds to cast instead of 1 or 2 seconds.

This spell has no effect on a living person, and will not affect the undead who have already risen. In many settings, this spell is an intrinsic part of funeral rites, and may be restricted to the clergy. In other settings, this spell is unnecessary; ordinary nonmagical funeral rites are sufficient to safeguard the dead from necromancy.

It is usually assumed that this spell functions by sending the soul of the deceased from the mortal plane into the presence of their deity. Some, however (usually members of one death-cult or another), believe that this spell works by destroying the disembodied spirits of the dead!

Statistics: Affliction 1 (HT; Accessibility, Only on corpses, -40%; Advantage, Final Rest, +10%; Cosmic, Can affect the dead, +50%; Melee Attack, Reach C, -30%; No Signature, +20%; Requires IQ Roll, -10%; Sorcery, -15%; Takes Extra Time 3, -30%; Time-Spanning, Past, +50%; Truly Permanent, +300%) [41]. *Note:* "Final Rest" is Covenant of Rest (Also prevents resurrection) [1].

Find Direction

Keywords: Information.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

Tells the caster which direction is North. Alternately, it can tell which way his home is. Note that no one can have more than one true home, and a wanderer may have none!

Statistics: Accessory (Compass; Sorcery, -15%) [1].

Find Ingredient

Keywords: Information.

Full Cost: 2 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

This spell must be cast in a space that was devoted to food prep, food storage, or to usage as an alchemical lab for at least a year. A successful casting reveals direction to the ingredient or reagent the caster specified before casting. The range modifiers from the *Size and Speed/Range Table* (p. B550) apply.

Statistics: Detect Ingredients (Accessibility, Only in specific places, -80%; Cannot Analyze, -10%; Selective Effect, +20%; Sorcery, -15%) [2].

Find Weakness

Keywords: Information.

Full Cost: 7 points.

Casting Roll: IQ or Engineer.

Range: Unlimited.

Duration: Instantaneous.

Sense the weakest part of the subject that you can see or touch. Many subjects will have no special weakness. This spell can be used to troubleshoot complex objects; a defect that prevents a machine from working usually qualifies as its weakest part.

Statistics: Detect (Structural Weaknesses; Sorcery, -15%; Touch- or Vision-Based, -15%) [7].

Fire Charm

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 31 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell makes flames in the area dance in a hypnotic pattern that will mesmerize anyone looking at them. Any sapient creature that sees them must resist with IQ or become dazed for 3

minutes. You can omit any creatures from the effect. The magic does not affect anyone who is outside the area looking into it.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Daze, +50%; Environmental, Fire, -60%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%; Vision-Based, -20%) [31]. Additional levels add Area Effect (+50%) [+5].

Fire Cloud

Keywords: Area (Leveled).

Full Cost: 4 points for level 1 + 1 point/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Creates a ground-level cloud of swirling flames. It does not block vision, but it inflicts burning damage to anyone standing in it. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Every creature in the area takes 1d-2 burning damage per turn.

The basic (4-point) version of this spell covers a two-yard radius. For each additional point, you may double this radius; e.g., four yards for 5 points, 8 yards for 6 points, or 16 yards for 7 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Burning Attack 1d-2 (Area Effect, 2 yards, +50%; Drifting, +20%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [4]. Further levels add Area Effect (+50%) to the advantage [+1].

Fire Fist

Keywords: None or Buff.

Full Cost: 8 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

Subject's hands gain DR 5 vs. burning damage from heat or fire and burst into flames, emitting light equivalent to a torch. Punches deal 1 point of follow-up burning damage.

The basic (8-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Burning Attack 1 point (Follow-Up, Punch, +0%; Magical, -10%) [2] + Damage Resistance 5 (Limited, Heat/Fire, -40%; Partial, Hands, -40%; Sorcery, -15%) [5] + Illumination (Magical, -10%) [1]. The improved version is Affliction 1 (HT; Advantage, Fire Fist, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [19]. *Note:* "Fire Fist" is Burning Attack 1 point (Follow-Up, Punch, +0%; Magical, -10%) [2] + Damage Resistance 5 (Limited, Heat/Fire, -40%; Magical, -10%; Partial, Hands, -40%) [5] + Illumination (Magical, -10%) [1].

Fire Flies

Keywords: Area (Leveled), Missile, Obvious.

Full Cost: 7 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to aim.

Range: 100 yards.

Duration: Instantaneous.

The caster throws a swarm of burning sparks towards his enemies. Use Innate Attack (Projectile), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-1 burning damage. This is an overhead attack – victims may raise their shields as cover, at the risk of damaging them (p. B484).

Statistics: Burning Attack 1d-1 (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Overhead, +30%; Sorcery, -15%; Variable, Area, +5%) [7]. Additional levels add more Area Effect (+50%) [+2].

Fire Gem

Keywords: Buff.

Full Cost: 10 points.

Casting Roll: None. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Permanent.

This spell traps a flame inside a gem where it will burn eternally. A flame gem will glow as brightly as a candle flame and is as hot as a coal. If the gem is ever broken the flame is released and will fill a single hex with flame that burns for five minutes regardless of the presence of fuel, dealing 1d-1 burning damage per second.

The caster must have a clear, flawless gem of at least 1 carat in order to cast this spell. Colorless gems are preferred, since the light produced by a flame gem is the color of the gem itself. Gems of other colors are used to produce colored light.

Unlike most spells, this spell takes one hour to cast.

Statistics: Affliction 1 (HT; Accessibility, Only on gems, -70%; Advantage, Fire Gem, +20%; Extended Duration, Permanent, +150%; Immediate Preparation Required, 1 hour, -75%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%) [10]. *Note:* “Fire Gem” is Burning Attack 1d-1 (Area Effect, 1 yard, +25%; Backlash, Instant Destruction, -400%; Extended Duration, 30x, +60%; Magical, -10%; Persistent, +40%; Single Use, x1/5) [1] + Illumination (Magical, -10%) [1].

Fire Swarm

Keywords: Obvious.

Full Cost: 10 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous.

You fire a conical swarm of fireballs from one hand. The spell spreads to affect everyone in a cone-shaped area. These streak out to 10 yards and then dissipate harmlessly. Maximum cone width is 5 yards. This spell has the 1/2D range of 2 yards.

Use the rules under *Cone Attacks* (p. B413) to position the swarm, rolling vs. Innate Attack (Beam) to strike the target point. This doesn't guarantee hitting everyone and everything, though. Roll once per target in the cone at effective skill 12, adjusted only for target Size Modifier. Success means one hit plus one more per two full points of success, but no more than four hits; e.g., for an SM 0 target, a roll of 9 or 10 gives two hits.

As with any cone, anybody completely screened from the caster is behind cover, and targets may use *Dodge and Drop* (p. B377) to leave the area or get to cover. Those who cannot or choose not to use this option may block or dodge individual fireballs, but not parry them; success avoids one fireball plus additional hits equal to margin of success. Determine hit location randomly for each hit.

Each fireball deals 1d burning damage per level of this spell.

Statistics: Burning Attack 1d (Cone 5, +100%; Blockable, -5%; Bombardment, Skill 12, -10%; Extra Recoil 1, -10%; Increased 1/2D, x2, +5%; Nuisance Effect, Dodgeable, -5%; Rapid Fire, RoF 4, +70%; Reduced Range, 1/10, -30%; Sorcery, -15%) [10/level].

Fire Trap

Keywords: Area (Fixed), Obvious.
Full Cost: 11 points/level.
Casting Roll: None. Use DX or unarmed combat skill to hit.
Range: Touch.
Duration: Permanent or until discharged.

You touch an object that can be opened (a book, a chest, a door, etc.) and create a fire trap. When the object is opened by anyone not specified during the casting, the trap explodes. Everyone within four yards of the trap takes dice of burning damage equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack (Area Effect, 4 yards, +100%; Melee Attack, Reach C, Cannot Parry, -35%; Triggered Delay, Opening, +50%; Selective Effect, +20%; Sorcery, -15%) [11/level].

Fire Vulnerability

Keywords: Resisted (HT).
Full Cost: 29/30/32 points for levels 1-3.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

This spell makes the subject more vulnerable to fire attacks. The subject multiplies any damage from fire that penetrates its DR by 2 before applying any normal wounding multipliers. Level 2 of this spell increases the multiplier to 3, and level 3 increases the multiplier by 4.

Statistics: Affliction 1 (HT; Disadvantage, Vulnerability (Fire, x2), +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. Additional levels improve Disadvantage, Vulnerability (Fire, x2), +30% to Disadvantage, Vulnerability (Fire, x3), +45% and Disadvantage, Vulnerability (Fire, x4), +60%.

Fire Whip

Keywords: Obvious.
Full Cost: 12 points.
Casting Roll: None. Use Force Whip to hit.
Range: Self.
Duration: Instantaneous.

While this spell is active, the caster has a whip of fire in their hand. It is wielded like a normal whip (p. B404), except that it always takes only one second to ready, and it cannot be used to parry or entangle. The whip has Reach 1-4 (changing Reach requires a Ready maneuver) and inflicts swing burning damage every time it strikes.

Statistics: Natural Weapon (Burning; Cannot Parry, -40%; Destructive Parry, +40%; Extra Reach, 1-4, Ready maneuver necessary, +90%; Intangible, +50%; Single, -20%; Sorcery, -15%; Swing-Capable, +20%) [12].

Fireproof Armor

Keywords: Armor Buff.
Full Cost: 44 points for level 1 + 40 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell makes armor more resistant to heat and flame by magically cooling it. The armor's DR is multiplied against burning damage, as shown on the table below. In addition, treat the armor itself as if it were one flammability class harder to set alight (see *Making Things Burn*, p. B433).

Level	D
-------	---

	R
1	x2
2	x3
3	x4

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Fireproof Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Fireproof Armor” is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Fireproof Armor imbue skill from *Pyramid #3-4*.

Fish Control

Keywords: Resisted (Will).

Full Cost: 18 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single fish – or of one square yard of a swarm of smaller fish. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only fish with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for fish with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Fish only, -50%; Sorcery, -15%) [18].

Fist of Lightning

Keywords: Area (Leveled).

Full Cost: 74 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous (but see below).

Your punch is enchanted with lightning energies. On a hit, you deal an additional 3d linked burning surge damage and produce a bright flash that fills the area. Metallic armor counts as DR 1 against this damage, but nonmetallic armor protects normally. Everyone within must resist with HT; Protected Vision gives +5, and those with Blindness are immune. The caster must roll as well, but at +5. Everyone who fails to resist is blinded for margin of failure seconds. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating follow-up burning surge damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Disadvantage, Blindness, +50%; Link, +10%; No Signature, +20%; Reduced Duration, 1/60, -35%; Sight-Based, +150%; Sorcery, -15%; Variable, Area, +5%) [34] + Burning Attack 3d (Link, Punch, +10%; Link, +10%; Magical, -10%; Side Effect, Stunning, +50%; Surge, Arcing, +100%) [39] + Protected Vision (Accessibility, Only versus own Fist of Lightning, -80%) [1]. Additional levels add Area Effect (+50%) to Affliction [+5].

Fist of Thunder

Keywords: Area (Leveled).

Full Cost: 49 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous (but see below).

Your punch is enchanted with thunderous energies. On a hit, you deal an additional 3d follow-up non-incendiary burning damage and produce a loud sound that fills the area. Everyone within must resist with HT; Protected Hearing gives +5, Hard of Hearing gives +4, and those with Deafness are immune. The caster must roll as well, but at +5. Everyone who fails to resist is deafened for margin of failure minutes.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Disadvantage, Deafness, +20%; Link, +10%; Hearing-Based, +150%; No Signature, +20%; Nuisance Effect, Loud, -5%; Sorcery, -15%; Variable, Area, +5%) [34] + Burning Attack 3d (Follow-Up, Punch, +0%; Link, +10%; Magical, -10%; No Incendiary Effect, -10%) [14] + Protected Hearing (Accessibility, Only versus own Fist of Thunder, -80%) [1]. Additional levels add Area Effect (+50%) to Affliction [+5].

Flame Jet (Unofficial Sorcery Errata)

Keywords: Jet, Obvious.

Full Cost: 7.5 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of flame erupts from your hand, much like the long tongue of a flamethrower. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning damage with dice equal to your level of this spell. The spell has 1/2D 5. The GM must determine what the maximum level available in the campaign is.

This jet lasts until the beginning of your next turn, allowing you to parry incoming attacks with it. If a parry is successful, your jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if you cast it every turn, it never "flickers out" and you can continue to attack with it normally.

Statistics: Burning Attack (Destructive Parry, +10%; Jet, +0%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Sorcery, -15%) [7.5/level]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Flame Strike

Keywords: Missile.

Full Cost: 24.5 points/level*.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

When outdoors, you can cause a pillar of flame to strike your target, dealing 2d burning damage per level. The target takes damage normally; anything nearby receives "collateral damage" equal to basic damage divided by the distance in yards from the blast. This spell bypasses any cover that does not provide overhead protection, and negates attack penalties to hit crouching, kneeling, sitting, or prone targets. (If you are already above or below your target, adjust this appropriately.)

Statistics: Burning Attack 2d (Environmental, Outdoors, -20%; Explosion 3, +150%; Overhead, +30%; Sorcery, -15%) [24.5/level*].

* Calculate the total cost, then round up.

Flameturning

Keywords: None.

Full Cost: 2.5 points/level.

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can momentarily turn away flames that may damage him or his gear. Every time the caster is subjected to a fire or heat attack, they may make a casting roll as an active defense. Success increases their DR by *twice* the level of this spell (e.g. Flameturning 3 adds DR 6), cumulative with that from actual armor, against damage dealt by fire or heat. If the caster wants to protect himself against long-lasting flames (for example, to run through a burning building), they must make a casting roll every second.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Flameturning, they cannot cast this spell until *all* FP are replenished.

Statistics: Damage Resistance 2 (Active Defense, -40%; Force Field, +20%; Limited, Heat/Fire, -40%; Sorcery, -15%) [2.5/level].

Flaming Armor

Keywords: Buff.

Full Cost: 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is sheathed in fire that deals 1d-1 burning damage to enemies who touch his body. The subject also sheds light as a torch.

Statistics: Affliction 1 (HT; Advantage, Flaming Armor, +70%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Flaming Armor" is Burning Attack 1d-1 (Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%) [6] + Illumination (Magical, -10%) [1].

Flaming Missiles

Keywords: Weapon Buff.

Full Cost: 14 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a projectile weapon, this spell causes its missiles to do an additional 1d of follow-up (p. B105) burning damage. The wielder will find the weapon hot to the touch, but not uncomfortable to use. The missiles also will give off light as a torch in flight and for 10 seconds after that, unless quenched.

Statistics: Affliction 1 (HT; Accessibility, Only on projectile weapons, -30%; Advantage, Flaming Missiles, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [14]. *Note:* "Flaming Missiles" is Burning Attack 1d (Follow-Up, This weapon, +0%; Magical, -10%; Visible, -10%) [4] + Illumination (Magical, -10%) [1].

Flaming Sphere

Keywords: Missile, Obvious.

Full Cost: 5.5 points*.

Casting Roll: None. Use Innate Attack (Projectile) to «lock on».

Range: 50 yards.

Duration: Instantaneous.

A sphere of flame flies off your fingertips and bounces along the floor towards your target. A successful hit does 1d burning damage per level of this spell. You steer the sphere to the target using your own skill. This lets you ignore all range penalties to hit! If the target is so distant that the sphere needs multiple turns to reach it, you must take a Concentrate maneuver each turn. If you lose sight of

the target while the attack is en route, your attack automatically misses. The sphere can only bounce 1 yard up in the air, so the attack can be evaded by climbing high enough.

The sphere moves 5 yards per second (this is its 1/2D characteristic). The sphere can hit a target at up to its 1/2D range on the turn you launch it. It requires multiple turns to reach more distant targets. Do *not* halve damage, but defer the attack roll until the attack reaches its target.

For more information, see *Guided and Homing Weapons* (p. B412).

Statistics: Burning Attack 1d (Environmental, Along the floor, -15%; Guided, +50%; Reduced Range, x1/2, -10%; Sorcery, -15%) [5.5/level*].

* Calculate the total cost then round up.

Flaming Weapon

Keywords: Weapon Buff.

Full Cost: 15 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 1d of follow-up (p. B105) burning damage. The wielder will find the weapon hot to the touch, but not uncomfortable to use. The weapon also will give off light as a torch.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Flaming Weapon, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. *Note:* "Flaming Weapon" is Burning Attack 1d (Follow-Up, This weapon, +0%; Magical, -10%; Visible, -10%) [4] + Illumination (Magical, -10%) [1].

Flammability

Keywords: Area (Leveled), Resisted (HT).

Full Cost: 31 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

Everything in the area becomes easily flammable. Every affected creature or object must make a HT roll to avoid catching fire whenever they receive a major wound from a burning or explosive attack. They catch fire automatically if such an attack inflicts 10+ HP of injury. Once aflame, they suffer 1d-1 injury per second until you extinguish the fire by immersion in water, rolling on the ground (takes 3 seconds), etc.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Disadvantage, Combustible, +5%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [31]. Additional levels add Area Effect (+50%) [+5].

Flash

Keywords: Area (Leveled).

Full Cost: 31 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 5 seconds.

You cause a blinding flash to appear in the area. Each creature in the area resists with its HT, and is blinded for 5 seconds on a failed resistance roll. Creatures with Protected Vision resist at +5.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Reduced Duration, 1/30, -30%; Sorcery, -15%; Vision-Based, +150%) [31]. Additional levels add Area Effect (+50%) [+5].

Flash Forward

Keywords: None.

Full Cost: 40 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

The caster cheats the laws of time and enters combat before reverting back to his original position. When this spell is active, the caster can make a Move and Attack maneuver against an enemy he could reach with such a maneuver, and then reverts back to his original position. Any damage or conditions dealt to the caster or by the caster during this action are real and remain when he returns to his original location. When the spell runs out, the caster cannot cast it again for 5 minutes.

Statistics: Altered Time Rate 2 (Accessibility, Only to perform a Move and Attacks and then return to the initial position, -30%; Maximum Duration, 1 second, -75%; Reflexive, +40%; Sorcery, -15%) [40].

Flee

Keywords: Buff.

Full Cost: 15 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 minute.

The subject has his Basic Move increased by 1 per level of this spell, but only in situations where Enhanced Move (p. B52) or *Sprinting* (p. B354) would apply.

Statistics: Affliction 1 (HT; Advantage, Flee 1, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [15]. Additional levels add further Flee to the Advantage enhancement [+4]. *Note:* Each level of "Flee" is Basic Move 1 (Magical, -10%; Takes Extra Time 1, -10%) [4].

Flesh to Adamant

Keywords: Resisted (HT).

Full Cost: 66 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

You can turn a living subject into adamant! If he fails to resist, his body and anything he is carrying become adamant. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53). Remove Curse, Flesh to Stone, and similar spells that reverse this effect have their energy costs doubled, and are at -5 unless the caster knows Essential Earth.

Statistics: Affliction 1 (HT; Cosmic, Hard to Dispel, +50%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Sorcery, -15%) [66].

Flesh to Glass

Keywords: Resisted (HT).

Full Cost: 61 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

“Vitrifies” a living subject (and all his gear!), turning that person into glass. If he fails to resist, his body and anything he is carrying become glass. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53). Stone to Flesh removes this effect with a -4 penalty, unless the person attempting to remove the effect also knows Flesh to Glass.

Statistics: Affliction 1 (HT; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Sorcery, -15%) [61].

Flesh to Ice

Keywords: Resisted (HT).

Full Cost: 61 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

“Petrifies” a living subject (and all his gear!) into ice! If he fails to resist, his body and anything he is carrying become ice. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53). Stone to Flesh removes this effect with a -4 penalty, unless the person attempting to remove the effect also knows Flesh to Ice. The subject melts naturally, if the temperature is above freezing.

Statistics: Affliction 1 (HT; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Sorcery, -15%) [61].

Flesh to Metal

Keywords: Resisted (HT).

Full Cost: 61 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

You can turn a living subject into a metal statue! If he fails to resist, his body and anything he is carrying become metal. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Metal to Flesh (*Pyramid #3-91*, p. 25).

Statistics: Affliction 1 (HT; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Sorcery, -15%) [61].

Flexibility

Keywords: Buff.

Full Cost: 13, 16, or 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One minute.

When affected by the basic (13-point) version of this spell, the subject gets +1 on Climbing rolls; on Escape rolls to get free of restraints; on Erotic Art skill; and on all attempts to break free in close combat (p. B391). The subject may ignore up to -1 in penalties for working in close quarters. The improved (16-point) version increases the bonuses to rolls to +3 and the ignored penalties to -3. The greater (25-point) version increases the bonuses to rolls to +5 and the ignored penalties to -5.

Statistics: Affliction 1 (HT; Advantage, Flexibility, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [13]. *Note:* “Flexibility” is Flexibility (Magical, -10%; One Third of the Effect, x1/3) [2]. The improved version removes One Third of the Effect, x1/3 [+3]. The greater version improves Flexible to Double-Jointed [+9].

Flight

Keywords: Buff.

Full Cost: 48 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject can fly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, the subject will need a way to survive in very thin, cold air (e.g., Doesn’t Breathe and Temperature Tolerance). He cannot fly in a trace atmosphere or vacuum.

The subject’s flight Move is Basic Speed x 2 (drop all fractions). He can also “fly” at half-speed underwater. Flight includes the ability to hover at Move 0 as well.

Statistics: Affliction 1 (HT; Advantage, Flight, +360%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [48]. *Note:* “Flight” is Flight (Magical, -10%) [36].

Fling Fruit

Keywords: None.

Full Cost: 1 point/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can pick up and throw tomatoes, ears of corn, heads of lettuce, grapefruits, oranges, and similar products without touching them. You lift and throw distant fruits just as if you were grasping them in a pair of hands with ST equal to your Fling Fruit level. Regardless of level, for picking fruits up your maximum range is 10 yards. You cannot move fruits after you pick them up, your only options are to throw the object, keep holding it, or release your grasp.

Fling Fruit requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Fling Fruit may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pick up a fruit or an Attack maneuver to throw it. This works just as if you were throwing the fruit with ST equal to your Fling Fruit level. Roll against Throwing to hit, modified by Talent. For 1/2D and Max purposes, measure range from the fruit (not yourself!) to the target; for the purpose of range penalties, use the *sum* of the distance from you to the fruit and from the fruit to the target. Once you throw something, you have “released” your telekinetic grip – your Fling Fruit must take a Ready maneuver to pick it up again.

No rolls are necessary for picking fruits up. In situations where you would roll against ST, roll against your Fling Fruit level instead.

Statistics: Telekinesis 1 (Only to pick up and throw fruit, -65%; Sorcery, -15%) [1]. Each additional level adds Telekinesis 1 (Only to pick up and throw fruit, -65%; Sorcery, -15%) [+1].

Floating Disk

Keywords: None.

Full Cost: 99 points.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

The caster creates a slightly concave, circular plane of force that follows him about and carries loads for him. The disk is 2 yards in diameter and 1 inch deep at its center. It has effective lifting ST 15. If

used to transport a liquid, its capacity is 12 gallons. The disk floats approximately 1 yard above the ground at all times and remains level. It floats along horizontally within 10 yards and will accompany the caster at a rate of no more than his Basic Move every second. If not otherwise directed with a Concentrate maneuver, it maintains a constant interval of 1 yard between itself and the caster. The disk winks out of existence when the spell duration expires. The disk also winks out if the caster moves beyond its range or tries to take the disk more than 1 yard away from the surface beneath it. When the disk winks out, whatever it was supporting falls to the surface beneath it.

Statistics: Telekinesis 15 (Area Effect, 2 yards, +50%; Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; Independent, +40%; No Fine Manipulations, -20%; Sorcery, -15%) [98] + Hydrokinesis (Magical, -10%) [1].

Flock of Ravens

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Nine seconds.

The subject is protected by a flock of shadowy, semi-real ravens. Vision and vision-based attack rolls against the subject take a -4 penalty. The constant cawing imposes a -4 penalty to Hearing rolls made in the subject's hex and gives a +4 bonus to Hearing rolls made to detect the subject from the outside.

Statistics: Affliction 1 (HT; Advantage, Flock of Ravens, +200%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [30]. *Note:* "Flock of Ravens" is Obscure 4 (Vision; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [16] + Obscure 4 (Hearing; Magical, -10%; No Area of Effect, -50%) [4].

Flow

Keywords: None.

Full Cost: 45 points.

Casting Roll: Power Dodge (IQ/2+3).

Range: Self.

Duration: Instantaneous.

While this spell is active, you can turn yourself into a liquid for an instant, evading harm. On a successful cast, you gain the benefits of Injury Tolerance (Diffuse) (p. B61) against the attack.

Statistics: Injury Tolerance (Diffuse; Active Defense, -40%; Sorcery, -15%) [45].

Fluid Jet

Keywords: Jet, Obvious.

Full Cost: 35.2 points for level 1 + 9.2 additional/level***.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 20 yards.

Duration: Instantaneous.

You shoot a thin jet of air or water (choose when casting) from your fingertip, which can strike any target up to 20 yards away (without range or speed penalties). It can be dodged or blocked, but not parried. This jet does 1d crushing damage per level, *doubled*, for the purposes of knockback, but does not deal injury or blunt trauma. Air jet can also snuff out candles, sweep the floor, and so on. Water jet will extinguish a one-yard-radius area of normal fire.

Against enemies with Injury Tolerance (Diffuse), such as gaseous beings and swarms, this becomes a *much* more potent attack, doing full damage – including the doubling! Ignore the usual injury cap of 2 HP (*Injury to Unliving, Homogenous, and Diffuse Targets*, p. B380). If producing a water jet, this also applies to creatures of fire.

If the water jet strikes the face, it causes no injury (unless the attack was against the aforementioned enemy types), but blinds the target for 3 seconds unless he makes a HT roll. Thick goggles, closed helmets, ultra-tech visors protect against this spell.

Statistics: Crushing Attack 1d (Blockable, -5%; Cosmic, Does knockback-based damage against diffuse targets, +50%; Double Knockback, +20%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; No Blunt Trauma, -20%; No Wounding*, -25%; Sorcery, -15%) [6/level (decreased to 1.2/level)] + Crushing Attack 1d (Blockable, -5%; Can extinguish fire, +10%; Cosmic, Does knockback-based damage against diffuse and flame targets, +50%; Double Knockback, +20%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; No Blunt Trauma, -20%; No Wounding**, -5%; Sorcery, -15%) [8/level] + Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Blockable, -5%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; Reduced Duration, 1/60, -35%; Vision-Based, +150%) [26]. Notes: The two abilities are bought as Alternative Abilities.

* Except versus diffuse targets, an exception which halves the value of this limitation.

** Except versus diffuse and flame targets, an exception which decreases the value of this limitation.

*** Calculate the total cost, then round up.

Fluid Vision

Keywords: Buff.

Full Cost: 22 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the subject see through water (including ice, snow, and steam), smoke, fog, dust, sand, etc. Each level of this spell allows the subject to see through up to six inches of the listed substances. The subject can just barely see the outline of the substance he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Air Vision 1, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. Additional levels add further Fluid Vision to the Advantage enhancement [+10]. *Note:* Each level of "Fluid Vision" is Penetrating Vision 1 (Magical, -10%; Specific, Air, -40%) [5] + Penetrating Vision 1 (Magical, -10%; Specific, Water, -40%) [5].

Flying Carpet

Keywords: Buff.

Full Cost: 89 points for level 1 + 18 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Transforms a carpet (or any other object one could reasonably stand on or in – cauldron, chair, towel, broom, etc.) into a flying vehicle. It is under the command of the first person to step aboard it. If there are several beings already aboard when the spell is cast, roll a Quick Contest of Will to see who gets control; the caster (if aboard) gets a +5 bonus to this roll. If the pilot leaves the carpet, roll another quick contest of Will between the remaining passengers to see who gets control.

This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, the passengers will need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). The carpet cannot fly in a trace atmosphere or vacuum.

The carpet's flight Move is the caster's Basic Speed x 2 (drop all fractions). It can also "fly" at half-speed underwater. Flight includes the ability to hover at Move 0 as well. Each level of Flying Carpet also *doubles* the carpet's top speed in air. The carpet's multiplied Move is its top speed. This does not affect Basic Speed, Basic Move, or Dodge. Its benefits apply only when moving along a relatively straight.

It does have some defensive value, however: those who attack the carpet or its passengers with ranged attacks must take its speed into account when calculating speed/range modifiers (see p. B550).

Statistics: Affliction 1 (HT; Accessibility, Only on carpets or similar objects, -40%; Advantage, Flying Carpet, +770%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [89]. *Notes:* "Flying Carpet" is Flight (Magical, -10%) [36] + Enhanced Move 1 (Air; Magical, -10%) [18] + Compartmentalized Mind 1 (Controls; Magical, -10%) [23]. Each additional level adds an additional level of Enhanced Move 1 (Air; Magical, -10%) [+18].

Flying Shards

Keywords: Area (Leveled), Missile, Obvious.

Full Cost: 7 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to aim.

Range: 100 yards.

Duration: Instantaneous.

The caster throws a huge swarm of stones towards his enemies. Use Innate Attack (Projectile), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-1 crushing damage. This is an overhead attack – victims may raise their shields as cover, at the risk of damaging them (p. B484).

Statistics: Crushing Attack 1d-1 (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Overhead, +30%; Sorcery, -15%; Variable, Area, +5%) [7]. Additional levels add more Area Effect (+50%) [+2].

Fog

Keywords: Area (Leveled).

Full Cost: 29 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

The sorcerer conjures an area of dense fog that blocks vision and impedes fire attacks. This gives -8 to all vision rolls made through it. This fog impedes ladar in the same way. Flaming weapons and missiles lose their extra power in fog. A Fireball loses 1 point of damage per yard of fog it must traverse (e.g., a 3d Fireball that crosses 5 yards of fog inflicts 3d-5 damage), while victims of an Explosive Fireball may count each yard of fog as two yards of distance from the blast. However, no amount of fog will extinguish a fire. Any wind more forceful than a light breeze disperses it.

The basic (29-point) version of this spell covers a two-yard radius. For each additional 8 points, you may double this radius; e.g., four yards for 37 points, 8 yards for 45 points, or 16 yards for 53 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 8 (Drifting, +20%; Extended, Ladar, +20%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [29]. Additional levels add Area Effect (+50%) to the advantage [+8].

Fog Cloud

Keywords: Area (Leveled).

Full Cost: 13 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with fog. This gives -4 to all vision rolls made through it. To place the gas cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

The basic (13-point) version of this spell covers a two-yard radius. For each additional 4 points, you may double this radius; e.g., four yards for 17 points, 8 yards for 21 points, or 16 yards for 25 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 4 (Drifting, +20%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [13]. Further levels add Area Effect (+50%) to the advantage [+4].

Fool's Banquet

Keywords: Buff, Area (Leveled).

Full Cost: 42 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim. Use IQ or Artist (Illusion) to determine how convincing the illusion is.

Range: 100 yards.

Duration: 30 minutes.

This illusion makes a chosen object look, sound, feel, taste, and smell like attractive, tasty food. Can only be cast on things that can be eaten; it would work on mud, but not on stones.

You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something “off.” Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere. However, even if they successfully “disbelieve,” your illusion doesn’t disappear. Thus, even an obvious illusion can be useful to disguise the object.

The illusion may be disbelieved, but is otherwise stable. However, it will not move about unless the underlying object moves. Concentration is not required to maintain the illusion.

Statistics: Affliction 1 (HT; Accessibility, Only on objects that can be eaten, -20%; Advantage, Fool's Banquet, +280%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [42]. *Note:* “Fool's Banquet” is Illusion (Accessibility, Only to make the object look like tasty food, -40%; Emanation, -20%; Extended, Taste/Smell, +20%; Extended, Touch, +20%; Independence, +40%; Magical, -10%) [28*]. Additional levels add Area Effect (+50%) to the Fool's Banquet advantage [+12.5*].

* Calculate the total cost and then round down (because the base ability costs just 27.5 points before rounding). Level 2 of the *spell* costs 44 points, level 3 costs 57 points, level 4 costs 69 points, level 5 costs 82 points, and so on.

Foolishness

Keywords: Resisted (Will).

Full Cost: 32 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The sapient victim suffers temporary IQ loss equal to your margin of victory (maximum -10). Lower all skills and spells based on IQ by a like amount. IQ reductions also apply to Will and Perception.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures, -10%; Attribute Penalty, IQ-10, +100%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50% Sorcery, -15%) [32].

Forbidden Wisdom

Keywords: Resisted (IQ).

Full Cost: 68 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Reveals a truth that's forbidden to living. Subjects with IQ 0-5 are immune. An IQ 6+ target must resist with IQ. Failure to resist means the subject is *unmade*, along with anything carried. A critical failure on the casting roll means *the caster* is unmade instead!

Statistics: Affliction 1 (IQ; Accessibility, Only on IQ 6+ beings, -10%; Based on IQ, +20%; Cosmic, Leaves no trace of victim or gear, +50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Affects the caster on a critical failure, -40%; Sorcery, -15%) [68].

Force Ball

Keywords: Missile, Obvious.

Full Cost: 10 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 50 yards.

Duration: Instantaneous.

You fire a ball of force that does 1d crushing damage per level. This damage is doubled for the purpose of knockback, and this spell can affect insubstantial beings. The ball leaps to other available targets after hitting the initial target! If that attack succeeds, immediately consult your margin of success. If the margin is high enough to hit a separate target *after* accounting for range penalties *plus* -2, the next target is struck unless they make an appropriate active defense. If the target is hit then check the margin again until the attack fails to hit or seven targets (the maximum) are hit. This attack has no 1/2D.

Statistics: Crushing Attack 1d (Affects Insubstantial, +20%; Double Knockback, +20%; Increased 1/2D, x10, +15%; Rapid Fire, Chaining, 7 targets, +70%; Reduced Range, ½, -10%; Sorcery, -15%) [10/level]. Notes: *Rapid Fire, Chaining* is taken from Ravens N' Pennies [blog post](#).

Force Bolt

Keywords: Missile, Obvious.

Full Cost: 6 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You launch a force missile at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d crushing damage per level of this spell, affecting even insubstantial targets. Damage is doubled for the purpose of knockback. The missile can be blocked.

Statistics: Crushing Attack 1d (Affects Insubstantial, +20%; Blockable, -5%; Double Knockback, +20%; Sorcery, -15%) [6/level].

Force Harpoon

Keywords: Missile, Obvious.

Full Cost: 97 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You launch a force harpoon at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. The harpoon does 2d-1 impaling damage, affecting even insubstantial creatures. This harpoon is tethered to the caster and instantly pulls him towards the target in a straight line (even if it misses and hits a wall behind the intended target!). The caster can only use this transportation method, if he is carrying Light encumbrance or less. The caster must make a successful DX or Acrobatics roll to arrive and land standing in the adjacent hex to the target. If he fails the roll, he falls down near the target. This spell is useful not only to approach the target quickly, but also to traverse chasms and climb to higher ground.

Statistics: Impaling Attack 2d-1 (Affects Insubstantial, +20%; Blockable, -5%; Link, +10%; Magical, -10%) [17] + Warp (Accessibility, Only where the harpoon hits, -20%; Blind Only, -50%; Cosmic, No roll required, +100%; Extra Carrying Capacity, Light, +10%; Link, +10%; Nuisance Effect, Acrobatics roll, -15%; Range Limit, 100 yards, -40%; Sorcery, -15%) [80].

Force Spear

Keywords: Missile, Obvious.

Full Cost: 34 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You launch a force spear at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. The spear does 2d-1 impaling damage, affecting even insubstantial creatures, and gets stuck in the target. It prevents the subject from phasing through walls and other objects via Insubstantiality, Permeation, or similar abilities, but can be removed with a successful ST roll and a Ready maneuver. Once removed, it does half as much damage it dealt going in, and then winks out of existence. If left in the subject, it winks out 1 minute later.

Statistics: Impaling Attack 2d-1 (Affects Insubstantial, +20%; Blockable, -5%; Cosmic, Anchoring, +100%; Cosmic, Gets stuck, +50%; Sorcery, -15%; Terminal Condition, Removed, -10%) [34].

Forceful Hand

Keywords: None.

Full Cost: 25 points.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

Creates a SM+0 hand made of shimmering pinkish force that appears between the caster and one of his opponents. This floating, disembodied hand moves automatically to remain between them, regardless of where the caster moves or how the opponent tries to get around it, providing cover for the caster against that opponent (and other opponents, if they are close enough). The opponent firing at the caster risks hitting the hand instead. See *Firing Through an Occupied Hex*, p. B389.

The hand has HP 20 and DR 20. The caster can Concentrate to move the hand at Move 4, but only towards him or the designated opponent, and the hand cannot move closer than 3 yards to the caster. The caster may Concentrate to make the Forceful Hand shove (p. B372) the designated opponent.

The designated opponent must evade (p. B368) the hand, if he wants to approach the caster. The hand is considered a standing creature, and has DX of the caster and ST 12. The hand can even stop insubstantial opponents from approaching. Getting past the hand or destroying it dispels it.

The caster can Concentrate to redirect the hand to another opponent.

Statistics: Telekinesis 4 (Affects Insubstantial, +20%; Independent, +40%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing and shoving, -60%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [11] + Telekinesis 8 (Affects Insubstantial, +20%; Independent, +40%; Lift Only, -20%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing and shoving, -60%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [14].

Forceful Weapon

Keywords: Weapon Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell enhances the weapon's knockback. The attack effectively gains the Double Knockback modifier (p. B104). For a crushing weapon, use double the damage rolled to find knockback. For other weapons, calculate knockback as if using a regular crushing weapon. Damage type and amount are unaffected.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Forceful Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Forceful Weapon" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Forceful Blow imbue skill.

Forest Defense

Keywords: Buff.

Full Cost: 27 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell animates plants near the subject to place themselves in harm's way. This increases the subject's DR, cumulative with that from actual armor, but only when the subject stands in a hex with some vegetation. DR is 2 in sparse vegetation, 3 in normal vegetation, 4 in dense vegetation, and 5 in impenetrable vegetation. See *Density of Vegetation* rules in *GURPS Magic: Plant Spells*, p. 6.

Statistics: Affliction 1 (HT; Advantage, Forest Defense, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [27]. *Note:* "Forest Defense" is Damage Resistance 5 (Environmental, Vegetation, -40%; Force Field, +20%; Magical, -10%; Nuisance Effect, Strength is based on vegetation density, -10%) [15].

Forest Warning

Keywords: Area (Leveled), Resisted (DX, Special).

Full Cost: 47 points + 5 points/additional level.

Casting Roll: Will. Use Hearing to notice threats.

Range: Unlimited.

Duration: Eight hours.

The ground covered with vegetation within the area becomes "noisy". Record the sorcerer's margin of success when casting the spell; anyone walking, crawling, slithering, etc. (basically, anyone who isn't flying) within the area must roll against DX at a penalty equal to that margin. Success allows the subject to move freely for one second, after which he must roll again. The moment he fails, he becomes extremely noisy: +10 on all Hearing rolls (p. B358) to notice his movement!

The noisiness lasts until the subject leaves the area. Alternatively, he may remain within and stand perfectly still for three full minutes, after which the effect "resets" and he's able to make DX rolls again to sneak by.

If the subject is masked by magical silence, roll a Quick Contest using the sorcerer's Will. If this spell wins, the magical silence is ignored; if it ties or loses, Forest Warning has no effect on that subject.

Statistics: Affliction 1 (DX; Accessibility, Only targets moving on the ground, -10%; Area Effect, 2 yards, +50%; Based on DX, +20%; Disadvantage, Noisy 5, +10%; Environmental, Vegetation, -20%; Extended Duration on Persistent, 3,000x, +140%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%; Terminal Condition, Leaving the area, -20%; Variable, Area, +5%) [47]. Additional levels add Area Effect (+50%) [+5].

Foretelling

Keywords: Information.

Full Cost: 13 points.

Casting Roll: IQ.

Range: Self.

Duration: Instantaneous.

When faced with a number of alternatives, and no logical way to choose among them, you can cast this spell. The GM makes a *secret* IQ + Talent roll, with a bonus equal to the number of “good” choices and a penalty equal to the number of “bad” choices. On a success, he steers you to a good choice; on a critical success, he tells you the best choice. On a failure, he gives you no information; on a critical failure, he steers you toward a bad choice. The GM can modify this as he sees fit for other situations where Intuition might logically help. Only one casting per question is allowed.

The GM should never allow Foretelling to short-circuit an adventure. The spell should not give an obvious answer, but may lead the caster to a good clue, if the obvious answer would break the adventure. GMs who don’t think they can control Foretelling should not allow it in their games.

Statistics: Intuition (Sorcery, -15%) [13].

Forgetfulness

Keywords: Resisted (Will).

Full Cost: 34 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 minutes.

You cause the subject to forget one fact and the fact he even knew the fact for 30 minutes. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Accessibility, One fact at a time, -10%; Based on Will, +20%; Disadvantage, Total Amnesia, +25%; Extended Duration, 10x, +40%; Malediction 2, +150%; No Signature, +20%; Selective Effect, +20%; Sorcery, -15%) [34].

Forked Lightning

Keywords: Obvious.

Full Cost: 15.5 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous.

You fire a cone of lightning that does 1d burning surge damage per level. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell’s maximum range. This spell has the 1/2D range of 2 yards.

Statistics: Burning Attack 1d (Cone 5, +100%; Increased 1/2D, x2, +5%; Reduced Range, 1/10, -30%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [15.5/level].

Form of the Dragon

Keywords: None.

Full Cost: 60 points or 140 points or more; see text.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume different draconic forms, as if using the Morph advantage (p. B84). The transformation requires 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he

may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any draconic species he can turn into.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his “slots” are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a “slot”.

If the caster can assume any racial template worth no more than his native one, Form of the Dragon costs 60 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 60 points. For instance, a human who can take on any draconic racial template worth up to 75 points would pay 135 points for Form of the Dragon.

In addition, the caster may purchase the improved (140-point) version of this spell. This shortens the transformation time to 1 second.

Statistics: Morph (Accessibility, Dragons Only, -25%; Sorcery, -15%) [60]. The improved version adds Reduced Time 4, +80% [+80].

Fortify

Keywords: Armor Buff.

Full Cost: 15 points for level 1 + 4.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell increases the DR of clothing or a suit of armor by 1 per level. The GM may impose a cap on the maximum level of this spell.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Fortify 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Each level adds additional Fortify to the Advantage enhancement (+50%) [+4.5*]. *Note:* Each level of “Fortify” is DR 1 (Magical, -10%) [5].

* Calculate the total cost then round *down*.

Foster Hatred

Keywords: Resisted (Will).

Full Cost: 44 points.

Casting Roll: Will.

Range: Unlimited.

Duration: One day.

This spell causes a sapient subject to become hateful and intolerant to a particular class of people chosen by the caster. This class of people can be based on social class, ethnicity, species, sex, nationality, or religion (choose one). The chosen class of people will react to the subject at -1 to -5 (GM’s decision). The subject himself reacts at -3 toward the victims of his intolerance. On a “Good” reaction, he tolerates the person and is as civil as possible, even though stiff and cold. On a “Neutral” reaction, he still tolerates him, but makes it plain that he doesn’t care to be around him and considers him inferior or offensive. On any worse reaction, he attacks or refuses to associate with the victim.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Extended Duration, 1,000x, +120%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable Enhancement, +50%) [44]. *Note:* Variable Enhancement provides +10% of enhancements (+100%) but is limited by “Accessibility, Only for Intolerance” (-50%) for a net +50%.

Foul Water

Keywords: Buff.

Full Cost: 56 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

Renders a gallon of water undrinkable. Foul water is readily recognizable by its uninviting color and smell, whereas fouled beer or wine may be more difficult to detect. Anyone foolish enough to drink it must make a HT roll. On a failed roll, he is seized by painful stomach cramps, taking 1d toxic damage; he is at -3 to DX and IQ for 1 hour.

Foul water also fails to satisfy thirst, and cannot support fish or other water-dwellers (a fish of any sort slowly suffocates in fouled water; a sea-mammal becomes ill from ingesting it). In a body of water, the foul water is eventually diluted to harmlessness; if cast in a mountain stream, for instance, this spell effectively lasts only a second or two.

Statistics: Affliction 1 (HT; Accessibility, Can only be cast on water, -10%; Advantage, Foul Water, +300%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [56]. *Note:* "Foul Water" is Affliction 1 (HT; Aura, +80%; Attribute Penalty, DX-3, IQ-3, +60%; Blood Agent, -40%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Link, +10%; Melee Attack, Reach C, -30%) [26] + Toxic Attack 1d (Aura, +80%; Blood Agent, -40%; Link, +10%; Melee Attack, Reach C, -30%; Resistible, HT, -25%) [4].

Fount of Wine

Keywords: None.

Full Cost: 11 points/level.

Casting Roll: IQ or Connoisseur (Wine) or Professional Skill (Brewer).

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to create wine. To do so, take a Concentrate maneuver and roll vs. IQ (or Connoisseur (Wine) or Professional Skill (Brewer)). Success means the wine coalesces in hand or within arm's reach (for example, within a vessel you are holding). Failure means nothing happens. Critical failure means the creation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

The produced wine can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Created wine is unstable. It vanishes in 10 seconds unless you use character points to "stabilize" it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create Wine (Magical, -10%; Reduced Fatigue Cost 1, +20%) [11/level].

Frailty

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim suffers temporary HT loss equal to your margin of victory (maximum -10). Lower all skills based on HT by a like amount. Secondary characteristics are not affected.

Statistics: Affliction 1 (HT; Attribute Penalty, HT-10, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [26].

Freeze

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent or until the ice melts naturally.

This spell allows you to turn liquid water into ice. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Transmute Water to Ice, +50%; Transmutation Only, -100%; Magical, -10%) [2/level].

Freezing Fog

Keywords: Area (Leveled).

Full Cost: 31 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with light blue freezing fog. This gives -3 to all vision rolls made through it using normal vision and Infravision. To place the fog cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every creature in the area of effect takes 1d-2 points of fatigue damage per second. This damage ignores DR, unless the creature has Sealed. Treat FP lost to the attack identically to FP lost to cold for *all* purposes, notably recovery (see *Cold*, B430). Targets that take damage from this spell must make an HT roll, at -1 per 2 points of FP lost, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute).

Statistics: Obscure Vision 3 (Drifting, +20%; Extended, Infravision, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [12] + Fatigue Attack 1d-2 (HT; Area Effect, 2 yards, +50%; Contact Agent, +150%; Drifting, +20%; Fixed Duration, +0%; Freezing, +20%; Link, +10%; Persistent, +40%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%; Variable, Area, +5%) [19]. Further levels add Area Effect (+50%) to both advantages [+5].

Freezing Sphere

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 77 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of cold that expands to cover an area; it is not technically an explosion, but the term has long since entered common use. Use Innate Attack (Projectile) to hit, applying normal range

penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes 3d burning damage. This damage comes from extreme cold, not heat, so it cannot set anything on fire. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The GM must determine what the maximum level available in the campaign is.

In addition, if the sphere's explosion covers a body of water or a liquid that is principally water (not including water-based creatures), it freezes the liquid to a depth of 6 inches. Creatures that were swimming on the surface of a targeted body of water or were standing in it become trapped in the ice. Treat this as Binding (p. B40) with ST 10.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid dropping this at your own feet, where it detonates!

Statistics: Burning Attack 3d (Area Effect, 4 yards, +100%; Link, +10%; Magical, -10%; No Incendiary Effect, -10%; Nuisance Effect, Dangerous to be parried, -5%; Side Effect, DX-2 and Numb, +90%) [42] + Binding 10 (Area Effect, 4 yards, +100%; Environmental, Water, -20%; Link, +10%; Sorcery, -15%) [35].

Frightening Tune

Keywords: Area (Leveled), Baneful Song, Resistible (Will).

Full Cost: 24 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. Roll a Quick Contest of Will vs. Will plus any Magic Resistance the subject has. This is a mind control effect, so anyone with Immunity to Mind Control is immune to the effects of this song. This song can only affect sapient beings. The song's effects last for margin of victory seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Victims who fail to resist experience an urge to leave the area of effect. Until the effect ends, a victim within the area can do nothing each turn except move away from the bard. When he escapes, he cannot reenter the area.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Baneful Song, +105%; Costs Fatigue, 1 FP, -5%; Disadvantage, Dread, +30%; No Signature, +20%) [24]. Additional levels add Area Effect (+50%) [+5].

Frost

Keywords: Area (Fixed).

Full Cost: 5 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You may create a covering of frost on all surfaces in up to a 16-yard radius. You may always choose to affect a smaller area. The frost is real, and lasts indefinitely if the temperature is below freezing. In warmer conditions, the frost quickly melts to a dew. When cast upon a real or magical fire, the frost produces a cloud of steam and causes the flames to hiss for a few seconds. Only a tiny fire – a match or candle – would actually be extinguished by this spell.

This spell does one point of burning damage (it comes from extreme cold, so it cannot set things on fire) to all creatures of flame in the area of effect (fire elementals, for example).

Statistics: Burning Attack 1 (Accessibility, Only against flaming creatures, -60%; Area Effect, 16 yards, +200%; No Incendiary Effect, -10%; Sorcery, -15%; Variable, Area, +5%) [5].

Frost Nova

Keywords: Area (Fixed).

Full Cost: 12 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

You create an explosion of frost that covers an area. Use Innate Attack (Gaze) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes dice of burning damage equal to your level of this spell (or less, if you wish to), dividing the damage by the distance in yards between the target and the center of the effect. This damage comes from extreme cold, so it cannot start fires. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack (Area Effect, 4 yards, +100%; Dissipation, -50%; No Incendiary Effect, -10%; No Signature, +20%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%; Variable, +5%) [12/level].

Frost Weapon

Keywords: Weapon Buff.

Full Cost: 45 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell turns the weapon into a weapon of chilling negative energy. Roll damage as usual but interpret it as fatigue damage that works like the FP loss described for Cold (p. B430), which is difficult to recover from. Alternatively, the wielder may decide to inflict burning damage that cannot start fires (as it comes from extreme cold, not heat), instead of fatigue damage.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Frost Weapon, +350%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [45]. *Notes:* "Frost Weapon" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11) + Frost Strike (Magical, -10%) [1]. This spell is based on the Chilling Strike imbuelement skill.

Frostbite

Keywords: Resisted (HT).

Full Cost: 19 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

If the victim fails to resist, he takes 1d-2 fatigue damage and 1d-2 toxic damage, as heat is being drained from the tissues of his body. Treat FP lost to the spell identically to FP lost to cold (B430).

Statistics: Fatigue Attack 1d-2 (HT; Based on HT, +20%; Freezing, +20%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [13] + Toxic Attack 1d-2 (HT; Accessibility, Only on living creatures of flesh, -20%; Based on HT, +20%; Link, +10%; Magical, -10%; Malediction 2, +150%; No Signature, +20%) [6].

Frostburn

Keywords: Missile, Obvious.

Full Cost: 43 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

This spell conjures an orb of frost, which will adhere to and freeze any creature it strikes. This orb can be dodged or blocked. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d-1 burning damage. This damage comes from extreme cold, not heat, so it cannot set anything on fire. The frost sticks to the target, damaging him again every second for 9 seconds. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The cycles can be stopped only by taking a point of burning damage from fire.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own orb of frostburn!

Statistics: Burning Attack 1d-1 (Blockable, -5%; Cyclic, 9 cycles, 1 second intervals, +900%; No Incendiary Effect, -10%; Nuisance Effect, Dangerous to be parried, -5%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [43].

Frozen Heart

Keywords: Resisted (HT).

Full Cost: 33 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

You freeze the subject's heart, causing immense pain. Agony incapacitates the subject for 30 seconds (see *Incapacitating Conditions*, p. B428). After that the subject is stunned (B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Accessibility, Only on creatures with hearts, -10%; Agony, +100%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/6, -15%; Sorcery, -15%) [33].

Fulminating Weapon

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell turns the weapon to raw lightning. Damage becomes burning and gains the surge modifier (p. B105). It now treats metallic armor with DR over 1 as DR 1. Any target that suffers even 1 point of damage from it must make a HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. The damage is reduced according to the following table.

Level	Damage
1	-2 per die
2	-1 per die
3	Full damage

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Fulminating Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Fulminating Weapon" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Fulminating Strike imbuement skill from *Pyramid* #3-60.

Fumble

Keywords: Resisted (DX).

Full Cost: 38 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 1 second.

If the subject fails to resist, he takes a -10 penalty to DX for the next DX-based roll he's going to make during the next second. This spell may be used instantly in response to an attack; in this case the DX penalty applies to the attack roll.

Statistics: Affliction 1 (DX; Attribute Penalty, DX-10, +100%; Based on DX, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/180, -40%; Reflexive, +40%; Sorcery, -15%) [38].

Fungal Pestilence

Keywords: Resisted (HT).
Full Cost: 84 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Permanent until cured.

The caster infects the subject with a fungal disease of his choice. The disease must be known to the caster. The combined value of appropriate enhancements and limitations (such as Attribute Penalty, Disadvantage, etc.) should not be more than 50%.

Statistics: Affliction 1 (HT; Accessibility, Only fungal diseases, -70%; Variable Enhancements, +500%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [84].

Fungal Ruin

Keywords: Resisted (HT).
Full Cost: 104 points.
Casting Roll: Will.
Range: 100 yards.
Duration: 1 minute, the effect stays permanently.

This spell accelerates the natural process of decay in organic materials. It causes organic material – leather, fur, wood, plastics, etc. – to decay to uselessness. Each 1-minute casting has the general effect of aging the subject 5 years. It will remove 1 DR and 1 HP from most subjects. Weapons simply lose one grade of quality per casting, except for Very Fine weapons, which are unaffected!

Statistics: Affliction 1 (HT; Accessibility, Only on organic materials, -50%; Advantage, Fungal Ruin, +840%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [104]. *Note:* "Fungal Ruin" is Unaging (Age Control, Only Forwards, +10%; Magical, -10%; Reduced Time 23, +460%) [84].

Fungus Control

Keywords: None.
Full Cost: 7 points/level.
Casting Roll: None.
Range: 10 yards.
Duration: Indefinite.

This spell enables living, but not intelligent and mobile fungi to flex. The minimum level required to animate a fungus equals its HP/4. An animated fungus can grab, lift, strike, and throw with ST equal to (4*Fungus Control level needed to animate it). It has your DX. It can walk and jump if it isn't fixed in place; Move equals to 4*Fungus Control level minus the level needed to animate it. You can use skills through animated fungi – but note that fungi usually have No Fine Manipulators. Fungi return to their

rest state once you give up control. Fungus Control requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn.

Statistics: Telekinesis 4 (Accessibility, Living Fungi Only, -30%; Animation, -20%; Sorcery, -15%) [7]. Every additional level adds 4 more levels of Telekinesis [+7].

Fungus Form

Keywords: None.

Full Cost: 45 points.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume the form of any natural fungus between 1/2 and five times his own size, as if using the Morph advantage (p. B84). The transformation takes 10 seconds. Equipment and gear up to his Light Encumbrance change with him. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead). The caster cannot move about, attack, etc., unless a fungus with those abilities exists in the game world and he takes that form, or unless Animate Fungus is cast on his fungus form. He may hear normally but may not see except to sense light and darkness. He may not speak.

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ.

Statistics: Morph (Accessibility, Non-Intelligent Fungi Only, -60%; Can Carry Objects, Light Encumbrance, +20%; Sorcery, -15%) [45].

Fungus Form Other

Keywords: Buff.

Full Cost: 66 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster transforms the subject into any natural fungus between 1/2 and five times the subject's own size, as if using the Morph advantage (p. B84). Equipment and gear up to his Light Encumbrance change with him. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead). The subject cannot move about, attack, etc., unless a fungus with those abilities exists in the game world and he was transformed into it, or unless Animate Fungus is cast on his fungus form. He may hear normally but may not see except to sense light and darkness. He may not speak.

The subject retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may omit racial mental disadvantages (e.g., Bestial), and he always drops the racial IQ modifier from a template, allowing the subject to use his own IQ.

Statistics: Affliction 1 (HT; Advantage, Fungus Form Other, +500%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [66]. *Note:* "Fungus Form Other" is Morph (Accessibility, Non-Intelligent Fungi Only, -60%; Can Carry Objects, Light Encumbrance, +20%; Magical, -10%) [50].

Fungus Growth

Keywords: Buff.

Full Cost: 70 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 minute.

Causes the equivalent of one month's growth in one minute. Giant mushrooms might change only slightly, while normal mushrooms grow tremendously.

Statistics: Affliction 1 (HT; Accessibility, Only on fungi, -40%; Advantage, Fungus Growth, +630%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [70]. *Note:* "Fungus Growth" is Unaging (Age Control, Only Forwards, +10%; Magical, -10%; Reduced Time 16, +320%) [63].

Fungus Speech

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Personal.

Duration: Indefinite.

You can converse with fungi. All earthly fungi are IQ 0, but a large mushroom might be "wiser" than the average fungus, at the GM's whim. A fungus might know how recently it was watered or walked on, or something else that directly bears on its well-being, but would be unable to relate an overheard phone conversation. Any normal fungus will always cooperate, within the limits of its ability. It takes one minute to ask one question and get the answer – if the fungus decides to speak at all.

Statistics: Speak with Fungi (Sorcery, -15%) [13].

Fur

Keywords: Buff.

Full Cost: 19 or 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 90 minutes.

The subject grows fur. The basic (19-point) version prevents sunburn. The improved (26-point) version makes the subject grow thick fur that also provides DR 2*.

Statistics: Affliction 1 (HT; Advantage, Fur, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Notes:* "Fur" is Fur (Magical, -10%) [1]. The improved version adds DR 2 (Flexible, -20%; Magical, -10%) [+7].

Galactomancy

Keywords: Information.

Full Cost: 35 or 85 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Galactomancy is divination by examining the shape of a puddle of milk after a cat has lapped it up. Sacred cats may offer a bonus.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (35-point) version of this spell requires 10 minutes to cast! The improved (85-point) version requires only the usual one or two seconds.

Statistics: Precognition (Accessibility, Requires a puddle of milk and a cat, -40%; Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%) [35]. The improved version adds Reduced Time 10 (+200%) [+50].

Gargoyle Skin

Keywords: None or Buff.

Full Cost: 1 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

Subject's skin acquires the appearance of stone, giving +2 to Camouflage and Stealth when posed still and unclad against a stony or rocky background. In addition, it gives +2 to Acting to "impersonate" statuary!

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Limited Camouflage (Stone; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Gargoyle Skin, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Gargoyle Skin" is Limited Camouflage (Stone; Magical, -10%) [1].

Gastromancy

Keywords: Information.

Full Cost: 37 or 87 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Gastromancy requires a willing subject. The subject is placed in a trance (requires a successful Hypnotism roll), during which he utters things of a prophetic and cryptic nature. When the spell is cast, the subject loses 5 FP in addition to the energy spent by the caster, whether or not the spell was successful.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (37-point) version of this spell requires 10 minutes to cast! The improved (87-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Costs Fatigue, 5 FP, Variant, -25%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires Hypnotism Roll, -10%) [37]. The improved version adds Reduced Time 10 (+200%) [+50].

Gate Seal

Keywords: None.

Full Cost: 26 points or 33 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Five hours (basic) or Permanent (improved).

The sorcerer must touch a gate or portal to cast this spell. Gate Seal prevents any activation of the gate or portal, though the seal may be negated by a successful Dispel Magic cast upon the spell. A Lockmaster spell does not function on the Gate Seal.

The basic (26-point) version of this spell has a duration of five hours. The improved (33-point) version has a permanent duration.

Statistics: Affliction 1 (HT; Accessibility, Only portals and gates, -50%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Melee Attack, Reach C, -30%; No Signature, +20%; Paralysis, Variant, +150%; Sorcery, -15%) [26]. The improved version replaces Extended Duration, 100x, +80% with Extended Duration, Permanent, +150% [+7].

Gather Moss

Keywords: Resisted (HT).

Full Cost: 49 points or 54 points.

Casting Roll: Will. Use DX or unarmed combat skill to hit when using the touch version.

Range: Unlimited or Touch.

Duration: 1 minute.

Patches of moss grow out of the subject's skin, beginning with his hands and feet. At this point, he gains Bad Grip 1. The moss expands every 5 seconds to cover a new body location, following the following progression:

5th second: Lower arms and lower legs. All DX rolls are at -2.

10th second: Upper arms and upper legs. Reduce Basic Move by 3.

15th second: Torso. Worsen the DX penalty to -4.

20th second: Neck/throat. The subject begins choking (p. B428).

25th second: Head. Blind, no sense of smell, cannot speak. Hearing rolls are at -5.

The subject, and his friends, may attempt to scrape the moss off. It takes two Ready maneuvers to remove moss from a location (both feet and hands, both lower arms and lower legs, and so on). Suitable tools (knife, shovel, etc.) can reduce the time needed to a single Ready maneuver. Skill or DX checks should be required to avoid inflicting 1 HP damage on the subject by accident.

When the spell ends, the moss falls off. If the subject was choking, he is stunned (p. B420) and may roll vs. HT once per second to recover.

The caster can alternatively cast this spell as a touch spell to begin the spread of the moss at the touched location. If, for example, you touch the subject's neck when you make the spell roll, moss appears on his neck first. It then spreads to the other locations, in the established order.

The improved (54-point) version of this spell makes the moss contagious. Anyone who touches the subject of your Gather Moss spell must make a HT roll. If he fails, he is infected by the spell and suffers right along with the subject. If his roll succeeds, he is immune for five seconds.

Statistics: Affliction 1 (HT; Alternative Enhancements (Melee Attack, Reach C, Cannot Parry, -35% and Malediction 1, +100% and Selective Effect, +20% or Malediction 2, +150%), +170%; Attribute Penalty, DX-4, +40%; Choking, +100%; Delay, +0%; Disadvantage, Bad Grip 1, +5%; Disadvantage, Basic Move -3, +15%; Disadvantage, Blindness, +50%; Disadvantage, Cannot Speak, +15%; Disadvantage, No Sense of Smell/Taste, +5%; Fixed Duration, +0%; No Signature, +20%; Nuisance Effect, Can be scraped off, -10%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [49]. The improved version adds Cosmic, Contagious, +50% [+5].

Gauntness

Keywords: Resisted (HT).

Full Cost: 24 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The subject is temporarily emaciated, losing one level of weight (up to Skinny). Armor and clothing hangs on the subject, hampering him (-2 DX). Repeated castings do not decrease the weight further.

Statistics: Affliction 1 (HT; Disadvantage, Skinny, +5%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; One category shift only, -20%; Sorcery, -15%) [24].

Gemjump

Keywords: None.

Full Cost: 30 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Unlimited.

Duration: Instantaneous.

This spell teleports you to the location of a specially prepared gem. There can be only one prepared gem at the same time, attuning to a new one (one minute of concentration) prevents you from teleporting to the other one. You may carry gear up to your Medium Encumbrance when you teleport.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as per Warp (p. B97). On a failure, the teleportation fails and you strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you teleport, but to the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

Statistics: Warp (Anchored, Gem, -60%; Extra Carrying Capacity, Medium, +20%; Requires Concentrate, -15%; Sorcery, -15%) [30].

Genomancy

Keywords: Information.

Full Cost: 40 or 90 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Genomancy is divination by examining the pattern of introns in someone’s DNA. A blood sample and some means of viewing the introns (e.g., a genetics lab) is required.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (40-point) version of this spell requires 10 minutes to cast! The improved (90-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a blood sample, -10%; Requires a genetics lab, -10%) [40]. The improved version adds Reduced Time 10 (+200%) [+50].

Gentle Repose

Keywords: Buff.

Full Cost: 29 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell prevents the subject from rotting. When cast on a corpse, it can preserve it until the burial. When cast on a living creature, this spell makes it immune to Rotting Death and similar effects.

Statistics: Affliction 1 (HT; Advantage, Gentle Repose, +50%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [29]. *Note:* “Gentle Repose” is Immunity to Rot (Magical, -10%) [5].

Geomancy

Keywords: Information.

Full Cost: 35 or 85 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Geomancy is divination by examining the earth. Geomancy must be practiced outdoors, where the geomancer can examine the lay of the land. Geomancy is very location-specific; any questions that do not pertain to the area where the divination is being performed are at -8.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (35-point) version of this spell requires 10 minutes to cast! The improved (85-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Environmental, Outdoors, -20%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, Only regarding the area, +20%) [35]. The improved version adds Reduced Time 10 (+200%) [+50].

Geyser

Keywords: Area (Leveled).

Full Cost: 83 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You may cause a geyser of scalding-hot water to gush forth from the ground.

The basic (83-point) version of this spell lets you create a hole with a radius up to 2 yards. Every additional 15 points doubles this radius: four yards for 62 points, eight yards for 77 points, and so on. You may always choose to affect a smaller area.

All those within the geyser suffer 3d burning non-incendiary damage. They are automatically pushed out of the area of effect, and must make a DX roll to stay afoot! Two seconds after the geyser starts, the water falls back as spray. Under normal conditions, it affects an area double the radius of the original geyser. All those within this new spray area suffer 1d burning non-incendiary damage.

Statistics: Affliction 1 (DX; Accessibility, Legs and similar supportive body parts only, -20%; Area Effect, 2 yards, +50%; Based on DX, +20%; Cosmic, Irresistible Attack, +300%; Environmental, Ground, -20%; Fixed Duration, +0%; Link, +10%; No fatigue loss from Seizure, -20%; No Signature, +20%; Seizure, +100%; Sorcery, -15%; Reduced Duration, 1/180, -40%; Variable, Area, +5%) [49] + Burning Attack 3d (Area Effect, 2 yards, +50%; Environmental, Ground, -20%; Link, +10%; Magical, -10%; No Incendiary Effect, -10%; Variable, Area, +5%) [22] + Burning Attack 1d (Area Effect, 4 yards, +100%; Delay, 2 seconds, +0%; Environmental, Ground, -20%; Link, +10%; Magical, -10%; No Incendiary Effect, -10%; Overhead, +30%; Variable, Area, +5%) [12]. Improved versions add Area Effect (+50%/level) to all advantages [+15].

Ghaele's Gaze

Keywords: Resisted (Will).

Full Cost: 27 points for level 1 + 9 points/additional level.

Casting Roll: Will.

Range: 10 yards.

Duration: Instantaneous.

Evil creatures are terrified by ghaeles, while non-evil creatures are awed. You can target any creature within 10 yards. Roll a Quick Contest of Will with your subject. If you win, roll 3d for the result, as usual, but add your margin of victory instead of his margin of failure. Your victim gets +1 per Fright Check after the first within 24 hours. If a victim succeeds at his Fright Check, he will be unaffected by your Ghaele's Gaze for one hour. Each additional level of this spell imposes -1 to the Fright Check. For example, with Ghaele's Gaze 4, the subjects must make Fright Checks at -3. Use the standard Fright Check table for unholy creatures, but for all other subjects use the Awe variant table (*GURPS Powers*, page 85).

Statistics: Terror (Active, +0%; Presence, +25%; Sorcery, -15%; Vision-Based, Reverse, -20%) [27]. Additional levels add -1 to the Fright Check [+9].

Ghost Touch Armor

Keywords: Armor Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Gives the armor or shield the Affects Insubstantial enhancement (p. B102), allowing it affect insubstantial beings. Mostly, this is useful only for slams.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Ghost Touch Armor, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Ghost Touch Armor" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11). This spell is based on the Spiritual Defense imbuelement skill from *Pyramid* #3-4.

Ghost Weapon

Keywords: Weapon Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell allows the weapon to affect ghosts and other insubstantial beings, as if it had the Affects Insubstantial enhancement (B102).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Ghost Weapon, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Notes:* "Ghost Weapon" is Blessed (Ghost Weapon; Magical, -0%) [15]. Magical costs -0% because Blessed already includes the Divine power modifier. Magical, -0% just replaces it.

Ghost Whip

Keywords: Obvious.

Full Cost: 12 points.

Casting Roll: None. Use Force Whip to hit.

Range: Self.

Duration: Instantaneous.

While this spell is active, a whip of ghostly evanescence appears in your hand. Every attack is considered to be a casting of this spell. The whip deals thrust crushing damage with Reach 1-4. A Ready maneuver is required whenever you want to change reach (this does not cost FP). The whip is flexible, allowing it to be used to entangle enemies or weapons, and gives you +2 on disarming attempts. The whip can affect insubstantial beings as well as substantial beings. It cannot be used to parry. It cannot be grappled, damaged, or destroyed, but can be parried normally. The Weapon Adaptation perk allows you to crack the whip and deliver painful blows (see p. B406).

Statistics: Natural Weapon (Crushing; Affects Insubstantial, +20%; Cannot Parry, -40%; Disarming, +20%; Extra Reach, 1-4, Ready maneuver necessary, +90%; Flexible, +30%; Intangible, +50%; Single, -20%; Sorcery, -15%; Swing-Capable, +20%; Unbalanced, -30%) [12].

Ghost Wind

Keywords: Area (Fixed), Resisted (Will).

Full Cost: 48 points for level 1 + 10 points/additional level.

Casting Roll: Will.

Range: 10 yards.

Duration: Instantaneous.

All subjects within an area with a 2-yard radius see a vivid apparition of their own deaths. This might be a vision of the future or a false vision from another possible future – but it is always chilling. Roll a Quick Contest of Will with every subject. If you win, roll 3d for the result, as usual, but add your margin of victory instead of his margin of failure. Your victim gets +1 per Fright Check after the first within 24 hours. If a victim succeeds at his Fright Check, he will be unaffected by your Ghost Wind for one hour. Each additional level of this spell imposes -1 to the Fright Check. For example, with Ghost Wind 4, the subjects must make Fright Checks at -3.

This spell can also be useful to the subject, by pointing out a possibly deadly hazard.

Statistics: Terror (Active, +0%; Area Effect, 2 yards, +50%; Presence, +25%; Sorcery, -15%) [48]. Additional levels add -1 to the Fright Check [+11].

Ghoul Touch

Keywords: Resisted (HT).

Full Cost: 32 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 1 minute.

The caster must touch the subject on the head (-5 to caster's attack roll). If the subject fails to resist, he is totally paralyzed (p. B428) and cannot move at all for one minute. When paralyzed, the subject exudes a stench of death and decay. This causes a -2 reaction from most people and animals (although pests or carrion-eating scavengers might be unusually attracted to you!) After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Disadvantage, Bad Smell, +10%; Hard to Use 2, Variant, -10%; Melee Attack, Reach C, -30%; Malediction 1, +100%; No Signature, +20%; Paralysis, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [32].

Giant Form

Keywords: None.

Full Cost: 60 points or 140 points or more; see text.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume different forms, but is limited to giants (ogres, hill giants, trolls, etc.) as if using the Morph advantage (p. B84). The transformation requires 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any giant he can turn into.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his "slots" are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a "slot".

If the caster can assume any racial template worth no more than his native one, Giant Form costs 60 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 60 points. For instance, a human who can take on any giant racial template worth up to 75 points would pay 135 points for Giant Form.

In addition, the caster may purchase the improved (140-point) version of this spell. This shortens the transformation time to 1 second.

Statistics: Morph (Accessibility, Giants Only, -25%; Sorcery, -15%) [60]. The improved version adds Reduced Time 4, +80% [+80].

Giant Spider

Keywords: Buff.

Full Cost: 16 points for level 1 + 9 points/level + ST to support the new size.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The caster enlarges a spider. As the subject's size increases, so must its ST (or it would collapse under its own weight).

Each level of Giant Spider lets the caster increase his subject's Size Modifier by +1. Find the subject's final height from the *Size Modifier Table* (p. B19). Increases in SM affect the subject's arm and leg length when calculating reach and determining whether he can negotiate obstacles; see *Size Modifier and Reach* (p. B402).

If the caster attempts to enlarge the subject in a room, vehicle, container, etc. that isn't large enough to hold it, its growth normally stops. However, if maximum thrust damage for the subject's current ST is greater than the wall or ceiling's DR, it bursts through it. This takes one second per point of DR.

The caster must buy the ST necessary to support the subject's enlarged form and add it to the Advantage enhancement. This is 5 x final height in yards. This ST is only available when the subject grows, and the caster must buy it with the Size limitation (see *Strength*, p. B14). Use the subject's maximum SM to determine the limitation value. Note that if this additional ST is not enough to support the enlarged form of the subject, the spell fails!

Statistics: Affliction 1 (HT; Accessibility, Spiders Only, -50%; Advantage, Giant Spider, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [16]. *Notes:* "Giant Spider" is Growth (Magical, -10%; Maximum Size Only, +0%) [9]. Additional levels add further Giant Spider to the Advantage enhancement [+9].

Gift of Letters

Keywords: Buff.

Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

For the duration, the subject is literate in one written language, chosen when you cast the spell. You do not have to be literate in the language – in fact, this is an excellent way to get around that problem! However, the GM is within rights to declare certain languages "secret" or "lost" and thus unavailable unless you first learn the language (to at least Broken) legitimately.

Statistics: Affliction 1 (HT; Advantage, Gift of Letters, +120%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Gift of Letters" is Cosmic Power 3 (Limited, One Written Language, -50%; Magical, -10%) [12].

Gifts from Heavens

Keywords: Area (Fixed), Missile.

Full Cost: 75 points or 200 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit (see text).

Range: 100 yards.

Duration: Instantaneous.

You cause a meteor, glowing with astral fire, plummet from the Stellar Sphere onto the battlefield. This spell can only be used outdoors. Unlike most other spells, Gifts from Heavens has Acc 0,

and is very difficult to aim properly. Use Innate Attack (Gaze), with normal range penalties, at +4 for affecting an area; but treat your DX for this roll as if it was 8 (or one less than usual, if already 8 or worse), and your maximum skill before the +4 bonus is 10.

The meteor becomes visible and audible immediately after casting, but it falls with a delay of two seconds. The basic (75-point) version does 10d crushing incendiary damage in a 8-yard-radius area. The improved (200-point) version does 20d crushing incendiary damage in a 16-yard-radius area. Divide damage by the distance in yards between the target and the center of the effect. Since the meteor falls from above, it bypasses any cover that does not provide overhead protection, and negates attack penalties to hit crouching, kneeling, sitting, or prone targets.

Statistics: Crushing Attack 10d (Area Effect, 8 yards, +150%; Delay, 2 seconds, +0%; Dissipation, -50%; Environmental, Outdoors, -20%; Inaccurate 3, -15%; Incendiary, +10%; Overhead, +30%; Sorcery, -15%; Untrainable, -40%) [75]. The improved version increases the damage to 20d and improves Area Effect to 16 yards, +200% [+125].

Glandular Rupture

Keywords: Resisted (HT).

Full Cost: 56 points for level 1 + 40 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Depends on the poison.

The caster causes internal bleeding in the target creature's venom glands or similar organs. The target creature immediately becomes affected by its own poison, rolling to resist normally. The combined value of appropriate enhancements and limitations (such as Cyclic, Side Effects and Symptoms) should not be more than 50% per level of the spell, and the damage should not be more than 2d. Since this spell poisons the victim directly, omit penetration modifiers, such as Contact Agent, Blood Agent, and Respiratory Agent.

Statistics: Toxic Attack 2d (HT; Accessibility, Only the poison innate to the victim, -60%; Variable Enhancements, +500%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable, +5%) [56]. Each additional level increases the Variable Enhancements by 500%.

Glass Missile

Keywords: Missile, Obvious.

Full Cost: 3.5 points/level*.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a shard of glass at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d(0.5) cutting damage per level of this spell. The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Statistics: Cutting Attack (Armor Divisor, (0.5), -30%; Blockable, -5%; Sorcery, -15%) [3.5/level*].

* Calculate the cost, then round up.

Glass to Air

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell allows you to turn glass or obsidian into breathable air. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the

matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The initial matter can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the volume of produced air as shown in the table below. 1 cubic foot of air is enough for one person to breathe for 1 minute.

Level	Mass	Glass/Obsidian (140 lbs./ft ³)
1	10 lbs.	0.07 ft ³
2	40 lbs.	0.29 ft ³
3	90 lbs.	0.64 ft ³
4	160 lbs.	1.14 ft ³
5	250 lbs.	1.79 ft ³
6	360 lbs.	2.57 ft ³
7	490 lbs.	3.50 ft ³
8	640 lbs.	4.57 ft ³
9	810 lbs.	5.79 ft ³
10	1000 lbs.	7.14 ft ³
+1	=10*lvl ²	=mass/density

Statistics: Create (Transmute Glass to Air, +50%; Transmutation Only, -100%; Magical, -10%) [2/level].

Glass Transparency

Keywords: Buff.

Full Cost: 9 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Makes an object made of earth, stone, sand, brick, glass, obsidian, or ceramics transparent. The object's outlines remain visible and its physical characteristics remain unchanged (hardness, weight, etc.). The caster can choose to tint the object as he desires instead of making it colorless.

Statistics: Affliction 1 (HT; Accessibility, Only on earthen objects, -40%; Advantage, Glass Transparency, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [9]. *Note:* "Glass Transparency" is Transparency (Magical, -10%) [1].

Glass Vision

Keywords: Buff.

Full Cost: 15 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the subject see through glass even if it is stained or warped. Each level of this spell allows the subject to see through up to six inches of glass. The subject can just barely see the outline of the substance he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Glass Vision 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Glass Vision to the Advantage enhancement [+3]. *Note:* Each level of "Glass Vision" is Penetrating Vision 1 (Magical, -10%; Specific, Glass, -60%) [3].

Glass Wall

Keywords: Buff.

Full Cost: 52 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell lets the subject see through solid walls, floors, ceilings, or other similar barriers up to 4 feet thick (material doesn't matter). The subject can just barely see the outline of the barrier he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Glass Wall, +400%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [52]. *Note:* "Glass Wall" is Penetrating Vision 8 (Magical, -10%; Specific, Barriers, -40%) [40].

Glasswraith

Keywords: Buff.
Full Cost: 52 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Nine minutes.

This spell makes the subject to intangible to glass and obsidian. He cannot turn this ability off, and automatically falls through any glass floors. He will need to hold his breath on long trips (this spell does not provide air) and gains no special ability to see through glass. He may carry up to Medium encumbrance while doing this, but he cannot carry any glass objects – they fall through his body.

This spell does *not* make the subject immune to attacks with glass weapons, but makes his highly resistant to them. The subject is considered to be diffuse against glass attacks. It makes him immune to crippling injuries and reduces the damage you suffer from attacks with glass weapons; see *Injury to Unliving, Homogenous, and Diffuse Targets* (p. B380). Glass foes cannot slam or grapple the subject! This includes all the benefits of No Blood, No Brain, and No Vitals, but only against glass attacks.

Statistics: Affliction 1 (HT; Advantage, Glasswraith, +380%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [52]. *Note:* "Glasswraith" is Permeation (Glass; Always On, -40%; Can Carry Objects, Medium Encumbrance, +50%; Magical, -10%; Nuisance Effect, Can't carry anything glass, -20%) [8] + Injury Tolerance (Diffuse; Limited, Glass, -60%; Magical, -10%) [30].

Glib Tongue

Keywords: Resisted (Will).
Full Cost: 8 points.
Casting Roll: Will.
Range: Self.
Duration: 1 minute.

The caster can mystically make anything he says be what the subject (who must be a sapient creature) wants to hear. Whatever the caster says, even total gibberish, will find hearty agreement. However, the caster won't have a clue what the target thinks he's saying... GMs may give up to +3 on reaction rolls, depending on how cleverly the PC roleplays this. Everyone he wishes to affect resists with Will, at a bonus based on their distance from the caster (use the bonus under *Size on the Size and Speed/Range Table*, p. B550). If a subject resists, the caster have his attention, but he hears what he wants to hear from the caster.

Anyone who fails rolls on the Reaction Table (p. B560) with a +3 bonus – or the caster can add +3 to an Influence Roll (p. B359) against that person. All other modifiers, such as situational modifiers, apply.

Statistics: Charisma 3 (Nuisance Effect, Caster is unaware of what he is saying, -20%; Requires Will vs. Will Roll, -15%; Selective Area, +20%; Short-Range 2, -20%; Sorcery, -15%) [8].

Glimpse of Hell

Keywords: Resisted (Will).

Full Cost: 328 points.

Casting Roll: Will.

Range: 10 yards.

Duration: Instantaneous.

The subject sees a vivid vision of the horrors of Hell and becomes affected by all pain and suffering of the lost souls. You can target any creature within 10 yards. Roll a Quick Contest of Will with your subject. If you win, roll 3d for the result, as usual, but add your margin of victory instead of his margin of failure. Your victim gets a -5 penalty to his Fright Check. Your victim gets +1 per Fright Check after the first within 24 hours. If a victim succeeds at his Fright Check, he will be unaffected by your Glimpse of Hell for one hour. This spell *ignores* Fearlessness, Unfazeable, and similar protections against fear.

Statistics: Terror (-5) (Active, +0%; Cosmic, Irresistible Attack, +300%; Presence, +25%; Sorcery, -15%) [328].

Glitch

Keywords: Resisted (HT).

Full Cost: 28 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell causes something to go wrong for a moment with the subject machine. It may drop whatever it was holding, eject a part, miss a cog in its drive train, or garble a data packet. Ingenious casters will find all sorts of uses. The game effects can be anything from a trivial annoyance (if cast on a flashlight, for instance), to potentially deadly (if cast on an automedic in the middle of laser surgery).

Statistics: Affliction 1 (HT; Accessibility, Machines Only, -20%; Fixed Duration, +0%; Malediction 2, +150%; No fatigue loss from Seizure, -20%; No Signature, +20%; Seizure, +100%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [28].

Glitterdust

Keywords: Area (Leveled), Resisted (HT or DX).

Full Cost: 37 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 5 seconds or 3 minutes.

A cloud of golden particles covers everyone and everything in the area, causing creatures to become blinded for 5 seconds on a failed HT roll to resist and visibly outlining invisible things for 3 minutes on a failed DX roll to resist. All within the area are covered by the dust, which cannot be removed and continues to sparkle until it fades. Creatures with Protected Vision resist blindness at +5.

Statistics: Affliction 1 (HT or DX; Area Effect, 2 yards, +50%; Based on DX for Negated Advantage, +20%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Invisibility, +40%; No Signature, +20%; Reduced Duration, 1/30, on Blindness, -30%; Sorcery, -15%; Vision-Based on Blindness, -20%) [37]. Additional levels add Area Effect (+50%) [+5].

Globe of Invulnerability

Keywords: Area (Leveled).

Full Cost: 100 points for level 1 + 15 points/additional level.

Casting Roll: None.

Range: Self.

Duration: 10 seconds.

This spell creates an immobile spherical zone that negates magic around the caster. It completely prevents all magical powers from affecting anything in the area. Enemies can “burn” through your Globe of Invulnerability and affect those protected by it by winning a Quick Contest of Will with the caster. If the attacking ability *already* requires a Quick Contest of some kind, the attacker rolls only once, but the target gets +5 to resist. Globe of Invulnerability affects only hostile spells, leaving friendly effects unaffected.

Globe of Invulnerability only interferes with attempts to affect creatures and objects in the area directly. For instance, a mage could not cast Mental Stun on a creature in the area, but he could cast Poltergeist outside the area to throw rocks at the creature in the area.

Statistics: Static (Magic; Area Effect, 2 yards, +100%; Discriminatory, +150%; Persistent, +40%; Resistible, -50%; Sorcery, -15%; Variable, Area, +5%) [99] + Rules Exemption (Magical abilities can coexist with anti-magic Static) [1]. Additional levels increase Area Effect (+50%) [+15].

Gloom

Keywords: Area (Leveled).

Full Cost: 33 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

This spell decreases the illumination level in the area by up to 10 levels, but cannot bring it below -10.

Statistics: Obscure Vision 10 (Extended Duration, 3x, +20%; Ranged, +50%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [33]. Further levels add Area Effect (+50%) to the advantage [+10].

Glow

Keywords: Area (Leveled).

Full Cost: 30 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

This spell increases the illumination level in the area by up to 10 levels, but cannot bring it above 0.

Statistics: Obscure Vision 10 (Extended Duration, 3x, +20%; Nuisance Effect, Does not increase illumination above zero, -15%; Ranged, +50%; Reversed, -0%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [30]. Further levels add Area Effect (+50%) to the advantage [+10].

Glue

Keywords: Area (Leveled).

Full Cost: 35 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You can make a surface extremely sticky. Placing the effect requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). Anyone stepping onto the surface has their legs grappled with ST 10. The effect lasts for 10 seconds, continuing to grab new people who blunder into it. Those already caught grow more strongly glued, with +1 to the ST of their bonds for each additional second they remain grappled.

The basic (35-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 10 to full cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum.

Statistics: Binding 10 (Area Effect, 2 yards, +50%; Persistent, +40%; Sorcery, -15%) [35]. Each additional level adds more Area Effect [+10].

Glutton's Cheat

Keywords: None or Buff.

Full Cost: 1 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

The subject can eat like a slob yet not soil their face, hands, or clothing. Deflects edible matter toward the mouth – not foreign matter away from the body.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Accessory (Bib; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Glutton's Cheat, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Glutton's Cheat" is Accessory (Bib; Magical, -10%) [1].

Gluttony

Keywords: Resisted (HT).

Full Cost: 38 points for level 1 + 1 point/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

This spell makes the subject's digestive system less effective at digesting food. If the subject had Reduced Consumption of any level, they lose that advantage in regards to food. Moreover, the subject gains a number of levels of Increased Consumption (p. B139) equal to this spell's level (maximum 3). This spell only works on living creatures, not on machines that may consume fuel or energy.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Disadvantage, Increased Consumption 1, +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Reduced Consumption 4 (Food Only, -50%), +4%; No Signature, +20%; Sorcery, -15%) [38]. Additional levels add more levels of Disadvantage, Increased Consumption (+10%) [+1].

Goggles

Keywords: None or Buff.

Full Cost: 1 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

Subject may ignore -1 in Vision penalties due to bright light and get +1 to HT rolls to resist dazzling effects (flash-bang grenades, Flash spells, etc.).

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Robust Vision (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Goggles, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Goggles" is Robust Vision (Magical, -10%) [1].

Golem

Keywords: None.
Full Cost: 44 points.
Casting Roll: None.
Range: Touch.
Duration: Indefinite, see text.

The caster animates a golem. The golem's body must be prepared in advance. See *GURPS Magic*, page 59 for the clay golem template.

If the golem is destroyed, the caster must wait a full day to create a new one. You can only cast this spell if your character's point total is equal or bigger than the golem's.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Golem; Built on 100%; Constantly, no roll required; Adjustable, Golems, +100%; Magical, -10%; Minion, +50%; Requires preparation, -20%) [44].

Golembane Weapon

Keywords: Weapon Buff.
Full Cost: 79 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

The weapon enhanced ignores DR of golems for the duration. This only applies to the natural DR of the golem, not one granted by buffs, additional worn armor, etc.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Golembane Weapon, +690%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [79]. *Note:* "Golembane Weapon" is Imbue 3 (Limited Skill Access, One Skill, -80%) [8] + Unusual Training [1] + Penetrating Strike (VH) DX+10 [48], modifier with Accessibility, Only against golems (-80%), Cosmic, No die roll required (+100%), Magical (-10%), Reduced Fatigue Cost 1 (+20%), and Visible (-10%) for the total of 69 points.

Grabbing Hand

Keywords: None.
Full Cost: 37 points.
Casting Roll: None.
Range: 10 yards.
Duration: Indefinite.

Creates a SM+0 hand made of shimmering pinkish force that appears between the caster and one of his opponents. This floating, disembodied hand moves automatically to remain between them, regardless of where the caster moves or how the opponent tries to get around it, providing cover for the caster against that opponent (and other opponents, if they are close enough). The opponent firing at the caster risks hitting the hand instead. See *Firing Through an Occupied Hex*, p. B389.

The hand has HP 20 and DR 20. The caster can Concentrate to move the hand at Move 4, but only towards him or the designated opponent, and the hand cannot move closer than 3 yards to the caster. The caster may Concentrate to make the Grasping Hand shove (p. B372) or grapple the designated opponent.

The designated opponent must evade (p. B368) the hand, if he wants to approach the caster. The hand is considered a standing creature, and has DX of the caster and ST 12. The hand can even stop insubstantial opponents from approaching. Getting past the hand or destroying it dispels it.

The caster can Concentrate to redirect the hand to another opponent.

Statistics: Telekinesis 4 (Affects Insubstantial, +20%; Independent, +40%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing, shoving, grappling, -40%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [15] + Telekinesis 8 (Affects Insubstantial,

+20%; Independent, +40%; Lift Only, -20%; Minimum Range, 3 yards, -5%; Nuisance Effect, Breakable, -5%; One Task, Interposing, shoving, grappling, -40%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [22].

Grace

Keywords: Buff.

Full Cost: 30 points for level 1 + 18 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You increase the target's DX by 1 per level of this spell for 3 minutes. This affects the DX-based skills, Basic Speed, etc.

Statistics: Affliction 1 (HT; Advantage, Grace 1, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. Additional levels add further Grace to the Advantage enhancement (+180%) [+18]. *Note:* Each level of "Grace" is DX 1 (Magical, -10%) [18].

Graceful Weapon

Keywords: Weapon Buff.

Full Cost: 24 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The weapon does not become unready after attacking or parrying, even on a critical miss.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Graceful Weapon, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [24]. *Note:* "Graceful Weapon" is Perfect Balance (Variant; Magical, -10%) [14].

Grafting Weapon

Keywords: Weapon Buff.

Full Cost: 66 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 1d of follow-up (p. B105) cutting damage on limb, extremity, and neck hits, but only if the weapon deals cutting damage. This additional damage causes no blunt trauma and no knockback. When disarmed or dropped via a critical miss, the hand that holds the weapon falls off!

While you are wielding the weapon, any cutting attack that would cripple a limb or extremity costs you the use of that part (see p. B421) but inflicts no injury on you or it. Instead, it severs the body part, which falls to the ground and becomes inert. An extremity separates from its limb, while a limb separates from your torso. You may reattach body parts by holding them in place for a minute. You can reattach crippled body parts if the injury is temporary or lasting, but they remain crippled. Permanently crippled body parts are destroyed. You *can* reattach the hand that fell off because of a critical miss or a successful disarming attempt.

Additionally, if you sever a body part of another creature, you can attach it in place of yours. To do this, you must pay the character point cost of the attached body part.

Statistics: Affliction 1 (HT; Accessibility, Only on cutting weapons, -40%; Advantage, Grafting Weapon, +580%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [66]. *Note:* "Grafting Weapon" is Cutting Attack 1d (Accessibility, Only on limb, extremity, and neck hits, -10%; Follow-Up, This weapon, +0%; Magical, -10%; No Blunt Trauma, -20%; No Knockback, -10%; Nuisance Effect, Hand falls off, -20%) [3] + Injury Tolerance (Independent Body Parts; Affects Others 1,

Only the wielder, +50%; Cosmic, Allows attaching other cut off body parts, +50%; Detachable Head, +15%; Magical, -10%; Reattachment Only, -50%) [55].

Grant Plant Intelligence

Keywords: Buff.

Full Cost: 26 points for level 1 + 18 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You increase the subject's IQ by 1 per level of this spell for 3 minutes. This affects the IQ-based skills, Will, Per, etc. Note that this increase of IQ will *not* affect casting rolls for spellcasters using such magic systems as *Ritual Path Magic* or *Incantation Magic*. This spell can only affect living plants.

Statistics: Affliction 1 (HT; Accessibility, Only on living plants, -40%; Advantage, Grant Plant Intelligence 1, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. Additional levels add further Grant Plant Intelligence to the Advantage enhancement (+180%) [+18]. *Note:* Each level of "Grant Plant Intelligence" is IQ 1 (Magical, -10%) [18].

Graphology

Keywords: Information.

Full Cost: 42 or 92 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Graphology is reading the handwriting of someone to gain information about them. At least 30 words are required for a proper reading, and the signature must be among them. The signature alone may be read at -5. Graphology is only really suited to answering questions about the subject; attempts to divine information about absent persons are at -5.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (42-point) version of this spell requires 10 minutes to cast! The improved (92-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Penalty for impersonal questions, -5%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a handwriting sample, -10%) [42]. The improved version adds Reduced Time 10 (+200%) [+50].

Grasping Branch

Keywords: Resisted (IQ)

Full Cost: 15 points/level.

Casting Roll: ST.

Range: 10 yards.

Duration: Indefinite.

The caster can take control of a tree's or shrub's branch. This requires a Quick Contest. For this initial "takeover attempt" only, the caster rolls against his Grasping Branch spell level multiplied by 4, adds 2, and applies normal range penalties (p. B550) to the target. The subject (who must be within 10 yards) resists with his IQ.

If successful, the caster has control over that branch for as long as he concentrates. This should be interpreted liberally. In all cases, treat the branch as having DX equal to the caster's and its normal ST.

He can use a branch to attack – including making the subject hit himself! He can drop weapons, pull triggers, push buttons, and so on, as long as the subject is already holding onto the appropriate item or he's within branch's reach of it.

Statistics: Telekinesis 4 (Accessibility, Branches Only, -10%; Accessibility, Plants Only, -40%; Animate Life-forms, Partial, +20%; Based on IQ, +20%; Sorcery, -15%) [15]. Each additional level adds 4 extra levels of Telekinesis [+15].

Grasping Doom

Keywords: Area (Leveled).

Full Cost: 22 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

This spell forces dead bodies interred in the ground, walls, and ceiling, to grab and restrain everyone within an area. It requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). The binding has ST 10 and lasts for 10 seconds, continuing to grab new people who blunder into it. Those already caught grow more tightly entangled, with +1 to the ST of their bonds for each additional second they remain grappled. If the dead hands are reaching out laterally (from a wall), targets may use active defenses. If the attack comes up from the ground, limit active defenses to parries with feet or a dodge at -3.

The basic (22-point) version of this spell affects subjects in a two-yard radius. For each additional 15 points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to omit specific targets from the area of effect.

Statistics: Binding 10 (Area Effect, 2 yards, +50%; Can be defended against, -5%; Environmental, Surfaces with interred dead, -80%; Persistent, +40%; Selective Area, +20%; Sorcery, -15%) [22]. The additional levels add more levels of Area Effect (+50%) [+10].

Grasping Hand

Keywords: None.

Full Cost: 3 points/level.

Casting Roll: DX or grappling skill.

Range: Unlimited.

Duration: Indefinite.

When this spell is cast, a hand of stone spring forth from an existing earth or stone surface, grabbing somebody within 1 yard of it. Roll against DX (or one of your grappling skills, if better) to hit, the victim may defend normally. ST of the hand equals to this spell's level. The hand can be moved to another location by recasting the spell, but it does not take any grappled victims with it. The hand has SM+1, DR 2, and HP equal to its ST. If it is destroyed, this spell cannot be recast for 5 minutes.

Each turn you can take a Concentrate maneuver (and pay 1 FP as if recasting the spell) to have the hand perform any grappling maneuver.

Statistics: Telekinesis 1 (Breakable, DR 2, SM+1, -45%; Environmental, Earth or Stone, -20%; Increased Range, LOS, +70%; One Task, Grappling, -20%; Sorcery, -15%; Visible, -10%) [3/level].

Grave Grounding

Keywords: Resisted (HT).

Full Cost: 69 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell turns the subject to electricity, which it instantly and fatally grounds out. This spell can destroy any material being, living or not, but the target *must* be in electrical contact with the ground or

a body of water; footwear, pavement, or anything metallic or wet (e.g., the deck of a ship at sea) is no defense, but a non-conducting floor protects completely.

The victim leaves behind possessions (roll vs. HT for electronic or electrical devices, with failure meaning a short-circuit that requires repairs). Examination will find a branching pattern on the ground, with fulgurites buried beneath it in suitable soil.

Statistics: Affliction 1 (HT; Cosmic, Leaves no trace of the victim, +50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Environmental, Electrical Contact, -20%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [69].

Graveweed Smoking

Keywords: Information.

Full Cost: 5 points.

Casting Roll: IQ. Special casting time.

Range: Touch.

Duration: Instantaneous.

Graveweed Summoning is divination by smoking the weeds growing on a person's grave in a pipe. This requires a minute of time. When the smoke appears, the smoker may ask a single question before the smoke dissipates. The answering voice will be that of the deceased, who can only answer questions about his own experiences and knowledge. The answer is what the subject believes to be true – if he doesn't know, he'll tell you. This spell is useless until weeds have had a chance to grow on the grave; weeds forced to grow magically will not work. You must also share a language with the deceased.

The subject cannot resist, but your IQ (plus Talent) roll is at a penalty equal to the number of full days the subject has been dead, and you only get *one* try.

Statistics: Mind Probe (Accessibility, Requires smoking weed that grew on the subject's grave, -60%; Accessibility, Only on corpses, -20%; Cosmic, Works on the dead, +50%; Immediate Preparation Required, 1 minute, -30%; Sorcery, -15%) [5]. *Feature:* Time penalty replaces the normal Quick Contest.

Gravity Crush

Keywords: Resisted (HT).

Full Cost: 28.5 points/level*.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

The caster crushes or vibrates internal organs or components of the subject with a focused gravity field. The subject takes 2d crushing damage with no knockback per level of this spell. DR does not protect.

Statistics: Crushing Attack 2d (Based on HT, +20%; Based on IQ, Own Roll, +20%; Malediction 2, +150%; No Knockback, -10%; No Signature, +20%; Sorcery, -15%) [28.5/level*].

* Calculate the total cost, then round up.

Gravity Push

Keywords: Resisted (HT).

Full Cost: 34.5 points/level*.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

The caster creates a gravitational wave that pushes the target in the specified direction (even upwards!). The target is dealt 2d of knockback damage per level of this spell.

Statistics: Crushing Attack 2d (Based on HT, +20%; Based on IQ, Own Roll, +20%; Directional Knockback, +100%; Malediction 2, +150%; No Signature, +20%; No Wounding, -50%; Sorcery, -15%) [34.5/level*].

* Calculate the total cost, then round up.

Gravity Tolerance

Keywords: Buff.

Full Cost: 17 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject can function under a wider range of gravities. For a normal human, the penalties for non-native gravity accrue in increments of 0.2G; see *Different Gravity* (p. B350). This spell increases the increment.

Level	Increment	Full Cost
1	0.3G	17 points
2	0.5G	21 points
3	1G	26 points
4	5G	30 points
5	10G	35 points

Statistics: Affliction 1 (HT; Advantage, Gravity Tolerance 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Gravity Tolerance to the Advantage enhancement [+4.5]. *Note:* Each level of "Gravity Tolerance" is Improved G-Tolerance (Magical, -10%) [4.5].

Great Deflect Energy

Keywords: Area (Leveled), Buff.

Full Cost: 30 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will.

Range: 100 yards.

Duration: 3 minutes.

Cast on an area, this spell protects all creatures from energy attacks within its borders. The sorcerer choose which subjects (either individually or by type) receive the protection. Every protected subject a bonus to Dodge against energy attacks.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the Dodge bonus is +1. More potent versions of this spell are available, as show below.

Dodge Bonus	Full Cost
+1	30 points for level 1 + 5 points/additional level
+2	40 points for level 1 + 5 points/additional level
+3	51 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantages, Great Deflect Energy 1, +110%; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [30]. Additional levels add Area Effect (+50%) [+5]. *Notes:* "Great Deflect Energy 1" is Enhanced Dodge 1 (Limited, Energy, -20%; Magical, -10%) [11]. Variants increase the bonus to +2 [+10] and to +3 [+21]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Great Deflect Missile

Keywords: Area (Leveled), Buff.

Full Cost: 27 points for level 1 + 5 points/additional level (or more).
Casting Roll: Will.
Range: 100 yards.
Duration: 3 minutes.

Cast on an area, this spell protects all creatures from missiles within its borders. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject a bonus to Dodge against projectile attacks.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the Dodge bonus is +1. More potent versions of this spell are available, as show below.

Dodge Bonus	Full Cost
+1	27 points for level 1 + 5 points/additional level
+2	34 points for level 1 + 5 points/additional level
+3	42 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantages, Great Deflect Missile 1, +80%; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [27]. Additional levels add Area Effect (+50%) [+5]. *Notes:* "Great Deflect Missile 1" is Enhanced Dodge 1 (Limited, Projectiles, -40%; Magical, -10%) [8]. Variants increase the bonus to +2 [+7] and to +3 [+15]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Great Geas

Keywords: Resisted (Will).
Full Cost: 59 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Permanent (until fulfilled).

Give a sapient subject a command to do one specific thing. It can even be something a person could not feasibly, realistically accomplish; "destroy every tree in the world" *would* be valid.

If the subject fails to resist, he must make this command his first priority at all times. He is free to decide how to go about it, however, and may approach the situation intelligently; e.g., rather than grabbing an axe, he could contact a temp agency to hire a small army of woodcutters. In effect, he has an Obsession (p. B146) with no self-control roll.

Once the subject accomplishes the goal, the geas ends. The only way to remove the geas before then is with Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21); Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21) has no effect.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable Enhancement, +125%) [59]. *Note:* Variable Enhancement provides +25% of enhancements (+250%) but is limited by "Accessibility, Only for Obsession with no self-control roll" (-50%) for a net +125%.

Great Hallucination

Keywords: Resisted (Will).
Full Cost: 39 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: Indefinite.

The caster can hijack a sapient subject's senses, controlling what he sees, hears, smells, etc. If the caster wins a Quick Contest of IQ vs. the subject's Will (using normal range penalties), he can feed him any images he wishes. The subject might see himself stranded on a cliff side, in a crowded city street, in the middle of a lake, etc. The only limits are the fiendishness of the caster's imagination and the judgment of the GM. The caster doesn't control his subject's thoughts, however; the subject may choose to act on what he believes were his last correct sensory impressions (at -10 to any actions if he can't see the real world).

This spell requires constant concentration. When the caster stops, the subject regains his senses immediately. The caster can affect more than one person at once, but he is at -1 for every subject already under his control.

Statistics: Illusion (Accessibility, Only on sapient beings, -10%; Mental, +100%; Short-Range 2, -20%; Sorcery, -15%) [39].

Great Haste

Keywords: Buff.

Full Cost: 88 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You make the target's rate of time perception faster than that of a normal human. This spell lets the target experience time twice as fast as a normal – that is, he experiences two subjective seconds for each real second that passes.

This spell lets your target take one additional maneuver on his turn in combat, allowing him to cast spells quickly by taking multiple Concentrate maneuvers, run very fast by taking multiple Move maneuvers, etc. Your target's turn doesn't come any sooner, however! This advantage affects how fast your target moves when he reacts, but not how quickly he reacts in the first place.

Out of combat, Great Haste allows your target the luxury of extensive planning, even in crisis situations, as everything seems to happen in slow motion. Your target may always attempt a Sense roll, or an IQ-based skill roll to make plans or recall information (GM's decision), at no penalty to additional actions.

In order to do anything that depends on someone else's reactions, your target must deliberately "slow down" and function at his speed. This applies both when making a Feint in combat and when making an Influence roll (B359) out of combat. For instance, if your target chooses to Feint, that is all he can do on his turn – he cannot take extra actions. (On the other hand, he could make an All-Out Attack followed by an Attack in order to beat down his defenses through sheer blinding speed!)

When the spell's effects wear off, the target immediately loses 5 FP.

Statistics: Affliction 1 (HT; Advantage, Great Haste, +780%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/10, -20%; Sorcery, -15%) [88]. Notes: "Great Haste" is Altered Time Rate 1 (Aftermath Costs 5 FP, -12%; Magical, -10%) [78].

Great Healing

Keywords: None.

Full Cost: 86 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By making physical contact with a subject, you may immediately heal him 5d HP. This also automatically stops any bleeding. You may heal subjects of your own race and any "similar" races (GM's call); e.g., a human can heal other humans but not dogs or plants.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Affects Self, +50%; Cannot restore crippled limbs, -10%; Capped, 10 FP, -5%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 9, +180%) [86]. *Note:* The 20 HP of healing has been converted to dice per p. B269.

Great Shapeshift

Keywords: None.

Full Cost: 85 points or 165 points or more; see text.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume different forms, as if using the Morph advantage (p. B84). The transformation requires 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. Such changes raise the cost of animal templates, which are cheap due to limited mental capabilities. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any race he can turn into.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his “slots” are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a “slot”.

If the caster can assume any racial template worth no more than his native one, Great Shapeshift costs 85 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 85 points. For instance, a human who can take on any racial template worth up to 75 points would pay 160 points for Great Shapeshift.

In addition, the caster may purchase the improved (165-point) version of this spell. This shortens the transformation time to 1 second.

Statistics: Morph (Sorcery, -15%) [85]. The improved version adds Reduced Time 4, +80% [+80].

Great Ward

Keywords: Area (Leveled).

Full Cost: 79 points for level 1 + 15 points/additional level (or fewer).

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

When this spell is active, the caster can attempt to cast this spell as an active defense, when somebody casts a spell that affects *directly* anyone in the area around them. Thus, Great Ward does not protect against missile spells. The first level of this spell extends Great Ward’s area of effect to two yards around the caster, and each additional level doubles the radius. A successful casting nullifies the effects of the spell on everyone in the area. However, the caster may opt to let the spell affect some of the targets if they are hostile, for example. To counter a given spell, the caster must also know the spell (or its close sorcerous equivalent if countering a spell using some other magic system) they are countering, i.e. be able to cast it as a known spell or via normal or hardcore improvisation.

The casting roll is modified by Talent and Combat Reflexes. If the caster tries to cast Great Ward more than once in a turn, the casting roll takes a cumulative -4 penalty per attempt after the first. The caster rolls at -4 if stunned and cannot cast Great Ward in situations where they would not get an active defense. If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Great Ward, they cannot cast this spell until *all* FP are

replenished. This spell does not count as an active defense for the purpose of cumulative defense penalties.

Statistics: Static (Magic; Accessibility, Only spells the caster could cast, -5%; Active Defense, -40%; Area Effect, 2 yards, +100%; Selective Area, +20%; Sorcery, -15%; Switchable, +100%) [78] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1]. Additional levels add Area Effect (+50%) to Static [+15]. *Notes:* Active Defense being IQ-based is a special feature. The limitation value of Accessibility, Only spells the caster could cast is equal to -5% if the caster's Sorcerous Empowerment is not limited in scope. If their Sorcerous Empowerment has the Limited Colleges or Limited Scope limitation, increase the value by the same number. Thus, the first level of this spell costs 76 points if the caster is limited to four colleges or the equivalent, 73 points if they are limited to three colleges, 70 points if they are limited to two colleges, and 67 points if they are limited to a single college.

Green Death

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 hour.

The caster causes green, leafy plants to grow inside the subject's body, expanding until he dies. Treat this as a type of poison dealing 1d-1 toxic damage each 5 minutes for 1 hour. Armor does not protect.

If the subject loses 1/3 of his HP or more to this spell, he becomes bloated and his skin becomes mottled until he is healed above this threshold. If the subject loses 1/2 of his HP or more to this spell, he starts experiencing agony (p. B428) until he is healed above this threshold. If the subject loses 2/3 of his HP or more to this spell, he starts choking (p. B428) until he is healed above this threshold. If the victim suffocates, the plants burst out of his orifices as he dies.

If the spell is cancelled – using Remove Curse, Reverse Plant Growth, Strike Barren, or Wither Plant – the deadly flora shrinks and vanishes in 30 seconds.

Undead beings are not affected by this spell.

Statistics: Toxic Attack 1d-1 (Accessibility, Only on living beings, -10%; Based on HT, +20%; Cyclic, 5 minute interval, 12 cycles, +360%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Symptoms, 1/2 HP, Agony, +200%; Symptoms, 1/3 HP, Unnatural Features, +5%; Symptoms, 2/3 HP, Choking, +50%) [26].

Green Telurgy

Keywords: None.

Full Cost: 17 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

This spell turns a plant into a "magic phone line". The caster can set up a two-way conversation with another person, if they both are touching the same plant. Range is theoretically unlimited, but the IQ roll to cast this spell takes the range penalties given under *Long-Distance Modifiers* (p. B241). The casting roll is modified with any of the following traits: Lifebane (-6), Plant Empathy (+4), and Speak with Plants (+3).

If successful, the participants hear each other's projected thoughts, allowing "real-time" conversation. If a participant does not want to hear the other one, he can simply stop touching the plant. The caster may maintain a connection with that subject for as long as he'd like, but he must keep touching the plant. No further rolls are normally required unless the range penalty worsens.

Others can join the "conference" at any time – a new casting of the spell (by anyone involved) is required for each new person to enter.

Statistics: Mind Reading (Accessibility, Both participants must be touching the plant, -60%; Accessibility, Projected thoughts only, -20%; Link, +10%; Magical, -10%; Telecommunication, -20%) [6] + Telesend (Accessibility, Both participants must be touching the plant, -60%; Link, +10%; Sorcery, -15%) [11].

Grind Meat

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

When the caster makes a ring with his fingers and pushes meat, vegetables, or other food through it, the food is ground, as if the caster was using a meat grinder.

Statistics: Accessory (Meat Grinder; Sorcery, -15%) [1].

Groom

Keywords: None or Buff.
Full Cost: 1 or 19 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.
Range: Self or 100 yards.
Duration: Indefinite or 90 minutes.

Subject can use their bare hands to brush, comb, and otherwise care for the fur of any beast.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Accessory (Grooming Tools; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Groom, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Groom" is Accessory (Grooming Tools; Magical, -10%) [1].

Guardian Spirit

Keywords: Buff, Incarnum.
Full Cost: 58 points.
Casting Roll: None. Use Innate Attack (Gaze) to hit.
Range: 100 yards.
Duration: 1 hour or until awoken. After the awakening, the spell's bonuses last for 3 minutes.

You bestow a prescient unborn soul on the subject. The soul lies dormant within the subject's body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul's prescience grants the subject a +1 bonus to all active defenses. The caster may pay 1 additional point of essentia during the casting to make the bestowed soul additionally grant the subject the Danger Sense (p. B47) advantage.

Statistics: Affliction 1 (HT; Advantage, Guardian Spirit, +270%; Advantage, Guardian Spirit Bonus (Accessibility, Costs 1 ER, -10%), +135%; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Sorcery, -15%) [58]. *Notes:* "Guardian Spirit" is Defense Bonus 1 (Magical, -10%) [27]. "Guardian Spirit Bonus" is Danger Sense (Magical, -10%) [14].

Guided Weapon

Keywords: Weapon Buff.
Full Cost: 35 points for level 1 + 8 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.

Duration: Three minutes.

This spell enchants a ranged weapon, allowing the wielder to control a projectile after releasing it, guiding it to its target. This works just like the Guided enhancement (p. B106): the attack *ignores* range penalties and the projectile moves at 1/2D yards/second – regardless of its normal speed – until it hits the target or reaches Max range. Against distant targets, the wielder must take a Concentrate maneuver on turns after the first to control his weapon.

This spell is incompatible with weapons that affect multiple targets by default. It guides one attack to one target.

Each additional level allows the wielder to turn the projectile around for a second attack next turn, at the original effective skill level, in the event that his target dodges the first one. The number of allowed extra passes equals to (spell level – 1).

Statistics: Affliction 1 (HT; Accessibility, Only on ranged weapons, -30%; Advantage, Guided Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [35]. *Notes:* “Guided Weapon” is 26 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Guided Weapon imbue skill.

Hail

Keywords: Area (Special).

Full Cost: 46 points for level 1 + 41 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can make hail fall within the 0.1-mile-radius area around you, if there are clouds available in the area, or you can dispel hail. To work properly, this spell must be cast when the temperature is below freezing. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by hail, relative to the prevailing conditions. This can hinder concentration, Survival, and anything the GM allows.

Statistics: Control Hail 1 (Natural Phenomenon, +100%; Sorcery, -15%) [19] + Control Hail +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [27]. Additional levels add Control Hail +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [41/level]. *Note:* As this is one advantage (Control Hail) with the Sorcery limitation, not two, it costs only 1 FP to use.

Hair Growth

Keywords: Resisted (HT).

Full Cost: 51 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent until cut or until falls out naturally.

Causes the subject’s hair and nails to grow at a faster rate. If left unchecked, such growth interferes with vision (as hair falls in the eyes; penalty up to -4 to Vision), movement (as the subject trips on his beard; slows Move to x0.6) and handling ability (as nails get in the way; penalty up to -4 to DX). Some bald people appreciate this spell, while it lasts (baldness returns within about a month as the hair falls out naturally). The caster may cause the spell to affect only a particular body part, and may choose the desired length of hair and nails, determining the penalties, if any. Should the hair be cut, it vanishes, so this spell is not very useful when shearing sheep.

Statistics: Affliction 1 (HT; Attribute Penalty, DX-4, +40%; Attribute Penalty, Per-4, +20%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Effect, +20%; Slower Move, x0.6, +20%; Sorcery, -15%; Variable, +5%) [51].

Hallucination

Keywords: Resisted (Will).
Full Cost: 31 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 1 minute.

Sapient subject hallucinates (p. B429) for 1 minute. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Hallucinating, +50%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [31].

Hallucinogenic Cloud

Keywords: Area (Leveled).
Full Cost: 42 points for level 1 + 8 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

You may fill a two-yard-radius area with hallucinogenic gases. This gives -3 to all vision rolls made through it. To place the gas cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every creature that inhales the gas, begins to hallucinate (B429) for 3 minutes, if it fails a HT roll. After that, it is stunned until it makes a successful HT roll.

Statistics: Obscure Vision 3 (Drifting, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [11] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Drifting, +20%; Fixed Duration, +0%; Hallucinating, +50%; Link, +10%; Persistent, +40%; Respiratory Agent, +50%; Sorcery, -15%; Variable, Area, +5%) [31]. Further levels add Area Effect (+50%) to both advantages [+8].

Halt Ageing

Keywords: Buff.
Full Cost: 44 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 1 month.

The subject's stops ageing for 1 month.

Statistics: Affliction 1 (HT; Advantage, Halt Ageing, +140%; Extended Duration, x30,000x, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Note:* "Halt Ageing" is Unaging (Magical, -10%) [14].

Halt Undead

Keywords: Area (Leveled), Resisted (Will).
Full Cost: 42 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Unlimited.
Duration: 6 seconds.

Undead creatures in the area are paralyzed. Each undead creature resists with a Quick Contest of Will. You can omit any creatures from the effect.

Statistics: Affliction 1 (Will; Accessibility, Undead Only, -50%; Area Effect, 2 yards, +50%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Paralysis, +150%;

Reduced Duration, 1/30, -30%; Selective Area, +20%; Sorcery, -15%) [42]. Additional levels add Area Effect (+50%) [+5].

Hammerhands

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster can hammer nails in or straighten them out with his palm.

Statistics: Accessory (Hammer; Sorcery, -15%) [1].

Harden Air

Keywords: None.

Full Cost: 16 points for level 1 + 2.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell hardens existing air into a wall. You do not have to concentrate to maintain it, Harden Air is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple hardened air walls as needed, but each wall has a certain number of HP and dissipates once those are exceeded (or the duration runs out). The walls are invisible.

To find the maximum square yardage available, look up the level of this spell on the *Leveled Area Table (GURPS Thaumatology: Sorcery, p. 9)* and multiply the given radius by 3. Alternatively, know that Harden Air 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Harden Air 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Each yard of the wall has DR 3 and HP 1/2.

Statistics: Crushing Attack 1d (Area Effect, 2 yards, +50%; Environmental, Air, -5%; Extended Duration, 30x, +60%; No Signature, +20%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [16]. Additional levels increase Area Effect (+50%) [+2.5*].

* Calculate the total cost and round up.

Hardiness

Keywords: None.

Full Cost: 6.5 points/level.

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can momentarily create an invisible field of pure force that protects them and their gear from damage. Every time the caster is attacked, they may make a casting roll as an active defense. Success increases their DR by *twice* the level of this spell (e.g. Hardiness 3 adds DR 6), cumulative with that from actual armor.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Hardiness, they cannot cast this spell until *all* FP are replenished.

Statistics: Damage Resistance 2 (Active Defense, -40%; Force Field, +20%; Sorcery, -15%) [6.5/level].

Harvest

Keywords: Area (Leveled).
Full Cost: 54 points for level 1 + 15 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 seconds.

You can create a zone of harvesting telekinetic force anywhere within 100 yards of you. To place the zone at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. An intangible force harvests crops within the area without touching them. The force can move any object it has strength enough to lift (it has ST 6), at a Move 6, modified as usual for encumbrance level (see *Encumbrance and Move*, B17). All harvested crops are moved and piled up in the center of the area of effect. The caster can specify what he wants to harvest – apples, wheat, all crops under the ground, etc.

Statistics: Telekinesis 6 (Area Effect, 2 yards, +50%; Extended Duration on Persistent, 3x, +20%; Increased Range, 10x, +30%; One Task, Harvest Crops, -65%; Persistent, +40%; Selective Effect, +20%; Sorcery, -15%) [54]. Additional levels add more Area Effect (+50%) to the advantage [+15].

Haste

Keywords: Buff.
Full Cost: 30 points for level 1 + 18 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

You increase the target's Basic Speed by 1.00, which will also increase the target's Basic Move and Dodge scores by the same amount.

Statistics: Affliction 1 (HT; Advantage, Haste 1, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. Additional levels add further Haste to the Advantage enhancement (+180%) [+18]. *Note:* Each level of "Haste" is Basic Speed 1.00 (Magical, -10%) [18].

Hawk Flight

Keywords: Buff.
Full Cost: 66 points for level 1 + 18 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject can fly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, the subject will need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). He cannot fly in a trace atmosphere or vacuum.

The subject's flight Move is Basic Speed x 2 (drop all fractions). He can also "fly" at half-speed underwater. Flight includes the ability to hover at Move 0 as well. Each level of Hawk Flight also *doubles* the subject's top speed in air. The subject's multiplied Move is his top speed. This does not affect Basic Speed, Basic Move, or Dodge. Its benefits apply only when moving along a relatively straight. It does have some defensive value, however: those who attack the subject with ranged attacks must take his speed into account when calculating speed/range modifiers (see p. B550).

Statistics: Affliction 1 (HT; Advantage, Hawk Flight, +540%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [66]. *Notes:* "Hawk Flight" is Flight (Magical, -10%) [36] + Enhanced Move 1 (Air; Magical, -10%) [18]. Each additional level adds an additional level of Enhanced Move 1 (Air; Magical, -10%) [+18].

Hawk Vision

Keywords: Buff.
Full Cost: 17 points for level 1 + 4.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject can “zoom in” with his eyes as if using binoculars. Each level lets him ignore -1 in range penalties to Vision rolls at all times, or -2 in range penalties if he takes an Aim maneuver to zoom in on a particular target. This ability can also function as a telescopic sight, giving up to +1 Accuracy per level with ranged attacks provided he takes an Aim maneuver for seconds equal to the bonus (see *Scopes* under *Firearm Accessories*, p. 411). The benefits of this spell are not cumulative with those of technological aids such as binoculars or scopes. If the subject has both, he must opt to use one or the other

Statistics: Affliction 1 (HT; Advantage, Hawk Vision 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Hawk Vision to the Advantage enhancement (+50%) [+4.5*]. *Note:* Each level of “Hawk Vision” is Telescopic Vision 1 (Magical, -10%) [4.5].

* Calculate the total cost, then round up.

Haze

Keywords: Area (Leveled).
Full Cost: 4 points for level 1 + 1 point/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

Air in the area of effect becomes muggy, hazy, or shimmers with mirages depending on local conditions. This gives -1 to all vision rolls made through it with normal vision or Infravision. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Statistics: Obscure Vision 1 (Environmental, Air, -5%; Extended, Infravision, +20%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [4]. Further levels add Area Effect (+50%) [+1].

Heal Fungus

Keywords: None.
Full Cost: 26 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By making physical contact with a fungus, you may immediately heal it 1d HP.

You can also cure a diseased fungus. This requires an IQ roll at a modifier determined by the GM. Some particularly strong diseases (with a modifier of -5 or lower) cannot be cured with this spell.

Your casting roll is at -2 if the subject is unconscious (in case of some sentient fungus creatures). In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

The fungus must still be alive for the spell to work.

Statistics: Healing (Accessibility, Fungi only, -40%; Affects Self, +50%; Cannot restore crippled limbs, -10%; Capped, 2 FP, -25%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [26]. *Note:* The 4 HP of healing has been converted to dice per p. B269.

Heal Plant

Keywords: None.
Full Cost: 26 points.
Casting Roll: IQ.
Range: Touch.

Duration: Instantaneous.

By making physical contact with a plant, you may immediately heal it 1d HP.

You can also cure a diseased plant. This requires an IQ roll at a modifier determined by the GM. Some particularly strong diseases (with a modifier of -5 or lower) cannot be cured with this spell.

Your casting roll is at -2 if the subject is unconscious (in case of some sentient plant creatures). In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

The plant must still be alive for the spell to work.

Statistics: Healing (Accessibility, Plants only, -40%; Affects Self, +50%; Cannot restore crippled limbs, -10%; Capped, 2 FP, -25%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [26]. *Note:* The 4 HP of healing has been converted to dice per p. B269.

Healing Slumber

Keywords: Buff.

Full Cost: 60 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 8 hours.

The subject falls asleep for 8 hours, if he fails a Will roll. After this, he can be woken normally, but he will not necessarily wake up right away, especially if already tired. Upon waking up, the subject is stunned (p. B420) and may roll vs. HT once per second to recover. While asleep, he heals 1 HP per hour.

Statistics: Affliction 1 (HT; Advantage, Healing Slumber, +230%; Extended Duration, 300x, +100%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; No Signature, +20%; Sleep, +150%; Sorcery, -15%) [60]. *Note:* "Healing Slumber" is Regeneration (Regular; Magical, -10%) [23].

Healthful Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell surrounds the armor with healing energies, enhancing its resistance to poison and disease. The armor's DR against toxic damage is multiplied, as shown on the table below, and the armor applies a part of its DR even against toxic attacks that usually *bypass* armor, including blood, contact, follow-up, and respiratory agents.

Level	DR
1	x2 (1/4, if damage bypasses armor)
2	x3 (1/2, if damage bypasses armor)
3	x4 (x1, if damage bypasses armor)

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Healthful Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Healthful Armor" is 34 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Healthful Armor imbue skill from *Pyramid #3-4*.

Healthful Rest

Keywords: Buff.

Full Cost: 29 points or 38 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

Whenever the subject rolls to recover lost HP or to see if they can get over a crippling injury, they get +5 to their effective HT. In addition, if the improved (38-point) version of this spell is used, when the subject rolls to recover lost HP, a successful HT roll means they heal two HP, not one.

Statistics: Affliction 1 (HT; Advantage, Healthful Rest, +50%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [29]. *Notes:* “Healthful Rest” is Rapid Healing (Magical, -10%) [5]. The improved version replaces Rapid Healing (Magical, -10%) [5] with Very Rapid Healing (Magical, -10%) [14].

Hearing Protection

Keywords: Buff.

Full Cost: 17 or 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The basic (17-point) version of this spell makes the subject’s hearing less prone to overloading. The subject may ignore -1 in Hearing penalties due to noise and gets +1 to HT rolls to resist deafening effects. The improved (21-point) spell lets the subject’s hearing rapidly adapt to the most intense of stimuli, allowing them to function normally after a maximum of two seconds of impairment. The subject will never suffer permanent damage to their hearing as a result of excessive sensory input, ignores -5 in Hearing penalties due to noise, and gets +5 to rolls to resist Hearing-Based attacks.

Statistics: Affliction 1 (HT; Advantage, Hearing Protection, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. The improved version changes the advantage to Improved Hearing Protection (+50%) [+4]. *Notes:* “Hearing Protection” is Robust Hearing (Magical, -10%) [1]. “Improved Hearing Protection” is Protected Hearing (Magical, -10%) [5].

Heart of Stone

Keywords: Resisted (HT).

Full Cost: 60 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell turns the subject’s heart to a lump of rock in his chest. If the victim fails to resist, he suffers a heart attack as described on p. B429, except that resuscitation is impossible. Only a Stone to Flesh or Remove Curse spell cast within HT/3 minutes can negate this effect (and if so, the usual FP and HP losses for a heart attack remain).

This spell can affect only living beings who don’t have a variety of Injury Tolerance that includes No Blood or No Vitals.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures with a heart, -10%; Cosmic, Needs magical healing, +50%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [60].

Heartburn

Keywords: Resisted (HT).

Full Cost: 32 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 minutes.

You cause the victim to experience heartburn. In game effects, this is equivalent to moderate pain (p. B428).

Statistics: Affliction 1 (HT; Extended Duration, 10x, +40%; Malediction 2, +150%; Moderate Pain, +20%; No Signature, +20%; Sorcery, -15%) [32].

Heat (Unofficial Sorcery Errata)

Keywords: Resisted (HT).

Full Cost: 25 points for level 1 + 1 point/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

This spell raises the ambient temperature in a 2-yard-radius area around an object, which usually causes the object to become hotter as well. The temperature can be increased by up to 20°F per level of the spell at a rate of 2°F per level of this spell. This will never do damage directly, but see *Heat* (p. B434) for effects. Upon casting the spell, the caster may decide to use a lower rate of temperature change and a lower maximum change. Heat will be radiated away normally. Knowing melting points for various materials should come in handy!

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Heat 1, +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/6, -15%; Sorcery, -15%; Variable, +5%) [25]. *Note:* Each level of “Heat” is Temperature Control 1 (Emanation, -20%; Heat, -50%; Magical, -10%) [1]. Additional levels add more Heat to the Advantage enchantment (+10%) [+1].

Heat Flash

Keywords: Area (Leveled).

Full Cost: 28 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 5 seconds.

You cause an infrared flash to appear in the area. This effect is invisible to normal vision, but is visible with Infravision. Each creature in the area resists with its HT, and loses its Infravision for 5 seconds on a failed resistance roll. Creatures with Protected Vision resist at +5.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Low Signature, +10%; Negated Advantage, Infravision, +10%; Reduced Duration, 1/30, -30%; Sorcery, -15%; Variable, Area, +5%; Vision-Based, +150%) [28]. Additional levels add Area Effect (+50%) [+5].

Heat Metal

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

When you cast this spell on a metal object, it becomes very hot to the touch. It deals 1 point of burning damage per second to everyone touching it. Useful when cast on foe’s plate armor or metal weapon.

Statistics: Affliction 1 (HT; Accessibility, Only on metal objects, -30%; Advantage, Heat Metal, +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* “Heat Metal” is Burning Attack 1 point (Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%) [3].

Heat Water

Keywords: Area (Leveled).

Full Cost: 4 points for level 1 + 5 points/additional level (or more).

Casting Roll: None.

Range: 100 yards.

Duration: Indefinite.

This spell raises the temperature of water in the area. The basic version can increase the temperature by up to 40°F. This will never do damage directly, but see *Heat* (p. B434) for effects.

More potent versions of Heat Water exist. Increasing the full cost of the spell increases the degree of potential temperature change by the same factor, as indicated by the table below.

Spell Strength	Full Cost
Heat Water (40°F)	4 points for level 1 + 5 points/additional level.
Heat Water (80°F)	8 points for level 1 + 10 points/additional level.
Heat Water (120°F)	12 points for level 1 + 15 points/additional level.
Heat Water (160°F)	16 points for level 1 + 20 points/additional level.
Heat Water (200°F)	20 points for level 1 + 25 points/additional level.

Statistics: Temperature Control 2 (Accessibility, Only water, -30%; Heat, -50%; Increased Range, 10x, +30%; Sorcery, -15%; Variable, Area, +5%) [4]. Additional levels add Area Effect (+50%) [+5]. The expanded versions raise the Temperature Control level.

Hell Zone

Keywords: Area (Leveled).

Full Cost: 80 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

“Softens up” local space-time for hostile extradimensional entities: elemental spirits, demons, nightmares from the Dream World, goateed mirror-universe selves, Things Man Was Not Meant To Know, or worse. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss.

These attack everyone in the area with an effective skill of 12 from the safety of their native realm(s). Every turn, roll for each victim:

Direction (Roll 1d)	
1	Behind! Normally, no defense possible.
2-3	Left (2) or right (3) side. Defenses are at -2. Shield or weapon on opposite side cannot defend
4-5	Above (4) or below (5). Defenses are at -2.
6	Front. Defend normally.
Allowed Defenses (Roll 1d)	
1-3	Dodge, parry, or block.
4-5	Dodge or block.
6	Dodge only.
Damage Type (Roll 1d)	
1	Direct injury (DR ineffective)
2	Impaling
3	Cutting
4	Crushing
5	Burning
6	Toxic

If the victim fails to defend in the permitted fashion, the attack inflicts 2d damage of the relevant type to a random hit location.

Statistics: Impaling Attack 2d (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Cosmic, Irresistible Attack, Unreliable, 8, +180%; Nuisance Effect, Random Defenses, -10%; Persistent, +40%; Random Damage Type, +40%; Sorcery, -15%; Surprise Attack, Random, +120%; Variable, Area, +5%) [80].

Additional levels add Area Effect (+50%/level) to the advantage [+8]. *Note:* Impaling was chosen because it is the most expensive damage type of the ones in the table.

Hellfire Breath

Keywords: Jet, Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of hellfire erupts from your mouth, much like the long tongue of a flamethrower. Use Innate Attack (Breath) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning damage with dice equal to your level of this spell with the (2) armor divisor. In addition, hellfire can harm insubstantial beings. The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack (Affects Insubstantial, +20%; Armor Divisor, (2), +50%; Increased 1/2D, 2x, +5%; Jet, +0%; Sorcery, -15%) [8/level].

Hellfire Jet

Keywords: Jet, Obvious.

Full Cost: 11 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of hellfire erupts from your hand, much like the long tongue of a flamethrower. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning damage with dice equal to your level of this spell with the (2) armor divisor. In addition, hellfire can harm insubstantial beings. The jet has 1/2D 5. The GM must determine what the maximum level available in the campaign is.

The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the hellfire stream is not interrupted and the caster may continue to attack with it normally.

Statistics: Burning Attack (Affects Insubstantial, +20%; Armor Divisor, (2), +50%; Destructive Parry, +10%; Jet, +0%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Sorcery, -15%) [11/level].

Hellfire Orb

Keywords: Missile, Obvious.

Full Cost: 7.5 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw an orb of hellfire at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does burning damage with dice equal to your level of this spell with the (2) armor divisor. In addition, hellfire can harm insubstantial beings. The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own hellfire orb!

Statistics: Burning Attack (Affects Insubstantial, +20%; Armor Divisor, (2), +50%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [7.5/level].

Hellfire Pillar

Keywords: Resisted (HT).

Full Cost: 99 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You raise your arms as they begin to glow red, concentrate, then clap your hands, causing your subject to be engulfed by an explosion of hellfire that throws him upwards. You must Concentrate for two consecutive seconds, the second Concentrate maneuver finishes the casting of the spell. This gives your subject time to notice that he is being engulfed by flames (they are harmless until you finish casting the spell) and break line of sight!

If your subject fails to resist, he takes 4d burning damage ignoring his DR. Anything nearby takes “collateral” damage from the explosion equal to basic damage divided by (3 x the distance in yards from the blast). This damage affects even insubstantial beings with no penalties.

Additionally, the subject takes 6d knockback damage. It does not deal any damage, but sends the subject *upwards*, which can deal additional fall damage or make the subject fall prone on a failed landing. If the subject was moving, the momentum is saved, and this spell lets the subject “jump” higher, although at a serious price.

Statistics: Burning Attack 4d (Affects Insubstantial, +20%; Based on HT, +20%; Explosion 1, +50%; Malediction 2, +150%; Requires Gestures, -10%; Sorcery, -15%; Takes Extra Time 1, -10%) [61] + Crushing Attack 3d (Double Knockback, +20%; Follow-Up, +140%; Magical, -10%; No Wounding, -50%; Upwards, +50%) [38].

Hellfire Rain

Keywords: Area (Leveled).

Full Cost: 12 points (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause hellfire to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-1(2) burning damage. In addition, hellfire can harm insubstantial beings. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected.

The upgraded (21-point) version increases the damage to 2d-2(2). This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d-1	12 points	14 points	16 points	18 points	20 points	22 points	24 points
2d-2	21 points	25 points	28 points	32 points	35 points	39 points	42 points

Statistics: Burning Attack 1d-1 (Affects Insubstantial, +20%; Area Effect, 2 yards, +50%; Armor Divisor, (2), +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [12]. Improved versions add Area Effect (+50%/level) and/or improve to Burning Attack 2d-2.

Hellspawn

Keywords: Resisted (Will).

Full Cost: 33 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent until the child is born.

This spell summons a malignant demonic spirit to possess an unborn child. The result will usually be born as a demonic familiar, a fiendish creature, or a cursed half-fiend. Critical failure may conjure a real demon outside the mother's body, or summon a different (sometimes even benevolent) spirit to possess the unborn child. This spell targets the mother and is resisted by mother's Will.

Statistics: Affliction 1 (Will; Accessibility, Only on pregnant women, -80%; Based on Will, +20%; Disadvantage, Divine Curse (The next child is going to be demonic), +5%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Critical failure is dangerous, -20%; Sorcery, -15%) [33].

Helping Hands

Keywords: None.

Full Cost: 7 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

This spell creates an invisible force that can perform slow, repetitive actions as if it were a pair of hands with ST equal to this spell's level multiplied by 2. This spell cannot affect living beings, and if it meets active resistance, it immediately dispels. Thus, it can be used to pull ropes or levers, hold doors closed, rotate handles, push blocks, etc., but cannot be used to hold a grappled person, push an enemy, etc. This force suffers a -6 penalty to any DX-based roll to do fine work using the skills listed under High Manual Dexterity (p. 59).

Statistics: Telekinesis 2 (Accessibility, Only slow, repetitive, non-combat actions, -45%; Independent, +40%; Sorcery, -15%; Temporary Disadvantage, Ham-Fisted 2, -10%) [7]. Each additional level adds Telekinesis 2 [+7].

Herbivory

Keywords: Resisted (HT).

Full Cost: 48 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

This spell makes the subject's digestive system only be able to digest plant matter. If the subject is a carnivorous creature, they lose Restricted Diet (Carnivore/Fresh Meat). This spell only works on living creatures, not on machines that may consume fuel or energy.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Disadvantage, Restricted Diet (Herbivore), +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; Negated Disadvantage, Restricted Diet (Carnivore/Fresh Meat), +100%; No Signature, +20%; Sorcery, -15%) [48].

Hex

Keywords: Buff.

Full Cost: 273 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Makes the item impossible to put down/take off/get out of/etc. In itself, this effect is merely inconvenient, and can even be useful – for instance, you will never drop a hexed weapon, and a hexed pair of glasses will never fall off. However, if the hexed object has another malign spell on it, it becomes much more dangerous. The hex effect is “always on.”

To escape from a hexed object, you must remove or suppress the enchantment, find someone to cast a Remove Curse spell (Dispel Magic does not work), or amputate the body part involved. Attempts to break or cut off the hexed item will fail (or result in amputation). GMs should permit this rule to have illogical results, if necessary, to keep the hexed object on the victim. Hexes aren't logical!

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Hex, +2,530%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [273]. *Notes:* "Hex" is 253 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Summonable Gear imbue skill from this [blog post](#).

Hide

Keywords: Buff.

Full Cost: 19 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell makes the subject harder to find. A Vision roll is necessary to see a subject in plain sight; Vision rolls to detect a subject already hidden are at -1 per level of this spell. These effects only apply while the subject remains still, but if he moves and then stops moving before the spell expires, the effects resume.

Statistics: Affliction 1 (HT; Advantage, Hide, +30%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Notes:* Each level of "Hide" is Obscure 1 (Vision; Accessibility, Only while standing still, -40%; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [3]. Additional levels add further Hide to the Advantage enhancement (+30%) [+3].

Hide Emotion

Keywords: Buff.

Full Cost: 50 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject's current emotional state becomes impossible to discern. This *always* includes the following: Body Language, Detect Lies, Criminology, Interrogation, and Psychology on you, as well as some Influence skills when the GM thinks understanding the subject's emotional state would be important. It also includes uses of Empathy or Sensitive and similar traits.

Statistics: Affliction 1 (HT; Advantage, Hide Emotion, +380%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [50]. *Note:* "Hide Emotion" is Obscure 10 (Emotions; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [38].

Hide from Animals

Keywords: Buff.

Full Cost: 54 or 62 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You make the subject invisible to animals. The subject still makes noise, leaves footprints, and has a scent – and anything the subject is carrying (up to the Medium encumbrance) becomes invisible too. The subject gets a +9 to Stealth in any situation where being seen would matter, if he is carrying no more than his Medium encumbrance.

Animals using paranormal remote viewing (crystal balls, Clairvoyance, etc.), if such thing is even possible, cannot see the subject if the subject would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see the subject.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). The subject does not cast a shadow and doesn't show up in mirrors.

The basic (54-point) version of this spell ends if the subject attacks any animal. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If the subject attacks directly, however, it immediately becomes visible along with all its gear. The improved (62-point) version of this spell eliminates this limitation.

Statistics: Affliction 1 (HT; Advantage, Hide from Animals, +380%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [54]. *Notes:* "Hide from Animals" is Invisibility (Accessibility, Animals Only, -25%; Can Carry Objects, Medium, +50%; Dispels after an attack, -20%; Magical, -10%) [38]. The improved version removes the Dispels after an attack limitation from the advantage [+8].

Hide from Undead

Keywords: Buff.

Full Cost: 44 or 52 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You make the subject invisible to undead. The subject still makes noise, leaves footprints, and has a scent – and anything the subject is carrying (up to the Medium encumbrance) becomes invisible too. The subject gets a +9 to Stealth in any situation where being seen would matter, if he is carrying no more than his Medium encumbrance.

Undead creatures using paranormal remote viewing (crystal balls, Clairvoyance, etc.) cannot see the subject if the subject would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see the subject.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). The subject does not cast a shadow and doesn't show up in mirrors.

The basic (44-point) version of this spell ends if the subject attacks any undead creature. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If the subject attacks directly, however, it immediately becomes visible along with all its gear. The improved (52-point) version of this spell eliminates this limitation.

Statistics: Affliction 1 (HT; Advantage, Hide from Undead, +280%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Hide from Undead" is Invisibility (Accessibility, Undead Only, -50%; Can Carry Objects, Medium, +50%; Dispels after an attack, -20%; Magical, -10%) [28]. The improved version removes the Dispels after an attack limitation from the advantage [+8].

Hide Object

Keywords: None.

Full Cost: 1.35 points/level*.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

You can place objects in an extraplanar space whose access travels with you. Each level provides space for $(HP \times HP)/1,000$ cubic feet of possessions. While you can multiply by 20 lbs./cubic foot to estimate weight, the contents aren't affected by gravity and capacity doesn't depend on your ST. Rather than being protected by your defensive advantages, your possessions are in another dimension entirely and can't be affected by any normal attack.

If your cargo is a single object, getting it out takes one second or a Fast-Draw roll (aided by Talent). When carrying multiple objects, extracting a specific item requires 1d seconds per level of spell and a DX roll at -5 for working by touch (also aided by Talent).

When the spell ends, all contents are expelled.

Statistics: Payload 1 (Cosmic, Extraplanar, +50%; Sorcery, -15%) [1.35/level*].

* Calculate the total cost then round *up*.

Hide Path

Keywords: Buff.

Full Cost: 22 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell allows the subject to pass through grass, undergrowth, or jungle without leaving any sign. Tracking rolls to follow him automatically fail unless they rely on something more than sight; thus, a human tracker would be baffled, but bloodhounds would suffer no penalty at all.

Statistics: Affliction 1 (HT; Advantage, Hide Path, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Note:* "Hide Path" is Unusual Training (Light Walk, no Stealth bonus, only through vegetation) [1] + Light Walk (H) DX [4] modified with Cosmic, No die roll required, +100% and Magical, -10% for a final cost of 10 points.

Hide Thoughts

Keywords: Buff.

Full Cost: 39 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject's mind becomes impossible to read and control.

Statistics: Affliction 1 (HT; Advantage, Hide Thoughts, +270%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Note:* "Hide Thoughts" is Immunity to Mind Control (Magical, -10%) [27].

Hideaway

Keywords: Buff.

Full Cost: 29 points for level 1 + 7 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

You make a container bigger on the inside than it is on the outside. Each level provides extra space for $(\text{caster's HP} \times \text{caster's HP})/200$ cubic feet of possessions. While you can multiply by 20 lbs./cubic foot to estimate weight, the contents aren't affected by gravity and capacity doesn't depend on the caster's ST. Rather than being protected by the container's defensive advantages, extra possessions are in another dimension entirely and can't be affected by any normal attack.

When the spell ends, all contents that cannot fit are expelled.

Statistics: Affliction 1 (HT; Accessibility, Only on containers, -20%; Advantage, Hideaway 1, +70%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [29]. *Note:* Each level of “Hideaway” is Payload 5 (Cosmic, Extraplanar, +50%; Magical, -10%) [7].

Hideous Laughter

Keywords: Resisted (Will).

Full Cost: 29 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

You cause a sapient subject to laugh uncontrollably for 3 minutes. He is at -3 to DX and -1 to IQ, and cannot use Stealth.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures, -10%; Based on Will, +20%; Coughing, Variant, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29].

Hinder

Keywords: Resisted (HT).

Full Cost: 26 points for level 1 + 2 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 10 seconds.

The caster lowers the subject’s Basic Speed by -1 per level of this spell. The GM should impose a cap on the level of this spell (suggested cap is 3 levels).

Statistics: Affliction 1 (HT; Disadvantage, Basic Speed -1, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/10, -20%; Sorcery, -15%) [26]. *Note:* Additional levels add extra levels of Basic Speed to the Disadvantage enhancement [+2].

History

Keywords: Information.

Full Cost: 15 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

When cast on any inanimate object (or a 1-yard-radius section of a large object), History lets the caster determine the recent past of that object, user’s personality, and so on – but no names!

To cast History, you must touch the subject item or location, concentrate for one second, and make an IQ roll. This roll is at no penalty for an event that occurred the same day, -1 for one that occurred up to 10 days ago, -2 if up to 100 days ago, -3 if up to 1 year ago.

On a success, you receive the general sense of emotions and events tied to the object or place. On a critical success, you experience an actual vision. No matter how well you roll, you cannot detect magic, spirits, etc. Still, a magic item, ghostly haunt, or ritual site is likely to have an emotionally charged history, giving strong impressions.

On a failure, you receive no impressions at all, and cannot attempt to read that object or place again for 24 hours.

Statistics: Psychometry (Accessibility, Limited to 1 year in the past, -20%; Active Only, -20%; Sensitive, +30%; Sorcery, -15%) [15].

Hoard-Reading

Keywords: Information.

Full Cost: 42 or 92 points.
Casting Roll: IQ. Special casting time (see below).
Range: Touch.
Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Hoard-reading is a dragon-specific type of divination that requires a hoard of gold, silver, and precious gems worth at least five times the campaign's average starting wealth level. This is the plain material value – extra value from craftsmanship, enchantment, etc., does not count! The dragon spends the casting time adjusting and manipulating the treasure; the patterns that form suggest the answer to the question.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (42-point) version of this spell requires 10 minutes to cast! The improved (92-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a hoard, -15%) [42]. The improved version adds Reduced Time 10 (+200%) [+50].

Hold Breath

Keywords: Buff.
Full Cost: 29 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 1 minute.

You subject gains the Doesn't Breathe (p. B49) advantage for the duration of this spell. This spell does not actually provides air, but simply delays the suffocation, giving the subject some time to reach a safer environment.

Statistics: Affliction 1 (HT; Advantage, Hold Breath, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [29]. *Note*: "Hold Breath" is Doesn't Breathe (Magical, -10%) [18].

Hold Fast

Keywords: Buff.
Full Cost: 21 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject is completely immune to knockback.

Statistics: Affliction 1 (HT; Advantage, Hold Fast, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note*: "Hold Fast" is Immunity to Knockback (Magical, -10%) [9].

Hold Metal

Keywords: Area (Leveled), Resisted (HT).
Full Cost: 38 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: Unlimited.
Duration: Six seconds.

By casting this spell, the priest causes all ferrous metal (iron, iron alloys, and steel) within the spell's area of effect to be held fast. Swords being swung, pendulum blades arcing, and other metallic

objects stop in midstrike. Although these metal objects can be touched, they cannot be moved for the duration of the spell. It is as if the metal weighed tons or was held fast by sovereign glue.

This spell is often used to prevent individuals in the area of effect from drawing weapons or from removing metallic or partially metallic objects from the affected area. The spell is especially useful against individuals clad in chain or plate mail. Beings wearing any ferrous armor find that while under the effects of this spell they cannot move, unless they can somehow remove these items without moving any metal parts. This may require DX or Escape rolls with a penalty that depends on the specifics of the situation.

Unattended ferrous items resist with their HT. Creatures wielding, wearing, or holding ferrous items use their HT to resist. Roll once for each creature. You cannot omit any creatures or objects from the effect.

Statistics: Affliction 1 (HT; Accessibility, Ferrous Metals, -50%; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Reduced Duration, 1/30, -30%; Sorcery, -15%; Variable, Area, +5%) [38]. Additional levels add Area Effect (+50%) [+5].

Holy Smite

Keywords: Area (Fixed), Obvious.

Full Cost: 44 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

When this spell is cast, every evil being within four yards immediately takes 2d crushing damage, regardless of DR, insubstantiality, etc. They will see this attack clearly (as an explosion of holy energy coming from within you), but non-evil people will see nothing. This damage does not cause knockback.

Statistics: Crushing Attack 2d (Accessibility, Evil Creatures Only, -50%; Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; Low Signature, +10%; No Knockback, -10%; Sorcery, -15%) [44].

Holy Weapon

Keywords: Weapon Buff.

Full Cost: 11 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Allows the weapon enchanted to ignore DR (Not vs. Good) of some creatures, such as demons, devils, etc., and deal additional damage to creatures with Vulnerability to holy weapons.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Holy Weapon, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11]. *Note:* "Holy Weapon" is Holy Touch (Magical, -10%) [1].

Homing Weapon

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell enchants a ranged weapon, allowing its projectiles to guide themselves to a target using the wielder's vision. The wielder must take an Aim maneuver and make an unmodified weapon skill roll to "lock on," but he can *ignore* all ranged combat modifiers except for effects that obscure the wielder's vision. The weapon then homes in on its target as if it had the Homing enhancement (p. B106):

it ignores range penalties and moves at 1/2D yards/second – regardless of its usual speed – until it hits the target or reaches Max range.

This spell is incompatible with weapons that affect multiple targets by default. The wielder can only lock *one* shot onto *one* target at a time. You can't combine Guided Weapon with Homing Weapon, either. The chief benefit of the latter over the former is that it doesn't require the wielder to take Concentrate maneuvers when engaging foes that require multiple turns (or multiple passes) to hit.

Each additional level allows the projectile to try a second attack next turn, at the original effective skill level, in the event that the target dodges the first one. The number of allowed extra passes equals to (spell level – 1).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Homing Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Homing Weapon" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Homing Weapon imbuelement skill.

Hot Smoke

Keywords: Area (Leveled).

Full Cost: 18 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill an area with thick, hot smoke. This gives -5 to all vision rolls made through it with normal vision, Infravision, Night Vision, and Hyperspectral Vision, and is unpleasant to breathe (but causes no actual ill effects). To place smoke at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Statistics: Obscure Vision 5 (Extended, Infravision and Hyperspectral Vision, +40%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [18]. Further levels add Area Effect (+50%) [+5].

Hunger

Keywords: Resisted (HT).

Full Cost: 13 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

If the victim fails to resist, he takes 1d-2 fatigue damage. Treat FP lost to the spell identically to FP lost to starvation (B426). Thus, the lost FP can only be recovered by eating a meal, but someone with Doesn't Eat or Drink is immune to this spell.

Statistics: Fatigue Attack 1d-2 (HT; Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Starvation, +40%) [13].

Hybrid Control

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single hybrid creature – or of one square yard of a swarm of smaller hybrid creatures. Only hybrids with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for hybrids with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other hybrid currently under your control. If you tie, nothing happens, but if you lose the creature

is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

While under your control, the hybrid will follow any general orders you give. You cannot be very specific! "Protect me" is a valid order, but "lead my friend toward the nearest city" is not. When in doubt, the GM will make an IQ roll for the hybrid to see how well it interprets what you're saying.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Hybrids only, -40%; Suggestion, -40%; Sorcery, -15%) [10].

Hydration

Keywords: Buff.

Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell allows the subject to go without water for a day with no ill effects.

Statistics: Affliction 1 (HT; Advantage, Hydration, +40%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Hydration" is Doesn't Eat or Drink (Magical, -10%; Water Only, -50%) [4].

Hydromancy

Keywords: Information.

Full Cost: 40 or 90 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Hydromancy is divination by water, or more specifically, the motion of water. Normally, a brook or river is observed, but underground lakes and the like work with no skill penalty. If a tub or basin is used, precious stones (at least \$800 worth of blue or clear ones) must be dropped into the water to cause the motion to occur. Unlike the herbs needed for pyromancy, however, the stones may be used repeatedly.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (40-point) version of this spell requires 10 minutes to cast! The improved (90-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Environmental, Moving Water, -20%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%) [40]. The improved version adds Reduced Time 10 (+200%) [+50].

Hyperjump

Keywords: None.

Full Cost: 50 points for level 1 + 5 points/additional level.

Casting Roll: IQ or Navigation (Hyperspace); Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

Shift yourself into hyperspace, travel at great speeds, and then shift back into normal reality, having arrived at the destination. You can carry up to Medium Encumbrance when you travel. Neither

your start nor end point can be within an atmosphere, and you must travel a minimum of one light-second (186,000 miles or 0.002 AU); hyperjumping is intended for space travel.

As a Concentrate maneuver make an IQ or Navigation (Hyperspace) roll, modified by Talent, when casting this spell, modified as follows:

Distance: See the *Distance Table* (Pyramid #3-49, page 27).

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you know nothing, but a name and a description of the destination, you roll at an extra -10. Anything, but a critical failure, counts as a failure with a minimum margin of failure of 10. Critical failures produce bad results.

If you have only basic data on where the destination is, you roll at -5 and all FL costs are doubled.

If you know exactly where your destination is and have star charts, then you roll at -4. This may require a computer or an Astronomy roll at -4.

If you have a hyperjump data file or a detailed description of a way to reach your destination via hyperspace, you roll at -2.

If you have visited the place before, you roll at -2.

If you have visited the place before *and* have hyperjump data, you roll at -1.

If you can see the destination with your own eyes or sensors, you roll at +0.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a critical success, you appear at your destination *and* the hyperjump takes less time. Move up one step on the *Hyperjump Table* to determine your effective speed; if you're already traveling at one light-year per second, the hyperjump takes 1/10 as long. On a success, you appear at your target destination. On a failure, you pop out into normal space (total distance traveled/10)*margin of failure AU (minimum 1 AU) from your intended destination and strain your hyperjumping ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you end up somewhere wrong. Multiply the distance you were traveling by 1d+1; that's how far you end up from your origin. The GM determines the direction, and is expressly allowed to place you somewhere weird, unlikely, and/or unpleasant. Even worse, your spell burns out; you can't use your Hyperjump at all for the next 1d hours!

On the 1st level, this spell lets you travel at 1c. Each additional level increases the speed by one step on the *Hyperjump Table* (see Pyramid #3-49, page 26).

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any location you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds! Even then, this feat will likely cause more problems than taking damage from the attack.

Statistics: Warp (Extra Carrying Capacity, Medium, +20%; Hyperjump, 1c, -50%; Requires Concentrate, -15%; Risky Blind, +10%; Sorcery, -15%) [50]. Each additional level increases the speed by one step on the *Hyperjump Table* (see *Pyramid #3-49*, page 26) [+5].

Hypervision

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell allows the subject to see in four spatial dimensions as well as three. The subject isn't blind in hyperspace (see *Hyperspace*, *GURPS Powers: The Weird*, p. 15, and *Extradimensionality*, *GURPS Powers: The Weird*, pp. 24-25). He can perceive hyperspatial beings, whether or not he is in hyperspace.

Statistics: Affliction 1 (HT; Advantage, Hypervision, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* "Hypervision" is See Invisible (Hyperspatial; Magical, -10%) [14].

Hypnotic Leaves

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 33 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell animates all leaves (or flower petals, moss beards, etc.) in the area of effect such that any sapient creature that sees them must resist with IQ or become dazed for 3 minutes. If a victim is standing, he remains upright, but can do nothing. If the victim is struck, slapped, or shaken, he recovers on his next turn. The condition is also broken if the victim's sight of the leaves is blocked or the leaves are destroyed. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover. You can omit any creatures from the effect. The magic does not affect anyone who is outside the area looking into it.

The GM can penalize any resistance roll if the leaves are unusually plentiful (-1), very colorful (-2), or falling (-3). These three penalties are not cumulative. Add -3 for anyone with Peripheral Vision that's at least two yards inside the area. Use darkness penalties as a bonus to the roll – in dim light, the leaves are difficult to see, so they're less likely to hypnotize.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Daze, +50%; Environmental, Leaves, -40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Area, +20%; Sight-Based, -20%; Sorcery, -15%) [33]. Additional levels add Area Effect (+50%) [+5].

Hypnotize

Keywords: Resisted (Will).

Full Cost: 2 points.

Casting Roll: IQ. Special casting time.

Range: Unlimited.

Duration: 1d minutes.

This spell acts like the Hypnotism skill (p. B201), but lasts 1d minutes instead of 1d hours, and costs FP. Use normal range penalties.

Statistics: Hypnotism (H) IQ [4] modified with Reduced Duration, 1/60, -35%; Sorcery, -15% for a final cost of 2 points.

Ice Armor

Keywords: Buff.

Full Cost: 34 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell covers the subject's body in a layer of ice. The subject gains DR 8 that covers his whole body, including the eyes. This DR is semi-ablative - every 10 points of basic damage rolled removes one point of DR, regardless of whether the attack penetrates DR. This DR is treated as *ablative* (each point of DR stops one point of basic damage but is destroyed in the process) against fire attacks. Lost DR "heals" at the same rate as lost HP (including the effects of Regeneration, p. B80).

Statistics: Affliction 1 (HT; Advantage, Ice Armor, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [34]. Note: "Ice Armor" is DR 8 (Magical, -10%; Nuisance Effect, Acts as Ablative against fire, -25%; Semi-Ablative, -20%) [18] + Nictitating Membrane 8 (Magical, -10%; Nuisance Effect, Acts as Ablative against fire, -25%; Semi-Ablative, -20%) [4].

Ice Dagger

Keywords: Missile, Obvious.

Full Cost: 4.8 points/level*.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a razor-sharp icicle at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d-1 impaling damage per level of this spell. The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Statistics: Impaling Attack 1d-1 (Blockable, -5%; Sorcery, -15%) [4.8/level*].

* Calculate the total cost and then round up.

Ice Movement

Keywords: Buff.

Full Cost: 34 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell makes ground and water beneath the subject's feet freeze and allows the subject to skate along such surfaces at high speed. Double the top running speed of the subject, when moving along ground or water. This does not affect Basic Speed, Basic Move, or Dodge. When running across water (this spell does not work on any other liquids), the subject must keep moving at his full Move to avoid falling. In any case, the subject is treated as skating, and complex maneuvers and combat actions require Skating (p. B220) rolls.

Statistics: Affliction 1 (HT; Advantage, Ice Movement, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [34]. Note: "Ice Movement" is Enhanced Move 1 (Ground; Magical, -10%; Nuisance Effect, Skating rolls, -10%) [16] + Walk on Liquid (Accessibility, Only when moving at his full Move, -30%; Magical, -10%; Nuisance Effect, Skating rolls, -10%; Specific, Water, -10%) [6].

Ice Shield

Keywords: Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 90 minutes.

The subject's skin and eyes become covered by an ice barrier. The subject gains DR 15. This DR is ablative - it stops damage once. Each point of DR stops one point of basic damage but is destroyed in the process. Lost DR "heals" at the same rate as lost HP (including the effects of *Regeneration*, p. B80).

Statistics: Affliction 1 (HT; Advantage, Ice Shield, +150%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Note:* "Ice Shield" is DR 15 (Ablative, -80%; Includes Eyes, +10%; Magical, -10%) [15].

Ice Slick

Keywords: Area (Special).

Full Cost: 42 points for level 1 + 13.5 points/additional level*.

Casting Roll: IQ.

Range: 100 yards.

Duration: 30 seconds.

Covers a patch of ground with a thin layer of ice, making it extremely slippery. This may affect an area up to (Ice Slick level)+1 yards in radius. Ice slicks are very difficult to see. Anyone not actively watching the ground for ice must make a roll against IQ-3 to notice an ice slick before stepping onto it. All DX-based activities, including attack and defense rolls, are at -2 in the slippery area. In addition, those moving into or through the area must roll against DX-2 every turn or fall; this roll is at +1 if walking at Move/2, +2 at Move/4, and +3 at Move/8 (round down, minimum 0). Critical failure causes 1d-2 injury to a randomly chosen limb.

An ice slick will extinguish an area of normal fire that it overlaps, and vice versa.

Anyone with Perfect Balance or Terrain Adaptation (Ice) may ignore the effects of this spell. Anything less, including special footwear, doesn't help. Character on skates can skate (B220) on the area of effect.

Statistics: Control Ground Friction 2 (Accessibility, Only to reduce friction, -25%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Persistent, +40%; Ranged, +40%; Sorcery, -15%; Visible, -10%) [42]. Additional levels add Control Ground Friction (Accessibility, Only to reduce friction, -25%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%; Visible, -10%) [13.5/level*]. *Note:* Based on Control Friction from *GURPS Supers*.

* Calculate the total cost and then round up.

Ice Sphere

Keywords: Missile, Obvious.

Full Cost: 4.5 points/level*.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of ice at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does crushing damage with dice equal to your level of this spell. The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Ice Sphere can also extinguish fire in a 1-yard radius, if accurately aimed.

Statistics: Crushing Attack (Blockable, -5%; Can Extinguish Fire, +10%; Sorcery, -15%) [4.5/level*].

* Calculate the total cost and then round up.

Ice Storm

Keywords: Area (Fixed).

Full Cost: 77 points.

Casting Roll: IQ. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous damage and 10 seconds of ice.

This spell blasts a 4-yard-radius area with a storm of ice shards, dealing 1d cutting damage. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. In addition, it covers the area with a thin layer of ice, making it extremely slippery for 10 seconds. Ice slicks are very difficult to see. Anyone not actively watching the ground for ice must make a roll against IQ-3 to notice an ice slick before stepping onto it. All DX-based activities, including attack and defense rolls, are at -2 in the slippery area. In addition, those moving into or through the area must roll against DX-2 every turn or fall; this roll is at +1 if walking at Move/2, +2 at Move/4, and +3 at Move/8 (round down, minimum 0). Critical failure causes 1d-2 injury to a randomly chosen limb.

An ice slick will extinguish an area of normal fire that it overlaps, and vice versa.

Anyone with Perfect Balance or Terrain Adaptation (Ice) may ignore the effects of this spell. Anything less, including special footwear, doesn't help. Character on skates can skate (p. B220) on the area of effect.

Statistics: Cutting Attack 1d (Area Effect, 4 yards, +100%; Link, +10%; Magical, -10%) [14] + Control Ground Friction 2 (Accessibility, Only to reduce friction, -25%; Cannot concentrate to extend duration, -10%; Link, +10%; Persistent, +40%; Ranged, +40%; Sorcery, -15%; Visible, -10%) [39] + Control Ground Friction 2 (Accessibility, Only to reduce friction, -25%; Cannot concentrate to extend duration, -10%; Link, +10%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%; Visible, -10%) [24]. *Note:* Based on Control Friction from *GURPS Supers*.

Icewalking

Keywords: Buff.

Full Cost: 22 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject can walk or crawl on ice walls and ceilings. He can stop at any point and stick to the surface without fear of falling. Neither feat requires a roll against Climbing skill, provided the surface is one you can cling to. Move while clinging is half the subject's Basic Move.

If the subject is falling and tries to grab a vertical surface to break his fall, the GM must first decide whether there is anything in reach. If there is, the subject makes a DX roll to touch the surface, and then makes a ST roll at -1 per 5 yards already fallen. If he succeeds, he stops his fall. Otherwise, he continues to fall – but he may subtract 5 yards from the height of the fall thanks to the slowing effect of the failed Clinging attempt. Variations in gravity affect these distances; e.g., in 0.5G, the ST roll would be at -1 per 10 yards.

Statistics: Affliction 1 (HT; Advantage, Icewalking, +60%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Note:* "Icewalking" is Clinging (Magical, -10%; Specific, Ice, -60%) [6].

Icy Breath

Keywords: Jet, Obvious.

Full Cost: 8.5 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of ice and cold air erupts from your mouth. Use Innate Attack (Breath) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning

damage with dice equal to your level of this spell. This damage cannot set anything on fire, as the damage comes from extreme cold. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The GM must determine what the maximum level available in the campaign is.

Statistics: Burning Attack 1d (Increased 1/2D, 2x, +5%; Jet, +0%; No Incendiary Effect, -10%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [8.5/level].

Icy Missiles

Keywords: Weapon Buff.

Full Cost: 13 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a projectile weapon, this spell causes its projectiles to do an additional 1d of follow-up (p. B105) burning damage. This damage is from extreme cold, not fire; it will never set anything ablaze. The wielder will find the weapon cool to the touch, but not uncomfortable to use.

Statistics: Affliction 1 (HT; Accessibility, Only on projectile weapons, -30%; Advantage, Icy Missiles, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [13]. *Note:* "Icy Missiles" is Burning Attack 1d (Follow-Up, This weapon, +0%; Magical, -10%; No Incendiary Effect, -10%; Visible, -10%) [4].

Icy Touch

Keywords: Obvious.

Full Cost: 30 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent, until destroyed, or until the victim breaks free.

You freezes the victim in ice. Roll DX or an unarmed combat skill to touch your subject. On a hit, your victim is pinned (see B370) and rooted in place. He cannot move his limbs or speak; his only options are to use purely mental abilities, to attack the ice bonds with an Innate Attack, or to try to break free using ST (not Escape skill). The ST of this effect is equal 15, but you can layer additional attacks on a successfully bound victim. Each extra layer gives +1 to ST.

To break free, the victim must win a Quick Contest of ST against the ST of this spell. Each attempt takes one second. If he tries to break free and fails, he loses 1 FP and is only allowed a repeated attempt every 10 seconds. Treat FP lost to failed attempts to break free as freezing (see *Cold*, p. B430), but the victim does not become helplessly entangled on 17-18. Alternatively, he may try to destroy the ice bonds with an Innate Attack (they hit automatically). External attacks on the ice bonds take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, B392).

The ice bonds have DR 5. Each point of damage reduces ST by one. At ST 0, the ice bonds are destroyed and the victim is freed. If the temperature is above freezing, the ice bonds melt naturally, losing 1 point of ST every 10 minutes.

Statistics: Binding 15 (Engulfing, +60%; Melee Attack, Reach C, Cannot Parry, -35%; Melts Naturally, -10%; Sorcery, -15%) [30].

Identify Fungus

Keywords: Information.

Full Cost: 14 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines the type and species of any one fungus. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the fungus in question, this will reveal it. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Fungi; Sorcery, -15%; Touch- or Vision-Based, -15%) [14].

Identify Loot

Keywords: Information.

Full Cost: 37 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest inanimate valuable object. Use the standard range penalties (p. B550). If successful, the object is revealed to the caster's eyes, and the caster may make a follow-up IQ roll (at no penalty) to get a vague sense of why the object is valuable and its value relative to other detected objects. The GM should estimate the value for each item as if it were assessed by the nearest *appropriate* merchant for this type of item. The GM should feel free to approximate, since the spell doesn't tell the caster the actual price!

Any known valuable objects may be excluded if the caster mentions them before casting.

Statistics: Detect Valuable Object (Precise, +100%; Selective Effect, +20%; Sorcery, -15%; Vision-Based, -20%) [37].

Identify Metal

Keywords: Information.

Full Cost: 14 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines the type of metal. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the metal in question, this will reveal it. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Metal; Sorcery, -15%; Touch- or Vision-Based, -15%) [14].

Identify Newcomer

Keywords: Information.

Full Cost: 1 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

This spell, when cast on a person or object that the caster can see or touch, tells whether and when a banestorm brought it to Yrth.

Statistics: Detect (Banestorm Newcomers; Analysis Only, -50%; Sorcery, -15%; Touch- or Vision-Based, -15%) [1].

Identify Plant

Keywords: Information.

Full Cost: 14 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines the type and species of any one plant. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the plant in question, this will reveal it. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Plants; Sorcery, -15%; Touch- or Vision-Based, -15%) [14].

Identify Plastic

Keywords: Information.

Full Cost: 14 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines the type of plastic. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see or touch. If the sorcerer is familiar with the plastic in question, this will reveal it. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Plastic; Sorcery, -15%; Touch- or Vision-Based, -15%) [14].

Identify Psi

Keywords: Information.

Full Cost: 16 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

While this spell is active, the caster automatically identifies all currently active psionic effects and all psionic abilities being used in their presence; psionic items do *not* count. The caster must be able to see or touch the subject of an active psionic ability or the user of an ability that is being used. If the sorcerer is familiar with the psionic abilities in question, this will reveal them. Otherwise, the GM will secretly roll IQ modified with range penalties and use the margin of success to determine how much information to give the sorcerer. For example, "some kind of a Telepathy ability".

Statistics: Detect (Psionics Use; Analysis Only, -50%; Analyzing, +100%; Reflexive, +40%; Sorcery, -15%; Touch- or Vision-Based, -15%) [16].

Identify Spell

Keywords: Information.

Full Cost: 16 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

While this spell is active, the caster automatically identifies all currently active spells and all spells being cast in their presence; enchanted items do *not* count. The caster must be able to see or touch the subject of an active spell or the caster of a spell that is being cast. If the sorcerer is familiar with the spells in question, this will reveal them. Otherwise, the GM will secretly roll IQ modified with range penalties and use the margin of success to determine how much information to give the sorcerer. For example, "some kind of a protection spell".

Statistics: Detect (Magic; Analysis Only, -50%; Analyzing, +100%; Reflexive, +40%; Sorcery, -15%; Touch- or Vision-Based, -15%) [16].

Identify True Name

Keywords: Information, Resisted (Will+10).

Full Cost: 18 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: Instantaneous.

When cast on a subject that fails to resist, this spell grants the caster the subject's True Name. Points must be spent to buy a perk to remember a True Name, but the perk allows its use with other spells, if the system in question allows that. See [Truename Magic](#) or *Pyramid #3-114* for more applications. You must be able to see or touch the subject to cast this spell.

Statistics: Detect (True Name; Analyzing, +100%; Analysis Only, -50%; Easily Resisted 10, -50%; Requires IQ vs. Will Roll, -10%; Sorcery, -15%; Touch- or Vision-Based, -15%) [18].

Ignite Poison

Keywords: Area (Leveled), Resisted (HT).

Full Cost: 45 points for level 1 + 3.5 points/additional level*.

Casting Roll: None for the cloud effect. Use Innate Attack (Gaze) to aim. Will for internal burning.

Range: 100 yards.

Duration: 10 seconds.

All poisons in the area burst into flames. This does not block vision, but inflicts burning damage to anyone standing in it. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind, if the poison is gaseous.

Every creature in the area takes 1d-2 burning damage per turn.

Poisonous and poisoned creatures in the initial area of effect begin to burn from within, taking 1d burning damage each second for 10 seconds, if they fail to resist with a Quick Contest of HT versus the caster's Will. Armor does not protect against this damage. Every second an internally burning creature can make a HT roll. A successful roll means that the internal fire is neutralized. If the subject loses ½ of his HP or more to this internal burning, he begins experiencing terrible pain (p. B428) until he is healed above this threshold.

The basic (45-point) version of this spell covers a two-yard radius. For each additional 3.5 points, you may double this radius; e.g., four yards for 49 points, 8 yards for 52 points, or 16 yards for 56 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Burning Attack 1d-2 (Area Effect, 2 yards, +50%; Drifting, +20%; Environmental, Poison, -60%; Link, +10%; Magical, -10%; Persistent, +40%; Variable, Area, +5%) [4] + Burning Attack 1d (Accessibility, Only on poisonous or poisoned, -70%; Area Effect, 2 yards, +50%; Based on HT, +20%; Cyclic, 1 second interval, 9 seconds, +450%; Link, +10%; Malediction 2, +150%; Sorcery, -15%; Symptoms, ½ HP, Terrible Pain, +120%; Variable, Area, +5%) [41]. Further levels add Area Effect (+50%) to both advantages [+3.5].

* Calculate the total cost, then round up.

Illuminated Writing

Keywords: None.

Full Cost: 6 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

When the caster reads a written work, whatever he reads comes to life in his head as if he were experiencing with all his senses. He is an observer, not a participant, so this is not dangerous, but can still call for a Fright Check. The caster *does not* read the words, but only experiences the writing, so he might not remember many exact wordings after he's done with the book. Modify the casting roll for

range penalties to the book (see p. B550). The caster must know the language of the book he is experiencing.

Any self-study that is performed with the aid of Illuminated Writing counts as twice as much study time as usual; any Research rolls are made at +3.

The caster can maintain this spell for as long as he wishes without further concentration. If he switches to another book, he must stop reading his current book and cast the spell again.

If he fails to cast, he may try again, at a cumulative -2 per repeated attempt on that book in the past hour. Should he critically fail, he cannot experience that book again for 24 hours.

Statistics: Mind Reading (Accessibility, Only on books, -50%; Sensory Only, -20%; Sorcery, -15%; Vision-Based, Variant, -20%) [6].

Illusion Disguise

Keywords: Buff, Area (Leveled).

Full Cost: 40 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim. Use IQ or Artist (Illusion) to determine how convincing the illusion is.

Range: 100 yards.

Duration: 3 minutes.

This illusion makes a chosen creature look, sound, and feel different, but it doesn't fool special senses like Infravision or Vibration Sense. The base creature must be of the appropriate size and shape. The base creature must be wholly covered by the spell's area of effect (see Area; Sorcery, p. 9).

You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something "off." Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere. However, even if they successfully "disbelieve," your illusion doesn't disappear. Thus, even an obvious illusion can be useful to disguise the creature.

The illusion may be disbelieved, but is otherwise stable. However, it will not move about unless the underlying object moves. Damage done by the underlying creature is unaffected. For example, an illusion disguise of a golem could be cast over a human. The subject would feel and look like a golem, but still would hit like a human! Concentration is not required to maintain the illusion.

Statistics: Affliction 1 (HT; Accessibility, Advantage, Illusion Disguise, +280%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [40]. *Notes:* "Illusion Disguise" is Illusion (Emanation, -20%; Extended, Touch, +20%; Independence, +40%; Magical, -10%; Only similar shapes, -20%) [28*]. Additional levels add Area Effect (+50%) to the Illusion Disguise advantage [+12.5*].

* Calculate the total cost and then round down (because the base ability costs just 27.5 points before rounding). Level 2 of the *spell* costs 52 points, level 3 costs 65 points, level 4 costs 77 points, level 5 costs 90 points, and so on.

Illusion Shell

Keywords: Buff, Area (Leveled).

Full Cost: 39 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim. Use IQ or Artist (Illusion) to determine how convincing the illusion is.

Range: 100 yards.

Duration: 3 minutes.

This illusion makes a chosen object look, sound, and feel different, but it doesn't fool special senses like Infravision or Vibration Sense. The base object must be of the appropriate size and shape. The base object must be wholly covered by the spell's area of effect (see Area; Sorcery, p. 9).

You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something "off." Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere.

However, even if they successfully “disbelieve,” your illusion doesn’t disappear. Thus, even an obvious illusion can be useful to disguise the object.

The illusion may be disbelieved, but is otherwise stable. However, it will not move about unless the underlying object moves. Damage done by the underlying object is unaffected. For example, an illusion shell of a horse could be cast over a wooden horse. It would stamp and nicker like a horse, but could not be ridden! Concentration is not required to maintain the illusion.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Illusion Shell, +280%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Notes:* “Illusion Shell” is Illusion (Emanation, -20%; Extended, Touch, +20%; Independence, +40%; Magical, -10%; Only similar shapes, -20%) [28*]. Additional levels add Area Effect (+50%) to the Illusion Shell advantage [+12.5*].

* Calculate the total cost and then round down (because the base ability costs just 27.5 points before rounding). Level 2 of the *spell* costs 51 points, level 3 costs 64 points, level 4 costs 76 points, level 5 costs 89 points, and so on.

Illusory Wall

Keywords: Area (Leveled).

Full Cost: 35 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use IQ or Artist (Illusion) to determine how convincing it is.

Range: 100 yards.

Duration: Indefinite.

You can create an illusory wall anywhere that you can see within 100 yards. You do not have to concentrate to maintain it, Illusory Wall is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed. You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something “off.” Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere. However, even if they successfully “disbelieve,” your illusion doesn’t disappear. Thus, even an obvious illusion can be useful to block line of sight.

To find the maximum square yardage available, look up the level of this spell on the Leveled Area Table (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Illusory Wall 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Illusory Wall 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Statistics: Illusion (Accessibility, Walls Only, -60%; Independence, +40%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%; Visual Only, -30%; Wall, Shapeable, +60%) [35]. Additional levels add Area Effect (+50%) [+12.5*].

* Calculate the total cost and then round up.

Image

Keywords: Area (Leveled).

Full Cost: 5 points for level 1 + 12.5 points/additional level*.

Casting Roll: Artist (Illusion) to determine how convincing the image is.

Range: 100 yards.

Duration: Indefinite.

You can project a *stationary, unchanging, two-dimensional* image onto a vertical surface anywhere that you can see within 100 yards. This requires constant concentration.

To find the maximum square yardage available, look up the level of this spell on the *Leveled Area Table* (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Image 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Image 3 has a limit of 24 square yards, allowing the sorcerer to project an

image six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this image into any shape he wishes.

Statistics: Illusion (Automatic Disbelief, -50%; Disperses on attack or touch, -35%; Environmental, Vertical Surfaces, -20%; Nuisance Effect, Only Artist (Illusion) roll, -5%; Ranged, +40%; Sorcery, -15%; Static, -30%; Variable, Area, +5%; Visual Only, -30%; Wall, Shapeable, +60%) [5]. Additional levels add Area Effect (+50%) [+12.5*].

* Calculate the total cost and then round up.

Images of the Past

Keywords: Information.

Full Cost: 41 points.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite.

When cast on a mirror or reflective surface, this spell “plays back” whatever images it may have “seen” in the past.

To cast Images of the Past, you must touch the subject item or location, concentrate for one second, and make an IQ roll. This roll is at no penalty for an event that occurred the same day, -1 for one that occurred up to 10 days ago, -2 if up to 100 days ago, -3 if up to 3 years ago, -4 if up to 30 years ago, -5 if up to 300 years ago, and so on.

A successful use of this spell gives you an actual “replay” of events. On a failure, you receive no impressions at all, and cannot attempt to read that object or place again for 24 hours.

Statistics: Psychometry (Accessibility, Must be cast on a reflective surface, -20%; Accessibility, Visual Only, -10%; Active Only, -20%; Affects Others, +50%; Immersive, +100%; Sensitive, +30%; Sorcery, -15%; Visible, -10%) [41]. *Notes:* Affects Others makes it so others can see the playback of the spell. This affects any number of nearby subjects without requiring the usual multiple levels of that trait. This is a fair trade-off since this ability is so limited.

Imp Face

Keywords: Resisted (Will).

Full Cost: 41 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

This spell causes a small (4” high by 2” wide) imp face to appear on the victim’s body – most often, the neck or cheek. The horrid stigma can talk and it usually does, insulting and mocking anyone it can see, imposing a -2 to reaction rolls. The imp has access to the victim’s memories and thoughts, and will skillfully use this knowledge to sow hatred and dissent. It is possible to bandage or gag the imp.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Odious Personal Habits 2, +20%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Can be gagged, -5%; Sorcery, -15%) [41].

Impart Skill

Keywords: Buff.

Full Cost: 27 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The spell enchants an object to that it gives a specific skill at a specific level to the user. This must be a skill the caster knows. Spells cannot be granted this way. The caster can impart the equivalent

of 4 character points (e.g., if he imparts a Hard skill, the user would be able to use it at IQ+0). The user does not benefit, if he has more points in the skill than the caster.

Statistics: Affliction 1 (HT; Accessibility, Objects Only, -10%; Advantage, Impart Skill, +120%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [27]. *Note:* "Impart Skill" is Cosmic Power 4 (Accessibility, Cannot have relative skill level better than the caster, -10%; Accessibility, Only when using the object, -10%; Limited, One Skill, -40%; Magical, -10%) [12].

Impenetrable Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes armor more resistant to punctures. The armor's DR is multiplied against piercing and impaling damage, as shown on the table below.

Level	D R
1	x2
2	x3
3	x4

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Impenetrable Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Impenetrable Armor" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Impenetrable Armor imbuelement skill from *Pyramid #3-4*.

Impression Blocker

Keywords: Buff.

Full Cost: 60 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

Seeker (*GURPS Magic*, p. 105) and related spells require an object associated with the item or person sought in order to work. This spell enchants a container so that it allows people to carry items without them becoming "associated" with the carrier.

An object in a closed blocker container retains the impressions it had when the container was shut. If removed, handled briefly, and replaced, the object will acquire a very faint impression of the handler, but it won't be enough for a Seeker spell unless the handler does so once a day for *decades*.

Statistics: Affliction 1 (HT; Accessibility, Only on containers, -20%; Advantage, Impression Blocker, +380%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [60]. *Note:* "Impression Blocker" is Obscure 10 (Impressions; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [38].

Imprint Monster

Keywords: Resisted (Will).

Full Cost: 28 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to add the disadvantage.

Range: Unlimited.

Duration: Three days.

If cast upon a monster within a minute of its birth, you can make it your loyal friend, adding it the Sense of Duty (Caster) (see p. B153) disadvantage. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject. You may substitute Brainwashing for IQ, if better.

Statistics: Mind Control (Accessibility, Only on monsters within 1 minute of birth, -80%; Accessibility, Only to add Sense of Duty (Caster), -50%; Conditioning Only, -50%; Extended Duration, Permanent, +150%; Sorcery, -15%) [28].

Improved Explosive Fireball

Keywords: Missile, Obvious.

Full Cost: 12 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of fire at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does burning damage with dice equal to your level of this spell. The attack produces an explosion at the point of impact (on a miss, check for scatter; see p. B414). The target takes damage normally; anything nearby receives “collateral damage” equal to basic damage divided by the distance in yards from the blast. The GM must determine what the maximum level available in the campaign is. This spell has 1/2D of 50 yards.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own fireball!

Statistics: Burning Attack 1d (Explosion 3, +150%; Increased 1/2D, x5, +10%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [12/level].

Improved Explosive Lightning

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 19 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a coruscating discharge of electricity that expands to cover an area; it is not technically an explosion, but the term has long since entered common use. Use Innate Attack (Beam) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within eight yards of that spot takes dice of burning surge damage equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Improved Explosive Lightning behaves unpredictably around conductors; see Lightning (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Area Effect, 8 yards, +150%; Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [19/level].

Improved Firewood

Keywords: Buff.

Full Cost: 23 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

This spell can be cast on any piece of dead wood. Its flammability (p. B433) rises to Highly Flammable when the spellcaster deliberately tries to ignite the wood. Once lit, it burns three times longer than it normally would (like Essential Wood) and emits no noise or smoke! If anyone but the caster tries to set it on fire – or the caster exposes it to flame accidentally – treat the wood as it was before the spell was cast. If it catches fire in this way, the spell ends.

Statistics: Affliction 1 (HT; Accessibility, Only on wood, -60%; Advantage, Improved Firewood, +20%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. *Note:* “Improved Firewood” is Controllable Disadvantage (Flammable, Variant; Magical) [1] + Sanitized Metabolism (Variant; Magical, -10%) [1].

Incarnum Arc

Keywords: Incarnum, Missile, Obvious.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: 5 seconds.

You create a drifting “lightning rod” of incarnum that appears at the point you designate. Instantly, an arc of soul energy forms between you and the incarnum rod, creating a line. At the end of your turn, any living creature in that line is attacked by the arc with effective skill level 12 and takes 1d-1 toxic damage on hit, ignoring DR.

In subsequent turns, incarnum arcs again between you and the rod at the end of your turn. You can move the rod up at Move 3 by taking a Concentrate maneuver, or you can leave it in place and move yourself if you wish to change the path of the arc. If the distance between you and the rod at the end of your turn is further than 10 yards, no arc occurs but the spell remains active. This spell has no 1/2D range.

This spell’s cost can only be paid with essentia.

Statistics: Toxic Attack 1d-1 (Bombardment, Skill 12, -10%; Cone 1, +60%; Cosmic, Irresistible Attack, +300%; Costs Essentia, -5%; Increased 1/2D, x10, +15%; Mobile 3, +120%; Nuisance Effect, Stops when too far, -5%; Persistent, +40%; Reduced Duration, ½, -5%; Reduced Range, 1/5, -20%; Sorcery, -15%) [18].

Incarnum Bladestorm

Keywords: Area (Fixed), Incarnum.

Full Cost: 6 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Creates a ground-level cloud of swirling Incarnum blades. It does not block vision, but it inflicts cutting damage to anyone standing in it. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect.

This spell covers a two-yard radius. Every creature in the area takes 1d-2 cutting damage per turn.

This spell’s cost can only be paid with essentia.

Statistics: Cutting Attack 1d-2 (Area Effect, 2 yards, +50%; Costs Essentia, -5%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [6].

Incorporeal Chains

Keywords: Resisted (DX).

Full Cost: 76 points/level.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent, until destroyed, or until the victim breaks free.

You conjure ghostly chains that bind the insubstantial victim, pinning his arms to his torso, and tying the legs together. An additional chain covers his mouth, preventing him from speaking. On a hit, your victim is pinned (see p. B370) and rooted in place. He cannot move his limbs or speak; his only options are to use purely mental abilities, to attack the chains with an Innate Attack, or to try to break free using ST (not Escape skill). The ST of this effect is equal $10 * \text{spell level}$, but you can layer additional attacks on a successfully bound victim. Each extra layer gives +1 to ST.

The chains actively constricts the victim. Until he breaks free, the chains attack him each turn with a Constriction Attack (p. B43), at ST of this spell.

To break free, the victim must win a Quick Contest of ST against the ST of this spell. Each attempt takes one second. If he tries to break free and fails, he loses 1 FP and is only allowed a repeated attempt every 10 seconds – and on a 17 or 18, he becomes so entangled that he cannot escape on his own! Alternatively, he may try to destroy the chains with an Innate Attack (they hit automatically). External attacks on the chains take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, p. B392).

The chains have DR 4. Each point of damage reduces ST by one. At ST 0, the chains are destroyed and the victim is freed.

Statistics: Binding 10 (Based on DX, +20%; Constricting, +75%; Engulfing, +60%; Insubstantial Only, -30%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [76/level].

Increase Burden

Keywords: Resisted (HT or wearer's Will).

Full Cost: 49 points for level 1 + 16 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Three minutes.

The object's effective weight for encumbrance purposes is increased. The spell is resisted by object's HT (if unattended) or the wearer's Will. The degree of the effect depends on the spell level:

Level	Weight Increase
1	20%
2	40%
3	60%
4	80%
5	100%
+1	+20%

Statistics: Affliction 1 (HT or wearer's Will; Accessibility, Only on objects, -10%; Advantage, Increase Burden, +220%; Based on wearer's Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [49]. Additional levels add further Increase Burden to the Advantage enhancement (+160%) [+16]. *Notes:* "Increase Burden" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -2 in effect penalties. This spell is based on a variation of the Lighten Armor imbue skill from Pyramid #3-4.

Increase Gravity

Keywords: Area (Fixed).

Full Cost: 54 points for level 1 + 9 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 10 seconds.

This spell increases gravity in an area. See *Different Gravity* (p. B350) for details on different gravity levels. The area of effect has a radius of 5 yards and height of 4 yards. The spell increases gravity by 10% per level.

Statistics: Control Gravity 5 (Accessibility, Only to increase gravity, -60%; Cannot concentrate to extend duration, -10%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [45] + Control Gravity 1 (Accessibility, Only to increase gravity, -60%; Cannot concentrate to extend duration, -10%; Does not increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [9/level].

Increase Potency

Keywords: Area (Fixed).

Full Cost: 6 points for level 1 + 3 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can make poisons more potent. It can be cast on a poisoned creature, venomous creature, a container of poison, or an area of poison. If cast on a liquid or gaseous poison, it only affects one hex. This spell makes the affected poison harder to resist – subtract 1 from HT of all creatures resisting it per level of this spell.

Statistics: Control Poison 1 (Only to increase potency, -85%; Ranged, +40%; Sorcery, -15%) [6]. Additional levels add Control Poison 1 (Does not increase area, -50%; Magical, -10%; Only to increase potency, -85%; Ranged, +40%) [3/level].

Infiltrate

Keywords: None.

Full Cost: 20 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell lets the caster “flow” bodily through any remotely porous barrier instantly. The caster can carry up to his Basic Lift when he infiltrates like this. The barrier must not be thicker than 10 yards.

Make an IQ + Talent roll to cast this spell, modified as follows:

On a success, you appear at your target destination. On a failure, you go nowhere. On a critical failure, you briefly “liquefy,” all of your possessions fall to the ground, and you suffer 1d HP of injury.

Statistics: Warp (Accessibility, Only pass through porous obstacles, -50%; Blind Only, -50%; Cannot Spend Extra FP, -10%; No Strain, +25%; No Preparation, -10%; Range Limit, 10 yards, -50%; Reliable 10, +50%; Sorcery, -15%) [20].

Inflict Pain

Keywords: Resisted (Will).

Full Cost: 32 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

A sapient subject’s mind is wracked with pain for 1 minute. He must make a Will roll to avoid crying out. He has a -6 penalty to all DX, IQ, skill, and self-control rolls. High Pain Threshold halves these penalties; Low Pain Threshold doubles them. The caster can decrease the pain penalties to -4 or -2 when casting the spell.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Terrible Pain, +60%; Variable, +5%) [32].

Inflict Wounds

Keywords: None.

Full Cost: 20 points.

Casting Roll: IQ for healing. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

When casting this spell, you must declare whether you are trying to heal an undead subject or harm a living subject. Thus, if you are somehow deceived by the appearance and try to heal a living subject or harm an undead subject, the spell fails.

On undead subjects, this spell works identically to Minor Healing (*GURPS Thaumatology: Sorcery*, p. 17). However, the caster cannot affect himself.

On living subjects, this spell deals 1d injury regardless of DR and insubstantiality.

Statistics: Crushing Attack 1d (Accessibility, Only on living creatures, -10%; Affects Insubstantial, +20%; Cosmic, Irresistible Attack, +300%; Melee Attack, Reach C, Cannot Parry, -35%; No Knockback, -10%; Sorcery, -15%) [18] + Healing (Accessibility, Only affects undead, -50%; Cannot restore crippled limbs, -10%; Capped, 2 FP, -25%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [6/5=2]. *Notes:* The 4 HP of healing has been converted to dice per p. B269. These abilities are taken as alternative abilities.

Inflict Wounds (Affinity Variant)

Keywords: None.

Full Cost: 3 points.

Casting Roll: None. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

By making a physical contact with a living or undead creature, you deal it 1d negative energy damage. Undead creatures or other creatures with Negative Energy Affinity are healed instead as described in the ability. Treat any excess damage (or all damage, for living beings) as crushing damage with no knockback. This spell can affect insubstantial beings.

Statistics: Crushing Attack 1d (Accessibility, Only on living or undead creatures, -5%; Affects Insubstantial, +20%; Melee Attack, Reach C, Cannot Parry, -35%; No Knockback, -10%; Sorcery, -15%) [3].

Infravision

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell allows the subject to see “infrared” or heat rays in addition to normal light, as with the Infravision advantage (p. B60).

Statistics: Affliction 1 (HT; Advantage, Infravision, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* “Infravision” is Infravision (Magical, -10%) [9].

Inscribe

Keywords: Resisted (Will).

Full Cost: 12 points.

Casting Roll: DX or Artist (Calligraphy, Illumination, etc.).

Range: 10 yards.

Duration: Instantaneous.

Creates an inscription (either writing or images) on any surface within 10 yards. Appropriate specializations of Artist (Calligraphy, Illumination, etc.) should be used to assess the aesthetics of the result. The image can be as stylish as the caster desires: letters of silver flame, simple block-lettering, reflected light on the surface of water, and so on. The inscription is integral to the subject's surface, fading only when the spell is washed off or dispelled.

An unsuspecting or unwilling subject resists with Will. A willing target can waive his resistance. This spell can never cause damage or an affliction.

Statistics: Accessory (TK Pen) (Magical, -10%) [1] + Telekinesis 1 (One Task, Inscription, -60%; Reduced Time 10, +200%; Requires DX vs. Will roll, -10%; Results can be dispelled, -10%; Sorcery, -15%) [11]. *Notes:* See *GURPS Thaumatology: Sorcery*, p.14 for the One Task limitation. Here, Reduced Time is used to shorten a 10-minute inscription to one second, which was chosen because it costs the same as an Average technique to buy off the -10 for "instant use."

Insect Control

Keywords: Resisted (Will).

Full Cost: 18 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single insect – or of one square yard of a swarm of smaller insects. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only insects with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for insects with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Insects only, -50%; Sorcery, -15%) [18].

Insect Repellent

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

The subject becomes unattractive to biting flies, mosquitoes, and similar *natural* vermin. As effective as repellent substances known at the caster's TL.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Accessory (Insect Repellent; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Insect Repellent, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Insect Repellent" is Accessory (Insect Repellent; Magical, -10%) [1].

Insignificance

Keywords: Buff.

Full Cost: 35 points for level 1 + 19 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.
Duration: 30 minutes.

It becomes easy for the subject to blend in. The subject's face is hard to pick out or remember. They get +5 per level of the spell to Shadowing in crowds, while others have -5 per level of the spell to rolls made to recognize them from a lineup or mug shots – or even to recall meeting them!

Statistics: Affliction 1 (HT; Advantage, Insignificance, +190%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [35]. Additional levels add more Insignificance to the Advantage enhancement (+190%) [+19]. *Note:* Each level of "Insignificance" is Obscure 5 (Memory; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [19].

Inspire Competence

Keywords: Area (Leveled), Beneficial Song.
Full Cost: 50 points for level 1 + 5 points/additional level.
Casting Roll: None.
Range: Self.
Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. This song can only affect sapient beings. Subjects roll vs. Per minus any Magic Resistance they have. The song's effects last for margin of success seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Allies affected by Inspire Competence gain the benefits of a single 5-point Talent chosen by the bard when they start the performance. The bard is not affected by their own Inspire Competence. See *GURPS Power-Ups 3: Talents* for an extensive list of Talents. It is suggested to use the alternative benefit option instead of the Reaction bonus.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Per; Accessibility, Does not affect self, -10%; Accessibility, Only on sapient beings, -10%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%; Variable Enhancement, +300%) [50]. Additional levels add Area Effect (+50%) [+5]. *Note:* Variable Enhancement provides +50% of enhancements (+500%) but is limited by "Accessibility, Only for Talents with the Magical, -10% limitation" (-40%) for a net +300%.

Inspire Courage

Keywords: Area (Leveled), Beneficial Song.
Full Cost: 34 (KYOS: 27) points for level 1 + 5 points/additional level.
Casting Roll: None.
Range: Self.
Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. This song can only affect sapient beings. Subjects roll vs. Per minus any Magic Resistance they have. The song's effects last for margin of success seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Allies affected by Inspire Courage enjoy a +2 bonus to ST for the singular purpose of dealing blows. This normally gives +1 to damage with thrusting attacks and +2 to damage with swings (KYOS: +2 to both). In addition, they add +2 to their Will whenever they make a Fright Check or must resist the

Intimidation skill or a supernatural power that induces fear. They also subtract 2 from all Intimidation rolls made against them.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Per; Accessibility, Only on sapient beings, -10%; Advantage, Inspire Courage, +130%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [34]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Inspire Courage" is Fearlessness 2 (Magical, -10%) [4] + Striking ST 2 (Magical, -10%) [9].

Statistics (KYOS): Affliction 1 (Per; Accessibility, Only on sapient beings, -10%; Advantage, Inspire Courage, +60%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [27]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Inspire Courage" is Fearlessness 2 (Magical, -10%) [4] + Striking ST 2 (Magical, -10%) [2].

Inspire Greatness

Keywords: Area (Leveled), Beneficial Song.

Full Cost: 54 (KYOS: 47) points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for an least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. This song can only affect sapient beings. Subjects roll vs. Per minus any Magic Resistance they have. The song's effects last for margin of success seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Allies affected by Inspire Greatness enjoy a +2 bonus to ST for the singular purpose of dealing blows. This normally gives +1 to damage with thrusting attacks and +2 to damage with swings (KYOS: +2 to both). In addition, they get a +1 bonus to DX and HT (this does *not* increase FP).

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Per; Accessibility, Only on sapient beings, -10%; Advantage, Inspire Greatness, +330%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [54]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Inspire Greatness" is DX 1 (Magical, -10%) [18] + HT 1 (Magical, -10%; No Extra FP, -30%) [6] + Striking ST 2 (Magical, -10%) [9].

Statistics (KYOS): Affliction 1 (Per; Accessibility, Only on sapient beings, -10%; Advantage, Inspire Greatness, +260%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [47]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Inspire Greatness" is DX 1 (Magical, -10%) [18] + HT 1 (Magical, -10%; No Extra FP, -30%) [6] + Striking ST 2 (Magical, -10%) [2].

Inspire Heroics

Keywords: Area (Leveled), Beneficial Song.

Full Cost: 35 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for an least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. This song can only affect sapient creatures. Subjects roll vs. Per minus any Magic Resistance they have. The song's effects last for margin of success seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Allies affected by Inspire Heroics get a +1 to all skill rolls when they take unnecessary risks. Furthermore, they may reroll any critical failure that occurs during such high-risk behavior.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Per; Accessibility, Only on sapient creatures, -10%; Advantage, Inspire Heroics, +140%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [35]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Inspire Heroics" is Daredevil (Magical, -10%) [14].

Instant Neutralize Fungal Poison

Keywords: Buff.

Full Cost: 48 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

This spell flushes fungal poisons from the subject's body. The caster must first roll against Poisons (or Alchemy, Pharmacy, etc., as appropriate) to identify the fungal poison. He cannot attempt this roll until he knows that the subject has been poisoned. In most cases, this can be discovered when the first symptoms show! This spell flushes the fungal poison instantly, after which it has no further effect.

Statistics: Affliction 1 (HT; Advantage, Instant Neutralize Fungal Poison, +400%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [48]. *Note:* "Instant Neutralize Fungal Poison" is Unusual Training (Body Control, only to flush fungal poisons) [1] + Body Control (VH) HT [8] modified with Accessibility, Fungal Poisons, -50%, Cosmic, No die roll required, +100%, Magical, -10%, and Reduced Time 15, +300% for a final cost of 40 points.

Instant Neutralize Poison

Keywords: Buff.

Full Cost: 53 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

This spell flushes poisons from the subject's body. The caster must first roll against Poisons (or Alchemy, Pharmacy, etc., as appropriate) to identify the poison. He cannot attempt this roll until he knows that the subject has been poisoned. In most cases, this can be discovered when the first symptoms show! This spell flushes the poison instantly, after which it has no further effect.

Statistics: Affliction 1 (HT; Advantage, Instant Neutralize Poison, +450%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [53]. *Note:* "Instant Neutralize Poison" is Unusual Training (Body Control, only to flush poisons) [1] + Body Control (VH) HT [8] modified with Cosmic, No die roll required, +100%, Magical, -10%, and Reduced Time 15, +300% for a final cost of 45 points.

Instant Regeneration

Keywords: Buff.

Full Cost: 238 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Instantly.

Your touch instantly restores a lost limb or organ.

Statistics: Affliction 1 (HT; Accessibility, One organ at a time, -5%; Accessibility, Only on living creatures, -10%; Advantage, Instant Regeneration, +2,360%; Fixed Duration, +0%; Melee Attack, Reach

C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [238]. *Note:* “Instant Regeneration” is Regrowth (Magical, -10%; Reduced Time 25, +500%) [236].

Instant Restoration

Keywords: None.

Full Cost: 44 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By making physical contact with a subject, you may immediately repair his crippled but whole limb or organ. You may heal subjects of your own race and any “similar” races (GM’s call); e.g., a human can heal other humans but not dogs or plants. All injury that crippled the limb or organ in question is healed instantly. Each healer gets only one attempt per crippled limb. This spell cannot restore lost limbs.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only to restore crippled limbs and organs, -40%; Affects Self, +50%; Capped, 5 FP, -15%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 4, +80%) [44].

Instant Summons

Keywords: None.

Full Cost: 68 points for level 1 + 4 points/additional level.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

You can recall an existing object to you across space or dimensions. This must be your personal possession weighing 3 lbs. or less; it appears in your hand. Note that (e.g.) “a loaded gun” would be a single object; you do not have to create the gun and bullets separately! Recalled items remain indefinitely, as if you had physically retrieved them.

Unlike most spells, Instant Summons requires 10 or 11 seconds to cast instead of the normal one or two seconds. If you fail, you can try again, but repeated attempts cost 3 FP (instead of the usual 1 FP) and take a cumulative -1 to the IQ roll, until you succeed or wait an hour.

Higher levels of this spell allow you to recall heavier, larger objects. However in no case can you create an object weighing more than 2xBL; it must always be something you could hold in one hand.

Spell Level	Weight	Min. ST
1	3 lbs.	3
2	5 lbs.	4
3	7 lbs.	5
4	10 lbs.	5
5	15 lbs.	7
6	20 lbs.	8
7	30 lbs.	9
8	50 lbs.	12
9	70 lbs.	14
10	100 lbs.	16

For higher levels, look up the spell level in the “Size” column of the *Size and Speed/Range Table* (p. B550) and then read the corresponding “Linear Measurement” as pounds instead of yards. (Or note that every +6 levels corresponds to 10x weight.) See p. B17 to find minimum ST.

Statistics: Snatcher (Improved, +10%; Less Weight, 3 lbs., -5%; Magical, -10%; Nuisance Effect, Cannot send objects back, -5%; Recall, -25%; Reduced Fatigue Cost 1, +20%) [68]. Level 2 removes Less

Weight (+5%) [+4] and additional levels add More Weight (+5%) [+4]. *Note:* The Improved enhancement eliminates the auto-fail on 14+.

Insulated Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes armor more resistant to electricity. The armor's DR against electrical damage and attacks enhanced with Surge (p. B105) if multiplied, as shown on the table below. If the armor is metal, don't reduce its DR to 1 against such attacks (p. B432). All armor gains levels of Hardened (p. B47) against the armor divisor of electrolaser, particle, antiparticle, and plasma weapons, as shown on the table below.

Level	D R	Hardened
1	x2	1
2	x3	2
3	x4	3

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Insulated Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Insulated Armor" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Insulated Armor imbuement skill from *Pyramid* #3-4.

Insulation

Keywords: Resisted (HT).

Full Cost: 56 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 90 minutes.

This spell completely disrupts transfer of heat through an object improving its insulation properties. Use of this spell can make thin clothing protect against cold, or keep metal objects cool although they are in contact with heat. Transfer of heat through the material is greatly slowed. "Normal" heat transfer (like heat loss from a house or loss of body heat through clothing) is reduced by 50% over normal.

Clothing affected by this spell is treated as if it were one level warmer. I.e., thin clothing is treated as heavy clothing, heavy clothing is treated as winter clothing, and winter clothing is treated as arctic clothing.

Damage from fire or heat through an insulated material is halved. Note that this spell doesn't make the insulating material fireproof. Flammable materials will still burn, but they won't transfer heat through them until they are completely consumed.

The drawback of this spell is that some object require some heat transfer to work properly. For example, if this spell were cast on a cooking pot, it would render the pot nearly useless, since the food in the pot wouldn't heat.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Insulation, +250%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [56]. *Note:* "Insulation" is Injury Tolerance (Damage Reduction 2, Variant; Limited, Heat/Fire, -40%; Magical, -10%) [25].

Intellect Fortress

Keywords: None.

Full Cost: 4.5 points/ level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

While this spell is active, you are protected from direct mental attacks. This increases your DR by 2 * level of this spell (e.g., Intellect Fortress 3 adds DR 6) against Malediction-based mental attacks.

Statistics: Damage Resistance 2 (Limited, Mental, -40%; Malediction-Proof, +0%; Sorcery, -15%) [4.5/level].

Interference

Keywords: Area (Leveled).
Full Cost: 28 points for level 1 + 10 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

You may fill a two-yard-radius area with radio noise. To place the area at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. Outside radio operators get a -10 penalty on their Electronic Operation (Comm) skill when attempting to transmit signals to the affected area, and the radio sources inside the area take the same penalty when attempting to communicate with an outside receiver.

The basic (28-point) version of this spell covers a two-yard radius. For each additional 10 points, you may double this radius; e.g., four yards for 38 points, 8 yards for 48 points, or 16 yards for 58 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Radio 10 (Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [28]. Further levels add Area Effect (+50%) to the advantage [+10].

Interposing Hand

Keywords: None.
Full Cost: 20 points.
Casting Roll: None.
Range: 3 yards.
Duration: Indefinite.

Creates a SM+0 hand made of shimmering pinkish force that appears between the caster and one of his opponents. This floating, disembodied hand moves automatically to remain between them, regardless of where the caster moves or how the opponent tries to get around it, providing cover for the caster against that opponent (and other opponents, if they are close enough). The opponent firing at the caster risks hitting the hand instead. See *Firing Through an Occupied Hex*, p. B389.

The hand stays at a 3-yard distance from the caster. It cannot push objects or creatures. It has HP 20 and DR 20.

The designated opponent must evade (p. B368) the hand, if he wants to approach the caster. The hand is considered a standing creature, and has DX of the caster and ST 10. The hand can even stop insubstantial opponents from approaching. Getting past the hand or destroying it dispels it.

The caster can Concentrate to redirect the hand to another opponent.

Statistics: Telekinesis 10 (Affects Insubstantial, +20%; Independent, +40%; Nuisance Effect, Breakable, -5%; One Task, Interposing, -70%; Reduced Range, ½, -10%; Sorcery, -15%; Terminal Condition, Getting past, -10%; Visible, -10%) [20].

Invisibility

Keywords: Buff.
Full Cost: 84 or 92 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

You make the subject invisible. The subject still makes noise, leaves footprints, and has a scent – and anything the subject is carrying (up to the Medium encumbrance) becomes invisible too. The subject gets a +9 to Stealth in any situation where being seen would matter, if he is carrying no more than his Medium encumbrance.

Individuals using paranormal remote viewing (crystal balls, Clairvoyance, etc.) cannot see the subject if the subject would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see the subject.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). The subject does not cast a shadow and doesn't show up in mirrors.

The basic (84-point) version of this spell ends if the subject attacks any creature. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If the subject attacks directly, however, it immediately becomes visible along with all its gear. The improved (92-point) version of this spell eliminates this limitation.

Statistics: Affliction 1 (HT; Advantage, Invisibility, +680%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [84]. *Notes:* "Invisibility" is Invisibility (Affects Machines, +50%; Can Carry Objects, Medium, +50%; Dispels after an attack, -20%; Magical, -10%) [68]. The improved version removes the Dispels after an attack limitation from the advantage [+8].

Invisibility Purge

Keywords: Area (Leveled).
Full Cost: 68 points for level 1 + 15 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

This spell creates a zone that negates all forms of invisibility. Once an invisible object or creature enters the area, its invisibility is stripped from it and will not return until it reacquires this quality outside the area.

The basic (68-point) version of this spell covers a two-yard radius. For each additional 15 points, you may double this radius; e.g., four yards for 83 points, 8 yards for 98 points, or 16 yards for 113 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Static (Invisibility; Area Effect, 2 yards, +100%; Ranged, +40%; Sorcery, -15%) [68]. Additional levels increase Area Effect (+50%) [+15].

Invisible Armor

Keywords: Armor Buff.
Full Cost: 32 points for level 1 + 8 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell makes armor or shield difficult to spot. Observers must make a Perception roll at -2 per level of this spell even to notice that it's there. Maximum level is 5, as -10 to Perception rolls makes armor effectively invisible.

Even if an attacker makes his roll to see the armor or shield, the concealment may help the wearer. If a shield was enchanted, increase its Defense Bonus by 50% (round down) or +1, whichever is better. If an armor was enchanted, attackers must add half the Per penalty above to the usual penalty to target chinks in armor.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Invisible Armor, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* “Invisible Armor” is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Subtle Defense imbuelement skill from *Pyramid #3-4*.

Invisible Weapon

Keywords: Weapon Buff.

Full Cost: 32 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell blurs the weapon, giving a -2 to all Vision rolls to notice the attack per spell level, up to the maximum of -10, which makes the weapon invisible.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Invisible Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* “Invisible Weapon” is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Stealthy Attack imbuelement skill.

Invisible Wizard Eye

Keywords: None.

Full Cost: 80 points.

Casting Roll: IQ.

Range: 10 yards.

Duration: Indefinite.

You can displace your sight to a point outside your body in a form of an invisible floating eye. This “viewpoint” must be a specific location within 10 yards. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if your desired viewpoint is out of sight.

On a success, you can use your sight as if you were physically present at the viewpoint. You can see the environment around your body while using your ability. You can still only pay attention to one vision. At the start of each turn in combat, state whether you’re giving priority to your natural sight or your remote one. All tasks that depend on the sight you aren’t prioritizing – including attack rolls, defense rolls, and Sense rolls – are at -4.

Your vision ignores darkness penalties completely. You cannot see through solid objects, but if your viewpoint were inside (for example) a closed chest, you would see what was inside despite the lack of light. If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Wizard Eye for as long as you like.

On failure by 1, your sight goes to some other viewpoint of the GM’s choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced sight, move it elsewhere, or change its facing as a free action. A viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part.

Treat the visible eye as a creature with a Size Modifier equal to yours - 7 and with HP equal to your IQ/10. Destruction of your viewpoint causes you 1 point of injury and results in your ability being unusable for 1dx5 minutes. The eye can be seen with See Invisible.

Statistics: Clairsentience (Aware, +50%; Clairvoyance, -10%; Fixed Range, -5%; Second Nature, +70%; Sorcery, -15%; Takes Damage, Invisible, -30%) [80]. Notes: *Takes Damage* is taken from Ravens N' Pennies [blog post](#).

Invoke

Keywords: None.

Full Cost: 1 point.

Casting Roll: IQ.

Range: Self.

Duration: Instantaneous.

The caster utters the name of a demon lord or a similar entity in a way that's guaranteed to be heard in Hell, in the Underworld, etc. Rarely produces any immediate effects, but repeated casting may include the caster in the being's future plans. It's generally not wise to cast this spell.

Statistics: Controllable Disadvantage (Trivial Destiny (Heard by an otherworldly being); Sorcery, -15%) [1].

Invoke Fence

Keywords: Obvious.

Full Cost: 37 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

This spell conjures a low (3' tall) barrier comprised of sticks, brushwood, and larger pieces of fallen trees. The spell assembles existing material rather than conjuring plant life, magically gathering the components from the surrounding area. Up to a half-mile away, branches and chunks of bark disappear and then reappear, piece by piece, to create the fence. You do not have to concentrate to maintain it, Invoke Fence is "fire and forget." It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall has a certain number of HP and dissipates once those are exceeded.

To find the maximum square yardage available, look up the level of this spell on the Leveled Area Table (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Invoke Fence 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Invoke Fence 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall 24 yards long by 1 yard high. The caster may form this into any shape he wishes. Each wall has DR 6 and HP 1.

Statistics: Crushing Attack 2d (Area Effect, 2 yards, +50%; Environmental, Vegetation, -20%; Extended Duration, Permanent, +150%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [37]. Additional levels increase Area Effect (+50%) [+5].

Irradiate

Keywords: Area (Leveled).

Full Cost: 9 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Creates an area of invisible radiation. It inflicts radiation (p. B435) damage to anyone standing in it. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect.

Every creature in the area takes 1d radiation damage (p. B435) per turn, ignoring DR.

Statistics: Toxic Attack 1d (Area Effect, 2 yards, +50%; No Signature, +20%; Persistent, +40%; Radiation, +25%; Sorcery, -15%; Variable, Area, +5%) [9]. Further levels add Area Effect (+50%) to the advantage [+2].

Iron Silence

Keywords: Buff.

Full Cost: 20 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject does not take a penalty to their Stealth for being encumbered. While the spell is named after noisy armor, it affects encumbrance of all kinds.

Statistics: Affliction 1 (HT; Advantage, Iron Silence, +40%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Note:* "Iron Silence" is Armor Familiarity 4 (Variant; Stealth; Magical, -10%) [4].

Ironweed

Keywords: Area (Leveled).

Full Cost: 17 points for level 1 + 1 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Causes the ground to sprout pointy, iron-hard shoots that behave as a dense field of miniature caltrops. These spring from soil like ordinary plants, appear as though shaped from a wooden floor, force their way up between bricks or cobbles, and create cracks in porous stone or concrete. Only seamless, nonporous ground in the area – like a sheet of metal, glass, or plastic flooring – remains unaffected. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Each turn, everybody on foot in an Ironweed field automatically steps on one spike plus one per yard traveled within the area. Falling down among the barbs means being stabbed SM+4 times; e.g., four times for an SM 0 human or five for an SM +1 ogre. There are no rolls to avoid these fates – the shoots are too closely packed! Each sprout does thrust-3 impaling damage, based on the victim's ST, to a randomly chosen foot – or, on a fall, to a random hit location. Minimum basic impaling damage is 1 point per attack (p. B378). Any DR protects normally. Impaling damage isn't doubled against limbs or extremities (such as the feet); see p. B399. Maximum injury is 2 HP per barb, but keep track of it – accumulated wounds (p. B420) can cripple.

The basic (17-point) version of this spell covers a two-yard radius. For each additional 1 point, you may double this radius; e.g., four yards for 18 points, 8 yards for 19 points, or 16 yards for 20 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Impaling Attack 1 point (Accessibility, Only against moving or falling creatures, -10%; Area Effect, 2 yards, +50%; Cosmic, Additional damage on falls, +300%; Cosmic, Once per yard, +300%; Environmental, Ground, -20%; Fixed Duration, +0%; Persistent, +40%; Sorcery, -15%; ST-Based, Reversed, +100%; Variable, Area, +5%) [17]. Further levels add Area Effect (+50%) to the advantage [+1].

Irresistible Dance

Keywords: Resisted (Will).

Full Cost: 35 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 15 seconds.

Sapient subject feels an undeniable urge to dance and begins doing so, complete with foot shuffling and tapping. The spell effect makes it very hard for the subject to do anything other than caper and prance in place. The subject can move at half of his Move, defends at -4, and is at -4 to DX and IQ. He automatically fails any action that requires a Concentrate maneuver. At the end of the dance, the subject loses 1 FP.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures, -10%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/10, -20%; Seizure, Variant, +100%; Sorcery, -15%) [35].

Itch

Keywords: Resisted (HT).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

The subject is at -2 to DX for 30 seconds. Scratching for one full second relieves the itch, but he can do nothing else while scratching; this requires a Do Nothing maneuver in combat.

Statistics: Affliction 1 (HT; Itching, +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/6, -15%; Sorcery, -15%) [25].

Jam Radio

Keywords: Buff.

Full Cost: 26 points for level 1 + 14 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The caster blocks a single subject from receiving or transmitting radio signals. Outside operators get a -5 penalty per level of this spell on their Electronic Operation (Comm) skill against the subject. If they did not require making such skill rolls before, they have to make such rolls once per minute to communicate with the subject. If the subject is a radio or have Telecommunication (Radio), then he gets the same penalty to communicate with others via radio.

Statistics: Affliction 1 (HT; Advantage, Jam Radio 1, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. Additional levels add more levels of Jam Radio (+70%) [+14]. *Note:* Each level of "Jam Radio" is Obscure 5 (Radio; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [14].

Join Plants

Keywords: Resisted (Will or HT).

Full Cost: 26 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite or 1 second.

You can fuse plants together. The higher your level of Join Plants, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of dead or living plant matter in the form of a single object or amorphous mass. Sentient plants resist with the better of their Will and HT. Normal plants do not resist.

You can connect the tips of two leaves, link two flowers by their stems, reattach an apple to an apple tree, and so on. For sapient plants, this effect lasts for 1 second. For normal plants, this effect has an indefinite duration. Stable forms become permanent when you stop concentrating.

Statistics: Control Wood (Accessibility, Only to join plants, -80%; Magical, -10%; Reduced Fatigue Cost, +20%; Vital Manipulation, +100%) [26/level].

Jolt

Keywords: Missile, Obvious.

Full Cost: 16 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 10 yards.

Duration: Instantaneous.

The caster fires an electricity arc that stuns the subject, if they fail to resist with a (HT+DR) roll (treat metal armor as DR 1), and +3 beyond 1/2D range (this spell has 1/2D range of 5 yards). On subsequent turns, they can recover normally by making an unpenalized HT roll.

Statistics: Affliction 1 (HT; Increased 1/2D, 5x, +10%; Reduced Range, 1/5, -20%; Sorcery, -15%; Surge, Arcing, Only for the purpose of DR bonus reduction, +80%) [16].

Juggernaut Armor

Keywords: Buff.

Full Cost: 21 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject, and all of his carried gear, is protected by an invisible field of pure force, but *only from the front*. This increases his DR by twice the level of this spell (e.g., Juggernaut Armor 3 adds DR 6), cumulative with that from actual armor against attacks made from the front.

Statistics: Affliction 1 (HT; Advantage, Juggernaut Armor 1, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. Additional levels add further Juggernaut Armor to the Advantage enhancement [+9]. *Notes:* Each level of "Juggernaut Armor" is Damage Resistance 2 (Directional, Front, -20%; Force Field, +20%; Magical, -10%) [9].

Jump

Keywords: Buff.

Full Cost: 15 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject has his Basic Move increased by 2 per level of this spell, but only for the purpose of calculating jumping distance.

Statistics: Affliction 1 (HT; Advantage, Jump 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Jump to the Advantage enhancement [+3]. *Note:* Each level of "Jump" is Basic Move 2 (Only to determine jumping distance, -60%; Magical, -10%) [3].

Keen Taste and Smell

Keywords: Buff.

Full Cost: 17 points for level 1 + 1.8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You grant the subject a bonus to Taste and Smell equal to the level of this spell (maximum 4*). This spell only affects sapient (IQ 6+) beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Keen Taste and Smell, +20%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Keen Taste and Smell to the Advantage enhancement (+20%) [+2*]. *Notes:* Each level of “Keen Taste and Smell” is Acute Taste and Smell 1 (Magical, -10%) [2].

* The maximum of 4 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 1.8 points. That will affect the full cost for levels past 4.

Keen Touch

Keywords: Buff.

Full Cost: 17 points for level 1 + 1.8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You grant the subject a bonus to Touch equal to the level of this spell (maximum 4*). This spell only affects sapient (IQ 6+) beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Keen Touch, +20%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Keen Touch to the Advantage enhancement (+20%) [+2*]. *Notes:* Each level of “Keen Touch” is Acute Touch 1 (Magical, -10%) [2].

* The maximum of 4 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 1.8 points. That will affect the full cost for levels past 4.

Keen Vision

Keywords: Buff.

Full Cost: 17 points for level 1 + 1.8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You grant the subject a bonus to Vision equal to the level of this spell (maximum 4*). This spell only affects sapient (IQ 6+) beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Keen Vision, +20%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Keen Vision to the Advantage enhancement (+20%) [+2*]. *Notes:* Each level of “Keen Vision” is Acute Vision 1 (Magical, -10%) [2].

* The maximum of 4 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 1.8 points. That will affect the full cost for levels past 4.

Keyfinder

Keywords: Information.

Full Cost: 1 point.

Casting Roll: None.

Range: Self

Duration: Instantaneous.

The caster recalls where they put an item they possess but cannot find.

Statistics: Eidetic Memory (Accessibility, Only to recall the location of items the caster possesses, -65%; Sorcery, -15%) [1].

Knifehand

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster can use his hand to slice bread, cakes, sausages, etc. This spell only works with relatively slow movements, so this spell cannot be used as an attack.

Statistics: Accessory (Knife; Sorcery, -15%) [1].

Knockback Suppression

Keywords: Weapon Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell prevents the affected weapon from dealing knockback, effectively granting it the No Knockback limitation (p. B111).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Knockback Suppression, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Knockback Suppression" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11). This spell is based on the Supreme Control imbue ment skill.

Knockout

Keywords: Resisted (Will).

Full Cost: 45 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 15 seconds.

A sapient subject is knocked unconscious for 15 seconds (see *Incapacitating Conditions*, p. B428). After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/10, -20%; Sorcery, -15%; Unconsciousness, +200%) [45].

Knot

Keywords: Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

Ties a knot that cannot be untied without magic (though the rope can be cut, of course). The knot unties when someone says the password (specified at casting) while touching the rope at any point along its length. Thus, a rope tied at the top of a cliff will come loose when someone at the bottom of the cliff says the password, if he can touch the rope. The Undo spell also unties a Knot spell.

Statistics: Affliction 1 (HT; Accessibility, Only on ropes and similar objects, -40%; Advantage, Knot, +100%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Note:* "Knot" is Unusual Training (Immovable Stance, Variant) [1] + Immovable Stance (H) DX [4] modified with Cosmic, No die roll required, +100% and Magical, -10% for a final cost of 10 points.

Know Illusion

Keywords: Information.

Full Cost: 8 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the subject (person, object, or area) is an illusion or a creation. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see. If the sorcerer is familiar with the illusion or creation spells in question, this will reveal them. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Illusions; Link, +10%; Sorcery, -15%; Vision-Based, -20%) [4] + Detect (Creations; Link, +10%; Sorcery, -15%; Vision-Based, -20%) [4].

Know Location

Keywords: Information.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

Gives the caster a reasonable idea of his geographical location (to within a couple of miles). This will be expressed in terms of the nearest named features that the caster has heard of (if in doubt as to whether or not the caster has heard of the feature, the GM should roll against the caster's Area Knowledge). For example, "You are in Bangkok, roughly 100 meters north of Siam Paragon."

Statistics: Accessory (GPS; Sorcery, -15%) [1].

Know Recipe

Keywords: Information.

Full Cost: 17 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

When cast on any item of food, this spell lets the caster determine its recipe. This spell may be used on alchemical and chemical compounds, but at a -2 penalty.

On a failure, you do not learn anything, and cannot attempt to learn that recipe again for 24 hours. A critical failure means that you cannot attempt casting this spell on this object ever again.

Statistics: Psychometry (Accessibility, Food and Chemicals Only, -30%; Accessibility, Only to learn recipe, -30%; Active Only, -20%; Directed, +50%; Sensitive, +30%; Sorcery, -15%) [17].

Know Thyself

Keywords: None or Buff.

Full Cost: 1 or 11 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

Subject's thoughts become more organized. The subject gains +1 to Public Speaking and Teaching, but only when they are truthfully presenting their knowledge. Listeners receive +1 to Detect Lies and Interrogation to confirm subject is not lying. The subject must be a sapient (IQ 6+) creature.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (11-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Know Thyself (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Know Thyself, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [11]. *Note:* "Know Thyself" is Know Thyself (Magical, -10%) [1].

Know True Shape

Keywords: Information.

Full Cost: 4 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the subject is under any kind of Shapeshifting spell or similar magical effect, including Alter Visage, Alter Body, and illusions. The GM will secretly roll against the caster's IQ minus range penalties (p. B550) to the subject, which the caster must be able to see. If the sorcerer is familiar with the shapeshifting effects in question, this will reveal them. Otherwise, the GM will use the margin of success to determine how much information to give the sorcerer.

Statistics: Detect (Shapeshifters; Sorcery, -15%; Vision-Based, -20%) [4].

Laminate Force Field

Keywords: Buff.

Full Cost: 18 points for level 1 + 6 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject, and all of his carried gear, is protected by an invisible field of pure force that consists of multiple layers with different protective properties. This gives the subject DR equal to this spell's level, cumulative with that from actual armor. Due to its layered nature, DR granted by this spell is doubled against direct hits by shaped-charge warheads, including HEAT, MS-HEAT, HEDP, and HEMP, and plasma bolts.

Statistics: Affliction 1 (HT; Advantage, Laminate Force Field 1, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. Additional levels add further Laminate Force Field to the Advantage enhancement [+6]. *Notes:* Each level of "Laminate Force Field" is Damage Resistance 1 (Force Field, +20%; Laminate, +10%; Magical, -10%) [6].

Laser Eyes

Keywords: Missile, Obvious.

Full Cost: 4 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a beam of concentrated sunlight that does 1d burning damage per level! This is a tight-beam burning attack; see p. B399. Beings with Weakness (Sunlight) take an additional 1d of injury when first struck, though they are then immune for the duration of their Weakness; e.g., someone with Weakness (1d per minute) would take no more than an additional 1d per minute from Sunbolt.

The beam is easily reflected. Normally it cannot be blocked, but someone may use a mirror or a highly polished shield to do so; this causes the attack to bounce off in a random direction, possibly striking the wrong target (p. B389). The mirror-wielder may even attempt to reflect it back at the caster, but this gives -2 to Block; the sorcerer defends normally. On the upside, the caster may make use of

mirrored surfaces to “ricochet” the beam. This inflicts -2 per bounce to the attack roll, but may allow the attacker to bypass cover; in addition, the target is at -1 per bounce to defend.

Sunbolt is a standard ranged attack, and is thus affected normally by spells like Reverse Missiles.

Statistics: Burning Attack (Nuisance Effect, Reflective, -5%; Sorcery, -15%) [4/level]. Notes: The beam counting as sunlight is not a modifier, simply the attack’s description. The Nuisance Effect covers the collective rules for mirrors, which are slightly more punitive than useful.

Lava Bolt

Keywords: Missile, Obvious.

Full Cost: 80 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of lava (about the size of a softball) at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 3d(0.2) burning damage per second for 6 seconds. This cyclic damage can be stopped by extinguishing the flames.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own lava bolt!

Statistics: Burning Attack 3d (Armor Divisor, (0.2), -50%; Cyclic, 5 1-second cycles, +500%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [80].

Leak

Keywords: Resisted (HT).

Full Cost: 38 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

The container enchanted will have an uncanny tendency to “lose” whatever is put in it (coins, arrows, clothes, etc.). Whenever an item is put into the container, make a 3d roll. If the result is higher than 9, then the item will disappear into thin air 2d minutes later. It is not destroyed, but is deposited somewhere outside the container, as if it was dropped or lost. Living beings are unaffected.

Statistics: Affliction 1 (HT; Accessibility, Only on containers, -20%; Disadvantage, Kleptomania (9), Variant, +22%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [38].

Lecanomancy

Keywords: Information.

Full Cost: 38 or 88 points.

Casting Roll: IQ-5. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Lecanomancy is divination by observing the results of casting objects into water. Like augury, lecanomancy takes different forms in different cultures. Some diviners pour molten metal into water to observe the shapes the metal takes, while others examine tea leaves or simply throw stones into a pool and observe the ripples. Lecanomancy is invariably vague, and is always subject to a -5 penalty.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.” Lecanomancy is more efficient when it comes to time – halve the time penalties.

The basic (38-point) version of this spell requires 10 minutes to cast! The improved (88-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, halved, -5%; Reduced Fatigue Cost 1, +20%; Reliable 3, +15%; Requires objects thrown in water, -10%) [38]. The improved version adds Reduced Time 10 (+200%) [+50].

Lend Energy

Keywords: None.

Full Cost: 27 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By making physical contact with a subject, you may immediately heal him 1 FP per 1 FP spent to cast this spell (this spell may cost any amount of FP to cast, unlike normal spells). You may lend energy to subjects of your own race and any “similar” races (GM’s call); e.g., a human can lend energy to other humans but not dogs or plants. This spell cannot increase the subject’s FP score above its normal maximum.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful lending. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Heals Fatigue Only, +0%; Magical, -10%) [27].

Lend Language

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Subject gains a language (sapient creatures only) at the caster’s comprehension level or Accented – whichever is less. The caster must know the language in question.

Statistics: Affliction 1 (HT; Accessibility, Sapient Creatures Only, -10%; Advantage, Lend Language, +160%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [31]. *Note:* “Lend Language” is Cosmic Power 4 (Limited, One Known Language, -50%; Magical, -10%) [16].

Lend Power

Keywords: None.

Full Cost: 13 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous or until depleted.

This spell allows you to magically power a device using your own energy. To do so, touch the device, take a Concentrate maneuver and roll vs. IQ. Success means the device is successfully powered by you. Failure means nothing happens. Critical failure means the energy creation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

The spell cannot be used to directly charge batteries or other storage devices. It could, however, power a machine designed to recharge them.

The spell provides 1,000 x (level squared) kJ of useful work (divide by 3,600 to get kWh). The flow of power stops as soon as the caster breaks contact with the device.

Statistics: Create Electricity (Accessibility, Cannot directly charge batteries, -10%; Accessibility, Only to power devices, -30%; Magical, -10%; Nuisance Effect, Breaks if the caster breaks contact, -5%; Reduced Fatigue Cost 1, +20%) [13/level].

Lend Skill

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Subject (sapient creatures only) gains a single skill the caster knows. Spells cannot be granted this way. The caster can lend the equivalent of 4 character points (e.g., if he lends a Hard skill, the subject would know it at IQ+0). The subject cannot have more points in the skill than the caster.

Statistics: Affliction 1 (HT; Accessibility, Sapient Creatures Only, -10%; Advantage, Lend Skill, +160%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [31]. *Note:* "Lend Skill" is Cosmic Power 4 (Accessibility, Subject cannot have relative skill level better than the caster, -10%; Limited, One Skill, -40%; Magical, -10%) [16].

Lend Spell

Keywords: Buff.

Full Cost: 33 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell grants the subject control over a maintainable spell already cast by the caster. The caster loses control over that spell. The "loaned" spell effect must be within 100 yards of the subject. When lending an area spell, the area must not be larger in radius in yards than this spell's level. The loaned spell's full cost cannot be higher than the point cost of the subject's Sorcerous Empowerment. However, the scope limitations play no role in this – the caster could lend Light to the subject whose Sorcerous Empowerment is limited, for example, by Limited Colleges, Mind Control, -40%.

Lend Spell allows the subject to change parameters that the original caster had control over. For example, give mental orders via Animal Control (*GURPS Thaumatology: Sorcery*, p. 13), move Light (*GURPS Thaumatology: Sorcery*, p. 19), etc. From now on, the subject also must pay the maintenance cost of the loaned spell instead of the caster.

Statistics: Affliction 1 (HT; Accessibility, Only on other spellcasters, -30%; Advantage, Lend Spell 1, +240%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. Additional levels add further Lend Spell to the Advantage enhancement (+90%) [+9]. *Note:* The first level of "Lend Spell" is Control Magic 1 (Accessibility, Only to control parameters of a spell cast by the caster, -50%; Magical, -10%; Ranged, +40%) [24]. Each additional level adds Control Magic +1 (Accessibility, Only to control parameters of a spell cast by the caster, -50%; Magical, -10%; Only increases area of effect, -50%; Ranged, +40%) [9/level].

Lend Vitality

Keywords: None.

Full Cost: 14 points.

Casting Roll: IQ.

Range: Touch.

Duration: 1 hour.

By making physical contact with a subject, you may *temporarily* heal him 1d HP. This also automatically stops any bleeding. You may heal subjects of your own race and any "similar" races (GM's

call); e.g., a human can heal other humans but not dogs or plants. Healed HP disappear when the spell ends.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Cannot restore crippled limbs, -10%; Capped, 2 FP, -25%; Injuries Only, -20%; Magical, -10%; Maximum Duration, 1 hour, -10%; Reduced Fatigue Cost 1, +20%) [14]. Note: The 4 HP of healing has been converted to dice per p. B269.

Lengthen Limb

Keywords: None.

Full Cost: 4.5 points/level*.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

The caster can stretch his limbs in any direction. Each level of Lengthen Limb lets him increase his effective SM by +1 with any limb without increasing his overall SM. He can elongate his arms to increase reach (but not swinging damage, as Lengthen Limb gives no extra mass or muscle), his legs to negotiate obstacles, etc. For more information, see *Size Modifier and Reach* (p. B402). The limbs grow or shrink at the rate of ± 1 SM per second.

Statistics: Stretching 1 (Limbs Only, +0%; Requires IQ Roll, -10%; Sorcery, -15%) [4.5/level*].

* Calculate the total cost and round up.

Lesser Flight

Keywords: Buff.

Full Cost: 30 or 38 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject can fly, albeit slowly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, the subject will need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). He cannot fly in a trace atmosphere or vacuum.

The basic (30-point) version of this spell grants the subject a flight Move equal to 1. The improved version (38-point) increases the subject's flight Move to his Basic Speed (drop all fractions). He can also "fly" at half-speed underwater. Flight includes the ability to hover at Move 0 as well.

Statistics: Affliction 1 (HT; Advantage, Lesser Flight, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Notes:* "Lesser Flight" is Flight (Slow, Move 1, -45%; Magical, -10%) [18]. The improved version replaces Slow, Move 1, -45% with Slow, Basic Speed, -25% (+80%) [+8].

Lesser Polymorph

Keywords: None.

Full Cost: 20 points or more; see text.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster can assume different forms, as if using the Morph advantage (p. B84). The transformation takes 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster can only change his outward appearance. His abilities and racial template are unaffected. The caster can only assume forms with the same number of limbs, body layout, posture, etc.

as his native form. This would limit a human Morph to humanoids (e.g., elves and giants), a wolf Morph to horizontal quadrupeds, and a bird Morph to other birds.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his “slots” are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a “slot”.

If the caster can assume any racial template worth no more than his native one, Lesser Polymorph costs 20 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 20 points. For instance, a human who can take on any racial template worth up to 75 points would pay 95 points for Lesser Polymorph.

Statistics: Morph (Cosmetic, -50%; Retains Shape, -20%; Sorcery, -15%) [20].

Lesser Restoration

Keywords: None.

Full Cost: 53 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

Your touch can neutralize ongoing Afflictions – including the Affliction-like effects of the Side Effect and Symptoms enhancements. This requires an IQ roll at -1 per full +50% the target effect is worth as an enhancement to Affliction. This costs 1 FP. For instance, blindness is a +50% Disadvantage enhancement, so to cure blindness caused by Affliction, Side Effect, or Symptoms would require a roll at -1. The target exhales a shimmering, golden puff of breath as the adverse conditions disappear.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Affects Self, +50%; Affliction Only, -40%; Capped, 2 FP, -25%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Xenohealing, Anything Alive, +80%) [53].

Lesser Wish

Keywords: None.

Full Cost: 155 points.

Casting Roll: IQ. Special casting time.

Range: Self.

Duration: Instantaneous.

Once per hour of play (or one day game time, decide with your GM what method you are going to use beforehand), you may make an IQ roll to specify the result of any one die roll made in his presence, just before that roll is made – except a die roll involving magic. This is not an “action.” It takes no time, and may be done at any time, but the spell must be active. Wholly impossible attempts cannot succeed (the effective skill level must be at least 3), but you can choose any result that would be possible – however improbable – on a single normal die roll.

Statistics: Super Luck (Accessibility, Cannot affect magic rolls, -20%; Requires IQ Roll, -10%; Sorcery, -15%; Wishing, +100%) [155].

Lesser Zombie

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite, see text.

The caster touches a corpse that had ST 5 or less, IQ 6 or less, *and* SM -2 or less and animates it. The nature and condition of the corpse determines the nature of the undead creature produced. The animated corpse becomes an undead servant of the caster.

If the undead is destroyed, the summoner must wait a full day to call replacements. Dismissing the undead is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 4 times bigger than the undead creature's.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Lesser Zombie; Built on 25%; Constantly, no roll required; Adjustable, Small Class, Cannot provide information, +50%; Conjured, +100%; Magical, -10%; Minion, +0%; Requires a body, -20%) [9].

Lethal Lightning

Keywords: Missile, Obvious.

Full Cost: 32.5 points/level*.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a coruscating discharge of electricity that does 1d burning surge damage per level. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or fall unconscious for (20 - HT) minutes (minimum 1), and then suffer a -2 to DX for another (20 - HT) minutes upon awakening. Failure by 5 or more, or critical failure, results in a heart attack exactly as described on p. B429; the victim can be resuscitated if he gets suitable help in time, but will otherwise die.

Unconsciousness and DX penalties affect any living target with a brain; the No Brain, No Head, Homogenous, and Diffuse varieties of Injury Tolerance grant immunity. Heart attack affects only a living being that has a heart – that is, without Injury Tolerance that includes No Vitals. It is possible to be susceptible to one but not the other!

Lethal Lightning behaves unpredictably around conductors; see Lightning (GURPS Magic, p. 196) for more details.

Statistics: Burning Attack 1d (Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Unconsciousness and DX-2, plus Heart Attack on a failure by 5 or a critical failure, +470%) [32.5/level*].

* Calculate the total cost and then round up.

Levitation

Keywords: None.

Full Cost: 6 points for level 1 + 4 points/additional level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can move living creatures without touching them. You lift and move distant creatures just as if you were grasping them in a pair of hands with ST equal to (4*your Levitation level). You can move any creature you have strength enough to lift at Move 4, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17). Regardless of level, maximum range is 10 yards.

Levitation requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Levitation may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pick up a creature or a Move maneuver to lift and carry it.

No rolls are necessary for ordinary lifting and movement. In situations where you would roll against ST, roll against (4*your Levitation level) instead.

Statistics: Telekinesis 4 (Accessibility, Living Creatures Only, -10%; Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; No Fine Manipulations, -20%; Sorcery, -15%) [6]. Each additional level adds Telekinesis 4 (Accessibility, Living Creatures Only, -10%; Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; Lift Only, -20%; No Fine Manipulations, -20%; Sorcery, -15%) [4].

Ley Buffer

Keywords: Buff.

Full Cost: 15 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One minute.

This spell is only useful if cast on a subject that is using or planning to use Ley Tap. This decreases the rate of Energy Reserve replenishment on a megaline to one point per minute and prevents the effects of drawing on the hazardous megaline energy.

May also be treated as a Meta spell.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Advantage, Regeneration (Very Fast; Environmental, Megaline, -80%; ER Only, -0%; Magical, -10%), +20%; Negated Advantage, Wild Mana Generator (Environmental, Megaline, -80%; Magical, -10%), +20%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [15]. *Note:* This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Ley Float

Keywords: Buff.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell enables any one solid vehicle or structure to hover 5 feet above the ground of a ley line. While under this effect, a powered vehicle can float at its ground Move, but an unpowered vehicle or a structure can be towed.

May also be treated as a Movement spell.

Statistics: Affliction 1 (HT; Accessibility, Only on vehicles and structures, -30%; Advantage, Ley Float, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Notes:* "Ley Float" is Walk on Air (Environmental, Ley Line, -40%; Magical, -10%; Maximum Height, 5 feet, -25%) [5]. This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Ley Line Creation

Keywords: None.

Full Cost: 29 points or more.

Casting Roll: IQ. Special casting time (see below).

Range: Unlimited*.

Duration: Truly Permanent.

By performing a ritual that requires eight hours of unbroken concentration and spending of one character point, the caster permanently creates a new ley line. This must link two points of high or very high mana; if either point has very high mana, the result is a megaline. Use *Long-Distance Modifiers* (p. B241) based on the sum of the distances to the two points being linked. The spell cannot be dispelled once successfully cast, but casting Suspend Mana on either endpoint halts the ley line effects, and Drain Mana destroys the line. The Intensity of the created ley line is equal to Ley Line Creation level, but the caster can always opt to create a ley line of a lower Intensity. Since this spell is character-point powered, its actual cost is divided by five as follows:

Level	Actual Cost	Full Cost
1	141 points	29 points
2	282 points	57 points
3	423 points	85 points
4	564 points	113 points
5	705 points	141 points
6	846 points	170 points

May also be treated as an Enchantment spell and a Meta spell.

Statistics: Control Magic 1 (Accessibility, Only to link two points of high or very high mana with a ley line, -55%; Extended Duration on Persistent, Truly Permanent, +300%; Immediate Preparation Required, 8 hours, -90%; Increased Range, 200,000x, +160%; Persistent, +40%; Ranged, +40%; Short-Range 1, -10%; Sorcery, -15%) [29]. *Note:* This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

* Unlimited range assumes a global range on an Earth-like world. The actual range is 20,000,000 yards or 11,363 miles.

Ley Running

Keywords: None.

Full Cost: 25 points.

Casting Roll: None. Does not cost FP.

Range: Self.

Duration: Indefinite.

While this spell is active and the caster is running along a ley line at their full Move, they recover FP at a rate depending on the line's Intensity (*GURPS Thaumatology: Urban Magics*, p. 19). The caster recovers 1 FP per 15 seconds when running along an Intensity 4 ley line or a stronger one, 1 FP per 30 seconds when running along an Intensity 2 or 3 ley line, and 1 FP per minute when running along an Intensity 1 ley line. This spell does not cost any FP.

May also be treated as a Body Control or Movement spell.

Statistics: Regeneration (Fast; Accessibility, Only regenerates FP spent on running, -10%; Accessibility, Only when moving at full Move, -30%; Alternative Enhancements, +40%; Environmental, Ley Line, -40%; Fatigue Only, -0%; Magical, -10%) [25]. *Notes:* Alternative Enhancements includes Reduced Time 2, +40% limited by Accessibility, Requires the ley line to have Intensity 4 or higher, -10% for a total of +36%; Reduced Time 1 +20% limited by Accessibility, Requires the ley line to have Intensity 2 or 3, -5% for a total of +19% taken as alternative enhancements (see the *GURPS Power-Ups 4: Enhancements*, p. 13). This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Ley Speech

Keywords: None.

Full Cost: 17 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

This spell allows the sorcerer and their subject standing on the same ley line to use it for communication at a distance. Ley Line Speech transmits not only speech, but also other sounds made by the participants or equipment they are carrying.

The casting roll takes the range penalties given under Long-Distance Modifiers (p. B241). Once the spell is cast, no further concentration is required, but if any participant breaks contact with the ley line, the effects end.

May also be treated as a Sound spell.

Statistics: Mind Reading (Accessibility, Both participants must be on the same ley line, -60%; Accessibility, Only sounds produced by the subject, -10%; Hearing-Based, -20%; Link, +10%; Long-Range 1, +50%; Sorcery, -15%; Telecommunication, -20%) [11] + Telesend (Accessibility, Both participants must be on the same ley line, -60%; Accessibility, Only sounds produced by the caster, -10%; Hearing-Based, -20%; Link, +10%; Magical, -10%; Nuisance Effect, Cannot maintain multiple contacts, -10%) [6]. *Note:* This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Ley Supply

Keywords: None.

Full Cost: 63 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite.

Feeds magical energy into a ley line to boost Intensity temporarily by Ley Supply level (up to the maximum of Intensity 6). This spell requires constant concentration. The length of the ley line where its Intensity is increased equals to 0.6 miles x Ley Supply level.

May also be treated as a Meta spell.

Statistics: Control Ley Line 3 (Accessibility, Only to increase Intensity, -45%; Natural Phenomena, +100%; Sorcery, -15%) [63/level]. *Note:* This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Ley Tap

Keywords: None.

Full Cost: 58 points.

Casting Roll: None. Does not cost FP.

Range: Self.

Duration: Indefinite.

When this spell is active, the caster has access to an Energy Reserve equal to the Intensity of the ley line (*GURPS Thaumatology: Urban Magics*, p. 19) they are on. The energy is replenished at the rate of one point every minute for a normal ley line, or every second for a megaline. Note that this spell is useless, unless the caster can maintain multiple spells at once. This spell does not cost any FP.

Using energy from a megaline is hazardous. When using such energy, the caster has their successful casting rolls treated as critical successes, while any failed casting rolls treated as critical failures.

May also be treated as a Meta-Spell.

Statistics: Energy Reserve 6 (Magical; Environmental, Ley Line, -40%; Nuisance Effect, Available energy depends on Intensity, -10%) [9] + Regeneration (Fast; Environmental, Ley Line, -40%; ER Only, -0%; Magical, -10%) [25] + Regeneration (Very Fast; Environmental, Megaline, -80%; ER Only, -0%; Magical, -10%) [4] + Wild Mana Generator (Environmental, Megaline, -80%; Magical, -10%) [20]. *Notes:* Both Regeneration advantages are taken as Alternative Abilities. The full cost of the second instance of Regeneration is 20 points. The Wild Mana Generator advantage originally appeared in *GURPS Thaumatology*. This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Ley Vehicle

Keywords: None.

Full Cost: 12 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

This spell enables the caster to make a vehicle hover 5 feet above the ground and propel along a ley line. The caster must concentrate constantly and stay in physical contact with the vehicle. The

vehicle gains Move equal to the caster's Driving (Hovercraft). The caster can only steer the vehicle and change its speed – all other functions must be performed by normal means. Unlike most other spells with an Indefinite duration, this spell uses up 1 FP per hour, not 1 FP per minute.

May also be treated as a Movement spell and a Technological spell.

Statistics: Flight (Accessibility, Only the caster and the vehicle they are on, -30%; Affects Others 1, +50%; Environmental, Ley Line, -40%; Low Ceiling, 5 feet, -25%; Magical, -10%; Requires Concentrate, -15%) [12]. *Notes:* Speed being based on Driving (Hovercraft) instead of Basic Speed x 2 is a special feature. This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Libranomancy

Keywords: Information.

Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Libranomancy is divination through examination of smoke from incense. It requires incense worth not less than \$5 for each casting. The air in the area must be still while the casting takes place. When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Trigger, Burning incense, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Lich

Keywords: None.

Full Cost: 31 points + 0.9 x Lich template cost. (126 if using the template from *GURPS Magic*).

Casting Roll: IQ.

Range: Self.

Duration: Truly Permanent.

This spell lets the caster become a lich, a sorcerer preserved into undeath with powerful magic and alchemy. He retains his personality, knowledge, IQ, skills, and spells, and all his mental advantages and disadvantages (including Sorcerous Empowerment), but gains the physical and supernatural traits of a lich, as determined by the GM. The more powerful that package, the higher the full cost of the spell.

After the GM determines the lich template (and hence, the spell cost), the mage must complete a preparation ritual. This ritual takes 30 days. These do not have to be continuous or consecutive, but any day devoted toward the ritual cannot be spent adventuring, working on other projects, etc.; the sorcerer has only enough free time to eat, sleep, bathe, and perhaps converse a bit. At the end of the ritual, he rolls against IQ + Talent. Any failure does 6d toxic damage to the caster, ignoring DR. A success prepares the sorcerer's body for the next step.

To complete the transformation, the would-be lich must drink an alchemical elixir of Lichdom. The elixir of Lichdom is prepared like any other alchemical elixir (see *GURPS Magic*, p. 210); it requires \$13,500 in materials and 50 weeks of brewing. It defaults to Alchemy-7. Anyone not currently under the effects of a Lich spell who imbibes an elixir of Lichdom is affected as if he had drunk an elixir of Death (*GURPS Magic*, p. 215). However, an elixir of Lichdom cannot be counteracted, even with an alchemical Antidote. The elixir of Lichdom is forbidden everywhere, and formularies for it are almost impossible to find; most liches are compelled to reinvent it from scratch.

When a sorcerer under the Lich spell drinks a potion of Lichdom, he must roll vs. HT. If he succeeds, he dies, rising as a lich in 2d days. If he fails, he just dies. Luck, as well as the Bless and Wish spells, can influence this HT roll.

This spell cannot be enchanted onto an item, and cannot be dispelled even with Remove Curse. Since this spell is usually cast only once, most would-be liches use hardcore improvisation to cast it.

Statistics: Alternate Form (Lich*; Extended Duration, Truly Permanent, +300%; Nuisance Effect, 6d toxic damage on a failure, -30%; Preparation Required, 1 month, Variant, -80%; Requires IQ Roll, -10%; Sorcery, -15%; Trigger, Potion of Lichdom, -60%) [31 + 0.9 x Lich template cost]. If using the template from *GURPS Magic* the full cost is equal to 126.

* A meta-trait from p. 160 of *GURPS Magic*.

Light Jet

Keywords: Jet, Obvious.

Full Cost: 23 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: 1 second.

Emit a beam of bright light from one finger. This beam can be used like a flashlight. It gives good illumination for 10 yards in the direction it is pointed, and some vision will be possible up to 30 yards away. It can be used as a signal for up to a mile if visibility is good.

You can strike any target up to 10 yards away (without range or speed penalties). It can be dodged or blocked, but not parried.

If the spell strikes the face, it causes no injury, but decreases the target's DX by 4 for the next second unless he makes a HT roll. This can be used only in relative darkness (e.g., when the combat penalty is at least -5). Foes with Night Vision double these penalties.

Statistics: Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Accessibility, Only in relative darkness, -30%; Attribute Penalty, DX-8, Halved against those with no Night Vision, +60%; Blockable, -5%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Jet, +0%; Link, +10%; Reduced Duration, 1/180, -40%; Sorcery, -15%; Vision-Based, +150%) [22] + Illumination (Beam; Link, +10%; Magical, -10%) [1].

Light Speech

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 minute.

You use this spell to communicate with someone by emitting modulated beams of coherent light from your eyes. You can send subvocalized words at the speed of ordinary speech. To establish contact requires one second of concentration and an IQ roll. After that, no concentration is required.

Light Speech works amid even the loudest noises, although interference and jamming can disrupt your signal. Those with suitable equipment may attempt to locate, intercept, or jam your transmission. This requires an Electronics Operation (Communications) roll.

Range is 50 miles in a direct line of sight. The narrow beam and line-of-sight requirement make it extremely hard to eavesdrop on you. You can only communicate with people who have the Laser Communication (p. B91) advantage or a laser communicator.

Statistics: Affliction 1 (HT; Advantage, Light Speech, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [25]. *Note:* "Light Speech" is Laser Communication (Magical, -10%) [14].

Light Step

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Air, smoke, and other gases are like solid ground beneath subject's feet, allowing it to walk up and down "invisible stairs" at its ground Move, but no higher than 5 feet from the ground. This won't work in a vacuum – there has to be some kind of air present. If the subject gets knocked down or slips, it falls!

Statistics: Affliction 1 (HT; Advantage, Light Step, +130%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Light Step" is Walk on Air (Magical, -10%; Maximum Height, 5 feet, -25%) [13].

Light Tread

Keywords: Buff.

Full Cost: 22 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell allows the subject to exert very little pressure when he walks. The subject leaves no visible tracks. Tracking rolls to follow him automatically fail unless they rely on something more than sight; thus, a human tracker would be baffled, but bloodhounds would suffer no penalty at all. The subject can also walk over fragile surfaces without falling through. Maximum Move under such circumstances is 1/3 normal (GM's decision).

Statistics: Affliction 1 (HT; Advantage, Light Tread, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Note:* "Light Tread" is Unusual Training (Light Walk, no Stealth bonus) [1] + Light Walk (H) DX [4] modified with Cosmic, No die roll required, +100% and Magical, -10% for a final cost of 10 points.

Lighten

Keywords: Armor Buff.

Full Cost: 32 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The armor's effective weight for encumbrance purposes is reduced. The degree of the effect depends on the spell level:

Level	Weight Reduction
1	20%
2	40%
3	60%
4	80%
5	Weightless

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Lighten, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. Additional levels add further Lighten to the Advantage enhancement (+160%) [+16]. *Notes:* "Lighten" is 22 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -2 in effect penalties. This spell is based on the Lighten Armor imbue skill from Pyramid #3-4.

Lighten Burden

Keywords: Buff.

Full Cost: 15 points for level 1 + 3 points/additional level (KYOS: 19 points for level 1 + 7 points/additional level).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject adds Lighten Burden to his ordinary ST when he determines Basic Lift (p. B15) for the purposes of carrying, lifting, pushing, and pulling. Lighten Burden also adds to ST in situations where the subject can apply slow, steady pressure (grappling, choking, etc.).

Statistics: Affliction 1 (HT; Advantage, Lighten Burden 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Lighten Burden to the Advantage enhancement [+3]. *Note:* Each level of "Lighten Burden" is Lifting ST 1 (Magical, -10%) [3].

Lightning Armor

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is sheathed in crackling lightning. Any metallic weapon that hits the subject triggers a 1d-1 backlash of burning surge damage along the weapon. This attack automatically hits the hand that is holding the weapon, regardless of the weapon's length, as long as its entire length is conducting. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Anyone touching the subject is similarly damaged.

Statistics: Affliction 1 (HT; Advantage, Lightning Armor, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Lightning Armor" is Burning Attack 1d-1 (Aura, +80%; Cosmic, Conducting, +50%; Magical, -10%; Melee Attack, Reach C, -30%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [14].

Lightning Missiles

Keywords: Weapon Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a projectile weapon, this spell causes its projectiles to do an additional 1d of linked (p. B105) burning surge damage. Metallic armor counts as DR 1 against this damage, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating burning damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Electronics that take over 1/3 HP from this electric attack, must make a HT roll to avoid shorting out. Failure disables the target for seconds equal to the margin of failure; critical failure disables it until repaired (p. B484). The weapon will visibly crackle with electricity.

Statistics: Affliction 1 (HT; Accessibility, Only on projectile weapons, -30%; Advantage, Lightning Missiles, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Lightning Missiles" is Burning Attack 1d (Link, This weapon, +10%; Magical, -10%; Side Effect, Stunning, +50%; Surge, Arcing, +100%; Visible, -10%) [12].

Lightning Stare

Keywords: Jet, Obvious.

Full Cost: 11.75 points/level*.
Casting Roll: None. Use Innate Attack (Gaze) to hit.
Range: 10 yards.
Duration: Instantaneous.

A 10-yard jet of lightning erupts from your eyes. Use Innate Attack (Gaze) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning surge damage with dice equal to your level of this spell. The GM must determine what the maximum level available in the campaign is. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Lightning behaves unpredictably around conductors; see *Lightning* (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Increased 1/2D, 2x, +5%; Jet, +0%; Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [11.75/level*].

* Calculate the total cost and then round up.

Lightning Weapon

Keywords: Weapon Buff.
Full Cost: 21 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 1d of linked (p. B105) burning surge damage. Metallic armor counts as DR 1 against this damage, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating burning damage, or be physically stunned. On subsequent turns, they can roll HT to recover. The weapon must be at least partly metallic; weapons made entirely of wood and/or stone will not hold the spell. The weapon will visibly crackle with electricity. Electronics that take over 1/3 HP from this electric attack, must make a HT roll to avoid shorting out. Failure disables the target for seconds equal to the margin of failure; critical failure disables it until repaired (p. B484).

Statistics: Affliction 1 (HT; Accessibility, Only on metallic weapons, -30%; Advantage, Lightning Weapon, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Lightning Weapon" is Burning Attack 1d (Link, This weapon, +10%; Magical, -10%; Side Effect, Stunning, +50%; Surge, Arcing, +100%; Visible, -10%) [12].

Lightning Whip

Keywords: Obvious.
Full Cost: 19 points.
Casting Roll: None. Use Force Whip to hit.
Range: Self.
Duration: Instantaneous.

While this spell is active, the caster has a whip of lightning in his hand. It is wielded like a normal whip (p. B404), except that it always takes only one second to ready, and it cannot be used to parry or entangle. The whip has Reach 1-4 (changing Reach requires a Ready maneuver) and inflicts swing burning surge damage every time it strikes. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Natural Weapon (Burning; Cannot Parry, -40%; Destructive Parry, +40%; Extra Reach, 1-4, Ready maneuver necessary, +90%; Intangible, +50%; Side Effect, Stunning, +50%; Single, -20%; Sorcery, -15%; Surge, Arcing, +100%; Swing-Capable, +20%) [19].

Literary Hunger

Keywords: Resisted (Will).

Full Cost: 12 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

If the victim fails to resist, he takes 1d-2 fatigue damage after which he feels a longing for a good book. This FP can only be recovered by a day of reading a work of literature that the person has never read before. The spell has no effect on someone who cannot read.

Statistics: Fatigue Attack 1d-2 (Will; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Starvation, Variant, +40%) [12].

Lithomancy

Keywords: Information.

Full Cost: 42 or 92 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Lithomancy is divination by the examination of cast gemstones on black cloth. The cloth and stones required for this spell cost a total of \$1,500, but colored glass can be substituted at a -3 penalty.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (42-point) version of this spell requires 10 minutes to cast! The improved (92-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires gemstones and cloth, -15%) [42]. The improved version adds Reduced Time 10 (+200%) [+50].

Live Libram

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

Animates a book so that it will automatically turn its pages without its reader having to touch them after he opens it and begins reading. It automatically matches the reader's pace. It always opens to the place where its owner last stopped reading it, if he is still doing so.

Statistics: Affliction 1 (HT; Accessibility, Only on books, -50%; Advantage, Live Libram, +30%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Live Libram" is Telekinesis 1 (Independent, +40%; Magical, -10%; One Task, Turning pages, -80%) [3].

Lloyd's Beacon

Keywords: None.

Full Cost: 120 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Touch.

Duration: 3d seconds.

This spell teleports the caster to a specific place he has visited before and “marked” by Concentrating for 1 minute and making an IQ roll. There can be only five markers at the same time, creating a new one deletes the oldest one. Each marker lasts (IQ + Talent) weeks before it needs to be refreshed. After the caster teleports, he creates a gate behind him that persists for 3d seconds. Creatures that traverse the gate can carry up to Extra-Heavy Encumbrance when they travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you have a “second-hand” view of the destination, you are at -2 per level of removal. For instance, seeing it on TV or through someone else’s eyes would give -2, while seeing it on a television set that you are viewing through someone else’s eyes would give -4. There is an additional -2 to teleport to a place you have visited but cannot see.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, the you to your target destination and leave the gate behind you. On a failure, the teleportation fails and you strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you teleport, but to the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

Statistics: Warp (Anchored, Markers, -40%; Extra Carrying Capacity, Extra-Heavy, +50%; Required Concentrate, -15%; Sorcery, -15%; Tunnel, After, +40%) [120].

Lockmaster

Keywords: None.

Full Cost: 24 points.

Casting Roll: None. Use IQ (at -1) or Lockpicking (at +4) to open locks.

Range: 10 yards.

Duration: Instantaneous.

You can pick a lock without even touching it. The lock must be within 10 yards and you must be able to see it clearly. Roll against Lockpicking at +4, or IQ at -1 if you lack Lockpicking skill. (Add Talent, as usual.) This is an instantaneous attempt.

Statistics: Accessory (TK Lockpicks) [1] + Telekinesis 2 (One Task, Picking Locks, -60%; Reduced Time 10, +200%; Sorcery, -15%) [23]. *Note:* The +4 is the usual fine-work task bonus for Lockpicking.

Long March

Keywords: Resisted (HT).

Full Cost: 40 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

The subject has his Basic Move reduced to 0.4x of its value, but only for the purpose of calculating overland movement.

Statistics: Affliction 1 (HT; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Slower Move, 0.4x, Overland Movement Only, +20%; Sorcery, -15%) [40].

Loud Voice

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

Subject has their voice volume increased. In situations where the subject wants to be heard over noise, others get +3 to their Hearing roll. This may also give +1 to Intimidation rolls if the subject surprises someone by yelling or roaring.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Penetrating Voice (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Loud Voice, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Loud Voice" is Penetrating Voice (Magical, -10%) [1].

Loyal Sword

Keywords: Weapon Buff.

Full Cost: 40 or 51 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes or Permanent.

The subject weapon seeks to return to the wearer's hand if it is dropped or thrown – even if the wearer becomes unable to fight. When dropped, it returns on the next turn, as though it was drawn

again. When thrown, it flies until it hits something or falls to the ground, and then returns in as straight a line as possible, with a Move equal to the caster's IQ. It avoids enemies and obstacles when returning!

A loyal weapon can be trapped, captured out of the air, etc., while returning, but it requires a DX-4 roll to catch it, and its constant attempts to return to its owner give anyone else a -4 to fight with it.

The basic (40-point) version lasts for 30 minutes. The improved (51-point) version lasts permanently. Should the owner die, the weapon returns to the dead body, but then becomes loyal to the first creature to pick it up. A loyal weapon can be sold or given away at any time, but the transaction must be wholly voluntary; it is then loyal to the new owner.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Loyal Sword, +260%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [40]. *Notes:* "Loyal Sword" is Imbue 2 (Limited Skill Access, One Skill, -80%) [4] + Unusual Training [1] + Returning Weapon (VH) DX [8] modified with Cosmic, No die roll required (+100%), Magical (-10%), Reduced Fatigue Cost 1 (+20%), Nuisance Effect, Does not return projectiles (-10%) for a final cost of 26 points. The improved version replaced Extended Duration, 10x, +40% with Extended Duration, Permanent, +150% [+11]. This spell is based on the Returning Weapon imbue skill from *Pyramid* #3-13.

Loyalty

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to add the disadvantage.

Range: Unlimited.

Duration: Three days.

You can temporarily make the sapient subject your loyal friend, adding him the Sense of Duty (Caster) (see p. B153) disadvantage. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject. You may substitute Brainwashing for IQ, if better.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to add Sense of Duty (Caster), -50%; Conditioning Only, -50%; Fixed Duration, +0%; Sorcery, -15%) [10].

Loyalty of (Ethical Category)

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to add the disadvantage.

Range: Unlimited.

Duration: 10 months.

You can temporarily make the subject, who must be a being of a specific ethical category (evil, chaos, good, law, etc.) your loyal friend, adding him the Sense of Duty (Caster) (see p. B153) disadvantage. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject. You may substitute Brainwashing for IQ, if better.

Statistics: Mind Control (Accessibility, Only against beings of a specific ethical alignment, -40%; Accessibility, Only to add Sense of Duty (Caster), -50%; Conditioning Only, -50%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Sorcery, -15%) [10].

Luminous Body

Keywords: Obvious.

Full Cost: 1 point.

Casting Roll: None.
Range: Self.
Duration: 1 hour.

Your body emits light for 1 hour. This is usually equivalent to a torch (lights a 2-yard radius).
Statistics: Illumination (Sorcery, -15%) [1].

Lunomancy

Keywords: Information.
Full Cost: 34 or 84 points.
Casting Roll: IQ. Special casting time (see below).
Range: Touch.
Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Lunomancy is divination by the shadows created by moonlight on the individual's face. Each casting requires at least \$20 worth of silver dust to be spread on the caster's hands, and then on the subject's face. Lunomancy is only really suited to answering questions about the subject; attempts to divine information about absent persons are at -5.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (34-point) version of this spell requires 10 minutes to cast! The improved (84-point) version requires only the usual one or two seconds.

Statistics: Precognition (Accessibility, Only in moonlight, -30%; Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Penalty for impersonal questions, -5%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Trigger, Silver Dust, -10%) [34]. The improved version adds Reduced Time 10 (+200%) [+50].

Lure

Keywords: Area (Leveled), Resisted (Will).
Full Cost: 125 points for level 1 + 25 points/additional level.
Casting Roll: IQ.
Range: Unlimited.
Duration: 1 hour.

Each sapient (IQ 6+) being who steps within this spell's area of effect feels compelled to approach the center of the affected region. The GM should roll the creature's resistance in secret and then tell the unlucky victim that he "feels curious about the chest" or some such subtle hint. Once the victim has reached the center, he is immune to the spell until he leaves the affected area (if he returns, he will once again be "attacked" by the spell).

If the subject resists, he cannot be affected by this spell again within 24 hours.

Statistics: Mind Control (Accessibility, Only on sapient creatures, -10%; Accessibility, Only to compel the subject to reach the center, -60%; Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Independent, +70%; Nuisance Effect, Ends as soon as completed, -5%; Persistent, +40%; Rationalization, +20%; Sorcery, -15%) [125]. Additional levels add Area Effect (+50%) [+25].

Machine Control

Keywords: Resisted (Will).
Full Cost: 80 points.
Casting Roll: IQ.
Range: Touch.
Duration: 1 minute.

The caster controls the actions of any machine of IQ 6 or lower.

To control a machine, the caster must concentrate for one second and physically touch it. The caster must be aware of the machine's functions to control it. The spell does not supply the skill to use the machine – the caster must use his own skill at Gunner, Computer Operation, Driving, and so on.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to control that machine again – the machine is “immune” to him. If the caster wins, he takes over the machine, completely controlling its actions. The spell acts through the machine's triggers and controls, mechanical or electrical. A mage could use the spell to make a camera snap a picture, a robot strangle its evil creator, or a gun discharge all of its ammunition. He could not aim the object, or move it, unless it was self-aiming or self-propelled.

If something else has control (an AI in a vehicle or a human operator at the driver's seat, for instance), then he/it may dispute control of the machine every second with a Quick Contest of the caster's IQ + Talent vs. the operator's skill (or Will+TL for cybernetic control).

The caster can only exercise fine control over either his body or the machine at a time, though. He must state whether he is prioritizing his body or the machine (in combat, he must do this at the start of each turn). All actions taken by the lower-priority body – including attack, defense, and Sense rolls – are at -4. This makes it useful when the machine being controlled has its own set of sensors, otherwise the caster will have to use his own penalized senses to exercise fine control.

Statistics: Possession (Accessibility, Non-Sentient Machines Only, -30%; Maximum Duration, 1 minute, -65%; No Memory Access, -10%; Sorcery, -15%; Telecontrol 2, +100%) [80].

Machine Possession

Keywords: Resisted (Will).

Full Cost: 20 points.

Casting Roll: IQ.

Range: Touch.

Duration: 1 minute.

The caster moves his consciousness to a machine. Should his current body be destroyed, he will die! Thus, he must keep his current host alive.

To possess a machine, the caster must concentrate for one second and physically touch it. The machine resists at +5 if it is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that machine again – the machine is “immune” to him. If the caster wins, he takes over the machine, completely suppressing its personality (if it exists). His previous host regains control of his body (if sentient) after 1d seconds of mental stun, and “comes to” with no memory of the possession.

The caster gains his new host's ST, DX, and HT (and secondary characteristics calculated from these scores), as well as his physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster's social traits may apply, depending on the laws and values of his society. The caster's IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

The caster can freely access the memories of a sentient host at any time. To recall a specific fact from the subject's memories requires a straight IQ roll, at no penalty for the time since takeover.

Statistics: Possession (Accessibility, Machines Only, -20%; Full Memory Access, +10%; Maximum Duration, 1 minute, -65%; Sorcery, -15%) [20].

Machine Speech

Keywords: Resisted (Will).

Full Cost: 17 points.

Casting Roll: IQ - Complexity.

Range: Touch.

Duration: Instantaneous.

Speak with the subject machine in its language. In effect, the caster can force the machine to answer any one specific question that it can answer with a brief sentence.

If the casting is successful, the caster gets the answer from the machine. The answer is what the subject believes to be true – if it doesn't know, it'll tell the caster. If the casting has failed, the caster may try again, at a cumulative -2 per repeated attempt to ask the same (or very similar) question in the past hour. Should he critically fail, he cannot talk with that machine again for 24 hours.

This spell may be used to ask as many questions as the caster wishes, but each question is a new casting.

Statistics: Mind Probe (Cybernetic Only, -50%; Sorcery, -15%; Universal, +50%) [17].

Machine Summoning

Keywords: Resisted (Will).

Full Cost: 88 points.

Casting Roll: Per to detect, IQ to analyze, IQ to assume control.

Range: Unlimited.

Duration: 3 minutes.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest machine (anything under IQ 6) of the named type. The caster then can make an IQ roll to analyze the target (determine its qualities, and such). This spell uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the machine, and may make a follow-up IQ roll with the same penalty to call it to himself. It moves towards the caster as fast as it can, until the spell ends or the machine reaches the immediate vicinity of the caster.

Of course, the machine may not be very good at finding its way, or it may run out of fuel or power, and it should be able to move at all, etc. For example, a TL7 car would proceed in a straight line at top speed, unaware of obstacles such as pedestrians, ditches, lampposts, etc.

Once the machine reaches the caster, it stays nearby, without attacking, until the spell ends. The spell is broken if the caster or one of his companions attacks the machine.

Statistics: Detect Machine (Link, +10%; Lock-On, +50%; Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [63] + Mind Control (Accessibility, Non-Sentient Machines Only, -30%; Accessibility, Only to make the machine travel to you, -80%; Cybernetic Only, -50%; Fixed Duration, +0%; Independent, +70%; Link, +10%; Long-Range 1, +50%; Magical, -10%; Terminal Condition, Broken if attacked, -10%) [25].

Madness

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to add the disadvantages.

Range: Unlimited.

Duration: Three days.

You can cause the subject to temporarily go insane, adding him the appropriate disadvantages (for example, Berserk, Bestial, Chronic Depression, Confused, Delusions, Flashbacks, Paranoia, Phantom Voices, Phobia, etc.). This spell can only affect sapient beings. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject. You may substitute Brainwashing for IQ, if better. You are at -1 per full -5 points of disadvantages applied.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to cause insanity, -20%; Conditioning Only, -50%; Fixed Duration, +0%; Sorcery, -15%) [10].

Mage Light

Keywords: None.

Full Cost: 8 points for level 1 + 4 points/additional level.

Casting Roll: IQ.
Range: 100 yards.
Duration: One minute.

You can summon light equivalent to full daylight; you may make this light manifest anywhere within 100 yards. The light is bright enough to eliminate all darkness penalties in a 10-yard radius. However, the illumination that it provides is only perceptible to mages, magical creatures, and those under the influence of Mage Sight. By concentrating, you can move this “zone of light” at up to (spell level) yards per second.

Statistics: Create Visible Light 1 (Accessibility, Limited to lighting a 10-yard radius for one minute, -40%; Accessibility, Visible only to mages and magic creatures, -30%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 1, +20%) [8]. Additional levels add Mobile (+40%) [+4].

Mage Sense

Keywords: Information.
Full Cost: 6 points.
Casting Roll: Per.
Range: Unlimited.
Duration: Instantaneous.

After casting, the GM rolls against the sorcerer’s Per, with a standard range penalty based on the distance to the nearest significant magical item, being, or effect. If successful, the caster knows the whether some unseen magical item, creature, or effect is nearby.

Any known sources of magic may be excluded if the caster mentions them before casting.

Statistics: Detect Magic (Selective Effect, +20%; Sorcery, -15%; Vague, -50%) [6].

Mage Sight

Keywords: Information.
Full Cost: 3 points.
Casting Roll: Per.
Range: Unlimited.
Duration: Instantaneous.

Detect all magical items in the caster’s field of vision. Each such item will have a glow or “aura,” similar to the aura of a living being. This glow is visible through clothes, armor, or up to 1/2” of solid material. The GM will secretly roll against the caster’s Per minus range penalties (p. B550) to the subject, which the caster must be able to see. On a critical success, the aura might give a clue to the nature of its enchantment. For example, an item enchanted with a fire spell might give off a red aura.

Statistics: Detect (Magic Items; Cannot Analyze, -10%; Sorcery, -15%; Vision-Based, -20%) [3].

Magic Call

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Touch.
Duration: Indefinite.

The caster can call any phone number he knows, as if he had a cell phone. Obviously, his number will not be identified and he will not be charged for the call.

Statistics: Accessory (Cell Phone; Sorcery, -15%) [1].

Magic Fang

Keywords: Buff.
Full Cost: 13 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

Allows the unarmed attacks of the affected subject to ignore DR (Not vs. Magic) of some creatures, such as dragons, and deal additional damage to creatures with Vulnerability to magic.

Statistics: Affliction 1 (HT; Advantage, Magic Fang, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [13]. *Note:* "Magic Fang" is Magic Touch (Magical, -10%) [1].

Magic Manager

Keywords: Buff.
Full Cost: 30 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 9 seconds.

The subject can perform two Concentrate maneuvers per turn for the duration of the spell. The extra maneuver can only be spent on spellcasting, and only if the rest of the turn's actions were spent on spellcasting. When this spell ends, the subject loses his ability to cast spells (even from magic items) for 10 seconds.

Statistics: Affliction 1 (HT; Advantage, Magic Manager, +200%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [30]. *Note:* "Magic Manager" is Compartmentalized Mind 1 (Aftermath, Unable to cast spells, -15%; Limited, Magic, -5%; Magical, -10%; Mentalism, -10%; No Mental Separation, -20%) [20].

Magic Missile

Keywords: Missile, Obvious.
Full Cost: 6 points.
Casting Roll: None. Use Innate Attack (Projectile) to «lock on».
Range: 20 yards.
Duration: Instantaneous.

A magical force missile flies off your fingertips towards your target. A successful hit does 1d-1 crushing damage. The missile can strike even insubstantial targets. The projectile is homing, so it steers itself. As it uses normal vision to seek its target, it does not ignore darkness penalties. To "lock on," you must Aim at the target and make an unmodified skill roll. Do not roll against your skill to hit. Instead, use the attack's skill of 10 – plus Accuracy, if you made your skill roll – and ignore all range penalties. The projectile moves 4 yards per second. For more information, see Guided and Homing Weapons (B412).

Statistics: Crushing Attack 1d-1 (Sorcery, -15%; Affects Insubstantial, +20%; Reduced Range, x1/5, -20%; Homing, +50%; Increased 1/2D, 2x, +5%) [6].

Magic Resistance

Keywords: Buff.
Full Cost: 16 points for level 1 + 5 points/additional level*.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: One minute.

This spell makes the subject resistant to magic, granting them one level of Magic Resistance (p. B67) per level of this spell (maximum 4*). Subtract the Magic Resistance level from the skill of anyone *directly* casting a spell on the subject, and add it to the subject's roll to resist any spell that offers a resistance roll. In addition, the subject may roll against HT + Magic Resistance to resist the effects of magical elixirs.

Magic Resistance provides no benefit against Missile spells, attacks by magic weapons, or information-gathering spells that aren't cast directly on the subject.

Magic Resistance, and its precise level, can be recognized by any creature looking at the target's aura, or by anyone who casts a spell on the subject.

Statistics: Affliction 1 (HT; Advantage, Magic Resistance 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [16]. Additional levels add further Magic Resistance to the Advantage enhancement (+50%) [+5*]. *Note:* Each level of "Magic Resistance" is Magic Resistance 1 (Improved, +150%; Magical, -10%) [5*].

* The maximum of 4 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 4.8 points. That will affect the full cost for levels past 4.

Magic Weapon

Keywords: Weapon Buff.

Full Cost: 11 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Allows the weapon enchanted to ignore DR (Not vs. Magic) of some creatures, such as dragons, and deal additional damage to creatures with Vulnerability to magic.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Magic Weapon, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11]. *Note:* "Magic Weapon" is Magic Touch (Magical, -10%) [1].

Magician's Minion

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

Subject can come within 10 yards of a Quick and Dirty enchantment process without inflicting -1 on the caster's skill (*GURPS Magic*, p. 17). This effect doesn't prevent an *assistant* from giving -1.

Alternatively, when used with the sorcerous enchantment system, this spell lets the subject count as a sorcerer that does *not* know Enchant or the spell being enchanted for the purpose of being an assistant (*GURPS Thaumatology: Sorcery*, p. 32).

Statistics: Affliction 1 (HT; Advantage, Magician's Minion, +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Magician's Minion" is Magician's Minion (Magical, -10%) [1].

Magnetic Finger

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

One of the caster's fingers becomes magnetic. Effective ST 1 lets it attract and pick up 0.2 lb. of objects containing iron, nickel, or cobalt, as long as they're within one inch. Works through most materials, though not metals.

Statistics: Telekinesis 1 (Attraction, -60%; Independent, +40%; Magnetic, -50%; Melee Attack, Reach C, -30%; Sorcery, -15%) [1].

Magnetic Vision

Keywords: Information.

Full Cost: 7 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

Magnetic fields are revealed to the caster's eyes on a successful Per roll. With an IQ roll, the caster can find the source of a magnetic field by moving about the area where it's present. The caster sees the planet's magnetic field, giving +1 to Navigation by air, land, and sea, as if using a compass. Strong nearby fields disrupt the caster's navigational abilities.

Statistics: Detect Magnetic Fields (Sorcery, -15%; Vision-Based, -20%) [7].

Magnetize

Keywords: Resisted (HT).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: One minute.

The target, who may be an object or a creature, can be affected by magnetism for the duration of this spell.

Statistics: Affliction 1 (HT; Disadvantage, Affected by Magnetism, +1%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [25].

Magnificent Mansion

Keywords: None.

Full Cost: 345 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: 3d seconds.

You conjure up an extradimensional dwelling that has a single entrance on the plane from which the spell was cast. The entry point looks like a faint shimmering in the air that is 4 feet wide and 8 feet high. Creatures that traverse the gate can carry up to Extra-Heavy Encumbrance when they travel.

Your magnificent mansion is the size of a small mansion (or the equivalent of the best Status 4 dwelling in your campaign setting) but has no other features. It does not, for instance, have furniture, light fixtures, etc. It *does* have a breathable atmosphere and takes whatever shape you initially desire, but from that point onward is fixed. For instance, you could have a pocket dimension that actually looks like a small bedroom or a cave.

Whenever anyone attempts to enter your magnificent mansion without your permission, you can roll a Quick Contest of your Will (plus any levels of Talent) vs. your opponent's Will. If you win or tie, his attempt to enter fails and he cannot try again for 1d hours – if you critically succeeded, this becomes 1d days and he loses 1d FP! If you lose, he can enter normally; if you critically failed, you are also left reeling (mentally stunned) as he breaks through your dimensional barriers.

To create an entrance, you must visualize your destination, concentrate for 10 seconds, and make a IQ roll. You may hurry the creation, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, the entrance appears leading to your magnificent mansion. On a failure, the entrance does not appear. On a critical failure, the entrance opens, but leads to the wrong destination, which can be any plane the GM wishes!

Statistics: Jumper (Pocket Dimension; Access Regulation, +25%; Extra Carrying Capacity, Extra-Heavy, +50%; Gyroscopic, +10%; Improved, +10%; Larger Size 6, +60%; Magical, -10%; Tunnel, Before, +100%) [345].

Major Healing

Keywords: None.

Full Cost: 45 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By making physical contact with a subject, you may immediately heal him 2d HP. This also automatically stops any bleeding. You may heal subjects of your own race and any "similar" races (GM's call); e.g., a human can heal other humans but not dogs or plants.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Affects Self, +50%; Cannot restore crippled limbs, -10%; Capped, 4 FP, -20%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 3, +60%) [45]. *Note:* The 8 HP of healing has been converted to dice per p. B269.

Maker's Call

Keywords: Resisted (Will).

Full Cost: 160 points.

Casting Roll: Will. IQ to teleport. Special casting cost.

Range: Unlimited.

Duration: Instantaneous.

This spell can be used to teleport a creature summoned by the caster into a hex adjacent to the caster. If the subject fails to resist (this resistance roll is usually waived), the caster may try an immediate IQ roll to teleport the subject as if using the Warp advantage (p. B97). The caster can send the subject and his gear up to his Extra-Heavy encumbrance to himself and can cancel range modifiers by spending his own FP.

Statistics: Affliction 1 (Will; Accessibility, Only on creatures summoned by the caster, -80%; Advantage, Maker's Call, +1,400%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [160]. *Notes:* "Maker's Call" is Warp (Anchored, The caster, -60%; Extra Carrying Capacity, Extra-Heavy, +50%; Reliable 10, +50%) [140]. The +10 for Reliable cancels the -10 for no preparation.

Malefice

Keywords: Buff.

Full Cost: 48 points.

Casting Roll: None. Special casting time and cost (see text).

Range: Touch.

Duration: Permanent.

This spell must be cast on a doll the caster fashioned with something personally relevant to the target imbedded in it. The casting of Malefice is a ritualistic process that takes 8 hours of uninterrupted concentration and requires the caster to spend one character point. The doll can be used by its maker (and no one else) to cast harmful Resisted spells that are normally cast at a distance with the normal range penalties (such as Frailty or Agony) on the target while ignoring distance penalties. The caster must hold the doll in his hand while casting said spells. The target resists normally.

Parts of the target's body (hair, nail clipping, blood, etc.) imbedded in the doll allow casting with no penalty. Other items impose a penalty; for example, threads from a shirt worn for years might be worth -2, dirt from a fresh footprint might be worth -6.

If the victim resists the very first spell cast upon him through the doll, the enchantment is immediately broken. Otherwise, every successful resistance simply weakens the Malefice, imposing a cumulative -1 penalty to all further castings made through it. This penalty never dissipates, but the doll

can be reenchanting. A critical failure by the channeled spell or a critical success by the subject also breaks the enchantment.

Destroying the doll breaks the spell, but it also makes the target resist with his HT against the caster's Will in a Quick Contest. If the caster wins, the target takes 3d toxic injury, ignoring DR. Remove Curse frees the target from the Malefice without harm to him.

Statistics: Affliction 1 (HT; Accessibility, Only on dolls fashioned with something personally relevant to the person the doll is depicting, -60%; Advantage, Malefice, +2,300%; Costs 1 character point, x1/5; Extended Duration, Permanent, +150%; Immediate Preparation Required, 8 hours, -90%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%; Terminal Condition, Remove Curse or successful first resistance or critical failure/success, -10%) [48]. *Notes:* "Malefice" is Cosmic Power 100 (Accessibility, Only for the caster and only one target, -80%; Accessibility, Only to improve Malediction 2 to Malediction 4 or give Long-Range 2 to harmful spells, -80%; Magical, -10%; Nuisance Effect, Cumulative penalties, -10%) [200] + Toxic Attack 3d (Accessibility, Only the target, -80%; Magical, -10%; Malediction 4, +250%; Trigger, Destruction of the doll, -15%) [30]. The most expensive advantage that could serve as a base for an appropriate spell is Possession that costs 100 points. With Ranged, +40%, it uses the normal range penalties. Giving it Long-Range 2, +100% would require 100 points, hence the 100 points of Cosmic Power.

Malfunction

Keywords: Resisted (HT).

Full Cost: 30 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 1 minute.

The caster must touch the subject. If the subject machine fails to resist, it ceases to function (treat this as being paralyzed p. B428) for one minute (an airplane falls, a sensor is "blind," and so on). After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Accessibility, Machines Only, -20%; Melee Attack, Reach C, -30%; Malediction 1, +100%; No Signature, +20%; Paralysis, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [30].

Mammal Control

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single mammal – or of one square yard of a swarm of smaller mammals. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only mammals with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for mammals with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Mammals only, -40%; Sorcery, -15%) [23].

Mana Leech

Keywords: Weapon Buff.

Full Cost: 84 points for level 1 + 40 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell infuses a melee weapon with mana-draining properties. This converts the injury the wielder inflicts with the weapon into a “mana drain” that can “heal” his own Energy Reserve (Magic). For every *full* 3 HP of injury the weapon inflicts on a *living* victim, the wielder heals 1 ER (Magic). He can’t raise his ER (Magic) above normal. The draining rate increases with the spell level

Level	Drain
1	1 ER (Magic) per full 3 HP of injury
2	1 ER (Magic) per full 2 HP of injury
3	1 ER (Magic) per 1 HP of injury

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Mana Leech, +740%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [84]. *Notes:* “Mana Leech” is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11) + a bought off -5 penalty [+40]. Each additional level removes -5 in penalties [+40]. This spell is based on the Vampiric Weapon imbuelement skill.

Mana Storm

Keywords: Area (Fixed), Resisted (Will).

Full Cost: 74 points.

Casting Roll: Will (against subjects with Magic Resistance, see below). Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds (Magic Resistance loss lasts 30 seconds, see below).

This spell fills a 4-yard-radius area with intense magical fluctuations that tear away at the magical essence of anything that has an “aura.” To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. Every living, undead, or animated by a spirit creature with IQ 1+ has an aura and is affected. This spell does not affect inanimate beings, illusions, creations, and creatures with IQ 0.

Every second, such creatures in the area take 1 point of injury regardless of their DR. However, if a subject has Magic Resistance (p. B67) (even with the Improved enhancement), the caster must roll a Quick Contest of Will with it. If the caster wins, the subject loses one level of Magic Resistance for 30 seconds. This effect is *cumulative*, and when the subject runs out of Magic Resistance, they begin taking damage from this spell normally.

Statistics: Affliction 1 (Will; Accessibility, Only on beings with an aura, -5%; Area Effect, 4 yards, +100%; Based on Will, +20%; Cumulative, +400%; Fixed Duration, +0%; Link, +10%; Negated Advantage, Magic Resistance 1 (Improved), +5%; Persistent, +40%; Reduced Duration on Disadvantage, 1/6, -15%; Sorcery, -15%) [64] + Crushing Attack 1 point (Accessibility, Only on beings with an aura and no Magic Resistance, -10%; Area Effect, 4 yards, +100%; Cosmic, Irresistible Attack, +300%; Link, +10%; Magical, -10%; No Blunt Trauma, -20%; No Knockback, -10%; Persistent, +40%) [10]. *Note:* This spell originally appeared in *GURPS Magic: Artillery Spells*.

Mana Vortex

Keywords: Resisted (the higher of HT or Will).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell causes ambient mana to swirl around and harm the subject. The subject resists with the *higher* or HT or Will – and anyone with Sorcery Talent or Magery may add that to their resistance roll. If the subject fails to resist, they take damage equal to the caster's margin of victory (maximum 10 points).

Statistics: Crushing Attack 10 points (Based on HT, +20%; Damage cannot exceed margin of victory, -50%; Malediction 2, +150%; No Signature, +20%; No Knockback, -10%; Nuisance Effect, Multiple ways to resist, -10%; Sorcery, -15%) [27]. *Note:* This spell originally appeared in *GURPS Magical Styles: Dungeon Magic*.

Manipulate

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can manipulate objects without touching them. You manipulate distant objects just as if you were grasping them in a pair of hands with ST equal to your Manipulation level. You *cannot* move objects. Regardless of level, maximum range is 10 yards.

Manipulation requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Manipulation may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pull a level, etc.

No rolls are necessary for ordinary manipulations. In situations where you would roll against ST, roll against your Manipulation level instead.

Statistics: Telekinesis 1 (Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; Lift Only, -20%; Sorcery, -15%) [2/level].

Manipulate DNA

Keywords: None.

Full Cost: 18 points.

Casting Roll: IQ or Bioengineering (Generic Engineering).

Range: 100 yards.

Duration: Indefinite.

The caster can magically splice genes and manipulate DNA to produce specific traits. This spell allows him to work with improvised facilities (for example, a kitchen) at a -10 "lab quality" penalty.

Statistics: Control DNA 1 (Accessibility, Only to splice genes and manipulate DNA, -35%; Ranged, +40%; Sorcery, -15%) [18].

Mantle of the Icy Soul

Keywords: Buff.

Full Cost: 66 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject becomes very resistant to cold, but also vulnerable to fire. They and all of their gear have DR 20 against cold and ice – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible cold effects other than damage (e.g., a spell that freezes the flesh to grant the subject Brittle) simply fail, as though the subject had successfully resisted. This spell does *not* grant the subject Temperature Tolerance. However, the subject also gains Vulnerability (Fire, x2) (p. B161).

Statistics: Affliction 1 (HT; Advantage, Mantle of the Icy Soul, +500%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [66]. *Notes:* "Mantle of the Icy Soul" is Damage Resistance 20 (Force Field, +20%; Limited, Cold/Ice, -40%; Magical, -10%; Temporary Disadvantage, Vulnerability (Fire, x2), -30%) [40] + Immunity to Noxious Cold Effects (Magical, -10%; Temporary Disadvantage, Vulnerability (Fire, x2), -30%) [6] + Internal Damage Resistance 20 (Limited, Cold/Ice, -40%; Magical, -10%; Temporary Disadvantage, Vulnerability (Fire, x2), -30%) [4]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Mapmaker

Keywords: None.

Full Cost: 14 points.

Casting Roll: IQ-5 or Cartography.

Range: 10 yards.

Duration: Instantaneous.

When cast on a scroll or any other writing surface (including a previously unfinished map), this spell creates a map of what the scroll's holder perceives. The caster must declare the scale used for the map, which way is north, the spot on the scroll where mapping begins and which features are to appear on the map.

Statistics: Telekinesis 1 (Accessibility, Requires paper, -10%; Independent, +40%; One Task, Mapping, -70%; Reduced Time 10, +200%; Sorcery, -15%) [13] + Accessory (TK Pen) [1]. *Note:* Here, Reduced Time is used to shorten a 10-minute mapping to one second, which was chosen because it costs the same as an Average technique to buy off the -10 for "instant use."

Mark of Thieves

Keywords: Resisted (Will).

Full Cost: 37 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 6 days.

The caster must touch the victim face to cast this spell. Dozens of small boils appear on the victim's palms and the soles of his feet. These burst at the slightest pressure, releasing a disgusting, slippery ichor. The victim gains Bad Grip 1 unless he wears gloves, and reduced Move (-20%, rounded down) unless he wears footwear. Unfortunately, wearing anything but loose bandages is painful (severe pain, p. B428): make a Will roll each hour to keep from removing more substantial coverings. The ooze hardens and ruins gloves and footwear after a day of use.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Bad Grip 1, +5%; Extended Duration, 3,000x, +140%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Severe Pain, Only when wearing clothes over the boils, +20%; Slower Move, 0.8x, +10%; Sorcery, -15%) [37].

Mask Heat

Keywords: Buff.

Full Cost: 20 points or 50 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Heat emanated by the subject and all of his carried equipment becomes masked, letting the subject blend in with the surrounding for the duration of the spell when viewed with Infravision. The basic version (20-point) of this spell gives a -2 penalty to Vision rolls to see the subject with Infravision and -2 penalty to attacks against the subject that rely on Infravision. This is usually enough for normal situations, where a living being stands out from the thermal background. The improved version (50-

point) of this spell makes the subject completely invisible to Infravision, which is enough to even negate the +10 bonus to spot a living creature in a cave that is in thermal equilibrium.

Statistics: Affliction 1 (HT; Advantage, Mask Heat, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. The improved version replaces Mask Heat with Improved Mask Heat [+30]. *Note:* “Mask Heat” is Obscure 2 (Infravision; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [8]. “Improved Mask Heat” is Obscure 10 (Infravision; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [38].

Mass Adept Spirit

Keywords: Area (Leveled), Buff, Incarnum.

Full Cost: 34 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell’s bonuses last for 3 minutes.

Cast on an area, this spell bestows souls of a great ancient spellcasters on the subjects in the area. The sorcerer may choose which subjects (either individually or by type) receive this effect. The soul lies dormant within each subject’s body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul’s wisdom grants the subject a +1 bonus to Occultism, Ritual Magic, Thaumatology, and Symbol Drawing. The caster may pay an additional point of essentia during the casting to increase the bonuses provided to +2.

The caster can exclude any creatures from the effect. If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Adept Spirit, +50%; Advantage, Mass Adept Spirit (Accessibility, Costs 1 ER, -10%), +45%; Area Effect, 2 yards, +50%; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [34]. *Notes:* “Mass Adept Spirit” is Talent (Occultism, Ritual Magic, Thaumatology, Symbol Drawing; Magical, -10%) [5]. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Animal Spirit

Keywords: Area (Leveled), Buff, Incarnum.

Full Cost: 41 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell’s bonuses last for 3 minutes.

Cast on an area, this spell bestows a small portion of the soul-energy of the animal kingdom on the subjects in the area. The soul lies dormant within each subject’s body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul energy grants the subject a +1 bonus to Per and Night Vision 5. The caster may pay an additional point of essentia during the casting to increase the bonuses provided to +2 and Night Vision to 7.

The caster can exclude any creatures from the effect. If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Animal Spirit, +100%; Advantage, Mass Animal Spirit Bonus (Accessibility, Costs 1 ER, -10%), +65%; Area Effect, 2 yards, +50%; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [41]. *Notes:* “Mass Animal Spirit” is Per+1 (Magical, -10%) [5] + Night Vision 5 (Magical, -10%) [5]. “Mass Animal Spirit Bonus” is Per+1 (Magical, -10%) [5] + Night Vision 2 (Magical, -10%) [2]. Additional levels

add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Ant Haul

Keywords: Area (Leveled), Buff.
Full Cost: 29 points for level 1 + 5 points/additional level (or more).
Full Cost (KYOS): 36 points for level 1 + 5 points/additional level (or more).
Casting Roll: Will.
Range: 100 yards.
Duration: 30 minutes.

Cast on an area, this spell optimizes the musculature of creatures within for lifting, granting them Lifting ST (p. B65). If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the spell grants 2 levels of Lifting ST. More potent versions of this spell are available, as show below.

Lifting ST	Level 1 Cost	Level 1 Cost (KYOS)	Additional level cost
2	29 points	36 points	5 points/additional level
4	34 points	49 points	
6	40 points	61 points	
8	45 points	74 points	
10	50 points	86 points	

Statistics: Affliction 1 (HT; Advantage, Mass Ant Haul, +60%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [29]. *Note:* “Mass Ant Haul” is Lifting ST 2 (Magical, -10%) [6]. Variants increase Lifting ST by 2 [+5], by 4 [+11], by 6 [+16], or by 8 [+21]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Statistics (KYOS): Affliction 1 (HT; Advantage, Mass Ant Haul, +130%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [36]. *Note:* “Mass Ant Haul” is Lifting ST 2 (Magical, -10%) [13]. Variants increase Lifting ST by 2 [+13], by 4 [+25], by 6 [+38], or by 8 [+50]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Badger Paws

Keywords: Area (Leveled), Buff.
Full Cost: 26 points for level 1 + 5 points/additional level.
Casting Roll: Will. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 90 minutes.

Subjects can use their bare hands to dig as if equipped with a shovel. See *Digging* (p. B350) for speed.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantages, Mass Badger Paws, +10%; Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [26]. *Notes:* “Mass Badger Paws” is Burrower (Magical, -10%) [1]. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Bullet Protection

Keywords: Area (Leveled), Buff.

Full Cost: 32 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Cast on an area, this spell protects all creatures within from bullets. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject and all of his gear have DR 5 against bullets. This only affects firearm bullets, granting no protection against laser beams, sling bullets, bullets flung by telekinesis, etc. If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules *for Large-Area Injury* (p. B400).

By default, the DR equals to 5. More potent versions of this spell are available, as show below.

D R	Full Cost
6	32 points for level 1 + 5 points/additional level
12	41 points for level 1 + 5 points/additional level
18	50 points for level 1 + 5 points/additional level
24	59 points for level 1 + 5 points/additional level
30	68 points for level 1 + 5 points/additional level
36	77 points for level 1 + 5 points/additional level
42	86 points for level 1 + 5 points/additional level
48	95 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantage, Mass Bullet Protection 1, +90%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [32]. *Notes:* "Mass Bullet Protection 1" is Damage Resistance 6 (Force Field, +20%; Limited, Firearm Bullets, -80%; Magical, -10%) [9]. Additional levels add Area Effect (+50%) [+5]. Variants increase DR by 6 [+9]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Bullet Shield

Keywords: Area (Leveled), Buff.

Full Cost: 28 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Cast on an area, this spell protects all creatures within from bullets, but *only from the front*. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject and all of his gear have DR 5 against bullets. This only affects firearm bullets, granting no protection against laser beams, sling bullets, bullets flung by telekinesis, etc. If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules *for Large-Area Injury* (p. B400).

By default, the DR equals to 5. More potent versions of this spell are available, as show below.

D R	Full Cost
5	28 points for level 1 + 5 points/additional level
10	33 points for level 1 + 5 points/additional level
15	38 points for level 1 + 5 points/additional level
20	43 points for level 1 + 5 points/additional level
25	48 points for level 1 + 5 points/additional level

30	53 points for level 1 + 5 points/additional level
35	58 points for level 1 + 5 points/additional level
40	63 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantage, Mass Bullet Shield 1, +50%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [28]. *Notes:* “Mass Bullet Shield 1” is Damage Resistance 5 (Directional, Front, -20%; Force Field, +20%; Limited, Firearm Bullets, -80%; Magical, -10%) [5]. Additional levels add Area Effect (+50%) [+5]. Variants increase DR by 5 [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Charm

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 108 points for level 1 + 25 points/additional level.

Casting Roll: IQ.

Range: Unlimited.

Duration: 3 minutes.

You can charm sapient subjects in a visible area. To use this ability, concentrate for one second and then roll a Quick Contest: your IQ vs. Will of each of the subjects, applying the range penalties to the subjects (p. B550).

If you win, your charmed subject will obey your every command for 3 minutes. In effect, he temporarily gains the Reprogrammable disadvantage (p. B150), with you as his master. You do not have to maintain concentration to control the subject. All subjects feel the *same* influence. While individually loyal, they can be given collective commands only.

If you attempt to force the subjects to act against their principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the subject wins, it breaks free. Roll at the moment of truth – you can march him to the edge of a cliff, but it doesn’t roll until it’s about to leap.

If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Independent, +70%; Selective Area, +20%; Sorcery, -15%) [108]. Additional levels add Area Effect (+50%) [+25].

Mass Coolness

Keywords: Area (Leveled), Buff.

Full Cost: 36 points for level 1 + 5 points/additional level.

Casting Roll: Will. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five hours.

When cast on an area, this spell keeps the subjects cool. In game terms, it raises their threshold for Heat (p. B434) – which is 80°F for most humans – by (HTx10)°F. This allows an average HT 10 human to be comfortable up to 180°F. This protection does not prevent sunburn and cannot shield against heat-based attacks; it affects only the ambient temperature. The caster can omit any subjects from the effect.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Coolness, +90%; Area Effect, 2 yards, +50%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [36]. *Notes:* “Mass Coolness” is Temperature Tolerance 10 (Magical, -10%) [9], applied to the upper limit. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Daze

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 39 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

Creatures in the area are dazed for 3 minutes. If a subject is standing, he remains upright, but can do nothing. If the subject is struck, slapped, or shaken, he recovers on his next turn. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover. You can omit any creatures from the effect. This spell can only affect sapient (IQ 6+) creatures.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient creatures, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Daze, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [39]. Additional levels add Area Effect (+50%) [+5].

Mass Distortion

Keywords: Resisted (HT).

Full Cost: 54 points for level 1 + 27 points/additional level.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

The caster drastically increases the subject's mass for a moment without strengthening its bones. The subject takes 2d crushing damage with No Knockback and No Blunt Trauma modifiers per level of this spell. DR does not protect.

In addition, the subject immediately falls over, as if his legs (or equivalent) just gave out on him. He may begin getting back up on his very next turn. If flying, he spends one second losing altitude; assume he drops five yards multiplied by local gravity in Gs unless more detailed rules are available. If this is not enough to make him crash, he regains control next turn.

Statistics: Crushing Attack 2d (Accessibility, Only on creatures with bones, -25%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Link, +10%; Malediction 2, +150%; No Knockback, -10%; No Signature, +20%; Sorcery, -15%) [27/level] + Affliction 1 (HT; Accessibility, Legs and similar supportive body parts only, -20%; Accessibility, Only on creatures with bones, -25%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Malediction 2, +150%; No fatigue loss from Seizure, -20%; No Signature, +20%; Seizure, +100%; Reduced Duration, 1/180, -40%) [27].

Mass Guardian Spirit

Keywords: Area (Leveled), Buff, Incarnum.

Full Cost: 65 points for level 1 + 5 points/additional level.

Casting Roll: Will. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell's bonuses last for 3 minutes.

Cast on an area, this spell bestows prescient unborn souls on the subjects. The soul lies dormant within each subject's body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul's prescience grants the subject a +1 bonus to all active defenses. The caster may pay 1 additional point of essentia during the casting to make the bestowed soul additionally grant the subject the Danger Sense (p. B47) advantage.

The caster can omit any subjects from the effect. If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Guardian Spirit, +270%; Advantage, Mass Guardian Spirit Bonus (Accessibility, Costs 1 ER, -10%), +135%; Area Effect, 2 yards, +50%; Delay, Triggered, +50%;

Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [65]. *Notes:* “Mass Guardian Spirit” is Defense Bonus 1 (Magical, -10%) [27]. “Mass Guardian Spirit Bonus” is Danger Sense (Magical, -10%) [14]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Hallucination

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

Sapient subjects in the area hallucinate (p. B429) for 1 minute. After that each subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Fixed Duration, +0%; Hallucinating, +50%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Mass Inflict Pain

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 39 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

Sapient subjects in the area have their minds wracked with pain for 1 minute. Each subject must make a Will roll to avoid crying out. They have a -6 penalty to all DX, IQ, skill, and self-control rolls. High Pain Threshold halves these penalties; Low Pain Threshold doubles them. The caster can decrease the pain penalties to -4 or -2 when casting the spell. The caster can omit any creatures from the effect.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Selective Area, +20%; Sorcery, -15%; Terrible Pain, +60%; Variable, +5%) [39]. Additional levels add Area Effect (+50%) [+5].

Mass Invisibility

Keywords: Area (Leveled), Buff.

Full Cost: 91 points for level 1 + 5 points/additional level or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You make the subjects in an area invisible. You may exclude any subjects from this effect. The subjects still make noise, leave footprints, and has a scent – and anything the subjects are carrying (up to the Medium encumbrance) becomes invisible too. The subjects get a +9 to Stealth in any situation where being seen would matter, if they are carrying no more than their Medium encumbrance.

Individuals using paranormal remote viewing (crystal balls, Clairvoyance, etc.) cannot see the subjects if the subjects would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see the subjects.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). The subjects do not cast shadows and do not show up in mirrors.

The basic (90-point) version of this spell affects subjects in a two-yard radius and ends if the subject attacks any creature. For each additional 5 points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a

lesser area. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If the subject attacks directly, however, it immediately becomes visible along with all its gear. The improved (98-point) version of this spell eliminates this limitation.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Version	2 yards	4 yards	8 yards	16 yards	x2
Basic	91 points	96 points	101 points	106 points	+5/level
Improved	99 points	104 points	109 points	114 points	+5/level

Statistics: Affliction 1 (HT; Advantage, Invisibility, +680%; Area Effect, 2 yards, +50%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [91]. *Notes:* "Invisibility" is Invisibility (Affects Machines, +50%; Can Carry Objects, Medium, +50%; Dispels after an attack, -20%; Magical, -10%) [68]. The improved version removes the Dispels after an attack limitation from the advantage [+8]. The additional levels add more levels of Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Mutilation

Keywords: Area (Leveled), Resisted (Will; special).

Full Cost: 43 points for level 1 + 25 points/additional level.

Casting Roll: IQ.

Range: Unlimited.

Duration: 1 second.

Sapient subjects who fail to resist (a subject must lose *two* resistance contests) must use their next combat maneuver to try to harm themselves. Subjects with suitable ready weapons take Attack or Ready maneuvers to use these on themselves. The GM decides what's "suitable" in the space of a turn. It's plausible to cut oneself with a blade, shoot oneself with a gun or crossbow, arm a grenade and hold on to it.

If a suitable weapon is to hand, skip attack and defense rolls; just roll damage against the torso. Attacks must use the deadliest attack mode, if there's a choice (GM's decision, remembering that the target is the torso) – and no "pulling punches." Anyone who can Fast-Draw a weapon (or a better weapon) does so; e.g., a barehanded fighter with a knife Fast-Draws it and starts cutting, while someone holding a knife and wearing a sheathed sword drops the knife, Fast-Draws the sword, and falls on that.

Subjects without suitable weapons do something else that's liable to get them killed. They might use Move to run as close as possible to the nearest enemy; if several foes are equidistant, choose one at random. If a hazard – lava pit, cliff, persistent artillery spell, etc. – is closer, they'll hurl themselves at that instead. In either case, they choose to let their guard down: no active defenses, DX rolls not to fall in, or anything similar.

If you tie or lose, the subjects can sense coercion coming from you. In addition, you cannot try to affect them again within 24 hours.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to harm self, -30%; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Independent, +70%; Reduced Duration, 1/180, -40%; Sorcery, -15%; Suggestion, -40%) [43]. Additional levels add Area Effect (+50%) [+25].

Mass Resist Acid

Keywords: Area (Leveled), Buff.

Full Cost: 81 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will.
Range: 100 yards.
Duration: 30 minutes.

Cast on an area, this spell protects all creatures within from acid. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject becomes virtually immune to acid. He and all of his gear have DR 10 against acid – including not only Missile and Jet spells, but also to ingested acid and spells that bypass normal DR to cause direct, internal damage. Resistible acidic effects other than damage (e.g., a spell to inflict heartburn) simply fail, as though the subject had successfully resisted. In addition, all of his DR (from this spell, his armor, tough hide, etc.) is immune to being eroded away by acid.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the DR equals to 10. More potent versions of this spell are available, as show below.

D R	Full Cost
10	81 points for level 1 + 5 points/additional level
20	121 points for level 1 + 5 points/additional level
30	161 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantage, Mass Resist Acid 1, +580%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [81]. Additional levels add further Resist Acid to Advantage (+400%) [+40]. *Notes:* "Mass Resist Acid 1" is Damage Resistance 10 (Force Field, +20%; Limited, Acid, -40%; Magical, -10%) [35] + Immunity to Noxious Acidic Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Acid, -40%; Magical, -10%) [5] + Internal Sealed (Acid-Resistant Only, below, -60%; Magical, -10%) [1] + Sealed (Acid-Resistant Only, below, -60%; Force Field, +20%; Magical, -10%) [8]. Additional levels add Area Effect (+50%) [+5]. Variants increase both DRs by 10 [+40]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Cold

Keywords: Area (Leveled), Buff.

Full Cost: 72 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will.

Range: 100 yards.

Duration: 30 minutes.

Cast on an area, this spell protects all creatures within from cold. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject becomes virtually immune to cold. He and all of his gear have DR 10 against cold – including not only Missile and Jet spells, but also to ingested cold and spells that bypass normal DR to cause direct, internal damage. Resistible cold effects other than damage simply fail, as though the subject had successfully resisted.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the DR equals to 10. More potent versions of this spell are available, as show below.

D R	Full Cost
10	72 points for level 1 + 5 points/additional level
20	112 points for level 1 + 5 points/additional level
30	152 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantage, Mass Resist Cold 1, +490%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%;

Selective Area, +20%; Sorcery, -15%) [86]. *Notes:* “Mass Resist Cold 1” is Damage Resistance 10 (Force Field, +20%; Limited, Cold, -40%; Magical, -10%) [35] + Immunity to Noxious Cold Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Cold, -40%; Magical, -10%) [5]. Additional levels add Area Effect (+50%) [+5]. Variants increase both DRs by 10 [+40]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Disease

Keywords: Area (Leveled), Buff.

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: 100 yards.

Duration: 15 hours.

Cast on an area, this spell protects all creatures within from disease. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject becomes completely immune to diseases for the duration of the spell. He cannot catch new diseases. Existing ones don’t disappear, but their symptoms are suppressed and the duration does count toward a disease’s cycles (consider any mandatory HT rolls to be successful). Recasting this spell enough times lets the subject wait out a temporary illness!

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Resist Disease, +90%; Area Effect, 2 yards, +50%; Extended Duration, 300x, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [38]. *Notes:* “Mass Resist Disease” is Immunity to Disease (Magical, -10%) [9]. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Earth

Keywords: Area (Leveled), Buff.

Full Cost: 72 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will.

Range: 100 yards.

Duration: 30 minutes.

Cast on an area, this spell protects all creatures within from earth and stone. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject becomes resistant to damage dealt by earth and stone. He and all of his gear have DR 10 against earth and stone – including not only Missile and Jet spells, but also to spells that bypass normal DR to cause direct, internal damage. Resistible earth effects other than damage simply fail, as though the subject had successfully resisted.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the DR equals to 10. More potent versions of this spell are available, as show below.

D R	Full Cost
10	72 points for level 1 + 5 points/additional level
20	112 points for level 1 + 5 points/additional level
30	152 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantage, Mass Resist Earth 1, +490%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [86]. *Notes:* “Mass Resist Earth 1” is Damage Resistance 10 (Force Field, +20%; Limited, Earth/Stone, -40%; Magical, -10%) [35] + Immunity to Noxious Earth Effects

(Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Earth/Stone, -40%; Magical, -10%) [5]. Additional levels add Area Effect (+50%) [+5]. Variants increase both DRs by 10 [+40]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Fire

Keywords: Area (Leveled), Buff.

Full Cost: 72 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will.

Range: 100 yards.

Duration: 30 minutes.

Cast on an area, this spell protects all creatures within from fire. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject becomes virtually immune to fire. He and all of his gear have DR 10 against fire and heat – including not only Missile and Jet spells, but also to ingested fire and spells that bypass normal DR to cause direct, internal damage. Resistible fire effects other than damage simply fail, as though the subject had successfully resisted.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the DR equals to 10. More potent versions of this spell are available, as show below.

D R	Full Cost
10	72 points for level 1 + 5 points/additional level
20	112 points for level 1 + 5 points/additional level
30	152 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantage, Mass Resist Fire 1, +490%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [72]. *Notes:* "Mass Resist Fire 1" is Damage Resistance 10 (Force Field, +20%; Limited, Heat/Fire, -40%; Magical, -10%) [35] + Immunity to Noxious Fire Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Heat/Fire, -40%; Magical, -10%) [5]. Additional levels add Area Effect (+50%) [+5]. Variants increase both DRs by 10 [+40]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Lightning

Keywords: Area (Leveled), Buff.

Full Cost: 78 points for level 1 + 5 points/additional level (or more).

Casting Roll: Will.

Range: 100 yards.

Duration: 30 minutes.

Cast on an area, this spell protects all creatures within from electricity. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject becomes virtually immune to electricity. He and all of his gear have DR 10 against electricity – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible electric effects other than damage (e.g., psionic Confuse to stun him) simply fail, as though the subject had successfully resisted. In addition, all of his DR is considered nonmetallic and nonconductive for the purpose of resisting electrical penetration, and none of his gear can be "shorted out" by electricity.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the DR equals to 10. More potent versions of this spell are available, as show below.

D	Full Cost

20	118 points for level 1 + 5 points/additional level
30	158 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Advantage, Mass Resist Lightning 1, +550%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [78]. Additional levels add further Resist Lightning to Advantage (+400%) [+40]. *Notes:* “Mass Resist Lightning 1” is Damage Resistance 10 (Force Field, +20%; Limited, Electricity, -40%; Magical, -10%) [35] + Immunity to Electrical Conduction (Force Field, +20%; Magical, -10%) [6] + Immunity to Noxious Electrical Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Electricity, -40%; Magical, -10%) [5]. “Immunity to Electrical Conduction” protects implants like cybernetics from being surged by electricity; adding Force Field extends this to carried gear and prevents metallic armor from being reduced to DR 1 against an electrical attack. Additional levels add Area Effect (+50%) [+5]. Variants increase both DRs by 10 [+40]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Poison

Keywords: Area (Leveled), Buff.

Full Cost: 43 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: 100 yards.

Duration: 15 hours.

Cast on an area, this spell protects all creatures within from poison. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject becomes immune to poison for as long as the spell lasts. If he already has some in his veins, it temporarily stops killing him but does not vanish. However, this spell’s duration does count toward the poison’s normal lifespan and any required resistance rolls are considered successful, which may allow the subject to outlast a fast-cycling venom.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Resist Poison, +140%; Area Effect, 2 yards, +50%; Extended Duration, 300x, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [43]. *Notes:* “Mass Resist Poison” is Immunity to Poison (Magical, -10%) [14]. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Pressure

Keywords: Area (Leveled), Buff.

Full Cost: 37 points for level 1 (or 48 points for level 1) + 5 points/additional level.

Casting Roll: Will.

Range: 100 yards.

Duration: 15 hours.

Cast on an area, this spell protects all creatures within from pressure. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject and all his gear are protected from the effects of high or low pressure. When casting, the sorcerer must decide whether to grant the subject Pressure Support (p. B77) or Vacuum Support (p. B96). This does not allow the subject to breathe in such environments; other spells or abilities are needed for that!

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

The basic (37-point) version of this spell grants up to Pressure Support 1. The improved (48-point) version raises the potential limit to Pressure Support 3. Either spell grants standard Vacuum Support.

Statistics: Affliction 1 (HT; Alternative Enhancements, See Notes, +72%; Area Effect, 2 yards, +50%; Extended Duration, 300x, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [37]. The improved version raises Alternative Enhancements to +182% [+11]. *Notes:* The Alternative Enhancements are “Advantage, Pressure Support 1 (Force Field, +20%; Magical, -10%), +60%” and “Advantage, Vacuum Support (Force Field, +20%; Magical, -10%), +60%.” The improved version raises Pressure Support to 3 (+170%) but leaves Vacuum Support as is. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Resist Water

Keywords: Area (Leveled), Buff.

Full Cost: 39 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: 100 yards.

Duration: 30 minutes.

Cast on an area, this spell protects everyone within from water. The sorcerer may choose which subjects (either individually or by type) receive the protection. Every protected subject (person, creature, or object) and anything carried – or stored within, for a container – is encased in a field which repels water and water-based liquids. He or it cannot become damp or waterlogged, remaining dry even when submerged. (A living subject would require other spells or abilities to breathe, resist pressure, etc., however!) Someone could even throw (water-based) paint on the subject and it would simply slough off with no effect.

This does not protect against the effects of freezing cold, scalding steam, and so on! It offers no resistance against ice missiles, geyser blasts, or most other attacks. However, the water resistance does offer some small defense against acid: you get +2 DR versus such attacks, and all of your DR is immune to being eroded away by acid.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer’s casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Resist Water, +160%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [39]. *Notes:* “Mass Resist Water” is Damage Resistance 2 (Force Field, +20%; Limited, Acid, -40%; Magical, -10%) [7] + Sealed (Acid-Resistant and Waterproof Only, -50%; Force Field, +20%; Magical, -10%) [9]. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Sense

Keywords: Buff.

Full Cost: 47 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One minute.

The subject becomes able to sense matter by its gravitational mass. They are able to navigate the surroundings, but a Sense roll will let them notice something significant. Unlike vision, Mass Sense is at -1 per yard. The subject automatically knows mass and direction to objects, and an IQ roll will let them determine density or notice a pattern. The subject cannot “turn off” Mass Sense.

Statistics: Affliction 1 (HT; Advantage, Mass Sense, +360%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [47]. *Note:* “Mass Sense” is Detect Matter (Magical, -10%; Reflexive, +40%; Short-Range 1, -10%) [36].

Mass Shade

Keywords: Area (Leveled), Buff.

Full Cost: 28 points for level 1 + 5 points/additional level.

Casting Roll: Will. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 90 minutes.

When cast on an area, this spell provides the subjects with modest shade. This prevents sunburn and reduces effective temperature by 10°F when sunlight is a significant source of heat. It also reduces Vision penalties for glare by -1 and provides +1 to HT rolls to resist flashes, dazzle lasers, etc. The caster can omit any subjects from the effect.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantages, Mass Shade, +30%; Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [28]. *Notes:* "Mass Shade" is Immunity to Sunburn (Magical, -10%) [1] + Robust Vision (Magical, -10%) [1] + Temperature Tolerance 1 (Hot; Magical, -10%) [1]. Temperature Tolerance reduces heat by a flat 10°F rather than being based on HT. Additional levels add Area Effect (+50%) [+5]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Sleep

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 48 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

Creatures in the area fall asleep for 3 minutes, if they fail to resist. After this, they can be woken normally, but they will not necessarily wake up right away, especially if already tired. Upon waking up, each subject is stunned (p. B420) and may roll vs. Will once per second to recover. You can omit any creatures from the effect. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Area, +20%; Sleep, +150%; Sorcery, -15%) [48]. Additional levels add Area Effect (+50%) [+5].

Mass Suggestion

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 98 points for level 1 + 25 points/additional level.

Casting Roll: IQ.

Range: Unlimited.

Duration: 9 minutes.

You can send silent telepathic commands to sapient subjects in an area. You can give him a simple command to all subjects that failed to resist; see the Suggest skill (p. B191) for guidelines. Any order that goes against a subject's values or sense of self-preservation triggers another resistance roll, possibly at a bonus. The suggestion only lasts as long as the spell lasts. You can only give the same command to the whole group.

The subjects remembers everything they did, but they are convinced that they chose to do so. They will react to behavior too bizarre to be rationalized by pushing it out of their mind and not thinking about it. Hypnotism, Psychology, and Telepathy can be used to eventually bring out the truth.

If you tie or lose, the subjects can sense coercion coming from you. In addition, you cannot try to affect them again within 24 hours.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Area Effect, 2 yards, +50%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Independent, +70%; Rationalization, +20%; Sorcery, -15%; Suggestion, -40%) [98]. Additional levels add Area Effect (+50%) [+25].

Mass Valiant Spirit

Keywords: Area (Leveled), Buff, Incarnum.

Full Cost: 62 points for level 1 + 5 points/additional level.

Casting Roll: Will. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell's bonuses last for 3 minutes.

Cast on an area, this spell bestows souls of ancient heroes on the subjects. The soul lies dormant within each subject's body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul's prescience grants the subject a +1 bonus to DX and Fearlessness 1 (p. B55). The caster may pay 1 additional point of essentia during the casting to increase the bonus to DX to +2 and the level of Fearlessness to 2.

The caster can omit any subjects from the effect. If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

Statistics: Affliction 1 (HT; Advantage, Mass Valiant Spirit, +200%; Advantage, Mass Valiant Spirit (Accessibility, Costs 1 ER, -10%), +180%; Area Effect, 2 yards, +50%; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [62]. *Notes:* "Mass Valiant Spirit" is DX+1 (Magical, -10%) [18] + Fearlessness 1 (Magical, -10%) [2]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Mass Zombie

Keywords: None.

Full Cost: 10/14/17/20 points for levels 1-4, +10 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite, see text.

The caster animates corpses in an area with a radius equal to (spell level²)*10 yards. The nature and condition of the corpse in question determines the nature of the undead creature produced. An animated corpse becomes an undead servant of the caster. The zombies can only be commanded as a group; individual members of the horde cannot be given separate tasks. The caster has a cap on the number of undead creatures under his control.

Spell Level	Maximum Horde Size	Spell Cost
1	10	10
2	20	14
3	50	17
4	100	20
+1	x10	+10

If the undead horde is destroyed, the summoner must wait a full day to call replacements. Dismissing the undead is a free action, but you may only dismiss him if he is physically present. A zombie's point value should not be higher than 5% of the summoner's point value.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Zombie Horde; Built on 5%; Group Size, 6-10; Constantly, no roll required; Accessibility, Group Control Only, -15%; Adjustable, Small Class, Cannot provide information, +50%; Conjured, +100%; Magical, -10%; Minion, +0%; Requires bodies, -20%) [10]. Additional levels increase the maximum ally group size, as per p. B37.

Master

Keywords: Resisted (Will).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

Holds any beast motionless and quiet as long as the caster maintains eye contact and concentration, up to the spell's duration. If the subject is struck, slapped, or shaken, they recover on their next turn. When the spell ends, the subject is stunned until they can make a Will roll (roll once per second).

Statistics: Affliction 1 (Will; Accessibility, Animals only, -25%; Based on Will, +20%; Daze, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Have to maintain eye contact, -15%; Requires Concentrate, -15%; Sorcery, -15%; Vision-Based, -20%) [25].

Materialize

Keywords: Resisted (Will).

Full Cost: 32 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell temporarily makes an intangible being visible, if it is normally invisible to beings in the physical world.

Statistics: Affliction 1 (Will; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Invisibility (Substantial Only, -10%), +36%; No Signature, +20%; Sorcery, -15%) [32].

Mature

Keywords: Area (Leveled).

Full Cost: 47 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: 100 yards.

Duration: Two months.

All food in the area starts aging 10 times faster than normal for two months. Mages usually use Cancel Spells to stop the process.

To convert area of effect (in yards) to cubic yards, square the radius and multiply the result by 12.5. To convert to gallons, square the radius and multiply the result by 2,500 for liquids or 2,150 for powders.

Statistics: Affliction 1 (HT; Accessibility, Only on food, -40%; Advantage, Mature, +150%; Area Effect, 2 yards, +50%; Extended Duration, 30,000x, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [47]. Additional levels add Area Effect (+50%) [+5]. *Notes:* The DR subtracting from the casting roll rather than forcing a resistance roll (as for Buff spells) is a special effect. "Mature" is Unaging (Age Control, Only aging, +10%; Magical, -10%) [15].

Maw of the Earth

Keywords: Obvious.

Full Cost: 24 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent, until destroyed, or until the victim breaks free.

You cause a victim to be engulfed by the earth he is standing on (dirt, stone, or mud). Roll DX or an unarmed combat skill to touch your subject. On a hit, your victim is pinned (see B370) and rooted in place. They cannot move his limbs or speak; their only options are to use purely mental abilities, to attack the earthen bonds with an Innate Attack, or to try to break free using ST (not Escape skill). The ST of this effect is equal to 15.

To break free, the victim must win a Quick Contest of ST against the ST of this spell. Each attempt takes one second. If they try to break free and fail, they lose 1 FP and are only allowed a repeated attempt every 10 seconds. On a 17 or 18, they become so entangled that they cannot escape on their own! Alternatively, they may try to destroy the earthen bonds with an Innate Attack (they hit automatically). External attacks on the earthen bonds take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, B392).

The earthen bonds have DR 5. Each point of damage reduces ST by one. At ST 0, the earthen bonds are destroyed and the victim is freed.

Statistics: Binding 15 (Engulfing, +60%; Environmental, Earth, -20%; Melee Attack, Reach C, Cannot Parry, -35%; One-Shot, -10%; Sorcery, -15%) [24].

Measure Gravity

Keywords: Information.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

Tells the caster the local gravity in Gs or whatever measure he is used to.

Statistics: Accessory (Accelerometer; Sorcery, -15%) [1].

Measurement

Keywords: Information.

Full Cost: 2 points.

Casting Roll: IQ.

Range: 10 yards.

Duration: Instantaneous.

Tells the caster any one of the following things about the subject: (a) its weight; (b) its measurements in all dimensions; (c) its area; (d) its volume, or other parameters. This spell will provide information in the native system of the caster, be that pounds, grams, or stones about the size of your head. The measurement is as precise as the caster can comprehend.

Statistics: Cosmic Power (1 point; Limited, Only Measuring Accessories, -60%; Requires IQ Roll, -10%; Sorcery, -15%) [2].

Meld into Stone

Keywords: None.

Full Cost: 102 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can meld into stone, like a dryad merging with her tree. This works only on discrete objects – a rock (not a planet), etc. Once melded, you can use your senses from or step out of the object at any point along its interior or exterior surfaces, and can breathe if any part of it is touching air. Take a Ready maneuver to shift viewpoints or exit the object. If the object takes damage, it affects you proportionally;

e.g., 10 HP of injury to a 100 HP rock results in a 1 HP wound for a 10 HP man. Being part of something larger than you also blunts Afflictions: add the difference between its SM and yours to your resistance roll. If you have attacks that affect those touching or standing near you, like Emanations, they're "spread thin" if you merge with a large object: scale down damage in proportion to HP (to 1/10 normal, in the above example), and add the difference between the object's SM and your own to rolls to resist your Afflictions.

You carry objects, including clothing and armor, up to your Light Encumbrance, when you meld. If dropped, they "pop" into open space at the point where you entered the object. You cannot leave things inside solid matter!

Statistics: Permeation (Stone; Can Carry Objects, Light, +20%; Meld 1, +150%; Sorcery, -15%) [102].

Melee Manager

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 9 seconds.

The subject gains Extra Attack 1 (p. B53) for the duration of the spell. He can strike more than once with the *same* weapon or body part. This extra attack can only be used if all attacks made by the subject during his turn were melee attacks, and this extra attack can only be a melee attack.

Statistics: Affliction 1 (HT; Advantage, Melee Manager, +200%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [30]. *Note:* "Melee Manager" is Extra Attack 1 (Accessibility, Only if all other attacks were melee, -10%; Limited, Melee, -20%; Magical, -10%; Multi-Strike, +20%) [20].

Melt Ice

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent or until the water freezes naturally.

This spell allows you to turn ice into liquid ice. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Transmute Ice to Water, +50%; Transmutation Only, -100%; Magical, -10%) [2/level].

Memorize

Keywords: Buff.

Full Cost: 11 points.

Casting Roll: None.

Range: Self.

Duration: 30 seconds.

All that the caster perceives at the time of casting (and for 30 seconds thereafter) is implanted perfectly in his memory, as if he had Photographic Memory (p. B51). The spell can be used to memorize maps, faces, an event, etc. It cannot be used to learn a skill or to retain a magically borrowed one.

The memory lingers perfectly for a day. After that, check IQ every day, at a cumulative -1 per day. On a critical success, the memory becomes permanent; on an ordinary success, the memory is still there. On an ordinary failure, the memory fades to the level that the caster would normally have of the event; on a critical failure, a false memory is created (still susceptible to eventual fading).

Statistics: Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Memorize, +90%; Reduced Duration, 1/6, -15%; Sorcery, -15%) [11]. *Note:* “Memorize” is Photographic Memory (Magical, -10%) [9].

Mend Bone

Keywords: None.

Full Cost: 21 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

You can mend bones, restoring crippled limbs of creatures with internal skeletons. The limb must be whole, Mend Bone cannot restore a lost limb. Roll 2d. If the result would be enough to completely heal the crippling injury, then the limb is restored to its fully functional state, but HP is not healed – only the crippling condition is removed. You may heal subjects of your own race and any “similar” races (GM’s call); e.g., a human can heal other humans but not dogs or plants.

You get only one attempt at restoring a given limb. Your casting roll is at -2 if the subject is unconscious.

Statistics: Healing (Accessibility, Only on creatures with an internal skeleton, -10%; Accessibility, Only to restore crippled limbs, -60%; Affects Self, +50%; Capped, 4 FP, -20%; Doesn’t actually heal, -50%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 3, +60%; Reliable 6, +30%) [21]. *Note:* The 8 HP of healing has been converted to dice per p. B269.

Mental Barrier

Keywords: None.

Full Cost: 3 points/ level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

While this spell is active, you are protected by a mental barrier. Add this spell’s level to IQ or Will whenever you resist an ability with the Telepathic limitation, a Communication and Empathy or a Mind Control spell, or a similar direct mental ability. In addition, the barrier hinders attempts to locate your mind with supernatural abilities. Such abilities must win a Quick Contest against your Will + Mental Barrier level to find you. You cannot drop this barrier without switching to another spell. Even if you choose to waive your resistance roll against a beneficial ability, your Mental Barrier will try to resist for you, using its level+5 (or your normal resistance roll, if lower).

Statistics: Mind Shield 1 (Always On, -10%; Sorcery, -15%) [3/level].

Mer-Speech

Keywords: None or Buff.

Full Cost: 5 or 16 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

The subject temporarily gains the Speak Underwater advantage (p. B87).

The basic (5-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (16-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Speak Underwater (Sorcery, -15%) [5]. The improved version is Affliction 1 (HT; Advantage, Mer-Speech, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [16]. *Note:* “Mer-Speech” is Speak Underwater (Magical, -10%) [1].

Merciful Weapon

Keywords: Weapon Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell prevents the affected weapon from dealing injury, effectively granting it the No Wounding limitation (p. B111). It still can deal knockback and blunt trauma.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Merciful Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* “Merciful Weapon” is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Supreme Control imbuelement skill.

Merging Shapeshifting

Keywords: Resisted (IQ).

Full Cost: 141 points or more.

Casting Roll: Will.

Range: Unlimited.

Duration: 90 minutes.

This spell merges two beings into one, if both of them fail to resist. For example, a woman and a snake could be turned into something like a lamia or naga. The two subjects must be in physical contact with each other when the spell is cast. The caster may decide which of the subjects’ attributes and abilities are possessed by the merged creature.

However, although the merged creature may initially have the personality of either “component,” there is always a chance that the other “nature” will take control. Intelligent beings can usually adapt to the results of this spell, but animals find it confusing and usually panic and run amok or turn self-destructive.

The controlling personality is determined by the caster. However, the “secondary” personality may try to take over by winning in a Quick Contest of Will with the controlling personality. Only one attempt per minute is allowed.

This spell cannot be undone via Dispel Magic (GURPS Thaumatology: Sorcery, p. 21); countering it requires Remove Curse (GURPS Thaumatology: Sorcery, p. 21).

The resulting racial template of the merged creature must not be worth more character points than the racial template of the “component” creature with the most expensive racial template. If the caster can grant more powerful forms, add the difference between the maximum racial template cost and the cost of the subject’s native template to the base 141 points.

Statistics: Affliction 1 (HT; Accessibility, Both targets must fail to resist, -20%; Advantage, Merging Shapeshifting, +1,000%; Based on IQ, +20%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Rapid Fire, Variant, RoF 2, +40%; Sorcery, -15%) [141]. *Note:* “Merging Shapeshifting” is Morph (Accessibility, Only to combine two beings together, -40%; Cannot Memorize Forms, -50%; Improvised Forms, +100%; Magical, -10%) [100].

Metal Bladeturning

Keywords: Buff.

Full Cost: 27 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.
Duration: Three minutes.

Like Bladeturning (*GURPS Sorcery: Protection & Warning Spells*, p. 5), but only affects metal blades.

Statistics: Affliction 1 (HT; Advantage, Metal Bladeturning, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [27]. *Notes:* "Metal Bladeturning" is Damage Resistance 10 (Accessibility, Only to disarm, not break, -20%; Limited, Cutting metal blades, -80%; Magical, -10%; Provides no DR, -100%; Reflection, Variant, +100%) [10] + Injury Tolerance (Damage Reduction 1.5; Limited, Cutting metal blades, -80%; Magical, -10%) [5]. As a special effect, the reduced damage is treated as crushing for all purposes. The damage-to-disarm rule unifies those from p. 11 of *GURPS Gun Fu* and p. B401. Injury Tolerance 1.5 has a base cost of 25 points, by induction.

Metal to Flesh

Keywords: Resisted (Will or spell).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

Attempts to reverse the effects of Metal to Stone and bring the victim back to life (stunned). Cannot be used to animate a metal statue that was never alive.

Treat the resistance roll as for Dispel Magic (see *GURPS Thaumatology - Sorcery*, p. 21).

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Cosmic, Can dispel spells that are immune to Dispel Magic, +50%; Interruption, -50%; One Ability, Flesh to Metal, -80%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [28].

Metal to Stone

Keywords: None.
Full Cost: 6 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: Permanent.

This spell allows you to turn metal into stone (but not gemstone). The spell must be cast on a whole metal block, rather than a part of it. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

Statistics: Create (Accessibility, Must be cast on a whole metal block, -10%; Transmute Metal to Stone, +50%; Transmutation Only, -100%; Magical, -10%) [6/level].

Metal Vision

Keywords: Buff.
Full Cost: 17 points for level 1 + 5 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell lets the subject see through metal. Each level of this spell allows the subject to see through up to six inches of metal. The subject can just barely see the outline of the substance he is

looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Metal Vision 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Metal Vision to the Advantage enhancement [+5]. *Note:* Each level of "Metal Vision" is Penetrating Vision 1 (Magical, -10%; Specific, Metal, -40%) [5].

Microwave Jet

Keywords: Jet, Obvious.

Full Cost: 66 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of invisible microwaves erupts from the caster's hand. It can be dodged or blocked, but not parried. Treat this as a long melee weapon rather than a ranged attack, and do not apply range or speed penalties.

The jet deals 1 point of burning damage. Any electronic systems (e.g., computers, robots, cars with electrical ignitions, etc.) suffer an Affliction attack, requiring a HT + SM roll to avoid being shut down for minutes equal to the margin of failure. DR protects, but only if sealed. Upon regaining function, the subject is stunned (p. B420) and may roll vs. HT once per second to recover. The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the microwave stream is not interrupted and the caster may continue to attack with it normally.

Statistics: Affliction 1 (HT; Accessibility, Only on Electrical, -20%; Cosmic, Irresistible Attack unless Sealed, +250%; Destructive Parry, +10%; Increased 1/2D, 2x, +5%; Jet, +0%; Link, +10%; Melee-Capable, Reach 1, +15%; No Signature, +20%; Reflexive, +40%; Sorcery, -15%; Unconsciousness, +200%) [62] + Burning Attack 1 point (Destructive Parry, +10%; Increased 1/2D, 2x, +5; Jet, +0%; Link, +10%; Magical, -10%; Melee-Capable, Reach 1, +15%; No Signature, +20%; Reflexive, +40%) [4]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Might

Keywords: Buff.

Full Cost: 21 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You increase the target's ST by 1 per level of this spell for 3 minutes. This affects the damage, HP, and Basic Lift, but does not heal the wounds.

Statistics: Affliction 1 (HT; Advantage, Might 1, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. Additional levels add further Might to the Advantage enhancement (+90%) [+9]. *Note:* Each level of "Might" is ST 1 (Magical, -10%) [9].

Mighty Breath

Keywords: Jet, Obvious.

Full Cost: 1 point.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 2 yards.

Duration: Instantaneous.

You can project a stream of air strong enough to scatter dust and extinguish candles at two yards. It has no combat effect. Juvenile apprentices speak of a variant that emits air from... the body's nether end.

Statistics: Air Jet (Sorcery, -15%) [1].

Mind Fog

Keywords: Area (Leveled).

Full Cost: 38 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with will-sapping gases. This gives -3 to all vision rolls made through it. To place the gas cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every sapient creature that inhales the gas, loses 4 levels of Will for 3 minutes, if he fails a Will roll to resist.

Statistics: Obscure Vision 3 (Drifting, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [11] + Affliction 1 (HT; Accessibility, Only on sapient creatures, -10%; Area Effect, 2 yards, +50%; Disadvantage, Decreased Will 4, +20%; Drifting, +20%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Respiratory Agent, +50%; Sorcery, -15%; Variable, Area, +5%) [27]. Further levels add Area Effect (+50%) to both advantages [+8].

Mind over Matter

Keywords: Resisted (DX).

Full Cost: 36 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

The subject becomes able to see the outcome of his physical actions an instant before undertaking them. If he's quick-witted, this lets him make corrections, effectively altering reality with his mind. If he isn't, the visions merely distract him! For all purposes, the subject's Perception replaces his Dexterity for the spell's duration. This affects skills, Basic Speed, active defenses, Basic Move, resistances – everything.

Statistics: Affliction 1 (DX; Advantage, Mind over Matter, +90%; Based on DX, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [36]. *Note:* "Mind over Matter" is Cosmic Power 1 (Limited, One Attribute Substitution (DX->Per) Perk, -40%; Magical, -10%; Reflexive, +40%) [9].

Mind-Killer

Keywords: Resisted (Will).

Full Cost: 63 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

This spell can slay any sapient living creature (IQ 6+). It coerces the subject to will his own death.

A subject who fails to resist submits to the spell and is overcome with terrible pain (-6 penalty to all DX, IQ, skill, and self-control rolls) for one minute, and after that suffers a heart attack. General countermagic – such as Counterspell or Dispel Magic – is ineffective, but this spell can be ended prematurely with Remove Curse.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient living beings, -20%; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Fixed Duration, +0%; Heart Attack limited with Onset, 1 minute, +270%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Terrible Pain, +60%) [63].

Mind-Reading

Keywords: Resisted (Will).

Full Cost: 26 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

The caster can read the subject's surface thoughts. The caster must be able to see or touch the subject to read his thoughts. Modify the casting roll for range penalties to the subject (see p. B550).

If the caster wins, he can "hear" the subject's surface thoughts as a voice in his head. Received thought comes at the speed of speech. If the caster does not understand the language, or if his subject isn't sapient, he only picks up feelings, images, and general intent.

The caster can maintain this spell for as long as he wishes without further concentration. If he switches to another person, he must stop reading his current subject and roll a Quick Contest with the new subject.

If he loses, he may try again, at a cumulative -2 per repeated attempt on that subject in the past hour. Should he critically fail, he cannot read that person again for 24 hours.

Statistics: Mind Reading (Sorcery, -15%) [26].

Mind-Search

Keywords: Resisted (Will).

Full Cost: 17 points.

Casting Roll: IQ or Interrogation.

Range: Touch or Unlimited (see text).

Duration: Instantaneous.

Search a subject's mind to find deep thoughts and knowledge of things the subject is not thinking about at the moment. In effect, the caster can force the subject to answer any one specific question that he can answer with a brief sentence. To attempt a search, the caster must first either touch his subject or successfully read his mind with Mind-Reading or a similar spell or ability. He must also share a language with the subject.

If the casting is successful, the caster rips the answer from the subject's mind. The answer is what the subject believes to be true – if he doesn't know, he'll tell the caster. If the casting has failed, the caster may try again, at a cumulative -2 per repeated attempt to ask the same (or very similar) question in the past hour. Should he critically fail, he cannot search that person again for 24 hours.

This spell may be used to ask as many questions as the caster wishes, but each question is a new casting.

Statistics: Mind Probe (Sorcery, -15%) [17].

Mind-Sending

Keywords: None.

Full Cost: 26 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

The caster transmits thoughts directly to the subject's mind. The subject receives the caster's thoughts even if he lacks this ability. Range is theoretically unlimited, but the IQ roll to cast this spell takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see or

otherwise sense his subject, he has an additional penalty: -1 for family, lovers, or close friends; -3 for casual friends and acquaintances; or -5 for someone met only briefly.

The caster can send words at the speed of ordinary speech or pictures at the speed at which he could draw them. After casting this spell, no concentration is required. The caster can maintain multiple contacts, but the IQ roll is at a cumulative -1 per contact after the first

Statistics: Telesend (Sorcery, -15%) [26].

Mind-Whip

Keywords: Resisted (Will).

Full Cost: 19 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You can deliver a no-frills telepathic stab to a sapient living creature (IQ 6+), causing actual damage. If the subject fails to resist, he takes damage equal to your margin of victory (maximum 10 points)! DR does not protect against this damage.

Statistics: Toxic Attack 10 points (Accessibility, Only on sapient living beings, -20%; Damage cannot exceed margin of victory, -50%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [19].

Mindlessness

Keywords: Resisted (Will).

Full Cost: 39 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

Reduces a sapient subject's IQ to 1 temporarily, reducing him to babbling idiocy. The subject cannot cast or maintain spells, use skills, talk, or other actions determined by the GM. The subject can walk, laugh, cry, drool, eat with his hands, react to heat and cold, etc. He has a very short attention span and notices only colors, pretty things, movement, and other things that a baby would be curious about. If the subject has IQ 15 or more, he is immune to this spell.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; All-or-Nothing, -10%; Attribute Penalty, IQ-13, +130%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [39].

Mindlink

Keywords: None.

Full Cost: 18 points.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite.

The caster links his mind with the creature touched and transmits thoughts directly to the subject's mind. The subject receives the caster's thoughts even if he lacks this ability. This spell requires the caster to constantly take Concentrate maneuvers and remain in physical contact with the subject. The caster shares his thoughts 10 times faster than he could speak them. He cannot lie or resist any attempt by the recipient to read his thoughts!

Statistics: Telesend (Full Communion, +20%; Melee Attack, Reach C, -30%; Requires Concentrate, -15%; Sorcery, -15%) [18].

Mindscape Door

Keywords: None.

Full Cost: 25 points.

Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By making a successful casting roll, you leave your body behind, unconscious, while projecting your mind to a mindscape of another person. You must touch the person with the mindscape to project. Failure means you stay in your current world, and you are at -5 to cast this spell for the next 10 minutes. Critical failure results in this spell burning out for 1d hours. While in the mindscape, you can use spells, mental abilities, and Maledictions to affect the mindscape or other projectors. The projected forms are visible, but insubstantial and vulnerable to all abilities that affect insubstantial beings. All HP and FP losses come out of the same pool, regardless of which form suffers them – physical or projected. The projection suffers any negative effects: shock, stunning, etc. If the projection would become “unconscious,” it vanishes instead. The mind snaps back to the body, which remains unconscious until it recovers. If death results, consequences depend on which form suffered the killing injury. If this was the projection, the personality and mind are gone, but the body may survive as a mindless husk; use the *Mortal Wounds* rules (p. B423), but the victim can never awaken.

This spell does not have to be maintained, but the bodies’ need to eat, drink, sleep, etc. effectively limits the duration to a day or so – longer if the bodies are left with friends, in a hospital, or otherwise cared for.

When you want to leave the mindscape, cast this spell again. Success means you return your mind to the body. Failure means you go nowhere. Critical failure means you are trapped in the mindscape for 1d hours or you arrive as normal but your spell burns out for 1d hours.

Statistics: Jumper (Pocket Dimension; Accessibility, Only to enter or leave a mindscape, -80%; Gyroscopic, +10%; Improved, +10%; Faster Concentration 5, +25%; Magical, -10%; Melee Attack, Reach C, -30%; Projection, Can affect the new world, -0%) [25].

Minefield

Keywords: None.
Full Cost: 14 points or more.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Permanent or until discharged.

Mines an area at random – even the caster has no idea where the mines are! There’s no mundane way to spot the trap, but it’s obvious to Detect Magic, Mage Sight, and so on. The first time anyone or anything weighing 5 lbs. or more moves onto an affected hex, roll 1d. On 1-3, nothing happens; there’s no mine there. On 4-6, there was a mine but there isn’t any more, because it explodes. This does 1d crushing explosive (see *Explosions* (p. B414) for rules for explosive damage) damage per level of this spell, plus incidental fragmentation (1d-4 cutting per fragment) to everyone within five yards. Either way, mark the hex as cleared.

Falling onto a mine is deadly! This is a contact explosion, meaning the victim takes maximum possible damage (but protects others with “cover DR” equal to torso DR + HP).

Also roll the spell’s damage dice against the ground or floor itself. If this reduces the surface to 0 or fewer HP, it leaves a crater that counts as bad footing. If there’s open space underneath, this is an actual hole to the level below, 2” in diameter per damage die.

You may always choose (when casting) to scale back the damage or the area affected.

The basic (14-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 2.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +5 to base cost, the damage can be upgraded by 1 die. This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	14 points	16 points	19 points	21 points	24 points	26 points	29 points
2d	27 points	32 points	37 points	42 points	47 points	52 points	57 points
3d	41 points	48 points	56 points	63 points	71 points	78 points	86 points

4d	54 points	64 points	74 points	84 points	94 points	104 points	114 points
5d	68 points	80 points	93 points	105 points	118 points	130 points	143 points
6d	81 points	96 points	111 points	126 points	141 points	156 points	171 points
7d	95 points	111 points	130 points	147 points	165 points	182 points	200 points
8d	108 points	128 points	148 points	168 points	188 points	208 points	228 points
9d	122 points	144 points	167 points	189 points	212 points	234 points	257 points
10d	135 points	160 points	185 points	210 points	235 points	260 points	285 points

Statistics: Crushing Attack 1d (Area Effect, 2 yards, +50%; Environmental, Ground, -20%; Explosion 1, +50%; Fragmentation, [1d-4 cut], +10%; No Signature, +20%; Nuisance Effect, Once per hex, -5%; Persistent, +40%; Triggered Delay, Stepping, +50%; Unreliable, 10, -20%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [14]. Additional level add more levels of (Area Effect, +50%) [+2.5]. Damage can be improved by increasing the base cost by 5.

Miniaturize Plant

Keywords: Resisted (IQ).

Full Cost: 33 points for level 1 + 9 points/level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

If the subject plant fails to resist, it shrinks. Each level of Miniaturize Plant lets the caster change his subject's Size Modifier by -2. The subject changes to his minimum size in one second. Sentient plants cannot carry any equipment, not even clothing, when they shrink.

When the plant shrinks, find its new height from the *Size Modifier Table* (p. B19). Every -6 to SM reduces height by a factor of 10. Reduce Move, reach, damage (with unarmed attacks, Innate Attacks, or shrunk weapons), HP, and DR in proportion to height. Every full -2 to SM also reduces weight by a factor of 10; for odd-numbered levels, treat the extra -1 as an additional factor of 3 (e.g., -3 to SM reduces weight by a factor of 30).

Statistics: Affliction 1 (IQ; Accessibility, Only on plants, -50%; Advantage, Miniaturize Plant, +90%; Based on IQ, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [33]. *Notes:* "Miniaturize Plant" is Shrinking 2 (Magical, -10%; Minimum Size Only, +0%) [9]. Each additional level adds further Miniaturize Plant to the Advantage enhancement [+9].

Minor Paradox

Keywords: None.

Full Cost: 90 points.

Casting Roll: IQ.

Range: Self.

Duration: Instantaneous.

When this spell is cast, the caster may take back an action performed within the last second or insert an additional action if timing permits. The caster could take back something said or decide not to kiss the princess. Essentially, this is a "replay last second" spell. The caster and the GM may either work out a reasonable course of events, or they could simply replay the previous turn, if this spell was used in combat. Note that the caster cannot "rewind" time and take the exact same action he did before. For example, he cannot attack an orc's face, miss, cast this spell, and try again, but he can cast this spell to

attack a different hit location. Additionally, the caster cannot cast this spell as a “new action” and cannot replay the same second more than once using this spell.

The caster can carry up to his Heavy Load when he casts Minor Paradox.

Statistics: Jumper (Time; Extra Carrying Capacity, Heavy, +30%; Faster Concentration 10, +50%; Improved, +10%; Limited Jump, 1 second backwards, -80%; Magical, -10%; Nuisance Effect, Cannot repeat the same action, -5%; Nuisance Effect, Cannot replay the same second twice, -5%) [90]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Mirror

Keywords: None.

Full Cost: 13 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

Each level of Mirror gives the effect of one two-dimensional reflector with length and width in yards no larger than your spell level. For instance, Mirror 3 would let you route light around obstacles as if you had three mirrors up to 3 yards x 3 yards in size, or block light completely as if you had three 3 yard x 3 yard screens.

The mirror surface is not necessarily flat; the caster could create fun-house mirrors, for example. In a scientific-paradigm universe, casters with knowledge of physics can use this spell to create parabolic reflectors. A simple curve can be sufficient to cook meat; a large and precise one could be used to melt lead, given sufficient sunlight at appropriate angles.

Statistics: Control Light 1 (Accessibility, Only to create mirrors, -60%; Ranged, +40%; Sorcery, -15%) [13/level].

Mirror, Mirror

Keywords: Area (Leveled).

Full Cost: 90 points for level 1 + 37.5 points/additional level*.

Casting Roll: IQ or Artist (Illusion).

Range: 50 yards.

Duration: Indefinite.

This Phantom variant creates one illusory foe per sentient (IQ 1+) being in its area of effect. You can create this effect anywhere that you can see within 50 yards; see Area (*GURPS Thaumatology - Sorcery*, p. 9) for the size. It affects hearing, taste, touch, smell, Dark Vision, Infravision, Vibration Sense, as well as vision. You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the highest of IQ, Will, or Per of anyone you want to fool; otherwise the illusions fizzle instantly. Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere.

Those who fail now face shadowy versions of themselves. Each victim’s opponent appears directly ahead – a yard away if possible, in close combat if not – and attacks much as a Phantom spell would. The Phantom may proceed to strike, grapple, shove, and so on as if it were real. A phantom has ST equal to the level of this spell multiplied by 5 and DX of the sorcerer. Each phantom can only exert force as if it was a pair of invisible hands. See the Telekinesis advantage (B92) for more information.

You do not have to concentrate to have the phantoms attack.

As with Phantom, this entity doesn’t have DR or HP, or suffer normal injury. Instead, it has a damage threshold equal to the caster’s margin of success. Any single attack on the phantom that inflicts this amount (or more) of basic damage immediately dispels it; lesser attacks accomplish nothing. Materialized phantoms have substance for everyone. Thus, anybody may attack one. However, a given phantom only ever attacks its designated victim, maneuvering to stay close to its target. If that person is knocked out or killed, their shadow-self is dispelled – the entity doesn’t stick around to fight others.

This spell doesn't produce a persistent effect on the area. It affects only subjects there at the instant of casting. The phantoms it creates can move beyond the area to pursue their designated victims until dispelled or the spell ends, however.

Statistics: Illusion (Accessibility, Only illusory foes, -10%; Extended, Dark Vision, +25%; Extended, Infravision, +10%; Extended, Taste/Smell, +20%; Extended, Touch, +20%; Extended, Vibration Sense, +10%; Independence, +40%; Link, +10%; Nuisance Effect, Multiple ways to resist, -10%; Ranged, +40%; Reduced Range, 1/2, -10%; Sorcery, -15%) [57.5*] + Telekinesis 5 (Accessibility, Only to imitate illusory foes, -10%; Accessibility, Only on those who believe in the illusion, -20%; Increased Range, x5, +20%; Independent, +40%; Link, +10%; Magical, -10%) [32.5*]. Additional levels add Area Effect (+50%) to the Illusion advantage and add 5 more levels of Telekinesis [+37.5*].

* Calculate the total cost and then round up.

Mirror Duplicate

Keywords: None.

Full Cost: 68 points for level 1 + 4 points/additional level.

Casting Roll: IQ. May require other skills to make alterations. Special casting time (see below).

Range: Touch.

Duration: Indefinite.

The caster casts this spell on the reflection of an object in a mirror, and then pulls the duplicate out of the mirror. The object is also mirror-imaged, so it is not quite an exact duplicate, but is otherwise fully functional. This spell duplicates an actual item weighing 3 lbs. or less. Note that (e.g.) "a loaded gun" would be a single object; you do not have to duplicate the gun and bullets separately!

This permits a mage with no knowledge of Armoury to create a gun – if he has another one handy to copy. It also permits perfect forgeries of works of art, money, documents, and so on.

Unlike most spells, Mirror Duplicate requires 10 or 11 seconds to cast instead of the normal one or two seconds. If your roll fails, you fail to duplicate the object. If you fail, you can try again, but repeated attempts cost 3 FP (instead of the usual 1 FP) and take a cumulative -1 to the IQ roll, until you succeed or wait an hour.

A duplicate lasts indefinitely. That means, however, that if you want to cast this spell again, the first duplicate goes away as soon as you begin casting to create the second one. If you can maintain multiple spells (*Simultaneous Spells*; *GURPS Thaumatology: Sorcery*, p. 8), you can keep multiple versions of Mirror Duplicate "on" to get around that problem.

Higher levels of this spell allow you to duplicate heavier, larger objects. However in no case can you duplicate an object weighting more than 2xBL; it must always be something you could hold in one hand.

Spell Level	Weight	Min. ST
1	3 lbs.	3
2	5 lbs.	4
3	7 lbs.	5
4	10 lbs.	5
5	15 lbs.	7
6	20 lbs.	8
7	30 lbs.	9
8	50 lbs.	12
9	70 lbs.	14
10	100 lbs.	16

For higher levels, look up the spell level in the "Size" column of the *Size and Speed/Range Table* (p. B550) and then read the corresponding "Linear Measurement" as pounds instead of yards. (Or note that every +6 levels corresponds to 10x weight.) See p. B17 to find minimum ST.

Statistics: Snatcher (Improved, +10%; Less Weight, 3 lbs., -5%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Requires a mirror, -10%; Requires a sample object, -20%) [68]. Level 2 removes Less

Weight (+5%) [+4] and additional levels add More Weight (+5%) [+4]. *Note:* The Improved enhancement eliminates the auto-fail on 14+.

Mirror Image

Keywords: Area (Leveled).

Full Cost: 15 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use IQ or Artist (Illusion) to determine how convincing it is.

Range: Self.

Duration: Indefinite.

You create illusory duplicate of yourself in all hexes of the spell's area around you. On level 1, this is a 2-yard radius, and each additional level doubles this radius. It affects only vision. You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something “off.” Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere. However, even if they successfully “disbelieve,” your illusion doesn't disappear. Thus, even an obvious illusion can be useful to block line of sight.

The images mimic all your movements and actions. If an image takes even 1 point of damage, it dissipates. At any point of your movement you switch places with an illusory image of yourself to confuse your foes even more.

Statistics: Illusion (Accessibility, Images of yourself, -25%; Independence, +40%; Nuisance Effect, Dissipates upon damage, -10%; Sorcery, -15%; Visual Only, -30%) [15]. Additional levels add Area Effect (+50%) [+12.5*].

* Calculate the total cost and then round up

Mirror Trap

Keywords: Resisted (HT).

Full Cost: 57 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

The spell instantly traps the subject in a nearby mirror. The mirror must currently be reflecting the image of the subject. When calculating range penalties, use the greater of the distance to the subject or the mirror. The subject is trapped with anything carried. While in the mirror, he can do nothing and is frozen in time until freed by breaking the mirror or the reverse of this spell. The subject – reflection captured in whatever pose he had when trapped – will be visible to anyone who is looking into the mirror, usually as if he were behind them. However, if the viewer turns around, the subject is not there. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Affliction 1 (HT; Cosmic, Immune to Dispel Magic, +50%; Environmental, Mirror, -40%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Sorcery, -15%) [57].

Mirrored Skin

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell turns the subject's skin into a mirror that reflects light-based attacks and even makes direct hits less powerful. The subject gains DR 2 and +1 Dodge against light-based attacks.

Statistics: Affliction 1 (HT; Advantage, Mirrored Skin, +130%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Mirrored Skin" is DR 2 (Limited, Light, -40%; Magical, -10%) [5] + Enhanced Dodge 1 (Limited, Light, -40%; Magical, -10%) [8].

Mollusk Control

Keywords: Resisted (Will).

Full Cost: 18 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single mollusk – or of one square yard of a swarm of smaller mollusks. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only mollusks with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for mollusks with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Mollusks only, -50%; Sorcery, -15%) [18].

Monitor Air

Keywords: Buff.

Full Cost: 78 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell lets the subject determine whether the air he is located in is safe to breathe. The GM will secretly roll against the subject's Per. If the roll is successful, the subject will know if the air is safe to breathe. The follow-up IQ roll will let the subject know if there are any impurities that might be harmful.

Statistics: Affliction 1 (HT; Advantage, Monitor Air, +620%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [78]. *Note:* "Monitor Air" is Detect (Air; Analyzing, +100%; Reflexive, +40%; Sorcery, -15%; Touch-Based, -20%) [62].

Monodimensional Weapon

Keywords: Weapon Buff.

Full Cost: 44 points or 84 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell transforms the weapon into a one-dimensional version of itself, converting the damage of a non-impaling attack from its usual damage type to impaling. The basic (44-point) version gives -1 per die on the basic damage roll, however. The improved (84-point) version lets the weapon deal its full damage.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Monodimensional Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Monodimensional Weapon" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11). The improved version buys off a -5 penalty [+40]. This spell is based on the Impaling Strike imbue skill.

Monk's Banquet

Keywords: Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell allows the subject to go without food or water for a day with no ill effects.

Statistics: Affliction 1 (HT; Advantage, Monk's Banquet, +90%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Note:* "Monk's Banquet" is Doesn't Eat or Drink (Magical, -10%) [9].

Monster Within

Keywords: Resisted (Will).

Full Cost: 50 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

If the sapient subject has one or more of the disadvantages Bad Temper, Berserk, Bloodlust, Bully, or Sadism, he will automatically fail his control rolls for these disadvantages whenever they come up during the spell's duration.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Monster Within, +137%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Only removes the necessity of rolling for existing disadvantages, -30%; Sorcery, -15%) [50]. *Note:* "Monster Within" is Bad Temper (No roll) [-25] + Berserk (No roll) [-25] + Bloodlust (No roll) [-25] + Bully (No roll) [-25] + Sadism (No roll) [-37].

Moon Blade

Keywords: Obvious.

Full Cost: 56 points.

Casting Roll: None. Use Force Sword to hit.

Range: Self.

Duration: Instantaneous.

A 3-foot-long, blazing beam, of moonlight springs forth from your hand. The blade has Reach 1 and is used with the Force Sword skill.

Attacks with the moon blade ignore DR. Its strike saps vitality or life force, causing no visible wounds but dealing 1d toxic damage to living creatures. Undead are visibly wounded by a moonblade. Their substance boils away from its touch, and they take 1d corrosion damage. The blade is immaterial, it cannot be grabbed or disarmed. However, if it is used to parry or is parried, it deals its normal damage to the body part used to attack or parry. A parry is considered a separate use of the spell, costing 1 FP.

A successful moon blade strike temporarily scrambles magic. Targets stuck by this attack must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to IQ for the purpose of spellcasting for (20 – HT) seconds.

Statistics: Corrosion Attack 1d (Accessibility, Only against undead, -50%; Affects Insubstantial, +20%; Cosmic, Irresistible Attack, +300%; Destructive Parry, +10%; Link, +10%; Melee Attack, Reach 1, -25%; Side Effect, Attribute Penalty, -2 to IQ, Only for spellcasting, +60%; Reduced Duration on Side Effect, 1/60, -35%; Sorcery, -15%) [38] + Toxic Attack 1d (Affects Insubstantial, +20%; Cosmic, Irresistible Attack, +300%; Destructive Parry, +10%; Link, +10%; Magical, -10%; Melee Attack, Reach 1, -25%; Side Effect, Attribute Penalty, -2 to IQ, Only for spellcasting, +60%; Reduced Duration on Side Effect, 1/60, -35%) [18].

Moon Path

Keywords: Buff, Obvious.

Full Cost: 136 points for level 1 + 10 points/additional level (or more).

Casting Roll: Will. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell allows you to create a stair or bridge from one spot to another. The effect is a railless ribbon of glowing white translucent force like a glass strip that acts as Utter Wall (*GURPS Sorcery: Protection and Warning Spells*, p. 14).

To find the maximum square yardage available, look up the level of this spell on the *Leveled Area Table* (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. However, the strip can only be from 1 to 3 yards wide as you decide. (You can vary the width over the ribbon's length if you want.) It sticks to its endpoints unshakably, even if these endpoints are in midair. A moon path must be straight, continuous, and unbroken when formed. If its surface is broken by any object or creature, the spell fails. The bridge version of the spell must be created flat. The stair version cannot rise or descend any more sharply than 45 degrees.

At the time of casting, you designate creatures to receive extra protection while standing on or moving along the moon path. All these creatures must be visible to you, must be within the casting range, and must all be within 2 yards of each other. Protected creatures can cling to the moon path with any body part, as if they had the Clinging advantage (p. B43). In addition, they are protected by a sanctuary-like effect. Any creature within 8 yards of a protected creature must roll a Quick Contest of Will with the protected creature every second. If the victim fails, it can only attack the protected creature in self-defense until it leaves the area and for margin of failure seconds after leaving it. If any protected creature attacks any opponent, this ability ceases to function for 1 minute for all protected creatures. A creature loses both benefits immediately when it leaves the path.

If a particular subject possesses DR with no Tough Skin limitation, the sorcerer's casting roll is penalized by their DR as well as the normal range penalties. Calculate effective DR for this penalty according to the rules for *Large-Area Injury* (p. B400).

By default, the moon path has DR 12 and HP 2. However, more potent versions are available that multiply DR, HP, and cost by the same amount:

DR	H P	Full Cost
12	2	136 points for level 1 + 10 points/additional level
24	4	196 points for level 1 + 20 points/additional level
36	6	256 points for level 1 + 30 points/additional level
60	10	376 points for level 1 + 50 points/additional level
120	20	676 points for level 1 + 100 points/additional level

Statistics: Affliction 1 (HT; Advantage, Moon Path, +450%; Area Effect, 2 yards, +50%; Cosmic, No die roll required, +100%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Link, +10%; Magical, -10%; No Signature, +20%; Selective Area, +20%; Terminal Condition, Leaving the moon path, -15%) [76] + Crushing Attack 4d (Accessibility, Only a 1-3-yard-wide horizontal plane or stair, -30%; Affects Insubstantial, +20%; Area Effect, 2 yards, +50%; Cosmic, Interferes with spellcasting, +50%; Extended Duration, 30x, +60%; Link, +10%; No Wounding, -50%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [60]. Additional levels increase Area Effect (+50%) to the Crushing Attack [+10]. More powerful versions multiply dice and Full Cost by 2, 3, 5, or 10. **Notes:** "Moon Path" is Affliction 1 (Will; Area Effect, 8 yards, +150%; Aura, +80%; Based on Will, +20%; Disadvantage, Pacifism (Self-Defense Only), Only against the subject, +10%; Magical, -10%; Malediction 1, +100%; Melee Attack, Reach C, -30%; Nuisance Effect, Stops if any subject attacks, -10%; Reduced Duration, 1/60, Only when the target leaves the area, -30%) [38] + Clinging (Attraction, +25%; Magical, -10%; Specific, Moon Path, -80%) [7]. As a special effect, the DR subtracts from the casting roll rather than forcing a resistance roll.

Moonbeam

Keywords: Jet, Obvious, Resisted (Will).

Full Cost: 11 points.

Casting Roll: Will. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Nine minutes.

Emit a beam of pale moonlight from one hand. This beam can be used like a flashlight. It gives good illumination for 10 yards in the direction it is pointed, and some vision will be possible up to 30 yards away. It can be used as a signal for up to a mile if visibility is good.

You can strike any target up to 10 yards away (without range or speed penalties). It can be dodged, but not parried or blocked. If the spell strikes a lycanthrope in its humanoid form, roll a Quick Contest of Will. If the caster wins, the lycanthrope is forced to immediately assume its animal form and remain in it for this spell's duration.

Statistics: Illumination (Beam; Link, +10%; Magical, -10%) [1] + Neutralize (Magic; Derange, -20%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Jet, +0%; Link, +10%; One Ability, Lycanthropy in Humanoid Form, -80%; Sorcery, -15%) [10].

Morphean Extraction

Keywords: Resisted (Will).

Full Cost: 22 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

If the victim fails to resist, he takes 1d-1 fatigue damage, as his mind becomes tired and sleep-deprived. Treat FP lost to the spell identically to FP lost to missed sleep.

Statistics: Fatigue Attack 1d-1 (Malediction 2, +150%; Missed Sleep, +50%; No Signature, +20%; Sorcery, -15%) [22].

Mouth-Goes-Away

Keywords: Resisted (HT).

Full Cost: 33 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 6 days.

The caster must touch the victim's face to cast this spell. The victim's mouth disappears, leaving an expanse of smooth skin between nose and chin. After the first day, the victim must make a Will roll every six hours to keep from cutting a hole in the membrane in order to drink. After the spell has dispersed, the victim's mouth and lips reappear. Any disfigurement done in the meantime remains; unless carefully healed, the resulting scars may detract from the person's appearance.

Statistics: Affliction 1 (HT; Disadvantage, Divine Curse (No Mouth), +30%; Extended Duration, 3,000x, +140%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Nuisance Effect, Must target face, -15%; Sorcery, -15%) [33].

Move Metal

Keywords: None.

Full Cost: 1 point/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can move metal objects without touching them. You lift and move distant metal objects just as if you were grasping them in a pair of hands with ST equal to your Move Metal level. You can move any object you have strength enough to lift at Move 1, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17). Regardless of level, maximum range is 10 yards.

Move Metal requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Move Metal may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pick up an object or a Move maneuver to lift and carry it.

No rolls are necessary for ordinary lifting and movement. In situations where you would roll against ST, roll against your Move Metal level instead.

Statistics: Telekinesis 1 (Accessibility, Metal only, -20%; Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; No Fine Manipulations, -20%; Sorcery, -15%) [1]. Each additional level adds Telekinesis 1 (Accessibility, Metal only, -20%; Cannot Grapple, -5%; Cannot Punch, -10%; Cannot Throw, -10%; Lift Only, -20%; No Fine Manipulations, -20%; Sorcery, -15%) [1].

Move Terrain

Keywords: Area (Special), Resisted (Will and DX).

Full Cost: 179 points for level 1, see the table for higher level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Permanent.

The target area of terrain with all buildings and creatures on or in it “shrinks” in radius at the rate of 1 yard per second, while the caster continues to concentrate. Victims should be able to jump out of the area as it shrinks – make (DX – area radius) rolls! If the caster stops concentrating, the area expands back at the same rate.

The first level of this spell can affect an area 8 yards in radius. Every additional level adds one yard to this. Or, to put it another way, the caster can affect an area equal to (spell level)+7 yards in radius.

Area Radius	Full Cost
8 yards	179
9 yards	190
10 yards	196
11 yards	202
12 yards	208
13 yards	214
14 yards	220
15 yards	226
16 yards	232
17 yards	243
+1 yard	+6 per level and an additional +5, if the previous level is a power of 2

Unless everyone within the area is willing, the person with the highest effective Will resists. The spell is all-or-nothing; if that one person resists, then the spell fails, but if not, then it works. If the GM is uncertain of who has the best resistance roll (e.g., one person has high Will while another has modest Will but also Luck), he can pick two, roll for both, and average their margins of success for the Quick Contest.

When the area of terrain to be transported shrinks beyond the radius of 1 yard, it vanishes and gets replaced by bare earth or open water. The caster is now “carrying” that area in invisible, intangible form (but still detectable with Detect Magic).

Beings caught by the spell are aware of a wild, swirling sky above their heads and a physically impenetrable barrier all around them. The atmosphere inside remains breathable and comfortable. Spells cast out of the area automatically hit the Move Terrain’s holder! Captive mages could also cast

Dispel Magic or Counterspell on the affected area, forcing the spell to end abruptly if they are successful.

When the caster switches to another spell or releases the terrain willingly, the terrain reappears. The caster's location falls anywhere within it or at its edge. The subject area "expands" back to normal size at the same rate it shrank. If there is no suitable space available, anything in the way is moved aside as if by Shape Earth.

Statistics: Control Terrain (Accessibility, Only to shrink, -60%; Link, +10%; Nuisance Effect, Victims may jump out, -5%; Ranged, +40%; Sorcery, -15%) [21] + Affliction 1 (Will; Accessibility, Only on the shrunk area, -60%; Advantage, Move Terrain, +1,100%; All or nothing, -10%; Area Effect, 8 yards, +150%; Based on Will, +20%; Extended Duration, Permanent, +150%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Caster is vulnerable to spells from the shrunk area, -40%; Magical, -10%) [158]. *Notes:* "Move Terrain" is Jumper (World; Extra Carrying Capacity, Heavy, +30%; Improved, +10%; Limited Access, Pocket Dimension, -20%; Magical, -10%) [110]. Additional levels add Control Terrain (Accessibility, Only to shrink, -60%; Nuisance Effect, Victims may jump out, -5%; Only increases area of effect, -50%; Ranged, +40%; Sorcery, -15%) [6/level] and add Area Effect (+50%) to the Affliction when Control's area of effect becomes larger than the area of effect of Affliction.

Mud Jet

Keywords: Jet, Obvious.

Full Cost: 33 points for level 1 + plus 7 points per additional level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 20 yards.

Duration: Instantaneous.

You shoot a thin jet of mud from your fingertip, which can strike any target up to 20 yards away (without range or speed penalties). It can be dodged or blocked, but not parried. This jet does 1d crushing damage per level, *doubled*, for the purposes of knockback only. It will extinguish a one-yard-radius area of normal fire.

Against enemies with Injury Tolerance (Diffuse), such as gaseous beings and swarms, this becomes a *much* more potent attack, doing full damage – including the doubling! Ignore the usual injury cap of 2 HP (*Injury to Unliving, Homogenous, and Diffuse Targets*, p. B380).

If the spell strikes the face, it causes no injury, but blinds the target for 3 seconds unless he makes a HT roll. Thick goggles, closed helmets, ultra-tech visors protect against this spell.

Statistics: Crushing Attack 1d (Blockable, -5%; Can extinguish fire, +10%; Cosmic, Does knockback-based damage against diffuse targets, +50%; Double Knockback, +20%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; No Blunt Trauma, -20%; No Wounding*, -25%; Sorcery, -15%) [7/level] + Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Blockable, -5%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; Reduced Duration, 1/60, -35%; Vision-Based, +150%) [26].

* Except versus diffuse targets, an exception which halves the value of this limitation.

Mudwalker

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject does not suffer DX or Move penalties for traversing through mud.

Statistics: Affliction 1 (HT; Advantage, Mudwalker, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Mudwalker" is Terrain Adaptation (Mud; Magical, -10%) [5].

Muffle

Keywords: Buff.

Full Cost: 25 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster changes makes the subject less noisy. The subject gets +4 per level of this spell to Stealth skill when they are perfectly motionless, or +2 if moving (even in armor, etc.). These bonuses help only in the dark, or against listening devices, blind creatures, and others who must rely on hearing to find you.

Statistics: Affliction 1 (HT; Advantage, Muffle 1, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* Each level of "Muffle" is Silence 2 (Magical, -10%) [9].

Multi-Shot

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell imbues the weapon with the ability to supernaturally split its projectile(s) in midair, increasing RoF by the spell level. For missile weapons, this uses up only the usual number of shots. For thrown weapons, you just need to have one weapon to hurl. In either case, the additional shots last for long enough to do harm and then vanish.

Muscle-powered ranged weapons lack an Rcl stat. Use Rcl 1 for weapons with Bulk 0 to -2, Rcl 2 for weapons with Bulk -3 or -4, Rcl 3 for weapons with Bulk -5 or -6, and so on. Increase Rcl by 2 for weapons that deal Swing damage.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Multi-Shot, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Multi-Shot" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Multi-Shot imbue skill.

Murder Blossom

Keywords: Area (Fixed), Obvious.

Full Cost: 58 points.

Casting Roll: None. Use Innate Attack (Beam) to aim.

Range: 10 yards.

Duration: 10 seconds.

Conjures a beautiful flower to hand that belches forth a jet of deadly pollen. You may fill a two-yard-radius area with deadly pollen. To place the pollen cloud at a distance, use Innate Attack (Beam), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Every creature in the area experiences a fatal allergic reaction on a failed HT roll. Treat this as a mortal wound (p. B423): The target instantly falls unconscious and must roll vs. HT every 30 minutes, with any failure meaning death. At TL6+, trauma maintenance can help. Natural recovery occurs on a critical success on the HT roll. Otherwise, the only cure is suitable TL6+ medication or a Neutralize Poison spell, at -5 unless Identify Plant is cast first to determine what pollen caused the reaction.

The deadly pollen is a contact agent that affects any living being without the Sealed advantage (natural or from equipment) and/or Immunity to Metabolic Hazards. Magic Resistance provides no benefit – no magic is cast *on the victim*.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid placing the effect in your own hex!

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Coma, Variant, +250%; Contact Agent, +150%; Drifting, +20%; Increased 1/2D, 10x, +15%; Nuisance Effect, Dangerous to be parried, -5%; Persistent, +40%; Reduced Range, 1/10, -30%; Sorcery, -15%) [58].

Mystic Mark

Keywords: Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

Places an invisible mark on the subject. The mark is visible to the caster at will (simple concentration) and to others using Aura, See Secrets, Mage Sight, Detect Magic, or similar spells. It may be a rune, sigil, monogram, etc. (A Heraldry specialty may be learned to recognize the Mystic Marks in use in the campaign world.)

The mark can be erased with Remove Curse (Dispel Magic does not work).

Statistics: Affliction 1 (HT; Advantage, Mystic Mark, +10%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Note:* "Mystic Mark" is Mystic Mark (Magical, -10%) [1].

Narrative Conveyance

Keywords: Buff.

Full Cost: 219 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

This spell enchants a book that *vividly* describes another world, time, or place, so that a person who reads it enough to read the description (at least several minutes), is bodily transported with his gear up to his Extra-Heavy Encumbrance to that world/time/place, if he fails to resist with Will, as if using the Jumper advantage (p. B97).

Statistics: Affliction 1 (HT; Accessibility, Only on books, -50%; Advantage, Narrative Conveyance, +1,970%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [219]. *Note:* "Narrative Conveyance" is Affliction 1 (Will; Advantage, Jumper (World; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Limited Access, -20%; Magical, -10%; Reliable +10, +50%), +1,800%; Aura, +80%; Based on Will, +20%; Melee Attack, Reach C, -30%; No Signature, +20%; Vision-Based, Variant, -20%) [197].

Nature's Favor

Keywords: Buff.

Full Cost: 24 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You grant the target animal's the benefits of Luck (p. B66).

Statistics: Affliction 1 (HT; Accessibility, Animals Only, -25%; Advantage, Nature's Favor, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [24]. *Note:* "Nature's Favor" is Luck (Magical, -10%) [14].

Nauseate

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.
Duration: 9 seconds.

The subject becomes nauseated (p. B428) for 9 seconds.

Statistics: Affliction 1 (HT; Nauseated, +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [26].

Nervous Stomach

Keywords: Resisted (HT).
Full Cost: 38 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 1 day.

The subject get a -3 penalty to HT rolls to avoid illness (typically in the form of attribute penalties or vomiting) brought on by rich or spicy food, strong drink, etc.

Statistics: Affliction 1 (HT; Disadvantage, Nervous Stomach, +1%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [38].

Net

Keywords: Area (Leveled).
Full Cost: 40 points for level 1 + 12 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous.

You conjure a sticky net that falls over an area. Placing the effect requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). Anyone covered by the net is grappled with ST 12 and rooted in place. They cannot select the Move or Change Posture maneuvers or change facing, and are at -4 to DX. Each additional net cast over the area increases the ST by 1.

To break free, the victim must win a Quick Contest of ST or Escape skill against the ST of the Net. Each attempt takes one second. If the victim fails to break free, he loses 1 FP but may try again. Alternatively, he may try to destroy the Net. Innate Attacks hit automatically; other attacks are at -4. External attacks on the Net take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, p. B392). The Net has DR 4. Each point of damage reduces ST by one. At ST 0, the Net is destroyed and the victims are freed. The Net can only be damaged by cutting attacks.

Statistics: Binding 12 (Area Effect, 2 yards, +50%; Only Damaged By Cutting, +30%; Sorcery, -15%) [40]. Each additional level adds more Area Effect [+12].

Neutralize Fungal Poison

Keywords: Buff.
Full Cost: 21 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous, the poison flushes in 1d hours.

This spell flushes fungal poisons from the subject's body. The caster must first roll against Poisons (or Alchemy, Pharmacy, etc., as appropriate) to identify the fungal poison. He cannot attempt this roll until he knows that the subject has been poisoned. In most cases, this can be discovered when the first symptoms show! This spell flushes the fungal poison in 1d hours, after which it has no further effect.

Statistics: Affliction 1 (HT; Advantage, Neutralize Fungal Poison, +130%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [21].
Note: "Neutralize Fungal Poison" is Unusual Training (Body Control, only to flush fungal poisons) [1] +

Body Control (VH) HT [8] modified with Accessibility, Fungal Poisons, -50%; Cosmic, No die roll required, +100% and Magical, -10% for a final cost of 13 points.

Neutralize Poison

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous, the poison flushes in 1d hours.

This spell flushes poisons from the subject's body. The caster must first roll against Poisons (or Alchemy, Pharmacy, etc., as appropriate) to identify the poison. He cannot attempt this roll until he knows that the subject has been poisoned. In most cases, this can be discovered when the first symptoms show! This spell flushes the poison in 1d hours, after which it has no further effect.

Statistics: Affliction 1 (HT; Advantage, Neutralize Poison, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [26]. *Note:* "Neutralize Poison" is Unusual Training (Body Control, only to flush poisons) [1] + Body Control (VH) HT [8] modified with Cosmic, No die roll required, +100% and Magical, -10% for a final cost of 18 points.

Night Terror

Keywords: Resisted (Will).

Full Cost: 15 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Touch.

Duration: Instantaneous.

You touch a sleeping sapient creature and create a vivid nightmare in their mind. Roll a Quick Contest of Will with your subject. If you win, roll 3d for the result of the Fright Check, as usual, but add your margin of victory instead of his margin of failure. Your victim gets +1 per Fright Check after the first within 24 hours. If a victim succeeds at their Fright Check, they will be unaffected by your Night Terror for one hour. Each additional level of this spell imposes -1 to the Fright Check. For example, with Night Terror 4, the subjects must make Fright Checks at -3. This may also affect creatures that project their minds into the victim's dream.

Statistics: Terror (Accessibility, Only on sapient beings, -10%; Accessibility, Only on sleepers, -20%; Active, +0%; Melee Attack, Reach C, -30%; Presence, +25%; Sorcery, -15%) [15]. Additional levels add -1 to the Fright Check [+5].

Night Vision

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell allows the subject to see clearly as long as there is any light at all, as with Night Vision 9. In utter darkness, the subject is still blind.

Statistics: Affliction 1 (HT; Advantage, Night Vision, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Night Vision" is Night Vision 9 (Magical, -10%) [9].

Nightmare

Keywords: Resisted (Will).

Full Cost: 38 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day or until awakened.

The sleeping sapient subject gets the Nightmares (p. B144) disadvantage until he awakens (or for 24 hours, if he sleeps for a very long time). He is tormented by horrible nightmares. Sometimes they're so harrowing that they affect his efficiency during waking hours. Upon awakening the subject loses 1 FP that he can only recover through sleep. On a roll of 17 or 18, he is left shaking, and is at -1 to all skill and Perception rolls for the entire day.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient sleepers, -30%; Based on Will, +20%; Disadvantage, Nightmare (No Self-Control Roll, x2.5), +12%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [38].

No-Taste

Keywords: Buff.

Full Cost: 50 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject becomes tasteless and completely unrecognizable to taste-based senses.

Statistics: Affliction 1 (HT; Advantage, No-Taste, +380%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [50]. *Note:* "No-Taste" is Obscure 10 (Taste; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [38].

Node of Blasting

Keywords: Buff.

Full Cost: 53 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent.

This spell imbues an inanimate object with psychic energy. This energy remains indefinitely, but can be detected by Detect Magic. Any creature with a mind that touches this object releases this energy and takes 4d toxic damage.

Statistics: Affliction 1 (HT; Accessibility, Only on inanimate objects, -10%; Advantage, Node of Blasting, +310%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%) [53]. *Note:* "Node of Blasting" is Toxic Attack 4d (Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%; Triggered Delay, Touch, +50%) [31].

Nuclear Damper

Keywords: Area (Special).

Full Cost: 110 points for level 1 + 6 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 30 seconds.

This spell prevents any nuclear fission or fission-triggered fusion explosion from occurring within an area with a radius equal to (9 + spell level) yards. It will not prevent the detonation of ultra-tech fusion warheads that are triggered by means other than a fission explosion. It also affects nuclear fission reactors and radiothermal generators. A fission reactor will cease to function if within this spell's area of effect. It will resume functioning afterward, but the interruption may disturb its normal operation – roll vs. the reactor or generator's HT, with failure indicating a malfunction (in a fission reactor, this could lead to a nuclear accident). A successful Mechanic (Power Plant) roll will diagnose any problems and reveal whether it is safe to restart, or whether further repairs are needed.

Statistics: Control Nuclear Fission 10 (Accessibility, Only to stop fission, -65%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [110]. Additional levels add Control Nuclear Fission (Accessibility, Only to stop fission, -65%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [6/level].

Noise Amplification

Keywords: Resisted (Will).

Full Cost: 33 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 minutes.

All noises emitted by the victim are greatly amplified. The victim is producing noise constantly, even his breathing is very loud. This gives +10 to Hearing rolls to hear the subject or -10 to Stealth rolls, as the situation warrants. In some circumstances (for example, in the theater or library), this might impose a -5 Reaction penalty.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Noisy 5, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [33].

Nuclear Fireball

Keywords: Missile, Obvious.

Full Cost: 147,975 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 10,000 yards.

Duration: Instantaneous.

You throw a nuclear fireball at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 6dx900 crushing damage plus 6dx650 burning surge radiation damage. This spell has no 1/2D range – it does full damage at any range. The attack produces an explosion at the point of impact (on a miss, check for scatter; see p. B414). The target takes damage normally; anything nearby receives “collateral damage” equal to basic damage divided by (2 x distance in yards from the blast).

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own nuclear ball!

Statistics: Crushing Attack 6dx900 (Explosion 2, +100%; Increased 1/2D, 10x, +15%; Increased Range, 100x, +60%; Link, +10%; Magical, -10%; Nuisance Effect, Dangerous to be parried, -5%) [72900] + Burning Attack 6dx650 (Explosion 2, +100%; Increased 1/2D, 10x, +15%; Increased Range, 100x, +60%; Link, +10%; Nuisance Effect, Dangerous to be parried, -5%; Radiation, +100%; Sorcery, -15%; Surge, +20%) [75075].

Null Sphere

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw sphere of black nothingness – a tiny gate to another dimension. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area.

On striking its target, the sphere collapses, momentarily exposing this universe to the alien one beyond the gate. This realm has natural laws inimical to the very existence of regular energy and matter.

Everyone within six yards of that spot must roll against HT at +1 per yard from the point of impact. This checks structural integrity, not vigor; it's unaffected by Fit/Very Fit or types of Resistant that aren't explicitly effective against disintegration (notably, Resistant to Metabolic Hazards does nothing).

Failure means the victim suffers 2 HP of injury multiplied by margin of failure. The only DR that protects is that of a reality-stabilized force screen (*GURPS Ultra-Tech*, p. 192). If damage type matters (say, for Vulnerability), treat this as corrosion – the target is partially disintegrated.

Statistics: Corrosion Attack 2 points (Area Effect, 6 yards, +125%; Cosmic, Irresistible Attack, +300%; Dissipation, -50%; Margin-Based, +200%; Resistible, HT, -30%; Sorcery, -15%) [32].

Nullifying Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes armor more resistant to magical damage. The armor's DR is multiplied against magical damage, as shown on the table below.

Level	D R
1	x2
2	x3
3	x4

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Nullifying Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Nullifying Armor" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Nullifying Armor imbue skill from *Pyramid #3-4*.

Numbness

Keywords: Resisted (HT).

Full Cost: 31 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

You freeze the subject's flesh, causing the subject to become numb and begin shivering. The subject temporarily loses his sense of touch as per the Numb disadvantage (p. B146) and gains Bad Grip 2 (p. B123). If you wish, you can choose to affect only specific body parts instead of the whole subject. For example, you could affect only his left arm, or anything except his head. If you do not affect the arms, you do not grant the Bad Grip disadvantage.

Statistics: Affliction 1 (HT; Disadvantage, Bad Grip 2, +10%; Disadvantage, Numb, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Effect, +20%; Sorcery, -15%) [31].

Numerology/Arithmancy

Keywords: Information.

Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Numerology, or arithmancy, is divination by the various numbers that define an individual, including those derived from name, birthday and, in contemporary settings, even such things as social security numbers. If the birthday of the subject is unknown, the caster is at a -8 to the casting roll.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, Only when birthday is known, +30%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Oath

Keywords: Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent (until fulfilled).

Give a *willing* sapient subject a command to do one specific thing. It can even be something a person could not feasibly, realistically accomplish; “destroy every tree in the world” *would* be valid, but the subject must speak the oath.

The subject must make this command his first priority at all times. He is free to decide how to go about it, however, and may approach the situation intelligently; e.g., rather than grabbing an axe, he could contact a temp agency to hire a small army of woodcutters. In effect, he has an Obsession (p. B146) with no self-control roll.

Once the subject accomplishes the goal, the oath ends. The only way to remove the oath before then is with Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21); Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21) has no effect.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%; Variable Enhancement, +125%) [44]. *Note:* Variable Enhancement provides +25% of enhancements (+250%) but is limited by “Accessibility, Only for Obsession with no self-control roll” (-50%) for a net +125%.

Object Reading

Keywords: Information.

Full Cost: 17 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

When cast on any inanimate object, Object Reading lets the caster determine the recent past of that object, user’s personality, and so on – but no names!

To cast Object Reading, you must touch the subject item, concentrate for one second, and make an IQ roll. This roll is at no penalty for an event that occurred the same day, -1 for one that occurred up to 10 days ago, -2 if up to 100 days ago, -3 if up to 3 years ago, -4 if up to 30 years ago, -5 if up to 300 years ago, and so on.

On a success, you receive the general sense of emotions and events tied to the object. On a critical success, you experience an actual vision. No matter how well you roll, you cannot detect magic, spirits, etc. Still, a magic item is likely to have an emotionally charged history, giving strong impressions.

On a failure, you receive no impressions at all, and cannot attempt to read that object again for 24 hours.

Statistics: Psychometry (Accessibility, Only inanimate objects, -10%; Active Only, -20%; Sensitive, +30%; Sorcery, -15%) [17].

Obscure Poison

Keywords: Buff.

Full Cost: 41 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The poison affected by this spell becomes difficult to detect magically. This gives a -10 penalty to rolls to detect the poison with spells and abilities, such as Detect Poison.

Statistics: Affliction 1 (HT; Accessibility, Only on poisons, -50%; Advantage, Obscure Poison, +300%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [41]. *Note:* "Obscure Poison" is Obscure 10 (Detect; Defensive, +50%; Limited, Detect Poison, -40%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [30].

Odor

Keywords: Area (Special).

Full Cost: 12 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

Produces any odor the caster is familiar with in an area, which must have an initial radius (in yards) no greater than your level of this spell. The odor stays while you keep concentrating, and lingers for about an hour, gradually diminishing (outdoors it spreads out and quickly dissipates), when you stop concentrating. The spell produces no other physical effects – for instance, the odor of a poison is not poisonous.

Statistics: Control Air 1 (Accessibility, Only to change odors, -65%; Ranged, +40%; Sorcery, -15%) [12]. Additional levels add Control Air +1 (Accessibility, Only to change odors, -65%; Only increases area of effect, -50%; Ranged, +40%; Sorcery, -15%) [4/level]. *Note:* As this is one advantage (Control Air) with the Sorcery limitation, not two, it costs only 1 FP to use.

Omnivory

Keywords: Buff.

Full Cost: 63 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell temporarily removes the Restricted Diet disadvantage (p. B151), allowing the living subject to subsist on any normal food.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Restricted Diet (Rare), +400%; No Signature, +20%; Sorcery, -15%) [63].

Oneiromancy

Keywords: Information.

Full Cost: 29 or 79 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Oneiromancy is the interpretation of the caster's own dreams. It requires no equipment, but only one question can be asked per night. When the caster falls asleep, roll 3d. On 12 or higher, the caster does not dream at all! The use of Dreaming skill, or any dream spell, disrupts any attempt at oneiromancy. The GM tells the caster what he dreamed; the player must interpret it. Energy cost is paid on awakening.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (29-point) version of this spell requires 10 minutes to cast! The improved (79-point) version requires only the usual one or two seconds.

Statistics: Precognition (Accessibility, Once per night, -40%; Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Can be disrupted, -5%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Unreliable, 11, -20%) [29]. The improved version adds Reduced Time 10 (+200%) [+50].

Open Door

Keywords: None.

Full Cost: 1 point/level.

Casting Roll: None.

Range: 10 yards.

Duration: Instantaneous.

You can cause a door to swing open as if it was opened by somebody with ST equal to this spell's level. Locks prevent opening, unless this spell's ST is equal to outright break them.

Statistics: Telekinesis 1 (One Task, Opening doors, -80%; Sorcery, -15%) [1/level].

Orb of Fire

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become surrounded by a globular wall of fire that deals 1d-1 burning damage to everything in your hex and in the adjacent hexes. You also shed light as a torch. You and your gear are not damaged by your own Orb of Fire.

Statistics: Burning Attack 1d-1 (Area Effect, 2 yards, +50%; Aura, +80%; Melee Attack, Reach C, -30%; Sorcery, -15%) [8] + Illumination (Magical, -10%) [1].

Order from Chaos

Keywords: None.

Full Cost: 0.9 points/level.

Casting Roll: IQ. Does not cost FP on a successful casting.

Range: Unlimited.

Duration: Indefinite.

This spell attempts to harvest the energy released by someone else's magical backfire. Casting this spell is a free action that can be done not on your turn when the caster witnesses another caster critically fail a casting. When in doubt about the magical backfire being obvious, make a Per-based Thaumatology roll.

The spell takes normal range penalties, but the subject is the *miscast*, not the caster.

Any success recovers energy points equal to margin of success, to a maximum of the cost of the miscast spell (not reduced for their high skill, if that is applicable to the magic system in use). Energy harvested is stored within an Energy Reserve (equal to the spells' level) that is provided by this spell and

can be used to use magical abilities. This energy drains away at a rate of one point per hour. This spell is practically useless unless the caster can have at least two active spells simultaneously.

Ordinary failure recovers no energy and costs 1 FP. Critical failure means the other caster's critical failure also affects the caster of Order from Chaos.

Statistics: Energy Reserve (Magical; Special Recharge, -70%) [0.9/level]. *Note:* This variant of Special Recharge requires an IQ roll, witnessing a critical failure, but does not require any extra advantages.

Orichalcum Edge

Keywords: Weapon Buff.

Full Cost: 30 points. (KYOS: 28 points).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Turns the surface of a metallic weapon into orichalcum, giving it a brassy tinge. This spell adds +2 to swing damage and +1 to thrust damage of the weapon. In addition, this spell increases the weapon's DR by 4. The GM should impose a level cap on this spell.

Statistics: Affliction 1 (HT; Accessibility, Only on metal weapons, -30%; Advantage, Orichalcum Edge, +210%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30] (KYOS: 28). *Note:* "Orichalcum Edge" is Striking ST 2 (Magical, -10%; One Attack, This weapon, -60%) [3] (KYOS: 1) + DR 4 (Magical, -10%) [18].

Oven Mitts

Keywords: None or Buff.

Full Cost: 1 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

Subject's hands gain DR 1 vs. burning damage from heat or fire.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Damage Resistance 1 (Limited, Heat/Fire, -40%; Partial, Hands, -40%; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Oven Mitts, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Oven Mitts" is Damage Resistance 1 (Limited, Heat/Fire, -40%; Magical, -10%; Partial, Hands, -40%) [1].

Pacify

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 52 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

Every sapient (IQ 6+) being in the area when the spell is cast must resist or become unwilling to take further offensive action unless first subjected to it, which breaks the spell. In effect, they acquire the Pacifism (Self-Defense Only) disadvantage (p. B148), recover instantly from all aggressive traits (including Berserk), stop interpreting mental disadvantages in ways that demand violence, and ignore orders to engage in hostilities.

For the purposes of this spell, "offensive action" – on behalf of both the subjects and those who interact with them – constitutes not merely attacks but *any* use of items or abilities that could inflict FP

or HP loss, affliction, or inconvenience. Those under the spell's influence are free to use active defenses, assist unaffected allies with helpful items or abilities, leave, summon aid, etc. Provided that a subject is left in peace, he'll return the favor, but if he's offered violence, this ends the spell on him, though not on others. To exploit this to get a friend to "snap out of it" calls for actual injury (at least 1 HP), as the magic gives the perception that any lesser hurt was a forgivable accident.

The basic (52-point) version of this spell covers a two-yard radius. For each additional 5 points, you may double this radius; e.g., four yards for 57 points, 8 yards for 62 points, or 16 yards for 67 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Affliction 1 (Will; Accessibility, Only sapient beings, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Pacifism (Self-Defense Only), +15%; Fixed Duration, +0%; Malediction 2, +150%; Negated Disadvantage, Berserk, +200%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Terminal Condition, Injury, -10%; Variable Area, +5%) [52]. Additional levels add Area Effect (+50%) [+5].

Padded Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes armor more resistant to blunt impacts. The armor's DR is multiplied against crushing damage, as shown on the table below. In addition, you can take the improved (68-point at 1st level, additional level cost is unchanged) version of this spell to additionally treat the armor as non-flexible against falling damage, eliminating blunt trauma in that one specific case.

Level	D R
1	x2
2	x3
3	x4

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Padded Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Padded Armor" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. The improved version removes -3 in penalties [+24]. This spell is based on the Padded Armor imbuelement skill from *Pyramid #3-4*.

Pain

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 second.

The subject feels a stab of agonizing pain. He must make a Will roll to avoid crying out. If he is in a precarious position (climbing, for instance), he must make a DX roll to avoid catastrophe! He has a -4 penalty to all DX, IQ, skill, and self-control rolls for the next second only. High Pain Threshold halves these penalties; Low Pain Threshold doubles them.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/180, -40%; Severe Pain, +40%; Sorcery, -15%) [26].

Panic

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 35 points for level 1 + 5 points/additional level.

Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

Those in the area leave the area immediately and become unwilling to enter it. You may reduce the area effect if you wish to. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (IQ; Accessibility, Only on sapient beings, -10%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [35]. Additional levels add Area Effect (+50%) [+5].

Paradox

Keywords: None.
Full Cost: 45 points.
Casting Roll: IQ.
Range: Self.
Duration: Instantaneous.

Paradox

Keywords: None.
Full Cost: 45 points.
Casting Roll: IQ.
Range: Self.
Duration: Instantaneous.

When this spell is cast, the caster may alter a minor event from his past that may affect the present. Such an event could be having bought a cask of ale instead of a cask of oil, or deciding that, instead of insulting the king, the caster insulted the king's daughter (as if that would make the situation any better).

The event to be changed should not be more than an hour in duration, and it must be something that was personally done by the caster, or something the caster could have influenced. Something should always be given up when this spell is used, the caster cannot simply add or remove an action. The caster can change an event as far back as one day.

It is the GM's call as to how the change proceeds forward, if at all. Often, things will not work out as neatly as the caster might hope.

To cast this spell, the caster must visualize his new action, concentrate for 10 seconds, and make a IQ roll. He may hurry the casting, but his roll will be at -1 per second of concentration omitted (-10 to cast with no preparation at all).

The caster can carry up to his Heavy Load when he casts Paradox.

This spell can only be cast once per day.

Statistics: Jumper (Time; Accessibility, Only to alter a short action, -10%; Extra Carrying Capacity, Heavy, +30%; Improved, +10%; Limited Jump, 1 day backwards, -20%; Limited Use, 1/day, -40%; Magical, -10%; Nuisance Effect, Cannot direct the actions, the events proceed as the GM says, -10%; Nuisance Effect, Must give up an action, -5%) [45]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Paralyze Limb

Keywords: Resisted (HT).
Full Cost: 28 points.
Casting Roll: Will. Use DX or unarmed combat skills to hit.
Range: Touch.
Duration: 1 minute.

The caster must strike the subject on a *limb* to trigger this spell (hits elsewhere have no effect). Armor does not protect. Resolve resistance on contact. If the subject fails to resist, the subject's limb is paralyzed for 1 minute; it is considered crippled for one minute.

Statistics: Affliction 1 (HT; Accessibility, Limbs only, -20%; Melee Attack, Reach C, -30%; Malediction 1, +100%; Paralysis, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [28].

Paranoia

Keywords: Resisted (Will).

Full Cost: 40 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

A sapient subject gains the Paranoia (p. B148) disadvantage.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Paranoia, +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [40].

Parthenogenesis

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You can trigger pregnancy by casting this spell. The fetus is effectively your clone.

Statistics: Parthenogenesis (Sorcery, -15%) [1].

Partial Petrification

Keywords: Resisted (HT).

Full Cost: 54 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Permanent.

With a touch, you can partially turn a living subject into stone! You can affect anything from a single finger to the whole body from the neck down, but you cannot affect the head. If the subject fails to resist, the body parts selected by the caster and anything he is carrying on those parts become stone. This does not affect magic items, backpacks, and things carried in hands. The subject's metabolism is magically altered to survive the experience. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53).

Statistics: Affliction 1 (HT; Can't petrify the head, -10%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Paralysis, Variant, +150%; Selective Effect, +20%; Sorcery, -15%) [54].

Partial Resurrection

Keywords: Buff.

Full Cost: 56 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Truly Permanent.

The caster reanimates a dead body as a zombie and attempts to reunite the owner's soul with it. If the subject agrees to return from the dead, the result is a free-willed undead version of that individual – not a mindless servant. The caster gets only one try per corpse. As with true Resurrection, the body must not have reached -10xHP. Anyone killed while raised by this spell is *truly* dead. Future attempts at resurrection by any means fail automatically.

Statistics: Affliction 1 (HT; Advantage, Partial Resurrection, +140%; Cosmic, Works on the dead, +50%; Extended Duration, Truly Permanent, +300%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [56]. *Notes:* "Partial Resurrection" is Alternate Form (Zombie; Magical, -10%) [14]. This version of Cosmic means it *only* works on the dead – not injured living creatures – and gives one try, ever.

Partial Shapeshifting (Chameleon Eyes)

Keywords: Buff.

Full Cost: 48 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Chameleon Eyes meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Chameleon Eyes, +320%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [48]. *Notes:* "Chameleon Eyes" is Alternate Form (Chameleon Eyes*; Magical, -10%) [32]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Enhanced Tracking 1 [5] and Peripheral Vision [15]. 20 points.

Partial Shapeshifting (Crocodile Jaws)

Keywords: Buff.

Full Cost: 34 points (KYOS: 38 points).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Crocodile Jaws meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Crocodile Jaws, +170%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33] (KYOS: 37). *Notes:* "Crocodile Jaws" is Alternate Form (Crocodile Jaws*; Magical, -10%) [17] (KYOS: 21). If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Sharp Teeth [1], Quirk (Slurred, but intelligible speech) [-1], and Bite ST +3 [3] (*GURPS Martial Arts: Technical Grappling*, page 28). 3 points. (KYOS – replace Bite ST +3 [3] with Bite ST +3 [7]).

Partial Shapeshifting (Elephant Trunk)

Keywords: Buff.

Full Cost: 45 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Elephant Trunk meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Elephant Trunk, +280%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Elephant Trunk" is Alternate Form (Elephant Trunk*; Magical, -10%) [28]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Colorblindness [-10], Extra Arm 1 [10] and Peripheral Vision [15]. *15 points.*

Partial Shapeshifting (Feathered Arms)

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Feathered Arms meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Feathered Arms, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Notes:* "Feathered Arms" is Alternate Form (Feathered Arms*; Magical, -10%) [14]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Flight (Winged, -25%) [30] and No Fine Manipulators [-30]. *0 points.*

Partial Shapeshifting (Fish Tail)

Keywords: Buff.

Full Cost: 48 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Fish Tail meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Fish Tail, +320%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [48]. *Notes:* "Fish Tail" is Alternate Form (Fish Tail*; Magical, -10%) [32]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Enhanced Move (Water) 1 [20] and No Legs (Aquatic) [0]. *20 points.*

Partial Shapeshifting (Mountain Goat Hooves)

Keywords: Buff.

Full Cost: 39 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Fish Tail meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Mountain Goat Hooves, +230%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Notes:* “Mountain Goat Hooves” is Alternate Form (Mountain Goat Hooves*; Magical, -10%) [23]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Hooves [3] and Super Climbing 3 (Accessibility, Only when mountaineering, -30%) [6]. *9 points.*

Partial Shapeshifting (Saber Teeth)

Keywords: Buff.

Full Cost: 30 points (KYOS: 31 points).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Saber Teeth meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Saber Teeth, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30] (KYOS: 31). *Notes:* “Saber Teeth” is Alternate Form (Saber Teeth*; Magical, -10%) [14] (KYOS: 15). If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Colorblindness [-10], Fangs [2], Quirk (Slurred, but intelligible speech) [-1], and Bite ST +3 [3] (*GURPS Martial Arts: Technical Grappling*, page 28). *-6 points.* (KYOS – replace Bite ST +3 [3] with Bite ST +3 [7]).

Partial Shapeshifting (Scorpion Tail)

Keywords: Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Scorpion Tail meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Scorpion Tail, +280%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Scorpion Tail” is Alternate Form (Scorpion Tail*; Magical, -10%) [28]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Striker (Impaling) [8] and Toxic Attack 1d+2 (Follow-Up, Striker, +0%; Resistible, HT-6, +0%) [7]. *15 points.*

Partial Shapeshifting (Serpent’s Fangs)

Keywords: Buff.

Full Cost: 33 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Serpent's Fangs meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Serpent's Fangs, +170%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [33]. *Notes:* "Serpent's Fangs" is Alternate Form (Serpent's Fangs*; Magical, -10%) [17]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Toxic Attack 1d+1 (Contact Agent, -30%; Cyclic, 3 1-day cycles, Resistible, +15%; Melee Attack, Reach C, Cannot Parry, -35%; Resistible, HT-4, -10%) [3]. *3 points.*

Partial Shapeshifting (Skunk Tail)

Keywords: Buff.

Full Cost: 41 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Skunk Tail meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Skunk Tail, +250%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [41]. *Notes:* "Skunk Tail" is Alternate Form (Skunk Tail*; Magical, -10%) [25]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Immunity to Skunk Stench [1], Tail [0], and Toxic Attack 1d (Area Effect, 2 yards, +50%; Drifting, +20%; Limited Arc, Straight Behind, -40%; Persistent, +40%; Reduced Range, 1/10, -30%; Resisted, HT, -25%; Respiratory Agent, +50%; Symptoms, 2/3 HP, Choking, +100%; Variable, Area, +5%) [11]. *12 points.*

Partial Shapeshifting (Spider Arms)

Keywords: Buff.

Full Cost: 71 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Spider Arms meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Spider Arms, +550%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [71]. *Notes:* "Spider Arms" is Alternate Form (Spider Arms*; Magical, -10%) [55]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Extra Arm 2 [20] and Extra Attack 1 [25]. *45 points.*

Partial Shapeshifting (Tiger Paws)

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Tiger Paws meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Tiger Paws, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Notes:* "Tiger Paws" is Alternate Form (Tiger Paws*; Magical, -10%) [14]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: No Fine Manipulators [-30], Sharp Claws [5], and Arm ST +3 [15] (*GURPS Martial Arts: Technical Grappling*, page 28). -10 points.

Partial Shapeshifting (Toad Tongue)

Keywords: Buff.

Full Cost: 57 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Toad Tongue meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Toad Tongue, +410%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [57]. *Notes:* "Toad Tongue" is Alternate Form (Toad Tongue*; Magical, -10%) [41]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: Extra Arm 1 (Long 1, +100%; Weak, 1/4 ST, -50%) [15] and Peripheral Vision [15]. 30 points.

Partial Shapeshifting (Turtle Shell)

Keywords: Buff.

Full Cost: 42 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster partially transforms his subject into an animal. The subject gains the Turtle Shell meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

Statistics: Affliction 1 (HT; Advantage, Turtle Shell, +260%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [42]. *Notes:* "Turtle Shell" is Alternate Form (Turtle Shell*; Magical, -10%) [27]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A new meta-trait: DR 5 (Cannot Wear Armor, -40%; Torso Only, -10%) [13]. 13 points.

Partial Vitrification

Keywords: Resisted (HT).

Full Cost: 54 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Permanent.

With a touch, you can partially turn a living subject into glass! You can affect anything from a single finger to the whole body from the neck down, but you cannot affect the head. If the subject fails to resist, the body parts selected by the caster and anything he is carrying on those parts become glass. This does not affect magic items, backpacks, and things carried in hands. The subject's metabolism is

magically altered to survive the experience. Vitrified parts are Fragile (Brittle) and DR 2. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53).

Statistics: Affliction 1 (HT; Can't vitrify the head, -10%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Paralysis, Variant, +150%; Selective Effect, +20%; Sorcery, -15%) [54].

Pathfinder

Keywords: Information.

Full Cost: 17 points.

Casting Roll: IQ. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

The subject recalls the direction to a certain place, or the proper way to go to get to that place – his choice, as if he had Absolute Direction (p. B34). The caster makes an IQ roll to impart the information in question. Time penalties apply, based on the time since the subject last time visited the place in question. Use *Long-Distance Modifiers* (p. B241) and substitute “days” for “miles.” A critical failure could cause tell the subject a wrong direction!

This spell does not work in environments such as interstellar space or the limbo of the astral plane, but it *does* work underground, underwater, and on other planets.

Statistics: Affliction 1 (HT; Advantage, Pathfinder, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Requires IQ Roll, -10%; Sorcery, -15%; Time-Spanning, Past, +50%) [17]. *Note:* “Pathfinder” is Absolute Direction (Magical, -10%) [5].

Patience

Keywords: None or Buff.

Full Cost: 3 or 16 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 30 minutes.

Subject, who must be a willing sapient creature, gains the effects of Attentive (p. B163) with respect to one specific, lengthy task, chosen at the time of casting. Very long tasks might require multiple castings of this spell.

The basic (3-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. However, unlike most other maintainable spells, maintaining this one costs 1 FP per 30 minutes, not 1 FP per minute. The improved (16-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Controllable Disadvantage (Attentive; Cosmic, No die roll required, +100%; Extended Duration, 30x, +60%; Sorcery, -15%) [3]. The improved version is Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Disadvantage, Attentive, +1%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [16].

Peacebond

Keywords: None.

Full Cost: 25 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Five hours.

The sorcerer must touch a manufactured weapon in its sheath, holder, quiver, or whatever object is used to hold it when not in use. This spell makes the weapon stuck in its holder. No amount of

physical effort can draw it forth before the spell expires or is dispelled. The precise nature of the holder doesn't matter; it can be an ornate sheath, or simply a belt through which the weapon has been stuck.

If the bearer of the targeted weapon is attacked, he is immediately entitled to a Will roll to overcome the effect and draw the weapon. The bearer can repeat this save in every second that the assault continues.

Statistics: Affliction 1 (HT; Accessibility, Only sheathed weapons, -50%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Melee Attack, Reach C, -30%; No Signature, +20%; Paralysis, Variant, +150%; Sorcery, -15%; Terminal Condition, Being attacked, -5%) [25].

Peaceful Sleep

Keywords: Buff.

Full Cost: 56 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

Sapient subject becomes able to get a night of peaceful sleep regardless of any condition. He loses such advantages as Insomniac, Light Sleeper, and Nightmares, and becomes immune to effects that impose such advantages. In addition, he never suffers any ill effects due to the quality of his sleep. He gets an IQ roll to notice disturbances and awaken, just like anyone else; success is automatic if he has Combat Reflexes.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient creatures, -10%; Advantage, Peaceful Sleep, +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Insomniac, +150%; Negated Disadvantage, Light Sleeper, +50%; Negated Disadvantage, Nightmares, +120%; No Signature, +20%; Sorcery, -15%) [56]. *Note:* "Peaceful Sleep" is Deep Sleeper (Magical, -10%) [1].

Pebble

Keywords: Missile, Obvious.

Full Cost: 1 point.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 50 yards.

Duration: Instantaneous.

You throw a small pebble at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does not deal any damage, but nonetheless can be blocked. Useful to bring attention.

Statistics: Crushing Attack 1d (Blockable, -5%; No Blunt Trauma, -20%; No Knockback, -10%; No Wounding, -50%; Reduced Range, 1/2, -10%; Sorcery, -15%) [1].

Pedomancy

Keywords: Information.

Full Cost: 39 or 89 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Pedomancy is divination by examining the footprint of the person to be studied. The footprint should be in clay; special clays, or special materials mixed with the clay, may be required, or may offer bonuses. Footprints not in clay are read at -5. Pedomancy is only really suited to answering questions about the subject; attempts to divine information about absent persons are at -5.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (39-point) version of this spell requires 10 minutes to cast! The improved (89-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Environmental, Clay, -20%; Magical, -10%; Nuisance Effect, Penalty for impersonal questions, -5%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%) [39]. The improved version adds Reduced Time 10 (+200%) [+50].

Pentagram

Keywords: Area (Leveled).

Full Cost: 291 points for level 1 + 40 points/additional level (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

The sorcerer conjures an invisible dome-shaped magical barrier that blocks non-summoning spells and magical creatures from passing in either direction, even if they are insubstantial. Any magical (zombie, golem, elemental, demon, etc.) creature wishing to cross the barrier may try to force its way through it as a free action (one attempt per turn): the creature rolls thrust damage and if this overcomes the Pentagram's DR, it gets through. This does not dispel the Pentagram's barrier, which simply seals closed behind the creature. Slams and collisions with the Pentagram inflict their usual damage for the purpose of breaking through, but the collider takes no damage, as the barrier absorbs kinetic force.

The Pentagram gives DR against all mundane and magical attacks produced by the magical creatures contained within. Thus, the trapped creature cannot even push out a physical object out of the Pentagram, unless it manages to break the barrier's DR.

Spells can be cast within the Pentagram, but no spell, except for the summoning ones, can cross its barrier in either direction. Jet and Missile spells that hit the barrier dissipate rather than attempting to break through the DR.

This spell must be cast on a star-shaped figure drawn on the floor or ground. If part of the pentagram is cut or erased (which can be done by a nonmagical creature from outside the Pentagram), its power will be lost until the caster can rejoin the pentagram and recast the spell.

By default, Pentagram provides DR 10. However, more potent versions are available that multiply DR and full cost by the same amount:

DR	Full Cost
10	291 points for level 1 + 40 points/additional level
20	476 points for level 1 + 65 points/additional level
30	661 points for level 1 + 90 points/additional level
50	1,031 points for level 1 + 140 points/additional level
100	1,956 points for level 1 + 265 points/additional level

Statistics: Damage Resistance 10 (Accessibility, Must be cast on a prepared pentagram of an appropriate size, -40%; Affects Insubstantial, +20%; Affects Others, +50%; Area Effect, 2 yards, +50%; Extended Duration, Permanent, +150%; Force Field, +20%; Limited, Magical creatures and physical objects moved by them, -60%; Link, +10%; Ranged, +40%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [185] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1] + Static (Magic; Accessibility, Does not affect summoning spells, -5%; Accessibility, Must be cast on a prepared pentagram of an appropriate size, -40%; Area Effect, 2 yards, +100%; Extended Duration, Permanent, +150%; Link, +10%; Only around the border of the area, -0%; Ranged, +40%; Magical, -10%; Variable, Area, +5%) [105]. Additional levels increase Area Effect (+50%) [+25 and +15]. More powerful versions leave Rules Exemption and Static as is but multiply DR and the cost of DR by 2, 3, 5, or 10. As a special effect, this forms a hemispherical dome, not a cylinder.

Perfect Illusion

Keywords: Area (Leveled).

Full Cost: 57.5 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use IQ or Artist (Illusion) to determine how convincing it is.

Range: 100 yards.

Duration: Indefinite.

You can create an illusion anywhere that you can see within 100 yards; see Area (Sorcery, p. 9) for the size. It affects hearing, taste, smell, Dark Vision, Infravision, Vibration Sense, as well as vision, but the sense of touch is not fooled. You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something “off.” Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere. However, even if they successfully “disbelieve,” your illusion doesn’t disappear. Thus, even an obvious illusion can be useful to block line of sight or act as white noise to mask quiet conversation.

You must concentrate to change the illusion or to have it behave “intelligently” (e.g., to make an illusionary person talk). Without concentration, it will conform to your expectations for how it should behave; e.g., an illusionary wolf will shy from a torch or snarl if someone comes close.

Statistics: Illusion (Extended, Dark Vision, +25%; Extended, Infravision, +10%; Extended, Taste/Smell, +20%; Extended, Vibration Sense, +20%; Independence, +40%; Ranged, +40%; Sorcery, -15%) [57.5*]. Additional levels add Area Effect (+50%) [+12.5*].

* Calculate the total cost and then round up.

Perfume

Keywords: Buff.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject smells strongly of any odor that the caster desires. The subject can detect the odor, but does not find it especially offensive (although his companions certainly might), regardless of its nature. The smell may be pleasant to elicit a +1 to Reaction from those who like the smell, or repulsive, granting the subject a -2 to Reaction from everyone who can smell him.

Statistics: Affliction 1 (HT; Alternative Enhancements, +12%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Note:* Alternative Enhancements are Advantage, Perfume, +10%, where “Perfume” is Perfume (Magical, -10%) [1] and Disadvantage, Bad Smell, +10%.

Permanent Beast Possession

Keywords: Resisted (Will).

Full Cost: 70 points.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite.

The caster can move his consciousness from his body to an animal’s body. In theory, he could live forever this way, moving from dying bodies to healthy ones. However, he cannot survive outside a living host. Should his current body die, he will die! Thus, he must keep his current host alive.

To possess an animal, the caster must concentrate for one second and physically touch it. The victim resists at +5 if it is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that animal again – it is “immune” to him. If the caster wins, he takes over the animal’s body, completely suppressing its personality. His previous host regains control of its body after 1d seconds of mental stun, and “comes to” with no memory of the possession.

The caster gains his new host’s ST, DX, and HT (and secondary characteristics calculated from these scores), as well as its physical advantages and disadvantages. He keeps his own IQ, Perception,

and Will, and all of his mental traits. The caster's social traits may apply, depending on the laws and values of his society. The caster's IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

The caster can freely access the memories of an animal host at any time. To recall a specific fact from the subject's memories requires a straight IQ roll, at no penalty for the time since takeover.

Statistics: Possession (Accessibility, Animals Only, -25%; Full Memory Access, +10%; Sorcery, -15%) [70].

Permanent Forgetfulness

Keywords: Resisted (Will).

Full Cost: 45 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

You cause the subject to permanently forget one fact and the fact that he ever knew that fact. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Accessibility, One fact at a time, -10%; Based on Will, +20%; Disadvantage, Total Amnesia, +25%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Selective Effect, +20%; Sorcery, -15%) [45].

Permanent Machine Possession

Keywords: Resisted (Will).

Full Cost: 75 points.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite.

The caster can move his consciousness from his body to a machine. In theory, he could live forever this way, moving from dying bodies to healthy ones. However, he cannot survive outside a living host. Should his current body be destroyed, he will die! Thus, he must keep his current host alive.

To possess a machine, the caster must concentrate for one second and physically touch it. The machine resists at +5 if it is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that machine again – the machine is “immune” to him. If the caster wins, he takes over the machine, completely suppressing its personality (if it exists). His previous host regains control of his body (if sentient) after 1d seconds of mental stun, and “comes to” with no memory of the possession.

The caster gains his new host's ST, DX, and HT (and secondary characteristics calculated from these scores), as well as his physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster's social traits may apply, depending on the laws and values of his society. The caster's IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

The caster can freely access the memories of a sentient host at any time. To recall a specific fact from the subject's memories requires a straight IQ roll, at no penalty for the time since takeover.

Statistics: Possession (Accessibility, Machines Only, -20%; Full Memory Access, +10%; Sorcery, -15%) [75].

Permanent Madness

Keywords: Resisted (Will).

Full Cost: 78 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to add the disadvantages.

Range: Unlimited.

Duration: Permanent.

You can cause a sapient subject to permanently go insane, adding him the appropriate disadvantages (for example, Berserk, Bestial, Chronic Depression, Confused, Delusions, Flashbacks, Paranoia, Phantom Voices, Phobia, etc.). If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject. You may substitute Brainwashing for IQ, if better. You are at -1 per full -5 points of disadvantages applied.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to cause insanity, -20%; Conditioning Only, -50%; Extended Duration, Permanent, +150%; Sorcery, -15%) [78].

Permanent Possession

Keywords: Resisted (Will).

Full Cost: 95 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

The caster can move his consciousness from body to body. In theory, he could live forever this way, moving from dying bodies to healthy ones. However, he cannot survive outside a living host. Should his current body die, he will die! Thus, he must keep his current host alive.

To possess a creature, the caster must concentrate for one second and physically touch him. The victim resists at +5 if he is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that subject again – he is “immune” to him. If the caster wins, he takes over his victim’s body, completely suppressing his personality. His previous host regains control of his body (if sentient) after 1d seconds of mental stun, and “comes to” with no memory of the possession.

The caster gains his new host’s ST, DX, and HT (and secondary characteristics calculated from these scores), as well as his physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster’s social traits may apply, depending on the laws and values of his society. The caster’s IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

The caster can freely access the memories of a sentient host at any time. To recall a specific fact from the subject’s memories requires a straight IQ roll, at no penalty for the time since takeover.

Statistics: Possession (Full Memory Access, +10%; Sorcery, -15%) [95].

Permanent Shapeshifting

Keywords: None.

Full Cost: 24 points or more; see text.

Casting Roll: None.

Range: Self.

Duration: Indefinite*.

Change to the form of an animal. Each animal form is a different spell, to be learned separately. The caster may only learn the form of an animal with which he is familiar. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. This means that the wearer cannot cast spells unless he knows them so well that they can be performed without gestures! Note that FP are not increased for spellcasting purposes.

Each day that the spell continues, the caster must make a roll against IQ; failure means that the caster loses a point of IQ, continuing until the normal IQ of that beast is reached. Should the caster’s IQ drop to 5, he is trapped in beast form forever unless the spell is removed by Remove Curse (other spells won’t counter it). Lost IQ is regained when native form is reassumed.

If the caster has a single Permanent Shapeshifting spell, it costs 24 points for a racial template worth no more than his native racial template. A more powerful form costs 24 points plus 90% of the difference in cost between the caster's native template and that of his animal form. If the caster has multiple Permanent Shapeshifting spells, he pays full cost for the most expensive form. The less powerful forms cost a flat 24 points apiece. Minimum cost per form is still 24 points.

Statistics: Alternate Form (Costs 1 FP, Only to activate, -1%; Magical, -10%; Nuisance Effect, IQ Reduction, -10%; Reduced Time 4, +80%) [24].

* Despite having Indefinite duration, this spell only requires 1 FP to cast, but not to maintain.

Personal Ablative Barrier

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You surround yourself with an ablative force screen. You gain DR 4 per level of this spell. This DR takes the form of a field projected a short distance from your body. This protects your body – including the eyes – as well as anything you are carrying, and reduces the damage from attacks before armor DR. This DR is ablative - it stops damage once. Each point of DR stops one point of basic damage but is destroyed in the process. Lost DR “heals” at the same rate as lost HP (including the effects of Regeneration, p. B80).

Statistics: DR 4 (Ablative, -80%; Force Field, +20%; Sorcery, -15%) [5/level].

Personal Absorb Impact

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain DR 4 per level of this spell against fall and collision damage. The velocity of falling is not altered. Reduced damage will be suffered upon landing on a normal surface (spikes, etc. would still do full damage). This DR counts as innate armor, i.e. is not considered flexible when calculating blunt trauma due to collisions and falls.

Statistics: DR 4 (Force Field, +20%; Limited, Fall and Collision Damage, -80%; Sorcery, -15%) [5/level].

Personal Accelerate Pregnancy

Keywords: None.

Full Cost: 20 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell speeds the safe development of an unborn child. At level 1, this spell doubles the rate of development, at level 2 the unborn baby develops thrice as fast, and so on. Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Altered Time Rate (Accessibility, Only to accelerate pregnancy, -80%; Magical, -10%) [20/level].

Personal Acid Sheath

Keywords: None.

Full Cost: 10 points.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

You are sheathed in acid that deals 1d-1 corrosion damage to enemies who touch your body.
Statistics: Corrosion Attack 1d-1 (Aura, +80%; Melee Attack, Reach C, -30%; Sorcery, -15%) [10].

Personal Aerial Flight

Keywords: None.
Full Cost: 32 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You can fly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, you'll need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). You cannot fly in a trace atmosphere, vacuum, or water

Your flight Move is Basic Speed x 2 (drop all fractions). Personal Aerial Flight includes the ability to hover at Move 0 as well.

Statistics: Flight (Environmental, Air, -5%; Sorcery, -15%) [32].

Personal Affect Spirits

Keywords: None.
Full Cost: 15 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell allows you to interact with incorporeal spirits as if they were solid. Any weapon you wield has the ability to harm spirits.

Statistics: Blessed (Ghost Weapon; Costs Fatigue, 1 FP, -5%; Magical, -0%) [15]. Magical costs -0% because Blessed already includes the Divine power modifier. Magical, -0% just replaces it.

Personal Air Vision

Keywords: None.
Full Cost: 9 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You can see through smoke, fog, dust, sand, etc. Each level of this spell allows you to see through up one foot of smoke, fog, dust, sand, etc. You can just barely see the outline of the substance you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Air, -40%) [9]. Each additional level adds two more levels of Penetrating Vision [+9].

Personal Alcohol Tolerance

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your body metabolizes alcohol with remarkable efficiency. You can drink steadily while the spell lasts with no major detrimental effects. Binging affects you as it would anyone else. You get +2 on all HT rolls related to drinking. Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Alcohol Tolerance (Magical, -10%) [1].

Personal Alertness

Keywords: None.

Full Cost: 4.25 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You increase your Per by 1 per level of this spell.

Statistics: Per 1 (Sorcery, -15%) [4.25/level].

Personal All-Eater

Keywords: None.

Full Cost: 5 points or 20 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The basic (5-point) version of this spell allows you to eat derive nutrition from any nontoxic animal or plant protein, but does not grant any resistance to poison. The improved (20-point) version of this spell lets you eat anything organic or inorganic (but not antimatter), even if it's corrosive, toxic, or radioactive. Your body instantly converts it to something harmless.

Statistics: Universal Digestion (Sorcery, -15%) [5]. The improved version replaces it with Universal Digestion (Matter Eater, +300%; Sorcery, -15%) [20].

Personal Alter Gender

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You can alter your gender. The process takes 10 seconds.

Statistics: Hermaphromorph (Sorcery, -15%) [5].

Personal Alter Visage

Keywords: None.

Full Cost: 17 points.

Casting Roll: None or Disguise.

Range: Self.

Duration: Indefinite.

You can alter your facial features (but not clothing or makeup) to duplicate those of another member of your race or a very similar race. This requires a Disguise roll if you try to duplicate a particular individual. This ability gives +4 to all Disguise rolls.

Statistics: Elastic Skin (Sorcery, -15%) [17].

Personal Ambidexterity

Keywords: None.

Full Cost: 5 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You have the Ambidexterity (p. B39) advantage while the spell is active.
Statistics: Ambidexterity (Sorcery, -15%) [5].

Personal Analgesic

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become more resistant to *persistent* pain (shock in combat does not count), ignoring -1 in penalties from effects that cause it. Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Analgesic (Magical, -10%) [1].

Personal Androgyny

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You retain your original gender, but your physical appearance is altered. If male, you become less masculine in appearance; if female, you become more masculine in appearance. You can be mistaken for whatever gender is convenient. Your looks appeal equally to both sexes. You get a flat reaction modifier instead of a gender-dependent bonus: +3 for Handsome, +4 for Very Handsome, or +5 for Transcendent. Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Androgynous (Magical, -10%) [1].

Personal Ant Haul

Keywords: None.
Full Cost: 2.55 points/level.
Full Cost (KYOS): 5.95 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell optimizes your musculature for lifting, granting you Lifting ST 1 (p. B65) for each spell level.

Statistics: Lifting ST 1 (Sorcery, -15%) [2.55/level].

Statistics (KYOS): Lifting ST 1 (Sorcery, -15%) [5.95/level].

Personal Antiemetic

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become more resistant to nausea, ignoring -1 in penalties from effects that cause it. Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Antiemetic (Magical, -10%) [1].

Personal Antihistamine

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become more resistant to sneezing and itching, ignoring -1 in penalties from effects that cause it. Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Antihistamine (Magical, -10%) [1].

Personal Antistatic

Keywords: None.

Full Cost: 14 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You give yourself a negative electrical charge that diverts incoming electrical attacks, giving you +2 to dodge them.

Statistics: Enhanced Dodge 2 (Limited, Electricity, -40%; Sorcery, -15%) [14].

Personal Armor

Keywords: None.

Full Cost: 10.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You and all of your carried gear are protected by an invisible field of pure force. This increases your DR by twice the level of this spell (e.g., Armor 3 adds DR 6), cumulative with that from actual armor.

Statistics: Damage Resistance 2 (Force Field, +20%; Sorcery, -15%) [10.5/level].

Personal Assassin's Bane

Keywords: None.

Full Cost: 16.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You, and all of your carried gear, are protected by an invisible field of pure force, but *only from the back*. This increases your DR by twice the level of this spell (e.g., Assassin's Bane 3 adds DR 6), cumulative with that from actual armor against attacks made from the back.

In addition, this spell reflects any damage it stops at your attacker. The remaining damage affects you normally. The attacker doesn't get an active defense against the first attack the spell reflects back at him, but gets his usual defenses against subsequent reflected attacks. Reflection only works vs. direct hits!

Statistics: Damage Resistance 2 (Directional, Back, -40%; Force Field, +20%; Reflection, +100%; Sorcery, -15%) [16.5/level].

Personal Astral Vision

Keywords: None.
Full Cost: 13 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell allows you to see invisible insubstantial entities. Examples include ghosts and subjects of Ethereal Body, Projection, or Astral Trip spells.

Statistics: See Invisible (Insubstantial; Sorcery, -15%) [13].

Personal Balance

Keywords: None.
Full Cost: 13 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You have the Perfect Balance (p. B74) advantage while the spell is active.

Statistics: Perfect Balance (Sorcery, -15%) [13].

Personal Banefire Shield

Keywords: None.
Full Cost: 47 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become sheathed in banefire – sickly green fire from the Realms of the Dead - that deals 1d-1 burning damage to enemies who touch your body and ages them 1d-1 years. Banefire only affects living creatures, causing them to age rapidly. The banefire sticks to the target, damaging it again every 10 second for 4 more cycles. The cycles can be stopped by dousing the flames with holy water. This is *injury* that comes right off HP – not damage that must penetrate DR again, be multiplied for damage type, and so forth. Each instance of damage, including the initial one, can be negated with a successful Will roll. If a victim successfully resists, the flames go out.

Statistics: [Ageing Attack](#) 1d-1 (Accessibility, Only on living, -10%; Aura, +80%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Link, +10%; Melee Attack, Reach C, -30%; Resistible, Will, -30%; Sorcery, -15%) [37] + Burning Attack 1d-1 (Accessibility, Only on living, -10%; Aura, +80%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Link, +10%; Magical, -10%; Melee Attack, Reach C, -30%; Resistible, Will, -30%) [9] + Illumination (Magical, -10%) [1].

Personal Bear Hug

Keywords: None.
Full Cost: 13 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your musculature become optimized for squeezing, granting you the Constriction Attack advantage (p. B43).

Statistics: Constriction Attack (Sorcery, -15%) [13].

Personal Bender Defender

Keywords: None.

Full Cost: 2 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You have the Alcohol Tolerance (p. B100) and No Hangover (p. B101) perks while this spell is active. Unlike most spells with an indefinite duration, this spell costs 1 FP per hour, not 1 FP per minute to maintain.

Statistics: Alcohol Tolerance (Magical, -10%) [1] + No Hangover (Magical, -10) [1].

Personal Blade Barrier

Keywords: None.

Full Cost: 20 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You are surrounded by a horizontal barrier of transparent blades of force. Everyone adjacent to you or in close combat with you is attacked each second with an effective skill of 14, modified only for size. This attack deals 1d+1 cutting damage. The blade barrier affects even insubstantial creatures.

Statistics: Cutting Attack 1d+1 (Affects Insubstantial, +20%; Area Effect, 2 yards, +50%; Aura, +80%; Bombardment, Skill 14, -5%; Melee Attack, Reach C, -30%; Sorcery, -15%) [20].

Personal Blend In

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

It becomes easy for you to blend in. Your face is hard to pick out or remember. You get +1 to Shadowing in crowds, while others have -1 to rolls made to recognize you from a lineup or mug shots – or even to recall meeting you! Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Forgettable Face (Magical, -10%) [1].

Personal Blindsight

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can detect the location and size of objects by sensing the minute disturbances of air around you. You can locate an opponent in the dark, but you cannot detect details (e.g., whether he is armed). In a perfectly still environment, you would be able to sense a barrier before you run into it, and could find openings by sensing the flow of air.

To use Blindsight, you must make a Sense roll. Consult the *Size and Speed/Range Table* (p. B550) and apply separate bonuses for the target's size and speed, and a penalty for the range to the target. A successful roll reveals the rough size, location, speed, and direction of movement of the target. It does not provide any information about the object's shape, color, etc. Once you have detected something,

you may target it with an attack. The modifiers that applied to your Sense roll also apply to your attack roll, but can never give you a bonus to hit.

If you are wearing a sealed suit, this ability does not work at all!

Statistics: Vibration Sense (Air; Sorcery, -15%) [9].

Personal Blood Lust

Keywords: None.

Full Cost: 26 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Discriminatory Smell (p. B49), Fearlessness 2 (p. B55), and High Pain Threshold (p. B59) advantages.

Statistics: Discriminatory Smell (Sorcery, -15%) [13] + Fearlessness 2 (Magical, -10%) [4] + High Pain Threshold (Magical, -10%) [9].

Personal Blur

Keywords: None.

Full Cost: 12 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You and all of your carried equipment become blurred. This gives a -3 penalty to Vision rolls to see the you with normal vision and -3 penalty to attacks against you that rely on normal vision. Infravision is not fooled by this spell.

Statistics: Obscure 3 (Vision; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [12].

Personal Body Blades

Keywords: None.

Full Cost: 6 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your body grows metal blades. If you are wearing clothing or armor up to your Heavy Encumbrance, then these blades appear on it without harming the gear. This is defensive weaponry, intended to discourage attackers; you cannot use your body blades actively. However, you get a DX-4 roll to hit each foe in close combat with you once per turn, as a free action. Roll at +2 against foes who attacked you from behind. Those who grapple or slam you are hit immediately and automatically – and those who slam you take maximum damage! The body blades have Reach C and do 1d impaling damage.

Statistics: Long Spines (Can Carry Objects, Heavy, +100%; Sorcery, -15%) [6].

Personal Body of Acid

Keywords: None.

Full Cost: 201 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Acid meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation to or from this form takes 10 seconds.

Statistics: Alternate Form (Body of Acid*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [201].

* A new meta-trait: Amphibious [10]; Constriction Attack [15]; Corrosion Attack 1d-1 (Always On, -40%; Aura, +80%; Melee Attack, Reach C, -30%) [8]; DR 10 (Limited, Acid, -40%; Tough Skin, -40%) [10]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Immunity to Noxious Acidic Effects [10]; Injury Tolerance (Diffuse) [100]; Internal Sealed (Acid-Resistant Only, -60%) [2]; Pressure Support 3 [15]; Sealed (Acid-Resistant Only, -60%) [6]; Slippery 5 [10]; Invertebrate [-20]; and Vulnerability (Dehydration attacks x2) [-10]. *206 points.*

Personal Body of Air

Keywords: None.

Full Cost: 48 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Air meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation to or from this form takes 10 seconds.

Statistics: Alternate Form (Body of Air*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [48].

* A meta-trait from p. 262 of *GURPS Basic Set*: ST 0 [-100]; +10 HP [20]; Doesn't Breathe [20]; Flight (Lighter Than Air, -10%) [36]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Legs (Aerial) [0]; No Manipulators [-50]; Vulnerability (Vacuum and wind-based attacks x2) [-20]; and Taboo Trait (Fixed ST) [0]. *36 points.*

Personal Body of Earth

Keywords: None.

Full Cost: 173 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Earth meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Earth*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [173].

* A meta-trait from p. 262 of *GURPS Basic Set*: Doesn't Breathe [20]; DR 2 [10]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Pressure Support 3 [15]; Sealed [15]; Vacuum Support [5]; and Invertebrate [-20]. *175 points.*

Personal Body of Flames

Keywords: None.

Full Cost: 21 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Fire meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Fire*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [21].

* A meta-trait from p. 262 of *GURPS Basic Set*: ST 0 [-100]; +10 HP [20]; Burning Attack 1d (Always On, -40%; Aura, +80%; Melee Attack, Reach C, -30%) [6]; Doesn't Breathe (Oxygen Combustion, -50%) [10]; DR 10 (Limited: Heat/Fire, -40%) [30]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Manipulators [-50]; Weakness (Water; 1d/minute) [-40]; and Taboo Trait (Fixed ST) [0]. *6 points.*

Personal Body of Fungus

Keywords: None.

Full Cost: 84 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Fungus meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Fungus*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [84].

* A variant of the meta-trait from p. 165 of *GURPS Magic*: Basic Speed-1 [-20]; Blunt Claws [3]; DR 2 (Semi-Ablative, -20%) [8]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous) [40]; Lifting ST 5 [15]; Numb [-20]; and Affected by Fungus Spells [0]. *76 points.*

Personal Body of Fluid

Keywords: None.

Full Cost: 183 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Air meta-trait *or* the Body of Water meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation to or from this form takes 10 seconds.

Statistics: Alternate Form (Body of Air*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [48/5=10] + Alternate Form (Body of Water**; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [173]. The two abilities are taken as alternative abilities.

* A meta-trait from p. 262 of *GURPS Basic Set*: ST 0 [-100]; +10 HP [20]; Doesn't Breathe [20]; Flight (Lighter Than Air, -10%) [36]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Legs (Aerial) [0]; No Manipulators [-50]; Vulnerability (Vacuum and wind-based attacks x2) [-20]; and Taboo Trait (Fixed ST) [0]. *36 points.*

** A meta-trait from p. 262 of *GURPS Basic Set*: Amphibious [10]; Chameleon 1 [5]; Constriction Attack [15]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Pressure Support 3 [15]; Slippery 5 [10]; Invertebrate [-20]; and Vulnerability (Dehydration attacks x2) [-10]. *175 points.*

Personal Body of Glass

Keywords: None.

Full Cost: 112 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Glass meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Glass*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [112].

* A meta-trait from p. 18 of *Pyramid #3-114*: Chameleon 1 (Always On, -10%) [5]; Doesn't Breathe [20]; DR 1 [5]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; Slippery 1 [2]; Vacuum Support [5]; Fragile (Brittle) [-15]; and Vulnerability (Sonic or Vibratory Attacks x2) [-20]. *107 points.*

Personal Body of Ice

Keywords: None.

Full Cost: 105 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Ice meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Ice*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [105].

* A meta-trait from p. 262 of *GURPS Basic Set*: Doesn't Breathe [20]; DR 3 [15]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; Slippery 3 [6]; Terrain Adaptation (Ice) [5]; Vacuum Support [5]; Fragile (Brittle) [-15]; Vulnerability (Heat/fire attacks, x2) [-30]; and Weakness (Intense normal heat; 1d/minute; Variable, -40%) [-12]. *99 points.*

Personal Body of Leaves

Keywords: None.

Full Cost: 17 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your body transmogrifies into a mound of leaves, roughly hemispheric with an 18" peak. You have the Body of Leaves meta-trait for the duration of the spell. You are inconspicuous in most outdoor environments. Clothes and carried items, up to your BL, are subsumed into the new form. To determine what gets left behind, begin with the heaviest items. Subsumed magic items are temporarily inoperable. You may cast any spells that have no ritual requirement. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Leaves*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [17].

* A meta-trait from p. 11 of *GURPS Magic: Plant Spells*: ST -10 [-100]; HP +10 [20]; Chameleon 6 (Limited to locations where a pile of leaves could be found, -60%) [12]; Doesn't Breathe [20]; Double-Jointed [15]; Fragile (Combustible) [-5]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Mute [-25]; No Legs (Slithers) [0]; No Fine Manipulators [-30]; Numb [-20]; Reduced Move -4 [-20]; Silence 5 [25]; Vulnerable (Wind Attacks, x2) [-20]. Affected by Plant spells [0]; Taboo Trait (Fixed ST) [0]. *2 points.*

Personal Body of Light

Keywords: None.

Full Cost: 73 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Light meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Stop Power acts as Glue and Steal Power acts as Steal Strength on the subject.

Statistics: Alternate Form (Body of Light*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [73].

* A meta-trait from p. 21 of *Pyramid #3-115*: Doesn't Breathe [20]; Doesn't Eat or Drink [10]; Doesn't Sleep [20]; Flight [40]; Immunity to Metabolic Hazards [30]; Nocturnal (Diurnal,** +0%; Permanent Paralysis, +100%) [-40]; Shadow Form (Damaged by darkness-based attacks rather than light, -25%) [-15]; Supernatural Features (Glow in the dark) [-1]. *64 points*.

** Diurnal means you are paralyzed if your entire body is in darkness (as opposed to in sunlight); with this, Permanent Paralysis requires total darkness, not merely the absence of sunlight.

Personal Body of Lightning

Keywords: None.

Full Cost: 66 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Lightning meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. Stop Power acts as Glue and Steal Power acts as Steal Strength on you. The transformation to or from this form takes 10 seconds.

Statistics: Alternate Form (Body of Lightning*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [66].

* A meta-trait from p. 198 of *GURPS Basic Set*: ST 0 [-100]; HP +10 [20]; Burning Attack 1d (Always On, -40%; Aura, +80%; Melee Attack, Reach C, -30%) [6]; Doesn't Breathe [20]; DR 10 (Limited: Electricity, -40%) [30]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Manipulators [-50]; Feature (Affected by Energy Spells (*GURPS Magic*, p. 178) [0]; and Taboo Trait (Fixed ST) [0]. *56 points*.

Personal Body of Metal

Keywords: None.

Full Cost: 172 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain a slightly altered Body of Metal meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Metal*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [172].

* A slightly altered meta-trait from p. 262 of *GURPS Basic Set*: Affected by Magnetism [-1]; Doesn't Breathe [20]; DR 9 [45]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; and Vacuum Support [5]. *174 points*.

Personal Body of Plastic

Keywords: None.

Full Cost: 128 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Plastic meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Plastic*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [128].

* A meta-trait from p. 183 of *GURPS Magic*: Doesn't Breathe [20]; DR 1 [5]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 1 [5]; Sealed [15]; Vacuum Support [5]. *125 points.*

Personal Body of Slime

Keywords: None.

Full Cost: 69 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Slime meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Slime*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [69].

* A meta-trait from p. 165 of *GURPS Magic*: Amphibious [10]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous) [40]; Bad Smell [-10]; Disturbing Voice [-10]; Invertebrate [-20]; Affected by Plant spells [0]. *60 points.*

Personal Body of Stone

Keywords: None.

Full Cost: 141 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Stone meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Stone*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [141].

* A meta-trait from p. 262 of *GURPS Basic Set*: Doesn't Breathe [20]; DR 5 [25]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous, No Blood) [45]; Pressure Support 3 [15]; Sealed [15]; Vacuum Support [5]; and Fragile (Brittle) [-15]. *140 points.*

Personal Body of Water

Keywords: None.

Full Cost: 173 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain the Body of Water meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Water*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [173].

* A meta-trait from p. 262 of *GURPS Basic Set*: Amphibious [10]; Chameleon 1 [5]; Constriction Attack [15]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; Pressure Support 3 [15]; Slippery 5 [10]; Invertebrate [-20]; and Vulnerability (Dehydration attacks x2) [-10]. *175 points.*

Personal Body of Wind

Keywords: None.

Full Cost: 292 points.

Casting Roll: None.

Range: Self.
Duration: Indefinite.

You gain the Body of Wind meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation to or from this form takes 10 seconds.

Statistics: Alternate Form (Body of Wind*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [292].

* A new meta-trait: ST+6 [60]; +10 HP [20]; Doesn't Breathe [20]; Flight (Lighter Than Air, -10%) [36]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Diffuse) [100]; No Legs (Aerial) [0]; No Fine Manipulators [-30]; Storm** [71]; and Taboo Trait (Fixed ST) [0]. *307 points.*

** "Storm" is Crushing Attack 4d (Always On, -20%; Aura, +80%; Area Effect, 2 yards, +50%; Double Knockback, +20%; Emanation, -20%; Environmental, Air, -5%; Link, +10%; Magical, -10%; Melee Attack, Reach C, -30%; No Blunt Trauma, -20%; No Wounding, -50%) [21] + Enhanced Dodge 2 (Affects Others 1, +50%; Area Effect, 2 yards, +50%; Environmental, Air, -5%; Force Field, +20%; Limited, Projectiles, -40%; Magical, -10%) [50]. *First, for every creature or unattended object within 2 yards of you, roll 4d as for crushing damage, determine knockback, and then double the distance; however, the victim suffers no actual damage or blunt trauma from the effect – just the consequences of being hurled around. As a special effect, knockback from this moves victims sideways (all clockwise or all anticlockwise; decide when triggering the attack) rather than away from you. Second, Dodge of you and all creatures within 2 yards of you is increased by 2 against projectile attacks.*

Personal Body of Wood

Keywords: None.
Full Cost: 84 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You gain the Body of Wood meta-trait; see the footnote below for details. Clothing and gear weighing no more than your BL change with you. The transformation takes 10 seconds.

Statistics: Alternate Form (Body of Wood*; Can Carry Objects, No Encumbrance, +10%; Sorcery, -15%) [84].

* A meta-trait from p. 165 of GURPS Magic: Basic Speed-1 [-20]; Blunt Claws [3]; DR 2 (Semi-Ablative, -20%) [8]; Doesn't Breathe [20]; Immunity to Metabolic Hazards [30]; Injury Tolerance (Homogenous) [40]; Lifting ST 5 [15]; Numb [-20]; and Affected by Plant Spells [0]. *76 points.*

Personal Bone Stakes

Keywords: None.
Full Cost: 6 points.
Casting Roll: None. Use DX or Brawling to attack or parry.
Range: Self.
Duration: Indefinite.

You grow sharp stakes from your arms, provided you have an internal skeleton. The stakes deal thrust impaling damage at range C, using DX or Brawling to attack and parry. For parrying purposes, the bone stakes have an effective weight equal to your ST/10. While others can't disarm you, they can still strike the bone stakes; they have DR 1 and are considered cheap for the purpose of parrying. They also have HP according to a homogeneous material with its weight (see p. B557). If broken, the bone stakes recover their HP at the same rate as your body.

Statistics: Natural Weapon (Impaling; Fragile, -20%; Sorcery, -15%) [6].

Personal Boost Dexterity

Keywords: None.

Full Cost: 18 points/level.
Casting Roll: None.
Range: Self.
Duration: One second.

This spell raises your DX by 1 per level of the spell for one second. The boosted attribute affects all secondary characteristics. This spell can be cast *instantaneously* while it is active, allowing you to use it as a response to an attack.

Statistics: DX (Reduced Duration, 1/60, -35%; Reflexive, +40%; Sorcery, -15%) [18/level].

Personal Boost Health

Keywords: None.
Full Cost: 6 points/level.
Casting Roll: None.
Range: Self.
Duration: One second.

This spell raises your HT by 1 per level of the spell for one second. The boosted attribute affects all secondary characteristics except FP. This spell can be cast *instantaneously* while it is active, allowing you to use it as a response to an attack.

Statistics: HT (Does not increase FP, -30%; Reduced Duration, 1/60, -35%; Reflexive, +40%; Sorcery, -15%) [6/level].

Personal Boost Intelligence

Keywords: None.
Full Cost: 18 points/level.
Casting Roll: None.
Range: Self.
Duration: One second.

This spell raises your IQ by 1 per level of the spell for one second. The boosted attribute affects all secondary characteristics. This spell can be cast *instantaneously* while it is active, allowing the caster to use it as a response to an attack.

Statistics: IQ (Reduced Duration, 1/60, -35%; Reflexive, +40%; Sorcery, -15%) [18/level].

Personal Boost Strength

Keywords: None.
Full Cost: 7 points/level.
Casting Roll: None.
Range: Self.
Duration: One second.

This spell raises your ST by 1 per level of the spell for one second. The boosted attribute affects all secondary characteristics except HP. This spell can be cast *instantaneously* while it is active, allowing you to use it as a response to an attack.

Statistics: HT (Doesn't Grant HP, -20%; Reduced Duration, 1/60, -35%; Reflexive, +40%; Sorcery, -15%) [7/level].

Personal Branch Fingers

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your digits become elongated and covered in bark. When you target the eyes with a barehanded strike or eye gouge, you get the x4 wounding modifier for the skull.

Statistics: Long Fingers (Sorcery, -15%) [1].

Personal Bravery

Keywords: None.

Full Cost: 7 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become braver. You add 4 to your Will whenever you make a Fright Check or must resist the Intimidation skill (p. B202) or a supernatural power that induces fear. You also subtracts 4 from all Intimidation rolls made against you. However, this bravery makes you overconfident. Treat this as having Overconfidence (p. B148) with a self-control number of 12.

Statistics: Fearlessness 4 (Sorcery, -15%; Temporary Disadvantage, Overconfidence (12), -5%) [7].

Personal Breakfall Plants

Keywords: None.

Full Cost: 6 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You subtract five yards from a fall automatically, if you fall onto some form of living plant material (treat this as an automatic Acrobatics success – don't check again for it). In addition, a successful DX roll halves damage from any fall.

Statistics: Catfall (Accessibility, Only when falling onto living plants, -50%; Feather Fall, +20%; Sorcery, -15%) [6].

Personal Breath Adaptation

Keywords: None.

Full Cost: 3 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your lungs can adapt to great pressure, permitting you to breathe unhindered (and avoid the bends) at up to 10 atmospheres. This allows you to travel as deep as 12.5 miles underground. This effect does *not* work underwater.

Statistics: Pressure Support 1 (Accessibility, Not under water, -30%; Sorcery, -15%) [3].

Personal Breathe Air

Keywords: None.

Full Cost: 7 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become able to breathe air as though it were water. You do not lose your ability to breathe water.

Statistics: Doesn't Breathe (Gills, -50%; Sorcery, -15%) [7].

Personal Breathe Water

Keywords: None.

Full Cost: 7 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become able to breathe water as though it were air. You do not lose your ability to breathe air.

Statistics: Doesn't Breathe (Gills, -50%; Sorcery, -15%) [7].

Personal Bright Vision

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your vision is protected against overload. It rapidly adapts to the most intense of stimuli, allowing you to function normally after a maximum of two seconds of impairment. You will never suffer permanent damage to vision as a result of excessive sensory input, and you get +5 to rolls to resist temporary damage and Vision-Based attacks. This spell resists glare and eye damage from lasers, and lets Dark Vision, Infravision, and Night Vision adjust instantly from bright light to darkness.

Statistics: Protected Vision (Sorcery, -15%) [5].

Personal Bullet Protection

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You, and all of you carried gear, are protected from bullets by an invisible field of pure force. This increases your DR against bullets by 4 per level of this spell (e.g., Bullet Protection 3 adds DR 12), cumulative with that from actual armor. This only affects firearm bullets, granting no protection against laser beams, sling bullets, bullets flung by telekinesis, etc.

Statistics: Damage Resistance 4 (Force Field, +20%; Limited, Firearm Bullets, -80%; Sorcery, -15%) [5].

Personal Bullet Shield

Keywords: None.

Full Cost: 1 point/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You, and all of your carried gear, are protected from bullets by an invisible field of pure force, but *only from the front*. This increases your DR against bullets by 1 per level of this spell (e.g., Bullet Shield 3 adds DR 3), cumulative with that from actual armor against attacks made from the front. This only affects firearm bullets, granting no protection against laser beams, sling bullets, bullets flung by telekinesis, etc.

Statistics: Damage Resistance 1 (Directional, Front, -20%; Force Field, +20%; Limited, Firearm Bullets, -80%; Sorcery, -15%) [1/level].

Personal Cadence

Keywords: None.

Full Cost: 20 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Doubles the rate of production of *mundane* crafted items by both hastening your movements and making them surer, eliminating wasted strokes. The spell is broken if you interrupt your work.

Statistics: Altered Time Rate 1 (Accessibility, Only for mundane crafting, -80%; Nuisance Effect, Broken if interrupted, -10%; Sorcery, -15%) [20].

Personal Catfall

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You subtract five yards from a fall automatically, if your body and limbs are free to move and twist (treat this as an automatic Acrobatics success – don't check again for it). In addition, a successful DX roll halves damage from any fall.

Statistics: Catfall (Sorcery, -15%) [9].

Personal Chameleon Skin

Keywords: None.

Full Cost: 4.25 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your skin changes its surface pattern to blend into the surroundings. In any situation where being seen is a factor, you get +2 per level to Stealth skill when perfectly still, or +1 per level if moving. Clothing reduces this bonus to +1 per level when you are motionless, with no bonus if you are moving (unless the clothing is, in the GM's opinion, camouflaged relative to your current environment). Chameleon Skin does not normally help in the dark or against someone relying upon senses other than sight.

Statistics: Chameleon 1 (Vision; Sorcery, -15%) [4.25/level].

Personal Clean Breath

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your respiratory system becomes able to filter out ordinary contaminants; e.g., dust, pollen, smoke, and even tear gas (but not nerve gas or other contact agents). You suffer no ill effects from such things.

Statistics: Filter Lungs (Sorcery, -15%) [5].

Personal Climbing

Keywords: None.

Full Cost: 2.55 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your Move when climbing or using the Clinging (p. B43) advantage is increased by 1 per level of this spell.

Statistics: Super Climbing (Sorcery, -15%) [2.55/level].

Personal Cloud-Walking

Keywords: None.
Full Cost: 9 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Clouds are like solid ground beneath your feet, allowing you to walk on them at your ground Move. If you get knocked down or slip, you fall! You may attempt one DX roll per second of falling. If you succeed, you stop in the clouds, unharmed, if there are still any clouds beneath you. Otherwise, you hit the ground for normal falling damage (see Falling, B431).

Statistics: Walk on Air (Sorcery, -15%; Specific, Cloud, -40%) [9].

Personal Conceal Magic

Keywords: None.
Full Cost: 42 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become nearly impossible to detect, sense, or divine with any Information spells, regardless of the magic system used to cast them. Conceal Magic reduces the diviner's effective margin of success by 10 for these purposes – so a spell that succeeded by 0-9 completely fails to find you, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it's resisted.

Unlike Scryguard, this spell's presence is completely undetectable by Detect Magic (*GURPS Thaumatology*: Sorcery, p. 19) and similar abilities.

Statistics: Obscure 10 (Information Spells; Defensive, +50%; Low Psychic Signature 5, +25%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [42].

Personal Contragrav Flight

Keywords: None.
Full Cost: 32 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You can fly by pushing off against the local gravity field. It is useless in the absence of a planet or another celestial body with a gravity field.

Your flight Move is Basic Speed x 2 (drop all fractions). Personal Contragrav Flight includes the ability to hover at Move 0 as well.

Statistics: Flight (Planetary, -5%; Sorcery, -15%) [32].

Personal Corona of Cold

Keywords: None.
Full Cost: 9 points.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

You are sheathed in cold that deals 1d-1 non-incendiary burning damage to enemies who touch your body. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute).

Statistics: Burning Attack 1d-1 (Aura, +80%; Melee Attack, Reach C, -30%; No Incendiary Effect, -10%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [9].

Personal Corona of Frost

Keywords: None.
Full Cost: 18 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You are sheathed in frost that deals 1d-1 fatigue damage to enemies who touch your body. Treat FP lost to the attack identically to FP lost to cold for *all* purposes, notably recovery (see *Cold*, p. B430). Targets who took damage from this spell must make an HT roll, at -1 per 2 points of FP lost, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute).

Statistics: Fatigue Attack 1d-1 (Aura, +80%; Freezing, +20%; Melee Attack, Reach C, -30%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [18].

Personal Dark Vision

Keywords: None.
Full Cost: 22 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell allows you to see even in pitch darkness, as if you had the Dark Vision advantage.

Statistics: Dark Vision (Sorcery, -15%) [22].

Personal Death Ward

Keywords: None.
Full Cost: 9 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become immune to death curses. This includes death spells, direct-damage Necromantic magic (Burning Death, Rotting Death, etc.), and elixirs of Death (*GURPS Magic*, p. 215), plus non-magical equivalents such as Afflictions enhanced with Coma or Heart Attack, when they're chi, divine, psionic, or spirit abilities, or something similar.

Statistics: Immunity to Death Curses (Sorcery, -15%) [9].

Personal Decapitation

Keywords: None.
Full Cost: 53 points.
Casting Roll: None.
Range: Self.
Duration: Permanent until reattached.

Your head comes off! When this spell is cast, your head (or one of them, if you has several) comes free of its body, but continues to live on its own. You are not harmed, but the head takes falling damage if it is not carefully removed or caught! The head can talk, see, and control the actions of its body normally. If the head is somehow blinded (put in a bag, for instance), then it will have trouble telling its body where to walk.

The head has your DX and HT, HP/2, and Move and Dodge 0. It can bite at full ST in close combat. If the head is your seat of consciousness, your body fights as its ally. If it isn't (for instance, if you have No Brain), it fights as an ally of your body.

The head may be reattached to the body by holding them in place for a second. Reattaching the head ends the spell.

Should the body die, the head lives on!

Statistics: Injury Tolerance (Independent Body Parts; Cosmic, Voluntary, +50%; Detachable Head, +15%; Instant Reattachment, +50%; Partial, Head Only, -50%; Sorcery, -15%) [53].

Personal Deflect Energy

Keywords: None.

Full Cost: 30 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell gives the you a deflective barrier that diverts incoming energy attacks, giving you +3 to dodge them.

Statistics: Enhanced Dodge 3 (Limited, Energy, -20%; Sorcery, -15%) [30].

Personal Dexterous Arm

Keywords: None.

Full Cost: 10.2 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You make one of your arms more dexterous compared to the rest of your body. This increases the DX of one arm chosen at the time of casting by you by 1 per level of this spell (up to the maximum of 4). Note that this increase does not affect tasks that require bodily DX (combat included), and tasks that require arms of varied DX levels. You cannot benefit from two different instances of Dexterous Arm at the same time, the last casting overrides all previous ones.

Statistics: Arm DX (One Arm; Sorcery, -15%) [10.2/level].

Personal Digger

Keywords: None.

Full Cost: 42 points for level 1 + 10.5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become able to dig tunnels wide enough for you to pass through by just walking through the earth at Move equal to twice this spell's level. This does not require the use of hands. You may tunnel through stone at half normal Tunneling Move. The GM may wish to assess a chance that the tunnel collapses behind you. Roll each minute vs. the highest of Engineer (Mining), Prospecting-3, and IQ-4 to dig a stable tunnel, modified by Talent. This can be modified upward for hard rock and downward for soft rock or loose earth. Each halving of your Tunneling Move gives +1 on this roll.

Statistics: Tunneling (Move 2; Hands-Free, +20%; Sorcery, -15%) [42]. Each additional level adds 2 to Tunneling move [+10.5].

Personal Earth Vision

Keywords: None.

Full Cost: 9 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you see through solid earth and stone. Each level of this spell allows you to see through up to one foot of earth and stone. You can just barely see the outline of the substance you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Earth, -40%) [9]. Each level adds two more levels of Penetrating Vision [+9].

Personal Ease Labor

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell makes birth painless and trouble-free for you. Unlike most Indefinite spells, this spell costs 1 FP per hour to maintain, not 1 FP per minute.

Statistics: Immunity to Childbirth Complications (Magical, -10%) [5].

Personal Easy Rider

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become easier to affect with all forms of teleportation, time travel, and plane shifting. Rolls to use such abilities on you are at +1.

Statistics: Easy Rider (Sorcery, -15%) [1].

Personal Eat Crow

Keywords: None.

Full Cost: 2 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You lose your sense of taste while this spell is active.

Statistics: Controllable Disadvantage (No Sense of Taste/Smell, Taste Only; Cosmic, No die roll required, +100%; Sorcery, -15%) [2].

Personal Emotive Block

Keywords: None.

Full Cost: 27 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You have Indomitable (p. B60) and Unfazeable (p. 95) while this spell is active.
Statistics: Indomitable (Sorcery, -15%) [13] + Unfazeable (Magical, -10%) [14].

Personal Endure Elements

Keywords: None.
Full Cost: 1.8 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your temperature comfort zone (between 35° and 90° for humans) extends by HT degrees in both directions per level of this spell. Unlike most spells with an indefinite duration, this spell costs 1 FP per hour, not 1 FP per minute to maintain.

Statistics: Temperature Tolerance 2 (Magical, -10%) [1.8/level].

Personal Ethereal Body

Keywords: None.
Full Cost: 76 points or 156 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You slip into the space between worlds and become intangible, passing through solid objects as though they weren't there. In this state, you make no noise when you move. You can perceive the tangible world, and speak normally to those within it, but you cannot pick up normal objects or affect them in any way.

Physical and energy attacks cannot harm you, but you are still vulnerable to psionic and (nonmaterial) magical attacks. Likewise, your physical and energy attacks cannot affect physical opponents. Your psi abilities and magic spells can affect the physical world.

Although you can pass through solids, you must still breathe. When moving through a solid object, treat this as if you were swimming underwater for purposes of suffocation. You cannot materialize inside a solid object.

You can carry objects up to your light encumbrance while insubstantial, including clothing and armor. They become physical if dropped. You cannot materialize these objects inside other objects or characters.

You can't disregard gravity. You must move across a horizontal surface, or along a slope that wouldn't require Climbing rolls. You still weigh nothing, so you don't leave footprints and can walk on surfaces that wouldn't support a solid body, such as the surface of a body of water.

The basic (76-point) version of this spell does not work if you have any abilities that can affect the substantial world when you are insubstantial – including magic, psionics, or powers with the Affects Substantial enhancement (p. B102). The improved (156-point) version works even if you have such abilities.

Statistics: Insubstantiality (Can Carry Objects, Light Encumbrance, +20%; No Vertical Move, -10%; Sorcery, -15%) [76]. The improved version adds the Affects Substantial, +100% to Insubstantiality [+80].

Personal False Tracks

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You leave tracks that appear to be those of some animal or other being, determined by you during the casting. A Quick Contest between a tracker's Tracking skill and your Naturalist skill determines whether or not the tracker is fooled.

Statistics: Different Footprints (Sorcery, -15%) [1].

Personal Feather Fall

Keywords: None.

Full Cost: 14 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become able to glide through the air. You cannot gain altitude. With a running leap, you can launch yourself with an air Move equal to Basic Move. Each turn, you can change velocity by up to 10 yards/second x local gravity in Gs. To accelerate, you must descend by 1 yard for each 1 yard/second added to velocity; top speed is Basic Move x 4 (but you can go faster if towed). To decelerate, you must fly level. If you do not descend at least 1 yard, you automatically decelerate by 1 yard/second that turn. When working out turning radius, your basic air Move is 10 x local gravity in Gs.

Statistics: Flight (Gliding, -50%; Sorcery, -15%) [14].

Personal Feathers

Keywords: None.

Full Cost: 1 or 8 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You grow feathers. These prevent sunburn and help shed water, eliminating up to -2 in penalties for being wet – notably for *Cold* (p. B430). The improved (26-point) version makes you grow thick feathers that also provide DR 2*.

Statistics: Feathers (Sorcery, -15%) [1]. The improved version adds DR 2 (Flexible, -20%; Magical, -10%) [+7].

Personal Flaming Armor

Keywords: None.

Full Cost: 7 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become sheathed in fire that deals 1d-1 burning damage to enemies who touch your body. You also shed light as a torch.

Statistics: Burning Attack 1d-1 (Aura, +80%; Melee Attack, Reach C, -30%; Sorcery, -15%) [6] + Illumination (Magical, -10%) [1].

Personal Flee

Keywords: None.

Full Cost: 3.75 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your Basic Move is increased by 1 per level of this spell, but only in situations where Enhanced Move (p. B52) or *Sprinting* (p. B354) would apply.

Statistics: Basic Move 1 (Sorcery, -15%; Takes Extra Time 1, -10%) [3.75/level].

Personal Flexibility

Keywords: None.

Full Cost: 2/5/13 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The basic (2-point) version of this spell gives you +1 on Climbing rolls; on Escape rolls to get free of restraints; on Erotic Art skill; and on all attempts to break free in close combat (p. B391). You may ignore up to -1 in penalties for working in close quarters. The improved (5-point) version increases the bonuses to rolls to +3 and the ignored penalties to -3. The greater (13-point) version increases the bonuses to rolls to +5 and the ignored penalties to -5.

Statistics: Flexibility (One Third of the Effect, x1/3; Sorcery, -15%) [2]. The improved version removes One Third of the Effect, x1/3 [+3]. The greater version improves Flexible to Double-Jointed [+8].

Personal Flight

Keywords: None.

Full Cost: 34 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can fly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, you'll need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). You cannot fly in a trace atmosphere or vacuum.

Your flight Move is Basic Speed x 2 (drop all fractions). You can also "fly" at half-speed underwater. Flight includes the ability to hover at Move 0 as well.

Statistics: Flight (Sorcery, -15%) [34].

Personal Fluid Vision

Keywords: None.

Full Cost: 18 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you see through water (including ice, snow, and steam), smoke, fog, dust, sand, etc. Each level of this spell allows the subject to see through up to one foot of the listed substances. You can just barely see the outline of the substance you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Air, -40%) [9] + Penetrating Vision 1 (Sorcery, -15%; Specific, Water, -40%) [9]. Each additional level adds two more levels of each Penetrating Vision. As a special effect, this is treated as a single advantage instead of two advantages for the purpose of FP costs.

Personal Forest Defense

Keywords: None.

Full Cost: 14 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell animates plants near you to place themselves in harm's way. This increases your DR, cumulative with that from actual armor, but only when you stand in a hex with some vegetation. DR is 2 in sparse vegetation, 3 in normal vegetation, 4 in dense vegetation, and 5 in impenetrable vegetation. See *Density of Vegetation* rules in *GURPS Magic: Plant Spells*, p. 6.

Statistics: Damage Resistance 5 (Environmental, Vegetation, -40%; Force Field, +20%; Nuisance Effect, Strength is based on vegetation density, -10%; Sorcery, -15%) [14].

Personal Fur

Keywords: None.

Full Cost: 1 or 8 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You grow fur that prevents sunburn. The improved (26-point) version makes you grow thick fur that also provide DR 2*.

Statistics: Fur (Sorcery, -15%) [1]. The improved version adds DR 2 (Flexible, -20%; Magical, -10%) [+7].

Personal Gift of Letters

Keywords: None.

Full Cost: 11 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become literate in one written language, chosen when you cast the spell. The GM is within rights to declare certain languages "secret" or "lost" and thus unavailable unless you first learn the language (to at least Broken) legitimately.

Statistics: Cosmic Power 3 (Limited, One Written Language, -50%; Sorcery, -15%) [11].

Personal Gift of Tongues

Keywords: None.

Full Cost: 11 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become able to speak and understand one spoken language, chosen when you cast the spell. The GM is within rights to declare certain languages "secret" or "lost" and thus unavailable unless you first learn the language (to at least Broken) legitimately.

Statistics: Cosmic Power 3 (Limited, One Spoken Language, -50%; Sorcery, -15%) [11].

Personal Glass Vision

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you see through glass even if it is stained or warped. Each level of this spell allows you to see through up to one foot of glass. You can just barely see the outline of the substance you are

looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Glass, -60%) [5]. Each level adds two more levels of Penetrating Vision [+5].

Personal Glass Wall

Keywords: None.

Full Cost: 36 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you see through solid walls, floors, ceilings, or other similar barriers up to 4 feet thick (material doesn't matter). You can just barely see the outline of the barrier you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 8 (Sorcery, -15%; Specific, Barriers, -40%) [36].

Personal Glasswraith

Keywords: None.

Full Cost: 37 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell makes you intangible to glass and obsidian. You automatically fall through any glass floors. You will need to hold your breath on long trips (this spell does not provide air) and gain no special ability to see through glass. You may carry up to Medium encumbrance while doing this, but you cannot carry any glass objects – they fall through your body.

This spell does *not* make you immune to attacks with glass weapons, but makes you highly resistant to them. You are considered to be diffuse against glass attacks. It makes you immune to crippling injuries and reduces the damage you suffer from attacks with glass weapons; see *Injury to Unliving, Homogenous, and Diffuse Targets* (p. B380). Glass foes cannot slam or grapple you! This includes all the benefits of No Blood, No Brain, and No Vitals, but only against glass attacks.

Statistics: Permeation (Glass; Can Carry Objects, Medium Encumbrance, +50%; Magical, -10%; Nuisance Effect, Can't carry anything glass, -20% Nuisance Effect, Cannot turn it off, -5%) [12] + Injury Tolerance (Diffuse; Limited, Glass, -60%; Sorcery, -15%) [25].

Personal Grace

Keywords: None.

Full Cost: 17 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your DX is increased by 1 per level of this spell. This affects the DX-based skills, Basic Speed, etc.

Statistics: DX 1 (Sorcery, -15%) [17/level].

Personal Gravity Tolerance

Keywords: None.

Full Cost: 5 points or more.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can function under a wider range of gravities. For a normal human, the penalties for non-native gravity accrue in increments of 0.2G; see *Different Gravity* (p. B350). This spell increases the increment.

Level	Increment	Full Cost
1	0.3G	5 points
2	0.5G	9 points
3	1G	13 points
4	5G	17 points
5	10G	22 points

Statistics: Improved G-Tolerance (Sorcery, -15%) [4.25/level].

Personal Great Haste

Keywords: None.

Full Cost: 85 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You make your rate of time perception faster than that of a normal human. This spell lets you experience time twice as fast as a normal – that is, you experience two subjective seconds for each real second that passes.

This spell lets you take one additional maneuver on your turn in combat, allowing you to cast spells quickly by taking multiple Concentrate maneuvers, run very fast by taking multiple Move maneuvers, etc. Your turn doesn't come any sooner, however! This advantage affects how fast you move when you react, but not how quickly you react in the first place.

In order to do anything that depends on someone else's reactions, you must deliberately "slow down" and function at his speed. This applies both when making a Feint in combat and when making an Influence roll (B359) out of combat. For instance, if you choose to Feint, that is all you can do on your turn – you cannot take extra actions. (On the other hand, you could make an All-Out Attack followed by an Attack in order to beat down his defenses through sheer blinding speed!)

Statistics: Altered Time Rate 1 (Sorcery, -15%) [85].

Personal Halt Ageing

Keywords: None.

Full Cost: 14 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You do not age while this spell is active. Unlike most spells with an indefinite duration, this spell costs 1 FP per hour, not 1 FP per minute to maintain.

Statistics: Unaging (Magical, -10%) [14].

Personal Haste

Keywords: None.

Full Cost: 17 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You increase your Basic Speed by 1.00, which will also increase the your Basic Move and Dodge scores by the same amount.

Statistics: Basic Speed 1.00 (Sorcery, -15%) [17/level].

Personal Hawk Flight

Keywords: None.

Full Cost: 52 points for level 1 + 18 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can fly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, you'll need a way to survive in very thin, cold air (e.g., Doesn't Breathe and Temperature Tolerance). You cannot fly in a trace atmosphere or vacuum.

Your flight Move is Basic Speed x 2 (drop all fractions). You can also “fly” at half-speed underwater. Flight includes the ability to hover at Move 0 as well. Each level of Personal Hawk Flight also *doubles* your top speed in air. Your multiplied Move is your top speed. This does not affect Basic Speed, Basic Move, or Dodge. Its benefits apply only when moving along a relatively straight. It does have some defensive value, however: those who attack you with ranged attacks must take your speed into account when calculating speed/range modifiers (see p. B550).

Statistics: Flight (Sorcery, -15%) [34] + Enhanced Move 1 (Air; Magical, -10%) [18]. Each additional level adds an additional level of Enhanced Move 1 (Air; Magical, -10%) [+18].

Personal Hawk Vision

Keywords: None.

Full Cost: 4.25 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can “zoom in” with his eyes as if using binoculars. Each level lets you ignore -1 in range penalties to Vision rolls at all times, or -2 in range penalties if you take an Aim maneuver to zoom in on a particular target. This ability can also function as a telescopic sight, giving up to +1 Accuracy per level with ranged attacks provided you take an Aim maneuver for seconds equal to the bonus (see *Scopes* under *Firearm Accessories*, p. 411). The benefits of this spell are not cumulative with those of technological aids such as binoculars or scopes. If you have both, you must opt to use one or the other.

Statistics: Telescopic Vision 1 (Sorcery, -15%) [4.25/level].

Personal Hearing Protection

Keywords: None.

Full Cost: 1 point or 5 points

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The basic (1-point) version of this spell makes your hearing less prone to overloading. You may ignore -1 in Hearing penalties due to noise and get +1 to HT rolls to resist deafening effects. The improved (5-point) spell lets your hearing rapidly adapt to the most intense of stimuli, allowing you to function normally after a maximum of two seconds of impairment. You will never suffer permanent damage to their hearing as a result of excessive sensory input, ignore -5 in Hearing penalties due to noise, and get +5 to rolls to resist Hearing-Based attacks.

Statistics: Robust Hearing (Sorcery, -15%) [1]. “Improved Hearing Protection” is Protected Hearing (Sorcery, -15%) [5].

Personal Hide

Keywords: None.

Full Cost: 2.9 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell makes you harder to find. A Vision roll is necessary to see you in plain sight; Vision rolls to detect you when you already are hidden are at -1 per level of this spell. These effects only apply while you remain still, but if you move and then stop moving while the spell is active, the effects resume.

Statistics: Obscure 1 (Vision; Accessibility, Only while standing still, -40%; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [2.9/level].

Personal Hide Emotion

Keywords: None.

Full Cost: 27 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your current emotional state becomes impossible to discern. This *always* includes the following: Body Language, Detect Lies, Criminology, Interrogation, and Psychology on you, as well as some Influence skills when the GM thinks understanding the subject's emotional state would be important. It also includes uses of Empathy or Sensitive and similar traits.

Statistics: Obscure 10 (Emotions; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [37].

Personal Hide from Animals

Keywords: None.

Full Cost: 36 or 44 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become invisible to animals. You still makes noise, leaves footprints, and have a scent – and anything you are carrying (up to the Medium encumbrance) becomes invisible too. You get a +9 to Stealth in any situation where being seen would matter, if you are carrying no more than your Medium encumbrance.

Animals using paranormal remote viewing (crystal balls, Clairvoyance, etc.), if such thing is even possible, cannot see you if you would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see you.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). You do not cast a shadow and do not show up in mirrors.

The basic (36-point) version of this spell ends if you attack any animal. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If you attack directly, however, you immediately become visible along with all your gear. The improved (44-point) version of this spell eliminates this limitation.

Statistics: Invisibility (Accessibility, Animals Only, -25%; Can Carry Objects, Medium, +50%; Dispels after an attack, -20%; Sorcery, -15%) [36]. The improved version removes the Dispels after an attack limitation from the advantage [+8].

Personal Hide from Undead

Keywords: None.

Full Cost: 26 points or 34 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become invisible to undead. You still make noise, leave footprints, and have a scent – and anything you are carrying (up to the Medium encumbrance) becomes invisible too. You get a +9 to Stealth in any situation where being seen would matter, if you are carrying no more than your Medium encumbrance.

Undead creatures using paranormal remote viewing (crystal balls, Clairvoyance, etc.) cannot see you if you would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see you.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). You do not cast a shadow and don't show up in mirrors.

The basic (26-point) version of this spell ends if you attack any undead creature. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If the subject attacks directly, however, it immediately becomes visible along with all its gear. The improved (34-point) version of this spell eliminates this limitation.

Statistics: Invisibility (Accessibility, Undead Only, -50%; Can Carry Objects, Medium, +50%; Disperses after an attack, -20%; Sorcery, -15%) [26]. The improved version removes the Disperses after an attack limitation from the advantage [+8].

Personal Hide Path

Keywords: None.

Full Cost: 10 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to pass through grass, undergrowth, or jungle without leaving any sign. Tracking rolls to follow you automatically fail unless they rely on something more than sight; thus, a human tracker would be baffled, but bloodhounds would suffer no penalty at all.

Statistics: Unusual Training (Light Walk, no Stealth bonus, only through vegetation) [1] + Light Walk (H) DX [4] modified with Cosmic, No die roll required, +100% and Sorcery, -15% for a final cost of 10 points.

Personal Hide Thoughts

Keywords: None.

Full Cost: 26 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your mind becomes impossible to read and control.

Statistics: Immunity to Mind Control (Sorcery, -15%) [26].

Personal Hold Breath

Keywords: None.
Full Cost: 17 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You do not breathe while this spell is active. This spell does not actually provides air, but simply delays the suffocation, giving you some time to reach a safer environment.

Statistics: Doesn't Breathe (Sorcery, -15%) [17].

Personal Hush

Keywords: None.
Full Cost: 48 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become unable to produce sounds, including in the subsonic and ultrasonic ranges, either accidentally or on purpose. This makes you invisible to geophones, sonar devices, ultrasonic motion detectors, and Vibration Sense (p. B96).

Statistics: Obscure 10 (Hearing; Defensive, +50%; Extended, Sonar, Subsonic Hearing, Ultrahearing, and Vibration Sense, +80%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%; Temporary Disadvantage, Mute, -25%) [48].

Personal Hypervision

Keywords: None.
Full Cost: 13 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell allows you to see in four spatial dimensions as well as three. You aren't blind in hyperspace (see *Hyperspace*, *GURPS Powers: The Weird*, p. 15, and *Extradimensionality*, *GURPS Powers: The Weird*, pp. 24-25). You can perceive hyperspatial beings, whether or not you are in hyperspace.

Statistics: See Invisible (Hyperspatial; Sorcery, -15%) [13].

Personal Ice Armor

Keywords: None.
Full Cost: 30 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell covers your body in a layer of ice. You gain DR 8 that covers your whole body, including the eyes. This DR is semi-ablative - every 10 points of basic damage rolled removes one point of DR, regardless of whether the attack penetrates DR. This DR is treated as *ablative* (each point of DR stops one point of basic damage but is destroyed in the process) against fire attacks. Lost DR "heals" at the same rate as lost HP (including the effects of Regeneration, p. B80).

Statistics: DR 8 (Sorcery, -15%; Either/Or (Semi-Ablative, -20% or Ablative, -80% and Limited, Fire, -40%), -25%) [24] + Nictitating Membrane 8 (Magical, -10%; Either/Or (Semi-Ablative, -20% or Ablative, -80% and Limited, Fire, -40%), -25%) [6].

Personal Ice Movement

Keywords: None.

Full Cost: 21 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell makes ground and water beneath your feet freeze and allows you to skate along such surfaces at high speed. Double the top running speed when moving along ground or water. This does not affect Basic Speed, Basic Move, or Dodge. When running across water (this spell does not work on any other liquids), you must keep moving at your full Move to avoid falling. In any case, you are treated as skating, and complex maneuvers and combat actions require Skating (p. B220) rolls.

Statistics: Enhanced Move 1 (Ground; Nuisance Effect, Skating rolls, -10%; Sorcery, -15%) [15] + Walk on Liquid (Accessibility, Only when moving at his full Move, -30%; Magical, -10%; Nuisance Effect, Skating rolls, -10%; Specific, Water, -10%) [6].

Personal Ice Shield

Keywords: None.
Full Cost: 15 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your skin and eyes become covered by an ice barrier. You gain DR 15. This DR is ablative - it stops damage once. Each point of DR stops one point of basic damage but is destroyed in the process. Lost DR "heals" at the same rate as lost HP (including the effects of *Regeneration*, p. B80).

Statistics: DR 15 (Ablative, -80%; Includes Eyes, +10%; Sorcery, -15%) [15].

Personal Icewalking

Keywords: None.
Full Cost: 5 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You can walk or crawl on ice walls and ceilings. You can stop at any point and stick to the surface without fear of falling. Neither feat requires a roll against Climbing skill, provided the surface is one you can cling to. Move while clinging is half your Basic Move.

If you are falling and trying to grab a vertical surface to break your fall, the GM must first decide whether there is anything in reach. If there is, you make a DX roll to touch the surface, and then make a ST roll at -1 per 5 yards already fallen. If you succeed, you stop your fall. Otherwise, you continue to fall – but you may subtract 5 yards from the height of the fall thanks to the slowing effect of the failed Clinging attempt. Variations in gravity affect these distances; e.g., in 0.5G, the ST roll would be at -1 per 10 yards.

Statistics: Clinging (Sorcery, -15%; Specific, Ice, -60%) [5].

Personal Infravision

Keywords: None.
Full Cost: 9 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell allows you to see "infrared" or heat rays in addition to normal light, as with the Infravision advantage (p. B60).

Statistics: Infravision (Sorcery, -15%) [9].

Personal Insignificance

Keywords: None.

Full Cost: 18.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

It becomes easy for you to blend in. Your face is hard to pick out or remember. You get +5 per level of the spell to Shadowing in crowds, while others have -5 per level of the spell to rolls made to recognize you from a lineup or mug shots – or even to recall meeting you!

Statistics: Obscure 5 (Memory; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [18.5/level].

Personal Instant Regeneration

Keywords: None.

Full Cost: 234 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You instantly regrow a lost limb or organ.

Statistics: Regrowth (Reduced Time 25, +500%; Sorcery, -15%) [234].

Personal Invisibility

Keywords: None.

Full Cost: 66 or 74 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become invisible. You still make noise, leave footprints, and have a scent – and anything you are carrying (up to the Medium encumbrance) becomes invisible too. You get a +9 to Stealth in any situation where being seen would matter, if you are carrying no more than your Medium encumbrance.

Individuals using paranormal remote viewing (crystal balls, Clairvoyance, etc.) cannot see you if you would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see you.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). You do not cast a shadow and don't show up in mirrors.

The basic (66-point) version of this spell ends if you attack any creature. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If you attack directly, however, you immediately become visible along with all your gear. The improved (74-point) version of this spell eliminates this limitation.

Statistics: Invisibility (Affects Machines, +50%; Can Carry Objects, Medium, +50%; Disperses after an attack, -20%; Sorcery, -15%) [66]. The improved version removes the Disperses after an attack limitation from the advantage [+8].

Personal Juggernaut Armor

Keywords: None.

Full Cost: 8.5 points/level.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

You, and all of your carried gear, are protected by an invisible field of pure force, but *only from the front*. This increases your DR by twice the level of this spell (e.g., Juggernaut Armor 3 adds DR 6), cumulative with that from actual armor against attacks made from the front.

Statistics: Damage Resistance 2 (Directional, Front, -20%; Force Field, +20%; Sorcery, -15%) [8.5/level].

Personal Jump

Keywords: None.
Full Cost: 2.5 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You have your Basic Move increased by 2 per level of this spell, but only for the purpose of calculating jumping distance.

Statistics: Basic Move 2 (Only to determine jumping distance, -60%; Sorcery, -15%) [2.5/level].

Personal Keen Hearing

Keywords: None.
Full Cost: 2 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You gain a bonus to Hearing (p. B358) equal to the level of this spell (maximum 3*).

Statistics: Acute Hearing 1 (Sorcery, -15%) [2].

* The maximum of 3 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 1.7 points. That will affect the full cost for levels past 3.

Personal Keen Taste and Smell

Keywords: None.
Full Cost: 2 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You gain a bonus to Taste and Smell equal to the level of this spell (maximum 3*).

Statistics: Acute Taste and Smell 1 (Sorcery, -15%) [2].

* The maximum of 3 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 1.7 points. That will affect the full cost for levels past 3.

Personal Keen Touch

Keywords: None.
Full Cost: 2 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You gain a bonus to Touch equal to the level of this spell (maximum 3*).

Statistics: Acute Touch 1 (Sorcery, -15%) [2].

* The maximum of 3 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 1.7 points. That will affect the full cost for levels past 3.

Personal Keen Vision

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain a bonus to Vision equal to the level of this spell (maximum 3*).

Statistics: Acute Vision 1 (Sorcery, -15%) [2].

* The maximum of 3 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 1.7 points. That will affect the full cost for levels past 3.

Personal Lesser Flight

Keywords: None.

Full Cost: 16 or 24 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can fly, albeit slowly. This works at any altitude where there is still significant atmosphere – but in the upper atmosphere, you’ll need a way to survive in very thin, cold air (e.g., Doesn’t Breathe and Temperature Tolerance). You cannot fly in a trace atmosphere or vacuum.

The basic (16-point) version of this spell grants you a flight Move 1. The improved (24-point) version of this spell increases your flight Move to your Basic Speed (drop all fractions). You can also “fly” at half-speed underwater. Flight includes the ability to hover at Move 0 as well.

Statistics: Flight (Slow, Move 1, -45%; Sorcery, -15%) [16]. *Note:* The improved version replaces Slow, Move 1, -45% with Slow, Basic Speed, -25% (+20%) [+8].

Personal Light Step

Keywords: None.

Full Cost: 12 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Air, smoke, and other gases are like solid ground beneath your feet, allowing you to walk up and down “invisible stairs” at your ground Move, but no higher than 5 feet from the ground. This won’t work in a vacuum – there has to be some kind of air present. If you get knocked down or slip, you fall!

Statistics: Walk on Air (Maximum Height, 5 feet, -25%; Sorcery, -15%) [12].

Personal Light Tread

Keywords: None.

Full Cost: 10 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to exert very little pressure when you walk. You leave no visible tracks. Tracking rolls to follow you automatically fail unless they rely on something more than sight; thus, a human tracker would be baffled, but bloodhounds would suffer no penalty at all. You can also walk over fragile surfaces without falling through. Maximum Move under such circumstances is 1/3 normal (GM's decision).

Statistics: Unusual Training (Light Walk, no Stealth bonus) [1] + Light Walk (H) DX [4] modified with Cosmic, No die roll required, +100% and Sorcery, -15% for a final cost of 10 points.

Personal Lightning Armor

Keywords: None.

Full Cost: 14 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You are sheathed in crackling lightning. Any metallic weapon that hits you triggers a 1d-1 backlash of burning surge damage along the weapon. This attack automatically hits the hand that is holding the weapon, regardless of the weapon's length, as long as its entire length is conducting. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Anyone touching you is similarly damaged.

Statistics: Burning Attack 1d-1 (Aura, +80%; Cosmic, Conducting, +50%; Melee Attack, Reach C, -30%; Side Effect, Stunning, +50%; Sorcery, -15%; Surge, Arcing, +100%) [14].

Personal Mage-Stealth

Keywords: None.

Full Cost: 53 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become unable to produce sounds (including in the subsonic and ultrasonic ranges) accidentally or on purpose, with the exception of speech, allowing for sorcerous incantations and talking. This makes you invisible to geophones, sonar devices, ultrasonic motion detectors, and Vibration Sense (p. B96).

Statistics: Obscure 10 (Hearing; Defensive, +50%; Extended, Sonar, Subsonic Hearing, Ultrahearing, and Vibration Sense, +80%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [53].

Personal Magic Resistance

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell makes you resistant to magic, granting you one level of Magic Resistance (p. B67) per level of this spell (maximum 3*). Subtract the Personal Magic Resistance level from the skill of anyone *directly* casting a spell on you, and add it to your roll to resist any spell that offers a resistance roll. In addition, you may roll against HT + Magic Resistance to resist the effects of magical elixirs.

Magic Resistance provides no benefit against Missile spells, attacks by magic weapons, or information-gathering spells that aren't cast directly on you.

Magic Resistance, and its precise level, can be recognized by any creature looking at your aura, or by anyone who casts a spell on you.

Statistics: Magic Resistance 1 (Improved, +150%; Sorcery, -15%) [5/level].

* The maximum of 3 was chosen for convenience. If the GM wishes to remove the limit, they should keep in mind that the actual cost of each additional level of the spell is 4.7 points. That will affect the full cost for levels past 3.

Personal Mantle of the Icy Soul

Keywords: None.

Full Cost: 45 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become very resistant to cold, but also vulnerable to fire. You and all of your gear have DR 20 against cold and ice – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible cold effects other than damage (e.g., a spell that freezes the flesh to grant the subject Brittle) simply fail, as though you have successfully resisted. This spell does *not* grant you Temperature Tolerance. However, you also gain Vulnerability (Fire, x2) (p. B161).

Statistics: Damage Resistance 20 (Force Field, +20%; Limited, Cold/Ice, -40%; Sorcery, -15%; Temporary Disadvantage, Vulnerability (Fire, x2), -30%) [35] + Immunity to Noxious Cold Effects (Magical, -10%; Temporary Disadvantage, Vulnerability (Fire, x2), -30%) [6] + Internal Damage Resistance 20 (Limited, Cold/Ice, -40%; Magical, -10%; Temporary Disadvantage, Vulnerability (Fire, x2), -30%) [4]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Personal Mask Heat

Keywords: None.

Full Cost: 8 points or 37 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Heat emanated by you and all of your carried equipment becomes masked, letting you blend in with the surrounding when viewed with Infravision. The basic version (8-point) of this spell gives a -2 penalty to Vision rolls to see you with Infravision and -2 penalty to attacks against you that rely on Infravision. This is usually enough for normal situations, where a living being stands out from the thermal background. The improved version (37-point) of this spell makes you completely invisible to Infravision, which is enough to even negate the +10 bonus to spot a living creature in a cave that is in thermal equilibrium.

Statistics: Obscure 2 (Infravision; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [8]. “Improved Mask Heat” is Obscure 10 (Infravision; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [37].

Personal Mass Sense

Keywords: None.

Full Cost: 35 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become able to sense matter by its gravitational mass. You are able to navigate the surroundings, but a Sense roll will let you notice something significant. Unlike vision, Mass Sense is at -1 per yard. You automatically know mass and direction to objects, and an IQ roll will let you determine density or notice a pattern.

Statistics: Detect Matter (Reflexive, +40%; Short-Range 1, -10%; Sorcery, -15%) [35].

Personal Melee Manager

Keywords: None.
Full Cost: 19 points.
Casting Roll: None.
Range: Self.
Duration: Instantaneous.

While this spell is active, you can strike more than once with the *same* weapon or body part. This extra attack can only be used if all attacks made by you during your turn were melee attacks, and this extra attack can only be a melee attack.

Statistics: Extra Attack 1 (Accessibility, Only if all other attacks were melee, -10%; Limited, Melee, -20%; Multi-Strike, +20%; Sorcery, -15%) [19].

Personal Metal Vision

Keywords: None.
Full Cost: 9 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell lets you see through metal. Each level of this spell allows the subject to see through up to one foot of metal. You can just barely see the outline of the substance you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Metal, -40%) [9/level].

Personal Might

Keywords: None.
Full Cost: 8.5 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your ST is increased by 1 per level of this spell. This affects the damage, HP, and Basic Lift, but does not heal the wounds.

Statistics: ST 1 (Sorcery, -15%) [8.5/level].

Personal Mirrored Skin

Keywords: None.
Full Cost: 12 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell turns your skin into a mirror that reflects light-based attacks and even makes direct hits less powerful. You gain DR 2 and +1 Dodge against light-based attacks.

Statistics: DR 2 (Limited, Light, -40%; Magical, -10%) [5] + Enhanced Dodge 1 (Limited, Light, -40%; Sorcery, -15%) [7].

Personal Monk's Banquet

Keywords: None.
Full Cost: 9 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell allows you to go without food or water with no ill effects, while it is active. Unlike most indefinite spells, this spell costs 1 FP per hour, not per minute.

Statistics: Doesn't Eat or Drink (Magical, -10%) [9].

Personal Monitor Air

Keywords: None.

Full Cost: 62 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you determine whether the air you are located in is safe to breathe. The GM will secretly roll against your Per. If the roll is successful, you will know if the air is safe to breathe. The follow-up IQ roll will let you know if there are any impurities that might be harmful.

Statistics: Detect (Air; Analyzing, +100%; Reflexive, +40%; Sorcery, -15%; Touch-Based, -20%) [62].

Personal Mudwalker

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You do not suffer DX or Move penalties for traversing through mud.

Statistics: Terrain Adaptation (Mud; Sorcery, -15%) [5].

Personal Muffle

Keywords: None.

Full Cost: 8.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become less noisy. You get +4 per level of this spell to Stealth skill when you are perfectly motionless, or +2 if moving (even in armor, etc.). These bonuses help only in the dark, or against listening devices, blind creatures, and others who must rely on hearing to find you.

Statistics: Silence 2 (Sorcery, -15%) [8.5/level].

Personal Night Vision

Keywords: None.

Full Cost: 8 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to see clearly as long as there is any light at all, as with Night Vision 9. In utter darkness, you are still blind.

Statistics: Night Vision 9 (Sorcery, -15%) [8].

Personal No-Smell

Keywords: None.

Full Cost: 36 points.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

You and all of your carried equipment produce no odor. This is not limited to just your natural scent; it would even mask you if you were sprayed by a skunk. No other properties change.

Statistics: Obscure 10 (Smell; Accessibility, Your scent only, -5%; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [36].

Personal No-Taste

Keywords: None.
Full Cost: 37 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become tasteless and completely unrecognizable to taste-based senses.

Statistics: Obscure 10 (Taste; Defensive, +50%; No Area of Effect, -50%; Sorcery, -15%; Stealthy, +100%) [37].

Personal Partial Shapeshifting (Chameleon Eyes)

Keywords: None.
Full Cost: 31 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You partially transform into an animal. You gain the Chameleon Eyes meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Chameleon Eyes*; Sorcery, -15%) [31].

* A new meta-trait: Enhanced Tracking 1 [5] and Peripheral Vision [15]. *20 points.*

Personal Partial Shapeshifting (Crocodile Jaws)

Keywords: None.
Full Cost: 16 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You partially transform into an animal. You gain the Crocodile Jaws meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Crocodile Jaws*; Sorcery, -15%) [16] (KYOS: 20).

* A new meta-trait: Sharp Teeth [1], Quirk (Slurred, but intelligible speech) [-1], and Bite ST +3 [3] (*GURPS Martial Arts: Technical Grappling*, page 28). *3 points.* (KYOS – replace Bite ST +3 [3] with Bite ST +3 [7]).

Personal Partial Shapeshifting (Elephant Trunk)

Keywords: None.
Full Cost: 27 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You partially transform into an animal. You gain the Elephant Trunk meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Elephant Trunk*; Sorcery, -15%) [27].

* A new meta-trait: Colorblindness [-10], Extra Arm 1 [10] and Peripheral Vision [15]. *15 points.*

Personal Partial Shapeshifting (Feathered Arms)

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You partially transform into an animal. You gain the Feathered Arms meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Feathered Arms*; Sorcery, -15%) [13].

* A new meta-trait: Flight (Winged, -25%) [30] and No Fine Manipulators [-30]. *0 points.*

Personal Partial Shapeshifting (Fish Tail)

Keywords: None.

Full Cost: 31 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You partially transform into an animal. You gain the Fish Tail meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Fish Tail*; Sorcery, -15%) [31].

* A new meta-trait: Enhanced Move (Water) 1 [20] and No Legs (Aquatic) [0]. *20 points.*

Personal Partial Shapeshifting (Mountain Goat Hooves)

Keywords: None.

Full Cost: 22 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You partially transform into an animal. You gain the Fish Tail meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Mountain Goat Hooves*; Sorcery, -15%) [22].

* A new meta-trait: Hooves [3] and Super Climbing 3 (Accessibility, Only when mountaineering, -30%) [6]. *9 points.*

Personal Partial Shapeshifting (Saber Teeth)

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You partially transform into an animal. You gain the Saber Teeth meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Saber Teeth*; Sorcery, -15%) [13].

* A new meta-trait: Colorblindness [-10], Fangs [2], Quirk (Slurred, but intelligible speech) [-1], and Bite ST +3 [3] (*GURPS Martial Arts: Technical Grappling*, page 28). -6 points. (KYOS – replace Bite ST +3 [3] with Bite ST +3 [7]).

Personal Partial Shapeshifting (Scorpion Tail)

Keywords: None.
Full Cost: 27 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You partially transform into an animal. You gain the Scorpion Tail meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Scorpion Tail*; Sorcery, -15%) [27].

* A new meta-trait: Striker (Impaling) [8] and Toxic Attack 1d+2 (Follow-Up, Striker, +0%; Resistible, HT-6, +0%) [7]. 15 points.

Personal Partial Shapeshifting (Serpent's Fangs)

Keywords: None.
Full Cost: 16 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You partially transform into an animal. You gain the Serpent's Fangs meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Serpent's Fangs*; Sorcery, -15%) [16].

* A new meta-trait: Toxic Attack 1d+1 (Contact Agent, -30%; Cyclic, 3 1-day cycles, Resistible, +15%; Melee Attack, Reach C, Cannot Parry, -35%; Resistible, HT-4, -10%) [3]. 3 points.

Personal Partial Shapeshifting (Skunk Tail)

Keywords: None.
Full Cost: 24 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You partially transform into an animal. You gain the Skunk Tail meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Skunk Tail*; Sorcery, -15%) [24].

* A new meta-trait: Immunity to Skunk Stench [1], Tail [0], and Toxic Attack 1d (Area Effect, 2 yards, +50%; Drifting, +20%; Limited Arc, Straight Behind, -40%; Persistent, +40%; Reduced Range, 1/10, -30%; Resisted, HT, -25%; Respiratory Agent, +50%; Symptoms, 2/3 HP, Choking, +100%; Variable, Area, +5%) [11]. 12 points.

Personal Partial Shapeshifting (Spider Arms)

Keywords: None.
Full Cost: 54 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You partially transform into an animal. You gain the Spider Arms meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Spider Arms*; Sorcery, -15%) [54].

* A new meta-trait: Extra Arm 2 [20] and Extra Attack 1 [25]. *45 points.*

Personal Partial Shapeshifting (Tiger Paws)

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You partially transform into an animal. You gain the Tiger Paws meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Tiger Paws*; Sorcery, -15%) [13].

* A new meta-trait: No Fine Manipulators [-30], Sharp Claws [5], and Arm ST +3 [15] (*GURPS Martial Arts: Technical Grappling*, page 28). *-10 points.*

Personal Partial Shapeshifting (Toad Tongue)

Keywords: None.

Full Cost: 40 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You partially transform into an animal. You gain the Toad Tongue meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Toad Tongue*; Sorcery, -15%) [40].

* A new meta-trait: Extra Arm 1 (Long 1, +100%; Weak, 1/4 ST, -50%) [15] and Peripheral Vision [15]. *30 points.*

Personal Partial Shapeshifting (Turtle Shell)

Keywords: None.

Full Cost: 26 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You partially transform into an animal. You gain the Turtle Shell meta-trait; see the footnote below for details. The transformation takes 10 seconds.

Statistics: Alternate Form (Turtle Shell*; Sorcery, -15%) [26].

* A new meta-trait: DR 5 (Cannot Wear Armor, -40%; Torso Only, -10%) [13]. *13 points.*

Personal Plant Sense

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can detect the location and size of objects by sensing the minute disturbances of vegetation around you. You can locate an opponent in the dark, but you cannot detect details (e.g., whether he is armed). In a perfectly still, dark forest, you would be able to sense a barrier before you run into it, and could find openings by sensing the flow of air through the plants.

To use Plant Sense, you must make a Sense roll. Consult the *Size and Speed/Range Table* (p. B550) and apply separate bonuses for the target's size and speed, and a penalty for the range to the

target. A successful roll reveals the rough size, location, speed, and direction of movement of the target. It does not provide any information about the object's shape, color, etc. Once you have detected something, you may target it with an attack. The modifiers that applied to his Sense roll also apply to your attack roll, but can never give you a bonus to hit.

Note that if you are outside the areas of dense vegetation where the ability functions, or if the subject is wearing a sealed suit, this ability does not work at all!

Statistics: Vibration Sense (Environmental, Dense Vegetation, -40%; Sorcery, -15%) [5].

Personal Plant Vision

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you see through living vegetation. Each level of this spell allows you to see through up to one foot of living plant matter. You can just barely see the outline of the substance you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Living Vegetation, -60%) [5/level].

Personal Plasma Armor

Keywords: None.

Full Cost: 20 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become sheathed in plasma that deals 2d(2) burning damage to enemies who touch your body. You also shed light as a torch.

Statistics: Burning Attack 2d (Armor Divisor, (2), +50%; Aura, +80%; Melee Attack, Reach C, -30%; Sorcery, -15%) [19] + Illumination (Magical, -10%) [1].

Personal Plastic Vision

Keywords: None.

Full Cost: 9 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you see through plastic. Each level of this spell allows you to see through up to one foot of plastic. You can just barely see the outline of the substance you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Plastic, -40%) [9/level].

Personal Presence

Keywords: None.

Full Cost: 18.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

It becomes hard for you to blend in. Your face is easy to pick out or remember. You get -5 per level of the spell to Shadowing in crowds, while others have +5 per level of the spell to rolls made to recognize you from a lineup or mug shots – or even to recall meeting you!

Statistics: Obscure 5 (Memory; Defensive, +50%; No Area of Effect, -50%; Reversed, -0%; Sorcery, -15%; Stealthy, +100%) [18.5/level].

Personal Preservation

Keywords: None.

Full Cost: 52 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell strengthens your soul's connection to the body. First, you become immune to death curses. This includes death spells, direct-damage Necromantic magic (Burning Death, Rotting Death, etc.), and elixirs of Death (*GURPS Magic*, p. 215), plus non-magical equivalents such as Afflictions enhanced with Coma or Heart Attack, whether they're chi, divine, psionic, or spirit abilities, or something similar. Second, injury affects you normally, but you need never make a HT roll to stay alive. You can survive (and even function, if you remain conscious) down to -10xHP, at which point your body is physically destroyed and you die.

Statistics: Immunity to Death Curses (Magical, -10%) [9] + Unkillable 1 (Sorcery, -15%) [43].

Personal Protection from Force

Keywords: None.

Full Cost: 4.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You, and all of your carried gear, are protected from force-based attacks, such as the Magic Missile spell or the force beams (p. UT128). This increases your DR by twice the level of this spell (e.g., Personal Protection from Force 3 adds DR 6), cumulative with that from actual armor. This DR does *not* protect against Malediction-like effects and graviton beams that ignore DR.

Statistics: Damage Resistance 2 (Force Field, +20%; Limited, Force, -60%; Sorcery, -15%) [4.5/level].

Personal Protection from Incarnum

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You gain a +3 bonus on HT all rolls made to resist incarnum abilities, including soulmeld effects.

Statistics: Resistant to Incarnum (+3) (Sorcery, -15%) [9].

Personal Protection from Magic

Keywords: None.

Full Cost: 6.75 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You, and all of your carried gear, are protected from magical damage, both direct and indirect. This increases your DR by the level of this spell (e.g., Personal Protection from Magic 3 adds DR 3), cumulative with that from actual armor. This DR protects even against Malediction-based attacks.

Statistics: Damage Resistance 1 (Force Field, +20%; Limited, Magic, -20%; Malediction-Proof, +50%; Sorcery, -15%) [6.75/level].

Personal Reaper's Embrace

Keywords: None.

Full Cost: 31 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You begin to radiate a black aura that ages enemies who touch your body 1 year.

Statistics: [Ageing Attack 1](#) (Aura, +80%; Cosmic, Irresistible Attack, +300%; Melee Attack, Reach C, -30%; Sorcery, -15%) [31].

Personal Reflect Lightning

Keywords: None.

Full Cost: 27 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Any successful ranged electrical attack made against you is turned around so that it hits the attacker instead – so long as the attack's basic damage is less than Personal Reflect Lightning level dice. For example, Personal Reflect Lightning 3 would redirect any ranged electrical attack up to 3d while allowing those of 3d+1 or higher through. Convert all flat damage to dice (as per p. B269) for this determination.

An attacker unaware that this spell is in place must roll against the lower of IQ or Per, at +3 for Danger Sense and +3 for Combat Reflexes, to realize it in time to get a defense. If the attacker is not physically present at the time of the attack, the missiles are just deflected harmlessly. Do not roll damage or apply special effects until after determining who (if anyone) is hit.

This spell also reflects non-damaging ranged electrical attacks, such as some electric shockers; each level of Personal Reflect Lightning can repel two levels of Affliction or 10 levels of Binding. It doesn't stop most area effects or explosions.

Statistics: Damage Resistance 4 (All-or-Nothing, -10%; Force Field, +20%; Limited, Ranged Electrical Attacks, -60%; Reflection, +100%; Sorcery, -15%) [27] with each DR 4 converted into 1d per p. B269. The ruling on Affliction and Binding is from p. 168 of *GURPS Powers*. Each additional level adds 4 more levels of Damage Resistance [+27].

Personal Reflexes

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You have the Combat Reflexes (p. B43) advantage while this spell is active.

Statistics: Combat Reflexes (Sorcery, -15%) [13].

Personal Regeneration

Keywords: None.

Full Cost: 36 points.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

While this spell is active, you are able to regrow lost limbs and organs! A lost ear, finger, toe, claw, tentacle tip, etc. regrows in 1d weeks; a lost hand or foot in 1d+1 months; and a lost eye, arm, or leg in 2d+2 months. If you also have the Regeneration advantage, this spell works much faster: all lost body parts regrow in the time it takes you to heal to full HP. You can only regrow one limb or organ at a time. Unlike most spells with an indefinite duration, this spell costs 1 FP per hour, not 1 FP per minute to maintain.

Statistics: Regrowth (Magical, -10%) [36].

Personal Resist Acid

Keywords: None.
Full Cost: 55.5 points for level 1 + 37.5 points/additional level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become virtually immune to acid. You and all of your carried gear have DR equal to (spell level)x10 against acid – including not only Missile and Jet spells, but also to ingested acid and spells that bypass normal DR to cause direct, internal damage. Resistible acidic effects other than damage (e.g., a spell to inflict heartburn) simply fail, as though you have successfully resisted. In addition, all of your DR (from this spell, his armor, tough hide, etc.) is immune to being eroded away by acid.

Statistics: Damage Resistance 10 (Force Field, +20%; Limited, Acid, -40%; Sorcery, -15%) [32.5] + Immunity to Noxious Acidic Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Acid, -40%; Magical, -10%) [5] + Internal Sealed (Acid-Resistant Only, below, -60%; Magical, -10%) [1] + Sealed (Acid-Resistant Only, below, -60%; Force Field, +20%; Magical, -10%) [8]. Further levels increase both DRs by 10 [+37.5]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Personal Resist Air

Keywords: None.
Full Cost: 66.5 points for level 1 + 57.5 points/additional level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You becomes virtually immune to air attacks. You and all of your gear have DR equal to (spell level)x10 against air and wind – including not only Missile and Jet spells, but also to effects and spells that bypass normal DR to cause direct, internal damage, such as attacks that steal breath and deal FP damage by draining air from the lungs. In addition, subtract this DR from the damage for the purpose of determining knockback. Resistible air effects other than damage (e.g., a spell that paralyses the subject with winds or causes embolism) simply fail, as though the subject had successfully resisted.

Statistics: Damage Resistance 10 (Absorbs Knockback, +40%; Force Field, +20%; Limited, Air/Wind, -40%; Sorcery, -15%) [52.5] + Immunity to Noxious Air Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Air/Wind, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+57.5].

Personal Resist Cold

Keywords: None.
Full Cost: 46.5 points for level 1 + 37.5 points/additional level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become virtually immune to cold. You and all of your gear have DR equal to (spell level)x10 against cold and ice – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible cold effects other than damage (e.g., a spell that freezes the flesh to grant the subject Brittle) simply fail, as though you have successfully resisted. This spell does *not* grant you Temperature Tolerance.

Statistics: Damage Resistance 10 (Force Field, +20%; Limited, Cold/Ice, -40%; Sorcery, -15%) [32.5] + Immunity to Noxious Cold Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Cold/Ice, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+37.5]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Personal Resist Corrosion

Keywords: None.

Full Cost: 8 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

All of your DR (your armor, tough hide, etc.) is immune to being eroded away by acid. This does *not* protect against actual injury.

Statistics: Internal Sealed (Acid-Resistant Only, -60%; Magical, -10%) [1] + Sealed (Acid-Resistant Only, -60%; Force Field, +20%; Sorcery, -15%) [7].

Personal Resist Disease

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You are completely immune to diseases while this spell is active. Existing ones don't disappear, but their symptoms are suppressed and the duration does count toward a disease's cycles (consider any mandatory HT rolls to be successful).

Statistics: Immunity to Disease (Sorcery, -15%) [9].

Personal Resist Earth

Keywords: None.

Full Cost: 46.5 points for level 1 + 37.5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become resistant to damage from earth and stone. You and all of your gear have DR equal to (spell level)x10 against earth and stone – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible earth effects other than damage (e.g., the Earthbind spell or a blinding effect of the Sand Jet spell) simply fail, as though you have successfully resisted.

Statistics: Damage Resistance 10 (Force Field, +20%; Limited, Earth/Stone, -40%; Sorcery, -15%) [32.5] + Immunity to Noxious Earth Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Earth/Stone, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+37.5]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Personal Resist Energy

Keywords: None.

Full Cost: 43 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell gives you and everything you carry an extra DR 10 against any sort of FP or HP damage incurred from energy, whether from a direct attack or an environmental effect.

Statistics: DR 10 (Force Field, +20%; Limited, Energy, -20%; Sorcery, -15%) [43].

Personal Resist Fire

Keywords: None.
Full Cost: 46.5 points for level 1 + 37.5 points/additional level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become virtually immune to fire. You and all of your gear have DR equal to (spell level)x10 against fire and heat – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible cold effects other than damage (e.g., a spell that burns out the eyes to blind the subject) simply fail, as though you have successfully resisted. This spell does *not* grant you Temperature Tolerance.

Statistics: Damage Resistance 10 (Force Field, +20%; Limited, Fire/Heat, -40%; Sorcery, -15%) [32.5] + Immunity to Noxious Fire Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Fire/Heat, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+37.5]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Personal Resist Gravity

Keywords: None.
Full Cost: 4.75 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You, and all of your carried gear, are protected from gravity-based attacks, such as the Gravity Crush spell or the graviton beams (p. UT129). This increases your DR by the level of this spell (e.g., Resist Gravity 3 adds DR 3), cumulative with that from actual armor. This DR protects even against Malediction-based attacks.

Statistics: Damage Resistance 1 (Force Field, +20%; Limited, Gravity, -60%; Malediction-Proof, +50%; Sorcery, -15%) [4.75/level].

Personal Resist Lightning

Keywords: None.
Full Cost: 52.5 points for level 1 + 37.5 points/additional level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become virtually immune to electricity. You and all of your gear have DR equal to (spell level)x10 against electricity – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible electric effects other than damage (e.g., psionic Confuse to stun you) simply fail, as though you had successfully resisted. In addition, all of your DR is considered nonmetallic and nonconductive for the purpose of resisting electrical penetration, and none of your gear can be “shorted out” by electricity.

Statistics: Damage Resistance 10 (Force Field, +20%; Limited, Electricity, -40%; Sorcery, -15%) [32.5] + Immunity to Electrical Conduction (Force Field, +20%; Magical, -10%) [6] + Immunity to Noxious Electrical Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Electricity, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+37.5]. “Immunity to Electrical Conduction” protects implants like cybernetics from being surged by electricity; adding Force Field extends this to carried gear and prevents metallic armor from being reduced to DR 1 against an electrical attack. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Personal Resist Pain

Keywords: None.

Full Cost: 26 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You ignores shock, knockdown, physical stun, physical torture, and painful or stunning afflictions.

Statistics: Immunity to Pain (Sorcery, -15%) [26].

Personal Resist Plasma

Keywords: None.

Full Cost: 22.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell gives you and everything you carry an extra DR 10 against damage incurred from plasma, whether from a direct attack or an environmental effect, per level of this spell.

Statistics: DR 10 (Force Field, +20%; Limited, Plasma, -60%; Sorcery, -15%) [22.5/level].

Personal Resist Poison

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You are immune to poison for as long as the spell lasts. If you already have some in your veins, it temporarily stops killing you but does not vanish. However, this spell’s duration does count toward the poison’s normal lifespan and any required resistance rolls are considered successful, which may allow you to outlast a fast-cycling venom.

Statistics: Immunity to Poison (Sorcery, -15%) [13].

Personal Resist Pressure

Keywords: None.

Full Cost: 8 or 18 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You and all your gear are protected from the effects of high or low pressure. When casting, the you must decide whether to grant yourself Pressure Support (p. B77) or Vacuum Support (p. B96). This does not allow you to breathe in such environments; other spells or abilities are needed for that!

The basic (8-point) version of this spell grants up to Pressure Support 1. The improved (18-point) version raises the potential limit to Pressure Support 3. Either spell grants standard Vacuum Support.

Statistics: The basic version is Vacuum Support (Force Field, +20%; Sorcery, -15%) [6/5=2] and Pressure Support 1 (Force Field, +20%; Sorcery, -15%) [6] taken as Alternative Abilities. The improved version is Vacuum Support (Force Field, +20%; Sorcery, -15%) [6/5=2] and Pressure Support 3 (Force Field, +20%; Sorcery, -15%) [16] taken as Alternative Abilities.

Personal Resist Radiation

Keywords: None.

Full Cost: 10.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your body absorbs far less radiation than it normally would. This extends to everything you're carrying. See Radiation Protection (p. B436) for details. At level five (the maximum), you are effectively immune to radiation.

Spell Level	Protection Factor (PF)
1	5
2	20
3	10
4	500
5	Immune

Statistics: Radiation Tolerance 2 (Force Field, +20%; Sorcery, -15%) [10.5/level]. Treating ten levels of Radiation Tolerance as "immunity" is a special effect; if this does not suit the game, the GM can rule that further levels follow the progression on p. B79.

Personal Resist Sound

Keywords: None.

Full Cost: 51.5 points for level 1 + 37.5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become virtually immune to sonic attacks. You and all of your gear have DR equal to (spell level)x10 against sonics – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible sonic effects other than damage (e.g., an ultra-tech nauseator) simply fail, as though you have successfully resisted. In addition, you enjoy the benefits of Protected Hearing (p. B78).

Statistics: Damage Resistance 10 (Force Field, +20%; Limited, Sound, -40%; Sorcery, -15%) [32.5] + Immunity to Noxious Sonic Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Sound, -40%; Magical, -10%) [5] + Protected Hearing (Magical, -10%) [5]. Further levels increase both DRs by 10 [+37.5]. See below for internal defenses.

Personal Resist Water

Keywords: None.

Full Cost: 16 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You and anything carried are encased in a field which repels water and water-based liquids. You cannot become damp or waterlogged, remaining dry even when submerged. Someone could even throw (water-based) paint you and it would simply slough off with no effect.

This does not protect against the effects of freezing cold, scalding steam, and so on! It offers no resistance against ice missiles, geyser blasts, or most other attacks. However, the water resistance does offer some small defense against acid: you get +2 DR versus such attacks, and all of your DR is immune to being eroded away by acid.

Statistics: Damage Resistance 2 (Force Field, +20%; Limited, Acid, -40%; Magical, -10%) [7] + Sealed (Acid-Resistant and Waterproof Only, -50%; Force Field, +20%; Sorcery, -15%) [9].

Personal Rockwalking

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can walk or crawl on walls and ceilings made of rock or stone. You can stop at any point and stick to the surface without fear of falling. Neither feat requires a roll against Climbing skill, provided the surface is one you can cling to. Move while clinging is half your Basic Move.

If you are falling and trying to grab a vertical surface to break your fall, the GM must first decide whether there is anything in reach. If there is, you make a DX roll to touch the surface, and then make a ST roll at -1 per 5 yards already fallen. If you succeed, you stop your fall. Otherwise, you continue to fall – but you may subtract 5 yards from the height of the fall thanks to the slowing effect of the failed Clinging attempt. Variations in gravity affect these distances; e.g., in 0.5G, the ST roll would be at -1 per 10 yards.

Statistics: Clinging (Sorcery, -15%; Specific, Stone and Rock, -40%) [9].

Personal Sandstrider

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You do not suffer DX or Move penalties for traversing through sand.

Statistics: Terrain Adaptation (Sand; Sorcery, -15%) [5].

Personal Scales

Keywords: None.

Full Cost: 1 or 8 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You grow scales that prevents sunburn. The improved (26-point) version makes you grow thick scales that also provide DR 2*.

Statistics: Scales (Sorcery, -15%) [1]. The improved version adds DR 2 (Flexible, -20%; Magical, -10%) [+7].

Personal Scryguard

Keywords: None.

Full Cost: 37 points.

Casting Roll: None.

Range: Self.
Duration: Indefinite.

You are nearly impossible to detect, see, or divine with any Information spells, regardless of the magic system used to cast them. Scryguard reduces the diviner's effective margin of success by 10 for these purposes – so a spell that succeeded by 0-9 completely fails to find you, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it's resisted.

A spell like Detect Magic (*GURPS Thaumatology: Sorcery*, p. 19) will reveal the existence of the Personal Scryguard spell, but that's all – and the caster would have to first see you with his own eyes to cast it.

Statistics: Obscure 10 (Information Spells; Defensive, +50%; No Area of Effect, -50%; Stealthy, +100%; Sorcery, -15%) [37].

Personal See Invisible

Keywords: None.
Full Cost: 13 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell allows you to see objects or individuals that are normally invisible. This only covers magical invisibility.

Statistics: See Invisible (Magic; Sorcery, -15%) [13].

Personal Selective Gravity

Keywords: None.
Full Cost: 71 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You decide if you want to be affected by the local gravity or gravity-based abilities or not. For example, this effect may let you become weightless, become immune to Gravity Crush, but being able to benefit from a beneficial application of Gravity Push.

Statistics: Static (Gravity; Discriminatory, +150%; Sorcery, -15%) [71].

Personal Slimy Skin

Keywords: None.
Full Cost: 9 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your skin is covered with a thin layer of pond scum that drips from your chin and limbs like maple syrup. You gain Bad Grip 2 and Unnatural Features 5, but as an upside become hard to hold. This effect grants you +6 to all ST, DX, and Escape rolls to slip restraints, break free in close combat, or squeeze through narrow openings.

Statistics: Slippery 6 (Sorcery, -15%; Temporary Disadvantage, Bad Grip 2 and Unnatural Features 5, -15%) [9].

Personal Slow Fall

Keywords: None.
Full Cost: 11 points.
Casting Roll: None.

Range: Self.
Duration: Indefinite.

You subtract five yards from a fall automatically (treat this as an automatic Acrobatics success – don't check again for it). In addition, a successful DX roll halves damage from any fall.

Statistics: Catfall (Feather Fall, +20%; Sorcery, -15%) [11].

Personal Small Vision

Keywords: None.
Full Cost: 3.75 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You can see details that would normally be invisible without a magnifying glass or a microscope. Each level increases magnification by a factor of 10: 5 points gives 10x, 10 points gives 100x, and so on. This magnification only applies to objects within 1 foot.

Level 1 suffices for ordinary forensic investigation. Level 3 (1,000x) is equivalent to the best optical microscopes. Level 5 (100,000x) is comparable to an electron microscope, capable of imaging viruses. Level 6 (1,000,000x) is on par with a scanning-tunneling or atomic force microscope, and can study an object's atomic structure.

While the spell is on, you are nearsighted: you is incapable of seeing objects further than a yard away clearly – they appear blurred and all melee attacks are made at -2 to skill.

Statistics: Microscopic Vision 1 (Nuisance Effect, -2 to melee attacks, -10%; Sorcery, -15%) [3.75/level].

Personal Snow Shoes

Keywords: None.
Full Cost: 10 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You do not suffer DX or Move penalties for snow or ice.

Statistics: Terrain Adaptation (Ice; Sorcery, -15%) [5] + Terrain Adaptation (Snow; Magical, -10%) [5].

Personal Sonar Invisibility

Keywords: None.
Full Cost: 74 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become invisible to sonar. You still make noise, leave footprints, and have a scent – and anything you are carrying (up to the Medium encumbrance) becomes invisible to sonar too. You get a +9 to Stealth in any situation where being detected with sonar would matter, if you are carrying no more than your Medium encumbrance.

Statistics: Invisibility (Sonar; Affects Machines, +50%; Can Carry Objects, Medium, +50%; Sorcery, -15%) [74].

Personal Sound Vision

Keywords: None.
Full Cost: 17 points.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

You gain the Sonar advantage (p. B81).
Statistics: Sonar (Sorcery, -15%) [17].

Personal Space Adaptation

Keywords: None.
Full Cost: 36 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become shielded by an invisible force screen that protects you from the hazards of space. You gain PF 5, Sealed (p. B82), Temperature Tolerance 10 (p. B93), and Vacuum Support (p. B96). Note that this spell does *not* eliminate the need for air.

Statistics: Radiation Tolerance 5 (Magical, -10%) [9] + Sealed (Sorcery, -15%) [13] + Temperature Tolerance 10 (Magical, -10%) [9] + Vacuum Support (Magical, -10%) [5].

Personal Spatial Stability

Keywords: None.
Full Cost: 26 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You become anchored in space. You are immune to all space-manipulating abilities, such as teleportation and teleportation-based attacks.

Statistics: Static (Space-Based Abilities; Sorcery, -15%) [26].

Personal Steelwraith

Keywords: None.
Full Cost: 91 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

This spell makes you intangible to metal. You automatically fall through any metal floors. You will need to hold your breath on long trips (this spell does not provide air) and gain no special ability to see through metal. You may carry up to Medium encumbrance while doing this, but you cannot carry any metal objects – they fall through your body.

This spell does *not* make you immune to attacks with metal weapons, but makes you highly resistant to them. You are considered to be diffuse against metal attacks. It makes you immune to crippling injuries and reduces the damage you suffer from attacks with metal weapons; see *Injury to Unliving, Homogenous, and Diffuse Targets* (p. B380). Metal foes cannot slam or grapple you! This includes all the benefits of No Blood, No Brain, and No Vitals, but only against metal attacks.

Statistics Permeation (Metal; Can Carry Objects, Medium Encumbrance, +50%; Magical, -10%; Nuisance Effect, Can't carry anything metal, -20%; Nuisance Effect, Can't turn it off, -5%) [46] + Injury Tolerance (Diffuse; Limited, Metal, -40%; Sorcery, -15%) [45].

Personal Stinkguard

Keywords: None.
Full Cost: 2 points.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

You lose your sense of smell.

Statistics: Controllable Disadvantage (No Sense of Taste/Smell, Smell Only; Cosmic, No die roll required, +100%; Sorcery, -15%) [2].

Personal Stoneskin

Keywords: None.
Full Cost: 40 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

Your skin becomes resistant to damage, like if made of stone. You gain DR 10 that covers your whole body, including the eyes. This DR is semi-ablative - every 10 points of basic damage rolled removes one point of DR, regardless of whether the attack penetrates DR. Lost DR "heals" at the same rate as lost HP (including the effects of Regeneration, p. B80).

Statistics: DR 10 (Semi-Ablative, -20%; Sorcery, -15%) [33] + Nictitating Membrane 10 (Magical, -10%; Semi-Ablative, -20%) [7].

Personal Strengthen Will

Keywords: None.
Full Cost: 4.25 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You increase your Will by 1 per level of this spell.

Statistics: Will 1 (Sorcery, -15%) [4.25/level].

Personal Strong Arm

Keywords: None.
Full Cost: 2.55 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

You make one of your arms more strong compared to the rest of your body. This increases the ST of one arm chosen at the time of casting by 1 per level of this spell. Note that this does not affect overall Basic Lift. If a task requires multiple arms with varied ST levels, use the average value. You cannot benefit from two different instances of Strong Arm at the same time, the last casting overrides all previous ones.

Statistics: Arm ST 1 (One Arm; Sorcery, -15%) [2.55/level].

Personal Tongues

Keywords: None.
Full Cost: 54 or 108 points.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

The basic (54-point) version of this spell grants you the ability to speak every language at Accented (or Native, if you have Language Talent), excluding alien languages. The improved (108-point) version of this spell includes alien languages, though you may need special technology (or the Mimicry advantage) to produce the correct sounds.

Statistics: Omnilingual (Cosmic, Universal Translator, +50%; Sorcery, -15%) [54]. The improved version improves Omnilingual to Xeno-Omnilingual [+54]. The advantages may be found in *Pyramid #3-54*, page 29.

Personal Transmogrification

Keywords: None.

Full Cost: 75 points or more.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster transforms into an inanimate object of a similar weight. Clothing and gear weighing no more than his BL change with him. The caster may only learn the form of an object with which he is familiar. If the caster is destroyed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form.

Statistics: Morph (Can Carry Objects, No Encumbrance, +10%; Mass Conservation, -20%; Sorcery, -15%; Unliving Forms Only, -0%) [75]. This spell costs 75 points for a racial template worth no more than the caster's native racial template. A more powerful form costs 75 points plus 90% of the difference in cost between the caster's native template and that of the other form.

Personal Tremorsense

Keywords: None.

Full Cost: 7 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can detect the location and size of objects by sensing the vibrations in the ground around you. You can locate an opponent in the dark, but you cannot detect details (e.g., whether he is armed). In a perfectly still environment, you would be able to sense a barrier before you run into it due to the vibrations caused by your own footsteps.

To use Tremorsense, you must make a Sense roll. Consult the *Size and Speed/Range Table* (p. B550) and apply separate bonuses for the target's size and speed, and a penalty for the range to the target. A successful roll reveals the rough size, location, speed, and direction of movement of the target. It does not provide any information about the object's shape, color, etc. Once you have detected something, you may target it with an attack. The modifiers that applied to your Sense roll also apply to your attack roll, but can never give you a bonus to hit.

If you are not touching the ground, this ability does not work at all! Likewise, floating enemies are invisible to Tremorsense.

Statistics: Vibration Sense (Environmental, Ground, -20%; Sorcery, -15%) [7].

Personal Tremorsense Invisibility

Keywords: None.

Full Cost: 74 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become invisible to tremorsense (Vibration Sense based on the contact with ground or ground-based Subsonic Hearing). You still makes noise, leave footprints, and have a scent – and anything you are carrying (up to the Medium encumbrance) becomes invisible to tremorsense too. You get a +9 to Stealth in any situation where being detected with tremorsense would matter, if you are carrying no more than your Medium encumbrance.

Statistics: Invisibility (Tremorsense; Affects Machines, +50%; Can Carry Objects, Medium, +50%; Sorcery, -15%) [74].

Personal True Seeing

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to see through illusions of any kind.

Statistics: See Invisible (Illusion; Sorcery, -15%) [13].

Personal Ultravision

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to see ultraviolet light, as if you had the Ultravision (p. B94) advantage.

Statistics: Ultravision (Sorcery, -15%) [9].

Personal Unbreakable Bones

Keywords: None.

Full Cost: 14 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell makes your bones nearly indestructible. Damage to limbs and extremities still causes injury, subject to the usual maximums, but the injury needed to cripple these body parts is twice normal; that is, the amount usually required to dismember. Crippling is at worst lasting; you never suffer permanent crippling or dismemberment (see pp. B421-422). Skull is similarly protected - blows to the skull or eyes are treated no differently than a blow to the face (except that an eye injury can still cripple that eye). Injury that destroys the your body (-10xHP) breaks your skeleton.

Statistics: Injury Tolerance (Unbreakable Bones; Sorcery, -15%) [9] + Injury Tolerance (No Brain; Magical, -10%) [5].

Personal Vigor

Keywords: None.

Full Cost: 8.5 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your HT is increased by 1 per level of this spell. This affects the FP, Basic Speed, but does not heal fatigue. Fatigue gained from this spell cannot be used for spellcasting.

Statistics: HT 1 (Sorcery, -15%) [8.5/level].

Personal Walk on Air

Keywords: None.

Full Cost: 17 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Air, smoke, and other gases are like solid ground beneath your feet, allowing you to walk up and down “invisible stairs” at your ground Move. This won’t work in a vacuum – there has to be some kind of air present. If you get knocked down or slip, you fall! You may attempt one DX roll per second of falling. If you succeed, you stop in thin air, unharmed. Otherwise, you hit the ground for normal falling damage (see *Falling*, p. B431).

Statistics: Walk on Air (Sorcery, -15%) [17].

Personal Walk on Dust

Keywords: None.

Full Cost: 9 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Airborne dust is like solid ground beneath your feet, allowing you to walk on them at your ground Move. If you get knocked down or slip, you fall! You may attempt one DX roll per second of falling. If you succeed, you stop in the dust, unharmed, if there is still any dust beneath you. Otherwise, you hit the ground for normal falling damage (see *Falling*, p. B431).

Statistics: Walk on Air (Sorcery, -15%; Specific, Dust, -40%) [9].

Personal Walk on Fluid

Keywords: Buff.

Full Cost: 31 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Air, smoke, and other gases are like solid ground beneath your feet, allowing you to walk up and down “invisible stairs” at your ground Move. This won’t work in a vacuum – there has to be some kind of air present. If you get knocked down or slip, you fall! You may attempt one DX roll per second of falling. If you succeed, you stop in thin air, unharmed. Otherwise, you hit the ground for normal falling damage (see *Falling*, p. B431).

In addition, you can walk on the surface of any liquid as if it were solid ground. You move at your usual ground Move. This doesn’t protect you from any damage that you would take from coming into contact with the liquid, however. You can’t traverse volcanic lava or boiling acid without taking damage!

Statistics: Walk on Air (Sorcery, -15%) [17] + Walk on Liquid (Magical, -10%) [14].

Personal Walk Through Earth

Keywords: None.

Full Cost: 42 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You become able to pass through dirt, clay, mud, and sand as if they were not even there. You do not automatically sink into the ground; the earth beneath your feet is as solid as you wish it to be.

You will need to hold your breath on long trips (this spell does not provide air) and gain no special ability to see through earth. You may carry up to Light encumbrance while doing this.

Statistics: Permeation (Earth; Can Carry Objects, Light Encumbrance, +20%; Sorcery, -15%) [42].

Personal Walk Through Metal

Keywords: None.

Full Cost: 42 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to pass through metal obstacles as if they were not even there. You do not automatically sink into the ground; the metal beneath your feet is as solid as you wish it to be. You will need to hold your breath on long trips (this spell does not provide air) and gain no special ability to see through metal. You may carry up to Light encumbrance while doing this.

Statistics: Permeation (Metal; Can Carry Objects, Light Encumbrance, +20%; Sorcery, -15%) [42].

Personal Walk Through Plants

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You do not suffer DX or Move penalties for traversing through undergrowth, bushes, or other dense vegetation.

Statistics: Terrain Adaptation (Dense Vegetation; Sorcery, -15%) [5].

Personal Walk Through Water

Keywords: None.

Full Cost: 21 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to pass through water, snow, and ice as if they were not even there. You do not automatically sink to the bottom of bodies of water; the water beneath your feet is as solid as you wish it to be. You will need to hold your breath on long trips (this spell does not provide air) and gain no special ability to see through water. You may carry up to Light encumbrance while doing this.

Statistics: Permeation (Water; Can Carry Objects, Light Encumbrance, +20%; Sorcery, -15%) [21].

Personal Walk Through Wood

Keywords: None.

Full Cost: 42 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell allows you to pass through wood (dead or alive) as if it was not even there. You do not automatically sink into the wood; the wood beneath your feet is as solid as you wish it to be. You will need to hold your breath on long trips (this spell does not provide air) and gain no special ability to see through wood. You may carry up to Light encumbrance while doing this.

Statistics: Permeation (Wood; Can Carry Objects, Light Encumbrance, +20%; Sorcery, -15%) [42].

Personal Water Vision

Keywords: None.

Full Cost: 9 points/level.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets you see through water (including ice, snow, and steam). Each level of this spell allows you to see through up to one foot of water. You can just barely see the outline of the substance you are looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of your other vision advantages (Infravision, Ultravision, etc.).

Statistics: Penetrating Vision 2 (Sorcery, -15%; Specific, Water, -40%) [9/level].

Personal Wooden Arm

Keywords: None.

Full Cost: 64 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Your arm (up to the top of the biceps) turns to hard wood. It looks almost normal, able to flex and grip as if it were unaltered. You gain the Wooden Arm meta-trait; see the footnote below for details. The transformation takes 10 seconds.

If cast on a bleeding arm, the bleeding stops. The flow does not resume when the spell returns to its normal state – this spell effectively stanches an open wound and can be cast solely for that purpose. The arm is immune to metabolic hazards, is homogenous, has no blood, has DR 4, and its punch damage is increased by +1 per die.

Your wooden arm burns more easily than flesh. You make a HT roll to avoid catching fire whenever the arm receives a major wound from a burning or explosive attack. The arm catches fire *automatically* if such an attack inflicts 10+ HP of injury. Once aflame, the arm suffers 1d-1 injury per second until it is extinguished by immersion in water, rolling on the ground (takes 3 seconds), etc.

Statistics: Alternate Form (Wooden Arm*; Sorcery, -15%) [64].

* A meta-trait: Blunt Claws (One arm, -50%) [2]; DR 4 (One arm, -40%) [12]; Fragile (Combustible; One arm, -40%) [-3]; Immunity to Metabolic Hazards (One arm, -40%) [18]; Injury Tolerance (Homogenous, No Blood; One Arm, -40%) [27]; Arm can be affected by Plant spells [0]. 56 points.

Personal Wallwalker

Keywords: None.

Full Cost: 17 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

You can walk or crawl on walls and ceilings. You can stop at any point and stick to the surface without fear of falling. Neither feat requires a roll against Climbing skill, provided the surface is one you can cling to. Move while clinging is half your Basic Move.

If you are falling and trying to grab a vertical surface to break your fall, the GM must first decide whether there is anything in reach. If there is, you make a DX roll to touch the surface, and then make a ST roll at -1 per 5 yards already fallen. If you succeed, you stop your fall. Otherwise, you continue to fall – but you may subtract 5 yards from the height of the fall thanks to the slowing effect of the failed clinging attempt. Variations in gravity affect these distances; e.g., in 0.5G, the ST roll would be at -1 per 10 yards.

Statistics: Clinging (Sorcery, -15%) [17].

Personal Warmth

Keywords: None.

Full Cost: 5 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell keeps you warm. In game terms, it lowers his threshold for Cold (p. B430) – which is 35°F for most humans – by (HTx10)°F. This allows an average HT 10 human to be comfortable down to -65°F. This protection doesn't blunt magical cold attacks; it affects only the ambient temperature.

Statistics: Temperature Tolerance 5 (Cold; Sorcery, -15%) [5].

Persuasion

Keywords: Buff.

Full Cost: 14 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: Unlimited.

Duration: 3 minutes.

The caster makes the subject being more persuasive to a single other person. When that other person makes a reaction roll to determine his reaction towards this spell's subject, the roll gets a bonus equal to the spell's level. The spell ends once this reaction roll is made. In most games, GMs will wish to limit the number of levels of Persuasion a sorcerer may take. Persuasion 5 is a common maximum.

Statistics: Affliction 1 (HT; Advantage, Persuasion 1, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [14]. Additional levels add further Persuasion to the Advantage enhancement [+2]. *Note:* Each level of "Persuasion" is Charisma 1 (Accessibility, Only against the secondary subject, -50%; Magical, -10%) [2].

Pestilence

Keywords: Resisted (HT).

Full Cost: 87 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent until cured.

The caster infects the subject with a disease of his choice. The disease must be known to the caster. The combined value of appropriate enhancements and limitations (such as Attribute Penalty, Disadvantage, etc.) should not be more than 50%.

Statistics: Affliction 1 (HT; Accessibility, Only diseases, -40%; Variable Enhancements, +500%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [87].

Phantasmal Poison

Keywords: Weapon Buff.

Full Cost: 13 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

You create a phantasm of an oily green poison on the target weapon. Every time a creature is hit by the target weapon, it takes 1d-1 of additional follow-up toxic damage, as it believes to be poisoned (if it *can* be poisoned). This damage can be resisted with a Will roll. The attack must penetrate the creature's DR to apply the follow-up damage.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Phantasmal Poison, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [13]. *Note:* “Phantasmal Poison” is Toxic Attack 1d-1 (Based on Will, +20%; Follow-Up, This weapon, +0%; Magical, -10%; Resistible, Will, -30%; Visible, -10%) [3].

Phantom

Keywords: Area (Leveled).

Full Cost: 82.5 points for level 1 + 37.5 points/additional level*.

Casting Roll: None. Use IQ or Artist (Illusion) to determine how convincing it is.

Range: 50 yards.

Duration: Indefinite.

You can create an illusion anywhere that you can see within 50 yards; see Area (Sorcery, p. 9) for the size. It affects hearing, taste, touch, smell, Dark Vision, Infravision, Vibration Sense, as well as vision. You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something “off.” Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere. However, even if they successfully “disbelieve,” your illusion doesn’t disappear. Thus, even an obvious illusion can be useful to block line of sight or act as white noise to mask quiet conversation.

If the subject believes in the phantom, the phantom has substance and may proceed to strike, grapple, shove, and so on as if it were real. A phantom has ST equal to the level of this spell multiplied by 5 and DX of the sorcerer. The phantom can only exert force as if it was a pair of invisible hands. See the Telekinesis advantage (B92) for more information.

You must concentrate to change the illusion or to have it behave “intelligently” (e.g., to make an illusionary person talk). Without concentration, it will conform to your expectations for how it should behave; e.g., an illusionary wolf will shy from a torch or snarl if someone comes close.

Statistics: Illusion (Extended, Dark Vision, +25%; Extended, Infravision, +10%; Extended, Taste/Smell, +20%; Extended, Touch, +20%; Extended, Vibration Sense, +10%; Independence, +40%; Link, +10%; Ranged, +40%; Reduced Range, 1/2, -10%; Sorcery, -15%) [57.5] + Telekinesis 5 (Accessibility, Only on those who believe in the illusion, -20%; Increased Range, x5, +20%; Link, +10%; Magical, -10%) [25]. Additional levels add Area Effect (+50%) to the Illusion advantage and add 5 more levels of Telekinesis [+37.5*].

* Calculate the total cost and then round up.

Phantom Killer

Keywords: Resisted (IQ or Per).

Full Cost: 109 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

This spell can slay anything with a mind (IQ 1+). It creates a phantom that’s visible to everyone but tangible to the subject alone. The victim may choose to resist by trying to rationalize away the illusion (IQ) or see through it (Per).

Successful resistance causes the phantom to melt away harmlessly. A subject who fails to resist is instantly engulfed in a monstrous shadow, conscious but incapacitated. Over the next minute, he can do nothing but resist again each second. Victory here doesn’t end the curse but merely staves off harm; each loss drains 1 HP. The cause of death could be anything: a man might die of profound shock, a robot may shake itself apart, a spirit could actually be consumed by an apparition of pure mana.

Others may attempt to dispel the phantasm using Dispel Illusion or Remove Curse. General countermagic – such as Counterspell or Dispel Magic – is ineffective. So are attacks on the Phantom Killer or its creator!

Statistics: Burning Attack 1 (Accessibility, Only on IQ 1+ beings, -5%; Based on IQ, +20%; Cyclic, 1 second interval, 60 seconds, can be dispelled by Dispel Illusion or Remove Curse, +3,000%; Link, +10%;

Magical, -10%; Malediction 2, +150%; No Incendiary Effect, -10%; Nuisance Effect, Multiple ways to resist, -10%) [65] + Affliction 1 (IQ or Per; Accessibility, Only on IQ 1+ beings, -5%; Based on IQ, +20%; Cosmic, Immune to Dispel Magic, +50%; Fixed Duration, +0%; Link, +10%; Malediction 2, +150%; Nuisance Effect, Multiple ways to resist, -10%; Paralysis, Variant, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [44].

Phase

Keywords: None.

Full Cost: 35 points.

Casting Roll: Power Dodge (IQ/2+3).

Range: Self.

Duration: Instantaneous.

While this spell is active you can “dodge” an incoming attack by phasing out to the Ethereal Plane for a moment. This works as if you had Jumper (World) (p. B64), but with no -10 penalty for lack of preparation.

You can carry up to your Heavy Load when you phase.

Statistics: Jumper (World; Active Defense, -40%; Extra Carrying Capacity, Heavy, +30%; Faster Concentration 5, +25%; Improved, +10%; Limited Access, Ethereal Plane for a moment, -80%; Magical, -10%) [35]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Phase Other

Keywords: Buff.

Full Cost: 38 points.

Casting Roll: Power Dodge (DX/2+3). Use Innate Attack (Gaze) to aim. IQ to phase.

Range: 100 yards.

Duration: Instantaneous.

The caster may try an immediate IQ roll to shift the subject to the Ethereal Plane for a moment to dodge an incoming attack. This spell may only be used as an active defense.

Statistics: Affliction 1 (HT; Active Defense, -40%; Advantage, Phase Other, +300%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [38]. *Note:* “Phase Other” is Warp (Blink Only, -60%; Gyroscopic, +10%; Magical, -10%; Stays in place, -10%) [30].

Phase Trap

Keywords: Resisted (Will).

Full Cost: 55 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The subject of this spell becomes anchored to the plane of existence he is currently on. He becomes unable to plane shift voluntarily or involuntarily.

Statistics: Affliction 1 (Will; Advantage, Phase Trap, +270%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [55]. *Note:* “Phase Trap” is Static (Plane Shifting; Magical, -10%) [27].

Phlogiston Arc

Keywords: Obvious.

Full Cost: 21 points.

Casting Roll: None. Use Force Whip to hit.

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster has a whip of phlogiston in his hand. It is wielded like a normal whip (p. B404), except that it always takes only one second to ready, and it cannot be used to parry or entangle. The whip has Reach 1-4 (changing Reach requires a Ready maneuver) and inflicts swing burning surge damage every time it strikes. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Resist Lightning only reduces this damage to half, instead of granting immunity. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage (-1 per 4 points of penetrating damage with Resist Lightning), or be physically stunned. On subsequent turns, they can roll HT to recover. Those who critically fail this HT roll – or fail it by 5 or more – are instead paralyzed for a number of minutes equal to their margin of failure.

Statistics: Natural Weapon (Burning; Cannot Parry, -40%; Destructive Parry, +40%; Extra Reach, 1-4, Ready maneuver necessary, +90%; Intangible, +50%; Side Effect, Stunning, Secondary Paralysis, +80%; Single, -20%; Sorcery, -15%; Surge, Arcing, +100%; Swing-Capable, +20%) [21].

Phlogiston Detonation

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 18 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a coruscating discharge of phlogiston that expands to cover an area; it is not technically an explosion, but the term has long since entered common use. Use Innate Attack (Beam) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes dice of burning surge damage equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Resist Lightning only reduces this damage to half, instead of granting immunity. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage (-1 per 4 points of penetrating damage with Resist Lightning), or be physically stunned. On subsequent turns, they can roll HT to recover. Those who critically fail this HT roll – or fail it by 5 or more – are instead paralyzed for a number of minutes equal to their margin of failure. Phlogiston Detonation behaves unpredictably around conductors; see Lightning (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Area Effect, 4 yards, +100%; Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, Secondary Paralysis, +80%) [18/level].

Phlogiston Discharge

Keywords: Missile, Obvious.

Full Cost: 13 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a coruscating discharge of phlogiston that does 1d burning surge damage per level. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Resist Lightning only reduces this damage to half, instead of granting immunity. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage (-1 per 4 points of penetrating damage with Resist Lightning), or be physically stunned. On subsequent turns, they can roll HT to recover. Those who critically fail this HT roll – or fail it by 5 or more – are instead paralyzed for a number of minutes equal to their margin of failure. Phlogiston Discharge behaves unpredictably around conductors; see Lightning (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, Secondary Paralysis, +80%) [13/level].

Phlogiston Sphere

Keywords: Missile, Obvious.

Full Cost: 27.5 points/level*.

Casting Roll: None. Use Innate Attack (Projectile) to «lock on».

Range: 20 yards.

Duration: Instantaneous.

A ball of phlogiston flies off your fingertips towards your target. The ball floats right through windows, curtains, walls, and other nonmetallic obstacles. The ball explodes on the mental command of the caster or upon contact with a living being or metallic object. An explosion does 1d burning surge damage per level of this spell to everyone within four yards of the explosion point. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Resist Lightning only reduces this damage to half, instead of granting immunity. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage (-1 per 4 points of penetrating damage with Resist Lightning), or be physically stunned. On subsequent turns, they can roll HT to recover. Those who critically fail this HT roll – or fail it by 5 or more – are instead paralyzed for a number of minutes equal to their margin of failure. The projectile is homing, so it steers itself. As it uses normal vision to seek its target, it does not ignore darkness penalties. To “lock on,” you must Aim at the target and make an unmodified skill roll. Do not roll against your skill to hit. Instead, use the attack’s skill of 10 – plus Accuracy, if you made your skill roll – and ignore all range penalties. The projectile moves 4 yards per second. For more information, see *Guided and Homing Weapons* (B412).

Statistics: Burning Attack 1d (Area Effect, 4 yards, +100%; Cosmic, Passes through nonmetallic obstacles, +100%; Homing, +50%; Increased 1/2D, 2x, +5%; Reduced Range, x1/5, -20%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, Secondary Paralysis, +80%; Triggered Delay, +50%) [27.5/level*].

* Calculate the total cost and round up.

Phlogiston Stare

Keywords: Jet, Obvious.

Full Cost: 13.25 points/level*.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of phlogiston erupts from your eyes. Use Innate Attack (Gaze) to hit. Don’t apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does burning surge damage with dice equal to your level of this spell. The GM must determine what the maximum level available in the campaign is. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Resist Lightning only reduces this damage to half, instead of granting immunity. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage (-1 per 4 points of penetrating damage with Resist Lightning), or be physically stunned. On subsequent turns, they can roll HT to recover. Those who critically fail this HT roll – or fail it by 5 or more – are instead paralyzed for a number of minutes equal to their margin of failure. Phlogiston Stare behaves unpredictably around conductors; see *Lightning* (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Increased 1/2D, 2x, +5%; Jet, +0%; Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, Secondary Paralysis, +80%) [13.25/level*].

* Calculate the total cost and then round up.

Phlogiston Touch

Keywords: Obvious.

Full Cost: 11.5 points/level*.

Casting Roll: None. Use unarmed combat skill or DX to hit.

Range: Touch.

Duration: Instantaneous.

This spell charges the caster's hand with phlogiston. The caster must touch the subject to trigger this spell. The touch deals 1d burning surge damage per level of this spell. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Resist Lightning only reduces this damage to half, instead of granting immunity. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage (-1 per 4 points of penetrating damage with Resist Lightning), or be physically stunned. On subsequent turns, they can roll HT to recover. Those who critically fail this HT roll – or fail it by 5 or more – are instead paralyzed for a number of minutes equal to their margin of failure.

Statistics: Burning Attack 1d (Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, Secondary Paralysis, +80%) [11.5/level*].

* Calculate the total cost, then round up.

Phosphorescence

Keywords: Area (Leveled).

Full Cost: 20 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

Everything in a two-yard-radius area briefly emits soft light. This does not help in combat, but allows everyone within the line of sight to the area to make a Vision roll with no darkness penalties to get a snapshot of what's in the area. While this won't aid attacks on moving targets, it will reveal whether people or objects are present. To place the area at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Statistics: Obscure Vision 10 (Nuisance Effect, Does not increase illumination above zero, -15%; Ranged, +50%; Reduced Duration, 1/20, -25%; Reversed, -0%; Sorcery, -15%; Variable, Area, +5%) [20]. Further levels add Area Effect (+50%) to the advantage [+10].

Physiognomy

Keywords: Information.

Full Cost: 44 or 94 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Physiognomy is divination by examining and measuring parts of a subject's body. Different traditions usually focus on a particular body part - hands, feet, head, etc. Physiognomy is only really suited to answering questions about the subject or his fortune; attempts to divine information about absent persons are at -5.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (44-point) version of this spell requires 10 minutes to cast! The improved (94-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Penalty for impersonal questions, -5%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%) [44]. The improved version adds Reduced Time 10 (+200%) [+50].

Piercing Weapon

Keywords: Weapon Buff.

Full Cost: 36 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Gives the weapon a narrow-but-blunt profile by reshaping it, converting the damage of a non-piercing attack from its ordinary damage type to piercing. This improves blunt trauma for most non-crushing attacks and allows crushing attacks to target vital areas. The class of piercing damage depends on the spell level.

Level	Cost	Damage Type
1	36 points	Small piercing or piercing (caster's choice)
2	52 points	Large piercing
3	76 points	Huge piercing

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Piercing Weapon, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Piercing Weapon" is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Additional levels remove -2 or -5 in penalties [+16 or +40]. This spell is based on the Piercing Strike imbue skill.

Plague Touch

Keywords: Resisted (HT).

Full Cost: 48 points for level 1 + 15 points/additional level.

Casting Roll: None. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

The caster must touch the subject to trigger this spell. Armor does not protect. If the subject fails his HT roll to resist, he takes 3d crushing damage per level of this spell. This damage does not cause knockback. This spell *does* affect the undead. The subject becomes a "carrier". Anybody that person touches without deliberate hostile intent suffers the same effects and becomes a carrier, too. The original target stops being a carrier. This transfer can happen twice per level of this spell. Only the living or undead take injury, but anyone can be a carrier! However, nobody can be zapped more than once by a given casting of Plague Touch.

For this spell's purposes, a "touch" includes a deliberate touch (e.g., to render first aid or cast a helpful spell), an accidental bump (as from knockback), or even handing off an object. A person simply passing through a non-hostile hex must roll vs. DX, with failure indicating a brief touch. It's unimportant which party initiates contact. Opponents in battle are assumed hostile; the magic won't spread to them under any circumstances.

Statistics: Crushing Attack 3d (Based on HT, +20%; Cyclic, Highly Contagious, Resistible, two 1-second cycles, +150%; Melee Attack, Reach C, Cannot Parry -35%; Malediction 1, +100%; No Knockback, -10%; No Signature, +20%; Nuisance Effect, Cannot strike one target twice, -10%; Sorcery, -15%) [48]. Each additional level increases the number of cycles by 2 (+100%) [+15].

Planar Portal

Keywords: Area (Leveled).

Full Cost: 220 points for level 1 + 50 points/additional level.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: 1d+2 minutes.

This spell is a limited version of the Create Planar Gate spell. For this spell to work, two identical portal arches must be built on different planes of existence. The caster must touch one of the arches and successfully cast this spell to create a portal that leads to the corresponding arch. He does not have to visit the destination point beforehand. At level 1, the caster can only open portals with arches no more than 2 yards in radius. Each additional level doubles the maximum radius.

To create a gate, you must concentrate for 10 seconds, and make a IQ roll. You may hurry the creation, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, the gate appears leading to your target destination. On a failure, the gate does not appear. On a critical failure, the gate cannot be opened for 24 hours.

Statistics: Jumper (Interplanar; Anchored, Single Fixed Site, -80%; Cosmic, Do not have to visit the other side, +50%; Extended Duration, 30x, +60%; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Magical, -10%; Special Portal, Prebuilt Portal, -60%; Tunnel, Before, +100%) [220]. Each additional level adds Area Effect (+50%) [+50]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Planar Summons

Keywords: None.

Full Cost: 27 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned being's Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

Each time you cast this, you summon an outsider (worth 75% or less of your point value) from a particular plane of existence (chosen when you pick this spell). The GM will create this being, but you can request one that meets broad criteria. Alternatively, if you know a specific being you want to call, you can summon it (although if you do not have its True Name or some equally significant identifier, you are at -5 on the casting roll). A penalty applies based on the planar "distance": There is no distance penalty for creatures that are currently on the same plane of existence. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. The Prime Material Plane is considered adjacent to the Astral Plane, and the Astral Plane is adjacent to the Outer Planes, where most of the outsiders come from. Thus, preparations that mitigate the penalty usually are required.

The summoning itself requires 10 minutes of preparation and ritual. At the end of the casting, you must pay 1 FP and make a Quick Contest of Will against the outsider to force it to appear. If you are victorious, the outsider arrives. It then makes a reaction roll. On Poor or worse, treat it as an Unwilling Ally – it will obey you, but try to subvert your commands or otherwise act against your interests. If the reaction is Neutral or better, it will serve you reasonably faithfully.

You can also summon outsiders to answer questions. Treat this as a Contact Group with an appropriate knowledge category, an effective skill of 18, and a reliability that depends on the reaction roll: Unreliable for Poor or less, Somewhat Reliable on a Neutral reaction, Usually Reliable for Good, and Completely Reliable for Very Good or Excellent reactions. Unlike most sorcery with a duration, this spell must be maintained; thus, unless you can cast simultaneous spells, using another spell will immediately dismiss the summoned being. However, there is no FP cost to maintain this spell, only to cast it. A summoned being is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, you must wait 24 hours before using this spell again; if dismissed, you must wait five minutes.

Two other versions of this spell summon beings of different potency. Lesser Planar Summons has a full cost of 10 points, calls forth an outsider worth up to 25% of your point value, and has a casting time of one minute. Greater Planar Summons has a full cost of 78 points, calls an outsider worth up to 150% of your point value, and requires one hour to cast. Treat creatures summoned with the Lesser version as having an effective skill of 12, while Greater Planar Summons provides effective skill 21.

Statistics: Ally (A type of outsiders; Built on 75%; Constantly; Adjustable, +50%; Conjured, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%) [27]. Lesser Planar Summons has Ally, built on 25%, and Immediate Preparation Required decreased to 1 minute, -30%. Greater Planar Summons is built on 150%, and increases Immediate Preparation Required to 1 hour, -75%. Notes: The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional "range" penalties.

Plane Shift

Keywords: None.

Full Cost: 50 points.

Casting Roll: Skill or IQ-3, special casting time (see below).

Range: Self.

Duration: Instantaneous.

The spell allows you to transport yourself to another plane of existence or dimension. To activate the spell, you must visualize your desired destination (you must have visited that place before), concentrate for 10 seconds, and make a casting roll. The casting roll depends on your familiarity with the plane of destination. Once you have visited a plane via a naturally occurring portal, a critical failure, or by "hitching a ride" with another planeswalker, you can memorize its "feel" by concentrating and spending character points to "learn" that plane as an IQ/Easy skill. This process takes one hour per point you wish to spend. Use this skill when shifting to that plane in the future. Memorization is optional, but if you choose not to memorize a plane, you must roll at IQ-3 to attempt to shift to that plane. Coexisting planes, such as the Ethereal Plane or the Plane of Shadow do not require memorization and require a roll against IQ without the -3 penalty.

If you rush the spell, your roll will be penalized by -1 for each second of omitted concentration. If successful, you will arrive at your intended destination. However, if you fail, you will not be transported anywhere. In the case of a critical failure, you will end up in an unintended location chosen by the GM.

If you are carrying equipment heavier than your Basic Lift, then you make your casting roll at a penalty equal to twice your Encumbrance level. On a failed roll, you leave excess cargo behind; on a critical failure, you lose 1 point of IQ for each Encumbrance level you attempted as you "burned out" that part of your brain temporarily. This temporarily lost IQ recovers after you sleep.

When shifting to a plane coexisting with the one you are currently on, you will appear in the same physical location as where you left your previous plane, but on a parallel world. If there is no safe corresponding location within 100 yards of your intended destination, the spell will fail. This does not guarantee protection from other forms of danger, such as radiation or wild animals. If you possess Danger Sense, the GM may roll before a hazardous jump to provide a warning on a successful result. When shifting to a coterminous or a separate plane, you arrive with a deviation of 1dx100 miles.

The FP cost of this spell depends on the "planar distance." To shift between two different layers of the same plane, spend 1 FP. To shift between two bordering planes (such as the Prime Material Plane and the Astral Plane), spend 2 FP. Spend one additional FP per each additional degree of "removal." Certain very distant planes, such as the Far Realm, may require you to spend 10 FP.

To cast this spell, you must hold a small, forked metal rod. The size and metal type dictates to which plane of existence or alternate dimension the spell sends you. You must also be able to perform gestures and vocalize magical incantations.

If you wish to visit planes that you have not been to before, you must discover a natural portal, critically fail, or "hitch a ride" with another planeswalker. If you are in physical contact with another character that is traveling between planes, you can "hitch a ride" even if the character initiating the shift does not want company. Only the person initiating the shift makes a casting roll; wherever they end up, you do too.

Optionally, you may overload this spell to transport other willing beings in physical contact with you. Your casting roll will be at -5 per additional target, and your casting will cost an additional 2 FP. You can offset this penalty (but never get a net bonus) by voluntarily spending additional FP; each FP cancels -1 in penalties. If you roll a critical success, you recover all FP spent on this casting. If you fail, your spell works, but without bringing additional targets with you. A critical failure strains your spellcasting ability; the spell automatically fails, you lose 1d FP, and all your magical powers shut down for 1d seconds. You may buy off this penalty as a Hard technique for each plane.

Statistics: Jumper (World; Drift, Variant, -40%; Improved, +10%; Magical, -10%; Requires an appropriate forked metal rod, -15%; Requires gestures, -10%; Requires magic words, -10%; Uncertain Encumbrance, +25%) [50].

Plane Shift Other

Keywords: Resisted (Will).
Full Cost: 218 points or 238 points.
Casting Roll: Will. IQ to plane shift. Special casting cost.
Range: Unlimited.
Duration: Instantaneous.

If the subject fails to resist, the caster may try an immediate IQ roll to shift the subject to another plane of existence as if using the Jumper advantage (p. B97). The basic (218-point) version of this spell allows caster to send the subject and his gear up to his Extra-Heavy encumbrance to one other plane, chosen when you learn the spell. The improved (238-point) version opens this up to any dimension the caster is familiar with. He can become familiar with new planes by hitching a ride there – with another sorcerer using this spell, a magician using an equivalent spell, a creature with an innate ability, etc. – or via tomes of knowledge which contain detailed instructions on where and how to travel.

Statistics: Affliction 1 (Will; Advantage, Plane Shift Other, +1,900%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [218]. *Notes:* “Plane Shift Other” is Jumper (Interplanar; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Limited Access, -20%; Reliable +10, +50%) [190]. The +10 for Reliable cancels the -10 for no preparation. The improved version removes Limited Access [+20]. The Improved enhancement removes the auto-fail on 14+.

Plant Control

Keywords: None.
Full Cost: 7 points/level.
Casting Roll: None.
Range: 10 yards.
Duration: Indefinite.

This spell enables living, but not intelligent and mobile plants to flex. The minimum level required to animate a plant equals its HP/4. An animated plant can grab, lift, strike, and throw with ST equal to (4*Plant Control level needed to animate it). It has your DX. It can walk and jump if it isn't fixed in place; Move equals to 4*Plant Control level minus the level needed to animate it. You can use skills through animated plants – but note that plants other than topiaries usually have No Fine Manipulators. Plants return to their rest state once you give up control. Plant Control requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn.

Statistics: Telekinesis 4 (Accessibility, Living Plants Only, -30%; Animation, -20%; Sorcery, -15%) [7]. Every additional level adds 4 more levels of Telekinesis [+7].

Plant Form

Keywords: None.
Full Cost: 45 points.
Casting Roll: None. Special casting time.
Range: Self.
Duration: Indefinite.

The caster can assume the form of any natural plant or tree between 1/2 and five times his own size, as if using the Morph advantage (p. B84). The transformation takes 10 seconds. Equipment and gear up to his Light Encumbrance change with him. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead). The caster cannot move about, attack, etc., unless a plant with those abilities exists in the game world and he takes that form, or unless Animate Plant is cast on his plant form. He may hear normally but may not see except to sense light and darkness. He may not speak.

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ.

Statistics: Morph (Accessibility, Non-Intelligent Plants Only, -60%; Can Carry Objects, Light Encumbrance, +20%; Sorcery, -15%) [45].

Plant Form Other

Keywords: Buff.

Full Cost: 66 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster transforms the subject into any natural plant or tree between 1/2 and five times the subject's own size, as if using the Morph advantage (p. B84). Equipment and gear up to his Light Encumbrance change with him. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead). The subject cannot move about, attack, etc., unless a plant with those abilities exists in the game world and he was transformed into it, or unless Animate Plant is cast on his plant form. He may hear normally but may not see except to sense light and darkness. He may not speak.

The subject retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may omit racial mental disadvantages (e.g., Bestial), and he always drops the racial IQ modifier from a template, allowing the subject to use his own IQ.

Statistics: Affliction 1 (HT; Advantage, Plant Form Other, +500%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [66]. *Notes:* "Plant Form Other" is Morph (Accessibility, Non-Intelligent Plants Only, -60%; Can Carry Objects, Light Encumbrance, +20%; Magical, -10%) [50]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

Plant Growth

Keywords: Buff.

Full Cost: 70 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 minute.

Causes the equivalent of one month's growth in one minute. Trees change only slightly, while weeds grow tremendously.

Statistics: Affliction 1 (HT; Accessibility, Only on plants, -40%; Advantage, Plant Growth, +630%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [70]. *Note:* "Plant Growth" is Unaging (Age Control, Only Forwards, +10%; Magical, -10%; Reduced Time 16, +320%) [63].

Plant Sense

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject can detect the location and size of objects by sensing the minute disturbances of vegetation around him. He can locate an opponent in the dark, but you cannot detect details (e.g., whether he is armed). In a perfectly still, dark forest, he would be able to sense a barrier before he runs into it, and could find openings by sensing the flow of air through the plants.

To use Plant Sense, the subject must make a Sense roll. Consult the *Size and Speed/Range Table* (p. B550) and apply separate bonuses for the target's size and speed, and a penalty for the range to the

target. A successful roll reveals the rough size, location, speed, and direction of movement of the target. It does not provide any information about the object's shape, color, etc. Once the subject has detected something, he may target it with an attack. The modifiers that applied to his Sense roll also apply to his attack roll, but can never give him a bonus to hit.

Note that if you are outside the areas of dense vegetation where the ability functions, or if the subject is wearing a sealed suit, this ability does not work at all!

Statistics: Affliction 1 (HT; Advantage, Plant Sense, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Plant Sense" is Vibration Sense (Environmental, Dense Vegetation, -40%; Magical, -10%) [5].

Plant Shape

Keywords: None.

Full Cost: 45 points or 125 points or more; see text.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume different plant forms, as if using the Morph advantage (p. B84). The transformation requires 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. Such changes raise the cost of plant templates, which are cheap due to limited mental capabilities. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any plant species he can turn into.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his "slots" are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a "slot".

If the caster can assume any racial template worth no more than his native one, Plant Shape costs 45 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 45 points. For instance, a human who can take on any plant racial template worth up to 75 points would pay 120 points for Plant Shape.

In addition, the caster may purchase the improved (125-point) version of this spell. This shortens the transformation time to 1 second.

Statistics: Morph (Accessibility, Plants Only, -40%; Sorcery, -15%) [45]. The improved version adds Reduced Time 4, +80% [+80].

Plant Speech

Keywords: None.

Full Cost: 13 points.

Casting Roll: None.

Range: Personal.

Duration: Indefinite.

You can converse with plants. All earthly plants are IQ 0, but a large tree might be "wiser" than the average ivy, at the GM's whim. A plant might know how recently it was watered or walked on, or something else that directly bears on its well-being, but would be unable to relate an overheard phone conversation. Any normal plant will always cooperate, within the limits of its ability. It takes one minute to ask one question and get the answer – if the plant decides to speak at all.

Statistics: Speak with Plants (Sorcery, -15%) [13].

Plant to Object

Keywords: Buff.

Full Cost: 42 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster transforms the subject living plant into an inanimate object of a similar weight composed of the same material. If the plant is sentient, clothing and gear do not change with it. It cannot shift back on his own; it must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.) The caster may only learn the form of an object with which he is familiar. If the subject is destroyed, he immediately reverts to his native form (which will also be unconscious or dead).

The subject retains his intelligence, but gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Accessibility, Only on plants, -40%; Advantage, Plant to Object, +300%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [42]. *Note:* "Plant to Object" is Morph (Accessibility, Only objects of the same material, -40%; Magical, -10%; Mass Conservation, -20%; Unliving Forms Only, -0%) [30].

Plant Vision

Keywords: Buff.

Full Cost: 15 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the subject see through living vegetation. Each level of this spell allows the subject to see through up to six inches of living plant matter. The subject can just barely see the outline of the substance he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Plant Vision 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Plant Vision to the Advantage enhancement [+5]. *Note:* Each level of "Plant Vision" is Penetrating Vision 1 (Magical, -10%; Specific, Living Vegetation, -60%) [3].

Plant Zombie

Keywords: None.

Full Cost: 18 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite, see text.

The caster touches a dead plant and animates it as a bizarre form of undead. The target must be a relatively complete dead plant. Use the skeleton template on p. 152 of *GURPS Magic* and apply the Body of Wood meta-trait on p. 165 of *GURPS Magic*. Treat the "original body" as having ST 10+(2xSM), 10 in DX, IQ, and HT, and no skills. The animated dead plant becomes an undead servant of the caster.

If the undead is destroyed, the summoner must wait a full day to call replacements. Dismissing the undead is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the undead creature's.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Plant Zombie; Built on 50%; Constantly, no roll required; Adjustable, Small Class, Cannot provide information, +50%; Conjured, +100%; Magical, -10%; Minion, +0%; Requires a body, -20%) [18].

Plasma Armor

Keywords: Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is sheathed in plasma that deals 2d(2) burning damage to enemies who touch his body. The subject also sheds light as a torch.

Statistics: Affliction 1 (HT; Advantage, Plasma Armor, +200%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Note:* "Plasma Armor" is Burning Attack 2d (Armor Divisor, (2), +50%; Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%) [19] + Illumination (Magical, -10%) [1].

Plasma Ball

Keywords: Missile, Obvious.

Full Cost: 9 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of plasma at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d(2) burning damage per level of this spell. The attack produces an explosion at the point of impact (on a miss, check for scatter; see p. B414). The target takes damage normally; anything nearby receives "collateral damage" equal to basic damage divided by (3 x distance in yards from the blast). The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own plasma ball!

Statistics: Burning Attack 1d (Armor Divisor, (2), +50%; Explosion 1, +50%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [9/level].

Plasma Jet

Keywords: Jet, Obvious.

Full Cost: 20.5 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of plasma erupts from your hand, much like the long tongue of a plasma flamethrower. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does 2d(2) burning damage per level of this spell. The GM must determine what the maximum level available in the campaign is.

The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the plasma stream is not interrupted and the caster may continue to attack with it normally.

Statistics: Burning Attack 2d (Armor Divisor, (2), +50%; Destructive Parry, +10%; Increased 1/2D, 2x, +5%; Jet, +0%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Sorcery, -15%) [20.5/level]. *Note:*

Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Plastic Vision

Keywords: Buff.

Full Cost: 17 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the subject see through plastic. Each level of this spell allows the subject to see through up to six inches of plastic. The subject can just barely see the outline of the substance he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Plastic Vision 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Plastic Vision to the Advantage enhancement [+5]. *Note:* Each level of "Plastic Vision" is Penetrating Vision 1 (Magical, -10%; Specific, Plastic, -40%) [5].

Plutomancy

Keywords: Information.

Full Cost: 38 or 88 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Plutomancy is divination through the study of stock market quotes. The diviner must have access to the current market information. Any questions not related to corporate or financial matters are at -8.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (38-point) version of this spell requires 10 minutes to cast! The improved (88-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, Only regarding corporate or financial matters, +20%; Requires access to the current market information, -10%) [38]. The improved version adds Reduced Time 10 (+200%) [+50].

Poison Cloud

Keywords: Area (Leveled).

Full Cost: 14 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill an area with a toxic gas. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect, it then drifts with the wind.

This poison is a contact agent – it ignores DR, unless it is Sealed. Each non-Sealed creature in the area must make an HT-4 roll every second or take 1d toxic damage.

Statistics: Toxic Attack 1d (Area Effect, 2 yards, +50%; Contact Agent, +150%; Drifting, +20%; Fixed Duration, +0%; Persistent, +40%; Resistible, HT-4, -10%; Sorcery, -15%; Variable, Area, +5%) [14]. Further levels add more Area Effect (+50%) to the advantage [+2].

Poison Food

Keywords: Buff.

Full Cost: 56 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

Introduces a physical poison into food. This poison remains indefinitely, but can be detected by Test Food. Anyone eating the poisoned food must make a HT roll. On a failed roll, he is seized by painful stomach cramps, taking 1d toxic damage; he is at -3 to DX and IQ for 1 hour.

Statistics: Affliction 1 (HT; Accessibility, Can only be cast into food, -30%; Advantage, Poison Food, +320%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [56]. *Note:* "Poison Food" is Affliction 1 (HT; Aura, +80%; Attribute Penalty, DX-3, IQ-3, +60%; Blood Agent, -40%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Link, +10%; Melee Attack, Reach C, -30%; No Signature, +20%) [28] + Toxic Attack 1d (Aura, +80%; Blood Agent, -40%; Link, +10%; Melee Attack, Reach C, -30%; Resistible, HT, -25%) [4].

Poison Jet

Keywords: Jet, Obvious.

Full Cost: 4 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of contact poison erupts from your hand, much like the long tongue of a flamethrower. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does toxic damage with dice equal to your level of this spell, if it hits bare skin – any DR stops it. In addition, this damage can be resisted by a successful HT-2 roll. The spell has 1/2D 5. The GM must determine what the maximum level available in the campaign is.

This jet lasts until the beginning of your next turn, allowing you to parry incoming attacks with it. If a parry is successful, your jet automatically damages the incoming weapon (although, the vast majority of weapons are immune to toxic damage) or limb, much like a force sword. Though this spell cannot be maintained, if you cast it every turn, it never "flickers out" and you can continue to attack with it normally.

Statistics: Toxic Attack (Contact Agent, -30%; Destructive Parry, +10%; Jet, +0%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Resistible, HT-2, -20%; Sorcery, -15%) [4/level]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Poison Thorns

Keywords: Buff.

Full Cost: 16 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject plant gains poisonous thorns. This is defensive weaponry, intended to discourage attackers; the subject cannot use his thorns actively. However, he gets a DX-4 roll to hit each foe in close combat with him once per turn, as a free action. Roll at +2 against foes who attacked the subject from behind. Those who grapple or slam the subject are hit immediately and automatically – and those who slam the subject take maximum damage! The thorns have Reach C and do 1d-2 impaling damage with a follow-up poison with a 10-second delay and a HT roll to resist. The poison inflicts 1d-1 toxic damage at 30-second intervals for four cycles.

Statistics: Affliction 1 (HT; Accessibility, Only on plants, -40%; Advantage, Poison Thorns, +40%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [16]. *Note:* "Poison Thorns" is Short Spines (Magical, -10%) [1] + Toxic Attack 1d-1 (Cyclic, 30-seconds intervals, 4 cycles, Resistible with HT, +60%; Follow-Up, Spines, -50%; Magical, -10%; Onset, 10 seconds, -10%) [3].

Poison Touch

Keywords: Obvious.

Full Cost: 0.8 points/level.

Casting Roll: None. Use unarmed combat skill or DX to hit.

Range: Touch.

Duration: Instantaneous.

This spell charges the caster's hand with a contact poison. The caster must touch the bare skin of the subject to trigger this spell – any DR stops it. The touch deals 1d toxic damage per level of this spell.

Statistics: Toxic Attack 1d (Contact Agent, -30%; Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%) [0.8/level].

Poisoning

Keywords: Resisted (HT).

Full Cost: 56 points for level 1 + 40 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Depends on the poison.

The caster poisons the victim with a dose of poison from the container he's holding. The spell does not provide the poison, and the poison used works normally. The spell uses up a dose of poison. The combined value of appropriate enhancements and limitations (such as Cyclic, Side Effects and Symptoms) should not be more than 50% per level of the spell, and the damage should not be more than 2d. Since this spell poisons the victim directly, omit penetration modifiers, such as Contact Agent, Blood Agent, and Respiratory Agent.

Statistics: Toxic Attack 2d (HT; Accessibility, Only the held poison, -50%; Variable Enhancements, +500%; Malediction 2, +150%; No Signature, +20%; Requires Poison, -10%; Sorcery, -15%; Variable, +5%) [56]. Each additional level increases the Variable Enhancements by 500%.

Polar Ray

Keywords: Missile, Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a white ray of cold at a single target. Use Innate Attack (Beam) to hit, applying normal range penalties. It does burning damage with dice equal to your level of this spell. This damage cannot set anything on fire, as it originates from extreme cold, not heat. Targets injured by this spell must make an HT roll, at -1 per 2 points of injury, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own polar ray!

Statistics: Burning Attack (No Incendiary Effect, -10%; Nuisance Effect, Dangerous to be parried, -5%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [8/level].

Pollen Cloud

Keywords: Area (Leveled).

Full Cost: 32 points for level 1 + 6 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with pollen. This gives -1 to all vision rolls made through it. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every creature that inhales the cloud, begins to cough (is at -3 to DX and -1 to IQ, and cannot use Stealth) for 3 minutes, if it fails a HT roll.

The basic (32-point) version of this spell covers a two-yard radius. For each additional 6 points, you may double this radius; e.g., four yards for 38 points, 8 yards for 46 points, or 16 yards for 52 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 1 (Drifting, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [4] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Coughing, +20%; Drifting, +20%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Respiratory Agent, +50%; Sorcery, -15%; Variable, Area, +5%) [28]. Further levels add Area Effect (+50%) to both advantages [+6].

Poltergeist

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can pick up and throw objects without touching them. You lift and throw distant objects just as if you were grasping them in a pair of hands with ST equal to your (2*Poltergeist level). Regardless of level, for picking objects up your maximum range is 10 yards. You cannot move objects after you pick them up, your only options are to throw the object, keep holding it, or release your grasp.

Poltergeist requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Poltergeist may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pick up an object or an Attack maneuver to throw it. This works just as if you were throwing the object with ST equal to (2*your Poltergeist) level. Roll against Throwing or Thrown Weapon skill to hit, modified by Talent, depending on the object being hurled. For 1/2D and Max purposes, measure range from the object (not yourself!) to the target; for the purpose of range penalties, use the *sum* of the distance from you to the object and from the object to the target. Once you throw something, you have “released” your telekinetic grip – your Poltergeist must take a Ready maneuver to pick it up again.

No rolls are necessary for picking objects up. In situations where you would roll against ST, roll against (2*your Poltergeist level) instead.

Statistics: Telekinesis 2 (Only to pick up and throw, -35%; Sorcery, -15%) [5]. Each additional level adds Telekinesis 2 (Only to pick up and throw, -35%; Sorcery, -15%) [+5].

Polymorph

Keywords: None.

Full Cost: 65 points or more; see text.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster can assume different forms, as if using the Morph advantage (p. B84). The transformation takes 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely *omit* racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. Such changes raise the cost of animal templates, which are cheap due to limited mental capabilities. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any race he can turn into.

The caster can only assume forms with the same number of limbs, body layout, posture, etc. as his native form. This would limit a human Morph to humanoids (e.g., elves and giants), a wolf Morph to horizontal quadrupeds, and a bird Morph to other birds.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his “slots” are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a “slot”.

If the caster can assume any racial template worth no more than his native one, Polymorph costs 65 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 65 points. For instance, a human who can take on any racial template worth up to 75 points would pay 140 points for Polymorph.

Statistics: Morph (Retains Shape, -20%; Sorcery, -15%) [65].

Portal

Keywords: Area (Leveled).

Full Cost: 190 points for level 1 + 50 points/additional level.

Casting Roll: IQ; Special casting time and FP cost.

Range: Touch.

Duration: 1d+2 minutes.

This spell is a limited version of the Create Gate spell. For this spell to work, two identical portal arches must be built. The caster must touch one of the arches and successfully cast this spell to create a portal that leads to the corresponding arch. He does not have to visit the destination point beforehand, so he does not suffer any removal penalties on the casting roll. At level 1, the caster can only open portals with arches no more than 2 yards in radius. Each additional level doubles the maximum radius.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10

1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, the gate appears leading to your target destination. On a failure, the gate does not appear and you “strain” the portal: any attempts to open it are at -5 in the next 10 minutes. On a critical failure, the portal cannot be opened for 24 hours.

Statistics: Warp (Anchored, Single Fixed Site, -80%; Cosmic, Do not have to visit the other side and no removal penalties, +50%; Extended Duration, 30x, +60%; Extra Carrying Capacity, Extra-Heavy, +50%; Requires Concentrate, -15%; Sorcery, -15%; Special Portal, Prebuilt Portal, -60%; Tunnel, Before, +100%) [190]. Each additional level adds Area Effect (+50%) [+50].

Portal Architecture

Keywords: None.

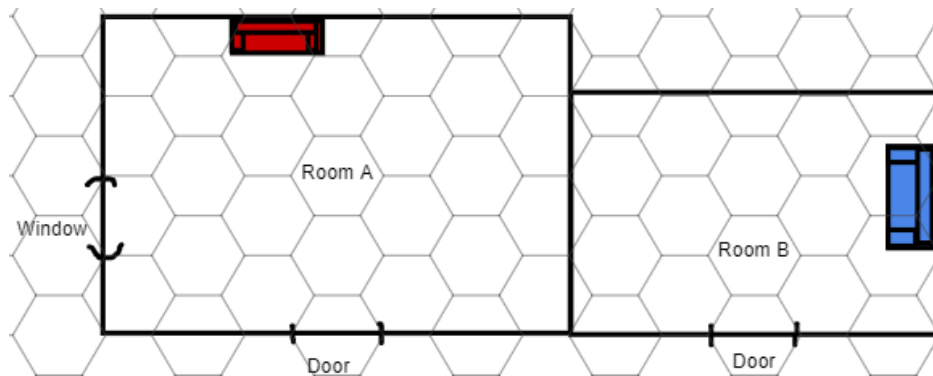

Full Cost: 75 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Permanent.

You can realign space in such way, that two rooms could occupy the same space, but could be accessed via different portals. The larger of two rooms must have an initial radius (in yards) no greater than your level of this spell. Both rooms must have boundaries from all sides – walls, ceiling, and floor. One of the rooms must have only one access portal – a door, a window, etc. When “stacking” rooms, you must designate a portal that must be identical for both rooms. This will be the access portal for the room with a single access point. The merging process is not instant – it requires (distance between the identical portals in yards)/spell level seconds of active concentration, but the effect does not take place, until the process is complete. The room that had only one access points disappears, leaving empty space in its place. The access portal disappears from the multiple-exit room. If both rooms were part of a building, this could deal serious damage!

Example: The caster has Portal Architecture 3 and decides to “stack” two rooms in space. Spell level 3 is enough to cover the larger of the rooms (Room A). The caster decides that the door will be the access point for Room B, because Room B has no other doors and windows, and both rooms have doors. He casts the spell and concentrates for 2 seconds (distance between the doors is 6 yards). Room B disappears. Now, if the caster walks through the door, he would find himself in Room B with the blue couch. If he does not like the color, he could climb through the window to Room A. He would not see the door in that room, because it became a part of Room B.

Statistics: Control Space (Accessibility, Only to “stack” rooms, -65%; Extended Duration on Persistent, Permanent, +150%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [75/level].

Portrait

Keywords: None.

Full Cost: 2 points/level.

Casting Roll: IQ or Artist (Portrait Spell).

Range: Touch.

Duration: Instantaneous.

With this spell the caster is able to transfer an exact image, including colors, of a specific scene into a sphere of crystal or glass. The glass sphere must weigh no more than 10 x (level squared) lbs. The caster may substitute an Artist (Portrait Spell) roll for the casting roll. This is a new Artist skill specialty that defaults to Artist (Illusion)-2. The maximum size of the captured area depends on the margin of success. Look up the margin of success in the Size column on the *Size and Speed/Range Table* (p. B550) and use the corresponding Linear Measurement value as the area’s radius.

Statistics: Control Glass (Accessibility, Only to capture scenes into crystal spheres, -80%; Sorcery, -15%) [2/level].

Possession

Keywords: Resisted (Will).

Full Cost: 30 points.

Casting Roll: IQ.

Range: Touch.

Duration: 1 minute.

The caster moves his consciousness to another body. Should his current body die, he will die! Thus, he must keep his current host alive.

To possess a creature, the caster must concentrate for one second and physically touch him. The victim resists at +5 if he is in combat with the caster or otherwise wary of him.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that subject again – he is “immune” to him. If the caster wins, he takes over his victim’s body, completely suppressing his personality. His previous host regains control of his body (if sentient) after 1d seconds of mental stun, and “comes to” with no memory of the possession.

The caster gains his new host’s ST, DX, and HT (and secondary characteristics calculated from these scores), as well as his physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster’s social traits may apply, depending on the laws and

values of his society. The caster's IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

The caster can freely access the memories of a sentient host at any time. To recall a specific fact from the subject's memories requires a straight IQ roll, at no penalty for the time since takeover.

Statistics: Possession (Full Memory Access, +10%; Maximum Duration, 1 minute, -65%; Sorcery, -15%) [30].

Power Word: Blind

Keywords: Resisted (Will).

Full Cost: 28 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to become blind (see Blindness, p. B124), whether the creature can hear the word or not.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [28]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Deafen

Keywords: Resisted (Will).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to become deaf (see Deafness, p. B129), whether the creature can hear the word or not.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Deafness, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [25]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Disable

Keywords: Resisted (Will).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 seconds.

You utter a single word of power that instantly causes one sapient creature of your choice to become dazed (p. B428), whether the creature can hear the word or not. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Daze, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [27]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Distract

Keywords: Resisted (Will).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.
Duration: 3 seconds.

You utter a single word of power that instantly causes one sapient creature of your choice to hallucinate (p. B428), whether the creature can hear the word or not. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Hallucinating, +50%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [27]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Fatigue

Keywords: Resisted (Will).
Full Cost: 27 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

You utter a single word of power that instantly causes one creature of your choice to take 1d fatigue damage, whether the creature can hear the word or not.

Statistics: Fatigue Attack 1d (Will; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Requires Magic Words, -10%; Sorcery, -15%) [27]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Kill

Keywords: Resisted (Will).
Full Cost: 57 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

You utter a single word of power that instantly causes one creature of your choice to have a heart attack, whether the creature can hear the word or not.

Statistics: Affliction 1 (Will; Based on Will, +20%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Requires Magic Words, -10%; Sorcery, -15%) [57]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Maladroit

Keywords: Resisted (Will).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to take a -5 penalty to DX, whether the creature can hear the word or not. Lower all skills based on DX by a like amount. Secondary characteristics are not affected.

Statistics: Affliction 1 (Will; Attribute Penalty, -5 to DX, +50%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [28]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Nauseate

Keywords: Resisted (Will).

Full Cost: 26 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to become nauseated (B428), whether the creature can hear the word or not.

Statistics: Affliction 1 (Will; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; Nauseated, +30%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [26]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Pain

Keywords: Resisted (Will).
Full Cost: 27 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to experience severe pain (p. B428), whether the creature can hear the word or not.

Statistics: Affliction 1 (Will; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Severe Pain, +40%; Sorcery, -15%) [27]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Petrify

Keywords: Resisted (Will).
Full Cost: 43 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to turn into stone along with anything he is carrying, whether the creature can hear the word or not. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53).

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Paralysis, Variant, +150%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [43]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Sicken

Keywords: Resisted (Will).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to retch (p. B428), whether the creature can hear the word or not. After that the subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Retching, +50%; Requires Magic Words, -10%; Sorcery,

-15%) [28]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Stun

Keywords: Resisted (Will).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You utter a single word of power that instantly causes one creature of your choice to become stunned, whether the creature can hear the word or not. The target is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Requires Magic Words, -10%; Sorcery, -15%) [26]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Power Word: Weaken

Keywords: Resisted (Will).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 seconds.

You utter a single word of power that instantly causes one creature of your choice to take a -5 penalty to ST, whether the creature can hear the word or not. Lower all skills based on ST by a like amount. ST penalties also reduce BL and damage. Secondary characteristics are not otherwise affected.

Statistics: Affliction 1 (Will; Attribute Penalty, -5 to ST, +25%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/60, -35%; Requires Magic Words, -10%; Sorcery, -15%) [26]. *Note:* The Requires Magic Words limitation prevents the sorcerer from using the Alternative Rituals rule.

Predict Earth Movement

Keywords: Information.

Full Cost: 13 or 25 points.

Casting Roll: IQ. Special casting time (see below).

Range: Local or Unlimited.

Duration: Instantaneous.

This spell forecasts any landslides, earthquakes, or volcanic activity accurately for a given area over time. Successful casting tells the sorcerer what the earth movement will be like for the next day, plus a further day for every two full points of success. The GM should sum up each day with a few words: "Tomorrow will be calm; Tuesday, a weak earthquake; Wednesday, a massive volcanic eruption."

Alternatively, the caster can ask for an hourly forecast, in which case use the rules above but read "day" as "hour." This provides far more detailed information, but at the cost of a much shorter timespan.

Unlike most spells, Predict Earth Movement takes 10 minutes to cast. The basic (13-point) version only allows the caster to ask about the local earth movement. The improved (25-point) version lets him predict the earth movement anywhere; apply long-distance modifiers (p. B241).

Statistics: Precognition (Active Only, -60%; One Event, Earth Movement, -40%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Magical, -10%) [13]. The improved version adds "Cosmic, Can divine distant subjects" (+50%) [+12].

Predict Eclipse

Keywords: Information.
Full Cost: 25 or 37 points.
Casting Roll: IQ. Special casting time (see below).
Range: Local or Unlimited.
Duration: Instantaneous.

This spell forecasts any solar or lunar eclipses (full or partial) accurately for a given area over time. Successful casting tells the sorcerer what the eclipse will be like for the next month, plus a further month for every point of success.

Unlike most spells, Predict Eclipse takes 10 minutes to cast. The basic (25-point) version only allows the caster to ask about eclipses in the local area. The improved (37-point) version lets him predict eclipses anywhere; apply long-distance modifiers (p. B241).

Statistics: Precognition (Active Only, -60%; Long-Range 1 on Time, +50%; One Event, Eclipse, -40%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Magical, -10%) [25]. The improved version adds "Cosmic, Can divine distant subjects" (+50%) [+12].

Prehistory

Keywords: Information.
Full Cost: 17 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

When cast on any inanimate object (or a 1-yard-radius section of a large object), Prehistory lets the caster get a very general impression of an item's history over a period of millennia.

To cast Prehistory, you must touch the subject item or location, concentrate for one second, and make an IQ roll. This roll is at no penalty for an event that occurred 3,000 years ago, -1 for one that occurred up to 30,000 years ago, -2 if up to 300,000 years ago, -3 if up to 3,000,000 years ago, and so on.

On a success, you receive the very general impression of an item's history. The age and function of an item can always be determined, but unless the item took part in an important event, age and function may be the only information available. On a failure, you receive no impressions at all, and cannot attempt to read that object or place again for 24 hours.

Statistics: Psychometry (Accessibility, Only a very general impression, -40%; Active Only, -20%; Reliable 6, +30%; Sensitive, +30%; Sorcery, -15%) [17].

Prepare Game

Keywords: None.
Full Cost: 12 points.
Casting Roll: DX or Professional Skill (Butcher).
Range: 10 yards.
Duration: Instantaneous.

"Dresses out" a slain animal. If cast on a deer, for instance, the hide is removed, along with all extraneous body parts and innards. If cast on a fish, it is gutted and scaled. Nothing is destroyed by the spell; all of the parts are simply appropriately separated and cleaned in such a way as to best prepare the animal for cooking.

Statistics: Telekinesis 1 (One Task, Prepare Game, -60%; Reduced Time 10, +200%; Sorcery, -15%) [12]. *Notes:* See *GURPS Thaumatology: Sorcery*, p. 14 for the One Task limitation. Here, Reduced Time is used to shorten a 10-minute process to one second, which was chosen because it costs the same as an Average technique to buy off the -10 for "instant use."

Presence

Keywords: Resisted (Will).

Full Cost: 51 points for level 1 + 19 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

It becomes hard for the subject to blend in. The subject's face is easy to pick out or remember. They get -5 per level of the spell to Shadowing in crowds, while others have +5 per level of the spell to rolls made to recognize them from a lineup or mug shots – or even to recall meeting them!

Statistics: Affliction 1 (Will; Advantage, Presence, +190%; Based on Will, +20%; Extended Duration, 10x, +40%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [51]. Additional levels add more Presence to the Advantage enhancement (+190%) [+19]. *Note:* Each level of "Presence" is Obscure 5 (Memory; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Reversed, -0%; Stealthy, +100%) [19].

Preservation

Keywords: Buff.
Full Cost: 70 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

This spell strengthens the soul's connection to the body. First, the subject becomes immune to death curses. This includes death spells, direct-damage Necromantic magic (Burning Death, Rotting Death, etc.), and elixirs of Death (*GURPS Magic*, p. 215), plus non-magical equivalents such as Afflictions enhanced with Coma or Heart Attack, whether they're chi, divine, psionic, or spirit abilities, or something similar. Second, injury affects the subject normally, but they need never make a HT roll to stay alive. They can survive (and even function, if they remain conscious) down to -10xHP, at which point they body is physically destroyed and they die.

Statistics: Affliction 1 (HT; Advantage, Preservation, +540%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [70]. *Note:* "Preservation" is Immunity to Death Curses (Magical, -10%) [9] + Unkillable 1 (Magical, -10%) [45].

Preserve Food

Keywords: Area (Leveled).
Full Cost: 45 points for level 1 + 5 points/additional level.
Casting Roll: Will.
Range: 100 yards.
Duration: Two months.

All food in the area ceases to spoil, decay, or otherwise become unusable. If the food is stored within a sealed container, the sorcerer's casting roll is penalized by its DR as well as the normal range penalties.

To convert area of effect (in yards) to cubic yards, square the radius and multiply the result by 12.5. To convert to gallons, square the radius and multiply the result by 2,500 for liquids or 2,150 for powders.

Statistics: Affliction 1 (HT; Accessibility, Only on food, -40%; Advantage, Unaging, Variant, +150%; Area Effect, 2 yards, +50%; Extended Duration, 30,000x, +180%; Fixed Duration, +0%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [45]. Additional levels add Area Effect (+50%) [+5]. *Note:* The DR subtracting from the casting roll rather than forcing a resistance roll (as for Buff spells) is a special effect.

Primal Regression

Keywords: Resisted (Will).
Full Cost: 41 points.

Casting Roll: Will.
Range: Unlimited.
Duration: 1 day.

A sapient subject gains the Stress Atavism (p. B156) disadvantage of a degree of severity chosen by the caster.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Stress Atavism (Severe), +20%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable, +5%) [41].

Prismatic Ball

Keywords: Missile, Obvious.
Full Cost: 14.4 points/level.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You throw an iridescent ball of prismatic light at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. Roll 1d to determine the damage type. It deals damage with dice equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

1d	Damage
1	Acid. This attack deals corrosion damage.
2	Cold. This attack deals non-incendiary burning damage.
3	Electricity. This attack deals burning surge damage. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover.
4	Fire. This attack deals burning damage.
5	Poison. This attack deals toxic damage.
6	Sound. This attack deals non-incendiary burning damage. Targets stuck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover. This attack only works in sound-transmitting mediums and is negated by such effects as Silence or Wall of Silence.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own prismatic ball!

Statistics: [Prismatic Attack](#) (Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [14.4/level].

Prismatic Blast

Keywords: Area (Fixed), Missile, Obvious.
Full Cost: 32.4 points/level.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You throw an iridescent ball of prismatic light at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes dice of damage equal to your level of this spell. Roll 1d to determine the damage type. The GM must determine what the maximum level available in the campaign is.

1d	Damage
1	Acid. This attack deals corrosion damage.

2	Cold. This attack deals non-incendiary burning damage.
3	Electricity. This attack deals burning surge damage. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover.
4	Fire. This attack deals burning damage.
5	Poison. This attack deals toxic damage.
6	Sound. This attack deals non-incendiary burning damage. Targets stuck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover. This attack only works in sound-transmitting mediums and is negated by such effects as Silence or Wall of Silence.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own prismatic ball!

Statistics: [Prismatic Attack](#) (Area Effect, 4 yards, +100%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [32.4/level].

Prismatic Jet

Keywords: Jet, Obvious.

Full Cost: 27 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of prismatic light erupts from your hand, much like the long tongue of a flamethrower. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does damage with dice equal to your level of this spell. Roll 1d to determine the damage type. The spell has 1/2D 5. The GM must determine what the maximum level available in the campaign is.

1d	Damage
1	Acid. This attack deals corrosion damage.
2	Cold. This attack deals non-incendiary burning damage.
3	Electricity. This attack deals burning surge damage. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover.
4	Fire. This attack deals burning damage.
5	Poison. This attack deals toxic damage.
6	Sound. This attack deals non-incendiary burning damage. Targets stuck by this attack must make an HT roll, at -1 per 2 points of injury, or be physically stunned. On subsequent turns, they can roll HT to recover. This attack only works in sound-transmitting mediums and is negated by such effects as Silence or Wall of Silence.

This jet lasts until the beginning of your next turn, allowing you to parry incoming attacks with it. If a parry is successful, your jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if you cast it every turn, it never "flickers out" and you can continue to attack with it normally.

Statistics: [Prismatic Attack](#) (Destructive Parry, +10%; Jet, +0%; Melee-Capable, Reach 1, +15%; Reflexive, +40%; Sorcery, -15%) [27/level]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Prismatic Spray

Keywords: Obvious.

Full Cost: 453 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 10 yards.
Duration: Instantaneous or other.

You create a spray of flashing colors. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 6 yards at the spell's maximum range. This spell has no 1/2D range. Each sighted creature in the area resists with its HT, and is stunned on a failed resistance roll. Should a creature fail by 5 or more or roll a critical failure, it is additionally blinded for 5 seconds. Creatures with Protected Vision resist at +5.

Every creature in the area is randomly struck by one or more beams, which have additional effects.

1d, 1d	Color
1-3, 1-2	Red
1-3, 3-4	Orange
1-3, 5-6	Yellow
4-5, 1-2	Green
4-5, 3-4	Blue
4-5, 5-6	Indigo
6, 1-4	Violet
6, 5-6	Struck by two beams. Roll twice more and ignore any other "struck by two beams" results.

Red: The subject takes 4d burning damage.

Orange: The subject takes 2d corrosion damage from acid.

Yellow: The subject takes 4d burning surge damage. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Green: The subject takes 5d toxic damage. Sealed protects against this effect, as this is a Contact Poison.

Blue: The subject is turned into stone! If he fails to resist with HT, his body and anything he is carrying become stone. This cannot be undone via Dispel Magic (*GURPS Thaumatology - Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology - Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53).

Indigo: The subject becomes permanently hallucinating (p. B428), if he fails to resist with Will. This cannot be undone via Dispel Magic (*GURPS Thaumatology - Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology - Sorcery*, p. 21).

Violet: The subject that fails to resist with Will, is sent with his gear up to his Extra-Heavy encumbrance to one other random plane of existence.

Statistics: Affliction 1 (HT; Cone 6, +110%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; Link, +10%; Magical, -10%; Reduced Duration on Blindness, 1/30, -30%; Reduced Range, 1/10, -30%; Secondary Blindness, +10%; Vision-Based, +150%) [33].

Red: Burning Attack 4d (Accessibility, Random effect, -30%; Cone 6, +110%; Increased 1/2D, x10, +15%; Link, +10%; Magical, -10%; Reduced Range, 1/10, -30%) [33].

Orange: Corrosion Attack 2d (Accessibility, Random effect, -30%; Cone 6, +110%; Increased 1/2D, x10, +15%; Link, +10%; Magical, -10%; Reduced Range, 1/10, -30%) [33].

Yellow: Burning Attack 4d (Accessibility, Random effect, -30%; Cone 6, +110%; Increased 1/2D, x10, +15%; Link, +10%; Magical, -10%; Reduced Range, 1/10, -30%; Side Effect, Stunning, +50%; Surge, Arcing, +100%) [63].

Green: Toxic Attack 5d (Accessibility, Random effect, -30%; Cone 6, +110%; Contact Agent, +150%; Increased 1/2D, x10, +15%; Link, +10%; Magical, -10%; Reduced Range, 1/10, -30%) [63].

Blue: Affliction 1 (HT; Accessibility, Random effect, -30%; Cone 6, +110%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Increased 1/2D, x10, +15%; Link, +10%; Magical, -10%; Malediction 2, +150%; Paralysis, Variant, +150%; Reduced Range, 1/10, -30%) [67].

Indigo: Affliction 1 (Will; Accessibility, Random effect, -30%; Based on Will, +20%; Cone 6, +110%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Hallucinating, +50%; Increased 1/2D, x10, +15%; Link, +10%; Magical, -10%; Malediction 2, +150%; Reduced Range, 1/10, -30%) [59].

Violet: Affliction 1 (Will; Accessibility, Random effect, -30%; Based on Will, +20%; Cone 6, +110%; Heart Attack, Variant, +300%; Increased 1/2D, x10, +15%; Link, +10%; Malediction 2, +150%; Reduced Range, 1/10, -30%; Sorcery, -15%) [69].

Prismatic Wall

Keywords: Obvious.

Full Cost: 1,890 points for level 1 + 192.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a vertical, opaque wall—a shimmering, multicolored plane of light that protects you from all forms of attack. The wall flashes with seven colors, each of which has a distinct power and purpose. You do not have to concentrate to maintain it, Prismatic Wall is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall dissipates once the duration runs out.

To find the maximum square yardage available, look up the level of this spell on the Levelled Area Table (*GURPS Thaumatology - Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Prismatic Wall 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Prismatic Wall 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

The wall can be destroyed, color by color, in consecutive order, by various magical effects; however, the first color must be brought down before the second can be affected, and so on. The following list shows the seven colors of the wall, the order in which they appear, their effects on creatures trying to attack you or pass through the wall, and the magic needed to negate each color:

Red: This wall provides DR 12 against non-magical projectiles. Anything crossing the red wall takes 4d burning damage. The wall is destroyed when it takes 20 points of cold damage (such as from the Cone of Cold spell).

Orange: This wall provides DR 12 against magical projectiles. Anything crossing the orange wall takes 2d corrosion damage from acid. The wall is destroyed when subjected to strong wind (a 4d Air Jet would suffice).

Yellow: This wall provides stops poison, gases, and pertification. Anything crossing the yellow wall takes 4d burning surge damage. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. The wall is destroyed when subjected to the Disintegrate spell.

Green: This wall provides DR 12 against breath attacks. Anything crossing the green wall takes 5d toxic damage from contact poison. The wall is destroyed when subjected to the Create Door spell.

Blue: The area behind blue wall is nearly impossible to detect, see, or divine with any Information spells, regardless of the magic system used to cast them. The blue wall reduces the diviner's effective margin of success by 10 for these purposes – so a spell that succeeded by 0-9 completely fails to divine the area, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it's resisted. The wall negates all mental attacks used through it. Any living creature passing through the wall turns into stone! If he fails to resist with HT, his body and anything he is carrying become stone. This cannot be undone via Dispel Magic (*GURPS Thaumatology - Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology - Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53). The wall is destroyed when subjected to the Magic Missile spell.

Indigo: The wall negates all spells cast through it. Any living creature passing through the wall becomes permanently hallucinating (p. B428), if he fails to resist with Will. This cannot be undone via

Dispel Magic (*GURPS Thaumatology - Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology - Sorcery*, p. 21). The wall is destroyed when subjected to the Mage Light spell.

Violet: Any unattended object crossing the violet wall takes 10d corrosion damage from disintegration. Any passing living creature that fails to resist with Will, is sent with his gear up to his Extra-Heavy encumbrance to one other random plane of existence. Unlike other walls, the violet wall *can* be dispelled with Dispel Magic (but not Remove Curse), but only when all other walls are destroyed.

Statistics:

Red: Burning Attack 4d (Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Persistent, +40%; Terminal Condition, Takes 20 cold damage, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [91] + Crushing Attack 4d (Accessibility, Only non-magical projectiles, -40%; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Cosmic, Only damaged by cold, has extra HP, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; No Wounding, -50%; Persistent, +40%; Terminal Condition, Takes 20 cold damage, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [83].

Orange: Corrosion Attack 2d (Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Persistent, +40%; Terminal Condition, Strong Wind, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [91] + Crushing Attack 4d (Accessibility, Only magical projectiles, -40%; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; No Wounding, -50%; Persistent, +40%; Terminal Condition, Strong Wind, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [73].

Yellow: Burning Attack 4d (Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Persistent, +40%; Side Effect, Stunning, +50%; Surge, Arcing, +100%; Terminal Condition, Disintegration, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [121] + Immunity to Poison (Affects Others, +50%; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Force Field, +20%; Link, +10%; Magical, -10%; Persistent, +40%; Terminal Condition, Disintegration, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [79] + Sealed (Affects Others, +50%; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Force Field, +20%; Link, +10%; Magical, -10%; Persistent, +40%; Terminal Condition, Disintegration, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [79] + Immunity to Petrification (Affects Others, +50%; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Force Field, +20%; Link, +10%; Magical, -10%; Persistent, +40%; Terminal Condition, Disintegration, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [27].

Green: Toxic Attack 5d (Area Effect, 2 yards, +50%; Contact Agent, +150%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Persistent, +40%; Terminal Condition, Create Door, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [121] + Crushing Attack 4d (Accessibility, Only breath weapons, -40%; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; No Wounding, -50%; Persistent, +40%; Terminal Condition, Create Door, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [73].

Blue: Obscure 10 (Information Spells; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Defensive, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Ranged, +50%; Stealthy, +100%; Terminal Condition, Magic Missile, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [123] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Remove Curse on the effect, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended

Duration, 30x, +60%; Extended Duration, Permanent, on the Paralysis, +150%; Link, +10%; Magical, -10%; Malediction 1, +100%; Paralysis, Variant, +150%; Persistent, +40%; Terminal Condition, Magic Missile, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [91] + Static (Mental Attacks; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Only around the border of the area, -0%; Ranged, +40%; Terminal Condition, Magic Missile, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [137].

Indigo: Affliction 1 (HT; Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Remove Curse on the effect, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Extended Duration, Permanent, on the Hallucinating, +150%; Hallucinating, +50%; Link, +10%; Magical, -10%; Malediction 1, +100%; Persistent, +40%; Terminal Condition, Mage Light, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [81] + Static (Magic; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Defensive, +50%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; Only around the border of the area, -0%; Ranged, +40%; Terminal Condition, Mage Light, -10%; Variable, Area, +5%; Wall, Shapeable, +60%) [182] + Rules Exemption (Magical abilities can coexist with anti-magic Static) [1].

Violet: Corrosion Attack 10d (Accessibility, Only on objects, -10%; Area Effect, 2 yards, +50%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Link, +10%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [400] + Affliction 1 (Will; Area Effect, 2 yards, +50%; Based on Will, +20%; Cosmic, Immune to Remove Curse, +50%; Cosmic, Immune to Antimagic Field, +50%; Extended Duration, 30x, +60%; Heart Attack, Variant, +300%; Link, +10%; Magical, -10%; Malediction 1, +100%; Persistent, +40%; Variable, Area, +5%; Wall, Shapeable, +60%) [82].

* Calculate the total cost, then round up.

Process Plant

Keywords: None.

Full Cost: 4 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

Cast on a plant material, the material is transformed into a derivative chemical. A handful of tea leaves, for example, can be turned into a pinch of caffeine powder. To cast the spell, the caster touches the plant material he wishes to transform, takes a Concentrate maneuver and makes his casting roll. Success means he transforms it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transformation costs 1 FP per use.

The caster can transform an amount of material weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. The final product typically weighs much less.

The mage must be familiar with the end product and have *some* idea of the process, even if this is no more than 1 point in low-tech Expert Skill (Natural Philosophy). Other appropriate skills: Alchemy, Biology (Botany), Chemistry, and Pharmacy. Without this minimal amount of skill, a critical success on the spell roll (the equivalent of a magical miracle) is required to produce the drug.

Statistics: Create (Accessibility, Only to transform into derivative chemicals, -10%; Nuisance Effect, Knowledge, -10%; Transmute Wood to Biochemicals, +50%; Transmutation Only, -100%; Magical, -10%) [4/level].

Process Raw Magic

Keywords: None.

Full Cost: 12.5 points/level*.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

This spell allows the caster to shape and move a particular mass of raw magic (be it solid, liquid, or gaseous) (*GURPS Thaumatology*, pp. 227-229). In addition, it allows transforming it into the intangible form and attaching it to a character with the Raw Magic Store advantage (*GURPS Thaumatology*, pp. 228). The caster can affect up to $10 \times (\text{level squared})$ lbs. of solid or liquid raw magic in the form of a single object or amorphous mass or a circular area of gaseous raw magic with a radius equal to the spell's level in yards. This spell cannot affect complex, manufactured items unless they are made almost entirely of raw magic (a very rare occurrence, but the possibility is there).

If the raw magic is already under someone else's direct control, roll a Quick Contest of IQ against IQ if the other person is using Control or Telekinesis, or their skill level if using a spell, and so on. The winner gains control.

The caster can reshape raw magic with a Concentrate maneuver (artistic or functional qualities may require longer time and appropriate skill rolls). Rendering it intangible and attaching it to a creature with the Raw Magic Store advantage also requires just a single Concentrate maneuver. In addition, the caster can cause raw magic to move or flow at a Move equal to the spell's level. This requires constant concentration.

When the caster stops concentrating, they immediately give up control. Stable forms become permanent, while unstable ones collapse.

Statistics: Control Raw Magic (Ranged, +40%; Sorcery, -15%) [$12.5/\text{level}^*$]. *Note:* This spell originally appeared in *GURPS Thaumatology*.

* Calculate the total cost, then round up.

Progeria

Keywords: Resisted (HT).

Full Cost: 29 points for level 1 + 14 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Special.

You curse the living subject with premature aging. When he fails to resist this spell and each day after that for 9 days, he becomes 1 year older. Each additional level of this spell increases the number of cycles by 10. This spell cannot be dispelled by Dispel Magic, but Remove Curse or an equivalent effect removes it.

Statistics: [Ageing Attack 1](#) (Accessibility, Only on living creatures, -10%; Based on HT, +20%; Cosmic, Immune to Dispel Magic, +50%; Cyclic, 1 day, 9 cycles, Curse Removal, +90%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. Each additional level increases the number of cycles by 10 [+14].

Project Limb

Keywords: None.

Full Cost: 83 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

While this spell is active, the caster can project a limb (arm or leg) or an extremity (hand or foot) to a distant location. It isn't truly severed from his body and needn't be cut off – he is reaching through the fourth dimension. His body part can be used to grapple, strike, lift and throw objects, and wield tools and weapons, provided the weight of anything picked up doesn't exceed 2xBL. He can even pull objects back through the fourth dimension! In combat, this lets him attack a foe from behind.

If working at a distance, apply the appropriate range modifier. The caster can place his limbs in locations he can't see, but at -5 to skill rolls for working by touch or -6 to attack rolls.

Statistics: Injury Tolerance (Independent Body Parts; Cosmic, Four-dimensional, +50%; Cosmic, Voluntary, +50%; Instant Reattachment, +50%; Sorcery, -15%) [83].

Projection

Keywords: None.

Full Cost: 90 points.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can displace your consciousness to a point outside your body. This “viewpoint” must be a specific location within 100 yards. Your body falls unconscious. Your projected self is only vulnerable to spells, mental abilities, Maledictions, etc. See *Projection* (*GURPS Powers*, p. 44) for other rules. Your projected self can only affect the insubstantial world.

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, concentrate for one second, and then make an IQ roll. If the viewpoint is out of sight, you must specify distance and direction, the roll is at -5, and you have to concentrate for one minute.

On a success, you can use your ranged senses as if you were physically present at the viewpoint (this means you cannot sense the environment around your body!). Your vision ignores darkness penalties completely. You cannot see through solid objects, but if your viewpoint were inside (for example) a closed room, you would see what was inside despite the lack of light. If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Projection for as long as you like.

On failure by 1, your consciousness goes to some other viewpoint of the GM’s choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

To return your displaced consciousness, move it elsewhere, or change its facing, you must concentrate for one second and make another IQ roll. However, a viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part. You can only have one viewpoint at a time.

The projection’s presence can be detected by Astral Vision, Sense Spirit, Sense Observation, or the like; it is otherwise imperceptible. The Projection cannot cross an Astral Block, Pentagram, or an Utter spell. Repel Spirits will resist its intrusion.

Statistics: Clairsentience (Fixed Range, -5%; Increased Range, 10x, +30%; Projection, +0%; Second Nature, +70%; Sorcery, -15%) [90].

Propel

Keywords: None.

Full Cost: 10 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 1 hour.

This spell allows you to magically power a vehicle using your own energy. To do so, touch the vehicle, take a Concentrate maneuver and roll vs. IQ. Success means the vehicle is successfully powered by you. Failure means nothing happens. Critical failure means the energy creation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

The spell provides 1,000 x (level squared) kJ of useful work (divide by 3,600 to get kWh). To calculate the amount of power (in kWh) required to propel a vehicle, multiply its Lwt (in tons) by the desired Move (up to its Top Speed) and by the free fall acceleration.

Vehicle	Lwt	Move	Required Power	Required Spell Level
Sedan (B464)	1.3 tons	10	$1,3 \times 9.8 \times 10 = 127,4$ kWh (458,640 kJ)	22 (484,000 kJ)
Sedan (B464)	1.3 tons	30	$1,3 \times 9.8 \times 30 = 382,2$ kWh (1,375,920 kJ)	38 (1,444,000 kJ)
Scooter (B464)	0.3 tons	10	$0,3 \times 9.8 \times 10 = 27,6$ kWh (99,360 kJ)	10 (100,000 kJ)
Business Jet	9.2 tons	250	$9.2 \times 9.8 \times 250 = 22,540$ kWh (81,144,000 kJ)	285 (81,225,000 kJ)

(B465)				
--------	--	--	--	--

Statistics: Create Electricity (Accessibility, Only to power vehicles, -60%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [10/level].

Protection from Ageing

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject gains the Unaging (p. B95) advantage for the duration of this spell.

Statistics: Affliction 1 (HT; Advantage, Protection from Ageing, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Protection from Ageing" is Unaging (Magical, -10%) [14].

Protection from (Ethical Category)

Keywords: Buff.

Full Cost: 23 points for level 1 + 11 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is less likely to be affected by spells cast by entities with a specific ethical alignment (chaos, evil, good, law, etc.). Subtract your Protection from (Ethical Category) level from the skill of any being of the specified ethical alignment casting a spell on your subject, and add it to the subject's roll to resist any spell that offers a resistance roll. For instance, if you have Protection from Evil 3, evil wizards have -3 to cast spells on your subject and your subject gets +3 to resist.

Protection from (Ethical Category) only interferes with spells cast directly on the subject. It provides no benefit against Missile spells (which are cast on the wizard's hand and hurled at the subject), attacks by magic weapons, or information-gathering spells that aren't cast directly on the subject. It also has no effect on supernatural powers other than magic; e.g., divine miracles, psionics, or the innate powers of spirits.

Protection from (Ethical Category), and its precise level, can be recognized by any mage who looks at the target's aura, or by any being of the specified ethical alignment who casts a spell on the subject.

The subject, and all of his carried gear, is protected by an invisible field of pure force that repels attacks made by beings of the specified ethical alignment. This increases his DR by twice the level of this spell (e.g., Protection from (Ethical Category) 3 adds DR 6), cumulative with that from actual armor.

Statistics: Affliction 1 (HT; Advantage, Protection from (Ethical Category), +110%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. *Note:* Each level of "Protection from (Ethical Category)" is Magic Resistance 1 (Improved, +150%; Limited, Spells cast by beings of a specific ethical alignment, -40%; Magical, -10%) [4] + Damage Resistance 2 (Force Field, +20%; Limited, Ethical Category, -40%; Magical, -10%) [7].

Protection from Force

Keywords: Buff.

Full Cost: 17 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject, and all of his carried gear, is protected from force-based attacks, such as the Magic Missile spell or the force beams (p. UT128). This increases his DR by twice the level of this spell (e.g.,

Protection from Force 3 adds DR 6), cumulative with that from actual armor. This DR does *not* protect against Malediction-like effects and graviton beams that ignore DR.

Statistics: Affliction 1 (HT; Advantage, Protection from Force 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Protection from Force to the Advantage enhancement [+5]. *Note:* Each level of “Protection from Force” is Damage Resistance 2 (Force Field, +20%; Limited, Force, -60%; Magical, -10%) [5].

Protection from Incarnum

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject he gains a +3 bonus on HT all rolls made to resist incarnum abilities, including soulmeld effects.

Statistics: Affliction 1 (HT; Advantage, Protection from Incarnum, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* “Protection from Incarnum” is Resistant to Incarnum (+3) (Magical, -10%) [9].

Protection from Magic

Keywords: Buff.

Full Cost: 19 points for level 1 + 7 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject, and all of his carried gear, is protected from magical damage, both direct and indirect. This increases his DR by the level of this spell (e.g., Protection from Magic 3 adds DR 3), cumulative with that from actual armor. This DR protects even against Malediction-based attacks.

Statistics: Affliction 1 (HT; Advantage, Protection from Magic 1, +70%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. Additional levels add further Protection from Magic to the Advantage enhancement [+7]. *Note:* Each level of “Protection from Magic” is Damage Resistance 1 (Force Field, +20%; Limited, Magic, -20%; Magical, -10%; Malediction-Proof, +50%) [7].

Protection from Nuclear Explosions

Keywords: Buff.

Full Cost: 151 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell protects the subject and everything he is carrying from nuclear explosions. The subject divides the injury he suffers from nuclear explosions by 1,000 *after* subtracting DR from damage and applying wounding modifiers. This does not prevent damage from knockback or irradiation.

Statistics: Affliction 1 (HT; Advantage, Protection from Nuclear Explosions, +1,350%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [151]. *Note:* “Protection from Nuclear Explosions” is Injury Tolerance (Damage Reduction, Divisor 1,000; Force Field, +20%; Limited, Nuclear Explosions, -80%; Magical, -10%) [135].

Protozoan Control

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ.
Range: Unlimited.
Duration: Special.

You can take control of any single protozoan – or of one square yard of a swarm of smaller protozoa. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only protozoa with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for protozoa with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Protozoa only, -70%; Sorcery, -15%) [10].

Primordial Dissolution

Keywords: Resisted (HT).
Full Cost: 67 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

This spell must be cast on a living monster. If he fails to resist, he transforms into a soup of primordial cells, with a weight equal to the monster's body weight. This soup can be stored and used for Teragenesis (see *Pyramid #3-109*, p. 21).

Statistics: Affliction 1 (HT; Accessibility, Only on monsters, -35%; Cosmic, Ooze can be used for teragenesis, +50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [67].

Psi Resistance

Keywords: Buff.
Full Cost: 21 or 26 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

The subject becomes more resistant to psionics. The basic (21-point) version gives the subject +3 on HT and Will rolls made to resist psionic abilities. The improved (26-point) version improves this bonus to +8.

Statistics: Affliction 1 (HT; Advantage, Psi Resistance, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Notes:* "Psi Resistance" is Resistant to Psionics (+3) (Magical, -10%) [9]. Improved version replaces it with Resistant to Psionics (+8) (Magical, -10%) [14] [+5].

Psi Shield

Keywords: Area (Leveled).
Full Cost: 69 points for level 1 + 15 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Five minutes.

This spell creates a transparent dome that attempts to negate any psionic ability used through it. Psionic abilities can be used within the dome, but no psionic effect can cross the boundary freely. Psi Shield does not affect psionic abilities that create missiles or jets. To penetrate Psi Shield, the psi must win a Quick Contest of Will with the caster of Psi Shield. If the ability already requires a Quick Contest of some kind, then the attacker rolls only once, but the target gets +5 to resist.

Statistics: Static (Psi; Area Effect, 2 yards, +100%; Extended Duration, 30x, +60%; Only around the border of the area, -0%; Ranged, +40%; Resistible, -50%; Sorcery, -15%; Variable, Area, +5%; Visible, -10%) [69]. Additional levels increase Area Effect (+50%) for Static [+15]. *Note:* As a special effect, this forms a hemispherical dome, not a cylinder.

Psifool

Keywords: Buff.

Full Cost: 86 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five hours.

This spell redirects psionic senses targeted at a first subject onto a second subject, the “decoy.” This includes (but is not limited to) seeing the subject with Clairvoyance, finding them with Telescan, feeling them coming with Danger Sense or Precognition, or tracking them with Retrocognition. Both subjects must be present at casting time; add the range penalties, if any. Unwilling subjects resist automatically. If the diviner’s margin of success is 10 or more, then he divines the correct subject.

Statistics: Affliction 1 (HT; Advantage, Psifool, +660%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [86]. *Note:* “Psifool” is Obscure 10 (Clairsentience; Cosmic, Redirects to a decoy, +100%; Defensive, +50%; Extended, Detect, Divination, Para-Radar, +60%; Limited, Psi, -20%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [66].

Psiguard

Keywords: Buff.

Full Cost: 66 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five hours.

The subject is nearly impossible to detect, see, or divine with any psionic senses. This includes (but is not limited to) seeing the subject with Clairvoyance, finding them with Telescan, feeling them coming with Danger Sense or Precognition, or tracking them with Retrocognition. Psiguard reduces the psi’s effective margin of success by 10 for these purposes – so an ability that succeeded by 0-9 completely fails to find the subject, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it’s resisted.

Statistics: Affliction 1 (HT; Advantage, Psiguard, +460%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [66]. *Note:* “Psiguard” is Obscure 10 (Clairsentience; Defensive, +50%; Extended, Detect, Divination, Para-Radar, +60%; Limited, Psi, -20%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [46].

Psiwall

Keywords: Area (Leveled).

Full Cost: 93 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Eight hours.

The area is nearly impossible to detect, see, or divine with any psionic senses. This includes (but is not limited to) seeing the area with Clairvoyance, finding anyone within with Telescan, feeling somebody in the area coming with Danger Sense or Precognition, or tracking them with Retrocognition. Psiwall reduces the diviner's effective margin of success by 10 for these purposes – so an ability that succeeded by 0-9 completely fails to divine the area, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it's resisted.

Statistics: Obscure 10 (Clairsentience; Defensive, +50%; Extended, Detect, Divination, Para-Radar, +60%; Extended Duration, 3,000x, +140%; Limited, Psi, -20%; Ranged, +50%; Sorcery, -15%; Stealthy, +100%) [93]. Additional levels add more Area Effect (+50%) [+10].

Psychic Scream

Keywords: None.

Full Cost: 6 points.

Casting Roll: Will.

Range: Self.

Duration: 10 seconds.

The caster emanates an invisible *psionic* pulse that injures any nearby being that possesses a mind. For as long as the spell endures, all beings with minds within 4 yards – friend or foe, everybody but the caster – suffer 1 HP of toxic injury per second while in the area. This injury bypasses all DR save for that specifically effective against psionic attacks.

Statistics: Toxic Attack 1 point (Accessibility, Only beings with minds, -10%; Area Effect, 4 yards, +100%; Aura, +80%; Cosmic, Irresistible Attack, +300%; Cosmic, Psionic Damage, +50%; Melee Attack, Reach C, -30%; Reduced Duration, 1/6, -15%; Requires Will Roll, -5%; Sorcery, -15%) [6].

Psychic Surgery

Keywords: Resisted (Will).

Full Cost: 13 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to remove disadvantages.

Range: Unlimited.

Duration: Three days.

You can temporarily remove any mundane mental disadvantages in a subject. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head, where you can “see” his mental disadvantages. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject – at -1 for every full -5 points in disadvantages you wish to remove. You may substitute Brainwashing for IQ, if better. A critical success here gives the subject an excuse to buy off his problem, if he has the character points!

Statistics: Mind Control (Accessibility, Only to remove mental disadvantages, -10%; Conditioning Only, -50%; Fixed Duration, +0%; Sorcery, -15%) [13].

Puff

Keywords: Obvious.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: 10 seconds.

This spell creates a thin stream of smoke that persists in the area for the duration, drifting with the wind. It does not block vision or cause any discomfort, but can be used as a signal or a bold refusal when blown into somebody's face.

Statistics: Accessory (Smoking Pipe; Sorcery, -15%) [1].

Puissance

Keywords: Weapon Buff.

Full Cost: 14 points for level 1 + 3 points/additional level. (KYOS: 11.7 points for level 1 + 0.6 point/additional level).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell adds +2 to swing damage and +1 to thrust damage of the weapon or shield (not armor or clothing) per level. The GM should impose a level cap on this spell.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons and shields, -15%; Advantage, Puissance 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [14] (KYOS: 11.7). Additional levels add more Puissance to the Advantage enhancement [+3] (KYOS: +0.6). *Note:* Each level of "Puissance" is Striking ST 2 (Magical, -10%; One Attack, This weapon, -60%) [3]. (KYOS: 0.6).

Pull

Keywords: Area (Leveled).

Full Cost: 52 points for level 1 + 12.5 points/additional level* (or more).

Casting Roll: None. Use DX or an unarmed combat skill to hit.

Range: 100 yards.

Duration: 30 seconds.

You can create a zone of attraction anywhere within 100 yards of you. To place the zone at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. An intangible force moves objects within the area without touching them. The force can move any object it has strength enough to lift, at a Move equal to your Pull ST, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17).

Pull can only move things directly toward its center. It simply causes objects to move until they're in contact with the center of the spell's area, whereupon they're held there with Pull's telekinetic ST until the duration runs out. Objects can only move or be moved in the opposite direction if the mover wins a Quick Contest of his ST or TK level against your Pull ST.

The basic (52-point) version of this spell lets you affect an area up to 2 yards across and has ST 5. Each additional doubling of area adds 12.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +100% to cost (including any increased area), rounded up, the ST can be upgraded to 10 or more. This is summarized in the table below.

Pull ST	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
5	52 points	64 points	77 points	89 points	102 points	114 points	127 points
10	103 points	128 points	153 points	178 points	203 points	228 points	253 points
15	154 points	192 points	229 points	267 points	304 points	342 points	379 points
20	205 points	255 points	315 points	355 points	415 points	465 points	515 points

Statistics: Telekinesis 5 (Area Effect, 2 yards, +50%; Attraction, -60%; Extended Duration on Persistent, 3x, +20%; Increased Range, 10x, +30%; Independent, +40%; Persistent, +40%; Sorcery, -15%) [52]. Additional levels add more Area Effect (+50%) to the advantage [+12.5*].

* Calculate the total cost, then round *down*.

Punishment Circle

Keywords: Area (Fixed).

Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

Creates a 4-yard-radius area that inflicts pain and injury upon magical creatures. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. This spell affects any being that's summoned or could be summoned (e.g., angels, demons, elementals, and other spirits), beings called into existence by magic (creations, illusions, etc.), magically animated constructs, the undead, and creatures with Dependency on mana or Weakness to its absence.

The spell's area is surrounded by a glowing, rune-edged circle. This is obvious to all kinds of vision and to the special senses (Detect, Magery, Scanning Sense, etc.) of magical creatures. This circle must be unbroken – if this area overlaps a no-mana zone, the casting fails automatically.

For as long as the spell endures, magical creatures that remain in the area lose 1 HP per second. This injury is extremely painful – the shock penalty is doubled (to -2 for creatures with no High Pain Threshold or Low Pain Threshold).

Statistics: Crushing Attack 1 point (Accessibility, Only on magical beings, -20%; Area Effect, 4 yards, +100%; Cosmic, Doubled shock penalty, +50%; Cosmic, Irresistible Attack, +300%; Extended Duration, 3x, +20%; No Knockback, -10%; Nuisance Effect, Area cannot overlap a no-mana zone, -5%; Persistent, +40%; Sorcery, -15%) [12]. *Note:* This spell originally appeared in *GURPS Magic: Artillery Spells*.

Purge Spirit

Keywords: Resisted (Will).

Full Cost: 11 points/level.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Purge spirit rips away at the target's spiritual substance, scattering it over a wide area and hampering the target's ability to reform. This spell can only affect insubstantial creatures. The target takes 1d non-incendiary burning damage, ignoring DR. If the caster wishes, he may scale down the damage before casting the spell.

Statistics: Burning Attack 1d (Insubstantial Only, -30%; Malediction 2, +150%; No Incendiary Effect, -10%; No Signature, +20%; Sorcery, -15%; Variable, +5%) [11/level].

Purify Air

Keywords: None.

Full Cost: 8 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell removes all impurities from the air in its area of effect.

To cast the spell, the caster touches the air he wishes to purify, takes a Concentrate maneuver and rolls vs. IQ. Success means he purifies it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Purification costs 1 FP per use.

The caster can purify an area of air up to one yard in radius per level.

Statistics: Create (Accessibility, Only to transform into breathable air, -20%; Transmute Gas to Gas, +50%; Transmutation Only, -100%; Magical, -10%) [8/level].

Purify Earth

Keywords: None.

Full Cost: 4 points/level.

Casting Roll: IQ.
Range: Touch.
Duration: Permanent.

This spell removes foreign objects, poisons, and harmful elements from soil, rendering it fit to support growing plants. This spell also remedies any deficiencies in the soil's composition. Small foreign objects (coins, nails) underground are destroyed; medium ones (swords, artillery shells, chests, statuettes) "float" to the surface. Large objects (coffins, walls, large statues) will cause the spell to fail, but the caster gets a general idea of the reason.

To cast the spell, the caster touches the earth he wishes to purify, takes a Concentrate maneuver and rolls vs. IQ. Success means he purifies it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Purification costs 1 FP per use.

The caster can purify an amount of earth weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Accessibility, Only to transform into normal soil, -20%; Transmute Earth to Earth, +50%; Transmutation Only, -100%; Magical, -10%) [4/level].

Purify Fluid

Keywords: None.
Full Cost: 28 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: Permanent.

This spell removes all impurities from the air in its area of effect or remove all impurities from water, rendering it drinkable.

To cast the spell, the caster touches the substance he wishes to purify, takes a Concentrate maneuver and rolls vs. IQ. Success means he purifies it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Purification costs 1 FP per use.

The caster can purify an area of air up to one yard in radius per level. The caster can purify an amount of water weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Accessibility, Only to transform into breathable air or drinkable water, -20%; Transmute Gas to Gas, +50%; Transmute Water to Water, +50%; Transmutation Only, -100%; Magical, -10%) [28/level].

Purify Food

Keywords: None.
Full Cost: 4 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: Permanent.

This spell removes all impurities from food, rendering it fit to consume. To cast the spell, the caster touches the food he wishes to purify, takes a Concentrate maneuver and rolls vs. IQ. Success means he purifies it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Purification costs 1 FP per use.

The caster can purify an amount of food weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Accessibility, Only to transform into edible food, -20%; Transmute Food to Food, +50%; Transmutation Only, -100%; Magical, -10%) [4/level].

Purify Fuel

Keywords: None.

Full Cost: 4 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell removes all impurities from fuel, rendering it fit to use. To cast the spell, the caster touches the fuel he wishes to purify, takes a Concentrate maneuver and rolls vs. IQ. Success means he purifies it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Purification costs 1 FP per use.

The caster can purify an amount of fuel weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Accessibility, Only to transform into usable fuel, -20%; Transmute Fuel to Fuel, +50%; Transmutation Only, -100%; Magical, -10%) [4/level].

Purify Metal

Keywords: None.

Full Cost: 4 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

Removes foreign objects from metal items, including other metal objects (such as nails, screws, and rivets not essential to the item). It also closes holes made by those objects and removes any tarnish, dents, or rust.

To cast the spell, the caster touches the metal he wishes to purify, takes a Concentrate maneuver and rolls vs. IQ. Success means he purifies it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Purification costs 1 FP per use.

The caster can purify an amount of metal weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Accessibility, Only to transform into normal metal, -20%; Transmute Metal to Metal, +50%; Transmutation Only, -100%; Magical, -10%) [4/level].

Purify Water

Keywords: None.

Full Cost: 1 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell removes all impurities from water, rendering it drinkable. To cast the spell, the caster touches the water he wishes to purify, takes a Concentrate maneuver and rolls vs. IQ. Success means he purifies it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Purification costs 1 FP per use.

The caster can purify an amount of water weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Statistics: Create (Accessibility, Only to transform into drinkable water, -20%; Transmute Water to Water, +50%; Transmutation Only, -100%; Magical, -10%) [1/level].

Pyromancy

Keywords: Information.

Full Cost: 39 or 89 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Pyromancy is divination by staring into fire or smoke. It may produce a vision, or the caster may hear a voice in the flames. Small amounts of certain rare herbs (value \$100 per attempt) must be burned. Questions are at -4 unless something pertaining to the question (e.g., hair of the subject of the divination) is also burned.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (39-point) version of this spell requires 10 minutes to cast! The improved (89-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires fire, -10%; Trigger, Herbs, -10%; Trigger, Halved, Something personal, -5%) [39]. The improved version adds Reduced Time 10 (+200%) [+50].

Quantumancy

Keywords: Information.

Full Cost: 40 or 90 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Quantumancy is divination through the study of particle decay. Requires research particle accelerator and appropriate lab equipment.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (40-point) version of this spell requires 10 minutes to cast! The improved (90-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires a research particle accelerator and appropriate equipment, -20%) [40]. The improved version adds Reduced Time 10 (+200%) [+50].

Quarter

Keywords: Resisted (HT).

Full Cost: 68 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Exposes the subject to intense magical forces from without. If the subject fails to resist, he dies immediately. Someone slain by Quarter ends up in four chunks of roughly equal size. Most material targets, even Diffuse ones, are instantly killed or wrecked by quartering – though for beings specifically able to survive in fragments, it’s no less survivable than any other dissection. The victim’s equipment is

mostly left intact, but torso armor, full-body suits, or anything else worn over half or more of the body is doomed. The GM has the final say.

Statistics: Affliction 1 (HT; Based on IQ, Own Roll, +20%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [68].

Quick March

Keywords: Buff.

Full Cost: 26 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

The subject has his Basic Move increased by 1 per level of this spell, but only for the purpose of calculating overland movement.

Statistics: Affliction 1 (HT; Advantage, Quick March 1, +20%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. Additional levels add further Quick March to the Advantage enhancement [+2]. *Note:* Each level of "Quick March" is Basic Move 1 (Only to determine overland movement, -50%; Magical, -10%) [2].

Quick-Aim

Keywords: Weapon Buff.

Full Cost: 39 points or 69 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject missile or throwing weapon gains uncanny responsiveness; in game terms, an Aim action taken with the subject weapon has the effect of two turns of aiming. The improved (69-point) version of this spell makes every Aim action taken with the subject weapon have the effect of three turns of aiming.

Statistics: Affliction 1 (HT; Accessibility, Only on ranged weapons, -30%; Advantage, Quick-Aim, +300%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Notes:* "Quick-Aim" is Altered Time Rate 1 (Accessibility, Only to aim with this weapon, -60%; Magical, -10%) [30]. Improved version adds another level of Altered Time Rate [+30].

Quick-Draw

Keywords: Weapon Buff.

Full Cost: 14 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell gives a +1 to Fast-Draw rolls to draw the enchanted weapon per level.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Quick-Draw 1, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [14]. Additional levels add further Accuracy to the Advantage enhancement [+4]. *Note:* Each level of "Quick-Draw" is DX 1 (Accessibility, Only to Fast-Draw this weapon, -80%; Magical, -10%) [4/level].

Q-Mirror

Keywords: Buff.

Full Cost: 159 points for level 1 + 147 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Any successful ranged substantial (projectiles, particle beams, but not lasers) attack made against the subject is transformed into antimatter and then turned around so that it hits the attacker instead – so long as the attack's basic damage is less than (Q-Mirror level)x2 dice. For example, Q-Mirror 3 would redirect any ranged substantial attack up to 6d while allowing those of 6d+1 or higher through. Convert all flat damage to dice (as per p. B269) for this determination. A reflected attack deals the same basic damage, but the damage type becomes crushing with radiation, explosion, and surge modifiers and a (3) armor divisor. If hit with a pulsar or any other antimatter-based attack, the attack is transformed into normal matter, neutralizing its danger. Such attack deals no damage.

An attacker unaware that this spell is in place must roll against the lower of IQ or Per, at +3 for Danger Sense and +3 for Combat Reflexes, to realize it in time to get a defense. If the attacker is not physically present at the time of the attack, the missiles are just deflected harmlessly. Do not roll damage or apply special effects until after determining who (if anyone) is hit.

Statistics: Affliction 1 (HT; Advantage, Q-Mirror 1, +1,470%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [159]. Additional levels add further Q-Mirror to the Advantage enhancement (+1,470%) [+147]. *Notes:* Each level of "Q-Mirror" is Damage Resistance 7 (All-or-Nothing, -10%; Armor Divisor, (3), +100%; Cosmic, Reflected attack becomes crushing, +50%; Force Field, +20%; Limited, Ranged Substantial, -40%; Magical, -10%; Nuisance Effect, Reduces higher armor divisors to (3), -10%; Radiation, +100%; Reflection, +100%; Surge, +20%) [147] with each DR 7 converted into 2d per p. B269. Attack modifiers are applied to the Damage Resistance to modify the reflected attack.

Radiation Jet

Keywords: Jet.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: One second.

A 10-yard jet of invisible radiation erupts from your hand, much like the long tongue of a flamethrower. Use Innate Attack (Beam) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does radiation damage (p. B435) with dice equal to your level of this spell, ignoring DR. The GM must determine what the maximum level available in the campaign is.

The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the radiation stream is not interrupted and the caster may continue to attack with it normally.

Statistics: Toxic Attack (Destructive Parry, +10%; Increased 1/2D, 2x, +5%; Jet, +0%; Melee-Capable, Reach 1, +15%; No Signature, +20%; Radiation, +25%; Reflexive, +40%; Sorcery, -15%) [8/level]. *Note:* Melee-Capable and Reflexive allow a jet to parry in this particular combination despite a jet normally being unable to do so.

Radio Hearing

Keywords: Information.

Full Cost: 2 points.

Casting Roll: IQ.

Range: 10 miles.

Duration: Indefinite.

The caster can hear radio waves. Range is 10 miles. The caster can receive AM, FM, CB, and other ordinary radio signals on a successful casting roll. Note that radio-frequency "noise" from lightning and unshielded electronics can interfere with this ability. This ability does not work at all underwater.

Statistics: Radio (Hearing-Based, -20%; Receive Only, -50%; Sorcery, -15%) [2].

Rail Communication

Keywords: None.

Full Cost: 17 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

Lets a caster who is standing on a rail communicate telepathically with one willing subject located somewhere else along the same rail line (sitting in a station, on a train, etc.). Range is theoretically unlimited, but the IQ roll to cast this spell takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see or otherwise sense his subject, he has an additional penalty: -1 for family, lovers, or close friends; -3 for casual friends and acquaintances; or -5 for someone met only briefly.

If successful, the participants hear each other's projected thoughts, allowing "real-time" conversation. If a participant does not want to hear the other one, he can simply get off the train or walk away from the rail. The caster may maintain a connection with that subject for as long as he'd like, but he must keep touching the rail. No further rolls are normally required unless the range penalty worsens.

Others can join the "conference" at any time – a new casting of the spell (by anyone involved) is required for each new person to enter.

Statistics: Mind Reading (Accessibility, The caster must be touching the rail and subject must be along the same line, -60%; Accessibility, Projected thoughts only, -20%; Link, +10%; Magical, -10%; Telecommunication, -20%) [6] + Telesend (Accessibility, The caster must be touching the rail and subject must be along the same line, -60%; Link, +10%; Sorcery, -15%) [11].

Rail Teleport

Keywords: None.

Full Cost: 20 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

This spell allows a caster who is standing on or by a rail to teleport himself to anywhere alongside that particular line. The caster can carry up to Medium Encumbrance when he travels. This spell is not affected by distance, preparation time, extra FP spent on casting, and being unable to see the destination. While the caster is effectively teleporting blind, this spell is based not on spatial coordinates but on actual knowledge of the destination. This normally requires an IQ-5 roll, but roll vs. IQ if the caster has Eidetic Memory or IQ+5 with Photographic Memory – aided by Talent in all cases.

Make a Concentrate maneuver and roll against IQ + Talent. On a success, the caster appears at the target destination. On a failure, he goes nowhere and strains his teleporting ability: he is at -5 to cast this spell again in the next 10 minutes. On a critical failure, he arrives at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience the caster. In addition, your spell temporarily "burns out" and will not function again for 1d hours.

Statistics: Warp (Accessibility, Only to another place on this line, -20%; Accessibility, Requires knowledge of destination, -10%; Blind Only, -50%; Cosmic, Based on memory of destination rather than spatial coordinates, +50%; Extra Carrying Capacity, Medium, +20%; Requires Concentrate, -15%; Special Portal, Railway, -40%; Sorcery, -15%) [20].

Rail Teleport Other

Keywords: Resisted (Will).

Full Cost: 128 points.

Casting Roll: Will. IQ to teleport.

Range: Unlimited.

Duration: Instantaneous.

If the subject fails to resist, the caster may try an immediate IQ + Talent roll to teleport the subject as if using the Rail Teleport spell. The caster can send the subject who is standing on or by a rail and his gear up to his Medium encumbrance to anywhere alongside that particular line. The IQ roll to teleport is not affected by distance, preparation time, extra FP spent on casting, and being unable to see the destination. While the caster is effectively teleporting the subject blind, this spell is based not on spatial coordinates but on actual knowledge of the destination. This normally requires an IQ-5 roll, but roll vs. IQ if the caster has Eidetic Memory or IQ+5 with Photographic Memory – aided by Talent in all cases.

On a success, the subject appears at the target destination. On a failure, he goes nowhere and the caster strains his teleporting ability: he is at -5 to cast this spell again in the next 10 minutes. On a critical failure, the subject arrives at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience the subject. In addition, the caster's spell temporarily "burns out" and will not function again for 1d hours.

Statistics: Affliction 1 (Will; Advantage, Rail Teleport Other, +1,000%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [128]. *Note:* "Rail Teleport Other" is Warp (Accessibility, Only to another place on this line, -20%; Accessibility, Requires knowledge of destination, -10%; Blind Only, -50%; Cosmic, Based on memory of destination rather than spatial coordinates, +50%; Extra Carrying Capacity, Medium, +20%; Reliable 10, +50%; Special Portal, Railway, -40%) [100]. The +10 for Reliable cancels the -10 for no preparation.

Rain

Keywords: Area (Special).

Full Cost: 46 points for level 1 + 41 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can create or prevent 3 inches of rain per level within the 0.1-mile-radius area around you, if there are rain clouds available in the area. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by rain, relative to the prevailing conditions. This can help with rolls for Boating, Farming, Seamanship, Survival and anything the GM allows.

Statistics: Control Rain 1 (Natural Phenomenon, +100%; Sorcery, -15%) [19] + Control Rain +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [27]. Additional levels add Control Rain +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [41/level]. *Note:* As this is one advantage (Control Rain) with the Sorcery limitation, not two, it costs only 1 FP to use.

Rain of Acid

Keywords: Area (Leveled).

Full Cost: 15.4 points for level 1 + 3.5 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause acid to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-1 corrosion damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the area affected.

Statistics: Corrosion Attack 1d-1 (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [15.4]. Further levels add Area Effect, +50% [+3.5].

Rain of Alkahest

Keywords: Area (Leveled).

Full Cost: 22.4 points for level 1 + 3.5 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause alkahest to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-1 corrosion damage. This damage leaves a lingering effect that deals 1 point of corrosion damage per second, for a number of seconds equal to the number of dice. This effect can only be removed by rinsing the targeted zone with Essential Water. Resist Acid only halves the damage of this spell, instead of rendering the target immune. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the area affected.

Statistics: Corrosion Attack 1d-1 (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Cosmic, Lingering Effect, +100%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [22.4]. Further levels add Area Effect, +50% [+3.5].

Rain of Banefire

Keywords: Area (Leveled).

Full Cost: 65 points for level 1 + 11 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause sickly green flames to rain down upon an area. Banefire only affects living creatures, causing them to age rapidly. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-1 burning damage and ages 1d-1 years. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected. The banefire sticks to the target, damaging him again every 10 second for 4 more cycles. The cycles can be stopped by dousing the flames with holy water. This is *injury* that comes right off HP – not damage that must penetrate DR again, be multiplied for damage type, and so forth. Each instance of damage, including the initial one, can be negated with a successful Will roll. If a victim successfully resists, the flames go out.

Statistics: [Ageing Attack](#) 1d-1 (Accessibility, Only on living, -10%; Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Extended Duration, 3x, +20%; Link, +10%; Overhead, +30%; Persistent, +40%; Resistible, Will, -30%; Sorcery, -15%; Variable, Area, +5%) [53] + Burning Attack 1d-1 (Accessibility, Only on living, -10%; Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Cyclic, 4 cycles, 10 second intervals, Resistible, +100%; Extended Duration, 3x, +20%; Link, +10%; Magical, -10%; Overhead, +30%; Persistent, +40%; Resistible, Will, -30%; Variable, Area, +5%) [12]. Additional levels add more Area Effect (+50%) [+11].

Rain of Glass

Keywords: Area (Leveled).

Full Cost: 14 points (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause shards of glass to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is

attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d(0.5) cutting damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected.

The basic (14-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. The upgraded (24-points) version increases the damage to 2d-1(0.5). This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	14 points	18 points	21 points	25 points	28 points	32 points	35 points
2d-1	24 points	30 points	36 points	42 points	48 points	53 points	59 points

Statistics: Cutting Attack 1d (Armor Divisor, (0.5), -30%; Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [14]. Improved versions add Area Effect (+50%/level) and/or improve to Cutting Attack 2d-1.

Rain of Ice Daggers

Keywords: Area (Leveled).

Full Cost: 9 points for level 1 + 2 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause razor-sharp icicles to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-2 impaling damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the area affected.

Statistics: Impaling Attack 1d-2 (Area Effect, 5 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [9]. Further levels add Area Effect, +50% [+2].

Rain of Nuts

Keywords: Area (Leveled).

Full Cost: 23 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You cause a rain of nuts to fall within a two-yard-radius area, issuing from the nearby trees as if they were suddenly filled with crazed squirrels. This gives -3 to all vision rolls made through the area. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Additionally, every creature in the area is distracted by the rain of nuts, taking a -1 penalty to DX and IQ, while it is in the area. This effect may be resisted with a Will roll, but any creature that left the area has to make the roll again, if it enters the area again.

This spell may only be cast outdoors, in a forest. It won't work in the dead of winter, or in very sparse woods. Depending on the species of trees, the nuts may turn out to be edible.

The basic (23-point) version of this spell covers a two-yard radius. For each additional 8 points, you may double this radius; e.g., four yards for 31 points, 8 yards for 39 points, or 16 yards for 47 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area or exclude any hexes from the area.

Statistics: Obscure Vision 3 (Environmental, Forests with nut trees, -60%; Link, +10%; Magical, -10%; Ranged, +50%; Selective Effect, +20%; Variable, Area, +5%) [7] + Affliction 1 (Will; Area Effect, 2 yards, +50%; Attribute Penalty, -1 to IQ and DX, +20%; Based on Will, +20%; Environmental, Forests with nut trees, -60%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Reduced Duration, 1/180, Only when the creature leaves the area, -35%; Selective Effect, +20%; Sorcery, -15%; Variable, Area, +5%) [16]. Further levels add Area Effect (+50%) to both advantages [+8].

Rain of Plasma

Keywords: Area (Leveled).

Full Cost: 14 points (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause balls of plasma to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d(2) burning damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected.

The basic (14-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. The upgraded (24-points) version increases the damage to 2d-1(2). This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	14 points	17 points	19 points	22 points	24 points	27 points	29 points
2d-1	24 points	28 points	32 points	37 points	41 points	44 points	49 points

Statistics: Burning Attack 1d (Armor Divisor, (2), +50%; Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [14]. Improved versions add Area Effect (+50%/level) and/or improve to Burning Attack 2d-1.

Rain of Shards

Keywords: Area (Leveled).

Full Cost: 9 points for level 1 + 2 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause sharp metal shards to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-2 impaling damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the area affected.

The basic (7.04-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 1.6 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum.

Statistics: Impaling Attack 1d-2 (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [9]. Further levels add Area Effect, +50% [+2].

Rain of Stones

Keywords: Area (Leveled).

Full Cost: 9 points (or more).
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 seconds.

You cause stones to rain down upon an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-1 crushing damage. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the damage or the area affected.

The basic (9-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +75% to cost (including any increased area), rounded up, the damage can be upgraded to 2d-2 crushing. This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d-1	9 points	11 points	13 points	16 points	18 points	20 points	22 points
2d-2	16 points	20 points	23 points	27 points	30 points	34 points	37 points

Statistics: Crushing Attack 1d-1 (Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, +5%; Variable, Area, +5%) [9]. Improved versions add Area Effect (+50%/level) and/or improve to Crushing Attack 2d-2.

Rain of Thorns

Keywords: Area (Fixed).
Full Cost: 7 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 seconds.

You cause thin poisonous thorns to rain down upon an area with a 4-yard-radius. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 1d-3 small piercing damage with a follow-up poison with a 10-second delay and a HT roll to resist. The poison inflicts 1d-1 toxic damage at 1-minute intervals for four cycles. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the area affected.

Statistics: Small Piercing Attack 1d-3 (Area Effect, 4 yards, +100%; Bombardment, Skill-12, -10%; Extended Duration, 3x, +20%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [3] + Toxic Attack 1d-1 (Cyclic, 1-minute intervals, 3 cycles, Resistible, +60%; Follow-Up, Rain of Thorns, +0%; Onset, 10 seconds, -10%; Resistible, HT, -30%) [4].

Rainbow

Keywords: Area (Special).
Full Cost: 18.5 points/ level.
Casting Roll: IQ.
Range: Self.
Duration: Indefinite.

Creates a rainbow. Caster must be outdoors in humid, overcast conditions during the day in order for this spell to work. However, the GM can allow the mage to use this spell in other places where there is sufficient light and humidity to allow a creditable rainbow to be formed, however the size of the rainbow will be greatly reduced. This spell's area of effect has a radius of 0.1 miles per level.

Statistics: Control Rainbow 1 (Natural Phenomenon, +100%; Sorcery, -15%) [18.5/level].

Raise Cone of Power

Keywords: None.

Full Cost: 84 points for level 1 + 57 points/additional level.

Casting Roll: None. Does not cost FP.

Range: Self.

Duration: Indefinite.

This spell creates an immaterial Energy Reserve. The size of the Energy Reserve is equal to Raise Cone of Power level x 10.

The caster needs to have at least 2 assistants (who need not know this spell or even be spellcasters at all) standing in a circle to cast this spell. Energy accumulation requires a ritual that takes at least one hour of uninterrupted concentration. The amount of accumulated energy depends on the number of assistants: 1 point per hour with 2-5 assistants, 2 points per hour with 6-10 assistants, 4 points per hour with 11-20 assistants, and 8 points per hour with 21 or more assistants.

After the first hour, anyone involved in the casting can drop out of the ceremony (so long as one person who has this spell active remains involved), and take a Concentrate maneuver and make an IQ roll to draw on the Cone to power another spell, which must be cast starting on the next turn. This caster must be within 2 yards of the original caster of Raise Cone of Power. This can continue until the Cone is exhausted or the ceremony ends.

Statistics: Energy Reserve 10 (Magical; Affects Others 1, +50%; Area Effect, 2 yards, +50%; Requires IQ Roll from the User, -10%) [57/level] + Regeneration (Regular; Accessibility, Only with 2 assistants, -10%; ER Only, -0%; Magical, -10%; Nuisance Effect, Energy is restored at the end of one hour regardless of the number of assistants, -5%; Reduced Time 1, Limited by Accessibility, Only with 6 assistants (-20%), +18%; Reduced Time 1, Limited by Accessibility, Only with 11 assistants (-25%), +15%; Reduced Time 1, Limited by Accessibility, Only with 21 assistants (-30%), +14%; Requires Concentrate, -15%) [27]. *Note:* This spell originally appeared in *GURPS Thaumatology*.

Raise Demon

Keywords: Buff.

Full Cost: 227 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 1 minute.

You can bring a demon back from the dead, if his body is not completely destroyed (-10xHP or worse). You must touch the corpse to affect it. You glow red when casting this spell. If the subject does not want to come back (GM's opinion, for NPCs), the spell fails automatically. This subject recovers 60 HP in 1 minute – if this brings him back above -HP before the duration ends, he returns to life! But if it's not enough, or if the initial HT roll fails, he cannot be resurrected.

Statistics: Affliction 1 (HT; Accessibility, Only on demons, -60%; Advantage, Raise Demon, +2,250%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [227]. *Notes:* "Raise Demon" is Regeneration (Very Fast; Cosmic, Works on the dead, +50%) [150] + Unkillable 1 (Cosmic, Works on the dead, +50%) [75]. This version of Cosmic means it *only* works on the dead – not injured living demons – and gives one try, ever.

Rapid Journey

Keywords: None.

Full Cost: 205 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

You can teleport to any place you are able to see with your own eyes, or view it remotely, or visualize it clearly (which is only possible if you have visited it previously in person) and then teleport back after some time, as if using the Warp advantage (p. B97) with a Concentrate maneuver. You can carry up to Heavy Encumbrance when you travel.

When casting this spell, you must state how long you will stay at your destination before teleporting back. This delay can be from 1 to 10 seconds long. Note that if you spent additional FP to lower the casting roll penalty for the primary teleportation, you have to spend the same amount of FP *again* to be able to return back, as both trips use the same roll. If you teleport to a no-mana zone, then you will not teleport back and will be stranded.

Statistics: Warp (Extra Carrying Capacity, Heavy, +30%; Link, +10%; Requires Concentrate, -15%; Sorcery, -15%) [110] + Warp (Accessibility, Only to come back, -30%; Delay, Variable, +10%; Extra Carrying Capacity, Heavy, +30%; Link, +10%; Magical, -10%; Requires Concentrate, -15%) [95].

Rapid Time Journey

Keywords: None.

Full Cost: 280 points.

Casting Roll: IQ. Special casting time (see Jumper (p. B64)).

Range: Self.

Duration: Instantaneous.

You travel through time, stay in the new time for a short time, and then automatically travel back, as if using the Jumper advantage (p. B64). You can carry up to your Heavy Load when you travel.

When casting this spell, you must state how long you will stay at your destination before timeporting back. This delay can be from 1 to 10 seconds long. Both trips use the same roll. If you timeport to a no-mana zone, then you will not timeport back and will be stranded.

Statistics: Jumper (Time; Extra Carrying Capacity, Heavy, +30%; Improved, +10%; Link, +10%; Magical, -10%) [140] + Jumper (Time; Accessibility, Only to come back, -30%; Delay, Variable, +10%; Extra Carrying Capacity, Heavy, +30%; Improved, +10%; Link, +10%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [140]. Note: The Improved enhancement removes the auto-fail on 14+.

Ray of Enfeeblement

Keywords: Missile, Obvious.

Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: 3 minutes.

You fire a black ray that weakens the victim, if he fails to resist with HT. The victim temporarily loses 4 ST. Lower all skills based on ST by a like amount. ST penalties also reduce BL and damage. HP is not otherwise affected.

Statistics: Affliction 1 (HT; Attribute Penalty, ST-4, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Sorcery, -15%) [12].

Ray of Exhaustion

Keywords: Missile, Obvious.

Full Cost: 10 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster fires a gray ray that inflicts 1d fatigue damage per level of the spell.

Statistics: Fatigue Attack 1d (Increased 1/2D, 10x, +15%; Sorcery, -15%) [10/level].

Ray of Frost

Keywords: Missile, Obvious.

Full Cost: 19 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

You fire a white ray of frost at a single target. Use Innate Attack (Beam) to hit, applying normal range penalties. It does fatigue damage with dice equal to your level of this spell. Treat FP lost to the spell identically to FP lost to cold (B430). Targets who took damage from this spell must make an HT roll, at -1 per 2 points of FP lost, or take a -2 penalty to DX and become Numb (p. B146) for (20-HT) minutes (minimum 1 minute). The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own ray of frost!

Statistics: Fatigue Attack (Freezing, +20%; Nuisance Effect, Dangerous to be parried, -5%; Side Effect, DX-2 and Numb, +90%; Sorcery, -15%) [19/level].

Razor Grass

Keywords: Area (Leveled).

Full Cost: 6/9/11/13/16/18/21 points for levels 1-7.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may temporarily make a two-yard-radius area of grass extremely sharp. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Every creature that moves through the area takes 1d-1 cutting damage per second. Creatures standing still in the area are not damaged. The areas of the body that can be injured depend on the height of the grass. Thus, if it's up to the knees, victims take damage to their legs and feet. Up to the armpits, victims take damage everywhere below the neck – discounting the arms if raised. Roll hit location randomly, rerolling any invalid results. Damage thresholds are significant: Someone with HP 10 cannot suffer more than 4 HP to a foot, 4 HP to a hand, or 6 HP to an arm or leg.

The basic (7-point) version of this spell covers a two-yard radius. For additional points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
6 points	9 points	11 points	13 points	16 points	18 points	21 points

Statistics: Cutting Attack 1d-1 (Accessibility, Only against moving creatures, -10%; Area Effect, 2 yards, +50%; Environmental, Grass, -40%; Fixed Duration, +0%; No Knockback, -10%; Nuisance Effect, Capped, -5%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [6]. Further levels add Area Effect (+50%).

Razor Leaves

Keywords: Missile, Obvious.

Full Cost: 2 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 20 yards.

Duration: Instantaneous.

You fire a stream of razor-sharp leaves that does 1d(0.5) cutting damage. This attack deals no blunt trauma or knockback, and can be blocked, but not parried. You must hold leaves in your hand to cast this spell.

Statistics: Cutting Attack 1d (Armor Divisor, (0.5), -30%; Blockable, -5%; No Blunt Trauma, -20%; No Knockback, -10%; Reduced Range, x1/5, -20%; Requires Material Component, -10%; Sorcery, -15%) [2].

Reaper's Embrace

Keywords: Buff.

Full Cost: 43 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject begins to radiate a black aura that ages enemies who touch his body 1 year.

Statistics: Affliction 1 (HT; Advantage, Reaper's Embrace, +310%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [43]. *Note:* "Reaper's Embrace" is [Ageing Attack 1](#) (Aura, +80%; Cosmic, Irresistible Attack, +300%; Magical, -10%; Melee Attack, Reach C, -30%) [31].

Rear Vision

Keywords: Buff.

Full Cost: 39 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject becomes able to see all around him, as if he had the 360° Vision advantage (p. B34). He does not grow extra eyes, but he still needs eyes. If he's blindfolded or blinded, he will become unable to see. This spell can only affect sapient (IQ 6+) beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Rear Vision, +280%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Note:* "Rear Vision" is 360° Vision (Magical, -10%; Panoptic 1, +20%) [28].

Rebuild

Keywords: None.

Full Cost: 57 points for level 1 + 36 points/level.

Casting Roll: IQ. Additional skill rolls are required.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell totally rebuilds any object, from even a fragment. The caster must first successfully cast Schematic on the subject, and, while the schematic is still in mind, begin casting Rebuild. Schematic is unnecessary for simpler objects. With enough time and skill, you could rebuild a starship from a scrap of bulkhead!

The object re-forms at a rate of 500 pounds of missing mass per second, beginning after the casting is completed. Exotic materials may inflict a skill penalty or slow the rebuilding process. You can only rebuild anything, if you have the appropriate skill to do so normally. Thus, you will need *many different* skills to rebuild a starship for a piece of it's hull!

On objects simpler than machines, ignore the TL modifiers. Magic items cannot be rebuilt.

The rebuilt object can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

Rebuilt object is unstable. Its magically created parts vanish in 10 seconds unless you use character points to "stabilize" it. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are

unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed (e.g., melts naturally) or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Control Solids 1 (Accessibility, Only to rebuild an object from a piece, -30%; Link, +10%; Magical, -10%) [21] + Create Solids (Accessibility, Only to rebuild an object from a piece, -30%; Link, +10%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [36/level].

Rebuke (Ethical Category)

Keywords: Area (Leveled).

Full Cost: 45 points for level 1 + 7.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous. Creatures who flee will remain affected for 90 minutes.

Every creature of an ethical category chosen when the spell is learned (chaos, evil, good, etc.) in the area takes 1d of crushing damage. Their DR does not protect! In addition, every victim must immediately roll against Will+DR; this is an unopposed roll, not a Quick Contest. If that roll fails, that victim immediately flees from the caster and will not approach him again for the next 90 minutes.

Statistics: Affliction 1 (Will; Accessibility, Ethical Category, -50%; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Dread, +30%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Link, +10%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [23] + Crushing Attack 1d (Accessibility, Ethical Category, -50%; Area Effect, 2 yards, +50%; Cosmic, Irresistible attack, +300%; Link, +10%; Magical, -10%; No Signature, +20%; Variable, Area, +5%) [22]. Additional levels add Area Effect (+50%) to Affliction [+5*] and Crushing Attack [+2.5*].

* Calculate the total cost and then round down (because the total cost before rounding is 44.25). Level 2 costs 52 points, level 3 costs 60 points, level 4 costs 67 points, level 5 costs 75 points, and so on.

Recall

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: IQ. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

The subject recalls a single forgotten or obscured fact or event as if he had Photographic Memory (p. B51). The caster makes an IQ roll to restore the memory in question. Time penalties apply, based on the time since the forgotten event occurred. Use *Long-Distance Modifiers* (p. B241) and substitute “days” for “miles.” Eidetic Memory of the subject gives a +5 bonus; Photographic Memory of the subject gives a +10 bonus (though individuals with Photographic Memory will only need this spell to restore unnaturally removed memories). Only a critical success allows a magically blocked memory to be recalled. A critical failure could cause a false or distorted memory, or eradicate the memory beyond hope of future recovery!

This is a Knowledge and a Mind Control spell. When this spell is cast as a Mind Control spell, it can only affect sapient creatures.

Statistics: Affliction 1 (HT; Advantage, Recall, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/180, -40%; Requires IQ Roll, -10%; Sorcery, -15%; Time-Spanning, Past, +50%) [21]. *Note:* “Recall” is Photographic Memory (Magical, -10%) [9]. When used as a Mind Control spell, add Accessibility, Only on sapient beings, -10% to Affliction. This makes the spell cost 20 points.

Reckless Reconstitution

Keywords: Resisted (HT).
Full Cost: 63 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

Causes tiny bits of inorganic matter in or on a living, organic body to grow into whatever they chipped off of. Accidentally ingested grains of sand, specks of grit in the eye, and inhaled dust particles become boulders; arrow or bullet fragments in forgotten wounds turn into intact projectiles; and so on. If the subject fails to resist, such growth occurs instantly, resulting in some 200 lbs. of inclusions, instantly killing the subject.

Only victims who are somehow Diffuse despite being living and organic are immune. Clothing and armor are ruined by this bursting effect, and the corpse is left with chunks of garbage wedged in it.

Assume that every living being carries around enough stray dirt to be affected, with the exception of those subjected to a full-body Cleansing spell in the past hour.

Statistics: Affliction 1 (HT; Accessibility, Only on living, organic, non-diffuse beings, -20%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Subject can be made immune with Cleansing, -5%; Sorcery, -15%) [63].

Recoil Compensation

Keywords: Weapon Buff.
Full Cost: 36 points for level 1 + 40 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell gives enchants the target weapon, allowing it to increase the stability of its projectiles in flight. Reduce the Rcl by the spell level. If the spell level is enough to reduce the Rcl to 1 and there are at least 2 levels of the spell left “unused” (for example, if Recoil Compensation 2 is enough to reduce the Rcl to 1, but you have Recoil Compensation 4 or higher), the attack becomes a *Very Rapid Fire* attack. This prevents attacking multiple targets or an area with spraying fire or suppression fire – you can only ever attack *one* target – but you get *two* extra hits per point by which you make your attack roll.

Muscle-powered ranged weapons lack an Rcl stat. Use Rcl 1 for weapons with Bulk 0 to -2, Rcl 2 for weapons with Bulk -3 or -4, Rcl 3 for weapons with Bulk -5 or -6, and so on. Increase Rcl by 2 for weapons that deal Swing damage.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Recoil Compensation, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* “Recoil Compensation” is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Stabilized Shot imbuelement skill from *Pyramid* #3-60.

Reconstruct Spell

Keywords: Information.
Full Cost: 7 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: Instantaneous.

Identifies the spells cast on the subject or by the subject at a specific point in the past selected by the caster; enchanted items do *not* count. The GM will secretly roll against the caster’s IQ minus time penalties *and* range penalties (p. B550) to the subject, which the caster must be able to see or touch. For the time penalties use *Long-Distance Modifiers* (p. B241) and substitute “days” for “miles.” If the sorcerer is familiar with the spells in question, this will reveal them. Otherwise, the GM will use the

margin of success to determine how much information to give the sorcerer. For example, “some kind of a protection spell”.

Statistics: Detect (Magic; Analysis Only, -50%; Sorcery, -15%; Time-Spanning, Past, +50%; Touch- or Vision-Based, -15%) [7].

Recover Energy

Keywords: None.

Full Cost: 45 points.

Casting Roll: None. Does not cost FP.

Range: Self.

Duration: Indefinite.

While this spell is active, you recover 1 FP per minute. This spell does not cost any FP and does not need to be maintained.

Statistics: Regeneration (Fast; Fatigue Only, -0%; Magical, -10%) [45].

Redirect Gravity

Keywords: Area (Fixed).

Full Cost: 375 points.

Casting Roll: IQ.

Range: 100 yards.

Duration: 10 seconds.

This spell redirects gravity in an area, causing creatures and objects inside “fall” in a different direction. See *Different Gravity* (p. B350) for details different gravity levels. The area of effect has a radius of 5 yards and height of 4 yards.

Statistics: Control Gravity 5 (Accessibility, Only to redirect gravity, -30%; Cannot concentrate to extend duration, -10%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [75] + Control Gravity 20 (Accessibility, Only to redirect gravity, -30%; Cannot concentrate to extend duration, -10%; Does not increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [300].

Redline

Keywords: Buff.

Full Cost: 27 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

The subject vehicle’s cruising speed is doubled without affecting its endurance. This has no effect on Move or Top Speed in combat. At the end of the spell’s duration, make a HT roll for the vehicle. On a failure, users take -2 to all operation skill rolls until the vehicle is repaired.

Statistics: Affliction 1 (HT; Accessibility, Only on vehicles, -30%; Advantage, Redline, +60%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [27]. *Note:* “Redline” is Enhanced Move 1 (Only to determine overland movement, -50%; Magical, -10%; Nuisance Effect, Breakage, -10%) [6].

Reduce Animal

Keywords: Resisted (HT).

Full Cost: 32 points for level 1 + 9 points/level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

If the subject animal fails to resist, it shrinks. Each level of Reduce Animal lets the caster change his subject's Size Modifier by -2. The subject changes to his minimum size in one second. He cannot carry any equipment, not even clothing, when he shrinks.

When the subject shrinks, find his new height from the *Size Modifier Table* (p. B19). Every -6 to SM reduces height by a factor of 10. Reduce Move, reach, damage (with unarmed attacks, Innate Attacks, or shrunken weapons), HP, and DR in proportion to height. Every full -2 to SM also reduces weight by a factor of 10; for odd-numbered levels, treat the extra -1 as an additional factor of 3 (e.g., -3 to SM reduces weight by a factor of 30).

Statistics: Affliction 1 (HT; Accessibility, Animals Only, -25%; Advantage, Reduce Animal, +90%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Reduce Animal" is Shrinking 2 (Magical, -10%; Minimum Size Only, +0%) [9]. Each additional level adds further Reduce Animal to the Advantage enhancement [+9].

Reduce Gravity

Keywords: Area (Fixed).

Full Cost: 54 points for level 1 + 9 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 10 seconds.

This spell reduces gravity in an area. See *Different Gravity* (p. B350) for details on different gravity levels. The area of effect has a radius of 5 yards and height of 4 yards. The spell reduces gravity by 10% per level.

Statistics: Control Gravity 5 (Accessibility, Only to reduce gravity, -60%; Cannot concentrate to extend duration, -10%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [45] + Control Gravity 1 (Accessibility, Only to reduce gravity, -60%; Cannot concentrate to extend duration, -10%; Does not increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [9/level].

Reflect

Keywords: None.

Full Cost: 73 points or fewer.

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

When this spell is active, the caster can attempt to cast this spell as an active defense, when somebody casts a spell that affects them or their personal equipment *directly*. Thus, Reflect does not protect against missile spells. A successful casting redirects the effects of the spell to target the *attacker*, who may resist normally. When casting Reflect against an Area spell, the rest of the area is affected normally. To reflect a given spell, the caster must also know the spell (or its close sorcerous equivalent if countering a spell using some other magic system) they are reflecting, i.e. be able to cast it as a known spell or via normal or hardcore improvisation.

The casting roll is modified by Talent and Combat Reflexes. If the caster tries to cast Reflect more than once in a turn, the casting roll takes a cumulative -4 penalty per attempt after the first. The caster rolls at -4 if stunned and cannot cast Reflect in situations where they would not get an active defense. If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Reflect, they cannot cast this spell until *all* FP are replenished. This spell does not count as an active defense for the purpose of cumulative defense penalties.

Statistics: Static (Magic; Accessibility, Only spells the caster could cast, -5%; Active Defense, -40%; Reflection, +100%; Sorcery, -15%; Switchable, +100%) [72] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1]. *Notes:* Active Defense being IQ-based is a special feature. The Reflection enhancement is borrowed from Damage Resistance. The limitation value of Accessibility, Only spells the caster could cast is equal to -5% if the caster's Sorcerous Empowerment is not limited in

scope. If their Sorcerous Empowerment has the Limited Colleges or Limited Scope limitation, increase the value by the same number. Thus, this spell costs 70 points if the caster is limited to four colleges or the equivalent, 67 points if they are limited to three colleges, 64 points if they are limited to two colleges, and 61 points if they are limited to a single college.

Reflect Lightning

Keywords: Buff.

Full Cost: 61 points for level 1 + 49 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Any successful ranged electrical attack made against the subject is turned around so that it hits the attacker instead – so long as the attack's basic damage is less than (Reflect Lightning level)x2 dice. For example, Reflect Lightning 3 would redirect any ranged electrical attack up to 6d while allowing those of 6d+1 or higher through. Convert all flat damage to dice (as per p. B269) for this determination.

An attacker unaware that this spell is in place must roll against the lower of IQ or Per, at +3 for Danger Sense and +3 for Combat Reflexes, to realize it in time to get a defense. If the attacker is not physically present at the time of the attack, the missiles are just deflected harmlessly. Do not roll damage or apply special effects until after determining who (if anyone) is hit.

This spell also reflects non-damaging ranged electrical attacks, such as some electric shockers; each level of Reflect Lightning can repel two levels of Affliction or 10 levels of Binding. It doesn't stop most area effects or explosions.

Statistics: Affliction 1 (HT; Advantage, Reflect Lightning 1, +490%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [61]. Additional levels add further Reverse Reflect Lightning to the Advantage enhancement (+490%) [+49]. *Notes:* Each level of "Reflect Lightning" is Damage Resistance 7 (All-or-Nothing, -10%; Force Field, +20%; Limited, Ranged Electrical Attacks, -60%; Magical, -10%; Reflection, +100%) [49] with each DR 7 converted into 2d per p. B269. The ruling on Affliction and Binding is from p. 168 of *GURPS Powers*.

Reflexes

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You subject gains the Combat Reflexes (p. B43) advantage for the duration of this spell.

Statistics: Affliction 1 (HT; Advantage, Reflexes, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Reflexes" is Combat Reflexes (Magical, -10%) [14].

Regeneration

Keywords: Buff.

Full Cost: 57 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent until the lost limb or organ is restored.

Your touch infuses the subject with restorative energies, allowing him to regrow lost limbs and organs! A lost ear, finger, toe, claw, tentacle tip, etc. regrows in 1d weeks; a lost hand or foot in 1d+1 months; and a lost eye, arm, or leg in 2d+2 months. If you also have the Regeneration advantage, this spell works much faster: all lost body parts regrow in the time it takes you to heal to full HP. This spell must be cast separately for each missing limb or organ.

Statistics: Affliction 1 (HT; Accessibility, One organ at a time, -5%; Accessibility, Only on living creatures, -10%; Advantage, Regeneration, +360%; Extended Duration, Permanent, Until regrown, +150%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [57]. *Note:* "Regeneration" is Regrowth (Magical, -10%) [36].

Reincarnate

Keywords: Buff.

Full Cost: 244 points or more.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 1 minute.

You can bring a formerly living creature back from the dead, if his body is not completely destroyed (-10xHP or worse), but only in a different body. You must touch the corpse to affect it. If the subject does not want to come back (GM's opinion, for NPCs), the spell fails automatically. This subject recovers 60 HP in 1 minute – if this brings him back above -HP before the duration ends, he returns to life, but in a different body! But if it's not enough, or if the initial HT roll fails, he cannot be resurrected. His new racial template is determined randomly (the GM should create a table), but the template's cost should not be more than the original template's cost, but see the notes below.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Advantage, Reincarnate, +2,400%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [244]. *Notes:* "Reincarnate" is Regeneration (Very Fast; Cosmic, Works on the dead, +50%) [150] + Unkillable 1 (Cosmic, Works on the dead, +50%) [75] + Alternate Form (Random template) [15 or more]. This version of Cosmic means it *only* works on the dead – not injured living creatures – and gives one try, ever. This spell costs 245 points for a racial template worth no more than the subject's native racial template. A more powerful form costs 245 points plus 90% of the difference in cost between the subject's native template and that of the potential new random form.

Reinforce

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

Subject's personal possession – everything they are holding or wearing – use the higher of HT and the subject's HT when resisting such effects as Disintegrate, Explode, Rive, Ruin, Shatter, or Weaken, and add the caster's Sorcery Talent as a bonus.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Reinforce (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Reinforce, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Reinforce" is Reinforce (Magical, -10%) [1].

Reinforced Armor

Keywords: Armor Buff.

Full Cost: 36 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The affected armor becomes particularly hard, gaining an ability to resist armor divisors. This gives it the Hardened enhancement (p. B47). At level 1, this spell grants Hardened 1, but each additional level grants an extra level of Hardened.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Reinforced Armor, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Reinforced Armor" is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -2 in penalties [+16]. This spell is based on the Reinforce Armor imbue skill from *Pyramid* #3-4.

Reinforced Weapon

Keywords: Weapon Buff.

Full Cost: 32 points or 72 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The basic (32-point) version of this spell magically reinforces the structure of the weapon. For unarmed attacks, this protects the user from the situations governed by the rules for *Hurting Yourself* (p. B379) and the *Parrying Unarmed* (p. B376) rules. For manufactured weapons, this makes the weapon unbreakable when parrying with it (as per *Parrying Heavy Weapons*, p. B376). This spell also protects the weapon (or body part) from the damage from attacks that are destructive for parrying purposes – such as force swords and attacks enhanced with Brilliant Energy Weapon – and innate attacks with the Aura enhancement, as long as they are not Cosmic. The improved (72-point) version protects the weapon even from Cosmic attacks.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Reinforced Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Reinforced Weapon" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). The improved version buys off a -5 penalty [+40]. This spell is based on the Reinforce Weapon imbue skill from *Pyramid* #3-13.

Rejoin

Keywords: None.

Full Cost: 14 points.

Casting Roll: IQ.

Range: Touch.

Duration: 1 hour.

By making physical contact with an object, you may *temporarily* restore it 1d HP. Healed HP disappear when the spell ends. If used more than once per day on a given object, you are at a cumulative -3 per successful restoration. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only objects, -10%; Capped, 2 FP, -25%; Injuries Only, -20%; Magical, -10%; Maximum Duration, 1 hour, -10%; Reduced Fatigue Cost 1, +20%) [14]. *Note:* The 4 HP of healing has been converted to dice per p. B269.

Rejuvenate Plant

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite.

Causes a dead, dying, or old plant to undergo a sudden burst of life. Tables (or longbows!) sprout leaves, an aging fruit tree bears fruit once more, etc. Whether the plant can sustain this new

vitality depends on its immediate surroundings. A rejuvenated chair would die slowly unless its legs could grow roots into nourishing soil, for example.

You can affect a plant weighing up to 10 x (level squared) lbs.

Statistics: Control Wood (Accessibility, Only to rejuvenate plants, -80%; Reduced Fatigue Cost 1, +20%; Sorcery, -15%; Vital Manipulation, +100%) [25/level].

Relieve Addiction

Keywords: Resisted (Will).

Full Cost: 10 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to remove disadvantages.

Range: Unlimited.

Duration: Three days.

You can temporarily remove any addictions in a subject. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head, where you can “see” his addiction; the GM will reveal his Addiction disadvantages. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject – at -1 for every full -5 points in disadvantages you wish to remove. You may substitute Brainwashing for IQ, if better. A critical success here gives the subject an excuse to buy off his problem, if he has the character points!

Statistics: Mind Control (Accessibility, Only to remove addictions, -20%; Conditioning Only, -50%; Fixed Duration, +0%; Sorcery, -15%) [10].

Relieve Paralysis

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is completely immune to paralysis for the duration of the spell. The symptoms are suppressed and the duration does count toward the paralysis’ duration. Recasting this spell enough times lets the subject wait out a temporary paralysis!

Statistics: Affliction 1 (HT; Advantage, Relieve Paralysis, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* “Relieve Paralysis” is Immunity to Paralysis (Magical, -10%) [9].

Relieve Sickness

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject is completely immune to sickness for the duration of the spell. Existing ones don’t disappear, but their symptoms are suppressed and the duration does count toward the sickness’ duration. Recasting this spell enough times lets the subject wait out a temporary sickness!

Statistics: Affliction 1 (HT; Advantage, Relieve Sickness, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* “Relieve Sickness” is Immunity to Sickness (Magical, -10%) [9].

Remember Path

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject always knows which way is north, and he can always retrace a path he has followed while the spell was active, no matter how faint or confusing. This ability does not work in environments such as interstellar space or the limbo of the astral plane, but it does work underground, underwater, and on other planets. This gives +3 to Body Sense and Navigation (Air, Land, or Sea).

Statistics: Affliction 1 (HT; Advantage, Remember Path, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Remember Path" is Absolute Direction (Magical, -10%) [5].

Remote Start

Keywords: None.
Full Cost: 2 points.
Casting Roll: None.
Range: 10 yards.
Duration: Instantaneous.

Causes subject machine to switch on or off, if this requires nothing more complicated than pushing, pulling, or turning a control. Any key must be in place, and the caster must know how to operate the device and make any skill roll required for startup or shutdown.

Statistics: Telekinesis 2 (One Task, Starting or turning off machinery, -80%; Sorcery, -15%) [2].

Remove Aura

Keywords: Buff.
Full Cost: 48 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous, see below.

This spell removes the magical emanations and mystical associations of the subject entirely. The subject's past cannot be divined by the Psychometry advantage (p. B78) and by spells such as Ancient History, Divination, Echoes of the Past, History, Images of the Past, Prehistory, Scents of the Past, and, if the subject is an inanimate object, it "forgets" its past for the purpose of these spells and abilities. In addition, facts about the subject's past cannot be recalled with Recall, and the subject does not show up as hidden for the See Secrets spell, because its aura "forgets" that it was deliberately hidden. For the purpose of the Seeker spell and similar abilities, the subject loses "association" with everything. Whatever happens to the subject *after* its aura is removed can still be freely accessed by those spells and abilities.

Statistics: Affliction 1 (HT; Advantage, Remove Aura, +90%; Cosmic, Allows Time-Spanning on an attack, +50%; Disadvantage, Total Amnesia, Variant, +25%; Extended Duration, Permanent, +150%; Increased 1/2D, 10x, +15%; Long-Range 1 on Time-Spanning, +50%; No Signature, +20%; Nuisance Effect, Duration is limited by the present time, -5%; Sorcery, -15%; Time-Spanning, Past Only, -0%) [48]. *Note:* "Remove Aura" is Zeroed (Only affects auras and mystical association, -0%; Magical, -10%) [9].

Remove Contagion

Keywords: Area (Leveled).
Full Cost: 30 points/level.
Casting Roll: IQ.
Range: 100 yards.
Duration: Instantaneous.

Within a radius equal to your level in this spell, all contagious disease-causing agents – microbes, disease spirits, foul air, etc. are destroyed, rendering the area sterile and free from infection. It will not cure or relieve disease in living creatures; it serves only to cleanse and purify objects and surfaces.

Statistics: Create Contagion (Destruction Only, +0%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 1, +20%) [30/level].

Remove Enchantment

Keywords: Resisted (Will or spell).

Full Cost: 260 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Truly Permanent.

This spell lets you remove one enchantment from an item. The sorcerer must state which enchantment he is attempting to suppress.

Note how much the sorcerer's Will roll (minus range penalties) succeeds by; the subject spell resists with a Quick Contest. Use the spell's level (if a skill) or the caster's Will + Talent (if a power); for the latter, the Talent is usually Sorcery Talent or some type of Magery. If the sorcerer wins, the enchantment is removed.

Statistics: Neutralize (Magic; Accessibility, Must target an enchanted item, -20%; Accessibility, One spell at a time, -5%; Cosmic, Removes Enchantments, +100%; Extended Duration, Truly Permanent, +300%; Fixed Duration, +0%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [260].

Remove Fetus

Keywords: Resisted (HT).

Full Cost: 14 points.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Instantaneous.

The caster can safely reach through the pregnant subject's belly and detach the fetus. If the fetus is old enough to survive, this is effectively a painless alternative to Caesarean birth. Otherwise, it serves as a means of abortion.

Statistics: Affliction 1 (HT; Advantage, Reabsorption, Variant, +10%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [14].

Remove Hangover

Keywords: None.

Full Cost: 21 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

You can neutralize effects of a hangover (p. B440). This requires a touch and a successful IQ roll, and costs 1 FP. Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful casting. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only to remove hangover, -80%; Affects Self, +50%; Affliction Only, -40%; Capped, 1 FP, -30%; Magical, -10%; Xenohealing, Anything Alive, +80%) [21].

Remove Reflection

Keywords: Resisted (Will).

Full Cost: 33 points.

Casting Roll: Will.
Range: Unlimited.
Duration: 30 minutes.

The subject's reflection disappears from mirrors, pools, etc. for 30 minutes.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Supernatural Features (No Reflection), +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [33].

Remove Shadow

Keywords: Resisted (Will).
Full Cost: 33 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 30 minutes.

The subject's shadow disappears for 30 minutes.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Supernatural Features (No Shadow), +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [33].

Reorient

Keywords: None.
Full Cost: 8 points.
Casting Roll: None.
Range: Self.
Duration: Instantaneous.

This spell acts like the Body Sense skill (p. B181), but does not require a roll.

Statistics: Body Sense (H) DX [4] modified with Cosmic, No die roll required, +100%, Sorcery, -15% for a final cost of 8 points.

Repair

Keywords: None.
Full Cost: 17 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By making physical contact with an object, you may restore it 1d HP. If used more than once per day on a given object, you are at a cumulative -3 per successful restoration. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only objects, -10%; Capped, 2 FP, -25%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [17]. *Note:* The 4 HP of healing has been converted to dice per p. B269.

Repair Arrow

Keywords: None.
Full Cost: 6 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By making physical contact with an arrow, you may restore it. At least 80% of the arrow must be available, including the head. The spell will produce a totally straight shaft, properly feathered, with a sharp head - as good as new, or slightly better. If used more than once per day on a given arrow, you are at a cumulative -3 per successful restoration. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only arrows, -60%; Capped, 1 FP, -30%; Injuries Only, -20%; Magical, -10%) [6].

Repair Glass

Keywords: None.

Full Cost: 6 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By making physical contact with a glass or obsidian object, you may restore it 1d HP. If used more than once per day on a given object, you are at a cumulative -3 per successful restoration. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only glass or obsidian objects, -45%; Capped, 2 FP, -25%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [6]. *Note:* The 4 HP of healing has been converted to dice per p. B269.

Repair Metal

Keywords: None.

Full Cost: 11 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By making physical contact with a metal object, you may restore it 1d HP. If used more than once per day on a given object, you are at a cumulative -3 per successful restoration. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only metal objects, -30%; Capped, 2 FP, -25%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 1, +20%) [11]. *Note:* The 4 HP of healing has been converted to dice per p. B269.

Repel

Keywords: Area (Leveled).

Full Cost: 52 points for level 1 + 12.5 points/additional level* (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You can create a zone of repulsion anywhere within 100 yards of you. To place the zone at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. An intangible force moves objects within the area without touching them. The force can move any object it has strength enough to lift, at a Move equal to your Repel ST, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17).

Repel can only move things directly from its center. It simply causes objects to move until they're in contact with the border of the spell's area, whereupon they are free to move or they're held there against a hard obstacle with Repel's telekinetic ST until the duration runs out. Objects can only move or be moved in the opposite direction if the mover wins a Quick Contest of his ST or TK level against your Repel ST.

The basic (52-point) version of this spell lets you affect an area up to 2 yards across and has ST 5. Each additional doubling of area adds 12.5 to basic cost; the GM sets the cap on this increase, but 128

yards is the recommended maximum. For an additional +100% to cost (including any increased area), rounded up, the ST can be upgraded to 10 or more. This is summarized in the table below.

Repel ST	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
5	52 points	64 points	77 points	89 points	102 points	114 points	127 points
10	103 points	128 points	153 points	178 points	203 points	228 points	253 points
15	154 points	192 points	229 points	267 points	304 points	342 points	379 points
20	205 points	255 points	315 points	355 points	415 points	465 points	515 points

Statistics: Telekinesis 5 (Area Effect, 2 yards, +50%; Extended Duration on Persistent, 3x, +20%; Increased Range, 10x, +30%; Independent, +40%; Persistent, +40%; Repulsion, -60%; Sorcery, -15%) [52]. Additional levels add more Area Effect (+50%) to the advantage [+12.5*].

* Calculate the total cost, then round *down*.

Repel Amphibians

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Amphibians with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each amphibian's IQ, in practice the GM should bother only for extraordinary amphibians. If so, victory allows the amphibian to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Amphibians Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Repel Arachnids

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Arachnids with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each arachnid's IQ, in practice the GM should bother only for extraordinary arachnids. If so, victory allows the arachnid to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Arachnids Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Repel Birds

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Birds with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each bird's IQ, in practice the GM should bother only for extraordinary birds. If so, victory allows the bird to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Birds Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Repel Crustaceans

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Crustaceans with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each crustacean's IQ, in practice the GM should bother only for extraordinary crustaceans. If so, victory allows the crustacean to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Crustaceans Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Repel (Ethical Category)

Keywords: Area (Leveled).

Full Cost: 42 points for level 1 + 12.5 points/additional level* (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You can create a zone of repulsion that repels creatures of a particular ethical category (evil, chaos, good, order, etc.) anywhere within 100 yards of you. To place the zone at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. An intangible force moves objects within the area without touching them. The force can move any being of the chosen ethical category it has strength enough to lift, at a Move equal to your Repel ST, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17).

Repel (Ethical Category) can only move things directly from its center. It simply causes objects to move until they're in contact with the border of the spell's area, whereupon they are free to move or they're held there against a hard obstacle with Repel's telekinetic ST until the duration runs out. Objects can only move or be moved in the opposite direction if the mover wins a Quick Contest of his ST or TK level against your Repel ST.

The basic (42-point) version of this spell lets you affect an area up to 2 yards across and has ST 5. Each additional doubling of area adds 12.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +100% to cost (including any increased area), rounded up, the ST can be upgraded to 10 or more. This is summarized in the table below.

Repel ST	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
5	42 points	54 points	67 points	79 points	92 points	104 points	117 points
10	83 points	108 points	133 points	158 points	183 points	208 points	233 points
15	124 points	162 points	199 points	237 points	274 points	312 points	349

							points
20	165 points	215 points	265 points	315 points	365 points	415 points	465 points

Statistics: Telekinesis 5 (Accessibility, Ethical Category, -40%; Area Effect, 2 yards, +50%; Extended Duration on Persistent, 3x, +20%; Increased Range, 10x, +30%; Independent, +40%; Persistent, +40%; Repulsion, -60%; Sorcery, -15%) [42]. Additional levels add more Area Effect (+50%) to the advantage [+12.5*].

* Calculate the total cost, then round *down*.

Repel Fish

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 37 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Fish with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each fish's IQ, in practice the GM should bother only for extraordinary fish. If so, victory allows the fish to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Fish Only, -50%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [37]. Additional levels add Area Effect (+50%) [+5].

Repel Hybrids

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 46 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 50 minutes.

Hybrid creatures (*GURPS Magic*, p. 19) become unwilling to enter the area; any already within the area leave immediately. You may exclude specific, known hybrids or even broad classes of hybrids from the effects. You may also reduce the area effect if you wish to.

While this spell is technically resisted by each hybrid's IQ, in practice the GM should bother only for extraordinary hybrids. If so, victory allows the hybrid to remain within the area for three minutes, after which it must roll again.

Statistics: Affliction 1 (IQ; Accessibility, Hybrids Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 100x, +80%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Selective Area, +20%; Sorcery, -15%) [46]. Additional levels add Area Effect (+50%) [+5].

Repel Mammals

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Mammals with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each mammal's IQ, in practice the GM should bother only for extraordinary mammals. If so, victory allows the mammal to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Mammals Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Repel Metal

Keywords: Area (Leveled).

Full Cost: 42 points for level 1 + 12.5 points/additional level* (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You can create a zone of metal repulsion anywhere within 100 yards of you. To place the zone at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. An intangible force moves metal objects within the area without touching them. The force can move any metal object it has strength enough to lift, at a Move equal to your Repel Metal ST, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17).

Repel Metal can only move things directly from its center. It simply causes metal objects to move until they're in contact with the border of the spell's area, whereupon they are free to move or they're held there against a hard obstacle with Repel Metal's telekinetic ST until the duration runs out. Objects can only move or be moved in the opposite direction if the mover wins a Quick Contest of his ST or TK level against your Repel Metal ST.

The basic (42-point) version of this spell lets you affect an area up to 2 yards across and has ST 5. Each additional doubling of area adds 12.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +100% to cost (including any increased area), rounded up, the ST can be upgraded to 10 or more. This is summarized in the table below.

Repel ST	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
5	42 points	54 points	67 points	79 points	92 points	104 points	117 points
10	83 points	108 points	133 points	158 points	183 points	208 points	233 points
15	124 points	162 points	199 points	237 points	274 points	312 points	349 points
20	165 points	215 points	265 points	315 points	365 points	415 points	465 points

Statistics: Telekinesis 5 (Accessibility, Metal, -40%; Area Effect, 2 yards, +50%; Extended Duration on Persistent, 3x, +20%; Increased Range, 10x, +30%; Independent, +40%; Persistent, +40%; Repulsion, -60%; Sorcery, -15%) [42]. Additional levels add more Area Effect (+50%) to the advantage [+12.5*].

* Calculate the total cost, then round *down*.

Repel Mollusks

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 37 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Mollusks with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each mollusk's IQ, in practice the GM should bother only for extraordinary mollusks. If so, victory allows the mollusk to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Mollusks Only, -50%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration,

+0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [37]. Additional levels add Area Effect (+50%) [+5].

Repel Protozoa

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 35 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Protozoa with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each protozoan's IQ, in practice the GM should bother only for extraordinary protozoa. If so, victory allows the protozoan to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Protozoa Only, -70%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [35]. Additional levels add Area Effect (+50%) [+5].

Repel Reptiles

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 seconds.

Reptiles with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each reptile's IQ, in practice the GM should bother only for extraordinary reptiles. If so, victory allows the reptile to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Reptiles Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Repel Spirits

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 46 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 50 minutes.

Spirits become unwilling to enter the area; any already within the area leave immediately. You may exclude specific, known spirits or even broad classes of spirits from the effects; e.g., "The spell affects every spirit except for four banshees here." You may also reduce the area effect if you wish to.

While this spell is technically resisted by each spirit's IQ, in practice the GM should bother only for extraordinary spirits. If so, victory allows the spirit to remain within the area for three minutes, after which it must roll again.

Statistics: Affliction 1 (IQ; Accessibility, Spirits Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 100x, +80%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Selective Area, +20%; Sorcery, -15%) [46]. Additional levels add Area Effect (+50%) [+5].

Repel Stone

Keywords: Area (Leveled).

Full Cost: 42 points for level 1 + 12.5 points/additional level* (or more).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You can create a zone of stone repulsion anywhere within 100 yards of you. To place the zone at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. An intangible force moves stone objects within the area without touching them. The force can move any stone object it has strength enough to lift, at a Move equal to your Repel Stone ST, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17).

Repel Stone can only move things directly from its center. It simply causes stone objects to move until they're in contact with the border of the spell's area, whereupon they are free to move or they're held there against a hard obstacle with Repel Stone's telekinetic ST until the duration runs out. Objects can only move or be moved in the opposite direction if the mover wins a Quick Contest of his ST or TK level against your Repel Stone ST.

The basic (42-point) version of this spell lets you affect an area up to 2 yards across and has ST 5. Each additional doubling of area adds 12.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +100% to cost (including any increased area), rounded up, the ST can be upgraded to 10 or more. This is summarized in the table below.

Repel ST	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
5	42 points	54 points	67 points	79 points	92 points	104 points	117 points
10	83 points	108 points	133 points	158 points	183 points	208 points	233 points
15	124 points	162 points	199 points	237 points	274 points	312 points	349 points
20	165 points	215 points	265 points	315 points	365 points	415 points	465 points

Statistics: Telekinesis 5 (Accessibility, Stone, -40%; Area Effect, 2 yards, +50%; Extended Duration on Persistent, 3x, +20%; Increased Range, 10x, +30%; Independent, +40%; Persistent, +40%; Repulsion, -60%; Sorcery, -15%) [42]. Additional levels add more Area Effect (+50%) to the advantage [+12.5*].

* Calculate the total cost, then round *down*.

Repel Undead

Keywords: Area (Leveled).

Full Cost: 31 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite. Undead who flee will remain affected for 15 hours.

This spell creates a powerful compulsion within undead creatures, prompting them to avoid the caster. Every undead creature in the area must roll against Will+DR every second; this is an unopposed roll, not a Quick Contest. If that roll fails, that undead creature immediately flees from the caster and will not approach him again for the next 15 hours. The area is centered around the caster and moves with him.

Statistics: Affliction 1 (HT; Accessibility, Undead only, -50%; Area Effect, 2 yards, +50%; Aura, +80%; Based on Will, +20%; Disadvantage, Dread, +30%; Extended Duration, 300x, +100%; Fixed Duration, +0%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [31]. Additional levels add Area Effect (+50%) [+5].

Repel Vermin

Keywords: Area (Leveled), Resisted (IQ).

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Will.
Range: Unlimited.
Duration: 30 seconds.

Vermin (insects, worms, and other creepy-crawly things) with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each vermin's IQ, in practice the GM should bother only for extraordinary vermin. If so, victory allows the vermin to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Vermin Only, -40%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [38]. Additional levels add Area Effect (+50%) [+5].

Repel Wood

Keywords: Area (Leveled).
Full Cost: 42 points for level 1 + 12.5 points/additional level* (or more).
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 seconds.

You can create a zone of wood repulsion anywhere within 100 yards of you. To place the zone at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. An intangible force moves wooden objects within the area without touching them. The force can move any wooden object it has strength enough to lift, at a Move equal to your Repel Wood ST, modified as usual for encumbrance level (see *Encumbrance and Move*, p. B17).

Repel Wood can only move things directly from its center. It takes a Ready maneuver to move an unresisting object, or an Attack maneuver to affect an active opponent. Repel Wood can't strike blows, manipulate objects, or hold an enemy in place or prevent him from attacking. It simply causes wooden objects to move until they're in contact with the border of the spell's area, whereupon they are free to move or they're held there against a hard obstacle with Repel Wood's telekinetic ST until the duration runs out. Objects can only move or be moved in the opposite direction if the mover wins a Quick Contest of his ST or TK level against your Repel Wood ST.

The basic (42-point) version of this spell lets you affect an area up to 2 yards across and has ST 5. Each additional doubling of area adds 12.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +100% to cost (including any increased area), rounded up, the ST can be upgraded to 10 or more. This is summarized in the table below.

Repel ST	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
5	42 points	54 points	67 points	79 points	92 points	104 points	117 points
10	83 points	108 points	133 points	158 points	183 points	208 points	233 points
15	124 points	162 points	199 points	237 points	274 points	312 points	349 points
20	165 points	215 points	265 points	315 points	365 points	415 points	465 points

Statistics: Telekinesis 5 (Accessibility, Wood, -40%; Area Effect, 2 yards, +50%; Extended Duration on Persistent, 3x, +20%; Increased Range, 10x, +30%; Independent, +40%; Persistent, +40%; Repulsion, -60%; Sorcery, -15%) [42]. Additional levels add more Area Effect (+50%) to the advantage [+12.5*].

* Calculate the total cost, then round *down*.

Repel Worms

Keywords: Area (Leveled), Resisted (IQ).
Full Cost: 37 points for level 1 + 5 points/additional level.

Casting Roll: Will.
Range: Unlimited.
Duration: 30 seconds.

Worms with racial IQ 1-5 become unwilling to enter the area; any already within the area leave immediately.

While this spell is technically resisted by each worm's IQ, in practice the GM should bother only for extraordinary worms. If so, victory allows the worm to remain within the area.

Statistics: Affliction 1 (IQ; Accessibility, Worms Only, -50%; Area Effect, 2 yards, +50%; Based on IQ, +20%; Disadvantage, Dread, +30%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%) [37]. Additional levels add Area Effect (+50%) [+5].

Repress Memory

Keywords: None.
Full Cost: 2 points.
Casting Roll: Will.
Range: Self.
Duration: Instantaneous.

This spell allows you to safeguard important knowledge, even from yourself. When casting this spell, you recount particular memories. These memories disappears utterly from your mind, and you might not realize you forgot something. The magic of the spell patches omissions in your memory with indistinct haze. If the caster wishes, he may wipe all his memories, granting himself Total Amnesia (p. B123). This memory can only be restored by the Restore Memory spell. The casting roll is at -1 per additional attempt per hour.

Statistics: Controllable Disadvantage (Total Amnesia; Based on Will, Own Roll, +20%; Selective Effect, +20%; Sorcery, -15%) [2].

Reptile Control

Keywords: Resisted (Will).
Full Cost: 23 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: Special.

You can take control of any single reptile – or of one square yard of a swarm of smaller reptiles. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only reptiles with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for reptiles with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Reptiles only, -40%; Sorcery, -15%) [23].

Reshape

Keywords: None.
Full Cost: 28.5 points/level*.
Casting Roll: IQ.
Range: 100 yards.

Duration: Indefinite.

You can shape and move any solid unliving substances. The higher your level of Reshape, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of matter in the form of a single object or amorphous mass. For example, Reshape 3 would let you affect a 90-lb. stone slab or even 90 lbs. of pebbles in a heap . . . but against a foe with a 8-lb. metal sword and a 15-lb. stone shield you could only affect one target, even though the total weight is much less than your limit.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Reshape level. This requires constant concentration. You can make a solid object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Reshape lets you move or shape solid matter to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a stone slab into armor with the DR of stone by making an Armoury roll.

Offensively, Reshape is more limited. By concentrating, you can move an existing solid object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control solid matter, – or if you can move solid matter onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Reshape 10 might cause a mini-earthquake if your foe is standing on the solid floor good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Solids (Accessibility, Only to shape and move solids, -30%; Ranged, +40%; Sorcery, -15%) [28.5/level*].

* Calculate the total cost then round up.

Resilient Armor

Keywords: Armor Buff.

Full Cost: 36 points or 60 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes the armor repair its structural damage. The basic (36-point) version of this spell negates the Semi-Ablative limitation (p. B47) and reduces the Ablative limitation to Semi-Ablative. The improved (60-point) version removes the Ablative limitation entirely. This won't restore points of DR lost while the Resilient Armor skill wasn't active.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Resilient Armor, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Resilient Armor" is 26 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). The improved version removes -3 in penalties [+24]. This spell is based on the Resilient Armor imbue skill from *Pyramid #3-4*.

Resilient Sphere

Keywords: Resisted (DX or other).

Full Cost: 41 points.

Casting Roll: Will.
Range: Unlimited.
Duration: 1 minute.

A globe of shimmering force encloses a creature, just like a spherical Force Dome. The sphere contains its subject for the spell's duration. Unlike Force Dome, this barrier allows air to pass, so the subject may breathe freely.

The subject may struggle, but the sphere cannot be physically moved either by people outside it or by the struggles of those within. The subject is protected by the sphere – the sphere has DR 6.

Most targets resist by moving fast enough to get out – use the higher of DX or *twice* Basic Speed. Someone capable of an active defense involving teleportation or insubstantiality may choose to rely on that instead; this is a resistance roll using the controlling score, not an active defense roll. Magic Resistance always subtracts from the caster's skill, but it adds only to the subject's DX- or Speed-based resistance.

Statistics: Affliction 1 (DX or other; Based on DX, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Paralysis, Variant, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [41].

Resilient Vegetation

Keywords: Area (Leveled).
Full Cost: 56 points for level 1 + 5 points/additional level (or more).
Casting Roll: Will.
Range: Unlimited.
Duration: 30 minutes.

Cast on an area, this spell protects all plants within its borders. The sorcerer may pick and choose which plants (either individually or by type) receive the protection. Every protected plant gains DR 5, cumulative with any natural DR or armor.

More potent versions of this spell are available that also increase the mobile plants' Dodge scores, as show below.

Dodge Bonus	Full Cost
0	56 points for level 1 + 5 points/additional level
+1	70 points for level 1 + 5 points/additional level
+2	83 points for level 1 + 5 points/additional level
+3	97 points for level 1 + 5 points/additional level

Statistics: Affliction 1 (HT; Accessibility, Plants only, -50%; Advantages, DR 5 (Magical, -10%), +230%; Area Effect, 2 yards, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selective Area, +20%; Sorcery, -15%) [56]. Additional levels add Area Effect (+50%) [+5]. Variants add Advantage, Enhanced Dodge 1 (Magical, -10%) (+140%) [+14]; Advantage, Enhanced Dodge 2 (Magical, -10%) (+270%) [+27]; or Advantage, Enhanced Dodge 3 (Magical, -10%) (+410%) [+41].

Resist Air

Keywords: Buff.
Full Cost: 85 points for level 1 + 60 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject becomes virtually immune to air attacks. He and all of his gear have DR equal to (spell level)x10 against air and wind – including not only Missile and Jet spells, but also to effects and spells that bypass normal DR to cause direct, internal damage, such as attacks that steal breath and deal FP damage by draining air from the lungs. In addition, subtract this DR from the damage for the purpose

of determining knockback. Resistible air effects other than damage (e.g., a spell that paralyzes the subject with winds or causes embolism) simply fail, as though the subject had successfully resisted.

Statistics: Affliction 1 (HT; Advantage, Resist Air 1, +690%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [85]. Additional levels add further Resist Air to Advantage (+600%) [+60]. *Notes:* "Resist Air 1" is Damage Resistance 10 (Absorbs Knockback, +40%; Force Field, +20%; Limited, Air/Wind, -40%; Magical, -10%) [55] + Immunity to Noxious Air Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Air/Wind, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+60].

Resist Cold (Unofficial Sorcery Errata)

Keywords: Buff.

Full Cost: 65 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject becomes virtually immune to cold. He and all of his gear have DR equal to (spell level)x10 against cold and ice – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible cold effects other than damage (e.g., a spell that freezes the flesh to grant the subject Brittle) simply fail, as though the subject had successfully resisted. This spell does *not* grant the subject Temperature Tolerance.

Statistics: Affliction 1 (HT; Advantage, Resist Cold 1, +490%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [65]. Additional levels add further Resist Cold to Advantage (+400%) [+40]. *Notes:* "Resist Cold 1" is Damage Resistance 10 (Force Field, +20%; Limited, Cold/Ice, -40%; Magical, -10%) [35] + Immunity to Noxious Cold Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Cold/Ice, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+40]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Resist Corrosion

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

All of the subject's DR (his armor, tough hide, etc.) is immune to being eroded away by acid. This does *not* protect against actual injury.

Statistics: Affliction 1 (HT; Advantage, Resist Corrosion, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Resist Corrosion" is Internal Sealed (Acid-Resistant Only, -60%; Magical, -10%) [1] + Sealed (Acid-Resistant Only, -60%; Force Field, +20%; Magical, -10%) [8].

Resist Earth

Keywords: Buff.

Full Cost: 65 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject becomes resistant to damage from earth and stone. He and all of his gear have DR equal to (spell level)x10 against earth and stone – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible earth effects other than damage

(e.g., the Earthbind spell or a blinding effect of the Sand Jet spell) simply fail, as though the subject had successfully resisted.

Statistics: Affliction 1 (HT; Advantage, Resist Earth 1, +490%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [65]. Additional levels add further Resist Earth to Advantage (+400%) [+40]. *Notes:* "Resist Earth 1" is Damage Resistance 10 (Force Field, +20%; Limited, Earth/Stone, -40%; Magical, -10%) [35] + Immunity to Noxious Earth Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Earth/Stone, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+40]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Resist Enchantment

Keywords: Buff.

Full Cost: 28 points or 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell lets the item resist enchanting. The basic (28-point) version of this spell gives any enchanter attempting to enchant the affected item a -3 penalty to his enchanting rolls. The improved (30-point) version increases the penalty to -8.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Resist Enchantment, +50%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Notes:* "Resist Enchantment" is Resistant to Enchantment (+3) (Magical, -10%) [5]. Improved version increases the bonus to +8 [+2].

Resist Energy

Keywords: Buff.

Full Cost: 61 points for level 1 + 45 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell gives the subject and everything he carries an extra DR 10 against any sort of FP or HP damage incurred from energy, whether from a direct attack or an environmental effect.

Statistics: Affliction 1 (HT; Advantage, Resist Energy 1, +450%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [61]. Each additional level adds more levels of Resist Energy to the Advantage (+450%) [+45]. *Note:* Each level of "Resist Energy" is DR 10 (Force Field, +20%; Limited, Energy, -20%; Magical, -10%) [45].

Resist Fire (Unofficial Sorcery Errata)

Keywords: Buff.

Full Cost: 65 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject becomes virtually immune to fire. He and all of his gear have DR equal to (spell level)x10 against fire and heat – including not only Missile and Jet spells, but also spells that bypass normal DR to cause direct, internal damage. Resistible cold effects other than damage (e.g., a spell that burns out the eyes to blind the subject) simply fail, as though the subject had successfully resisted. This spell does *not* grant the subject Temperature Tolerance.

Statistics: Affliction 1 (HT; Advantage, Resist Fire 1, +490%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [65]. Additional levels add further Resist Fire to Advantage (+400%) [+40]. *Notes:* "Resist Fire 1" is Damage Resistance 10

(Force Field, +20%; Limited, Fire/Heat, -40%; Magical, -10%) [35] + Immunity to Noxious Fire Effects (Magical, -10%) [9] + Internal Damage Resistance 10 (Limited, Fire/Heat, -40%; Magical, -10%) [5]. Further levels increase both DRs by 10 [+40]. See *GURPS Sorcery: Protection and Warning Spells*, p. 11 for internal defenses.

Resist Gravity

Keywords: Buff.

Full Cost: 17 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject, and all of his carried gear, is protected from gravity-based attacks, such as the Gravity Crush spell or the graviton beams (p. UT129). This increases his DR by the level of this spell (e.g., Resist Gravity 3 adds DR 3), cumulative with that from actual armor. This DR protects even against Malediction-based attacks.

Statistics: Affliction 1 (HT; Advantage, Resist Gravity 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Resist Gravity to the Advantage enhancement [+5]. *Note:* Each level of “Resist Gravity” is Damage Resistance 1 (Force Field, +20%; Limited, Gravity, -60%; Magical, -10%; Malediction-Proof, +50%) [5].

Resist Pain

Keywords: Buff.

Full Cost: 39 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject ignores shock, knockdown, physical stun, physical torture, and painful or stunning afflictions.

Statistics: Affliction 1 (HT; Advantage, Resist Pain, +270%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Note:* “Resist Pain” is Immunity to Pain (Magical, -10%) [27].

Resist Plasma

Keywords: Buff.

Full Cost: 41 points for level 1 + 25 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell gives the subject and everything he carries an extra DR 10 against damage incurred from plasma, whether from a direct attack or an environmental effect, per level of this spell.

Statistics: Affliction 1 (HT; Advantage, Plasma Resistance 1, +250%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [41]. *Note:* Each level of “Plasma Resistance” is DR 10 (Force Field, +20%; Limited, Plasma, -60%; Magical, -10%) [25].

Restoration

Keywords: None.

Full Cost: 32 points.

Casting Roll: IQ.

Range: Touch.

Duration: 1 month.

By making physical contact with a subject, you may infuse his crippled but whole limb or organ with restorative energies. You may heal subjects of your own race and any “similar” races (GM’s call); e.g., a human can heal other humans but not dogs or plants. All injury that crippled the limb or organ in question is healed after 1 month. The part may not be used at all until the month has passed; it simply won’t work, even though it may appear to be healthy. Each healer gets only one attempt per crippled limb. This spell cannot restore lost limbs.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only to restore crippled limbs and organs, -40%; Affects Self, +50%; Capped, 5 FP, -15%; Injuries Only, -20%; Magical, -10%; Onset, 1 month, -40%; Reduced Fatigue Cost 4, +80%) [32].

Restorative Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes the armor protect the wearer from essence draining effects. The armor’s DR against fatigue damage is multiplied, as shown on the table below, and the armor applies a part of its DR even against fatigue attacks that usually *bypass* armor.

Level	DR
1	x2 (1/4, if damage bypasses armor)
2	x3 (1/2, if damage bypasses armor)
3	x4 (x1, if damage bypasses armor)

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Restorative Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Restorative Armor” is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Restorative Armor imbue skill from *Pyramid #3-4*.

Restore

Keywords: Buff.

Full Cost: 11 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Temporarily makes a broken inanimate object look as good as new. Other senses will not be fooled, nor will Mage Sight.

Statistics: Affliction 1 (HT; Accessibility, Only on broken objects, -20%; Advantage, Restore, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11]. *Note:* “Restore” is No Visible Damage (Magical, -10%) [1].

Restore Hearing

Keywords: Buff.

Full Cost: 35 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Temporarily restores the subject's hearing, regardless of what caused the loss. The eardrums or other organs of hearing must not be completely missing.

Statistics: Affliction 1 (HT; Accessibility, Eardrums must not be completely missing, -10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Deafness, +200%; No Signature, +20%; Sorcery, -15%) [35].

Restore Mana

Keywords: Area (Leveled).

Full Cost: 370 points for level 1 + 50 points/additional level.

Casting Roll: None. Special casting time (see below).

Range: Self.

Duration: Truly Permanent.

The caster performs a ritual that requires one hour of unbroken concentration, and restores mana in a no-mana zone, making it possible to cast spells within it. This spell increases the mana level in the area around the caster by up to two steps, but it cannot bring the mana level higher than the "average" mana level of the surrounding area, regardless of what it might have been before. The area of effect stays stable with respect to the earth, but not to objects. Thus, if the spell is cast in a moving vehicle, the effect will stay at its point of origin, rather than moving with the vehicle.

This is a Truly Permanent effect that cannot be dispelled, lifted with Remove Curse, or displaced with Displace Spell. Unlike other spells, Restore Mana itself is not affected by the ambient mana level and can be cast when there is no mana at all.

For details, see *Mana* (p. B235) and *Mana (GURPS Thaumatology: Sorcery*, p. 23).

Statistics: Mana Enhancer 2 (Accessibility, Only to restore dead magic zones, -30%; Area Effect, 2 yards, +50%; Extended Duration, Truly Permanent, +300%; Immediate Preparation Required, 1 hour, -75%; Nuisance Effect, Cannot bring the mana level higher than the "average", -10%; Persistent, +40%; Sorcery, -10%; Variable, Area, +5%) [370]. Additional levels add Area Effect (+50%) [+50]. *Note:* The Sorcery limitation costs -10% because the dependency on ambient mana is lifted for this spell.

Restore Memory

Keywords: Resisted (Will).

Full Cost: 83 points.

Casting Roll: IQ. Use IQ (again) or Brainwashing to remove disadvantages.

Range: Unlimited.

Duration: Permanent.

You can permanently restore subject's memory. If the subject is willing, no resistance roll is needed. If not, he resists with Will and must be completely immobilized or otherwise under your control while you cast the spell. Successful casting gets you inside of his head, where you can "see" his lost memories; the GM will reveal his Amnesia disadvantages or memories lost to other effects and spells. You must then win a second Quick Contest of IQ vs. Will – or make another unopposed IQ roll, for a willing subject – at -1 for every full -5 points in disadvantages you wish to remove. You may substitute Brainwashing for IQ, if better.

Statistics: Mind Control (Accessibility, Only to restore memories, -20%; Conditioning Only, -50%; Extended Duration, Permanent, +150%; Fixed Duration, +0%; Sorcery, -15%) [83].

Restore Metal

Keywords: Resisted (Will or spell).

Full Cost: 10 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to reverse the effects of the Rust spell or any natural rust. Treat the resistance roll as for Dispel Magic (see *GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Interruption, -50%; One Ability, Rust, -80%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [10].

Restore Sight

Keywords: Buff.

Full Cost: 65 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Temporarily restores the subject's sight, regardless of what caused the loss. The eyes must not be completely missing.

Statistics: Affliction 1 (HT; Accessibility, Eye must not be completely missing, -10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Blindness, +500%; No Signature, +20%; Sorcery, -15%) [65].

Restore Speech

Keywords: Buff.

Full Cost: 40 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Temporarily restores the subject's speech, regardless of what caused the loss. The tongue and vocal cords cannot be completely missing.

Statistics: Affliction 1 (HT; Accessibility, Tongue and vocal cords must not be completely missing, -10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; Negated Disadvantage, Mute, +250%; No Signature, +20%; Sorcery, -15%) [40].

Resurrection

Keywords: Buff.

Full Cost: 230 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 1 minute.

You can bring a formerly living creature back from the dead, if his body is not completely destroyed (-10xHP or worse). You must touch the corpse to affect it. If the subject does not want to come back (GM's opinion, for NPCs), the spell fails automatically. This subject recovers 60 HP in 1 minute – if this brings him back above -HP before the duration ends, he returns to life! But if it's not enough, or if the initial HT roll fails, he cannot be resurrected.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Advantage, Resurrection, +2,250%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [230]. *Notes:* "Resurrection" is Regeneration (Very Fast; Cosmic, Works on the dead, +50%) [150] + Unkillable 1 (Cosmic, Works on the dead, +50%) [75]. This version of Cosmic means it *only* works on the dead – not injured living creatures – and gives one try, ever.

Resuscitate

Keywords: Resisted (HT).

Full Cost: 123 points.

Casting Roll: IQ. Use DX or unarmed attack skills to hit.

Range: Touch.

Duration: Instantaneous.

You touch the subject and restart his heart or lungs, if he is suffering from asphyxiation, drowning, or heart attack. This requires a successful IQ roll and costs 1 FP. Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

When used on a living person whose heart and lungs are functioning, this spell is deadly. The jolt deals 4d damage, ignoring DR, if the subject fails to resist. The subject makes a HT roll at -1 per full 2 HP lost. On a failure he falls unconscious for (20 – HT) minutes. Failure by 5 or more, or a critical failure, results in a heart attack, as per p. B429.

Statistics: Healing (Accessibility, Only to stop drowning, asphyxiation, or heart attack, -60%; Affects Self, +50%; Affliction Only, -40%; Magical, -10%; Reduced Fatigue Cost 11, +220%; Xenohealing, Anything Alive, +80%) [102] + Crushing Attack 4d (Accessibility, Only on living creatures not dying from drowning, asphyxiation, or heart attack, -5%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Melee Attack, Reach C, Cannot Parry -35%; Malediction 1, +100%; No Knockback, -10%; No Signature, +20%; Side Effect, Unconsciousness, secondary Heart Attack, +310%; Sorcery, -15%) [101/5=21]. *Note:* These two abilities are bought as Alternative Abilities.

Retch

Keywords: Resisted (HT).

Full Cost: 28 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 9 seconds.

The subject loses his lunch, retching for 9 seconds (see *Incapacitating Conditions*, p. B428). After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Retching, +50%; Sorcery, -15%) [28].

Retribution

Keywords: Buff.

Full Cost: 60 points for level 1 + 49 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: One minute or until triggered.

The next time the subject is struck by an attack that does not ignore DR to deal internal damage (such as most Malediction spells), the attacker loses the same amount of HP, regardless of his DR or other defensive advantages. This instantly ends the spell, even if the attack failed to injure the subject.

However, there is one condition. The attack's basic damage must be less than (Retribution level)x2 dice. For example, Retribution 3 would redirect damage from an attack up to 6d while allowing those of 6d+1 or higher through (an attack that is too strong to be reflected does *not* end the spell). Convert all flat damage to dice (as per p. B269) for this determination.

Statistics: Affliction 1 (HT; Advantage, Retribution 1, +490%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [60]. Additional levels add further Retribution to the Advantage enhancement [+49]. *Notes:* Each level of "Retribution" is Damage Resistance 7 (All-or-Nothing, -10%; Cosmic, Irresistible Attack, +300%; Cosmic, No Active Defense Allowed, +300%; Force Field, +20%; Magical, -10%; Provides no DR, -100%; Reflection, +100%; Single Use, x0.2) [49] with each DR 7 converted into 2d per p. B269.

Retro-Reading

Keywords: Information.

Full Cost: 11 points.

Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

This spell lets the caster receive an impression of the last person to read a particular book, or passage in a book, which must be read by the mage during the casting.

To cast Retro-Reading, you must touch the writing, concentrate for one second, and make an IQ roll. This roll is at no penalty for an event that occurred the same day, -1 for one that occurred up to 10 days ago, -2 if up to 100 days ago, -3 if up to 1 year ago, -4 if up to 30 years ago, -5 if up to 300 years ago, and so on.

On a success, you receive the general impression of the last person to read the writing, but this spell does not reveal any names. On a critical success, you experience an actual vision. No matter how well you roll, you cannot detect magic, spirits, etc.

On a failure, you receive no impressions at all, and cannot attempt to read that writing again for 24 hours.

Statistics: Psychometry (Accessibility, Only books, -40%; Active Only, -20%; Sensitive, +30%; Sorcery, -15%) [11].

Retrogression

Keywords: Resisted (HT or Will).
Full Cost: 95 points.
Casting Roll: Will.
Range: 100 yards.
Duration: Instantaneous or 3 minutes.

Causes a subject to re-experience an event from his past life (or lives!). This can be a torment or as a boon. Different kinds of memories have different effects. A terrifying memory requires a Fright Check at -3 or more; the memory of one's violent death, for example (in a campaign where Resurrection is possible), requires a Fright Check at -5 (but no more). The memory of a wound or illness requires a HT roll; failure stuns the subject. A memory of slavery or degradation reduces Will by 1 for 3 minutes unless a Will roll is made. A memory of personal triumph and power increases Will by 1 for 3 minutes. The GM judges the effects of any other type of memory, but it should not impose a disadvantage worth more than -10 points or an advantage worth more than 5 points. The caster only specifies the type of event to be relived; he cannot use this spell to "rummage" through the memories of the subject.

Statistics: Alternative Abilities [95]: Affliction 1 (Will or HT; Accessibility, Must be related to a memory, -20%; Advantage, Variable, +50%; Based on Will, +20%; Disadvantage, Variable, +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Selectivity, +10%; Sorcery, -15%) [33/5=7] + Terror 5 (Accessibility, Penalty depends on the severity of the memory, -30%; Active, +0%; Increased Range, 10x, +30%; Presence, +25%; Sorcery, -15%) [88].

Return Missile

Keywords: None.
Full Cost: 47.25 points/level.
Casting Roll: IQ/2 + 3
Range: Self.
Duration: Instantaneous.

While this spell is active, the caster can reflect incoming missiles back to the attackers. When the caster is targeted by a ranged attack, they may roll to cast this spell as an active defense. If the spell succeeds, and if the attack's basic damage is less than (Return Missile level) x 2 dice, the attack is reflected at the attacker. Convert all flat damage to dice (as per p. B269) for this determination.

An attacker unaware that this spell is in place must roll against the lower of IQ or Per, at +3 for Danger Sense and +3 for Combat Reflexes, to realize it in time to get a defense. If the attacker is not

physically present at the time of the attack, the missiles are just deflected harmlessly. Do not roll damage or apply special effects until after determining who (if anyone) is hit.

This spell protects against all types of damaging ranged attacks, from thrown weapons to energy-beam spells. It also deflects non-damaging ranged attacks; each level of Return Missile can negate two levels of Affliction or 10 levels of Binding. It doesn't stop most area effects or explosions, though it *does* deflect fragmentation damage (shrapnel). The latter is reflected away harmlessly, since it originated from the explosion, not the attacker.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Return Missile, they cannot cast this spell until *all* FP are replenished.

Statistics: Damage Resistance 7 (Active Defense, -40%; All-or-Nothing, -10%; Force Field, +20%; Limited, Ranged, -20%; Reflection, +100%; Sorcery, -15%) [47.25/level] with each DR 7 converted into 2d per p. B269. The ruling on Affliction and Binding is from p. 168 of *GURPS Powers*.

Returning Weapon

Keywords: Weapon Buff.

Full Cost: 40 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Projectiles fired by the affected weapon dematerialize and reform in your possession. When cast on a thrown weapon, it appears directly in your hands, and ammo appears – intact – in your quiver, magazine, or equivalent. Any single-use effect on the projectile is still expended, though. If the weapon has RoF greater than 1, then the number of returned projectiles is equal to the spell level.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Returning Weapon 1, +260%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [40]. Each additional level adds more Returning Weapon to the Advantage enhancement (+80%) [+8]. *Notes:* "Returning Weapon 1" is 26 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Returning Weapon imbue skill from *Pyramid* #3-13.

Reveal Function

Keywords: Information.

Full Cost: 9 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

When cast on any machine, this spell lets the caster determine its functions. If the subject has more than one function, the spell reveals them in order of complexity (simplest first), and tells the caster "there are more functions." Later castings will reveal the remaining functions.

On a success, you learn one function per point of margin of success. On a critical success, you learn all functions.

On a failure, you do not learn anything, and cannot attempt to read that machine again for 24 hours.

Statistics: Psychometry (Accessibility, Machines Only, -20%; Accessibility, Only to reveal functions, -30%; Active Only, -20%; Sensitive, +30%; Sorcery, -15%) [9].

Reveal Magic

Keywords: Area (Leveled), Information.

Full Cost: 38 points for level 1 + 5 points/additional level.

Casting Roll: Per. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

When cast on an area, this spell reveals magical auras for everyone to see. Each magical aura gives off light equivalent to a torch. This includes creatures, objects, and areas under the effects of magic, enchanted items, spellcasters. The caster rolls against Per + Talent to reveal these auras, penalized for range to the edge of the area, and if a new magic aura is brought into the area, the caster must make a new roll for it. The caster or any other observers do not gain any insight about the nature of the revealed effects, only their presence. However, they may follow-up with other spells and abilities to learn more about the magical auras that were revealed.

Statistics: Detect (Magic; Area Effect, 2 yards, +50%; Cannot Analyze, -10%; Extended Duration, 10x, +40%; Persistent, +40%; Precise, +100%; Ranged, +40%; Reflexive, +40%; Sorcery, -15%; Visible, -10%) [38]. Additional levels add Area Effect (+50%) [+5].

Reverie of Ruin

Keywords: Information.

Full Cost: 7 or 57 points.

Casting Roll: IQ. Special casting time (see below).

Range: Self.

Duration: Instantaneous.

The caster receives a vision of his own death. Roll 3d on the *Fright Check Table* (p. B360) for effects. Then, the GM *might* reveal a deadly hazard or a lethally bad choice. The GM is not obliged to give a straightforward answer; this spell produces a vision, which may require some interpretation. The margin of success should determine the clarity of the vision and how easy it is to interpret.

The basic (7-point) version of this spell requires 10 minutes to cast! The improved (57-point) version requires only the usual one or two seconds.

Statistics: Precognition (Accessibility, Self Only, -10%; Active Only, -60%; Backlash, Fright Check, -15%; Magical, -10%; One Event, Death, -40%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%) [7]. The improved version adds Reduced Time 10 (+200%) [+50].

Reverse Gravity

Keywords: Area (Fixed).

Full Cost: 275 points.

Casting Roll: IQ.

Range: 100 yards.

Duration: 10 seconds.

This spell reverses gravity in an area, causing creatures and objects inside “fall” upwards. See *Different Gravity* (p. B350) for details different gravity levels. The area of effect has a radius of 5 yards and height of 4 yards.

Statistics: Control Gravity 5 (Accessibility, Only to reverse gravity, -50%; Cannot concentrate to extend duration, -10%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [55] + Control Gravity 20 (Accessibility, Only to reverse gravity, -50%; Cannot concentrate to extend duration, -10%; Does not increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [220].

Reverse Plant Growth

Keywords: Buff.

Full Cost: 29 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The plant rapidly ages backward, becoming younger and (presumably) smaller, until it becomes a seed or a fingernail-sized plant, if ancestral plant. If the plant is sentient, clothing and gear weighing no

more than his BL change with it. It cannot shift back on his own; it must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.) If the subject is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead). It becomes a seed after one minute *plus* one minute for every +1 SM. Thus, a SM +7 oak tree shrinks down to an acorn in eight minutes.

The subject retains its intelligence, but gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Accessibility, Plants Only, -40%; Advantage, Reverse Plant Growth, +180%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [29]. *Notes:* "Reverse Plant Growth" is Alternate Form (Seed; Active Change, +20%; Gradual Change, -10%; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [17]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

Rhabdomancy

Keywords: Information.

Full Cost: 34 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

Rhabdomancy is divination with rods, such as dowsing rods. A rod is held in the hand, or a forked stick in both hands. The diviner walks over the site where the desired object or substance might be found. If the subject of the divination is present, the GM makes a Per roll for the caster in secret. This takes Long-Distance penalties (p. B241). On a success, the stick points downward or twitches when the caster passes over it. This is best for finding caves, underground water, veins of metal or mineral, buried treasure, grave sites, or archaeological ruins. It cannot be used to locate things that are not buried in natural earth.

Statistics: Slotted Cosmic Power 1 (18) (Limited, Trait, Detect, -50%; Sorcery, -15%) [34]. *Note:* Effectively, this spell emulates effects of the Detect (Subject; Common) [20] advantage with Accessibility, Only downward, -20%; Cannot Analyze, -10%; Environmental, Ground, -20%; Long-Range 1, +50%; and Requires a dowsing rod, -10% for the total cost of 18 points.

Ricochet

Keywords: Weapon Buff.

Full Cost: 36 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The affected weapon's projectiles (or the weapon itself, in case of thrown weapons) bounce off "hard cover" in the environment in order to reach the target. The exact DR and HP of the things the wielder's bouncing the shot off aren't important. What matters is that these objects are convincingly hard: walls and rocks, not curtains and ferns.

The wielder must plot the course and count the bounces. If there's nothing but floor or ground around, then only one bounce is possible: from him, to the floor, and back up to his target. The number of allowed bounces is equal to the spell level. Each ricochet off something fragile, like rice paper or window glass, counts as two bounces.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Ricochet, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Ricochet" is 26 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -2 in penalties [+16]. This spell is based on the Bank Shot imbuelement skill.

Ride the Lightning

Keywords: Obvious.
Full Cost: 14 points/level.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

When you run at your full Move, you may create a powerful electric charge in your hex. Everyone in the hexes you have moved through takes 1d burning surge damage per level of this spell. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. You can maintain this spell by recasting it every second, if you keep moving at your full Move.

Statistics: Burning Attack 1d (Accessibility, Only when traveling at full Move, -30%; Area Effect, 1 yard, +25%; Aura, +80%; Melee Attack, Reach C, -30%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [14/level].

Rider

Keywords: Resisted (Will).
Full Cost: 20 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: 3 minutes.

The subject animal behaves as though it were a trained, loyal riding animal. The creature must be capable of carrying the caster, and the caster must still make a Riding roll whenever it would normally be required.

Statistics: Mind Control (Accessibility, Animals Only, -25%; Accessibility, Only to make the animal a loyal rider, -50%; Fixed Duration, +0%; Independent, +70%; Sorcery, -15%; Suggestion, -40%) [20].

Rider Within

Keywords: Resisted (Will).
Full Cost: 12 points.
Casting Roll: IQ.
Range: Unlimited.
Duration: Indefinite.

The caster can tap into an animal's senses. This lets him experience everything the animal experiences. If it is tortured, knocked out, or killed, the GM may require a Will roll to avoid stunning – or perhaps even a Fright Check! The caster must be able to see or touch the animal to tap into its senses. Modify the casting roll for range penalties to the animal (see p. B550).

The caster can maintain this spell for as long as he wishes without further concentration. If he switches to another person, he must stop tapping into his current subject's senses and roll a Quick Contest with the new subject.

If he loses, he may try again, at a cumulative -2 per repeated attempt on that subject in the past hour. Should he critically fail, he cannot tap into that animal's senses again for 24 hours.

Statistics: Mind Reading (Accessibility, Animals Only, -25%; Sensory Only, -20%; Sorcery, -15%) [12].

Rift to Hell

Keywords: Resisted (Will).
Full Cost: 313 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

This spell causes a flaming interplanar crack to open up beneath the subject – who must be standing on a solid surface (ground, floor, etc.). If the subject fails to resist, he is physically transported to a random place in Hell. A Remove Curse spell cast at the site of the rift can restore the victim to his own plane of existence (unless this is done quickly, though, his mental and physical health are likely to suffer).

Statistics: Affliction 1 (Will; Advantage, Rift to Hell, +2,900%; Based on Will, +20%; Environmental, Ground, -20%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Can be reversed by Remove Curse, -30%; Sorcery, -15%) [313]. *Notes:* “Rift to Hell” is Jumper (Interplanar; Cosmic, No die roll required, +100%; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Limited Access, -20%; Reliable +10, +50%) [290]. The +10 for Reliable cancels the -10 for no preparation. The Improved enhancement removes the auto-fail on 14+.

Rigid Armor

Keywords: Armor Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The affected flexible armor becomes rigid. It’s no longer subject to blunt trauma (p. B379) and provides its DR against grappling maneuvers such as Arm Lock and Neck Snap (see pp. B403-404).

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Rigid Armor, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* “Rigid Armor” is 22 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Rigid Armor imbuelement skill from *Pyramid #3-4*.

Ripple Message

Keywords: None.

Full Cost: 7 points.

Casting Roll: IQ.

Range: 1,000 miles.

Duration: Instantaneous.

The caster sends a message (up to one minute long) using gravity waves. The signal is omnidirectional, and the eavesdroppers must roll against Electronics Operation (Communications) to listen in. The signal can be disrupted by strong gravity fields (black holes, neutron stars, etc.). Gravity waves reach underwater and penetrate solid objects at no penalty. You can only communicate with people who are using the Ripple Sense spell or a gravity-ripple communicator (*GURPS Ultra-Tech*, p. 45). The roll to use does not take any range penalties.

Statistics: Gravity-Ripple Comm (Send Only, -50%; Sorcery, -15%) [7].

Ripple Sense

Keywords: None.

Full Cost: 7 points.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

The caster can receive messages sent via the Ripple Message spell or a gravity-ripple communicator (*GURPS Ultra-Tech*, p. 45).

Statistics: Gravity-Ripple Comm (Receive Only, -50%; Sorcery, -15%) [7].

Ritual of Reaping

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

The subject can easily harvest food plants barehanded without damaging the produce or gathering inedible parts. The GM determines game effects. Having collection take 20% less time – or permitting an extra foraging roll (p. B427) per hour – seems reasonable.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Ritual of Reaping (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Ritual of Reaping, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* “Ritual of Reaping” is Ritual of Reaping (Magical, -10%) [1].

Rive

Keywords: Resisted (HT).

Full Cost: 23.2 points/level.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Pokes a hole in an object. Does 1d pi++ damage to the subject (works only on inanimate items) per level of the spell. See p. B557, for DR and HP of various items. DR does not protect against this! The caster may deal less damage, if he wishes.

Statistics: Huge Piercing Attack 1d (Accessibility, Only on objects, -10%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable, +5%) [23.2/level].

Rock Drop

Keywords: Missile.

Full Cost: 6 points/level.

Casting Roll: None. Use Innate Attack (Gaze) or Artillery (Bombs) to hit.

Range: 100 yards.

Duration: Instantaneous.

You conjure a boulder above the ground and drop it at a single target. Use the better of Innate Attack (Gaze) and Artillery (Bombs) to hit, applying normal range penalties. It does 1d crushing damage per level. Since the rock falls from above, it deals no knockback, bypasses any cover that does not provide overhead protection, and negates attack penalties to hit crouching, kneeling, sitting, or prone targets. This spell has no 1/2D range – it deals full damage at any range. The rock itself disappears two minutes after it hits.

Statistics: Crushing Attack 1d (Increased 1/2D, 10x, +15%; No Knockback, -10%; Overhead, +30%; Sorcery, -15%) [6/level].

Rockwalking

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject can walk or crawl on walls and ceilings made of rock or stone. They can stop at any point and stick to the surface without fear of falling. Neither feat requires a roll against Climbing skill, provided the surface is one they can cling to. Move while clinging is half the subject's Basic Move.

If the subject is falling and tries to grab a vertical surface to break their fall, the GM must first decide whether there is anything in reach. If there is, the subject makes a DX roll to touch the surface, and then makes a ST roll at -1 per 5 yards already fallen. If they succeed, they stop their fall. Otherwise, they continue to fall – but they may subtract 5 yards from the height of the fall thanks to the slowing effect of the failed Clinging attempt. Variations in gravity affect these distances; e.g., in 0.5G, the ST roll would be at -1 per 10 yards.

Statistics: Affliction 1 (HT; Advantage, Rockwalking, +100%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Rockwalking" is Clinging (Magical, -10%; Specific, Stone and Rock, -40%) [10].

Rooted Feet

Keywords: Resisted (ST).

Full Cost: 31 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 10 seconds.

The caster lowers the subject's Move to 0, rooting him in place.

Statistics: Affliction 1 (ST; Based on ST, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/10, -20%; Slower Move, 0, +50%; Sorcery, -15%) [31].

Rotting Death

Keywords: Resisted (HT).

Full Cost: 16 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 5 seconds.

The caster must touch the subject to cast this spell. The subject begins to rot from within, taking 1d-1 toxic damage each second for 5 seconds. Armor does not protect. Each second the subject may resist the damage by making a successful HT roll. If the roll is a critical success, then the spell stops. Roll a random hit location each time the subject takes damage from this spell; once crippled, a limb is considered to have rotted off!

If the subject loses ½ of his HP or more to this spell, he begins experiencing terrible pain (B428) until he is healed above this threshold. Once the subject dies from this spell, his body quickly deliquesces, until only a puddle of evil-smelling goo is left.

Undead beings are not affected by this spell.

Statistics: Toxic Attack 1d-1 (Accessibility, Only on living beings, -10%; Based on HT, +20%; Cyclic, 1 second interval, 5 seconds, +250%; Melee Attack, Reach C, Cannot Parry, -35%; Malediction 1, +100%; Random hit location each cycle, +0%; Sorcery, -15%; Symptoms, ½ HP, Terrible Pain, +120%) [16].

Roundabout

Keywords: Resisted (HT).

Full Cost: 23 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Change the facing of a subject to any direction desired. This is not a teleport-in-place, but a physical spin. On the subject's next turn, a roll vs. Body Sense or DX-6 is needed to take any action. If the

subject moved 2 or more yards the previous turn, he must make an IQ roll to avoid continuing in the new direction.

Statistics: Affliction 1 (HT; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/180, -40%; Sorcery, -15%; Tipsy, Variant, +10%) [23].

Ruin

Keywords: Resisted (HT).

Full Cost: 108 points.

Casting Roll: Will.

Range: 100 yards.

Duration: 1 minute, the effect stays permanently.

This spell accelerates the natural process of decay in unliving materials. It rusts iron and steel, but has little effect on other metals unless maintained for a very long time. It causes organic material – leather, fur, wood, plastics, etc. – to decay to uselessness. Ceramics are unaffected by Ruin. Each 1-minute casting has the general effect of aging the subject 5 years. It will remove 1 DR and 1 HP from most subjects. Weapons simply lose one grade of quality per casting, except for Very Fine weapons, which are unaffected!

Statistics: Affliction 1 (HT; Accessibility, Only on unliving materials, -10%; Advantage, Ruin, +840%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [108]. *Note:* “Ruin” is Unaging (Age Control, Only Forwards, +10%; Magical, -10%; Reduced Time 23, +460%) [84].

Run Across Treetops

Keywords: Buff.

Full Cost: 20 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject can jog or run across the canopy of trees. He can see the illusion of a translucent surface laid over the trees. The contours are evident as he runs, but they are not so deep that he risks tripping. He cannot move slower than his full Move. Slower movement makes him fall through!

Statistics: Affliction 1 (HT; Advantage, Run Across Treetops, +40%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Note:* “Run Across Treetops” is Walk on Air (Accessibility, Only when moving at full Move, -30%; Environmental, Treetops, -50%; Magical, -10%) [4].

Rust

Keywords: Resisted (HT).

Full Cost: 37 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

The subject metal item rusts, suffering HT loss equal to your margin of victory (maximum -10). The metal in question must be of a type that weakens in time with exposure to oxygen; copper, for example, changes color to green but does not weaken. Weapons and armor have their quality reduced one level per -2 to HT. This spell may be countered by casting Restore Metal.

Statistics: Affliction 1 (HT; Accessibility, Rusting metals only, -40%; Attribute Penalty, HT-10, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [37].

Rusting Grasp

Keywords: Resisted (HT).

Full Cost: 21 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Three minutes.

The caster touches a metal item, causing it to rust and become fragile. The metal in question must be of a type that weakens in time with exposure to oxygen; copper, for example, changes color to green but does not weaken. The sorcerer must roll a Quick Contest of Will vs. the object's HT+SM. If the target's HT is unknown, assume that machines have HT 10 and simple objects have HT 12, modified for quality: -2 for cheap, +1 for fine, +2 for very fine.

If he wins, for the next three minutes the object's HT is at -5 and its DR is reduced by 10; if it's a weapon, treat it as cheap for breakage purposes, or an extra +2 to break if already cheap. If he loses or ties, there is no effect.

Rusting Grasp must affect objects as a whole; it cannot target part of an object. The GM has the final say over what constitutes a "whole" object.

This spell may be countered by casting Restore Metal.

Statistics: Affliction 1 (HT; Accessibility, Rusting objects only, -40%; Attribute Penalty, HT-5, +25%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, -30%; Negated Advantage, Reduced DR 10, +50%; No Signature, +20%; Sorcery, -15%) [21].

Safe Boarding

Keywords: Buff.

Full Cost: 16 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell allows the subject to walk on air with his ground Move, but with a few restriction: He may travel only over a fixed distance no greater than his Move in yards, and there must be water below him as he walks. If he stops or is knocked down in mid-air, he will not fall, however; the air between the two ships is like a solid plank for him.

Statistics: Affliction 1 (HT; Advantage, Safe Boarding, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [16]. *Note:* "Safe Boarding" is Walk on Air (Does not fall when knocked down, +30%; Environmental, Over water, -20%; Limited Distance, Move, -80%; Magical, -10%) [4].

Sanctuary

Keywords: None.

Full Cost: 130 points.

Casting Roll: IQ. Special casting time (see below).

Range: Self.

Duration: Instantaneous.

You move yourself to a pocket dimension. To initiate a jump, you must visualize your destination, concentrate for 10 seconds, and make a IQ roll. You may hurry the jump, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, you enter your pocket dimension. Failure means you stay in your current world and are at -5 to cast this spell for the next 10 minutes. Critical failure results are up to the GM, but likely result in you winding up somewhere (or *somewhen*) else.

While in your pocket dimension, time passes normally, allowing you to regain HP or FP, reload your firearms, brew potions, and so forth. Those with Jumper (World) or Jumper (Pocket Dimension) can "hitch a ride" to your pocket dimension as per the rules for Jumper (World).

Your pocket dimension is the size of a small bedroom (or the equivalent of the best Status -2 dwelling in your campaign setting) but has no other features. It does not, for instance, have furniture, light fixtures, etc. It does have a breathable atmosphere and takes whatever shape you initially desire, but from that point onward is fixed. For instance, you could have a pocket dimension that actually looks like a small bedroom or a cave.

When you want to leave your pocket dimension, cast this spell again. Success means you return to the place where you were when you initially used this ability. Failure means you go nowhere. Critical failure means you're trapped in your pocket dimension for 1d hours or you arrive as normal but your spell burns out for 1d hours.

If you travel to another time, parallel Earth, different dimension, etc., you can still access your pocket realm. All of your rolls to cast this spell are at -2, however, until your domain "settles," which takes 1d hours from the moment you arrive in the new time/world.

Should you die, your pocket dimension disappears, ejecting any living non-native beings to the last place they were before entering the pocket dimension. Alternatively, the GM might allow the plane to exist on its own, choose a new "owner," or something similar.

You can carry up to your Heavy Load when you travel.

Statistics: Jumper (Pocket Dimension; Extra Carrying Capacity, Heavy, +30%; Improved, +10%; Magical, -10%) [130]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Sand Blast

Keywords: Obvious.

Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous.

Shoots a 10-yard-long cone of high-speed grit from one hand, inflicting large-area injury (p. B400). Maximum width is 5 yards. This spell has the 1/2D range of 2 yards.

Use the rules under *Cone Attacks* (p. B413), rolling vs. Innate Attack (Beam) to hit the target point. As for any cone, anybody completely screened from the caster is behind cover, and targets may use *Dodge and Drop* (p. B377) to leave the area or get to cover.

Beings with eyes stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be blinded for (20 – HT) seconds.

Statistics: Crushing Attack 1d (Cone 5, +100%; Increased 1/2D, x2, +5%; Reduced Duration on Side Effect, 1/60, -35%; Reduced Range, 1/10, -30%; Side Effect, Blindness, +100%; Sorcery, -15%) [12].

Sand Jet

Keywords: Jet, Obvious.

Full Cost: 23 points.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous.

You shoot a thin jet of sand particles from your fingertip, which can strike any target up to 10 yards away (without range or speed penalties). It can be dodged or blocked, but not parried.

If the spell strikes the face, it causes no injury, but blinds the target for 3 seconds unless he makes a HT roll. Thick goggles, closed helmets, ultra-tech visors protect against this spell.

Statistics: Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Blockable, -5%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Jet, +0%; Reduced Duration, 1/60, -35%; Sorcery, -15%; Vision-Based, +150%) [23].

Sandstorm

Keywords: Area (Leveled).

Full Cost: 181 points for level 1 + 34 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Create a circular sandstorm with an “eye” of calm inside (a good place for the caster to stand). The radius of the eye can be up to half that of the storm – or smaller, if the caster wishes. The caster may move the area at Move 1 with a Concentrate maneuver.

Roll 4d as for crushing damage, determine knockback, and then double the distance; however, the victim suffers no actual damage or blunt trauma from the effect – just the consequences of being hurled around. As a special effect, knockback from this moves victims sideways (all clockwise or all anticlockwise; decide when triggering the attack) rather than away from the storm.

Second, Dodge values of all creatures within the area of effect are increased by 2 against projectile attacks.

Third, the sandstorm gives -4 to all vision rolls made through it.

Finally, any creatures in the area of effect, must make a HT roll each second or be blinded for 3 seconds. Simply closing the eyes protects against this effect.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Disadvantage, Blindness, +50%; Environmental, Air, -5%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Mobile 1, +40%; Persistent, +40%; Reduced Duration, 1/60, -35%; Selective Area, Only to create an “eye”, +10%; Vision-Based, +150%) [40] + Crushing Attack 4d (Area Effect, 2 yards, +50%; Double Knockback, +20%; Environmental, Air, -5%; Link, +10%; Magical, -10%; Mobile 1, +40%; No Blunt Trauma, -20%; No Wounding, -50%; Persistent, +40%; Selective Area, Only to create an “eye”, +10%) [37] + Enhanced Dodge 2 (Affects Others 1, +50%; Area Effect, 5 yards, +50%; Environmental, Air, -5%; Force Field, +20%; Limited, Projectiles, -40%; Link, +10%; Magical, -10%; Mobile 1, +40%; Persistent, +40%; Ranged, +40%) [89] + Obscure Vision 4 (Environmental, Air, -5%; Ranged, +50%; Link, +10%; Magical, -10%; Mobile 1, +40%) [15]. Additional levels add further levels of Area Effect (+50%) to all advantages [+34].

Sandstrider

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject does not suffer DX or Move penalties for traversing through sand.

Statistics: Affliction 1 (HT; Advantage, Sandstrider, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* “Sandstrider” is Terrain Adaptation (Sand; Magical, -10%) [5].

Satiation

Keywords: Buff.

Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell allows the subject to go without food for a day with no ill effects.

Statistics: Affliction 1 (HT; Advantage, Satiation, +40%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* “Satiation” is Doesn’t Eat or Drink (Food Only, -50%; Magical, -10%) [4].

Sawhand

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.
Range: Self.
Duration: Indefinite.

The caster can use his hand to saw wood or metal. This spell only works with relatively slow movements, so this spell cannot be used as an attack. The hand is protected from splinters.

Statistics: Accessory (Saw; Sorcery, -15%) [1].

Scald

Keywords: Area (Leveled).
Full Cost: 7 points or more (see below).
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Instantaneous.

The area is “cleansed” with a high-pressure steam blast that inflicts large-area injury (p. B400). To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

It causes burning damage but cannot set fires; it’s considered heat and water, but not fire, where important (e.g., Vulnerability).

The basic (7-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 2.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +5 to base cost, the damage can be upgraded to 2d or 3d burning. This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	7 points	9 points	12 points	14 points	17 points	19 points	22 points
2d	13 points	18 points	23 points	28 points	33 points	38 points	43 points
3d	20 points	27 points	35 points	42 points	50 points	57 points	65 points

Statistics: Burning Attack 1d (Area Effect, 2 yards, +50%; No Incendiary Effect, -10%; Sorcery, -15%; Variable, Area, +5%) [7]. Further levels add Area Effect (+50%) to the advantage [+2.5*].

* Calculate the total cost, then round *down*.

Scales

Keywords: Buff.
Full Cost: 19 or 26 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 90 minutes.

The subject grows scales. The basic (19-point) version prevents sunburn. The improved (26-point) version makes the subject grow thick scales that also provide DR 2*.

Statistics: Affliction 1 (HT; Advantage, Scales, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Notes:* “Scales” is Scales (Magical, -10%) [1]. The improved version adds DR 2 (Flexible, -20%; Magical, -10%) [+7].

Scents of the Past

Keywords: Information.
Full Cost: 35 points.
Casting Roll: IQ.
Range: Touch.
Duration: Indefinite.

When cast on a wall or some object, this spell releases whatever scents it may have been exposed to in the past.

To cast Scents of the Past, you must touch the subject item or location, concentrate for one second, and make an IQ roll. This roll is at no penalty for an event that occurred the same day, -1 for one that occurred up to 10 days ago, -2 if up to 100 days ago, -3 if up to 3 years ago, -4 if up to 30 years ago, -5 if up to 300 years ago, and so on.

A successful use of this spell gives you an actual “replay” of the scents. On a failure, you receive no impressions at all, and cannot attempt to read that object or place again for 24 hours.

Statistics: Psychometry (Accessibility, Scents Only, -60%; Active Only, -20%; Affects Others, +50%; Immersive, +100%; Nuisance Effects, Can be smelled, -10%; Sensitive, +30%; Sorcery, -15%) [35].

Notes: Nuisance Effect, Can be smelled, -10% is priced the same as Visible, -10%. Affects Others makes it so others can smell the playback of the spell. This affects any number of nearby subjects without requiring the usual multiple levels of that trait. This is a fair trade-off since this ability is so limited.

Schematic

Keywords: Information.

Full Cost: 5 points.

Casting Roll: IQ.

Range: Touch.

Duration: 10 minutes.

Creates detailed technical “blueprints” of the machine subject in the caster’s mind. The caster can browse through the mental schematic at his leisure or the same rate that he could examine actual hardcopy plans for the machine. However, this spell grants no appropriate skills to interpret it.

On a success, you create the blueprint. On a failure, you do not create anything, and cannot attempt to create a blueprint of that machine again for 24 hours.

The duration is the length of time that the image stays with any useful clarity in the caster’s mind. The schematic can either represent the current state of the object, or the ideal state of the object, at the caster’s discretion. Both can be useful. The latter use even gives plans for an object based only on a tiny fraction of it (at least 5% of the machine’s total mass needs to be present).

Statistics: Psychometry (Accessibility, Machines Only, -20%; Accessibility, Only to create a schematic, -20%; Active Only, -20%; Can create an ideal-state schematic, +20%; Maximum Duration, 10 minutes, -50%; Sensitive, +30%; Sorcery, -15%) [5].

Scaly Command

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 63 points for level 1 + 25 points/additional level.

Casting Roll: IQ.

Range: Unlimited.

Duration: Three minutes.

You can take control of scaly animals (typically, reptiles and fish) in the area. Only animals with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for animals with IQ 6 and Bestial. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

While under your control, the animals will follow any general orders you give. You cannot be very specific! When in doubt, the GM will make an IQ roll for the animal to see how well it interprets what you’re saying.

Statistics: Mind Control (Accessibility, Scaly animals only, -40%; Area Effect, 2 yards, +50%; Independent, +70%; Suggestion, -40%; Sorcery, -15%) [63]. Additional levels add more Area Effect (+50%) [+25].

Scissorhand

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster can use two of his fingers to cut paper, cords, ropes, or other things, as if he was using scissors. His fingers are protected from papercuts while he is doing it.

Statistics: Accessory (Scissors; Sorcery, -15%) [1].

Scoop

Keywords: None.

Full Cost: 6 points.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

The caster wills a small vessel of force into existence. By taking a Concentrate maneuver, the caster can move the container at Move 1 in any direction, though the spell ends if the distance between you and the container ever exceeds 10 yards. The caster can dip the container to pick up or drop a liquid by taking a Concentrate maneuver. The vessel holds up to 1 pint of liquid or small objects, weighing up to 5 pounds.

Statistics: Telekinesis 5 (One Task, Carrying, -65%; Sorcery, -15%; Visible, -10%) [5] + Hydrokinesis (Magical, -10%) [1].

Scry Gate

Keywords: None.

Full Cost: 50 points.

Casting Roll: IQ.

Range: 10 yards.

Duration: Indefinite.

When cast on an open gate, this spell allows images, sounds and smells to come through it from the other side to you, just as if you were peering through an open window. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

To cast this spell, pick the gate, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if the gate is out of sight.

On a success, you can use your sight, hearing, and smell as if you were physically peering through the gate. You can sense the environment around your body while using your ability. You can still only pay attention to one set of senses. At the start of each turn in combat, state whether you're giving priority to your natural senses or your remote ones. All tasks that depend on the senses you aren't prioritizing – including Sense rolls – are at -4.

If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Scry Gate for as long as you like.

On failure by 1, your senses goes to some other gate in range of the GM's choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced senses, move it to another gate, or change its facing as a free action. A viewpoint inside a moving gate will move with that object with no special concentration on your part.

Statistics: Clairsentience (Accessibility, Only to scry gates, -80%; Aware, +50%; Fixed Range, -5%; Normal Sight, -20%; Second Nature, +70%; Sorcery, -15%) [50].

Scryfool

Keywords: Buff.
Full Cost: 78 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Five hours.

This spell redirects Information spells targeted at a first subject onto a second subject, the “decoy.” Both subjects must be present at casting time; add the range penalties, if any. Unwilling subjects resist automatically. If the diviner’s margin of success is 10 or more, then he divines the correct subject.

A spell like Detect Magic (*GURPS Thaumatology: Sorcery*, p. 19) will reveal the existence of the Scryfool spell, but that’s all – and the caster would have to first see the subject with his own eyes to cast it.

Statistics: Affliction 1 (HT; Advantage, Scryfool, +580%; Extended Duration, 100x, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [78]. *Note:* “Scryfool” is Obscure 10 (Information Spells; Cosmic, Redirects to a decoy, +100%; Defensive, +50%; Magical, -10%; No Area of Effect, -50%; Stealthy, +100%) [58].

Scrying

Keywords: Information.
Full Cost: 70 points for level 1 + 5 points/additional level.
Casting Roll: IQ.
Range: Special.
Duration: Indefinite.

You can displace your sight to a point outside your body. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

The maximum range of this ability depends on the spell level.

Level	Maximum Range	Full Cost
1	10 yards	70 points
2	20 yards	75 points
3	50 yards	80 points
4	100 yards	85 points
5	200 yards	90 points
6	500 yards	95 points
7	1,000 yards	100 points
+1	uses the same “2-5-10” progression	+5 points

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if your desired viewpoint is out of sight.

On a success, you can use your ranged senses as if you were physically present at the viewpoint (this means you cannot sense the environment around your body!).

Your vision ignores darkness penalties completely. You cannot see through solid objects, but if your viewpoint were inside (for example) a closed chest, you would see what was inside despite the lack of light. If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Wizard Eye for as long as you like.

On failure by 1, your sight goes to some other viewpoint of the GM’s choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced sight, move it elsewhere, or change its facing as a free action. A viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part.

Statistics: Clairsentience (Clairvoyance, -10%; Fixed Range, -5%; Second Nature, +70%; Sorcery, -15%) [70].

Scrywall

Keywords: Area (Leveled).

Full Cost: 86 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Eight hours.

The area is nearly impossible to detect, see, or divine with any Information spells, regardless of the magic system used to cast them. Scrywall reduces the diviner's effective margin of success by 10 for these purposes – so a spell that succeeded by 0-9 completely fails to divine the area, while one that succeeded by 10+ provides less information than normal and is at a *huge* disadvantage if it's resisted.

A spell like Detect Magic (*GURPS Thaumatology: Sorcery*, p. 19) will reveal the existence of the Scrywall spell, but that's all – and the caster would have to first see the area with his own eyes to cast it.

Statistics: Obscure 10 (Information Spells; Defensive, +50%; Extended Duration, 3,000x, +140%; Ranged, +50%; Sorcery, -15%; Stealthy, +100%; Variable, Area, +5%) [86]. Additional levels add more Area Effect (+50%) [+10].

Sea Legs

Keywords: None or Buff.

Full Cost: 2 or 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 30 minutes.

The subject has +3 to resist *Seasickness* (p. B436) and any other forms of motion sickness.

The basic (2-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. However, unlike most other maintainable spells, maintaining this one costs 1 FP per 30 minutes, not 1 FP per minute. The improved (17-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Sea Legs (Extended Duration, 30x, +60%; Sorcery, -15%) [2]. The improved version is Affliction 1 (HT; Advantage, Sea Legs, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Sea Legs" is Sea Legs (Magical, -10%) [1].

Searching Roots

Keywords: Information.

Full Cost: 42 points or 57 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

The roots of a plant the caster is touching burrow underground, using vibration and physical contact to find oil, coal, water, buried treasure, coffins, corpses, tunnels, etc. After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant buried object. The caster must concentrate. The roots spread down and outward at a rate of one foot per second. The ultimate length of the roots is limited only by the duration of the spell and the density of the earth (they cannot pass through solid stone). The basic (42-point) version of this spell takes standard range penalties. The improved (57-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the buried object, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a coffin" or "it's a dinosaur skeleton").

Any known objects may be excluded if the caster mentions them before casting.

Statistics: Detect Buried Objects (Accessibility, Caster must be touching a rooted plant, -40%; Nuisance Effect, Delay, -10%; Precise, +100%; Requires Concentrate, -15%; Selective Effect, +20%; Sorcery, -15%) [42]. The improved version adds Long-Range 1 (+50%) [+15].

Season

Keywords: Area (Special).

Full Cost: 7 points for level 1 + 3 points/additional level.

Casting Roll: IQ or Cooking.

Range: 100 yards.

Duration: Instantaneous.

Spices and seasons food in an area up to the spell's level in radius to the caster's preference. The caster's cooking skill determines whether the food tastes any better for it – the spell simply adds the flavors that the caster demands.

Statistics: Control Food 1 (Cosmetic, Only to season, -80%; Ranged, +40%; Sorcery, -15%) [7]. Additional levels add Control Food +1 (Cosmetic, Only to season, -80%; Only increases area of effect, -50%; Ranged, +40%; Sorcery, -15%) [3/level]. As a special effect, this forms a hemispherical dome, not a cylinder.

Seaweed Clutch

Keywords: Area (Leveled).

Full Cost: 39 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You can direct existing dense seaweed to entangle and restrain everyone within an area. It requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). The binding has ST 15 and lasts for 10 seconds, continuing to entangle new people who blunder into it. Those already caught grow more tightly entangled, with +1 to the ST of their bonds for each additional second they remain grappled. If the seaweed strands are reaching out laterally (from a wall or fence), targets may use active defenses. If the attack comes up from the sea floor, limit active defenses to parries with feet or a dodge at -3. This spell has no effect on sapient seaweed.

The basic (39-point) version of this spell affects subjects in a two-yard radius. For each additional 15 points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to omit specific targets from the area of effect.

Statistics: Binding 15 (Area Effect, 2 yards, +50%; Can be defended against, -5%; Environmental, Dense Seaweed, -60%; Persistent, +40%; Selective Area, +20%; Sorcery, -15%) [39]. The additional levels add more levels of Area Effect (+50%) [+15].

See Gravity

Keywords: Buff.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Gravity fields are revealed to the subject's eyes. He can even see gravitational anomalies through walls.

Statistics: Affliction 1 (HT; Advantage, See Gravity, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "See Gravity" is Detect Gravity (Cannot Analyze, -10%; Magical, -10%; Reflexive, +40%; Vision-Based, -20%) [5].

See Invisible

Keywords: Buff.
Full Cost: 30 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

This spell allows the subject to see objects or individuals that are normally invisible. This only covers magical invisibility.

Statistics: Affliction 1 (HT; Advantage, See Invisible, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* "See Invisible" is See Invisible (Magic; Magical, -10%) [14].

See Plant Health

Keywords: Information.
Full Cost: 10 points.
Casting Roll: Per.
Range: Self.
Duration: Indefinite.

Causes sick or damaged plants to stand out clearly in the subject's vision.

Statistics: Detect Sick Plants (Cannot Analyze, -10%; Reflexive, +40%; Sorcery, -15%; Vision-Based, -20%) [10].

See Radiation

Keywords: Buff.
Full Cost: 22 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

Radiation is revealed to the subject's eyes. He can even see radioactive items through walls, if the walls do not absorb all radiation.

Statistics: Affliction 1 (HT; Advantage, See Radiation, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Note:* "See Radiation" is Detect Radiation (Cannot Analyze, -10%; Magical, -10%; Reflexive, +40%; Vision-Based, -20%) [10].

See Secrets

Keywords: Buff.
Full Cost: 22 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

Causes hidden items, doors, traps, etc., to stand out clearly in the subject's vision. This spell works only on things that were deliberately hidden – not lost.

Statistics: Affliction 1 (HT; Advantage, See Secrets, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Note:* "See Secrets" is Detect Secrets (Cannot Analyze, -10%; Magical, -10%; Reflexive, +40%; Vision-Based, -20%) [10].

Seek Acid

Keywords: Information
Full Cost: 19 or 24 points.
Casting Roll: Per.
Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls the sorcerer's Per, with a penalty based on the distance to the nearest acid. The basic (19-point) version of this spell takes standard range penalties. The improved (24-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the acid, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a flask of sulfuric acid" or "it's an acid-breathing black dragon").

Statistics: Detect Acid (Precise, +100%; Sorcery, -15%) [19]. The improved version adds Long-Range 1 (+50%).

Seek Air

Keywords: Information.

Full Cost: 62 points or 77 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant amount of air. The basic (62-point) version of this spell takes standard range penalties. The improved (77-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of air, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's an air vent" or "it's an oxygen tank").

Any known sources of air may be excluded if the caster mentions them before casting.

Statistics: Detect Air (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [62]. The improved version adds Long-Range 1 (+50%) [+15].

Seek Banestorm

Keywords: Information.

Full Cost: 12 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest banestorm, using the long-distance modifiers. If successful, the caster knows the exact distance and direction to the banestorm.

Any known passes may be excluded if the caster mentions them before casting.

Statistics: Detect Banestorm (Cannot Analyze, -10%; Long-Range 1, +50%; Precise, +100%; Sorcery, -15%) [12].

Seek Coastline

Keywords: Information.

Full Cost: 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest coastline. Use the long-distance modifiers. If successful, the caster knows the exact distance and direction to the coastline, and may make a follow-up IQ roll (at no penalty) to learn basic details about it.

Any known coastlines may be excluded if the caster mentions them before casting.

Statistics: Detect Coastline (Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [51].

Seek Earth

Keywords: Information.

Full Cost: 62 points or 77 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant amount of any one type of earth or stone. The basic (62-point) version of this spell takes standard range penalties. The improved (77-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of earth or stone, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a chunk of granite" or "it's fertile soil").

Any known instances of earth or stone may be excluded if the caster mentions them before casting.

Statistics: Detect Earth (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [62]. The improved version adds Long-Range 1 (+50%) [+15].

Seek (Ethical Category)

Keywords: Information.

Full Cost: 21 points or 31 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant manifestation of an ethical category (evil, chaos, good, order, etc.). The basic (21-point) version of this spell takes standard range penalties. The improved (31-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the manifestation of an ethical category, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's an evil being" or "it's a golem possessed by a demonic spirit").

Any known manifestations of ethical categories may be excluded if the caster mentions them before casting.

Statistics: Detect Ethical Category (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Fluid

Keywords: Information.

Full Cost: 75 points or 93 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant amount of air or water. The basic (75-point) version of this spell takes standard range penalties. The improved (93-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of air or water, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's an air vent" or "it's a bottle of water").

Any known sources of air or water may be excluded if the caster mentions them before casting.

Statistics: Detect Air (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [62] + Detect Water (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [62/5=13]. The improved version adds Long-Range 1 (+50%) to both advantages [+18]. Notes: The advantages are bought as Alternative Abilities.

Seek Food

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant source of food. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of food, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's an edible insect" or "it's a lasagna").

Any known sources of food may be excluded if the caster mentions them before casting.

Statistics: Detect Food (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Fuel

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest source of fuel. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of fuel, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a pile of coal" or "it's an antimatter trap").

Any known sources of fuel may be excluded if the caster mentions them before casting.

Statistics: Detect Fuel (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Fungus

Keywords: Information.

Full Cost: 21 points or 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest fungus. The basic (21-point) version of this spell takes standard range penalties. The improved (26-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the fungus, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a fungal mold" or "it's a mushroom").

Any known fungi may be excluded if the caster mentions them before casting.

Statistics: Detect Fungi (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+5].

Seek Gate

Keywords: Information.

Full Cost: 11 points or 13 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest gate of any sort. The basic (11-point) version of this spell takes standard range penalties. The improved (13-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the gate, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a one-way gate" or "it's a two-way gate to Hell").

Any known gates of machine types may be excluded if the caster mentions them before casting.

Statistics: Detect Gate (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [11]. The improved version adds Long-Range 1 (+50%) [+2].

Seek Gems

Keywords: Information.

Full Cost: 21 points or 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest gem. The basic (21-point) version of this spell takes standard range penalties. The improved (26-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the gem, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a ruby" or "it's a 24 carat diamond").

Any known gems may be excluded if the caster mentions them before casting.

Statistics: Detect Gems (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+5].

Seek Gravity

Keywords: Information.

Full Cost: 13 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest gravitational anomaly. Use the long-distance modifiers. If successful, the caster knows the exact distance and direction to the anomaly, and may make a follow-up IQ roll (at no penalty) to learn basic details about it.

The caster can also specify that he is looking for a specific sort of gravity (1G, not 1G, higher than local, directional, etc.). Any known gravitational anomalies may be excluded if the mage specifies them before casting.

Statistics: Detect Gravitational Anomaly (Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [13].

Seek Incarnum

Keywords: Information.

Full Cost: 21 points or 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant source of Incarnum – a creature with an essential pool or a soulmeld. The basic (21-point) version of this spell takes standard range penalties. The improved (26-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of

incarnum, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., “it’s a meldshaper” or “it’s a *behir gorget*”).

Any known sources of incarnum may be excluded if the caster mentions them before casting.

Statistics: Detect Incarnum (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+5].

Seek Landform

Keywords: Information.

Full Cost: 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer’s Per, with a penalty based on the distance to the nearest specified landform (mountain pass, mouths of a cave, and other terrain features). Use the long-distance modifiers. If successful, the caster knows the exact distance and direction to the landform, and may make a follow-up IQ roll (at no penalty) to learn basic details about it.

Any known landforms may be excluded if the caster mentions them before casting.

Statistics: Detect Landform (Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [26].

Seek Ley Line

Keywords: Information.

Full Cost: 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer’s Per, with a penalty based on the distance to the nearest ley line. Use the Long-Distance Modifiers (p. B241). If successful, the caster knows the exact distance and direction to the ley line, and may make a follow-up IQ roll (at no penalty) to learn basic details about it, like its Intensity or flavor.

Any known ley lines may be excluded if the caster mentions them before casting.

May also be treated as a Knowledge spell.

Statistics: Detect (Ley Line; Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [26]. *Note:* This spell originally appeared in *GURPS Thaumatology: Urban Magics*.

Seek Machine

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer’s Per, with a penalty based on the distance to the nearest machine of any sort. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the machine, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., “it’s a pump” or “it’s a laser rifle”).

Any known machines of machine types may be excluded if the caster mentions them before casting.

Statistics: Detect Machine (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Magic

Keywords: Information.

Full Cost: 21 points or 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant magical item, active spell, or magical being. The basic (21-point) version of this spell takes standard range penalties. The improved (26-point) one uses *Long-Distance Modifiers* (p. B241). If successful, the caster knows the exact distance and direction to the source of magic, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a magical item" or "it's a magically animated golem").

Any known sources of magic may be excluded if the caster mentions them before casting.

This is also a Knowledge spell.

Statistics: Detect Magic (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+5].

Seek Metal

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant source of metal. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of metal, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a piece of iron" or "it's a golden ingot").

Any known sources of metal may be excluded if the caster mentions them before casting.

Statistics: Detect Metal (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Navy

Keywords: Information.

Full Cost: 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest ship. Use the long-distance modifiers. If successful, the caster knows the exact distance and direction to the ship, and may make a follow-up IQ roll (at no penalty) to learn basic details about it.

Any known ships may be excluded if the caster mentions them before casting.

Statistics: Detect Ship (Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [26].

Seek Pass

Keywords: Information.

Full Cost: 13 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest pass through a mountain range. Use the long-distance modifiers. If successful, the caster knows the exact distance and direction to the pass, and may make a follow-up IQ roll (at no penalty) to learn basic details about it.

Any known passes may be excluded if the caster mentions them before casting.

Statistics: Detect Pass (Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [13].

Seek Plant

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest growth of plants, or of one specific plant type. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the growth of plants, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a tree" or "it's a berry bush").

Any known plants may be excluded if the caster mentions them before casting.

Statistics: Detect Plants (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Plasma

Keywords: Information

Full Cost: 10 or 12 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls the sorcerer's Per, with a penalty based on the distance to the nearest plasma. The basic (10-point) version of this spell takes standard range penalties. The improved (12-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the plasma, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a firing plasma rifle" or "it's a star").

Statistics: Detect Plasma (Precise, +100%; Sorcery, -15%) [10]. The improved version adds Long-Range 1 (+50%).

Seek Plastic

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant source of plastic. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of plastic, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a plastic doll" or "it's a plastic bag").

Any known sources of plastic may be excluded if the caster mentions them before casting.

Statistics: Detect Plastic (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Poison

Keywords: Information.

Full Cost: 25 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

The GM rolls against the caster's Per (plus Talent), applying *Long-Distance Modifiers* (p. B241) to the nearest poison. The caster may exclude any specific poisons or types of poison he wishes. Success reveals the exact location of the poison, allowing follow-up spells to be cast on it.

Statistics: Detect (Poison; Cannot Analyze, -10%; Long-Range 1, +50%; Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [25].

Seek Power

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant source of power. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of power, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a C-cell" or "it's a power outlet").

Any known sources of power may be excluded if the caster mentions them before casting.

Statistics: Detect Power (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Psi

Keywords: Information.

Full Cost: 21 points or 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant psionic item, active psionic effect, or psionic being. The basic (21-point) version of this spell takes standard range penalties. The improved (26-point) one uses *Long-Distance Modifiers* (p. B241). If successful, the caster knows the exact distance and direction to the source of psionics, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a psionic item" or "it's a telepath").

Any known sources of psionics may be excluded if the caster mentions them before casting.

Statistics: Detect Psionics (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+5].

Seek Radiation

Keywords: Information.

Full Cost: 21 points or 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant source of radiation. The basic (21-point) version of this spell takes standard range penalties. The improved (26-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of radiation, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a source of gamma rays" or "it's a source of neutron radiation").

Any known sources of radiation may be excluded if the caster mentions them before casting.

Statistics: Detect Radiation (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+5].

Seek Sleepers

Keywords: Information.

Full Cost: 41 points or 51 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest sleeping creature. The basic (41-point) version of this spell takes standard range penalties. The improved (51-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the sleeper, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a male human" or "it's a badger").

Any known sleepers may be excluded if the caster mentions them before casting.

Statistics: Detect Sleepers (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [41]. The improved version adds Long-Range 1 (+50%) [+10].

Seek Water

Keywords: Information.

Full Cost: 62 points or 77 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest significant amount of water. The basic (62-point) version of this spell takes standard range penalties. The improved (77-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the source of water, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a bottle of water" or "it's a pond").

Any known sources of water may be excluded if the caster mentions them before casting.

Statistics: Detect Water (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [62]. The improved version adds Long-Range 1 (+50%) [+15].

Seeker

Keywords: Information.

Full Cost: 13 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

The caster can "home in" on anyone or anything, provided he has a piece of it (or something deeply connected to it) to attune to. Attuning requires one second, as long as the caster has anything even remotely related to that subject to focus on.

Once attuned, the caster can make a Per roll to track down the subject. This takes Long-Distance penalties (p. B241). On a success, he knows the direction, though not the distance, to his attuned subject.

Statistics: Slotted Cosmic Power 1 (7) (Limited, Trait, Detect, -50%; Nuisance Effect, Must have something related to subject, -5%; Sorcery, -15%) [13]. *Note:* Effectively, this spell emulates effects of the Detect (Subject; Rare) [5] advantage with Cannot Analyze, -10%; and Long-Range 1, +50% for the total cost of 7 points.

Seeker Snake

Keywords: Obvious.

Full Cost: 34 points for level 1 + 6 points/additional level.

Casting Roll: None. Use Bow to hit.

Range: Self.

Duration: Instantaneous.

You whisper "Seek!" to a snake and straighten it out to be used like an arrow. You must Ready it in your bow normally. The snake arrow is homing, so it steers itself. As it uses Infravision to seek its target. To "lock on," you must Aim at the target and make an unmodified Bow roll. Do not roll against your skill to hit. Instead, use the attack's skill of 10 – plus Accuracy, if you made your skill roll – and ignore all range penalties. The projectile moves 1/2D yards per second. For more information, see *Guided and Homing Weapons* (p. B412).

The snake missile deals impaling damage equal to whatever damage you would do with the bow with an armor divisor of (2). In addition, the snake carries a venomous follow-up that deals 1d toxic damage per level and can be resisted with an HT-2 roll.

Statistics: Imbue 3 (Limited Skill Access, Combination Skill (Homing Weapon (VH) + Penetrating Strike (VH)), -80%) [8] + Unusual Training [1] + Combination Skill (Homing Weapon (VH) + Penetrating Strike (VH)) DX+0 [8] modified with Accessibility, Only bows, -30%; Accessibility, Requires a whisper, -5%; Cosmic, No die roll required, +100%; Magical, -10%; Reduced Fatigue Cost 1, +20%; Requires a snake, -15% for a final cost of 27.2 points + Toxic Attack 1d (Accessibility, Requires a whisper, -5%; Cosmic, Follow-Up works with Armor Divisor, +50%; Follow-Up, Bow, +50%; Magical, -10%; Resistible, HT-2, -20%; Requires a snake, -15%) [6/level].

Seismic Shock

Keywords: Area (Leveled).

Full Cost: 7 points for level 1 + 2.5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You may trigger a massive, momentary shock in a two-yard-radius area that lifts anyone of the ground into the air. On landing, they suffer falling damage from that height. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect.

Everybody in the area is dealt 2d crushing damage for the purpose of determining vertical knockback. This damage deals no actual injury, only the falls and collisions do. A successful Acrobatics roll reduces effective falling distance by five yards. Thus, it's possible to avoid all damage from hitting the ground. This doesn't mitigate damage from being slammed into the ceiling first, however! Upon landing, victims capable of standing may make a DX or Acrobatics roll at -3 to land on their feet.

Seismic Shock also causes general chaos. Objects that require checks for breakage if dropped (like potion bottles) must roll for breakage, people taking Aim or Concentrate maneuvers must make Will rolls for distraction, those engaged in long actions must roll vs. the relevant skill or start over, and machinery requires a HT roll to avoid breakdown (e.g., locks on portals would pop open). For targets not securely anchored to the ground – and people rarely are – these rolls are at an extra -3.

This spell has no effect on targets not in contact with the ground.

Statistics: Crushing Attack 1d (Area Effect, 2 yards, +50%; Cosmic, Vertical Knockback, +50%; Double Knockback, +20%; Environmental, Ground, -20%; No Wounding, -50%; Sorcery, -15%; Variable, Area, +5%) [7]. Further levels add more Area Effect (+50%) [+2.5].

Selective Gravity

Keywords: Buff.

Full Cost: 84 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject of this spell decides if he wants to be affected by the local gravity or gravity-based abilities or not. For example, this effect may let him become weightless, become immune to Gravity Crush, but being able to benefit from a beneficial application of Gravity Push.

Statistics: Affliction (HT; Advantage, Selective Gravity, +720%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [84]. *Note:* "Selective Gravity" is Static (Gravity; Discriminatory, +150%; Magical, -10%) [72].

Selective Hearing

Keywords: None or Buff.

Full Cost: 1 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

Subject may ignore -1 in Hearing penalties due to noise and get +1 to HT rolls to resist deafening noises (like Thunderclap).

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Robust Hearing (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Selective Hearing, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Selective Hearing" is Robust Hearing (Magical, -10%) [1].

Self-Destruct

Keywords: Obvious.

Full Cost: 6 points/level.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

This spell blows up the caster at once. This is a crushing explosion that does 6d damage level of this spell. The caster is reduced to -10xHP regardless of damage inflicted, and cannot be resurrected – while everyone else divides damage by distance in yards from the caster (not triple that). Everyone within five yards also risks being hit by bones, teeth, shattered gear, and so on, for 1d cutting damage; see *Fragmentation Damage* (pp. B414-415). The fate of gear is up to the GM. Most equipment is destroyed, but for anything important, assess damage against DR and HP.

This is also a Fire and a Necromantic spell.

Statistics: Crushing Attack 6d (Backlash, Disadvantage, Fragile (Enhanced Unnatural) and Heart Attack, -400%; Emanation, -20%; Fragmentation, [1d cut], +15%; Explosion 3, +150%) [6/level]. *Notes:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies. This spell originally appeared in *GURPS Magic: Artillery Spells*.

Self-Repairing

Keywords: Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 8 hours.

The subject item heals 1 HP per hour.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Self-Repairing, +230%; Extended Duration, 300x, +100%; Fixed Duration, +0%; Increased 1/2D, x10, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Note:* "Self-Repairing" is Regeneration (Regular; Magical, -10%) [23].

Sense Corruption

Keywords: Information.

Full Cost: 4 or 9 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby sources of corruption and corrupted beings, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate source of corruption or corrupted being, and inform you if you succeed.

The improved (9-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Corruption; Cannot Analyze, -10%; Sorcery, -15%) [8]. The improved version adds Precise (+100%) [+5].

Sense Disease

Keywords: Information.

Full Cost: 8 or 18 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (8-point) version of this spell, you can immediately sense all nearby sources of disease and diseased beings, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate source of disease or diseased being, and inform you if you succeed.

The improved (18-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Disease; Cannot Analyze, -10%; Sorcery, -15%) [8]. The improved version adds Precise (+100%) [+10].

Sense Emotion

Keywords: Information, Resisted (Will).

Full Cost: 9 or 19 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

The caster gets a brief flash of the emotions a subject is experiencing. This only works on living, sapient (IQ 6+) beings. If successful, this gives the caster +3 on any roll to detect an impostor, or to use Detect Lies, Fortune-Telling, and Psychology against the subject. The basic (9-point) version takes normal range penalties. The improved (19-point) version does not take any range penalties at all.

Statistics: Empathy (Requires IQ vs. Will Roll, -10%; Short-Range 2, -20%; Sorcery, -15%) [9]. Improved version replaces Short-Range 2, -20% with Remote, +50% [+10].

Sense (Ethical Category)

Keywords: Information.

Full Cost: 8 or 18 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (8-point) version of this spell, you can immediately sense all nearby beings or manifestations of a particular ethical category (evil, chaos, good, order, etc.), sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate manifestation, and inform you if you succeed.

The improved (18-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Ethical Category; Cannot Analyze, -10%; Sorcery, -15%) [8]. The improved version adds Precise (+100%) [+10].

Sense Foes

Keywords: Information.

Full Cost: 15 or 35 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (15-point) version of this spell, you can immediately sense all nearby beings that mean to cause harm to you, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate being, and inform you if you succeed.

The improved (35-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Foes; Cannot Analyze, -10%; Sorcery, -15%) [15]. The improved version adds Precise (+100%) [+20].

Sense Goblin

Keywords: Information.

Full Cost: 8 or 18 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (8-point) version of this spell, you can immediately sense all nearby goblins, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate goblin, and inform you if you succeed.

The improved (18-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Goblin; Cannot Analyze, -10%; Sorcery, -15%) [8]. The improved version adds Precise (+100%) [+10].

Sense Light

Keywords: Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell gives the subject a tactile warning (e.g., a tickling feel or sensation of heat) whenever someone is illuminating his bare skin with a laser, flashlight, or other focused light source in the visible light, infrared, or ultraviolet frequencies. It also tells the subject the approximate direction to the source.

Statistics: Affliction 1 (HT; Advantage, Sense Light, +160%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Note:* "Sense Light" is Detect Focused Light (Cannot Analyze, -10%; Magical, -10%; Precise, +100%; Touch-Based, Reversed, -20%) [16].

Sense Man

Keywords: Information.

Full Cost: 15 or 35 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (15-point) version of this spell, you can immediately sense all nearby sapient male beings (IQ 6+), sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate male being, and inform you if you succeed.

The improved (35-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Man; Cannot Analyze, -10%; Sorcery, -15%) [15]. The improved version adds Precise (+100%) [+20].

Sense Mana

Keywords: Information.

Full Cost: 11 points.

Casting Roll: Per. Use IQ for analysis.

Range: Personal.

Duration: Instantaneous.

A successful Per roll tells the caster the mana level at the point where he is standing, and whether the local mana is aspected or otherwise unusual. A follow-up IQ roll will reveal the precise nature and level of any aspect or other peculiarity.

Statistics: Detect (Mana; Melee Attack, Reach C, -30%; Sorcery, -15%) [11].

Sense Nano

Keywords: Information.

Full Cost: 11 points or 13 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest nanomachine. The basic (11-point) version of this spell takes standard range penalties. The improved (13-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the nanomachine, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a reconstruction nanomachine swarm" or "it's a disassembler swarm").

The caster may, at the time of casting, limit the spell to a specific type of nanomachine, or exclude a given type or any known nanomachines.

Statistics: Detect Nanomachines (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [11]. The improved version adds Long-Range 1 (+50%) [+2].

Sense Quintessence

Keywords: Information.

Full Cost: 4 or 9 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

With the basic (4-point) version of this spell, you can immediately sense all nearby sources of quintessence, sorted by the direction to each one. The GM will roll against your Per (plus Talent), minus the range penalty to the nearest appropriate source of quintessence, and inform you if you succeed.

The improved (9-point) version of this spell works as above, except that you know the precise location of each subject. This allows you to cast spells on any of them for as long as each remains in that location – or for the next second, if one is already on the move.

Statistics: Detect (Quintessence; Cannot Analyze, -10%; Sorcery, -15%) [4]. The improved version adds Precise (+100%) [+5].

Sense Spirit

Keywords: Information.

Full Cost: 21 points or 26 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest spirit, undead, or a similar supernatural entity. The basic (21-point) version of this spell takes standard range penalties. The improved (26-point) one uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the spirit, and may make a follow-up IQ roll (at no penalty) to learn basic details about it (e.g., "it's a ghost" or "it's a zombie").

The caster may, at the time of casting, limit the spell to a specific type of entity, or exclude a given type or any known spirits.

Statistics: Detect Spirits (Precise, +100%; Selective Effect, +20%; Sorcery, -15%) [21]. The improved version adds Long-Range 1 (+50%) [+5].

Sensitize

Keywords: Resisted (HT).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The subject temporarily gains the Low Pain Threshold (p. B142) disadvantage.

Statistics: Affliction 1 (HT; Disadvantage, Low Pain Threshold, +10%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [27].

Sequence DNA

Keywords: Information.

Full Cost: 25 or 75 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

You magically determine the correct DNA sequences needed to produce specific traits in the subject. If the subject is not yourself, he must be within reach when the spell is cast. Successful use of this skill gives the caster a +10 bonus to Bioengineering (Genetic Engineering) skill at the concept stage of genetic engineering. Only one try is allowed per week; the GM should roll secretly for success.

The basic (25-point) version of this spell requires 10 minutes to cast! The improved (75-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Limited Use, 1/week, -50%; Magical, -10%; One Event, DNA Sequence, -40%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%) [25]. The improved version adds Reduced Time 10 (+200%) [+50].

Sequester

Keywords: None.

Full Cost: 117 points.

Casting Roll: None.

Range: Self.

Duration: Variable.

The sorcerer enters a state of suspended animation and becomes invisible to vision and information spells (reduce the diviner's margin of success by 10). The invisibility aspect of this spell also affects everything the sorcerer is carrying up to his Basic Lift. Anyone unfamiliar with this effect must win a Quick Contest of Diagnosis vs. the sorcerer's HT + 10 + Talent to discover that the sorcerer isn't dead. In this state, the sorcerer does not need to breathe, and can go safely without food and water 1024 times longer. The sorcerer is unaware of its surroundings while in suspended animation, but awakens automatically if injured. The caster may also set a mental "alarm clock" to awaken the subject after a certain amount of time has passed.

Statistics: Invisibility (Affects Machines, +50%; Can Carry Objects, No Encumbrance, +10%; Link, +10%; Sorcery, -15%) [62] + Metabolism Control 10 (Link, +10%; Magical, -10%; Only to trance, -50%) [25] + Obscure 10 (Information Spells; Link, +10%; Magical, -10%; No Area Effect, -50%; Stealthy, +100%) [30].

Sever Fate Line

Keywords: Resisted (Will).

Full Cost: 50 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

This spell curses the subject, making his life short and fate miserable. As soon as the subject reaches his aging threshold (age 50 for a normal human), his organs and immune system begin to fail. He starts to age rapidly, making aging rolls every day at -3 to HT.

In addition, things go wrong for the subject – and usually at the worst possible time. Once per play session (or one day of game time), the GM will arbitrarily and maliciously make something go wrong for the subject. He misses a vital die roll, or the enemy (against all odds) shows up at the worst possible time. If the plot of the adventure calls for something bad to happen to someone, it's the subject. The GM may not kill the subject outright with "bad luck," but anything less than that is fine.

This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Self-Destruct, +10%; Disadvantage, Unluckiness, +10%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [50].

Shadow Bolt

Keywords: Missile, Obvious.

Full Cost: 8 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

A bolt of shadow springs from your hand, draining vitality where it strikes. This attack deals 1d fatigue damage per level and can be blocked or dodged, but not parried.

Statistics: Fatigue Attack (Blockable, -5%; Sorcery, -15%) [8/level].

Shadow Double

Keywords: None.

Full Cost: 62 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster creates a double of himself woven from shadowstuff. The double possesses the caster's full knowledge and mundane powers (it cannot cast spells, use psionics, use magical abilities, etc.), but no gear. The double is under caster's mental control. If the caster dies, the double dies as well, but the reverse is not true. Should the double die, the next casting of this spell will cost extra 10 FP (this does not apply to maintenance, only to casting).

If the caster can see his shadow double, he may use it as the origin of his spells or other supernatural abilities, including touch attacks.

Statistics: Duplication 1 (Accessibility, Mundane abilities, -10%; Construct, +60%; Cosmic, Origin of spells, limited by Vision-Based, Reversed, +40%; Sorcery, -15%) [62].

Shadow Form

Keywords: None.

Full Cost: 103 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

The caster and everything they are carrying up to their Heavy Encumbrance become a two-dimensional shadow. The caster can slip along walls and floors – and through the thinnest cracks (anything wide enough to fit their shoulders through) – at their usual ground Move. They can also turn 90° to a surface and stand up in three-dimensional space – like a two-dimensional “cutout” – in order to bridge gaps, walk normally, or turn around. They can also defy gravity, creeping up walls and across ceilings at half Move.

Physical attacks do half damage to the caster in this form. Energy attacks do normal damage, except for light-based attacks, which do 50% extra damage. Purely mental abilities affect them normally. The caster cannot perform any purely physical attacks or actions, but use magic, psi, and similar abilities.

Statistics: Shadow Form (3-D Movement, +20%; Can Carry Objects, Heavy, +100%; Sorcery, -15%) [9].

Shadow Jump

Keywords: None.

Full Cost: 20 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

While in a shadowy environment (illumination penalty -4 or worse), you can teleport to any other shadow you are able to see with your own eyes. You cannot use your own shadow to teleport. You can carry up to Medium Encumbrance when you travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you.

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any shadow you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds!

Statistics: Warp (Accessibility, Only to other shadows, -20%; Extra Carrying Capacity, Medium, +20%; No Strain, +25%; Range Limit, 10 yards, -50%; Requires Concentrate, -15%; Sorcery, -15%; Special Portal, Shadow, -20%; Vision-Based, Reversed, -20%) [20].

Shadow Magic (Spell)

Keywords: Varies.

Full Cost: Varies.

Casting Roll: Varies. Use IQ or Artist (Illusion) to convince that the illusion is real.

Range: Varies.

Duration: Varies.

This is not a spell, but a category of spells that duplicate other spells in a version that is partially illusory and partially real. Thus, Shadow Magic (Fireball) and Shadow Magic (Rain of Stones) are two different spells. The duplicated spell must have an obvious effect that directly affects the subject's body. Spells without any physical effects, or spells that directly affect mind or body, such as most Mind

Control, Communication and Empathy, or Body Control spells, will not work with Shadow Magic. Likewise, Enchantment, Information, and summoning spells will not work with Shadow Magic because they don't produce an obvious physical effect that can be duplicated with an illusion. Additionally, spells that just affect the senses (such as Darkness or Flash) can't be cast in a Shadow Magic version, since they have no visible, physical effect on the subject's body. It is up to the GM to determine which spells have a sufficiently strong physical component to be cast as Shadow Magic.

If the spell meets the criteria for be cast as Shadow Magic, the mage can cast the spell, taking the same amount of time that he would take to cast the real version of the spell. The subject gets the same roll to resist that he would get against the full version of the spell. In addition, make a Quick Contest of IQ against the subject's Per. You may substitute Artist (Illusion) for IQ, if it is higher. If the subject resists, he disbelieves the shadowy illusion and is affected at 25% of its power (quarter the damage, quarter the penalties, etc.) If he fails to resist, then he is affected fully. For lasting effects, roll this Quick Contest every minute.

Statistics: Same as the real spell but with an additional Quasi-Real, -15% limitation that is Requires IQ vs. Per Roll, -20% applied to 3/4 of the spell.

Shadow Walk

Keywords: None.

Full Cost: 85 points.

Casting Roll: IQ, additional IQ to cross the Plane of Shadow; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous. Travel takes time.

To use the Shadow Walk spell, you must be in an area of shadowy illumination. You and anything you carry (including other creatures) are then transported along a coiling path of shadowstuff to the edge of the Material Plane where it borders the Plane of Shadow. The effect is largely illusory, but the path is quasi-real.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified for distance and preparation time as per Warp (p. B97). Apply a bonus of +1 per additional 2 FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you are shunted into the quasi-real space between the Material Plane and the Plane of Shadow. In the region of shadow, you move at a rate of 50 miles per hour, moving normally on the borders of the Plane of Shadow but much more rapidly relative to the Material Plane. Thus, you can use this spell to travel rapidly by stepping onto the Plane of Shadow, moving the desired distance, and then stepping back onto the Material Plane. Because of the blurring of reality between the Plane of Shadow and the Material Plane, you can't make out details of the terrain or areas you pass over during transit, nor can you predict perfectly where your travel will end. It's impossible to judge distances accurately, making the spell virtually useless for scouting or spying. Furthermore, when the spell effect ends, you are shunted to a random location somewhere in a circle with a radius equal to 1% of the distance you traveled (minimum one yard); e.g., if you traveled 10 miles on the Material Plane, you'd materialize somewhere in a 0.1-mile circle around your target. The better your casting roll, the closer you'll be to your target, but it's up to the GM exactly where you appear. On a critical failure, you're likely to appear high in the air or underground.

On a failure, you go nowhere and strain your ability to cast this spell: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily "burns out" and will not function again for 1d hours.

Shadow Walk can also be used to travel to other planes that border on the Plane of Shadow, but this usage requires the transit of the Plane of Shadow to arrive at a border with another plane of reality. The transit of the Plane of Shadow requires 1d/2 hours. This requires an additional casting roll as per Jumper (p. B64), but does not cost extra FP. It is possible for one casting roll to succeed while the other fails, or for both to fail.

Statistics: Jumper (Accessibility, Only in areas of shadowy illumination, -20%; Accessibility, Only on planes adjacent to the Plane of Shadow, -5%; Cannot Escort, -10%; Cannot Follow, -20%; Limited Access, Planes adjacent to the Plane of Shadow, -10%; Extra Carrying Capacity, Extra-Heavy, +50%; Magical, -10%; Nuisance Effect, Delay, -40%; Reduced Fatigue Cost 1, +20%; Warp Jump, +10%) [65] + Warp (Accessibility, Only on planes adjacent to the Plane of Shadow, -5%; Accessibility, Only to a place you could have traveled to normally given time, -20%; Accessibility, Only in areas of shadowy illumination, -20%; Blind Only, -50%; Drift, -15%; Extra Carrying Capacity, Extra-Heavy, +50%; Limited Speed, -50%; Reliable 5, +25%; Requires Concentrate, -15%; Sorcery, -15%; Warp Jump, +10%) [20].

Shadow-Slay

Keywords: Resisted (HT or Will).

Full Cost: 70 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell turns the subject into a two-dimensional shadow and erases him with magic similar to Remove Shadow. The subject resists with the higher of HT or Will.

Statistics: Affliction 1 (HT or Will; Cosmic, Leaves no trace of the victim, +50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Sorcery, -15%) [70].

Shadowplay

Keywords: Area (Leveled).

Full Cost: 5 points for level 1 + 12.5 points/additional level*.

Casting Roll: Artist (Illusion) to determine how convincing the shadows are.

Range: 100 yards.

Duration: Indefinite.

You can project *stationary, changing, two-dimensional* shadows onto a vertical surface anywhere that you can see within 100 yards. This requires constant concentration. During the concentration you can change the image. Used mostly for entertainment.

To find the maximum square yardage available, look up the level of this spell on the *Leveled Area Table (GURPS Thaumatology: Sorcery, p. 9)* and multiply the given radius by 3. Alternatively, know that Shadowplay 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Shadowplay 3 has a limit of 24 square yards, allowing the sorcerer to project shadows six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form these shadows into any shape he wishes.

Statistics: Illusion (Accessibility, Only shadows, -30%; Automatic Disbelief, -50%; Dispersal on attack or touch, -35%; Environmental, Vertical Surfaces, -20%; Nuisance Effect, Only Artist (Illusion) roll, -5%; Ranged, +40%; Sorcery, -15%; Variable, Area, +5%; Visual Only, -30%; Wall, Shapeable, +60%) [5]. Additional levels add Area Effect (+50%) [+12.5*].

* Calculate the total cost and then round up.

Sharpen

Keywords: Weapon Buff.

Full Cost: 12 points. (KYOS: 10 points).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell adds +2 to swing damage and +1 to thrust damage of a cutting or impaling weapon.

Statistics: Affliction 1 (HT; Accessibility, Only on cutting or impaling weapons, -30%; Advantage, Sharpen, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%)

[12] (KYOS: 10). *Note: "Sharpen" is Striking ST 2 (Magical, -10%; One Attack, This weapon, -60%) [3].* (KYOS: 1).

Sharpen Blade

Keywords: Weapon Buff.

Full Cost: 43 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The bladed weapon enhanced gains a (2) armor divisor for the duration, which does *not* stack with any other armor divisors.

Statistics: Affliction 1 (HT; Accessibility, Only on bladed weapons, -30%; Advantage, Sharpen Blade, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [43].

Notes: "Sharpen Blade" is 34 points, per Enhances or Transforms an Existing Attack (*GURPS Thaumatology: Sorcery*, p. 11).

Sharpen Glass

Keywords: Weapon Buff.

Full Cost: 9 points. (KYOS: 7 points).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell adds +2 to swing damage and +1 to thrust damage of a cutting or impaling weapon made of glass or obsidian.

Statistics: Affliction 1 (HT; Accessibility, Only on glass/obsidian cutting or impaling weapons, -60%; Advantage, Sharpen Glass, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [9] (KYOS: 7). *Note: "Sharpen Glass" is Striking ST 2 (Magical, -10%; One Attack, This weapon, -60%) [3].* (KYOS: 1).

Sharpen Metal

Keywords: Weapon Buff.

Full Cost: 11 points. (KYOS: 9 points).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell adds +2 to swing damage and +1 to thrust damage of a cutting or impaling weapon made of metal.

Statistics: Affliction 1 (HT; Accessibility, Only on cutting or impaling metal weapons, -40%; Advantage, Sharpen Metal, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11] (KYOS: 9). *Note: "Sharpen Metal" is Striking ST 2 (Magical, -10%; One Attack, This weapon, -60%) [3].* (KYOS: 1).

Shape Acid

Keywords: None.

Full Cost: 12.5 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move a particular mass of acid (in the context of fantasy games, this is any corrosive substance, which can be an actual chemical acid, base, or salt). The higher your level of Shape

Acid, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of acid in the form of a single object or amorphous mass or a circular area of acidic fog with a radius equal to the spell's level in yards. For example, Shape Acid 3 would let you affect 90 lbs. of acid in a vat.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Control level. This requires constant concentration.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Statistics: Control Acid (Ranged, +40%; Sorcery, -15%) [12.5/level].

Shape Air

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can control the shape of air in an area, which must have an initial radius (in yards) no greater than your level of this spell. This even allows you to "walk" the air, with a Move equal to your spell level. You cannot split the air into multiple components – it must remain one continuous area – but you do not have to leave it in a circular shape. You must actively concentrate while shaping or moving the air, but may otherwise maintain this spell normally (no concentration required).

Statistics: Control Air (Ranged, +40%; Sorcery, -15%) [25/level].

Shape Bone

Keywords: None.

Full Cost: 12.5 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move bone material, including teeth, horns, and shells. The bones must not belong to a living or animated creature. The higher your level of Shape Bone, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of bone in the form of a single object or amorphous mass. For example, Shape Bone 3 would let you affect a 90-lb. mammoth tusk or even 90 lbs. of bone shards in a heap... but against a foe with a 8-lb. bone club and a 15-lb. bone shield you could only affect one target, even though the total weight is much less than your limit.

Shape Bone doesn't work on complex, manufactured artifacts unless they're made almost entirely of bone. You could affect a bone club, but not a complex mechanism with only a few bone parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against

Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Shape Bone level. This requires constant concentration. You can make a solid bone object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Bone lets you move or shape bone to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a mammoth tusk into armor with the DR of bone by making an Armoury roll.

Offensively, Shape Bone is more limited. By concentrating, you can move an existing bone object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control bone, – or if you can move bone onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Bone 10 might cause a mini-earthquake if your foe is standing on a pile of bones good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Bone (Ranged, +40%; Sorcery, -15%) [12.5/level].

Shape Clouds

Keywords: Area (Special).

Full Cost: 21 points for level 1 + 13 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

This spell allows the caster to shape clouds as he sees fit. By making an Artist (Sculpting) or Artist (Illusion) skill roll he can create detailed and artistic images in the clouds. The clouds retain their shape while the caster keeps concentrating, but when he stops, the time their shape remains unchanged depends on the local weather conditions. This spell's area of effect has a radius of 0.1 miles per level.

Statistics: Control Clouds 1 (Accessibility, Only to create images, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [21/level]. Additional levels add Control Clouds +1 (Accessibility, Only to create images, -50%; Only increases area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [13/level]. *Note:* As this is one advantage (Control Clouds) with the Sorcery limitation, not two, it costs only 1 FP to use.

Shape Darkness

Keywords: None.

Full Cost: 19 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can control the shape of a three-dimensional darkness created with the Darkness, Blackout, or similar spells, which must have an initial radius (in yards) no greater than your level of this spell. This even allows you to move the darkness, with a Move equal to your spell level. You cannot split the darkness into multiple components – it must remain one continuous area – but you do not have to leave it in a circular shape. You must actively concentrate while shaping or moving the darkness, but may otherwise maintain this spell normally (no concentration required).

This spell also allows the caster to shape existing two-dimensional shadows into other two-dimensional shadowy shapes. Shadows can be reduced in size easily, but enlarging the shadows makes them slightly transparent. The average casual observer won't notice, but anyone looking intently at the shadow gets an IQ roll to notice that it doesn't have the "substance" it should. Shadows do not have to remain attached to the objects that cast them.

Statistics: Control Darkness 1 (Accessibility, Only to shape and move darkness, -30%; Ranged, +40%; Sorcery, -15%) [19/level].

Shape Earth

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move earth, including asphalt, brick, ceramic, concrete, and rock, but not purified metals. The higher your level of Shape Earth, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of earth in the form of a single object or amorphous mass. For example, Shape Earth 3 would let you affect a 90-lb. stone slab or even 90 lbs. of pebbles in a heap . . . but against a foe with a 8-lb. stone club and a 15-lb. stone shield you could only affect one target, even though the total weight is much less than your limit.

Shape Earth doesn't work on complex, manufactured artifacts unless they're made almost entirely of earth or stone. You could affect a stone club, but not a complex mechanism with only a few stone parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Shape Earth level. This requires constant concentration. You can make a solid stone object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Earth lets you move or shape earth to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a stone slab into armor with the DR of stone by making an Armoury roll.

Offensively, Shape Earth is more limited. By concentrating, you can move an existing stone object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control earth, – or if you can move earth onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Earth 10 might cause a mini-earthquake if your foe is standing on the ground good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Earth (Ranged, +40%; Sorcery, -15%) [25/level].

Shape Fluid

Keywords: None.

Full Cost: 37.5 points/level*.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move a particular mass of fluids (air, water, and such). The higher your level of Shape Fluid, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of

liquid fluid in the form of a single object or amorphous mass or a circular area of gaseous fluid with a radius equal to the spell's level in yards. For example, Shape Fluid 3 would let you affect 90 lbs. of water in a tub.

Shape Fluid doesn't work on complex, manufactured artifacts unless they're made almost entirely of fluid. If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Control level. This requires constant concentration. You can make a solid ice object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Fluid lets you move or shape fluids to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape an ice table into armor with the DR of ice by making an Armoury roll.

Offensively, Shape Fluid is more limited. By concentrating, you can move an existing fluid object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control fluid, – or if you can move fluid onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Fluid 10 might cause water if your foe is standing in water good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Fluid (Ranged, +40%; Sorcery, -15%) [37.5/level*].

* Calculate the total cost, then round up.

Shape Fungus

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move a particular dead fungal matter. The higher your level of Shape Fungus, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of dead fungal matter in the form of a single object or amorphous mass. For example, Shape Fungus 3 would let you affect a 90-lb. cabinet made from a giant mushroom or even 90 lbs. of minced mushrooms in a heap . . . but against a foe with a 3-lb. fungal spear and a 4-lb. fungal shield you could only affect one target, even though the total weight is much less than your limit.

Shape Fungus doesn't work on complex, manufactured artifacts unless they're made almost entirely of fungal matter. You could affect a spear or a bow, but not a complex mechanism with only a few fungal parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against

Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Control level. This requires constant concentration. You can make a solid fungal object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Fungus lets you move or shape fungi to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a giant mushroom head into armor with the DR of fungus by making an Armoury roll.

Offensively, Shape Fungus is more limited. By concentrating, you can move an existing fungal object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control fungi, – or if you can move fungi onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Fungus 10 might cause a mini-earthquake if your foe is standing on fungal floor good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Fungus (Ranged, +40%; Sorcery, -15%) [25/level].

Shape Glass

Keywords: None.

Full Cost: 12.5 points/level*.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move glass, including obsidian. The higher your level of Shape Glass, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of glass in the form of a single object or amorphous mass. For example, Shape Glass 3 would let you affect a 90-lb. glass slab or even 90 lbs. of glass shards in a heap . . . but against a foe with a 8-lb. obsidian club and a 15-lb. glass shield you could only affect one target, even though the total weight is much less than your limit.

Shape Glass doesn't work on complex, manufactured artifacts unless they're made almost entirely of glass or obsidian. You could affect an obsidian club, but not a complex mechanism with only a few glass parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Shape Glass level. This requires constant concentration. You can make a solid glass object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Glass lets you move or shape glass to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a glass slab into armor with the DR of stone by making an Armoury roll.

Offensively, Shape Glass is more limited. By concentrating, you can move an existing glass object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control glass, – or if you can move glass onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Glass 10 might cause a mini-earthquake if your foe is standing on the glass floor good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Glass (Ranged, +40%; Sorcery, -15%) [12.5/level*].

* Calculate the total cost, then round up.

Shape Light

Keywords: None.

Full Cost: 19 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can control the shape of a light, which must have an initial radius (in yards) no greater than your level of this spell. This even allows you to move the light, with a Move equal to your spell level. You cannot split the light into multiple components – it must remain one continuous light – but you do not have to leave it in a circular shape. You must actively concentrate while shaping or moving the light, but may otherwise maintain this spell normally (no concentration required).

Each level of Shape Light gives the effect of one two-dimensional reflector with length and width in yards no larger than your spell level. For instance, Shape Light 3 would let you route light around obstacles as if you had three mirrors up to 3 yards x 3 yards in size, or block light completely as if you had three 3 yard x 3 yard screens.

Statistics: Control Light 1 (Accessibility, Only to shape and move light, -30%; Ranged, +40%; Sorcery, -15%) [19/level].

Shape Metal

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move metal. The higher your level of Shape Metal, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of metal in the form of a single object or amorphous mass. For example, Shape Metal 3 would let you affect a 90-lb. metal slab or even 90 lbs. of metal shavings in a heap . . . but against a foe with a 8-lb. metal sword and a 15-lb. metal shield you could only affect one target, even though the total weight is much less than your limit.

Shape Metal doesn't work on complex, manufactured artifacts unless they're made almost entirely of metal. You could affect a metal sword, but not a complex mechanism with only a few metal parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Shape Metal level. This requires constant concentration. You can make a solid metal object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Metal lets you move or shape metal to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a metal slab into armor with the DR of metal by making an Armoury roll.

Offensively, Shape Metal is more limited. By concentrating, you can move an existing metal object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control metal, – or if you can move metal onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Metal 10 might cause a mini-earthquake if your foe is standing on the metal good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Metal (Ranged, +40%; Sorcery, -15%) [25/level].

Shape Plant

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move a particular dead plant matter (wood, but not fossils, oil, etc.). The higher your level of Shape Plant, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of dead plant matter in the form of a single object or amorphous mass. For example, Shape Plant 3 would let you affect a 90-lb. wooden cabinet or even 90 lbs. of wooden shavings in a heap . . . but against a foe with a 3-lb. spear and a 4-lb. shield, all wooden, you could only affect one target, even though the total weight is much less than your limit.

Shape Plant doesn't work on complex, manufactured artifacts unless they're made almost entirely of wood. You could affect a spear or a bow, but not a complex mechanism with only a few wooden parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Control level. This requires constant concentration. You can make a solid wooden object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Plant lets you move or shape wood to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a wooden table into armor with the DR of wood by making an Armoury roll.

Offensively, Shape Plant is more limited. By concentrating, you can move an existing wooden object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control wood, – or if you can move wood onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Plant 10 might cause a mini-earthquake if your foe is standing on wooden floor good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Wood (Ranged, +40%; Sorcery, -15%) [25/level].

Shape Plastic

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move plastic. The higher your level of Shape Plastic, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of plastic in the form of a single object or amorphous mass. For example, Shape Plastic 3 would let you affect a 90-lb. plastic sheet or even 90 lbs. of plastic shavings in a heap . . . but against a foe with a 8-lb. plastic bow and a 15-lb. plastic shield you could only affect one target, even though the total weight is much less than your limit.

Shape Plastic doesn't work on complex, manufactured artifacts unless they're made almost entirely of plastic. You could affect a plastic bow, but not a complex mechanism with only a few plastic parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Shape Plastic level. This requires constant concentration. You can make a solid plastic object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Plastic lets you move or shape plastic to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape a plastic sheet into armor with the DR of plastic by making an Armoury roll.

Offensively, Shape Plastic is more limited. By concentrating, you can move an existing plastic object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control plastic, – or if you can move plastic onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Plastic 10 might cause a mini-earthquake if your foe is standing on the plastic floor good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Plastic (Ranged, +40%; Sorcery, -15%) [25/level].

Shape Smoke

Keywords: None.

Full Cost: 12.5 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can control the shape of smoke in an area, which must have an initial radius (in yards) no greater than your level of this spell. This even allows you to "walk" the smoke, with a Move equal to your spell level. You cannot split the smoke into multiple components – it must remain one continuous

area – but you do not have to leave it in a circular shape. You must actively concentrate while shaping or moving the smoke, but may otherwise maintain this spell normally (no concentration required).

This is also an Air spell.

Statistics: Control Smoke (Ranged, +40%; Sorcery, -15%) [12.5/level].

Shape Water

Keywords: None.

Full Cost: 25 points/level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can shape and move a particular mass of water (including steam or ice). The higher your level of Shape Water, the larger the quantity you can affect. You can affect up to 10 x (level squared) lbs. of water in the form of a single object or amorphous mass or a circular area of steam with a radius equal to the spell's level in yards. For example, Shape Water 3 would let you affect a 90-lb. ice sculpture or even 90 lbs. of water in a tub.

Shape Water doesn't work on complex, manufactured artifacts unless they're made almost entirely of water (or ice, usually). You could affect an ice spear, but not a complex mechanism with only a few ice parts.

If your target is already under someone else's direct control, roll a Quick Contest. You roll against IQ; they roll against IQ if using Control or Telekinesis, their skill level if using a spell, and so on. You must win to establish control. Likewise, others can overpower your spell by winning a Quick Contest against your IQ.

After establishing control, you can reshape the target. Forming a simple shape (blob, column, sphere, etc.) requires a Concentrate maneuver but no die roll. If the result is meant to be beautiful or functional, though, the GM may deem the effort a long task (see p. B346) and require skill rolls against Armoury, Artist, Machinist, and so on. You can work without tools, but you must know what you're doing.

You can also cause the target to elongate or flow at a Move equal to your Control level. This requires constant concentration. You can make a solid ice object ooze, roll, or seep along the ground or a surface, and even reshape it in ways that defy gravity.

When you stop concentrating, you immediately give up control. Stable forms become permanent, while unstable ones collapse instantly.

Defensively, Shape Water lets you move or shape water to obstruct attacks. This requires a Concentrate maneuver. Such barriers give whatever cover the material normally provides. For instance, it might let you shape an ice table into armor with the DR of ice by making an Armoury roll.

Offensively, Shape Water is more limited. By concentrating, you can move an existing ice object to impede your enemy's movement, like any object of that weight. In all cases, your foe can dodge.

If a foe is standing in an area where you control water, – or if you can move water onto him – you may inflict combat penalties on him. This requires flexibility on the GM's part: Shape Water 10 might cause water if your foe is standing in water good for -10 to attack rolls. Tricks like this require a Concentrate maneuver and an IQ or Tactics roll.

Statistics: Control Water (Ranged, +40%; Sorcery, -15%) [25/level].

Shapeshift Others

Keywords: Buff.

Full Cost: 31 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster transforms the subject into an animal. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled.

(This does not change if the sorcerer is the subject.) Each animal form is a different spell, to be learned separately. The caster may only learn the form of an animal with which he is familiar. If the subject is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The subject retains his intelligence, but gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Advantage, Shapeshift Others, +150%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [31]. Notes: "Shapeshift Others" is Alternate Form (Animal; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [15]. If turned into a "usually on" magical item (*GURPS Thaumatology - Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so. This spell costs 31 points for a racial template worth no more than the subject's native racial template. A more powerful form costs 31 points plus 90% of the difference in cost between the subject's native template and that of the animal form. The caster may learn to affect more powerful subjects by investing more points into this spell.

Shapeshifting

Keywords: None.

Full Cost: 22 points or more; see text.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Change to the form of an animal. Each animal form is a different spell, to be learned separately. The caster may only learn the form of an animal with which he is familiar. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. This means that the wearer cannot cast spells unless he knows them so well that they can be performed without gestures! Note that FP are not increased for spellcasting purposes.

Each hour that the spell continues, the caster must make a roll against IQ; failure means that the caster loses a point of IQ, continuing until the normal IQ of that beast is reached. Should the caster's IQ drop to 5, he is trapped in beast form forever unless the spell is removed by Remove Curse (other spells won't counter it). Lost IQ is regained when native form is reassumed.

If the caster has a single Shapeshifting spell, it costs 22 points for a racial template worth no more than his native racial template. A more powerful form costs 22 points plus 90% of the difference in cost between the caster's native template and that of his animal form. If the caster has multiple Shapeshifting spells, he pays full cost for the most expensive form. The less powerful forms cost a flat 22 points apiece. Minimum cost per form is still 22 points.

Statistics: Alternate Form (Nuisance Effect, IQ Reduction, -20%; Reduced Time 4, +80%; Sorcery, -15%) [22].

Share Vitality

Keywords: None.

Full Cost: 6 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By making physical contact with a subject, you may immediately take on his injuries. These affect you even if you have specific immunities to them. They get better at the usual "natural" rate unless cured via medicine or a special ability. You may heal subjects of your own race and any "similar" races (GM's call); e.g., a human can heal other humans but not dogs or plants.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Empathic, -50%; Injuries Only, -20%; Sorcery, -15%) [6].

Shared Doom

Keywords: Resisted (Will).

Full Cost: 50 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

This spell binds the fate of the subject and the caster. If the caster dies, the subject begins to lose 1 HP per minute until this spell is lifted or the caster is resurrected! This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Dependency (Caster's Life; Constantly), +25%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [50].

Shatter

Keywords: Resisted (HT).

Full Cost: 37 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Does 2d damage to the subject (works only on inanimate items). See p. B557, for DR and HP of various items. DR does not protect against this! If the object loses 2/3 of its HP to this spell, it becomes structurally unstable until it is repaired above this threshold. If it is brought to 0 HP while unstable, it is instantly destroyed, as if it was brought to -10xHP instead.

Statistics: Crushing Attack 2d (Accessibility, Only on objects, -10%; Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Symptoms, 2/3 HP, Fragile (Enhanced Unnatural), +100%) [37].

Shatter Ice

Keywords: Resisted (HT).

Full Cost: 17 points/level.

Casting Roll: IQ. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Instantaneous.

Your touch deals 2d crushing damage per level of this spell to a creature or object made of ice. DR does not protect against this.

Statistics: Crushing Attack 2d (Accessibility, Only on ice, -40%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [17/level].

Shatterproof

Keywords: Buff.

Full Cost: 24 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Makes a small object (like a weapon, or anything else that a normal human could hold in one hand) resistant to breakage. A cheap or regular metal weapon is treated as a "fine" quality weapon while the spell lasts, and a "fine" weapon as "very fine." Other items have their hit points doubled, and

will never break due to accidental dropping, etc. It doubles the DR and HP of a shield if the shield-breaking rules are used (p. B484). This spell does not increase resistance to “penetration,” so it’s no good for walls, armor, etc.

Statistics: Affliction 1 (HT; Accessibility, Only on small objects, -20%; Advantage, Shatterproof, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [24]. **Note:** “Shatterproof” is Very Fit (Variant; Magical, -10%) [14].

Shattershot

Keywords: Weapon Buff.

Full Cost: 36 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell enchants the weapon, causing its projectiles to rupture on impact, scattering harmful fragments. The attack gains the Fragmentation modifier (p. B104). Note that this destroys the projectile – be sure you want to sunder reusable ammo like an arrow or a spear!

The 1st level of this spell gives fragments that inflict 1d cutting damage – or *burning* damage, if the affected weapon is burning, incendiary, or simply on fire. The fragments attack everybody within 5 yards as explained under *Fragmentation Damage* (p. B414). Note that hits aren’t guaranteed, cover protects, and victims may dodge. Shattershot cannot be combined with Conic Blast. The fragmentation damage and area increase with the spell level, as shown on the table below. However, fragment damage can never exceed the underlying attack’s basic damage.

Level	Damage	Area of Effect	Level	Damage	Area of Effect
1	1d	5 yards	4	4d	20 yards
2	2d	10 yards	5	5d	25 yards
3	3d	15 yards	6	6d	30 yards

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Shattershot, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. **Notes:** “Shattershot” is 26 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -2 in penalties [+16]. This spell is based on the Shattershot imbue skill.

Shimmering Fields

Keywords: Area (Leveled).

Full Cost: 17 points for level 1 + 2.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Creates a storm of electric discharges. It does not block vision, but it inflicts burning surge damage to anyone standing in it. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Every creature in the area takes 1d burning surge damage per turn. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Burning Attack 1d (Area Effect, 2 yards, +50%; Persistent, +40%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%; Variable, Area, +5%) [17]. Further levels add Area Effect (+50%) to the advantage [+2.5*].

* Calculate the total cost and then round down (because the base ability costs just 16.5 points before rounding).

Shock Vulnerability

Keywords: Resisted (HT).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

This spell makes the subject more vulnerable to electric surges, giving it the Electrical disadvantage (p. B134).

Statistics: Affliction 1 (HT; Disadvantage, Electrical, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [28].

Shocking Touch

Keywords: Obvious.
Full Cost: 10 points/level.
Casting Roll: None. Use unarmed combat skill or DX to hit.
Range: Touch.
Duration: Instantaneous.

This spell charges the caster's hand with electricity. The caster must touch the subject to trigger this spell. The touch deals 1d burning surge damage per level of this spell. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Burning Attack 1d (Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [10/level].

Shrapmetal

Keywords: Obvious.
Full Cost: 11.2 points/level.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 10 yards.
Duration: Instantaneous.

You fire a cone of metal shards that do 1d cutting damage per level. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell's maximum range. This spell has the 1/2D range of 2 yards.

Statistics: Cutting Attack 1d (Cone 5, +100%; Increased 1/2D, x2, +5%; Reduced Range, 1/10, -30%; Sorcery, -15%) [11.2/level].

Shrink

Keywords: None.
Full Cost: 9 points for level 1 + 8.5 points/additional level*.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

The caster shrinks. Each level of Shrink lets him change his Size Modifier by -2. He changes to his minimum size in one second. He cannot carry any equipment, not even clothing, when he shrinks.

When the caster shrinks, find his new height from the *Size Modifier Table* (p. B19). Every -6 to SM reduces height by a factor of 10. Reduce Move, reach, damage (with unarmed attacks, Innate Attacks, or shrunken weapons), HP, and DR in proportion to height. Every full -2 to SM also reduces

weight by a factor of 10; for odd-numbered levels, treat the extra -1 as an additional factor of 3 (e.g., -3 to SM reduces weight by a factor of 30).

Statistics: Shrinking 2 (Minimum Size Only, +0%; Sorcery, -15%) [9]. Each additional level adds 2 levels of Shrinking [+8.5*].

* Calculate the total cost and round up.

Shrink Object

Keywords: Resisted (HT).

Full Cost: 34 points for level 1 + 9 points/level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

If the subject object fails to resist, it shrinks. Each level of Shrink lets the caster change his subject's Size Modifier by -2. The subject changes to its minimum size in one second.

When the subject shrinks, find its new height from the *Size Modifier Table* (p. B19). Every -6 to SM reduces height by a factor of 10. Reduce Move, reach, damage (with unarmed attacks, Innate Attacks, or shrunken weapons), HP, and DR in proportion to height. Every full -2 to SM also reduces weight by a factor of 10; for odd-numbered levels, treat the extra -1 as an additional factor of 3 (e.g., -3 to SM reduces weight by a factor of 30).

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Shrink Object 1, +90%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [34]. *Notes:* Each level of "Shrink Object" is Shrinking 2 (Magical, -10%; Minimum Size Only, +0%) [9]. Each additional level adds further Shrink Object to the Advantage enhancement [+9].

Shrink Other

Keywords: Resisted (HT).

Full Cost: 34 points for level 1 + 9 points/level.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

If the subject fails to resist, it shrinks. Each level of Shrink lets the caster change his subject's Size Modifier by -2. The subject changes to his minimum size in one second. He cannot carry any equipment, not even clothing, when he shrinks.

When the subject shrinks, find his new height from the *Size Modifier Table* (p. B19). Every -6 to SM reduces height by a factor of 10. Reduce Move, reach, damage (with unarmed attacks, Innate Attacks, or shrunken weapons), HP, and DR in proportion to height. Every full -2 to SM also reduces weight by a factor of 10; for odd-numbered levels, treat the extra -1 as an additional factor of 3 (e.g., -3 to SM reduces weight by a factor of 30).

Statistics: Affliction 1 (HT; Accessibility, Only on creatures, -10%; Advantage, Shrink Other 1, +90%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [20]. *Notes:* Each level of "Shrink Other" is Shrinking 2 (Magical, -10%; Minimum Size Only, +0%) [9]. Each additional level adds further Shrink Other to the Advantage enhancement [+9].

Shuriken Leaf

Keywords: Missile, Obvious.

Full Cost: 4 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 50 yards.

Duration: Instantaneous.

You cause a single leaf to fire itself at a target as if it were a shuriken. This may be a leaf you are holding or a leaf attached to a branch. Calculate the range for the spell using the distance from the

caster to the leaf (0 if he is holding it), but calculate the range for the attack using the distance from the leaf to the target. Use Innate Attack (Projectile) to hit. A Shuriken Leaf has 1/2D 25, Max 50, Acc 1, and deals 1d cutting damage or 1d-1 impaling damage depending on the leaf's shape (GM's judgment). The leaf may be blocked.

Statistics: Impaling Attack 1d-1 (Blockable, -5%; Environmental, Leaves, -30%; Inaccurate 2, -10%; Reduced Range, x1/2, -10%; Sorcery, -15%) [2/5=1] + Cutting Attack 1d (Blockable, -5%; Environmental, Leaves, -30%; Inaccurate 2, -10%; Reduced Range, x1/2, -10%; Sorcery, -15%) [3]. The attacks are built as Alternative Abilities.

Sickness

Keywords: Resisted (HT).

Full Cost: 28 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

The subject becomes nauseated (p. B428) for 1 minute.

This is a Body Control and a Mind Control spell. When this spell is cast as a Mind Control spell, it can only affect sapient creatures.

Statistics: Affliction 1 (HT; Nauseated, +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [28]. *Note:* When used as a Mind Control spell, add Accessibility, Only on sapient beings, -10% to Affliction. This makes the spell cost 27 points.

Silk String

Keywords: Obvious.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You can produce a 5-yard long string of silk. You can cast this spell continuously without letting go of the string, each time adding 5 yards to its length. This gives you improved climbing ability (p. B349) and can also be used with Swinging (*GURPS Power-Ups 2 – Perks*, p. 16). You cannot entangle foes with the string. The string disappears when you let go of it.

Statistics: Climbing Line (Sorcery, -15%) [1].

Simple Illusion

Keywords: Area (Leveled).

Full Cost: 34 points for level 1 + 12.5 points/additional level*.

Casting Roll: None. Use IQ or Artist (Illusion) to determine how convincing it is.

Range: 100 yards.

Duration: Indefinite.

You can create an illusion anywhere that you can see within 100 yards; see Area (Sorcery, p. 9) for the size. It affects only vision. You must win a Quick Contest of IQ – or Artist (Illusion), if better – against the Per of anyone you want to fool; otherwise they notice something “off.” Do not apply range penalties to your roll. Their roll is at +4 if they have reason to be alert for illusions or +10 if you made it appear from out of nowhere. However, even if they successfully “disbelieve,” your illusion doesn’t disappear. Thus, even an obvious illusion can be useful to block line of sight.

You must concentrate to change the illusion or to have it behave “intelligently”. Without concentration, it will conform to your expectations for how it should behave; e.g., an illusionary wolf will shy from a torch or appear to snarl if someone comes close.

Statistics: Illusion (Independence, +40%; Ranged, +40%; Sorcery, -15%; Visual Only, -30%) [34]. Additional levels add Area Effect (+50%) [+12.5*].

* Calculate the total cost and then round up (because the base ability costs just 33.75 points before rounding). Level 2 costs 47 points, level 3 costs 59 points, level 4 costs 72 points, level 5 costs 84 points, and so on.

Simulacrum

Keywords: None.

Full Cost: 44 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite, see text.

The caster animates a golem in the exact image of a particular victim. The golem must be prepared for a specific target; this requires the incorporation of something from the original's body (hair, blood, etc.) into the creation. Otherwise, any materials appropriate for golems (clay, stone, flesh, etc.) may be used, along with any other materials that the GM approves. An appropriate Shape spell or Artist (Sculpting) skill roll at -10 is necessary to achieve a good likeness – the caster need not do this himself. The simulacrum, once enchanted, appears identical to the target (including such details as eye color and skin tone) through a sort of always-on illusion disguise.

The simulacrum has the same attributes as the underlying golem. Golems intended as simulacra are often designed with higher IQ than ordinary golems, to improve the deception. Once the simulacrum is activated, it takes on the persona and knowledge of the target, *as the caster perceives them*.

If the simulacrum is destroyed, the caster must wait a full day to create a new one. You can only cast this spell if your character's point total is equal or bigger than the simulacrum's.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Simulacrum; Built on 100%; Constantly, no roll required; Adjustable, Simulacra, +100%; Magical, -10%; Minion, +50%; Requires preparation, -20%) [44].

Singing Trees

Keywords: Area (Leveled), Resisted (DX, Special).

Full Cost: 48 points + 5 points/additional level.

Casting Roll: Will. Use Hearing to notice threats.

Range: Unlimited.

Duration: Eight hours.

Record the sorcerer's margin of success when casting the spell. When anybody walks by or touches a plant in the area, they must roll against DX at a penalty equal to that margin. Success allows the subject to move freely for one second, after which he must roll again. The moment he fails, a breeze through the leaves makes a whistling sound: +10 on all Hearing rolls (p. B358) to notice his movement!

The noisiness lasts until the subject leaves the area. Alternatively, he may remain within and stand perfectly still for three full minutes, after which the effect "resets" and he's able to make DX rolls again to sneak by.

If the subject is masked by magical silence, roll a Quick Contest using the sorcerer's Will. If this spell wins, the magical silence is ignored; if it ties or loses, Singing Trees has no effect on that subject.

Statistics: Affliction 1 (DX; Area Effect, 2 yards, +50%; Based on DX, +20%; Disadvantage, Noisy 5, +10%; Environmental, Vegetation, -20%; Extended Duration on Persistent, 3,000x, +140%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Sorcery, -15%; Terminal Condition, Leaving the area, -20%; Variable, Area, +5%) [48]. Additional levels add Area Effect (+50%) [+5].

Sink

Keywords: None or Buff.

Full Cost: 2 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

The subject gains Cannot Float (p. B165). If cast on an inanimate object that is keeping anyone afloat, everyone affected must be willing.

The basic (2-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Controllable Disadvantage (Cannot Float; Cosmic, No die roll required, +100%; Sorcery, -15%) [2]. The improved version is Affliction 1 (HT; Disadvantage, Cannot Float, +1%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12].

Skull-Spirit

Keywords: None.

Full Cost: 44 points.

Casting Roll: Will.

Range: Touch.

Duration: Hours equal to margin of success on the casting roll.

Summon a skull-spirit, a ghostly assassin created from the life force that lingers around a sapient being's skull (*GURPS Magic*, page 150). Requires the skull of a sapient creature, which is destroyed in the casting. At the end of the casting, you must pay 1 FP and make a Will roll to animate the skull. If you are victorious, the skull is animated for margin of success hours.

If the skull-spirit is destroyed, the summoner must wait a full day to call replacements. Dismissing the skull-spirit is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is equal or bigger than the skull-spirit's.

Statistics: Ally (Skull-Spirit; Built on 100%; Constantly, no roll required; Accessibility, Requires a sapient being's skull, -10%; Conjured, +100%; Magical, -10%; Maximum Duration, hours equal to margin of success, -5%; Minion, +50%; Requires Will Roll, -5%) [44]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Skyhook

Keywords: None.

Full Cost: 43 points.

Casting Roll: None.

Range: 10 yards.

Duration: 1 minute.

This spell creates a solid hook of magical force, invisible to all but the caster, at a desired location. The hook need not be attached to anything, and is usually created in midair over a pit or chasm. Once cast, it remains immobile. Creatures can hang onto it, ropes can be tied to or hooked over it (appearing to hang from empty air), and so on. It supports loads of up to 720 pounds (KYOS: 1,590 pounds). If its weight limit is exceeded, the skyhook instantly vanishes. Where relevant, the skyhook has ST 19.

Statistics: Telekinesis 19 (Fixed Duration, +0%; Independent, +40%; Lift Only, -20%; One Task, Suspending, -60%; Sorcery, -15%) [43].

Slasher

Keywords: Area (Leveled), Obvious.

Full Cost: 53 points for level 1 + 10.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

Propels a cutting weapon through the area as if wielded by an invisible mad slasher. It must start in the caster's hand. When the spell is cast, the blade takes wing and whirls through the air too quickly for the eye to follow. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss.

Everybody in the area is attacked each turn, on their turn, at skill 14. The victim can try a Hearing roll at -2 to detect the weapon's whine; success permits any active defense, while failure allows only a dodge. All defenses are at -4 for an unseen attacker. Also roll 1d for the attack's origin: 1-3 is front, 4 is right-hand side (another -2 to defend), 5 is behind (no defense), and 6 is left-hand side (-2 to defend).

It's possible to break or grab the animated weapon. This requires a Hearing roll at -2 first. Success allows an attack on the blade at a basic -6 plus the usual -3 to -5 for weapon size (see *Striking at Weapons*, p. B400). The weapon cannot defend. Breaking it ends the spell. Grabbing it doesn't; it may try to break free each turn with ST 15.

The basic (53-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 10.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. You can always scale back the area when casting the spell.

Statistics: Cutting Attack 3d (Area Effect, 2 yards, +50%; Bombardment, Skill-14, -5%; No Signature, +20%; Nuisance Effect, Breakable, -5%; Nuisance Effect, Dodgeable, -5%; Nuisance Effect, Damage limited by ST, -5%; Requires Weapon, -10%; Sorcery, -15%; Surprise Attack, Random, +120%; Variable, Area, +5%) [53]. Additional levels add Area Effect (+50%/level) to the advantage [+10.5*].

* Calculate the total cost and then round down (because the base ability costs just 52.5 points before rounding). Level 2 of the spell costs 63 points, level 3 costs 74 points, level 4 costs 84 points, level 5 costs 95 points, and so on.

Sleep

Keywords: Resisted (Will).

Full Cost: 42 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The subject falls asleep for 3 minutes, if he fails to resist. After this, he can be woken normally, but he will not necessarily wake up right away, especially if already tired. Upon waking up, the subject is stunned (p. B420) and may roll vs. Will once per second to recover. The spell only affects sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sleep, +150%; Sorcery, -15%) [42].

Sleep Cloud

Keywords: Area (Leveled).

Full Cost: 52 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with green sleep gas. This gives -3 to all vision rolls made through it. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every creature that inhales the cloud, falls asleep for 3 minutes, if it fails a HT roll. After this, it can be woken normally, but it will not necessarily wake up right away, especially if already tired. Upon waking up, each subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Obscure Vision 3 (Drifting, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [11] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Drifting, +20%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Respiratory Agent, +50%; Sleep, +150%; Sorcery, -15%; Variable, Area, +5%) [41]. Further levels add Area Effect (+50%) to both advantages [+8].

Slice Egg

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.

Duration: Instantaneous.

The caster touches an egg and instantly slices it horizontally, vertically, or both, as if he was using an egg slicer.

Statistics: Accessory (Egg Slicer; Sorcery, -15%) [1].

Slicing Shadow

Keywords: Area (Leveled).

Full Cost: 25 points for level 1 + 6.5 point/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

This spell creates a smoky, immobile cloud in which black, whiplike whorls of deeper darkness appear and disappear. They have only momentary solidity, yet they slice as if they were unbreakable, razor-sharp ribbons of steel. It imposes a -5 penalty to Vision rolls made through it (including Infravision and Ultravision), and deals 1d-2 cutting damage to creatures within its area per turn.

Statistics: Cutting Attack 1d-2 (Area Effect, 2 yards, +50%; Link, +10%; Magical, -10%; Persistent, +40%; Variable, Area, +5%) [6] + Obscure Vision 5 (Extended, Infravision and Ultravision, +40%; Link, +10%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [19]. Further levels add Area Effect (+50%) to the advantages [+6.5*].

* Calculate the total cost, then round up.

Slide

Keywords: Buff.

Full Cost: 27 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject can slide down a slope as if skiing. The subject uses the Skiing skill, at default if necessary; assess a -2 penalty for not having poles to guide oneself with. The spell works equally well on all types of surfaces (sand, grass, stone...), but the subject still has to avoid any obstacles!

Down a good slope, the subject can sustain a Move equal to the subject's Skiing skill can be sustained relatively safely. Peak Move, in extremely good conditions, equals twice his Skiing skill.

On level ground, the spell is a nuisance; the subject is constantly affected as if he has just entered a Greased (*GURPS Magic*, p. 142) area!

Statistics: Affliction 1 (HT; Advantage, Slide, +150%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [27]. *Notes:* "Slide" is Alternate Form (Slide*; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [15]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* Same template but with a variant Terrain Adaptation (Uneven) [0] advantage.

Slimy Skin

Keywords: Buff.
Full Cost: 21 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject's skin is covered with a thin layer of pond scum that drips from his chin and limbs like maple syrup. He gains Bad Grip 2 and Unnatural Features 5, but as an upside becomes hard to hold. This effect grants the subject +6 to all ST, DX, and Escape rolls to slip restraints, break free in close combat, or squeeze through narrow openings.

Statistics: Affliction 1 (HT; Advantage, Slimy Skin, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Slimy Skin" is Slippery 6 (Magical, -10%; Temporary Disadvantage, Bad Grip 2 and Unnatural Features 5, -15%) [9].

Slow

Keywords: Resisted (HT).
Full Cost: 36 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 3 minutes.

The subject gains the Decreased Time Rate (p. B129) disadvantage for 3 minutes.

Statistics: Affliction 1 (HT; Disadvantage, Decreased Time Rate, +100%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [36].

Slow Fall

Keywords: Buff.
Full Cost: 23 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject subtracts five yards from a fall automatically (treat this as an automatic Acrobatics success – don't check again for it). In addition, a successful DX roll halves damage from any fall.

Statistics: Affliction 1 (HT; Advantage, Slow Fall, +110%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. *Note:* "Slow Fall" is Catfall (Feather Fall, +20%; Magical, -10%) [11].

Slow Healing

Keywords: Resisted (HT).
Full Cost: 45 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 1 week.

The subject's body heals very slowly. Double the interval between HT rolls to regain lost HP: roll every two days for Slow Healing 1. This spell also doubles the time allowed between Physician rolls when under the care of a competent physician (see Medical Care, p. B424). This spell cannot be removed with Dispel Magic, but Remove Curse or a similar effect dispels it.

Statistics: Affliction 1 (HT; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Slow Healing 1, +5%; Extended Duration, 3,000x, +140%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [45].

Slow Fire (Unofficial Sorcery Errata)

Keywords: Area (Special).

Full Cost: 25 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can make a fire with a radius up to spell level in yards burn more slowly. It does half damage and consumes fuel at half the normal rate.

Statistics: Control Fire 1 (Only to decrease potency, -80%; Ranged, +40%; Sorcery, -15%) [9] + Control Fire +4 (Does not increase area, -50%; Only to decrease potency, -80%; Ranged, +40%; Sorcery, -15%) [16]. Each additional level adds Control Fire +1 (Only decreases area, -50%; Only to increase potency, -80%; Ranged, +40%; Sorcery, -15%) [4].

Slow Metabolism

Keywords: Buff.

Full Cost: 37 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This subject requires 1/3 as much food and water for a day. Additionally, he gains a +3 bonus on HT rolls made to resist metabolic hazards.

Statistics: Affliction 1 (HT; Advantage, Slow Metabolism, +130%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [37]. *Note:* "Slow Metabolism" is Reduced Consumption 2 (Magical, -10%) [4] + Resistant to Metabolic Hazards (+3) (Magical, -10%) [9].

Slow Movement

Keywords: Resisted (HT).

Full Cost: 29 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

The subject becomes proportionally slower than he was. His Move in all mediums is reduced to 0.8x, 0.6x, 0.4x, or 0.2x of its normal value, to a minimum of 1. The caster selects the degree of the slowdown when he casts the spell.

Statistics: Affliction 1 (HT; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Slower Move, 0.2x, +40%; Sorcery, -15%; Variable, +5%) [29].

Slow Poison

Keywords: Area (Fixed).

Full Cost: 45 points for level 1 + 15 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Indefinite.

You can make poisons slower. It can be cast on a poisoned creature, venomous creature, a container of poison, or an area of poison. If cast on a liquid or gaseous poison, it only affects a five-yard-radius area. The poison affected (or the poison that affects the subject) deals damage at a slower rate. This is useful when you wish to delay death from poisoning or make a venomous snake temporarily less dangerous. The rate is decreased by a step for each level of this spell (see *Cyclic*, p. B103-104). For example, if you cast Slow Poison 2 on a poison that deals damage once a minute, it will deal damage once a day. The number of cycles remains unchanged.

Statistics: Control Poison 5 (Only to slow, -65%; Ranged, +40%; Sorcery, -15%) [45]. Additional levels add Control Poison +5 (Does not increase area, -50%; Only to slow, -65%; Ranged, +40%; Sorcery, -15%) [15/level]. *Note:* As this is one advantage (Control Poison) with the Sorcery limitation, not two, it costs only 1 FP to use.

Slow Time

Keywords: Area (Leveled), Resisted (Will, Special).

Full Cost: 46 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

Time in the area slows down. Every creature and object in the area acts as if they had Decreased Time Rate (p. B129). Anyone entering the area is slowed as well. Anyone leaving the area enters the normal time stream again.

Unless everyone within the area is willing, the person with the highest effective Will resists. The spell is all-or-nothing; if that one person resists, then the spell fails, but if not, then it works. If the GM is uncertain of who has the best resistance roll (e.g., one person has high Will while another has modest Will but also Luck), he can pick two, roll for both, and average their margins of success for the Quick Contest.

Statistics: Affliction 1 (Will; All-or-Nothing, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Decreased Time Rate, +100%; Extended Duration on Persistent, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Persistent, +40%; Reduced Duration, 1/3, -10%; Reduced Duration, 1/180, Only after the target leaves the area, -35%; Sorcery, -15%; Variable, Area, +5%) [46]. Additional levels add more Area Effect (+50%) [+5].

Small Vision

Keywords: Buff.

Full Cost: 16 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject can see details that would normally be invisible without a magnifying glass or a microscope. Each level increases magnification by a factor of 10: 5 points gives 10x, 10 points gives 100x, and so on. This magnification only applies to objects within 1 foot.

Level 1 suffices for ordinary forensic investigation. Level 3 (1,000x) is equivalent to the best optical microscopes. Level 5 (100,000x) is comparable to an electron microscope, capable of imaging viruses. Level 6 (1,000,000x) is on par with a scanning-tunneling or atomic force microscope, and can study an object's atomic structure.

While the spell is on, the subject is nearsighted: he is incapable of seeing objects further than a yard away clearly – they appear blurred and all melee attacks are made at -2 to skill.

Statistics: Affliction 1 (HT; Advantage, Small Vision 1, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [16]. Additional levels add further Small Vision to the Advantage enhancement (+40%) [+4]. *Note:* Each level of "Small Vision" is Microscopic Vision 1 (Magical, -10%; Nuisance Effect, -2 to melee attacks, -10%) [4].

Smelt Ore

Keywords: None.

Full Cost: 6 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent.

This spell allows you to extract a quantity of metal ore into an ingot of the given metal. The stone portions of the ore crumble to dirt around the ingot. To do so, touch the ore you wish to smelt, take a Concentrate maneuver and roll vs. IQ. Success means you smelt the ore successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Smelting costs 1 FP per use.

The ore can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the ore being smelted.

Statistics: Create (Transmute Ore to Metal, +50%; Transmutation Only, -100%; Magical, -10%) [8/level].

Smoke Teleport

Keywords: Area (Fixed), Obvious.

Full Cost: 79 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: 10 yards.

Duration: Instantaneous.

You can disappear, leaving a cloud of smoke behind you, and appear in any place within 10 yards that you can see, creating a similar smoke cloud on arrival. Both clouds have a 2-yard radius, give -5 to all vision rolls made through them, and are unpleasant to breathe (but cause no actual ill effects). The clouds stay for 10 seconds and then disperse. You can carry up to Medium Encumbrance when you travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you.

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any place you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds!

Statistics: Obscure Vision 5 (Emanation, -20%; Link, +10%; Magical, -10%; Persistent, +40%) [12] + Obscure Vision 5 (Emanation, -20%; Link, +10%; Magical, -10%; Persistent, +40%) [12] + Warp (Extra Carrying Capacity, Medium, +20%; Link, +10%; No Strain, +25%; Range Limit, 10 yards, -50%; Requires Concentrate, -15%; Sorcery, -15%; Vision-Based, Reversed, -20%) [55].

Snekrobolt

Keywords: Missile, Obvious.

Full Cost: 47 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous, the snake lasts until five attacks are made.

You shoot a bolt of black necrotic energy engulfed in green vapors at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. The bolt has Acc 3 and 1/2D 50. It does 1d-2 toxic damage per level of this spell. DR does *not* protect against this spell! The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own snekrobolt!

The bolt rips out some of the target's flesh, and mutates it into a snakelike being with ST, and HP equal to inflicted injury. It attacks the victim once per turn starting from the caster's next turn. It does thrust+2 impaling damage with the same amount of toxic follow-up, with an effective skill of 10. It attacks up to five times, then withers into nothingness. To determine its SM, look up its ST as yards in the Linear Measurement column of the *Size and Speed/Range Table* (p. B550), and use the corresponding value in the Size column reduced by 4. If it falls between values, use the lower one. It has no DR, a Dodge of 8, and Move 3.

If the initial injury caused a major wound, then the snake creature bursts through the armor and starts on the victim. This halves DR on the targeted location until repaired. If initial injury did not cause a major wound, the creature starts under the armor. To attack it in this case, the victim must first hastily doff the armor on the affected hit location. This halves DR until donned again, and requires a Ready maneuver, and a successful DX roll.

Statistics: Toxic Attack 1d-2 (Cosmic, Irresistible Attack, +300%; Increased 1/2D, 5x, +10%; Link, Impaling Attack, +10%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [8/level] + Impaling Attack 1d-2 (Breakable, DR 0, SM-6, -30%; Cosmic, May start under armor and may damage armor, +300%; Cyclic, Variant, five 1-second cycles, defense instead of resistance, +250%; Homing, Variant, +50%; Link, Initial Toxic Attack, +10%; Magical, -10%; Nuisance Effect, Limited by the initial attack's damage, -20%) [26/level] + Toxic Attack 1d-2 (Breakable, DR 0, SM-6, -30%; Cosmic, May start under armor and may damage armor, +300%; Cyclic, Variant, five 1-second cycles, defense instead of resistance, +250%; Follow-Up, Impaling Attack, +50%; Link, Initial Toxic Attack, +10%; Magical, -10%; Nuisance Effect, Limited by the initial attack's damage, -20%) [13/level].

Snow

Keywords: Area (Special).

Full Cost: 46 points for level 1 + 41 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can create or prevent 3 inches of snow per level within the 0.1-mile-radius area around you, if there are clouds available in the area. To work properly, this spell must be cast when the temperature is 32°F or lower. When cast under warmer conditions, this spell simply summons a thin drizzle,

dampening the ground but not leaving any significant puddles. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by snow, relative to the prevailing conditions. This can help with rolls for Boating, Seamanship, Survival and anything the GM allows.

Statistics: Control Snow 1 (Natural Phenomenon, +100%; Sorcery, -15%) [19] + Control Snow +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [27]. Additional levels add Control Snow +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [41/level]. *Note:* As this is one advantage (Control Snow) with the Sorcery limitation, not two, it costs only 1 FP to use.

Snow Jet

Keywords: Jet, Obvious.

Full Cost: 34 points for level 1 + plus 8 points per additional level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 20 yards.

Duration: Instantaneous.

You shoot a thin jet of snow from your fingertip, which can strike any target up to 20 yards away (without range or speed penalties). It can be dodged or blocked, but not parried. This jet does 1d crushing damage per level, *doubled*, for the purposes of knockback, but does not deal injury or blunt trauma. It will extinguish a one-yard-radius area of normal fire.

Against enemies with Injury Tolerance (Diffuse), such as gaseous beings and swarms, and against creature of flame, this becomes a *much* more potent attack, doing full damage – including the doubling! Ignore the usual injury cap of 2 HP (*Injury to Unliving, Homogenous, and Diffuse Targets*, p. B380).

If the spell strikes the face, it causes no injury (unless the attack was against the aforementioned enemy types), but blinds the target for 3 seconds unless he makes a HT roll. Thick goggles, closed helmets, ultra-tech visors protect against this spell.

Statistics: Crushing Attack 1d (Blockable, -5%; Can extinguish fire, +10%; Cosmic, Does knockback-based damage against diffuse and flame targets, +50%; Double Knockback, +20%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; No Blunt Trauma, -20%; No Wounding*, -5%; Sorcery, -15%) [8/level] + Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Blockable, -5%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; Reduced Duration, 1/60, -35%; Vision-Based, +150%) [26].

* Except versus diffuse and flame targets, an exception which decreases the value of this limitation.

Snow Shoes

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject does not suffer DX or Move penalties for snow or ice.

Statistics: Affliction 1 (HT; Advantage, Snow Shoes, +100%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Snow Shoes" is Terrain Adaptation (Ice; Magical, -10%) [5] + Terrain Adaptation (Snow; Magical, -10%) [5].

Snuff Life's Flame

Keywords: Resisted (HT).

Full Cost: 66 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell turns the subject to fire and then snuffs out the flames with an audible sound. All that's left afterward are the subject's remaining possessions and a scorched spot on the scenery.

Statistics: Affliction 1 (HT; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [66].

Sobriety

Keywords: None.

Full Cost: 6 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

You can neutralize effects of being tipsy or drunk (p. B428). This requires a touch and a successful IQ roll, and costs 1 FP. Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful casting. Failure costs you 1d FP instead of the usual 1 FP! Becoming sober thanks to this spell does not save from a hangover.

Statistics: Healing (Accessibility, Only to sober up, -80%; Affliction Only, -40%; Capped, 1 FP, -30%; Magical, -10%; Xenohealing, Anything Alive, +80%) [6].

Soft Step

Keywords: Buff.

Full Cost: 25 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject can move and breathe noiselessly. He gets +4 per level to Stealth skill when he is perfectly motionless, or +2 if moving (even in armor, etc.). These bonuses help only in the dark, or against listening devices, blind creatures, and others who must rely on hearing to find the subject.

Statistics: Affliction 1 (HT; Advantage, Soft Step 1, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. Additional levels add further Soft Step to the Advantage enhancement (+90%) [+9]. *Note:* Each level of "Soft Step" is Silence 2 (Magical, -10%) [9].

Soft Weapon

Keywords: Weapon Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell prevents the affected weapon from dealing blunt trauma, effectively granting it the No Blunt Trauma limitation (p. B111).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Soft Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Soft Weapon" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS *Thaumatology: Sorcery*, p. 11). This spell is based on the Supreme Control imbue ment skill.

Soilproof

Keywords: Buff.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject (person, creature, or object) and anything he carries become soilproof. Clothes neither stain nor become dusty, hands won't collect grime, and so on. This spell doesn't remove stains already on the subject at the time of casting.

Statistics: Affliction 1 (HT; Advantage, Soilproof, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Soilproof" is Sartorial Integrity (Magical, -10%) [1].

Solid Armor

Keywords: Armor Buff.

Full Cost: 56 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell removes all chinks in the affected armor.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Solid Armor, +460%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [56]. *Notes:* "Solid Armor" is 46 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Expand Armor imbuelement skill from *Pyramid #3-4*.

Solidify

Keywords: Resisted (Will).

Full Cost: 36 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell temporarily makes an intangible being tangible and affect objects and creatures in the substantial world.

Statistics: Affliction 1 (Will; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Insubstantiality, +80%; No Signature, +20%; Sorcery, -15%) [36].

Sonar Invisibility

Keywords: Buff.

Full Cost: 92 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You make the subject invisible to sonar. The subject still makes noise, leaves footprints, and has a scent – and anything the subject is carrying (up to the Medium encumbrance) becomes invisible to sonar too. The subject gets a +9 to Stealth in any situation where being detected with sonar would matter, if he is carrying no more than his Medium encumbrance.

Statistics: Affliction 1 (HT; Advantage, Sonar Invisibility, +680%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [84]. *Note:* "Sonar Invisibility" is Invisibility (Sonar; Affects Machines, +50%; Can Carry Objects, Medium, +50%; Magical, -10%) [76].

Sonic Scream

Keywords: Obvious.

Full Cost: 12 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 20 yards.

Duration: Instantaneous.

You unleash a loud scream that does 1d burning non-incendiary damage per level. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be deafened for (20 – HT) minutes. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell's maximum range. This spell has the 1/2D range of 2 yards. The scream requires a sound-transmitting medium to work and is blocked by Silence or Wall of Silence, but works identically both in air and underwater (provided the sorcerer has the Speak Underwater advantage to scream underwater).

Statistics: Burning Attack 1d (Cone 5, +100%; Environmental, Sound-transmitting mediums, -10%; Increased Range, 10x (Accessibility, Underwater only, -50%), +15%; No Incendiary Effect, -10%; Reduced Range, 1/5, -20%; Requires a scream, -10%; Side Effect, Deafness, +70%; Sorcery, -15%; Underwater, +20%) [12/level].

Sonic Vulnerability

Keywords: Resisted (HT).

Full Cost: 29/30/32 points for levels 1-3.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell makes the subject more vulnerable to sonic attacks. The subject multiplies any damage from sound that penetrates its DR by 2 before applying any normal wounding multipliers. Level 2 of this spell increases the multiplier to 3, and level 3 increases the multiplier by 4.

Statistics: Affliction 1 (HT; Disadvantage, Vulnerability (Sound, x2), +30%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. Additional levels improve Disadvantage, Vulnerability (Sound, x2), +30% to Disadvantage, Vulnerability (Sound, x3), +45% and Disadvantage, Vulnerability (Sound, x4), +60%.

Sonic Weapon

Keywords: Weapon Buff.

Full Cost: 14 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 1d of follow-up (p. B105) burning damage. This damage is from sonic vibrations, not fire; it will never set anything ablaze. The weapon will visibly vibrate, but will not cause any discomfort to the wielder.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Sonic Weapon, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [14]. *Note:* "Sonic Weapon" is Burning Attack 1d (Follow-Up, This weapon, +0%; Magical, -10%; No Incendiary Effect, -10%; Visible, -10%) [4].

Sonic Whip

Keywords: Obvious.

Full Cost: 14 points.

Casting Roll: None. Use Force Whip to hit.

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster has a whip of sound in his hand. It is wielded like a normal whip (p. B404), except that it always takes only one second to ready, and it cannot be used to parry or

entangle. The whip has Reach 1-4 (changing Reach requires a Ready maneuver) and inflicts swing non-incendiary burning damage every time it strikes. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Natural Weapon (Burning; Cannot Parry, -40%; Destructive Parry, +40%; Extra Reach, 1-4, Ready maneuver necessary, +90%; Intangible, +50%; No Incendiary Effect, -10%; Side Effect, Stunning, +50%; Single, -20%; Sorcery, -15%; Swing-Capable, +20%) [14].

Soothing Performance

Keywords: Area (Leveled), Beneficial Song.

Full Cost: 49 points for level 1 + 5 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. This song can only affect sapient beings. Subjects roll vs. Per minus any Magic Resistance they have. The song's effects last for margin of success seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

Allies affected by Soothing Performance are immune to emotional manipulations. They are exempt from Fright Checks, and reaction modifiers rarely affect them in any way. They treat strangers with distant courtesy, no matter how strange they are, as long as they're well-behaved. They remain civil even if forced to violence. Influence skills or other ordinary words and actions do not influence the subjects.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Affliction 1 (Per; Accessibility, Only on sapient beings, -10%; Advantage, Soothing Performance, +280%; Beneficial Song, +105%; Costs Fatigue, 1 FP, -5%; No Signature, +20%) [49]. Additional levels add Area Effect (+50%) [+5]. *Note:* "Soothing Performance" is Indomitable (Magical, -10%) [14] + Unfazeable (Magical, -10%) [14].

Sorcerer's Stand-In

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

Subject can hold an assistant's place in a Slow and Sure enchantment (*GURPS Magic*, p. 18). The stand-in contributes no mage-days to the effort, while the person replaced cannot work on another enchantment – that counts as "loss of a mage," ending the original project.

Alternatively, when used with the sorcerous enchantment system, this spell lets the subject spend CP instead of the sorcerer for the purposes of *Personal Sacrifice* (*GURPS Thaumatology: Sorcery*, p. 30).

Statistics: Affliction 1 (HT; Advantage, Sorcerer's Stand-In, +10%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Sorcerer's Stand-In" is Sorcerer's Stand-In (Magical, -10%) [1].

Sorcerous Input

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.
Duration: Indefinite.

The caster touches a computer and mentally inputs any commands or text, as if using a keyboard.

Statistics: Accessory (Keyboard; Sorcery, -15%) [1].

Sorcerous Screwdriver

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Indefinite.

The caster push his finger against a screw and screw it in, as if he was using a screwdriver.

Statistics: Accessory (Screwdriver; Sorcery, -15%) [1].

Sorcerous Signal

Keywords: None or Buff.
Full Cost: 4 or 12 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.
Range: Self or 100 yards.
Duration: Instantaneous or 1 minute (or until triggered).

Subject ignores the -3 for lack of Cultural Familiarity (p. B23) for *one* use of the Gesture skill (p. B198).

The basic (4-point) version of this spell benefits only the caster; it has an instantaneous duration, which means that each casting costs 1 FP. The improved (12-point) version can affect anyone and works at a distance; it has a fixed, lasting duration of 1 minute during which the subject can use the effect *once*.

Statistics: The basic version is Xeno-Adaptability (Accessibility, Only for Gesture, -70%; Sorcery, -15%) [4]. The improved version is Affliction 1 (HT; Advantage, Sorcerous Signal, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Sorcerous Signal" is Xeno-Adaptability (Accessibility, Only for Gesture, -70%; Magical, -10%; Single Use, x1/5) [1].

Sorcerous Silencer

Keywords: Weapon Buff.
Full Cost: 32 points for level 1 + 8 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

This spell silences the weapon, giving a -2 to all Hearing rolls to notice the attack per spell level, up to the maximum of -10.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Sorcerous Silencer, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Sorcerous Silencer" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Stealthy Attack imbuelement skill.

Sortilege

Keywords: Information.
Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Sortilege is divination through the casting of lots or other objects that reveal information through the pattern in which they fall. The I Ching is a form of sortilege; other cultures have used sortilege by throwing a handful of arrows in the ground to interpret where they fall.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading “miles” as “weeks.”

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires thrown objects, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Soul Blight

Keywords: Resisted (HT).

Full Cost: 33 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

If the victim fails to resist, he loses 1d points of essentia.

Statistics: Fatigue Attack 1d (HT; Based on HT, +20%; Cosmic, Affects ER (Incarnum), +50%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [33].

Soul Golem

Keywords: None.

Full Cost: 4 points.

Casting Roll: None.

Range: Touch.

Duration: Instantaneous.

The caster transfers his soul to a golem of his own making. He gains the golem’s physical attributes, but retains his knowledge and mental attributes, including his Sorcerous Empowerment and Magery. The original body dies in the process, so there is no going back! The GM should make sure the character pays the points for his new advantages.

Statistics: Possession (Accessibility, Golems made by the caster, -40%; Backlash, Instant Death, -400%; Cosmic, No die roll required, +100%; Single Use, x1/5; Sorcery, -15%) [4].

Soul Jar

Keywords: Resisted (Will).

Full Cost: 205 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Traps the subject’s soul in some inanimate object (which the subject must be touching). If the subject is not the caster, then he must be present, and either willing or unconscious.

If your soul is in a “jar,” you are unaffected until either your body dies, or the jar is destroyed. The death of your body does not kill you. Your consciousness shifts to the “jar,” where you are able to see, hear, and even cast any spell that you know at skill 20 or above (i.e., castable without speech or gesturing). You may communicate at a distance via telepathy-type spells, if you know any – or by direct

mental contact, without a spell, with anyone who handles the jar. Your FP remain the same as when you had a body. You may not spend HP, but you may use any Powerstone currently in contact with your jar.

If a new body comes near the jar, you may try to take it by a Possession, Permanent Possession, or Exchange Bodies spell if you know such a spell. In that case, the soul of that body goes into the jar. But if your soul is in a jar, anything that destroys the jar will kill you permanently – beyond hope of resurrection – even if your body is unharmed.

The spell may be cast again to switch the soul to a different “jar.”

Statistics: Affliction 1 (Will; Advantage, Soul Jar, +1,800%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Subject must be willing or unconscious, -30%; Sorcery, -15%) [205]. *Note:* “Soul Jar” is Possession (Accessibility, Only inanimate objects, -10%; Cosmic, Retains senses, +100%; Magical, -10%) [180].

Soul Prison

Keywords: Resisted (Will).

Full Cost: 52 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell rips out the subject’s soul. It can only affect a target who has both a physical body and a genuine soul to separate from it. A subject who fails to resist collapses in a coma. This works much as described on p. B429, but the victim gets no HT roll to awaken and cannot be roused with the Awaken spell or similar measures – he’s soulless, not asleep. He must roll vs. HT every 12 hours until he finally fails and dies. This spell may be reversed by Remove Curse before the subject dies.

Statistics: Affliction 1 (Will; Accessibility, Only on beings with souls, -5%; Based on Will, +20%; Coma, Variant, +250%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [52].

Soul Rider

Keywords: Resisted (Will).

Full Cost: 20 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

The caster can tap into his subject’s senses. This lets him experience everything the subject experiences. If he is tortured, knocked out, or killed, the GM may require a Will roll to avoid stunning – or perhaps even a Fright Check! The caster must be able to see or touch the subject to tap into his senses. Modify the casting roll for range penalties to the subject (see p. B550).

The caster can maintain this spell for as long as he wishes without further concentration. If he switches to another person, he must stop tapping into his current subject’s senses and roll a Quick Contest with the new subject.

If he loses, he may try again, at a cumulative -2 per repeated attempt on that subject in the past hour. Should he critically fail, he cannot tap into that person’s senses again for 24 hours.

Statistics: Mind Reading (Sensory Only, -20%; Sorcery, -15%) [20].

Soul Stone

Keywords: Resisted (Will).

Full Cost: 166 points.

Casting Roll: Will. Special casting time.

Range: Unlimited.

Duration: Truly Permanent.

Traps the subject's soul in some inanimate object (which the subject must be touching). If the subject is not the caster, then he must be present, and either willing or unconscious. The ritual requires 8 hours of uninterrupted concentration.

When your soul is in a Soul Stone, the subject cannot be killed. He becomes immune to disease, poison, and aging. Injury affects him normally, but he needs never make a HT roll to stay alive. Once he reaches -10xHP, he is reduced to an indestructible skeleton and automatically falls unconscious. He sustains no further damage from any attack. Once the damage stops, he heals normally – even if he has been hacked to pieces – and any severed body parts will grow back. He regains consciousness once he has positive HP.

Statistics: Affliction 1 (Will; Advantage, Soul Stone, +1,200%; Based on Will, +20%; Extended Duration, Truly Permanent, +300%; Immediate Preparation Required, 8 hours, -90%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Subject must be willing or unconscious, -30%; Sorcery, -15%) [166]. *Note:* "Soul Stone" is Immunity to Disease (Magical, -10%; Requires a Soul Stone, -5%) [9] + Immunity to Poison (Magical, -10%; Requires a Soul Stone, -5%) [13] + Unaging (Magical, -10%; Requires a Soul Stone, -5%) [13] + Unkillable 2 (Magical, -10%; Requires a Soul Stone, -5%) [85].

Soulbanned Zone

Keywords: Area (Leveled).

Full Cost: 68 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

This spell creates a zone that negates the flow of incarnum. Soulmelds are instantly unshaped and disabled, incarnum abilities cannot be activated, essentia cannot be spent on abilities or spells. It completely prevents all incarnum powers from affecting anything in the area. Soulbanned Zone affects friendly and hostile abilities equally. Soulbanned Zone only interferes with attempts to affect creatures and objects in the area directly.

The basic (68-point) version of this spell covers a two-yard radius. For each additional 15 points, you may double this radius; e.g., four yards for 83 points, 8 yards for 98 points, or 16 yards for 113 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Static (Incarnum; Area Effect, 2 yards, +100%; Ranged, +40%; Sorcery, -15%) [68]. Additional levels increase Area Effect (+50%) [+15].

Souldrinker

Keywords: Resisted (HT).

Full Cost: 75 points for level 1 + 12 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You can steal HP from a victim to replenish your own. You must be able to see your victim with your unaided sight while stealing his life. If the victim fails to resist, he loses HP equal to the level of this spell; for every 1 HP he loses, you recover 1 HP.

Statistics: Leech 1 (Accelerated Healing, +25%; Based on HT, +20%; Malediction 2, +150%; Ranged, +40%; Sorcery, -15%; Vision-Based, Reversed, -20%) [75 + 12/additional level].

Soulmeld Disjunction

Keywords: Resisted (HT).

Full Cost: 63 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell instantly unshapes and suppresses *all* soulmelds shaped by the subject. The subject adds his Meldshaping Talent or Totemism Talent to his HT when resisting this spell. The unshaped soulmelds cannot be shaped again, while this spell is active, but the soulmelds that were not shaped when the spell was cast, are unaffected.

Statistics: Neutralize Incarnum (Based on HT, +20%; Fixed Duration, +0%; Nuisance Effect, Allows shaping other soulmelds, -20%; Ranged, +40%; Sorcery, -15%) [63].

Sound Burst

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 34 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous (but see below).

You fire a vibrating sonic sphere that expands to cover an area. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area. Everyone within four yards of that spot takes dice of burning damage equal to your level of this spell. This damage originates from sonic vibrations – it cannot set anything on fire. This damage does not work in the area of effect of the Silence spell or a similar ability. The GM must determine what the maximum level available in the campaign is.

A loud sound, like an explosion, fills the area of effect. Everyone within must resist with HT; Protected Hearing gives +5, Hard of Hearing gives +4, and those with Deafness are immune. The caster is *not* immune to it. Everyone who fails to resist is deafened for 10 minutes times their margin of failure.

Statistics: Burning Attack 1d (Area Effect, 4 yards, +100%; Environmental, Sound-transmitting mediums, -10%; Link, +10%; Magical, -10%; No Incendiary Effect, -10%) [9/level] + Affliction 1 (HT; Area Effect, 4 yards, +100%; Disadvantage, Deafness, +20%; Extended Duration, 10x, +40%; Hearing-Based, -20%; Link, +10%; No Signature, +20%; Nuisance Effect, Loud, -5%; Sorcery, -15%) [25].

Sovereign Armor

Keywords: Armor Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes armor less susceptible to acid, disintegration, etc. The armor's DR against corrosion damage is multiplied, as shown on the table below. In addition, use only a part of the damage roll to compute DR loss, as shown on the table below.

Level	DR	Damage roll when computing DR loss
1	x2	2/3
2	x3	1/2
3	x4	1/3

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Sovereign Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* "Sovereign Armor" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Sovereign Armor imbue skill from *Pyramid* #3-4.

Sovereign Countermagic

Keywords: Resisted (Will or spell).

Full Cost: 45 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to nullify a single ongoing spell. Sovereign Countermagic can target either the person who cast that spell or the subject of the spell, which can be a person, object, or area. For areas, calculate range to the center of the area. The sorcerer must state which spell he is attempting to counter. Unlike Counterspell, Sovereign Countermagic does not require the caster to be able to cast the spell they are countering.

Treat the resistance roll as for Dispel Magic. This spell cannot end Truly Permanent effects, such as the magic of enchanted items.

Statistics: Neutralize Magic (Accessibility, One spell at a time, -5%; Interruption, -50%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [45]. *Note:* This spell originally appeared in *GURPS Magical Styles: Dungeon Magic*.

Sovereign Ward

Keywords: None.

Full Cost: 45 points.

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

When this spell is active, the caster can attempt to cast this spell as an active defense, when somebody casts a spell that affects them or their personal equipment *directly*. Thus, Sovereign Ward does not protect against missile spells. A successful casting nullifies the effects of the spell on the caster. Unlike Ward, Sovereign Ward does not require the caster to be able to cast the spell they are countering.

The casting roll is modified by Talent and Combat Reflexes. If the caster tries to cast Sovereign Ward more than once in a turn, the casting roll takes a cumulative -4 penalty per attempt after the first. The caster rolls at -4 if stunned and cannot cast Sovereign Ward in situations where they would not get an active defense. If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Sovereign Ward, they cannot cast this spell until *all* FP are replenished. This spell does not count as an active defense for the purpose of cumulative defense penalties.

Statistics: Static (Magic; Active Defense, -40%; Sorcery, -15%; Switchable, +100%) [44] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1]. *Notes:* Active Defense being IQ-based is a special feature. This spell originally appeared in *GURPS Magical Styles: Dungeon Magic*.

Space Adaptation

Keywords: Buff.

Full Cost: 49 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The subject becomes shielded by an invisible force screen that protects him from the hazards of space. He gains PF 5, Sealed (p. B82), Temperature Tolerance 10 (p. B93), and Vacuum Support (p. B96). Note that this spell does *not* eliminate the need for air.

Statistics: Affliction 1 (HT; Advantage, Space Adaptation, +370%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [49]. *Notes:* "Space Adaptation" is Radiation Tolerance 5 (Magical, -10%) [9] + Sealed (Magical, -10%) [14] + Temperature Tolerance 10 (Magical, -10%) [9] + Vacuum Support (Magical, -10%) [5].

Space Disruption

Keywords: Resisted (HT).

Full Cost: 97 points.

Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

If the subject fails to resist, the caster slightly bends space *inside* him. It lasts only a moment before returning to its normal state, but that's enough time to bisect the victim. This does 5d cutting damage that bypasses DR completely.

Statistics: Cutting Attack 5d (Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [97].

Spark Cloud

Keywords: Area (Leveled).
Full Cost: 7 points for level 1 + 1 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

Creates a cloud of electrical sparks. It does not block vision, but it inflicts burning surge damage to anyone standing in it. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Every creature in the area takes 1d-2 burning surge damage per turn. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Burning Attack 1d-2 (Area Effect, 2 yards, +50%; Drifting, +20%; Persistent, +40%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%; Variable, Area, +5%) [7]. Further levels add Area Effect (+50%) to the advantage [+1].

Spark Erosion

Keywords: Obvious.
Full Cost: 7 points/level.
Casting Roll: None. Use unarmed combat skill or DX to hit.
Range: Touch.
Duration: Instantaneous.

This spell charges the caster's hand with a powerful electric charge. Touching the subject deals 1d corrosion surge damage to it, as matter erodes away.

Statistics: Corrosion Attack 1d (Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%; Surge, +20%) [7/level].

Spark of Eros

Keywords: Buff.
Full Cost: 32 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

Gives +4 to reactions from those attracted to members of the subject's sex, and +4 to the subject's Dancing, Erotic Art, Makeup, Sex Appeal and Singing rolls. Specific details are left to the GM (although, in the interests of good gaming taste, it's probably wise to err on the side of caution). The spell will have no effect if it is cast on a female subject.

Statistics: Affliction 1 (HT; Accessibility, Only on men, -20%; Advantage, Spark of Eros, +180%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Note:* "Spark of Eros" is Allure 4 (Magical, -10%) [18].

Spark Storm

Keywords: Area (Leveled).

Full Cost: 164 points for level 1 + 30 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Create a circular windstorm with an "eye" of calm inside (a good place for the caster to stand). The radius of the eye can be up to half that of the storm – or smaller, if the caster wishes. The caster may move the area at Move 1 with a Concentrate maneuver.

Roll 4d as for crushing damage, determine knockback, and then double the distance; however, the victim suffers no actual damage or blunt trauma from the effect – just the consequences of being hurled around. As a special effect, knockback from this moves victims sideways (all clockwise or all anticlockwise; decide when triggering the attack) rather than away from the storm.

Second, Dodge values of all creatures within the area of effect are increased by 2 against projectile attacks.

Finally, each second a random creature in the area of effect gets struck by a lightning bolt for 2d burning surge damage with an effective skill of 12, modified only for the target's SM. Targets may raise their shields as cover, at the risk of damaging them (p. B484). Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Burning Attack 2d (HT; Accessibility, Only one bolt per second at a random target, -30%; Area Effect, 2 yards, +50%; Bombardment, Skill-12, -10%; Environmental, Air, -5%; Link, +10%; Magical, -10%; Mobile 1, +40%; Overhead, +30%; Persistent, +40%; Selective Area, Only to create an "eye", +10%; Surge, Arcing, +100%; Side Effect, Stunning, +50%) [38] + Crushing Attack 4d (Area Effect, 2 yards, +50%; Double Knockback, +20%; Environmental, Air, -5%; Link, +10%; Magical, -10%; Mobile 1, +40%; No Blunt Trauma, -20%; No Wounding, -50%; Persistent, +40%; Selective Area, Only to create an "eye", +10%) [37] + Enhanced Dodge 2 (Affects Others 1, +50%; Area Effect, 2 yards, +50%; Environmental, Air, -5%; Force Field, +20%; Limited, Projectiles, -40%; Link, +10%; Magical, -10%; Mobile 1, +40%; Persistent, +40%; Ranged, +50%) [89]. Additional levels add further levels of Area Effect (+50%) to all advantages [+30].

Sparks

Keywords: Area (Leveled), Obvious.

Full Cost: 12.5 points for level 1 + 2.5 points/additional level*.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

You fire electrical sparks around yourself. Everyone within the area is attacked with an effective skill of 12. Everyone who gets hit takes 1d burning surge damage. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Sparks behave unpredictably around conductors; see Lightning (*GURPS Magic*, p. 196) for more details.

Statistics: Burning Attack 1d (Area Effect, 2 yards, +50%; Bombardment, Skill 10, -15%; Emanation, -20%; Nuisance Effect, Behaves erratically around conductors, -5%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%; Variable, Area, +5%) [12.5]. Additional levels add more Area Effect (+50%) [+2.5*].

* Calculate the total cost and then round *down* (because the base ability costs just 13.5 points before rounding).

Spasm

Keywords: Resisted (HT).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Can be directed against any of the subject's voluntary muscles. Directed against a hand, it causes the subject to drop whatever he is holding (usually a weapon). If the subject is in the middle of a lengthy spell requiring gestures, he must make a DX roll or start over.

Statistics: Affliction 1 (HT; Accessibility, Voluntary muscles only, -20%; Caster is allowed a DX roll to continue casting, -5%; Fixed Duration, +0%; Malediction 2, +150%; No fatigue loss from Seizure, -20%; No Signature, +20%; Seizure, +100%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [27].

Spatial Awareness

Keywords: Buff.

Full Cost: 25 points or 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This basic (25-point) version of this spell allows the subject to always be able to retrace a path he has followed within the past month, no matter how faint or confusing. This gives +3 to Body Sense and Navigation (Air, Land, or Sea) and +1 to Piloting and +2 to Aerobatics, Free Fall, and Navigation (Hyperspace or Space). This ability works in three dimensions.

The improved (30-point) version allows the subject to enjoy the same benefits, but in four dimensions – not just three. He can always sense the added direction that's at right angles to everything else. He has +3 to find his way through four-dimensional mazes and to use skills that involve maneuvering in four dimensions, including Navigation (Hyperspace).

Statistics: Affliction 1 (HT; Advantage, Spatial Awareness, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Notes:* "Spatial Awareness" is 3D Spatial Sense (Magic; Magical, -10%) [9]. The improved version adds the Cosmic, Extra dimension, +50% enhancement [+5].

Spatial Instability

Keywords: Resisted (higher of HT and Will).

Full Cost: 72 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 6 seconds.

This spell makes the subject's position in space unstable. Each turn, he teleports 2d+2 yards in a random direction. This cannot materialize him inside an object.

Statistics: Affliction 1 (HT; Advantage, Spatial Instability, +500%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Reduced Duration, 1/30, -30%; Sorcery, -15%) [72]. *Notes:* "Spatial Instability" is Warp (Always On, -40%; Blind Only, -50%; Cosmic, No die roll required, +100%; Magical, -10%; Range Limit, 10 yards, -50%) [50]. The 10 yards of teleportation have been converted to dice per p. B269.

Spatial Stability

Keywords: Buff.

Full Cost: 39 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

You subject of this spell becomes anchored in space. He is immune to all space-manipulating abilities, such as teleportation and teleportation-based attacks.

Statistics: Affliction (HT; Advantage, Spatial Stability, +270%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [39]. *Note:* "Spatial Stability" is Static (Space-Based Abilities; Magical, -10%) [27].

Speak with Dead

Keywords: Information.
Full Cost: 23 points.
Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By touching a corpse, you can force it to answer any one specific question that he can answer with a brief sentence. To attempt a probe, you must first touch your subject, concentrate for one second, and make an IQ roll. You must also share a language with him.

The subject cannot resist, but your IQ (plus Talent) roll is at a penalty equal to the number of full days the subject has been dead, and you only get *one* try. If you win, you give the corpse a semblance of life and force it to give you the answer. The answer is what the subject believes to be true – if he doesn't know, he'll tell you.

Statistics: Mind Probe (Accessibility, Only on corpses, -20%; Cosmic, Works on the dead, +50%; Sorcery, -15%) [23]. *Feature:* Time penalty replaces the normal Quick Contest.

Spectrum Vision

Keywords: Buff.
Full Cost: 54 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject sees the entire electromagnetic spectrum, from radio waves to gamma rays (including all infrared bands). He suffers no vision or combat penalties if there is any light available. Under normal light, he is at +3 to Vision rolls and to visually based Forensics, Observation, Search, and Tracking rolls. In total darkness, he can see opponents whose body temperature is above the background level; roll at -4 to see small details or tell individuals apart.

Statistics: Affliction 1 (HT; Advantage, Spectrum Vision, +380%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [54]. *Note:* "Spectrum Vision" is Hyperspectral Vision (Extended High-Band, +30%; Extended Low-Band, +30%; Magical, -10%) [38].

Speed Reading

Keywords: Buff.
Full Cost: 19 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 1 hour.

This spell lets the subject read text equal to their words per minute (*How Fast Can You Read?*, *GURPS Powers: Enhanced Senses*, p. 23) in a single second.

Statistics: Affliction 1 (HT; Advantage, Speed Reading, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Speed Reading" is Page at a Glance (Magical, -10%) [1].

Spell of Sowing

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

The subject can plant seeds simply by tossing them in the air as they walk. These disperse perfectly and sink to the correct depth. The GM sets the game effects; a savings of 20% time (or amount of seed needed) is reasonable.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Spell of Sowing (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Spell of Sowing, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Spell of Sowing" is Spell of Sowing (Magical, -10%) [1].

Spell Phylactery

Keywords: None.

Full Cost: 40 points.

Casting Roll: IQ.

Range: Touch.

Duration: Permanent until triggered, see text.

You create a set of triggering conditions for a scroll that bears a spell that you could have cast yourself, i.e. that is within the scope of your Sorcerous Empowerment and that costs no more than your Sorcerous Empowerment. The spell must be one that affects your person.

The conditions needed to bring the spell into effect must be clear, although they can be general. For example, a spell phylactery used with a scroll of Breathe Water might prescribe that any time you are engulfed in water or any similar liquid, the water breathing spell instantly comes into effect. Or a spell phylactery used with an Absorb Impact scroll could trigger any time you fall more than 4 feet. Complicated or convoluted conditions may cause the spell phylactery to fail when called upon.

The scroll is activated based solely on the stated conditions, regardless of your wishes at the time. When the stated conditions are met, the spell on the scroll is cast upon you as if you used the scroll yourself. Thus, it might require a roll that might be penalized for such aspects as language proficiency, etc.

If the scroll contains a spell that you could not have normally casted, or limitations on the spell that would prevent you from casting it at the time, it is not cast when the triggering condition occurs, and the magic of the spell phylactery dissipates.

The scroll prepared with this spell must be bound to your arm or forehead (usually rolled tightly or placed in a small box for this purpose).

This spell must be cast once for each spell you wish to alter on a scroll.

If another person wears the spell phylactery, the magic of this spell ends. You may remove and replace the spell phylactery without penalty, but if 24 hours pass without you wearing it, the magic of the spell phylactery ends. The termination of this spell does not harm the spell on the scroll.

Statistics: Cosmic Power 10 (Limited, One Spell Phylactery Package, -50%; Magical, -10%) [40]. *Notes:* "Spell Phylactery Package" is Attribute Substitution (Power Techniques based on IQ) [1] + Extra Option (Power techniques for enchanted items) [1] + Supernatural Delay (H) IQ [11] + Unusual Training (Supernatural Delay power technique for sorcery spells; only spells that you could have cast yourself) [1]

modified with Accessibility, Only spells that affect the caster, -20%; Accessibility, Only if the scroll is strapped to the arm or forehead, -10%; Accessibility, Only scrolls, -50%; Cosmic, Does not actually cast the spell before it is triggered, +50%; Reduced Fatigue Cost 1, +20%; Magical, -10%; Terminal Condition, Not worn for 24 hours or given to another person, -10% for a final cost of 10 points.

Spell Shield

Keywords: Area (Leveled).

Full Cost: 70 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell creates a transparent dome that attempts to negate any spell cast through it. Spells can be cast within the dome, but no spell can cross the boundary freely. Spell Shield does not affect missile and jet spells. To penetrate Spell Shield, the caster must win a Quick Contest of Will with the caster of Spell Shield. If the spell already requires a Quick Contest of some kind, then the attacker rolls only once, but the target gets +5 to resist.

Statistics: Static (Magic; Area Effect, 2 yards, +100%; Extended Duration, 30x, +60%; Only around the border of the area, -0%; Ranged, +40%; Resistible, -50%; Sorcery, -15%; Variable, Area, +5%; Visible, -10%) [69] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1]. Additional levels increase Area Effect (+50%) for Static [+15]. *Note:* As a special effect, this forms a hemispherical dome, not a cylinder.

Spell Wall

Keywords: Area (Leveled).

Full Cost: 133 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a translucent wall that attempts to negate any spell cast through it from one side, specified by the caster upon casting. Spell Wall does not affect missile and jet spells. To penetrate Spell Wall, the caster must win a Quick Contest of Will with the caster of Spell Wall. If the spell already requires a Quick Contest of some kind, then the attacker rolls only once, but the target gets +5 to resist.

To find the maximum square yardage available, look up the level of this spell on the Leveled Area Table (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Spell Wall 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Spell Wall 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Statistics: Static (Magic; Area Effect, 2 yards, +100%; Discriminatory, Variant, +150%; Extended Duration, 30x, +60%; Ranged, +40%; Resistible, -50%; Sorcery, -15%; Variable, Area, +5%; Visible, -10%; Wall, Shapeable, +60%) [132] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1]. Additional levels increase Area Effect (+50%) for Static [+15].

Spellgraft

Keywords: Obvious.

Full Cost: 37 points.

Casting Roll: IQ.

Range: Touch.

Duration: Truly Permanent.

This spell allows the caster to give an unborn child inherent magical ability. This works just like enchanting items, but instead the caster imbues an unborn child with the spells. See Chapter 3 of *GURPS*

Thaumatology: Sorcery for details on this spell and enchanting items in general. The Enchant spell itself cannot be given to an unborn child!

Statistics: Affliction 1 (Accessibility, Only to give spells to unborn children, -40%; Based on IQ, Own Roll, +20%; Cumulative, +400%; Extended Duration, Truly Permanent, +300%; Limited Use, 1/day, -40%; Melee Attack, Reach C, -30%; Sorcery, -15%; Special Enhancements, see p. 31, +1,080%) [36] + Extra Option (Limited access to meditative study for enchanting) [1]. Note: The actual cost of 178 points is divided by five due to this ability being character-point powered.

Spellguard

Keywords: Area (Special).

Full Cost: 138 points for level 1 + 54 points/additional level (or more).

Casting Roll: IQ.

Range: 100 yards.

Duration: Eight hours.

This spell lets the caster protect other ongoing spells in the area from tampering. Anyone attempting to magically tamper (dispel, displace, steal, counter, etc.) with the spells in the area is at -2 to skill. Even if the tampering caster normally need not roll, they must roll now (usually against Will + Talent; GM's call). The first level of this spell covers an area two yards in radius; each additional level increases this by one yard. The caster can omit any spells in the area that they do not want to protect against tampering.

More potent versions of this spell inflict a greater penalty to tampering rolls and increase the initial area of effect. In all cases, further levels add the same +1 yard/level.

Penalty	Initial Radius	Full Cost
-2	Two yards	138 points for level 1 + 54 points/additional level
-4	Four yards	276 points for level 1 + 54 points/additional level
-6	Six yards	414 points for level 1 + 54 points/additional level

Statistics: Control Magic 2 (Accessibility, Only to penalize tampering, -65%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3,000x, +140%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [138]. Additional levels add Control Magic +1 (Accessibility, Only to penalize tampering, -65%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3,000x, +140%; Only increases area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [54/level]. The two stronger versions change the initial Control level to 4 [276] or 6 [414]. *Note:* As this is one advantage (Control Magic) with the Sorcery limitation, not two, it costs only 1 FP to use.

Spider Curse

Keywords: Resisted (Will).

Full Cost: 298 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Six days.

You curse a sapient humanoid, turning it into a drider-like creature. It gains the Drider meta-trait (see notes below). The transformed subject will obey your every command, but has no initiative under your control. In effect, it gains the Reprogrammable disadvantage (p. B150), with you as its master, and the Slave Mentality disadvantage (p. B154). You do not have to maintain concentration to control the subject, but this spell must be active.

If you attempt to force the subject to act against its principles (e.g., commit suicide or harm a loved one), roll another Quick Contest. If the subject wins, it breaks free. Roll at the moment of truth – you can march it to the edge of a cliff, but it doesn't roll until it's about to leap.

If the subject resists successfully, you cannot attempt to transform that subject again for 24 hours, and it feels a sense of mental coercion emanating from you.

You can also establish a mental link with the transformed subject by taking a Concentrate maneuver and making an IQ roll. This allows you to send verbal orders. Range is theoretically unlimited, but the IQ roll to establish the link takes the range penalties given under Long-Distance Modifiers (p. B241). If you cannot see or otherwise sense the subject, you have an additional -1 penalty.

If successful, the slave hears your voice but may not respond. You can also tap into your slave's senses. This lets you experience everything the slave experiences. If it is tortured, knocked out, or killed, the GM may require a Will roll to avoid stunning – or perhaps even a Fright Check! You may maintain a connection with that subject for as long as you'd like. No further rolls are normally required unless the range penalty worsens.

Statistics: Affliction 1 (Will; Accessibility, Sapient humanoids, -20%; Advantage, Spider Curse, +1,150%; Based on IQ, Own Roll, +20%; Based on Will, +20%; Extended Duration, 3,000x, +140%; Fixed Duration, +0%; Increased Immunity 3, -30%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [155] + Mind Control (Accessibility, Sapient humanoids, -20%; Extended Duration, 3,000x, +140%; Fixed Duration, +0%; Independent, +70%; Link, +10%; Magical, -10%; Puppet, -40%) [125] + Mind Reading (Accessibility, Only the subjects of spider curse, -60%; Link, +10%; Magical, -10%; Sensory Only, -20%; Telecommunication, -20%) [6] + Telesend (Accessibility, Only the subject of spider curse, -60%; Link, +10%; Magical, -10%) [12]. *Notes:* "Spider Curse" is Alternate Form (Drider Form*; Magical, -10%) [115].

* A new meta-trait: ST+5 (Size Modifier, -10%) [45]; DX+1 [20]; HT+1 [10]; SM+1; Will+1 [5]; Arm ST-4 (Size Modifier, -10%) [-18]; Climbing Line [1]; Clinging [20]; DR 1 (Tough Skin, -40%) [3]; Extra Legs (Eight Legs; Cannot Kick, -50%; Long 1, +100%) [23]; Sharp Teeth [1]; Weak Bite [-2].

Poison: Toxic Attack 1d-1 (Cyclic, 1 hour, 2 cycles, Resistible, +20%; Follow-Up, Bite, +0%; Resistible, HT-3, -15%; Symptoms, 2/3 HP, -3 ST, +15%) [4].

112 points.

Spider Silk

Keywords: Missile, Obvious.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Permanent, until destroyed, or until the victim breaks free.

The caster shoots a strand of spider silk, which stretches from his fingertip to the target. The strands appear wispy and weightless, but are very strong. On a hit, the caster's victim is grappled (see p. B370) and rooted in place. He cannot select the Move or Change Posture maneuvers or change facing, and is at -4 to DX. The spell has ST 10, but the caster can layer additional attacks on a successfully bound victim. Each extra layer gives +1 to ST.

To break free, the victim must win a Quick Contest of ST or Escape skill against the ST of the spell. Each attempt takes one second. If the victim fails to break free, he loses 1 FP but may try again. Alternatively, he may try to destroy the webs. Innate Attacks hit automatically; other attacks are at -4. External attacks on the webs take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, p. B392).

The webs have DR 3. Each point of damage reduces ST by one. At ST 0, the webs are destroyed and the victim is freed.

Statistics: Binding 10 (Sorcery, -15%) [17].

Spidereyes

Keywords: Resisted (IQ).

Full Cost: 51 points.

Casting Roll: Will.

Range: Touch.

Duration: One day.

This spell creates a link between a touched spider and the caster. This link allows the caster to see through the eyes of the aforementioned spider, and the visual feed is “translated” to the caster, because spiders usually have eight eyes. The caster must be able to touch the spider to cast this spell, but seeing through the spider’s eyes does not require physical contact or a roll – the spider constantly transmits what it sees to the caster. In any situation, the caster specifies whether they’re giving priority to their own vision or the Spidereyes at the start of each turn. All tasks that depend on the deprioritized vision source are at -4.

Statistics: Affliction 1 (IQ; Accessibility, Spiders Only, -50%; Advantage, Spidereyes, +240%; Based on IQ, +20%; Extended Duration, x1,000, +120%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%) [51]. *Note:* “Spidereyes” is Telesend (Accessibility, Only the caster, -80%; Always On, -10%; Cosmic, No die roll required, +100%; Magical, -10%; Video Only, -20%) [24].

Spiderform

Keywords: None.

Full Cost: 35 points or 115 points or more; see text.

Casting Roll: None. Special casting time.

Range: Self.

Duration: Indefinite.

The caster can assume form of a drider or various spiders, as if using the Morph advantage (p. B84). The transformation requires 10 seconds. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes. The caster may not add traits to templates, but he may freely omit racial mental disadvantages (e.g., Bestial), and he may always choose to drop the racial IQ modifier from a template and use his own IQ. Such changes raise the cost of spider templates, which are cheap due to limited mental capabilities. This spell includes the ability to make cosmetic changes. This lets the caster impersonate a specific member of any spider species he can turn into.

The caster can always take on the form of a being he can see or touch, provided its racial template cost does not exceed his maximum. Once he has assumed a form, he can opt to memorize it by concentrating for one minute. This allows him to shapeshift into that form at any time. The caster can memorize a number of forms equal to his IQ. If all his “slots” are full, he must overwrite a previously memorized form (his choice) to add the new form. Memorizing cosmetic changes also requires a “slot”. If the caster can assume any racial template worth no more than his native one, Spiderform costs 35 points. This makes many forms available – anything no more powerful than his native form. If the caster can assume more powerful forms, add the difference between the maximum racial template cost and the cost of his native template to the base 35 points. For instance, a human who can take on any spider racial template worth up to 75 points would pay 110 points for Spiderform.

In addition, the caster may purchase the improved (115-point) version of this spell. This shortens the transformation time to 1 second.

Statistics: Morph (Accessibility, Spiders and Driders Only, -50%; Sorcery, -15%) [35]. The improved version adds Reduced Time 4, +80% [+80].

Spirit Incursion

Keywords: Area (Fixed).

Full Cost: 5 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

Fills a 2-yard-radius area with conjures evil spirits. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. This spell conjures evil spirits related to those called by Skull-Spirit (*GURPS Magic*, p. 151). But instead of a single entity that serves

obediently for 24 hours and is free to roam, this spell brings an indeterminate number of spirits that stay for mere seconds, are bound to a place, and don't distinguish friend from foe. Each turn, every living creature in the area suffers 1 HP of toxic injury, which bypasses all DR.

Attempts to battle the entities this spell conjures are pointless – the magic brings a steady stream of spirits that partially materialize where the victim cannot see them, take a “bite,” and then vanish into the Spirit World. Neutralizing a small number would change nothing. However, Repel Spirits excludes these beings unless Spirit Incursion can beat it in a Quick Contest, while Astral Block prevents them from partially materializing to attack. Either situation means people inside the area of the defensive spell are safe

Statistics: Toxic Attack 1 point (Accessibility, Only on living beings, -10%; Area Effect, 2 yards, +50%; Cosmic, Irresistible Attack, +300%; Nuisance Effect, Spirit Resistance, -5%; Persistent, +40%; Sorcery, -15%) [5].

Spit Acid

Keywords: Jet, Obvious.

Full Cost: 9 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of acid erupts from your mouth. Use Innate Attack (Breath) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does corrosion damage with dice equal to your level of this spell. The GM must determine what the maximum level available in the campaign is.

Statistics: Corrosion Attack 1d (Increased 1/2D, 2x, +5%; Jet, +0%; Sorcery, -15%) [9/level].

Spit Alkahest

Keywords: Jet, Obvious.

Full Cost: 19 points/level.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: Instantaneous.

A 10-yard jet of alkahest erupts from your mouth. Use Innate Attack (Breath) to hit. Don't apply range penalties; treat this as a long melee weapon rather than a ranged attack. It does corrosion damage with dice equal to your level of this spell. This damage leaves a lingering effect that deals 1 point of corrosion damage per second, for a number of seconds equal to the number of dice. This effect can only be removed by rinsing the targeted zone with Essential Water. Resist Acid only halves the damage of this spell, instead of rendering the target immune. The GM must determine what the maximum level available in the campaign is.

Statistics: Corrosion Attack 1d (Cosmic, Lingering Effect, +100%; Increased 1/2D, 2x, +5%; Jet, +0%; Sorcery, -15%) [19/level].

Spit Venom

Keywords: Missile, Obvious.

Full Cost: 14 points or more.

Casting Roll: None. Use Innate Attack (Breath) to hit.

Range: 10 yards.

Duration: Instantaneous.

The caster must have a poisonous bite attack to cast this spell, or have poison applied to his teeth. The caster spits a dose of poison from his mouth. Use Innate Attack (Breath) to hit. This has 1/2D 1, Max 10, Acc 3. The spell does not provide the poison, and the poison used works normally. Thus, a

contact poison must hit unarmored skin, a blood agent or a follow-up agent must hit an open wound, and an inhaled poison creates cloud where it hits.

At level one, this spell can only be used once per 10 seconds. Additional levels reduce this recharge time.

Level	Recharge	Point cost	Level	Recharge	Point cost
1	10 seconds	14 points	6	5 seconds	46 points
2	9 seconds	20 points	7	4 seconds	52 points
3	8 seconds	27 points	8	3 seconds	58 points
4	7 seconds	33 points	9	2 seconds	64 points
5	6 seconds	40 points	10	1 second	72 points

Statistics: Imbue 3 (Limited Skill Access, Project Blow, -80%) [8] + Unusual Training [1] + Project Blow (VH) DX+0 [8] modified with Accessibility, Only bite venom, -80%; Cosmic, No die roll required, +100%; Magical, -10%; Reduced Range, 1/10, -30% for a final cost of 14 points. Additional levels add more skill.

Splat

Keywords: Area (Leveled).

Full Cost: 108 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

Briefly opens a connected pair of portals in the area: one atop horizontal surfaces in the area, one above them. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. Anyone on the ground or an inanimate object “falls” through the lower door, emerges from the upper one, falls again, and so on, accelerating under gravity – and then the portals close, slamming victims into whatever was supporting their weight a moment ago.

Treat this as a five-yard (velocity 10) fall, usually onto a hard surface; see *Collisions and Falls* (pp. B430-431). This deals 2d crushing to victims with HP 8-12, plus an extra 1d per +5 HP; e.g., 3d at HP 13-17. This is standard falling damage – *Hit Location from a Fall* (p. B431) applies and armor counts as “flexible.” For those on chairs, tables, etc., maximum falling damage equals DR + HP of the furniture; this much damage also breaks the object.

As victims have no idea where the ground is until it suddenly appears, it’s difficult to use Acrobatics to mitigate this fall. Roll at a basic -10, but being on the receiving end of this spell in the past gives +1 per experience until the penalty is just -5. On landing, victims who remain capable of standing have to roll against Body Sense, Acrobatics, or DX. Success lets them land on their feet and act normally. Failure means falling down and being forced to Do Nothing next turn; critical failure, falling down physically stunned!

Statistics: Affliction 1 (DX; Accessibility, Legs and similar supportive body parts only, -20%; Area Effect, 2 yards, +50%; Based on DX, +20%; Cosmic, Irresistible Attack, +300%; Fixed Duration, +0%; Link, +10%; No fatigue loss from Seizure, -20%; No Signature, +20%; Seizure, +100%; Stunning, +10%; Reduced Duration, 1/180, -40%; Sorcery, -15%; Variable, Area, +5%) [52] + Crushing Attack 2d (Area Effect, 2 yards, +50%; Cosmic, Treat Armor as Flexible, +200%; Environmental, Ground, -20%; HP-Based, +200%; Link, +10%; Magical, -10%; No Signature, +20%; Variable, Area, +5%) [56]. Further levels add Area Effect (+50%) to both advantages [+10].

Sponge

Keywords: None or Buff.

Full Cost: 1 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

The subject's hands absorb liquids, like sponges. Wringing hands squeezes out the liquid. Each cycle takes three seconds and removes two fluid ounces (just over 0.1 lb. if water).

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Accessory (Sponge; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Sponge, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Sponge" is Accessory (Sponge; Magical, -10%) [1].

Spore Cloud

Keywords: Area (Leveled).

Full Cost: 32 points for level 1 + 6 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with irritating spores. This gives -1 to all vision rolls made through it. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every creature that inhales the spores, begins to cough (is at -3 to DX and -1 to IQ, and cannot use Stealth) for 3 minutes, if it fails a HT roll.

The basic (32-point) version of this spell covers a two-yard radius. For each additional 6 points, you may double this radius; e.g., four yards for 38 points, 8 yards for 46 points, or 16 yards for 52 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Obscure Vision 1 (Drifting, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [4] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Coughing, +20%; Drifting, +20%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Respiratory Agent, +50%; Sorcery, -15%; Variable, Area, +5%) [28]. Further levels add Area Effect (+50%) to both advantages [+6].

Spotless Hands

Keywords: None or Buff.

Full Cost: 1 or 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 1 minute.

Subject can plant seeds, work clay, or dig barehanded without getting filthy hands. Doesn't repel anything but "earth".

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (12-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Shtick (Spotless Hands; Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Spotless Hands, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Spotless Hands" is Shtick (Spotless Hands; Magical, -10%) [1].

Spying Blossom

Keywords: None.

Full Cost: 11 points.

Casting Roll: None.
Range: Touch.
Duration: Indefinite.

The caster makes the flower he is touching while casting this spell a surveillance “bug”. Once the spell is cast, the blossom transmits visual, audio, and olfactory information with complete accuracy to the caster’s mind. The connection is unaffected by the movement of the caster or the blossom. Once the caster stops maintaining the spell, the link fades.

Statistics: Mindlink (Flower; Sorcery, -15%) [5] + Mind Reading (Accessibility, Mindlinked Flower Only, -80%; Magical, -10%; Sensory Only, -20%) [6].

Squeak

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: 1 second or Instantaneous.

The caster produces a brief, high-pitched sound similar to a creaky floorboard, rusty door hinge, mouse, etc. Use the “leaves rustling” line on the *Hearing Distance Table* (p. B358). Could distract somebody in a quiet environment or serve as an irritation.

Statistics: Accessory (Squeaky Item; Sorcery, -15%) [1].

Squirt

Keywords: Jet, Obvious.
Full Cost: 1 point.
Casting Roll: None. Use Innate Attack (Beam) to hit.
Range: 3 yards.
Duration: Instantaneous.

You shoot a squirt of water from one finger. May be blocked or dodged, but not parried. Insufficient to cause knockback or damage – even to swarms and fire entities – or to extinguish more than a candle flame.

Statistics: Squirt (Sorcery, -15%) [1].

Stabbing Party

Keywords: Area (Leveled), Resisted (Will; special).
Full Cost: 43 points for level 1 + 25 points/additional level.
Casting Roll: IQ.
Range: Unlimited.
Duration: 1 second.

Sapient creatures who fail to resist (a subject must lose *two* resistance contests) must use their next combat maneuver to attack the nearest ally (never an enemy or neutral party); if several are equidistant, choose one at random. Subjects with no allies on the battlefield are unaffected.

A subject with a ready ranged attack uses it, usually meaning an Attack maneuver. One with only melee attacks chooses Attack if the nearest ally is within one step, All-Out Attack (Strong) if the target is farther away but within half Move forward, or Move and Attack if those options are impossible. A subject who can’t attack the nearest ally in one turn prepares to do so, dropping a melee weapon to Ready a ranged one, using Concentrate to cast a Missile spell, or – if without a ranged attack – taking a full Move toward the chosen target.

Movement is always as direct as possible, without regard for battle formations or who ends up behind whom. Subjects suffer unavoidable penalties for their attacks (e.g., distance and visibility for ranged attacks, or the Move and Attack penalty), but won’t take optional penalties for hit location,

Deceptive Attack, Rapid Strike, etc. unless final skill would be 16+. Similarly, they won't try to "spoil" attacks by, for instance, taking Move and Attack if they could Attack, or shifting their weapon to the off hand. For one turn, they truly want to kill their allies.

Attacks must likewise be as damaging as possible, never "pulling punches," always choosing the Strong option if making an All-Out Attack, and using the deadliest attack mode or weapon (GM's decision) if there's a choice. Anyone who can Fast-Draw a better weapon does so; e.g., someone holding a dagger and wearing a holstered pistol drops the blade, Fast-Draws the gun, and shoots. If this means expending a one-shot item, expensive Missile spell, or limited-use ability, too bad!

Targets of these attacks may defend normally if they see them coming. Attacks from allies are likely to come from the back (no defense) or side (-2 to defend), however.

If you tie or lose, the subjects can sense coercion coming from you. In addition, you cannot try to affect them again within 24 hours.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to harm ally, -30%; Area Effect, 2 yards, +50%; Fixed Duration, +0%; Independent, +70%; Reduced Duration, 1/180, -40%; Sorcery, -15%; Suggestion, -40%) [48]. Additional levels add Area Effect (+50%) [+25].

Staff

Keywords: Buff.

Full Cost: 14 points.

Casting Roll: None. Special casting time.

Range: Touch.

Duration: Permanent.

Enchants a magic staff – see *Magic Staffs* (*GURPS Magic*, p. 13). The ritual takes 8 hours of uninterrupted work. This effect is permanent, but it can be dispelled.

Statistics: Affliction 1 (HT; Advantage, Staff, +10%; Extended Duration, Permanent, +150%; Immediate Preparation Required, 8 hours, -90%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [14]. *Note:* "Staff" is Magic Staff (Magical, -10%) [1].

Stand Out

Keywords: Resisted (HT).

Full Cost: 30 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 minutes.

It becomes hard for the subject to blend in. The subject's face is easy to pick out or remember. He gets -1 to Shadowing in crowds, while others have +1 to rolls made to recognize him from a lineup or mug shots – or even to recall meeting him!

Statistics: Affliction 1 (HT; Disadvantage, Memorable Face, +1%; Extended Duration, x10, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30].

Starbolt

Keywords: Missile, Obvious.

Full Cost: 14 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 1,500 yards.

Duration: Instantaneous.

You fire a beam coherent X-rays that does 1d(5) burning damage per level! This is a tight-beam burning attack; see p. B399. It has 1/2D 750, Max 1,500.

Starbolt is not a projectile attack, and is thus not affected normally by spells like Reverse Missiles. Deflect Energy protects against it normally.

Statistics: Burning Attack (Armor Divisor, (5), +150%; Increased 1/2D, x5, +10%; Increased Range, x15, +35%; Sorcery, -15%) [14/level].

Startle

Keywords: Resisted (Will).

Full Cost: 17 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

The subject, who must be a sapient being, is spooked. Has no fixed game effects, but may cause the subject to scream "Eek!" or spill a drink.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, No actual stunning, -100%; Sorcery, -15%) [17].

Static Charge

Keywords: Resisted (HT).

Full Cost: 57 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Three minutes or until discharged; see below.

This spell gives the subject an electrostatic charge. His hair stands on end and ranged electrical attacks like Lightning have +2 to hit him. Anyone who touches him suffers a mild electrical shock: roll vs. (HT + DR) or be stunned. This spell ends if the subject is hit by an electrical attack or "zaps" someone.

Statistics: Affliction 1 (HT; Advantage, Static Charge, +320%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Terminal Condition, Hit by an electrical attack or discharges the stun aspect, -10%) [57]. *Note:* "Static Charge" is Affliction 1 (HT; Aura, +80%; Magical, -10%; Melee Attack, Reach C, -30%; Single Use, x1/5) [3] + Obscure 2 (Anti-Targeting, -20%; Cosmic, All Mundane Senses, +300%; Cosmic, All Supernatural Senses, +300%; Defensive, +50%; Limited, Ranged Electrical Attacks, -60%; Magical, -10%; No Area Effect, -50%; Reversed, -0%; Stealthy, +100%) [29].

Steal Beauty

Keywords: Resisted (HT).

Full Cost: 61 points.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 2 days.

The victim (who must be a sapient living being) suffers temporary Appearance (p. B21) decrease. This spell lowers the subject's appearance by three steps (but not lower than Hideous), and increases the caster's Appearance by as many steps. Beauty can only be stolen from someone of better appearance than the caster, and the caster cannot gain better appearance than the subject's initial appearance level.

Statistics: Affliction 1 (HT; Accessibility, Only on being more beautiful than the caster, -20%; Accessibility, Sapient living beings only, -15%; Disadvantage, Hideous, +16%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Link, +10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [29] + Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Steal Beauty, +150%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Not better than the stolen appearance, -20%; No Signature, +20%) [32]. *Note:* "Steal Beauty" is Very Handsome/Beautiful (Magical, -10%) [15].

Steal Breath

Keywords: Resisted (HT).
Full Cost: 60 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

This spell removes the body's ability to get oxygen to essential systems. Treat as heart attack (p. B429) for most purposes: the subject drops to -FP, falls unconscious, and dies in HT/3 minutes unless resuscitated. However, the arrest is respiratory, not cardiac, which may affect treatment (GM's option).

Resuscitated victims have the lower of their current HP or 0 HP. Those unconscious for more than two minutes must roll vs. HT to avoid a permanent -1 to IQ, as described for Suffocation (pp. B436-437).

This spell affects only breathing, oxygen-dependent life forms. Doesn't Breathe – or any variety of Injury Tolerance that includes No Blood or No Vitals – gives immunity. Machines that require oxygen must resist or shut down until restarted. Air elementals and subjects with the Body of Air meta-trait (p. B262) are instantly destroyed on a failed resistance roll.

Statistics: Affliction 1 (HT; Accessibility, Only on breathing living creatures and oxygen-dependent machines, -15%; Disadvantage, Fragile (Enhanced Unnatural), Only against air elementals, +60%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [60].

Steal Energy

Keywords: None.
Full Cost: 14 points for level 1 + 3 points/additional level.
Casting Roll: None.
Range: Touch.
Duration: Indefinite.

You can steal FP from a victim to replenish your own. There is no resistance roll, but the subject must be either willing or completely helpless. You must touch him constantly while stealing energy. Every two seconds, he loses FP equal to the level of this spell; for every full 3 FP he loses, you recover 1 FP.

Statistics: Leech 1 (Only Heals FP, -20%; Sorcery, -15%; Takes Extra Time 1, -10%) [14 + 3/additional level].

Steal Essentia

Keywords: None.
Full Cost: 14 points for level 1 + 3 points/additional level.
Casting Roll: None.
Range: Touch.
Duration: Indefinite.

You can steal essentia from a victim to replenish your own. There is no resistance roll, but the subject must be either willing or completely helpless. You must touch him constantly while stealing energy. Every two seconds, he loses essentia equal to the level of this spell; for every full 3 points of essentia he loses, you recover 1 FP or 1 point of essentia.

Statistics: Leech 1 (Only Heals ER, -20%; Sorcery, -15%; Takes Extra Time 1, -10%) [14 + 3/additional level].

Steal Grace

Keywords: Resisted (DX).
Full Cost: 38 points for level 1 + 19 level/additional level.
Casting Roll: Will. Use DX or unarmed combat skill to hit.
Range: Touch.
Duration: 3 minutes.

The victim (who must be a sapient living being) suffers temporary DX loss equal to the spell level. Lower all skills based on DX by a like amount. Secondary characteristics are not affected. However, the caster cannot lower the subject's attribute below the subject's racial average (10 for a human). Thus, a subject must have an exceptional score for this spell to work. The caster gains a bonus to DX equal to the imposed penalty for the duration of the spell.

Statistics: Affliction 1 (DX; Accessibility, Sapient living beings only, -15%; Attribute Penalty, DX-1, +10%; Based on DX, +20%; Fixed Duration, +0%; Link, +10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Penalty cannot lower the attribute below racial average, -50%; Sorcery, -15%) [15] + Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Steal Grace 1, +180%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Not more than the stolen DX, -20%; No Signature, +20%) [23]. Additional levels add extra DX-1, +10% to the first Affliction and more Steal Grace to the second Affliction [+19/level]. *Note:* Each level of "Steal Grace" is DX+1 (Magical, -10%) [18].

Steal Might

Keywords: Resisted (HT).

Full Cost: 36 points for level 1 + 19 level/additional level.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 3 minutes.

The victim (who must be a sapient living being) suffers temporary ST loss equal to twice the spell level. Lower all skills based on ST by a like amount. ST penalties also reduce BL and damage. HP is not otherwise affected. However, the caster cannot lower the subject's attribute below the subject's racial average (10 for a human). Thus, a subject must have an exceptional score for this spell to work. The caster gains a bonus to ST equal to the imposed penalty for the duration of the spell.

Statistics: Affliction 1 (HT; Accessibility, Sapient living beings only, -15%; Attribute Penalty, ST-2, +10%; Fixed Duration, +0%; Link, +10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Penalty cannot lower the attribute below racial average, -50%; Sorcery, -15%) [13] + Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Steal Might 1, +180%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Not more than the stolen ST, -20%; No Signature, +20%) [23]. Additional levels add extra ST-2, +10% to the first Affliction and more Steal Might to the second Affliction [+19/level]. *Note:* Each level of "Steal Might" is ST+2 (Magical, -10%) [18].

Steal Power

Keywords: None.

Full Cost: 7 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

You can steal power from a stored power source (such as a battery) to restore your FP. There is no resistance roll, but the power source must be either willing or completely helpless (this way you can't drain a magically animated battery). You must touch it constantly while stealing power. Every second, it loses 360 kW and you recover 1 FP. The default assumption is that one kilowatt-hour (kWh) is equal to 10 energy; 360 kilowatts (kW) is equal to 1 energy/second, and 360 kilowatt-seconds (kWs) or kilojoules (kJ) is equal to 1 energy. Some settings may have different assumptions, however.

The caster cannot draw more power from a source than (IQ + Talent)% of its power capacity. If the caster steals power from a source, he cannot steal power from that same source ever again.

Statistics: Leech 3 (Mechanical; Accessibility, Only stored power sources, -20%; Increased Immunity 4, -40%; Only Heals FP, -20%; Nuisance, Limited Maximum Drain, -30%; Sorcery, -15%; Steal FP, -25%) [7].

Steal Skill

Keywords: Resisted (Will).
Full Cost: 60 points.
Casting Roll: Will.
Range: 1 mile.
Duration: 1 minute.

You can “tap into” the mind of a sapient subject you can see or hear, and steal their knowledge. You can steal the equivalent of 4 character points in a single skill (e.g., if you learned a Hard skill, you would know it at IQ+0). You cannot have more points in the skill than the person you’re stealing it from does. If the distance between you and the subject becomes more than a mile, you lose the stolen skill!

Statistics: Telepathic Learning 4 (Limited, One Skill, -10%; Power Theft, +200%; Reduced Time 2, +40%; Requires a Will vs. Will roll, -15%; Sorcery, -15%; Vision- or Hearing-Based, -15%) [60]. *Note:* The Power Theft enhancement was borrowed from the Leech advantage.

Steal Spell

Keywords: Area (Special).
Full Cost: 30 points for level 1 + 15 points/additional level.
Casting Roll: IQ.
Range: 100 yards.
Duration: Indefinite.

This spell allows the caster to attempt to take control of an ongoing spell that someone else has cast. Steal Spell must target the subject, not the caster. When affecting an area spell, the entire area must be covered by Steal Spell. The first level of this spell covers an area one yard in radius; each additional level increases this by one yard.

If the spell is already under someone else’s direct control (for example, if the spell has an indefinite duration and the original caster can change some of its parameters, or if someone else has cast Displace Spell on it), roll a Quick Contest of the caster’s IQ against the other person’s IQ or appropriate spell skill, if the control was established by a spell of another magic system. The caster must win to establish control. If the spell is a “fire and forget” one, then a successful IQ roll is required.

Steal Spell allows the caster to change parameters that the original caster had control over. For example, give mental orders via Animal Control (*GURPS Thaumatology: Sorcery*, p. 13), move Light (*GURPS Thaumatology: Sorcery*, p. 19), etc. Note that the caster must not only pay the maintenance cost of Steal Spell, but also maintain the stolen spell.

Statistics: Control Magic 1 (Accessibility, Only to control parameters, -25%; Ranged, +40%; Sorcery, -15%) [30]. Additional levels add Control Magic +1 (Accessibility, Only to control parameters, -25%; Only increases area of effect, -50%; Ranged, +40%; Sorcery, -15%) [15/level]. *Note:* As this is one advantage (Control Magic) with the Sorcery limitation, not two, it costs only 1 FP to use.

Steal Vigor

Keywords: Resisted (HT).
Full Cost: 36 points for level 1 + 19 level/additional level.
Casting Roll: Will. Use DX or unarmed combat skill to hit.
Range: Touch.
Duration: 3 minutes.

The victim (who must be a sapient living being) suffers temporary HT loss equal to twice the spell level. Lower all skills based on HT by a like amount. Secondary characteristics are not affected. However, the caster cannot lower the subject’s attribute below the subject’s racial average (10 for a human). Thus, a subject must have an exceptional score for this spell to work. The caster gains a bonus to HT equal to the imposed penalty for the duration of the spell.

Statistics: Affliction 1 (HT; Accessibility, Sapient living beings only, -15%; Attribute Penalty, HT-2, +10%; Fixed Duration, +0%; Link, +10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Penalty cannot lower the attribute below racial average, -50%; Sorcery, -15%)

[13] + Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Steal Vigor 1, +180%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Not more than the stolen HT, -20%; No Signature, +20%) [23]. Additional levels add extra HT-2, +10% to the first Affliction and more Steal Vigor to the second Affliction [+19/level]. *Note:* Each level of "Steal Vigor" is HT+2 (Magical, -10%) [18].

Steal Wisdom

Keywords: Resisted (IQ).

Full Cost: 38 points for level 1 + 19 level/additional level.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 3 minutes.

The victim (who must be a sapient living being) suffers temporary IQ loss equal to the spell level. Lower all skills and spells based on IQ by a like amount. IQ reductions also apply to Will and Perception. However, the caster cannot lower the subject's attribute below the subject's racial average (10 for a human). Thus, a subject must have an exceptional score for this spell to work. The caster gains a bonus to IQ equal to the imposed penalty for the duration of the spell.

Statistics: Affliction 1 (DX; Accessibility, Sapient living beings only, -15%; Attribute Penalty, IQ-1, +10%; Based on IQ, +20%; Fixed Duration, +0%; Link, +10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Penalty cannot lower the attribute below racial average, -50%; Sorcery, -15%) [15] + Affliction 1 (HT; Accessibility, Self Only, -50%; Advantage, Steal Wisdom 1, +180%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Not more than the stolen IQ, -20%; No Signature, +20%) [23]. Additional levels add extra DX-1, +10% to the first Affliction and more Steal Wisdom to the second Affliction [+19/level]. *Note:* Each level of "Steal Wisdom" is IQ+1 (Magical, -10%) [18].

Steal Youth

Keywords: None.

Full Cost: 130 points for level 1 + 21 points/additional level.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

You permanently age your victim. There is no resistance roll, but the subject must be either willing or completely helpless. You must touch him constantly while stealing youth. Every two seconds, he ages by months equal to the spell level; for every full 2 months of aging, you grow 1 month younger.

Statistics: Leech 1 (Sorcery, -15%; Steal Youth, Permanent, +450%; Nuisance Effect, Must grow younger, -5%; Takes Extra Time 1, -10%) [130 + 21/additional level].

Steam Jet

Keywords: Jet, Obvious.

Full Cost: 52 points for level 1 + 19.75 points per additional level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 20 yards.

Duration: One second.

You shoot a thin jet of steam from your fingertip, which can strike any target up to 20 yards away (without range or speed penalties). It can be dodged or blocked, but not parried. This jet does 1d burning non-incendiary damage per level, and 1d crushing damage *doubled*, for the purposes of knockback *only* (this *crushing* damage deals no injury or blunt trauma).

Against enemies with Injury Tolerance (Diffuse), such as gaseous beings and swarms, this becomes a *much* more potent attack, doing full crushing damage – including the doubling (in addition to burning damage)! Ignore the usual injury cap of 2 HP (*Injury to Unliving, Homogenous, and Diffuse Targets*, p. B380).

If the spell strikes the face, it also blinds the target for 3 seconds unless he makes a HT roll. Thick goggles, closed helmets, ultra-tech visors protect against this spell.

The jet lasts until the beginning of the sorcerer's next turn, allowing the user to parry incoming attacks with it. If a parry is successful, the jet automatically damages the incoming weapon or limb, much like a force sword. Though this spell cannot be maintained, if cast every turn, the steam stream is not interrupted and the caster may continue to attack with it normally.

Statistics: Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Destructive Parry, +10%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Melee-Capable, Reach 1, +15%; Reduced Duration, 1/60, -35%; Reflexive, +40%; Sorcery, -15%; Vision-Based, +150%) [32] + Burning Attack (Destructive Parry, +10%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; Melee-Capable, Reach 1, +15%; No Incendiary Effect, -10% Reflexive, +40%) [8.5/level] + Crushing Attack (Cosmic, Does knockback-based damage against diffuse targets, +50%; Destructive Parry, +10%; Double Knockback, +20%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; Melee-Capable, Reach 1, +15%; No Blunt Trauma, -20%; No Wounding*, -25%; Reflexive, +40%) [10.25/level].

* Except versus diffuse targets, an exception which decreases the value of this limitation.

Steelwraith

Keywords: Buff.

Full Cost: 96 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Nine minutes.

This spell makes the subject intangible to metal. He cannot turn this ability off, and automatically falls through any metal floors. He will need to hold his breath on long trips (this spell does not provide air) and gains no special ability to see through metal. He may carry up to Medium encumbrance while doing this, but he cannot carry any metal objects – they fall through his body.

This spell does *not* make the subject immune to attacks with metal weapons, but makes him highly resistant to them. The subject is considered to be diffuse against metal attacks. It makes him immune to crippling injuries and reduces the damage you suffer from attacks with metal weapons; see *Injury to Unliving, Homogenous, and Diffuse Targets* (p. B380). Metal foes cannot slam or grapple the subject! This includes all the benefits of No Blood, No Brain, and No Vitals, but only against metal attacks.

Statistics: Affliction 1 (HT; Advantage, Steelwraith, +820%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [96]. *Note:* "Steelwraith" is Permeation (Metal; Always On, -40%; Can Carry Objects, Medium Encumbrance, +50%; Magical, -10%; Nuisance Effect, Can't carry anything metal, -20%) [32] + Injury Tolerance (Diffuse; Limited, Metal, -40%; Magical, -10%) [50].

Stench

Keywords: Area (Leveled).

Full Cost: 13 points for level 1 + 2 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may fill a two-yard-radius area with yellowish gas that reeks of brimstone. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every subject that inhales the cloud, takes 1d toxic damage, if he fails a HT-1 roll. Should he cumulatively lose 2/3 of his HP to this spell, he begins to choke. The subject loses his ability to breathe or speak. He may do nothing but drop. While the choking endures, he suffers the effects of suffocation (see *Suffocation*, p. 436). After that the subject is stunned (B420) and may roll vs. HT once

per second to recover. The subjects with Doesn't Breathe or Injury Tolerance (Homogenous) are immune to this effect! These symptoms abate only when the damage that caused them is healed.

Statistics: Toxic Attack 1d (Area Effect, 2 yards, +50%; Drifting, +20%; Persistent, +40%; Resisted, HT-1, -25%; Respiratory Agent, +50%; Sorcery, -15%; Symptoms, 2/3 HP, Choking, +100%; Variable, Area, +5%) [13]. Further levels add Area Effect (+50%) to the advantage [+2].

Sticky Flame

Keywords: Missile, Obvious.

Full Cost: 39 points.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: 10 seconds.

This spell conjures a sticky glob of liquid fire, which will adhere to and burn any creature it strikes. This missile can be dodged or blocked. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d-1 burning damage. The flame sticks to the target, damaging him again every second for 9 seconds. The cycles can be stopped only by fully immersing the victim in water.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid hitting yourself with your own sticky flame!

Statistics: Burning Attack 1d-1 (Blockable, -5%; Cyclic, 9 cycles, 1 second intervals, +900%; Nuisance Effect, Dangerous to be parried, -5%; Sorcery, -15%) [39].

Stiffen

Keywords: Buff or Resisted (ST).

Full Cost: 44 points.

Casting Roll: Will or None. Use Innate Attack (Gaze) to aim.

Range: 100 yards or Unlimited.

Duration: 3 minutes.

Temporarily stiffens a limp object; turns a rope into a pole, for example, or a thread into a lockpick. Does not work on living beings. This spell can be used to make improvised weapons; the GM judges their effectiveness. This spell may also be used to stiffen a foe's clothes. In this case, the foe resists the spell with his ST. If it works, he is at -1 DX for each pound of clothing that was stiffened, and this DX change does affect his Move.

Statistics: Affliction 1 (HT; Alternative Enhancements (Accessibility, Only on inanimate objects, -10% and Increased 1/2D, 10x, +15%; or Accessibility, Only on worn clothes, -40%; Based on wearer's ST, +20%; Malediction 2, +150%), +131%; Fixed Duration, +0%; Negated Disadvantage, Invertebrate, +200%; No Signature, +20%; Sorcery, -15%) [44].

Stifle

Keywords: None.

Full Cost: 4 points.

Casting Roll: IQ.

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can momentarily stop a belch, cough, fart, sneeze, etc. that might embarrass or give them away. Has to be cast every seconds for ongoing irritations. Cannot block more serious effects, such as choking, retching, or seizures.

Statistics: Immunity to Irritations (Requires IQ Roll, -10%; Sorcery, -15%) [4].

Stimulant

Keywords: Buff.

Full Cost: 12 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: One minute.

The subject becomes more resistant to drowsiness, ignoring -1 in penalties from effects that cause it.

Statistics: Affliction 1 (HT; Advantage, Stimulant, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12]. *Note:* "Stimulant" is Stimulant (Magical, -10%) [1].

Sting

Keywords: Missile, Obvious.
Full Cost: 4 points.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

This spell fires a poisonous needle. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1 point of small piercing damage. It is poisoned with a follow-up poison that deals 1 point of toxic damage each second for 5 seconds. Each instance of toxic damage can be negated with an HT roll. A successful roll stops all remaining cycles.

Statistics: Small Piercing Attack 1 (Magical, -10%) [1] + Toxic Attack 1 (Cyclic, 4 cycles, 1 second intervals, +200%; Follow-Up, +0%; Resistible, HT, -30%; Sorcery, -15%) [3].

Stinkguard

Keywords: Buff.
Full Cost: 12 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 1 minute.

The subject loses their sense of smell for the duration of this spell.

Statistics: Affliction 1 (HT; Disadvantage, No Sense of Smell/Taste (Smell Only, -50%), +2%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [12].

Stinking Cloud

Keywords: Area (Leveled).
Full Cost: 39 points for level 1 + 8 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

You may fill a two-yard-radius area with bad smelling smoke. This gives -3 to all vision rolls made through it. To place the cloud at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect. It then drifts from that point with the wind.

Additionally, every creature that inhales the cloud, begins to cough (is at -3 to DX and -1 to IQ, and cannot use Stealth) for 3 minutes, if it fails a HT roll.

Statistics: Obscure Vision 3 (Drifting, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [11] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Coughing, +20%; Drifting, +20%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Respiratory Agent, +50%; Sorcery, -15%; Variable, Area, +5%) [28]. Further levels add Area Effect (+50%) to both advantages [+8].

Stone Knuckles

Keywords: None or Buff.

Full Cost: 1 or 19 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 90 minutes.

Subject's knuckles and toe joints become covered in stony growths. His punch counts as having brass knuckles and kick works as if wearing heavy boots. This gives +1 to damage, not stacking with actual brass knuckles and heavy boots.

The basic (1-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (19-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Striking Surface (Sorcery, -15%) [1]. The improved version is Affliction 1 (HT; Advantage, Stone Knuckles, +10%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [19]. *Note:* "Stone Knuckles" is Striking Surface (Magical, -10%) [1].

Stone Missile

Keywords: Missile, Obvious.

Full Cost: 4 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of stone at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d crushing damage per level of this spell. The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Statistics: Crushing Attack (Blockable, -5%; Sorcery, -15%) [4/level].

Stone Spikes

Keywords: Area (Leveled).

Full Cost: 9 points for level 1 + 3 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may temporarily transform a two-yard-radius area of stone or rock surface into spikes. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Every creature moving through the area takes 1d large piercing damage to their feet. A creature that falls in the area takes the same amount of damage to a random hit location.

The basic (9-point) version of this spell covers a two-yard radius. For each additional 3 points, you may double this radius; e.g., four yards for 12 points, 8 yards for 15 points, or 16 yards for 18 points. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to affect a lesser area.

Statistics: Large Piercing Attack 1d (Accessibility, Only against moving or falling creatures, -10%; Area Effect, 2 yards, +50%; Environmental, Ground, -20%; Fixed Duration, +0%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [9]. Further levels add Area Effect (+50%) to the advantage [+3].

Stone Tell

Keywords: Information.

Full Cost: 25 points.

Casting Roll: IQ.
Range: Touch.
Duration: Instantaneous.

By touching a stone, you can force it to answer any one specific question that it can answer with a brief sentence. To attempt a probe, you must first touch the stone, concentrate for one second, and make an IQ roll. You have to vocally ask the question, and the stone responds in the same language.

The stone cannot resist, but your IQ (plus Talent) roll is at a penalty equal to the stone's SM, and you only get *one* try. If you win, you give the stone a semblance of life and force it to give you the answer. The answer is what the stone believes to be true – if it doesn't know, it'll tell you. A stone's perspective, perception, and knowledge may prevent the stone from providing the details you are looking for.

Statistics: Mind Probe (Accessibility, Only on stones, -50%; Cosmic, Works on inanimate objects, +50%; Requires Words, -10%; Sorcery, -15%; Universal, +50%) [25]. *Feature:* Size penalty replaces the normal Quick Contest.

Stone to Earth

Keywords: None.
Full Cost: 6 points/level or 16 points/level.
Casting Roll: IQ.
Range: Touch.
Duration: Permanent.

The basic (6 point/level) version of this spell allows you to turn any kind of stone (including gemstone) into simple earth. The spell must be cast on a whole stone or block, rather than a part of it. The improved version (16 points/level) also allows you to turn metal into stone (but not gemstone). To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

Statistics: Create (Accessibility, Must be cast on a whole stone or block, -10%; Transmute Stone to Earth, +50%; Transmutation Only, -100%; Magical, -10%) [6/level]. The improved version adds Transmute Metal to Stone, +50% [+10/level].

Stone to Flesh

Keywords: Resisted (Will or spell).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

Attempts to reverse the effects of Flesh to Stone (or any similar petrification spell or ability) and bring the victim back to life (stunned). Cannot be used to animate a statue that was never alive.

Treat the resistance roll as for Dispel Magic (see *GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Cosmic, Can dispel spells that are immune to Dispel Magic, +50%; Interruption, -50%; One Ability, Flesh to Stone, -80%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [28].

Stone to Metal

Keywords: None.
Full Cost: 8 points/level.
Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn stone into simple metal like bronze or iron. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that's inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

If the product is worth more than what you started with, it's unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign's average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your "Creation Pool," a number of points set aside for the purpose. You can't apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Transmute Stone to Metal, +50%; Transmutation Only, -100%; Magical, -10%) [8/level].

Stoneskin

Keywords: Buff.

Full Cost: 54 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject's skin becomes resistant to damage, like if made of stone. The subject gains DR 10 that covers his whole body, including the eyes. This DR is semi-ablative - every 10 points of basic damage rolled removes one point of DR, regardless of whether the attack penetrates DR. Lost DR "heals" at the same rate as lost HP (including the effects of Regeneration, p. B80).

Statistics: Affliction 1 (HT; Advantage, Stoneskin, +420%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [54]. *Note:* "Stoneskin" is DR 10 (Magical, -10%; Semi-Ablative, -20%) [35] + Nictitating Membrane 10 (Magical, -10%; Semi-Ablative, -20%) [7].

Stop Annihilation

Keywords: Area (Special).

Full Cost: 110 points for level 1 + 6 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 30 seconds.

This spell prevents annihilation of matter than comes into contact with antimatter from occurring within an area with a radius equal to (9 + spell level) yards. This will prevent antimatter reactors from functioning, pulsars from dealing damage, antimatter warheads from detonating.

Statistics: Control Antimatter 10 (Accessibility, Only to stop annihilation, -65%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [110]. Additional levels add Control Antimatter (Accessibility, Only to stop

annihilation, -65%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [6/level].

Stop Bleeding

Keywords: Resisted (HT).

Full Cost: 12 points.

Casting Roll: IQ or First Aid (at +4).

Range: 10 yards.

Duration: Instantaneous.

The subject, who must be within 10 yards, stops bleeding, as if his wounds were bandaged (p. 424). This also heals 1 HP. An unsuspecting or unwilling subject resists with HT. A willing target can (and usually will) waive his resistance.

Statistics: Telekinesis 1 (One Task, Bandaging wounds, -60%; Reduced Time 10, +200%; Requires IQ vs. HT roll, -10%; Sorcery, -15%) [11] + Accessory (TK Bandages) [1]. *Note:* Here, Reduced Time is used to shorten a 10-minute bandaging procedure to one second, which was chosen because it costs the same as an Average technique to buy off the -10 for “instant use.”

Stop Healing

Keywords: Resisted (HT).

Full Cost: 48 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 week.

The subject's body stops healing naturally. The subject can never heal naturally and cannot steal HP from others, but can still be healed with magic healing spells. This spell cannot be removed with Dispel Magic, but Remove Curse or a similar effect dispels it.

Statistics: Affliction 1 (HT; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Unhealing (Total), +30%; Extended Duration, 3,000x, +140%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [48].

Stop Impulse

Keywords: Resisted (HT).

Full Cost: 70 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous (heart attack) and 3 minutes (paralysis).

This spell stops impulses traveling from the brain to the rest of the subject's body. This spell makes the subject, who must have a brain, suffer a heart attack (p. B429) and be paralyzed for 3 minutes. After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover. Subjects with a brain, but no heart, do not suffer a heart attack, but are still paralyzed.

Statistics: Affliction 1 (HT; Accessibility, Only on beings with a brain, -10%; Heart Attack, +300%; Malediction 2, +150%; No Signature, +20%; Paralysis, +150%; Sorcery, -15%) [70].

Stop Paralysis

Keywords: None.

Full Cost: 74 points.

Casting Roll: IQ. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You can neutralize ongoing paralysis caused by spells, powers, Afflictions, Affliction-like effects of the Side Effect and Symptoms enhancements. This requires a successful IQ roll and costs 1 FP. Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only to stop paralysis, -60%; Affects Self, +50%; Affliction Only, -40%; Capped, 6 FP, -15%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 5, +100%; Xenohealing, Anything Alive, +80%) [74].

Stop Power

Keywords: Area (Special).

Full Cost: 230 points for level 1 + 13 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: 30 seconds.

Stops the flow of power in the area, causing all powered devices to cease to function. This may or may not cause permanent damage to the devices, depending on their design. Barring this, any affected device works normally when it leaves the area.

This spell stops the flow of power in an area with a radius equal to (9 + spell level) yards.

Statistics: Control Power 10 (Accessibility, Only to stop the flow of power, -60%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [230]. Additional levels add Control Power (Accessibility, Only to stop the flow of power, -60%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 3x, +20%; Only to increase area, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [13/level].

Stop Spasm

Keywords: None.

Full Cost: 45 points.

Casting Roll: IQ. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You can neutralize ongoing seizures caused by spells, powers, Afflictions, Affliction-like effects of the Side Effect and Symptoms enhancements. This requires a successful IQ roll and costs 1 FP. Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only to stop seizures, -60%; Affliction Only, -40%; Capped, 4 FP, -20%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 3, +60%; Xenohealing, Anything Alive, +80%) [45].

Storm

Keywords: Area (Special).

Full Cost: 91 points for level 1 + 81 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can make create or dispel a storm within the 0.1-mile-radius area around you, if there are clouds available in the area. Depending on ambient temperature and humidity, it may be a simple windstorm or include rain, snow or hail – the odd lightning bolt, too. This is particularly effective at sea. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by storm, relative to the prevailing conditions. This can hinder concentration, Boating, Survival, and anything the GM allows.

Statistics: Control Storm 1 (Natural Phenomenon, +100%; Sorcery, -15%) [37] + Control Storm +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [54]. Additional levels add Control Storm +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [81/level]. *Note:* As this is one advantage (Control Storm) with the Sorcery limitation, not two, it costs only 1 FP to use.

Storm Shelter

Keywords: None or Buff.

Full Cost: 2 or 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 30 minutes.

The subject is affected by bad weather as though it were a step less severe on the table on *GURPS Magic*, p. 194. Most often means -1 less to rolls to avoid falling overboard, see things through torrential rain, etc.

The basic (2-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. However, unlike most other maintainable spells, maintaining this one costs 1 FP per 30 minutes, not 1 FP per minute. The improved (17-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Eye of the Storm (Extended Duration, 30x, +60%; Sorcery, -15%) [2]. The improved version is Affliction 1 (HT; Advantage, Storm Shelter, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Storm Shelter" is Eye of the Storm (Magical, -10%) [1].

Strengthen Will

Keywords: Buff.

Full Cost: 16 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You increase the target's Will by 1 per level of this spell for 3 minutes. This spell only affects sapient (IQ 6+) creatures.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Strengthen Will, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [16]. Additional levels add further Strengthen Will to the Advantage enhancement (+50%) [+5]. *Note:* Each level of "Strengthen Will" is Will 1 (Magical, -10%) [5].

Strike Anosmic

Keywords: Resisted (HT).

Full Cost: 24 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 9 seconds.

The subject is temporarily loses his sense of smell and taste.

Statistics: Affliction 1 (HT; Disadvantage, No Sense of Taste/Smell, +5%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [24].

Strike Barren

Keywords: Resisted (HT).

Full Cost: 51 points.

Casting Roll: Will.

Range: Unlimited.
Duration: Permanent.

You render the subject infertile, if the subject was capable of producing offspring. Used on a plant, this spell prevents it from ever bearing pollen, fruit, or seed. This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Restoration (*GURPS Magic*, p. 93).

Statistics: Affliction 1 (HT; Advantage, Strike Barren, +50%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [51]. *Note:* "Strike Barren" is Fertility Control (Variant; Magical, -10%; Reduced Time 17, +340%) [5].

Strike Blind

Keywords: Resisted (HT).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 9 seconds.

The subject is temporarily blinded. See *Blindness*, p. B124, for a full description of the effects; the most important is that he is at -10 to attack anyone physically, and cannot see to target spells.

Statistics: Affliction 1 (HT; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [28].

Strike Deaf

Keywords: Resisted (HT).
Full Cost: 25 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 9 seconds.

The subject is temporarily deafened.

Statistics: Affliction 1 (HT; Disadvantage, Deafness, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [25].

Strike Dumb

Keywords: Resisted (HT).
Full Cost: 25 points or 26 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 9 seconds.

The subject temporarily loses its ability to speak. The basic (25-point) version of this spell makes the subject lose its ability to speak intelligently (the subject can still bark, growl, trill, etc.) The improved (26-point) version of this spell makes the subject completely mute and unable to make vocal sounds.

Statistics: Affliction 1 (HT; Disadvantage, Cannot Speak, +15%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/20, -25%; Sorcery, -15%) [25]. The improved version improves Cannot Speak to Mute [+1].

Strike Numb

Keywords: Buff.
Full Cost: 33 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.

Duration: 9 seconds.

The subject temporarily loses its sense of touch as per the Numb disadvantage (p. B146). This also includes immunity to pain (the subject does not suffer shock penalties when injured; can withstand lesser physical discomfort without distraction; does not suffer pain penalties to DX, IQ, skills, and self-control; becomes immune to agony, knockdown, physical stunning, and torture).

If you wish, you can choose to affect only specific body parts instead of the whole subject. For example, you could affect only his left arm, or anything except his head.

Statistics: Affliction 1 (HT; Advantage, Numbness, +210%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Reduced Duration, 1/20, -25%; Selective Effect, +20%; Sorcery, -15%) [33]. *Note:* "Numbness" is Immunity to Pain (Magical, -10%; Temporary Disadvantage, Numb, -20%) [21].

Stroke of Lightning

Keywords: Missile, Obvious.

Full Cost: 10 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 50 yards.

Duration: Instantaneous.

You fire a stream of electricity that does 1d burning surge damage per level. The spell strikes all targets in a 50-yard line. On a hit, the line is on target; otherwise, use the Scatter rule (see p. B414) to determine a new target point. Once you know the target point, imagine (or trace on a battle map) a line between the attacker and that point. Targets struck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover. Lightning behaves unpredictably around conductors; see *Lightning (GURPS Magic, p. 196)* for more details. This attack has the 1/2D range of 5 yards.

Statistics: Burning Attack 1d (Cone 1, +60%; Nuisance Effect, Behaves erratically around conductors, -5%; Reduced Range, 1/2x, -10%; Sorcery, -15%; Surge, +20%; Side Effect, Stunning, +50%) [10/level].

Strong Arm

Keywords: Buff.

Full Cost: 15 points for level 1 + 2.7 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

You make one of the subject's arms more strong compared to the rest of their body. This increases the ST of one arm chosen at the time of casting by the caster by 1 per level of this spell. Note that this does not affect overall Basic Lift. If a task requires multiple arms with varied ST levels, use the average value. A subject cannot benefit from two different instances of Strong Arm at the same time, the last casting overrides all previous ones.

Statistics: Affliction 1 (HT; Advantage, Strong Arm 1, +30%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Additional levels add further Strong Arm to the Advantage enhancement [+2.7]. *Note:* Each level of "Strong Arm" is Arm ST 1 (One Arm; Magical, -10%) [2.7].

Stun

Keywords: Resisted (HT).

Full Cost: 26 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

The subject is physically stunned (p. B420) and must roll vs. HT each second to recover.
Statistics: Affliction 1 (HT; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [26].

Stygian Cold

Keywords: Resisted (HT).
Full Cost: 71 points.
Casting Roll: Will.
Range: Unlimited.
Duration: 1 minute.

If the victim fails to resist, he takes 1d fatigue damage and 1d toxic damage, as heat is being drained from the tissues of his body. Treat FP lost to the spell identically to FP lost to cold (B430). In addition, the victim suffers a -3 penalty to DX for 1 minute.

Statistics: Affliction 1 (HT; Attribute Penalty, DX-3, +30%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%) [29] + Fatigue Attack 1d (HT; Based on HT, +20%; Freezing, +20%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [31] + Toxic Attack 1d (HT; Accessibility, Only on living creatures of flesh, -20%; Based on HT, +20%; Link, +10%; Magical, -10%; Malediction 2, +150%; No Signature, +20%) [11].

Stygian Ice Dagger

Keywords: Missile, Obvious.
Full Cost: 11 points/level.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You throw a barbed, razor-sharp piece of stygian ice at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 1d-1 impaling per level of this spell. The missile can be blocked. The dagger does not melt until extracted; extracting it requires a Ready maneuver and inflicts half as much damage as it inflicted going in. Until it is removed it causes 1 point of injury per second. The GM must determine what the maximum level available in the campaign is.

Statistics: Impaling Attack 1d-1 (Blockable, -5%; Cosmic, Lingering Effect, +100%; Sorcery, -15%) [11/level].

Stygian Ice Sphere

Keywords: Missile, Obvious.
Full Cost: 6 points/level.
Casting Roll: None. Use Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

You throw a ball of stygian ice at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does crushing damage with dice equal to your level of this spell. On hit, the sphere explodes into razor-sharp shards that inflict 2d cutting damage and can hit anyone within 10 yards of the impact point, as per *Fragmentation* (p. B104). The missile can be blocked. The GM must determine what the maximum level available in the campaign is.

Stygian Ice Sphere can also extinguish fire in a 1-yard radius, if accurately aimed.

Statistics: Crushing Attack (Blockable, -5%; Can Extinguish Fire, +10%; Fragmentation [2d], Cutting, +30%; Sorcery, -15%) [6/level].

Stygian Touch

Keywords: Obvious.
Full Cost: 39 points.
Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent, until destroyed, or until the victim breaks free.

You freeze the victim in stygian ice. Roll DX or an unarmed combat skill to touch your subject. On a hit, your victim is pinned (see B370) and rooted in place. He cannot move his limbs or speak; his only options are to use purely mental abilities, to attack the ice bonds with an Innate Attack, or to try to break free using ST (not Escape skill). The ST of this effect is equal 15, but you can layer additional attacks on a successfully bound victim. Each extra layer gives +1 to ST.

To break free, the victim must win a Quick Contest of ST against the ST of this spell. Each attempt takes one second. If he tries to break free and fails, he loses 1 FP and is only allowed a repeated attempt every 10 seconds. Treat FP lost to failed attempts to break free as freezing (see *Cold*, p. B430), but the victim does not become helplessly entangled on 17-18. Alternatively, he may try to destroy the ice bonds with an Innate Attack (they hit automatically). External attacks on the ice bonds take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, B392).

The ice bonds have DR 10. Each point of damage reduces ST by one. At ST 0, the ice bonds are destroyed and the victim is freed. Stygian Ice does not melt naturally. Only Essential Fire or hellfire can melt Stygian Ice.

Statistics: Binding 15 (Engulfing, +60%; Increased DR, +20%; Melee Attack, Reach C, Cannot Parry, -35%; Sorcery, -15%) [39].

Suggestion

Keywords: Resisted (Will).

Full Cost: 73 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 9 minutes.

You can send silent telepathic commands to a sapient subject. If the subject fails to resist, you can give him a simple command; see the Suggest skill (p. B191) for guidelines. Any order that goes against the subject's values or sense of self-preservation triggers another resistance roll, possibly at a bonus. The suggestion only lasts as long as the spell lasts.

The subject remembers everything he did, but he is convinced that he chose to do so. He will react to behavior too bizarre to be rationalized by pushing it out of his mind and not thinking about it. Hypnotism, Psychology, and Telepathy can be used to eventually bring out the truth.

If you tie or lose, the subject can sense coercion coming from you. In addition, you cannot try to affect him again within 24 hours.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Independent, +70%; Rationalization, +20%; Sorcery, -15%; Suggestion, -40%) [73].

Suggestion Song

Keywords: Area (Leveled), Baneful Song, Resistible (Will).

Full Cost: 65 points for level 1 + 25 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: Indefinite, see text.

The bard must play an instrument or sing for at least a second, and the subjects must be able to hear the song to be affected. The bard can exclude anyone from this effect. Roll a Quick Contest of Will vs. Will plus any Magic Resistance the subject has. This is a mind control effect, so anyone with Immunity to Mind Control is immune to the effects of this song. This song can only affect sapient beings. The song's effects last for margin of victory seconds. The bard can play constantly, causing a roll every turn, or cease after a second and hope that the residual effects will suffice. The bard pays 1 FP when they start playing or singing and 1 FP per minute of continuous playing.

The bard can give a simple command to all subjects that failed to resist; see the Suggest skill (p. B191) for guidelines. Any order that goes against a subject's values or sense of self-preservation triggers another resistance roll, possibly at a bonus. The suggestion only lasts as long as the spell lasts. The bard can only give the same command to the whole group. The subjects remember everything they did, but they are convinced that they chose to do so. They will react to behavior too bizarre to be rationalized by pushing it out of their mind and not thinking about it. Hypnotism, Psychology, and Telepathy can be used to eventually bring out the truth.

If the bard ties or loses, the subjects can sense coercion coming from them. In addition, the bard cannot try to affect them again within 24 hours.

The song reaches a two-yard radius around the bard. Each additional level doubles that radius, cumulatively.

Statistics: Mind Control (Accessibility, Only on sapient creatures, -10%; Area Effect, 2 yards, +50%; Bard-Song, -30%; Based on Will, Own Roll, +20%; Costs Fatigue, 1 FP, -5%; Emanation, -20%; Independent, +70%; Rationalization, +20%; Reduced Duration, 1/60, -35%; Selective Area, +20%; Short-Range 1, -10%; Suggestion, -40%) [65]. Additional levels add Area Effect (+50%) [+25].

Suicide

Keywords: None.

Full Cost: 2 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

The caster instantly kills the caster.

Statistics: Affliction 1 (HT; Accessibility, Self Only, -50%; Backlash, Disadvantage, Fragile (Enhanced Unnatural) and Heart Attack, -400%; Sorcery, -15%) [2]. *Notes:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies.

Summon Demon

Keywords: None.

Full Cost: 21 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned being's Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

Each time you cast this, you summon a demon (worth 75% or less of your point value) of a particular type: babau, balor, marilith, etc. (chosen when you pick this spell). The GM will create this being. Alternatively, if you know a specific being you want to call, you can summon it (although if you do not have its True Name or some equally significant identifier, you are at -5 on the casting roll). A penalty applies based on the planar "distance": There is no distance penalty for creatures that are currently on the same plane of existence. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. The Prime Material Plane is considered adjacent to the Astral Plane, and the Astral Plane is adjacent to the Abyss, where the demons come from. Thus, preparations that mitigate the penalty usually are required.

The summoning itself requires 10 minutes of preparation and ritual. At the end of the casting, you must pay 1 FP and make a Quick Contest of Will against the demon to force it to appear. If you are victorious, the demon arrives. It then makes a reaction roll. On Poor or worse, treat it as an Unwilling Ally – it will obey you, but try to subvert your commands or otherwise act against your interests. If the reaction is Neutral or better, it will serve you reasonably faithfully.

You can also summon demons to answer questions. Treat this as a Contact Group with an appropriate knowledge category, an effective skill of 18, and a reliability that depends on the reaction roll: Unreliable for Poor or less, Somewhat Reliable on a Neutral reaction, Usually Reliable for Good, and

Completely Reliable for Very Good or Excellent reactions. Unlike most sorcery with a duration, this spell must be maintained; thus, unless you can cast simultaneous spells, using another spell will immediately dismiss the summoned being. However, there is no FP cost to maintain this spell, only to cast it. A summoned being is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, you must wait 24 hours before using this spell again; if dismissed, you must wait five minutes.

Two other versions of this spell summon beings of different potency. Summon Lesser Demon has a full cost of 8 points, calls forth a demon worth up to 25% of your point value, and has a casting time of one minute. Summon Greater Demon has a full cost of 58 points, calls a demon worth up to 150% of your point value, and requires one hour to cast. Treat creatures summoned with the Lesser version as having an effective skill of 12, while Summon Greater Demon provides effective skill 21.

Statistics: Ally (A specific demon type; Built on 75%; Constantly; Conjured, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%) [21]. Summon Lesser Demon has Ally, built on 25%, and Immediate Preparation Required decreased to 1 minute, -30%. Summon Greater Demon is built on 150%, and increases Immediate Preparation Required to 1 hour, -75%. Notes: The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional “range” penalties.

Summon Divine Ghost

Keywords: Information, Resisted (Will).

Full Cost: 13 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By touching a corpse of a god, you can force its spirit to answer any one specific question that he can answer with a brief sentence. To cast the spell, you must first touch your subject, concentrate for one second, and make a Quick Contest of your IQ against the god’s Will. The god resists at -5 if the caster was a worshipper of the god. Your IQ (plus Talent) roll takes the following penalties: -5 if you don’t know the god’s full name. -1 if it has been more than a week since the subject’s death, -2 if more than a month, -3 if more than a year, -4 if more than 10 years, -5 if more than 50 years, and -6 if more than 500 years; and you only get *one* try per year. If you win, you contact the spirit and force it to give you the answer. The answer is what the subject believes to be true – if he doesn’t know, he’ll tell you.

Statistics: Mind Probe (Accessibility, Only on god corpses, -80%; Cosmic, Works on the dead, +50%; Sorcery, -15%) [13].

Summon Dryad

Keywords: None.

Full Cost: 16 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned being’s Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

This allows the caster to call a dryad within half a mile – if one exists. In general, the GM should assume that a dryad is available if the location is appropriate, unless the scenario or situation requires that dryads are opportunely absent. Use the trait list from *GURPS Fantasy* (p. 213). If it is killed, the summoner must wait a full day to call replacements. Dismissing the dryad is a free action, but the caster may only dismiss her if she is physically present. The caster can only cast this spell if his character’s point total is at least 2 times bigger than the dryad’s.

The summoning itself requires a ritual that takes 10 minutes. At the end of the ritual, the caster pays 1 FP and makes a Quick Contest of Will against the dryad to force it to appear. If the caster is victorious, the dryad arrives. It then makes a reaction roll. On Poor or worse, treat it as an Unwilling Ally

– it will obey the caster, but try to subvert their commands or otherwise act against their interests. If the reaction is Neutral or better, it will serve the caster reasonably faithfully.

The summoned dryad is not under the caster's control. Note that a dismissal does not guarantee the dryad will leave. If it is hostile, or simply curious, she may choose to stay!

Statistics: Ally (Dryad; Built on 50%; Constantly, no roll required; Adjustable, Dryads, +25%; Conjured, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%) [16]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast.

Summon Elemental

Keywords: None.

Full Cost: 33 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned being's Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

Each time you cast this, you summon an elemental (worth 75% or less of your point value) of a particular type: air, earth, fire, water, magma, ether, etc. (chosen when you pick this spell). The GM will create this being, but the caster can request one that meets broad criteria. If the caster knows a specific elemental they want to call, they can summon it (although without its True Name or some equally significant identifier, the casting roll is at -5). A penalty applies based on the extradimensional "distance": There is no distance penalty for creatures that are currently on the same plane of existence. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. Specifics of the dimensional structure depend on the setting.

The summoning itself requires a ritual that takes 10 minutes. At the end of the ritual, the caster pays 1 FP and makes a Quick Contest of Will against the elemental to force it to appear. If the caster is victorious, the elemental arrives. It then makes a reaction roll. On Poor or worse, treat it as an Unwilling Ally – it will obey the caster, but try to subvert their commands or otherwise act against their interests. If the reaction is Neutral or better, it will serve the caster reasonably faithfully.

The caster can also summon an elemental to answer questions. Typically, such beings can only answer questions about planar lore, thaumatology, and other elementals. Treat this as a Contact Group with an appropriate knowledge category, an effective skill of 18, and a reliability that depends on the reaction roll: Unreliable for Poor or less, Somewhat Reliable on a Neutral reaction, Usually Reliable for Good, and Completely Reliable for Very Good or Excellent reactions.

Unlike most sorcery with a duration, this spell must be maintained; thus, unless the caster can cast simultaneous spells, using another spell will immediately dismiss the summoned elemental. However, there is no FP cost to maintain this spell, only to cast it. A summoned elemental is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, the caster must wait 24 hours before using this spell again; if dismissed, the caster must wait five minutes.

See *GURPS Magic*, p. 28 or *GURPS Dungeon Fantasy 9: Summoners*, p. 27 for statistics of air elementals.

See *GURPS Magic*, p. 55 or *GURPS Dungeon Fantasy 9: Summoners*, p. 27 for statistics of earth elementals.

See *GURPS Magic*, p. 55 or *GURPS Dungeon Fantasy 9: Summoners*, p. 30 for statistics of ether elementals.

See *GURPS Magic*, p. 76 or *GURPS Dungeon Fantasy 9: Summoners*, p. 28 for statistics of fire elementals.

See *GURPS Magic*, p. 55 or *GURPS Dungeon Fantasy 9: Summoners*, p. 29 or *Pyramid #3-91*, p. 28 for statistics of metal elementals.

See *GURPS Magic*, p. 191 or *GURPS Dungeon Fantasy 9: Summoners*, p. 30 for statistics of water elementals.

See *Pyramid #3-114*, p. 18 for statistics of glass elementals.

See *GURPS Locations: Metro of Madness*, p. 26 for statistics of plastic elementals.

Statistics: Ally (A type of elemental; Built on 75%; Constantly; Adjustable, a relatively narrow group with similar capabilities, provides information, +100%; Conjured, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%) [33]. **Notes:** The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional “range” penalties.

Summon Lava Lizard

Keywords: None.

Full Cost: 21 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned being’s Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

Each time you cast this, you summon a lava lizard (worth 75% or less of your point value). A penalty applies based on the planar “distance”: There is no distance penalty for creatures that are currently on the same plane of existence. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. The Prime Material Plane is considered adjacent to the Ethereal Plane, and the Ethereal Plane is adjacent to the Inner Planes, where the lava lizards come from. Thus, preparations that mitigate the penalty usually are required.

The summoning itself requires 10 minutes of preparation and ritual. At the end of the casting, you must pay 1 FP and make a Quick Contest of Will against the lava lizard to force it to appear. If you are victorious, the lava lizard arrives. It then makes a reaction roll. On Poor or worse, treat it as an Unwilling Ally – it will obey you, but try to subvert your commands or otherwise act against your interests. If the reaction is Neutral or better, it will serve you reasonably faithfully.

Unlike most sorcery with a duration, this spell must be maintained; thus, unless you can cast simultaneous spells, using another spell will immediately dismiss the summoned being. However, there is no FP cost to maintain this spell, only to cast it. A summoned being is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, you must wait 24 hours before using this spell again; if dismissed, you must wait five minutes.

See *GURPS Dungeon Fantasy Monsters 3: Born of Myth & Magic*, p. 12 for statistics of lava lizards.

Statistics: Ally (Lava Lizard; Built on 75%; Constantly; Conjured, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%) [21]. **Notes:** The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional “range” penalties.

Summon Minor Demons

Keywords: None.

Full Cost: 54 points.

Casting Roll: Will, rolled as a Quick Contest against the summoned beings’ Will. Special casting time, see below.

Range: Special, see below.

Duration: Hours equal to margin of victory on Quick Contest of Will.

Each time you cast this, you summon 2d identical demons (worth 25% or less of your point value each). The GM will create these beings. A penalty applies based on the planar “distance”: There is no distance penalty for creatures that are currently on the same plane of existence. Adjacent dimensions impose -5, increasing by -5 for every intervening dimension. The Prime Material Plane is considered adjacent to the Astral Plane, and the Astral Plane is adjacent to the Abyss, where the demons come from. Thus, preparations that mitigate the penalty usually are required.

The summoning itself requires 10 minutes of preparation and ritual. At the end of the casting, you must pay 1 FP and make a Quick Contest of Will against the demons to force them to appear. If you are victorious, the demons arrive. They then make a collective reaction roll. On Poor or worse, treat them as an Unwilling Allies – they will obey you, but try to subvert your commands or otherwise act against your interests. If the reaction is Neutral or better, they will serve you reasonably faithfully.

Unlike most sorcery with a duration, this spell must be maintained; thus, unless you can cast simultaneous spells, using another spell will immediately dismiss the summoned beings. However, there is no FP cost to maintain this spell, only to cast it. A summoned being is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, you must wait 24 hours before using this spell again; if dismissed, you must wait five minutes.

Statistics: Ally (A specific demon type; Built on 25%; Constantly; Group Size 7; Adjustable, +50%; Conjured, +100%; Immediate Preparation Required, 10 minutes, -45%; Requires Quick Contest of Will vs. Will, -15%; Magical, -10%; Maximum Duration, hours equal to margin of victory, -5%; Special Abilities, +50%) [54]. *Notes:* The Maximum Duration limitation is priced based on Maximum Duration, 12 hours. As a special effect, this spell breaks sorcery rules by allowing free maintenance, but this is offset by imposing a FP cost to cast and dimensional “range” penalties.

Summon Monster

Keywords: None.

Full Cost: 41 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

Each time you cast this, you coagulate planar energies to create a creature that resembles an outsider (worth 75% or less of your point value) from a particular plane of existence (chosen when you pick this spell). The GM will create this being, but you can request one that meets broad criteria. You cannot create a specific being using this spell. The creature obeys your orders regardless of how you treat it. Note that the creature should be able to understand you, so most casters learn a language used by the outsiders from the chosen plane. The summoned being does not possess any knowledge, so this spell cannot be used to gain information.

A summoned being is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, you must wait 24 hours before using this spell again; if dismissed, you must wait five minutes.

Two other versions of this spell summon beings of different potency. Lesser Summon Monster has a full cost of 14 points, calls forth an outsider worth up to 25% of your point value. Greater Summon Monster has a full cost of 67 points, calls an outsider worth up to 100% of your point value.

Statistics: Ally (A type of outsiders; Built on 75%; Constantly; Adjustable, +50%; Conjured, +100%; Minion, +50%; Sorcery, -15%; Special Abilities, +50%) [41]. Lesser Summon Monster has Ally, built on 25%. Greater Summon Monster is built on 100%.

Summon Shade

Keywords: Information.

Full Cost: 74 or 124 points.

Casting Roll: IQ. Special casting time (see below).

Range: Unlimited.

Duration: Instantaneous.

The caster summons a “shade” of the subject from a possible future, to answer the caster’s questions. The caster may ask a general question that affects many people as long as at least one of those people is present. In all cases, the GM may apply penalties if he feels that the topic in question is not something with a fixed answer. If so, he should divulge this penalty to the sorcerer’s player, who may then decide whether it’s worth casting the spell.

The casting roll takes a -1 penalty for each year in the future that the shade is drawn; -5 if the subject is not present or -10 if nothing pertaining to the subject (clothing, hair clippings, etc.) is present. -10 if the subject’s full name is not known, *in addition* to the *Long-Distance Modifiers* (p. 241) to the subject.

The shade will not lie (except on a critical failure) but it will be disoriented; therefore its answers may be unclear and imprecise. The margin of success should determine the clarity of the answer. Since the shade only comes from the most likely future, this spell may be an unsatisfactory augury.

At the time from which the shade is drawn, the subject will have a vivid dream in which he will see his questioner(s) and remember all that is said – if the predicted event came true.

The basic (74-point) version of this spell requires 10 minutes to cast! The improved (124-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Cosmic, Subject needs not to be present, +50%; Directed, +100%; Long-Range 3, +150%; Magical, -10%; Nuisance Effect, Time modifiers, -15%; Nuisance Effect, Name and something pertaining the subject is required, -10%; Once per year per subject, -60%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Visible, -10%) [74]. The improved version adds Reduced Time 10 (+200%) [+50].

Summon Spirit

Keywords: Information.

Full Cost: 23 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

By touching a corpse, you can force its spirit to answer any one specific question that he can answer with a brief sentence. To cast the spell, you must first touch your subject, concentrate for one second, and make an IQ roll. You must also share a language with him.

The subject cannot resist, but your IQ (plus Talent) roll takes the following penalties: -5 if you don’t know the subject’s full name. -1 if it has been more than a week since the subject’s death, -2 if more than a month, -3 if more than a year, -4 if more than 10 years, -5 if more than 50 years, and -6 if more than 500 years; and you only get *one* try. If you win, you contact the spirit and force it to give you the answer. The answer is what the subject believes to be true – if he doesn’t know, he’ll tell you.

Statistics: Mind Probe (Accessibility, Only on corpses, -20%; Cosmic, Works on the dead, +50%; Sorcery, -15%) [23]. *Feature:* Time penalty replaces the normal Quick Contest.

Summon Swarm

Keywords: None.

Full Cost: 47 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

Summons an insect swarm (*GURPS Dungeon Fantasy 5: Allies*, p. 9) that does your mental bidding while it exists. The swarm appears within the arm’s reach.

If the swarm is killed, the summoner must wait a full day to call replacements. Dismissing the swarm is a free action, but it may only be dismissed if it is physically present. This spell can only be cast if the summoner’s point total is equal or higher bigger than the swarm’s.

Statistics: Ally (Insect Swarm; Built on 100%; Constantly, No roll required; Conjured, +100%; Minion, +50%; Sorcery, -15%) [47].

Summon Undead

Keywords: None.

Full Cost: 16 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

Each time you cast this, you use negative energy to create an undead creature (worth 25% or less of your point value). The GM will create this being, but you can request one that meets broad criteria. You cannot create a specific being using this spell. The creature obeys your orders regardless of how you treat it.

A summoned being is vulnerable to being dispelled, banished, or warded off with occult techniques. If it is killed, you must wait 24 hours before using this spell again; if dismissed, you must wait five minutes.

Statistics: Ally (Undead; Built on 25%; Constantly; Adjustable, +100%; Conjured, +100%; Minion, +50%; Sorcery, -15%; Special Abilities, +50%) [16].

Summoner's Merging

Keywords: Resisted (Will).

Full Cost: 58 points.

Casting Roll: IQ.

Range: Touch.

Duration: Indefinite.

The caster's body magically melds with the creature he has summoned beforehand. Equipment up to his Basic Lift meld with him, but the rest of his equipment falls to the ground.

Once melded, the caster can use his senses from the host creature, and can breathe if any part of it is touching air. If the creature takes damage, it affects the caster proportionally; e.g., 4 HP of injury to a 40 HP demon results in a 1 HP wound for a 10 HP man.

The summoned creature resists at +5 if it is in combat with the caster or otherwise wary of him. Typically, the creature is willing, so it waives its resistance roll.

If the caster loses or ties, he is mentally stunned for 1d seconds. In addition, he may never attempt to possess that subject again – he is “immune” to him. If the caster wins, he takes over his victim's body, completely suppressing his personality.

When the spell ends, the host regains control of his body (if sentient) after 1d seconds of mental stun, and “comes to” with no memory of the possession.

The caster gains his new host's ST, DX, and HT (and secondary characteristics calculated from these scores), as well as his physical advantages and disadvantages. He keeps his own IQ, Perception, and Will, and all of his mental traits. The caster's social traits may apply, depending on the laws and values of his society. The caster's IQ-, Perception-, and Will-based skills are unchanged. Other skills remain at the same relative skill level.

Statistics: Permeation (Creatures summoned by the caster; Can Carry Objects, No encumbrance, +10%; Link, +10%; Magical, -10%; Meld I, +150%) [13] + Possession (Link, +10%; No Memory Access, -10%; Sorcery, -15%; Specific, Creatures summoned by the caster, -40%) [45].

Summoner's Transposition

Keywords: Resisted (Will).

Full Cost: 301 points.

Casting Roll: Will. IQ to teleport. Special casting cost.

Range: Unlimited.

Duration: Instantaneous.

When this spell is cast, the caster instantly switches places with a creature summoned by him. He must be able to see this creature. The creature is the target of this spell and it may resist (but usually it does not). In the target fails to resist or chooses to waive its resistance roll, the caster may try an immediate IQ roll to teleport as if using the Warp advantage (p. B97). The caster can send himself and his gear up to his Extra-Heavy encumbrance and can cancel range modifiers by spending his own FP. The summoned creature appears in the original position of the caster.

Statistics: Affliction 1 (Will; Accessibility, Only on creatures summoned by the caster, -80%; Advantage, Summoner's Transposition, +1,400%; Based on Will, +20%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [161] + Warp (Accessibility, Only to summoned creatures, -40%; Extra Carrying Capacity, Extra-Heavy, +50%; Link, +10%; Magical, -10%; Reliable 10, +50%; Vision-Based, -20%) [140]. *Notes:* "Summoner's Transposition" is Warp (Anchored, The caster, -60%; Extra Carrying Capacity, Extra-Heavy, +50%; Reliable 10, +50%) [140]. The +10 for Reliable cancels the -10 for no preparation.

Sunburn

Keywords: Resisted (HT).

Full Cost: 39 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 2 days.

You cause the victim to experience sunburn regardless of the victim's skin color. In game effects, this is equivalent to moderate pain (p. B428), but deals no damage. The spell's effect can be cured with normal sunburn remedies. Creatures with fur, scales, or feathers, are immune to this spell.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Extended Duration, 1,000x, +120%; Malediction 2, +150%; Moderate Pain, +20%; No Signature, +20%; Sorcery, -15%) [39].

Sunburst

Keywords: Missile, Obvious.

Full Cost: 12 points for level 1 + 7 points/additional level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 100 yards.

Duration: Instantaneous.

A bolt of semi-solid sunlight springs from your hand and speeds to its target. It does 1d-1 impaling damage and gets stuck in the target. The target can dodge or block the missile. After a 3-second delay, during which the bolt starts shining brighter and brighter, the missile explodes, dealing 1d burning damage per level of this spell. The target takes damage normally; anything nearby receives "collateral damage" equal to basic damage divided (3 x the distance in yards from the blast)

Statistics: Impaling Attack 1d-1 (Blockable, -5%; Sorcery, -15%) [5] + Burning Attack 1d (Delay, 3 seconds, +0%; Explosion 1, +50%; Magical, -10%; Follow-Up, +0%) [7/level].

Sunburst (2)

Keywords: Area (Leveled), Resisted (HT).

Full Cost: 57 points for level 1 + 20 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to aim.

Range: 100 yards.

Duration: 5 seconds.

You throw a ball of sunlight that expands to cover an area. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area. Each creature in the area resists with its HT, and is blinded for 5 seconds on a failed resistance roll. Creatures with Protected Vision resist at +5. This attack has 1/2D of 50 yards.

Creatures with a Weakness to bright light or sunlight, or that suffer extra harm from light-based attacks (e.g., due to Vulnerability), take 6d burning damage on top of the flash effect. This is large-area injury (p. B400). Wounding multipliers from Vulnerability or equivalent flaws increase any injury caused.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, x5, +10%; Link, +10%; Reduced Duration, 1/30, -30%; Sorcery, -15%; Vision-Based, +150%) [33] + Burning Attack 6d (Accessibility, Only on creatures with Vulnerability to sunlight, -80%; Area Effect, 2 yards, +50%; Increased 1/2D, x5, +10%; Link, +10%; Magical, -10%) [24]. Additional levels add Area Effect (+50%) to both advantages [+20].

Sundering Weapon

Keywords: Weapon Buff.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 2d of follow-up (p. B105) crushing damage when attacking objects (unattended, wielded, or worn).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Sundering Weapon, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Note:* “Sundering Weapon” is Crushing Attack 2d (Accessibility, Only against objects, -40%; Follow-Up, This weapon, +0%; Magical, -10%) [8].

Sunlight

Keywords: None.

Full Cost: 16 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: One minute.

You can summon a pillar of light equivalent to full daylight; you may make this light manifest anywhere within 100 yards. The area extends skyward, stopping only when it hits some sort of ceiling. The light is bright enough to eliminate all darkness penalties in a 10-yard radius. By concentrating, you can move this “zone of light” at up to (spell level) yards per second.

Statistics: Create Visible Light 1 (Accessibility, Limited to lighting a 10-yard radius for one minute, -40%; Cosmic, Extends skyward, +50%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 1, +20%) [16]. Additional levels add Mobile (+40%) [+4].

Sun’s Arc

Keywords: Obvious.

Full Cost: 16 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous.

You shoot a beam of searing light from one hand. The spell spreads to affect everyone in a cone-shaped area. The cone’s length is 10 yards. Maximum cone width is 5 yards. This spell has no 1/2D range.

Use the rules under *Cone Attacks* (p. B413) to position the swarm, rolling vs. Innate Attack (Beam) to strike the target point. This doesn’t guarantee hitting everyone and everything, though. Going from left to right or right to left (caster’s choice), roll vs. Innate Attack (Beam) to hit each target in the affected wedge. Anybody completely screened from the caster is behind cover. When in doubt, ask whether there would be penalty to hit with a ranged attack; see *Firing Through an Occupied Hex* (p. B389). If not, the target is valid.

Otherwise, treat these attack rolls as melee attacks, as if attacking with an unusually long Flame Jet or a Light Jet. Valid hit locations are fuzzier than usual: “high” (face, at -5), “middle” (torso, at no penalty), or “low” (legs, at -2). Targets may dodge or block normally.

The beam is too narrow to inflict large-area injury, but sufficiently broad that if it hits the face, beings with eyes must roll vs. HT if they suffer any injury. Failure means being blinded; treat this as a crippling injury for recovery purposes (p. B420). If the ray plays across the legs, roll damage separately for each leg – but maximum injury to a leg is a crippling wound, and the beam cannot cause dismemberment.

The beam deals 1d tight-beam burning damage per level of this spell.

Statistics: Burning Attack 1d (Cone 5, +100%; Cosmic, Roll separately for each leg, +150%; Based on Innate Attack (Beam), +20%; Blockable, -5%; Bombardment, Skill-14, -5%; Increased 1/2D, x10, +15%; Jet, Variant, +0%; Nuisance Effect, Dodgeable, -5%; Nuisance Effect, Vague Hit Locations, -5%; Reduced Range, 1/10, -30%; Sorcery, -15%) [16/level].

Suppress Soulmeld

Keywords: Resisted (HT).

Full Cost: 80 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell instantly unshapes and suppresses a single soulmeld shaped by the subject. The subject adds his Meldshaping Talent or Totemism Talent to his HT when resisting this spell. The unshaped soulmeld cannot be shaped again, while this spell is active, but the other soulmelds are unaffected.

Statistics: Neutralize Incarnum (Accessibility, One soulmeld at a time, -5%; Based on HT, +20%; Fixed Duration, +0%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [80].

Suspend Curse

Keywords: Resisted (Will or spell).

Full Cost: 43 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Nine minutes.

This spell lets the caster suppress one ongoing “curse.” A curse in this case is a spell that cannot be dispelled by Dispel Magic (Flesh to Stone, Lesser Geas, Suspend Time, etc.). It cannot end Truly Permanent effects, such as the magic of enchanted items. The curse seems to vanish, but its effect resumes when Suspend Curse ends. Time spent suspended does not count towards the curse’s duration. If the subject spell is maintained, its caster will automatically know it is being suspended. The sorcerer must state which spell they are attempting to suppress.

Suspend Curse must target the subject of the spell, which can be a person, object, or area. For areas, calculate range to the center of the area. Treat the resistance roll as for Dispel Magic.

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Accessibility, One spell at a time, -5%; Accessibility, Only curses, -50%; Cosmic, Can suspend spells that are immune to Dispel Magic, +50%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Interruption, -50%; Nuisance Effect, Suspends the spell for the duration of Neutralize instead of negating it, -15%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [43].

Suspend Enchantment

Keywords: Resisted (Will or spell).

Full Cost: 90 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 90 minutes.

This spell lets you suppress one ongoing spell. It seems to vanish, but reappears when the Suspend Enchantment spell ends. The sorcerer must state which spell he is attempting to suppress.

Note how much the sorcerer's Will roll (minus range penalties) succeeds by; the subject spell resists with a Quick Contest. Use the spell's level (if a skill) or the caster's Will + Talent (if a power); for the latter, the Talent is usually Sorcery Talent or some type of Magery. If the sorcerer wins, the enchantment is suppressed for 90 minutes.

Statistics: Neutralize (Magic; Accessibility, Must target an enchanted item, -20%; Accessibility, One spell at a time, -5%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [90].

Suspend Item

Keywords: None.

Full Cost: 28 points.

Casting Roll: None.

Range: 10 yards.

Duration: 1 minute.

The target object floats at a set distance within 10 yards of the caster. With a Concentrate maneuver, the caster may move any object at Move 10 within the spell's range. If a suspended object moves beyond the spell's range, it falls down. Any creature can grab a floating object if it is within its arm's reach. Creatures may use Fast-Draw to grab the objects. Once the object is grabbed, the spell ends. If the caster does not wish to let the object be grabbed, he may make an IQ roll (or a Quick Contest of his IQ versus the grabber's Fast-Draw, if the creature is fast-drawing it) to move the object away quickly. Suspended weapons may be thrown with Winged Knife.

This spell has effective ST 10 for the purpose of holding items.

Statistics: Telekinesis 10 (Accessibility, Only on objects, -10%; Fixed Duration, +0%; Independent, +40%; One Task, Suspending, -60%; Sorcery, -15%) [28].

Suspend Magery

Keywords: Resisted (Will).

Full Cost: 40 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 minutes.

This spell temporarily removes 3 levels of Magery of any kind from the victim. The victim does not lose his knowledge of spells. The subject adds their level of Magery to their resistance roll. This cannot be undone via Dispel Magic; countering it requires Remove Curse.

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Magery 3, +35%; No Signature, +20%; Sorcery, -15%) [40]. *Notes:* The victim adding their Magery level to their resistance roll is a special feature. If Sorcery is the only magic system in use, Magery can be replaced by Sorcery Talent for the purpose of this spell. This replaces Negated Advantage, Magery 3, +35% with Negated Advantage, Sorcery Talent 3, +30%, but the total cost does not change. The GM may even allow to replace Magery with Sorcerous Empowerment, but this will increase the value of the Negated Advantage enhancement to +40%, making the spell's full cost equal to 41 points.

Suspend Magic

Keywords: Area (Leveled), Resisted (Will or spell).

Full Cost: 48 points for level 1 + 25 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: One minute.

This spell lets the caster temporarily suppress every ongoing spell within the area. The spells seem to vanish, but their effects resume when Suspend Magic ends. Time spent suspended does not count towards the durations of the spells. If any of the affected spells are maintained, their casters will automatically know they are being suspended. This spell is not selective, it attempts to suspend all spells within the area. Spells that can only be removed by Remove Curse cannot be suspended; use Suspend Curse for those.

Treat the resistance roll as for Dispel Magic.

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Area Effect, 2 yards, +50%; Interruption, -50%; Nuisance Effect, Suspends the spells for the duration of Neutralize instead of negating them, -15%; Ranged, +40%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Variable, Area, +5%) [48]. Additional levels add Area Effect (+50%) [+25].

Suspend Mana

Keywords: Area (Leveled).

Full Cost: 112 points for level 1 + 15 points/additional level.

Casting Roll: None.

Range: Self.

Duration: Eight hours.

This spell temporarily drains mana from the area around the caster, making it difficult or impossible for others to cast spells and use magical abilities. This spell reduces the local mana level in the area by three steps. The area of effect stays stable with respect to the earth, but not to objects. Thus, if the spell is cast in a moving vehicle, the effect will stay at its point of origin, rather than moving with the vehicle.

This effect cannot be dispelled, but can be lifted with Remove Curse.

For details, see *Mana* (p. B235) and *Mana (GURPS Thaumatology: Sorcery, p. 23)*.

Statistics: Mana Damper 3 (Area Effect, 2 yards, +50%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, 3,000x, +140%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [111] + Rules Exemption (Magical abilities can coexist with Mana Damper) [1]. Additional levels add Area Effect (+50%) [+15].

Suspend Psi

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 48 points for level 1 + 25 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: One minute.

This spell lets the caster temporarily suppress every ongoing psionic effect within the area. The effects seem to vanish, but they resume when Suspend Psi ends. Time spent suspended does not count towards the durations of the abilities. If any of the affected abilities are maintained, their users will automatically know they are being suspended. This spell is not selective, it attempts to suspend all psionic effects within the area.

Treat the resistance roll as for Dispel Psi.

Statistics: Neutralize Psi (Accessibility, Must target subject, not user, -10%; Area Effect, 2 yards, +50%; Interruption, -50%; Nuisance Effect, Suspends the abilities for the duration of Neutralize instead of negating them, -15%; Ranged, +40%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Variable, Area, +5%) [48]. Additional levels add Area Effect (+50%) [+25].

Suspend Psionics

Keywords: Resisted (Will).

Full Cost: 44 points.

Casting Roll: Will.
Range: Unlimited.
Duration: 30 minutes.

This spell temporarily removes 3 levels of any one psionic Talent from the victim. The victim does not lose his knowledge of psionic abilities. The subject adds the level of the Talent being suspended to their resistance roll. This cannot be undone via Dispel Magic; countering it requires Remove Curse.

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable Enhancement, +75%) [44]. *Notes:* The victim adding their Talent level to their resistance roll is a special feature. Variable Enhancement provides +15% of enhancements (+150%) but is limited by "Accessibility, Only for Negated Advantage, Psionic Talent" (-50%) for a net +75%.

Suspend Spell

Keywords: Resisted (Will or spell).
Full Cost: 28 points.
Casting Roll: Will.
Range: Unlimited.
Duration: One minute.

This spell lets the caster suppress one ongoing spell. A spell that cannot be dispelled by Dispel Magic cannot be suspended – use Suspend Curse for that. It cannot end Truly Permanent effects, such as the magic of enchanted items. The spell seems to vanish, but its effect resumes when Suspend Spell ends. Time spent suspended does not count towards the spell's duration. If the subject spell is maintained, its caster will automatically know it is being suspended. The sorcerer must state which spell they are attempting to suppress.

Suspend Spell must target the subject of the spell, which can be a person, object, or area. For areas, calculate range to the center of the area. Treat the resistance roll as for Dispel Magic.

Statistics: Neutralize Magic (Accessibility, Must target subject, not caster, -10%; Accessibility, One spell at a time, -5%; Fixed Duration, +0%; Interruption, -50%; Nuisance Effect, Suspends the spell for the duration of Neutralize instead of negating it, -15%; Precise, +20%; Ranged, +40%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [28].

Suspended Animation

Keywords: Buff.
Full Cost: 18 or 32 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.
Range: Self or 100 yards.
Duration: Variable.

The subject enters a state of suspended animation. Anyone unfamiliar with this effect must win a Quick Contest of Diagnosis vs. the subject's HT + 10 + Talent to discover that the subject isn't dead. In this state, the subject does not need to breathe, and can go safely without food and water 1024 times longer. The subject is unaware of its surroundings while in suspended animation, but awakens automatically if injured. The caster may also set a mental "alarm clock" to awaken the subject after a certain amount of time has passed.

The basic (18-point) version of this spell affects only the sorcerer. The improved (32-point) version can affect anyone and works at a distance.

Statistics: The basic version is Metabolism Control 10 (Only to trance, -50%; Sorcery, -15%) [18]. The improved version is Affliction 1 (HT; Advantage, Suspended Animation, +200%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Note:* "Suspended Animation" is Metabolism Control 10 (Only to trance, -50%; Magical, -10%) [20].

Swamp Rot

Keywords: Resisted (HT).
Full Cost: 64 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

Transforms any living subject to organic gunk – similar to the Body of Slime spell, but without stabilizing the results. The subject's remaining possessions are left floating in a puddle of scum, which may ruin some gear. Remove Curse can reverse it if the victim's residue is collected within a minute (doubtful if the subject was standing on anything but hard, dry ground like stone or finished wood). This must be cast before the stuff dies, which won't take long in any environment that isn't rich in rotting organic matter. The GM may require daily Biology or Naturalist rolls from the slime's caretaker.

Statistics: Affliction 1 (HT; Accessibility, Only living beings, -10%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Can be reversed, -10%; Sorcery, -15%) [64]. *Note:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies.

Sweat

Keywords: None.
Full Cost: 1 point.
Casting Roll: None.
Range: Self.
Duration: Instantaneous.

You can moisten the exterior of your body, becoming damp enough to negate ongoing damage due to Cyclic (pp. B103-104) contact effects. You can extinguish *ordinary* flame if you're on fire, flush away acid or poison, and so on. Water cannot be usefully collected (e.g., to drink). Clothing or armor that's easily ruined or rusted by moisture must roll as in *Slime, Sand, and Equipment Failure* (p. B485).

Statistics: Rinse (Magical, -10%) [1].

Sweet Oblivion

Keywords: None.
Full Cost: 1 points.
Casting Roll: IQ.
Range: Self.
Duration: Instantaneous.

The caster forgets a single *fact* permanently. Recall, Remove Curse, or Restore Memory can restore the forgotten fact. This memory can only be restored by the Restore Memory spell. The casting roll is at -1 per additional attempt per hour.

Statistics: Controllable Disadvantage (Total Amnesia; Accessibility, Only one fact at a time, -10%; Selective Effect, +20%; Sorcery, -15%) [1].

Swim

Keywords: Buff.
Full Cost: 30 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 3 minutes.

The subject becomes adapted to movement in the water. He does not suffer skill penalties for working underwater, and he can swim at his full Basic Move. He still requires air. The subject is in full

control of his own movement, and can act and fight without the normal penalties for underwater combat.

Statistics: Affliction 1 (HT; Advantage, Swim, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* "Swim" is Terrain Adaptation (Underwater; Magical, -10%) [9] + Amphibious (Magical, -10%) [9].

Symbol-Casting

Keywords: Information.

Full Cost: 43 or 93 points.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Symbol-Casting is divination by means of symbol tokens. The caster must have a complete set of tokens for his symbolic language, and is at -1 to skill for each stone missing. Mock symbol tokens work perfectly well.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (43-point) version of this spell requires 10 minutes to cast! The improved (93-point) version requires only the usual one or two seconds.

Statistics: Precognition (Active Only, -60%; Directed, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Reduced Fatigue Cost 1, +20%; Reliable 8, +40%; Requires symbol tokens, -10%) [43]. The improved version adds Reduced Time 10 (+200%) [+50].

Sympathetic Tidings

Keywords: Information.

Full Cost: 18 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

This spell can divine whether a given absent subject is troubled (injured, dead or in dire need of help). The casting roll takes the range penalties given under *Long-Distance Modifiers* (p. B241). Either an article of clothing or a favorite object owned by the subject is needed. When the spell is cast, the object will reveal if the subject is in trouble. A dagger will bleed, a shirt will turn dark, etc. This will not reveal the nature of the trouble, only whether there is any.

Statistics: Danger Sense (Active Only, -60%; Cosmic, Affects another subject only, +50%; Long-Range 1, +50%; Nuisance Effect, Something related to the subject is required, -5%; Sorcery, -15%) [18]. *Note:* The Active Only limitation is borrowed from Precognition (*GURPS Powers*, p. 68).

Synapse Overload

Keywords: Resisted (HT).

Full Cost: 41 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You cause the target's mind to unleash a vast overflowing torrent of information throughout the target's body, causing the target's synapses to violently trigger. If the target fails to resist, it takes 1d non-incendiary burning surge damage (ignoring DR) and is physically stunned. On subsequent turns, the target can roll against HT once per second to recover.

Statistics: Affliction 1 (HT; Accessibility, Only on creatures with a nervous system, -10%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [26] + Burning Attack 1d (HT;

Accessibility, Only on creatures with a nervous system, -10%; Based on HT, +20%; Link, +10%; Malediction 2, +150%; No Incendiary Effect, -10%; Magical, -10%; No Signature, +20%; Surge, +20%) [15].

Synaptic Pulse

Keywords: Area (Leveled), Resisted (Will).

Full Cost: 30 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: Instantaneous.

You emit a pulsating mental blast that stuns all sapient creatures in range of your psychic shriek. Roll a Quick Contest between of Will between the sorcerer and his targets, penalized by the range between them. Mind Shield adds to resistance against this spell. If the caster wins, the target suffers mental stun. On subsequent turns, they can recover normally by making an unpenalized IQ roll.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Emanation, -20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable, Area, +5%) [30]. Additional levels add Area Effect (+50%) [+5].

System Switch

Keywords: None.

Full Cost: 20 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

When standing on or by a rail system, you can teleport the rail system of another city. You can carry up to Extra-Heavy Encumbrance when you travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2

4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Fatigue Points: Apply a bonus of +1 per additional 2 FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere and strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

Statistics: Warp (Accessibility, Only to a rail system of another city, -40%; Blind Only, -50%; Extra Carrying Capacity, Extra-Heavy, +50%; Reliable 5, +25%; Requires Concentrate, -15%; Special Portal, Rail, -40%; Sorcery, -15%) [20].

Tack

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.

Duration: Instantaneous.

The caster’s touch can pin a thin, lightweight sheet with DR 0 to a surface with at most DR 1 per inch of thickness (like wallboard). Nether sheet nor surface can be living. The sheet can be removed, but it will not fall off by itself.

Statistics: Accessory (Tack; Sorcery, -15%) [1].

Talons

Keywords: None or Buff.

Full Cost: 7 or 20 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim the improved version.

Range: Self or 100 yards.

Duration: Indefinite or 3 minutes.

The subject grows long claws. Change the damage they inflict with a punch or kick from crushing to cutting or impaling (they choose before they roll to hit).

The basic (7-point) version of this spell benefits only the caster; it has an indefinite duration, which means it must be maintained. The improved (20-point) version can affect anyone, works at a distance, and does not need to be maintained; it has a fixed, lasting duration.

Statistics: The basic version is Talons (Sorcery, -15%) [7]. The improved version is Affliction 1 (HT; Advantage, Talons, +80%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Note:* “Talons” is Talons (Magical, -10%) [8].

Tangle Growth

Keywords: Area (Fixed).

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.
Duration: 10 seconds.

You can direct existing vegetation to entangle and restrain everyone within an eight-yard-radius area. On land this requires nearby tree branches, vines, or tall grass; in the ocean it works if there's dense seaweed. It requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see Scatter (p. B414). The binding has ST 5 and lasts for 10 seconds, continuing to entangle new people who blunder into it. Those already caught grow more tightly entangled, with +1 to the ST of their bonds for each additional second they remain grappled.

Statistics: Binding 5 (Area Effect, 8 yards, +150%; Environmental, Dense vegetation, -40%; Persistent, +40%; Sorcery, -15%; Underwater, +20%) [26].

Telecast

Keywords: None.
Full Cost: 168 points.
Casting Roll: IQ. Special casting time (see below).
Range: Unlimited*.
Duration: Indefinite.

After concentrating for one minute, the sorcerer creates a floating replica of an eye that they can see through. The casting roll takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see the casting point, but can specify direction and distance to it, the casting roll is at -5. On failure by 1, the spell creates the Wizard Eye in another valid location of the GM's choosing.

The sorcerer cannot change the eye's position and facing without recasting the spell. However, while inside a moving object, the Wizard Eye will move with that object with no special concentration on the user's part.

The eye functions as an extension of the sorcerer's body, allowing it to deliver spells that require a touch (although, that is difficult, considering the fact that the eye is immobile) or act as the origination point of ranged spells. For the purpose of range-dependent abilities (e.g., spells cast on or by the sorcerer), use the shortest of the range from their body and from the Wizard Eye.

In combat, the sorcerer specifies whether they're giving priority to natural sight or the Wizard Eye at the start of each turn. All tasks that depend on the deprioritized sight source are at -4, including casting rolls. Voluntarily moving the Wizard Eye automatically gives it priority.

Wizard Eye can be attacked and destroyed. Treat it as an SM-9 object with no DR (regardless of the user's natural DR) and HP equal to the caster's HP/10. Should the eye be destroyed, the sorcerer loses the ability to cast this spell for five minutes.

Statistics: Clairsentience (Aware, +50%; Breakable, DR 0, SM-9, -20%; Clairvoyance, -10%; Cosmic, The eye is considered to be a part of the caster's body for the purpose of range-dependent abilities and spell delivery, +50%; Fixed Range, -5%; Increased Range, 2,000,000x, +190%; No Strain, +25%; Nuisance Effect, Cannot concentrate to move the eye or change facing, -10%; Short-Range 1, -10%; Sorcery, -15%; Visible, -10%) [168]. *Note:* The No Strain enhancement was borrowed from Warp.

* Unlimited range assumes a global range on an Earth-like world. The actual range is 20,000,000 yards or 11,363 miles.

Telekinetic Sphere

Keywords: Resisted (DX or other).
Full Cost: 58 points.
Casting Roll: Will.
Range: Unlimited, 20 yards for the telekinesis.
Duration: 1 minute.

A globe of shimmering force encloses a creature, just like a spherical Force Dome. The sphere contains its subject for the spell's duration. Unlike Force Dome, this barrier allows air to pass, so the

subject may breathe freely. Creatures or objects inside the globe are nearly weightless. Anything contained within a telekinetic sphere weighs only one-tenth of its normal weight.

While this spell is active for the caster, he can telekinetically move the sphere at Move 8 by taking a Concentrate maneuver, as if he had a telekinetic pair of hands with ST 8. He cannot move the sphere further than 20 yards away from him.

The subject may struggle, but the sphere cannot be physically moved either by people outside it or by the struggles of those within. The subject is protected by the sphere – the sphere has DR 6.

Most targets resist by moving fast enough to get out – use the higher of DX or *twice* Basic Speed. Someone capable of an active defense involving teleportation or insubstantiality may choose to rely on that instead; this is a resistance roll using the controlling score, not an active defense roll. Magic Resistance always subtracts from the caster's skill, but it adds only to the subject's DX- or Speed-based resistance.

Statistics: Affliction 1 (DX or other; Based on DX, +20%; Density Decrease, 1/10, +15%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Paralysis, Variant, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [42] + Telekinesis 8 (Increased Range, x2, +10%; One Task, Moving the sphere, -60%; Magical, -10%) [16]. *Note:* The advantages are *not* linked, and the use of Telekinesis does *not* cost FP.

Telepathic Overload

Keywords: Resisted (HT or Will).

Full Cost: 54 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Attempts to directly and fatally overload even the most rudimentary of brains. This spell is effective against any physical IQ 1+ entity! The subject may resist using the better of HT (brain) or Will (mind). If the victim fails to resist, the brain is burned out, its functions suspended and memories deleted. The victim collapses immediately. The body lives on for HT/3 minutes, but the *person* is gone barring an Instant Restoration spell cast within that window of opportunity.

Statistics: Affliction 1 (HT; Accessibility, Only against physical IQ 1+ entities, -5%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Multiple ways to resist, -10%; Sorcery, -15%) [54].

Telepathy

Keywords: None.

Full Cost: 47 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Indefinite.

The caster can hold a two-way conversation with another person. Range is theoretically unlimited, but the IQ roll to cast this spell takes the range penalties given under *Long-Distance Modifiers* (p. B241). If the caster cannot see or otherwise sense his subject, he has an additional penalty: -1 for family, lovers, or close friends; -3 for casual friends and acquaintances; or -5 for someone met only briefly.

If successful, the subject hears the caster's voice and may immediately respond. If he does not wish to speak with the caster, it's a free action for him to mute the caster's voice to a whisper. The caster may maintain a connection with that subject for as long as he'd like. No further rolls are normally required unless the range penalty worsens.

Statistics: Mind Reading (Accessibility, Projected thoughts only, -20%; Link, +10%; Magical, -10%; Telecommunication, -20%) [18] + Telesend (Link, +10%; Sorcery, -15%) [29].

Teleport

Keywords: None.

Full Cost: 90 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

You can teleport to any place you are able to see with your own eyes, or view it remotely, or visualize it clearly (which is only possible if you have visited it previously in person). You can carry up to Medium Encumbrance when you travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you have a “second-hand” view of the destination, you are at -2 per level of removal. For instance, seeing it on TV or through someone else’s eyes would give -2, while seeing it on a television set that you are viewing through someone else’s eyes would give -4. There is an additional -2 to teleport to a place you have visited but cannot see.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere and strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous,

but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any location you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds!

Statistics: Warp (Extra Carrying Capacity, Medium, +20%; Requires Concentrate, -15%; Sorcery, -15%) [90].

Teleport Cage

Keywords: Area (Special).

Full Cost: 45 points for level 1 + 20 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: Permanent.

This spell modifies the functioning of all teleportation spells and spell-like abilities into, out of, and within its area (each casting covers an area of its spell level yards in radius). If cast in an area adjoining or overlapping another teleport cage, the effects of both spells merge to create a single teleport cage. When cast within a teleport cage, such translocation spells simply transport all affected creatures and objects to another random location within the teleport cage.

Statistics: Control Teleportation Magic 1 (Accessibility, Only to redirect, -60%; Extended Duration, Permanent, +150%; Nuisance Effect, Cannot exempt people from effects, -5%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [25] + Control Teleportation Magic +1 (Accessibility, Only to redirect, -60%; Does not increase area of effect, -50%; Extended Duration, Permanent, +150%; Nuisance Effect, Cannot exempt people from effects, -5%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [20]. Additional levels add Control Teleportation Magic +1 (Accessibility, Only to redirect, -60%; Extended Duration, Permanent, +150%; Nuisance Effect, Cannot exempt people from effects, -5%; Only increases area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [20/level]. *Notes:* Redirecting is treated as an effect that requires two levels of Control, as if using Neutralize with Derange. As this is one advantage (Control Teleportation Magic) with the Sorcery limitation, not two, it costs only 1 FP to use.

Teleport Other

Keywords: Resisted (Will).

Full Cost: 228 points.

Casting Roll: Will. IQ to teleport. Special casting cost.

Range: Unlimited.

Duration: Instantaneous.

If the subject fails to resist, the caster may try an immediate IQ roll to teleport the subject as if using the Warp advantage (p. B97). The caster can send the subject and his gear up to his Extra-Heavy encumbrance to any place he can see or has visited and can cancel range modifiers by spending his own FP.

Statistics: Affliction 1 (Will; Advantage, Teleport Other, +2,000%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [228]. *Note:* “Teleport Other” is Warp (Extra Carrying Capacity, Extra-Heavy, +50%; Reliable +10, +50%) [200]. The +10 for Reliable cancels the -10 for no preparation.

Telescoping Weapon

Keywords: Weapon Buff.

Full Cost: 32 points for level 1 + 16 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell increases or reduces a melee weapon's Reach by up to 1 yard per spell level. Final Reach must fall within the C-4 range. Allowed Reach categories are, in order: C, 1, 2, 3, and 4.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Telescoping Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Telescoping Weapon" is 22 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -2 in penalties [+16]. This spell is based on the Telescoping Weapon imbue skill.

Televisiomancy

Keywords: Information.

Full Cost: 80 or 130 points.

Casting Roll: IQ. Special casting time (see below).

Range: Unlimited.

Duration: Instantaneous.

As Divination (*GURPS Thaumatology: Sorcery*, p. 19), but with the following changes.

Transforms the subject TV into a magical scrying device. The caster may ask one question pertaining to the past, present or future of something currently showing on TV. For news programs, this may be anything to do with a news item. For dramas, the question must refer to either the actors or the show. If the spell succeeds, the program will alter and show a brief sequence that cryptically answers the question.

When asking a question about the past or future, the casting roll takes a time penalty. Use *Long-Distance Modifiers* (p. B241), reading "miles" as "weeks."

The basic (80-point) version of this spell requires 10 minutes to cast! The improved (130-point) version requires only the usual one or two seconds.

Statistics: Precognition (Accessibility, Only related to what is shown on TV, -30%; Active Only, -60%; Directed, +100%; Long-Range 2, +100%; Magical, -10%; Nuisance Effect, Time penalties, -10%; Ranged, +40%; Reduced Fatigue Cost 1, +20%; Remote, +50%; Reliable 8, +40%; Requires a TV, -10%; Visible, -10%) [80]. The improved version adds Reduced Time 10 (+200%) [+50]. *Note:* The Remote enhancement was borrowed from Empathy.

Tell Age

Keywords: Information.

Full Cost: 13 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell tells the caster age of the subject. On a failure, the caster does not learn anything, and cannot attempt to learn age of the same subject again for 24 hours.

Statistics: Psychometry (Accessibility, Only to learn age, -30%; Active Only, -20%; Sensitive, +30%; Sorcery, -15%) [13].

Tell Position

Keywords: Information.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

Tells the caster the subject's exact distance, azimuth, and altitude relative to the caster. The caster must be able to see the subject. Error is around 5%; where relevant, the GM will secretly roll 2d-7 for the percentage, keeping negative numbers.

Statistics: Eye for Distance (Sorcery, -15%) [1].

Tell Time

Keywords: Information.

Full Cost: 1 point.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

Tells the caster what time it is – as well as the day and year, should that be in doubt.

Statistics: Accessory (Clock; Sorcery, -15%) [1].

Tell Weight

Keywords: Information.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.

Duration: Instantaneous.

Tells the caster weight of the touched subject.

Statistics: Accessory (Scales; Sorcery, -15%) [1].

Temporal Disjunction

Keywords: Resisted (Will).

Full Cost: 80 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent.

The subject loses any sense of time. It is perpetually late, unable to function under any time restraints. This spell is merely an annoyance unless accurate timing is crucial. The subject's Basic Speed is lowered by 4 for the purpose of determining the turn order in combat. The subject loses the benefits of Combat Reflexes and Enhanced Time Sense for the duration of the spell. If the subject takes a Wait maneuver to coordinate its action with someone else, it makes an IQ-5 roll. If the subject succeeds, it performs the action normally. If the roll has failed, the action is lost.

Additionally, the subject loses its ability to travel in time or affect time in any way. It automatically fails to cast time-affecting spells (such as Timeport, Timeslip, Haste, etc.) and use any similar abilities. It cannot be moved in time by external means too, which means that it becomes immune to Timeport Other, Timeslip Other, and other similar spells and abilities. It can function normally in areas of Suspend Time, Accelerate Time, and other temporal anomalies.

This cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21) or the equivalent of Stone to Flesh (*GURPS Magic*, p. 53).

Statistics: Affliction 1 (Will; Advantage, Temporal Disjunction, +270%; Based on Will, +20%; Cosmic, Immune to Dispel Magic, +50%; Disadvantage, Divine Curse (Lateness), +5%; Extended Duration, Permanent, +150%; Malediction 2, +150%; Negated Advantage, Enhanced Time Sense, +45%; No Signature, +20%; Sorcery, -15%) [80]. *Note:* "Temporal Disjunction" is Static (Time-Based Abilities; Magical, -10%) [27].

Temporal Stasis

Keywords: Resisted (Will).

Full Cost: 128 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim and his equipment stop in time. Time continues to flow in the rest of the universe, just not for him. He's frozen in place – in mid-action or even midair. He doesn't age, breathe, or require sustenance. Injury, disease, and poison halt their progress. He keeps his position in the local frame of reference (usually a planet), but the physical world doesn't otherwise affect him. He can't be injured, moved, robbed, etc. In most settings, this extends to supernatural powers (e.g., his mind is unreadable). Likewise, he's unaware of the universe and can't act in any way, not even mentally. This lasts for 3 minutes. After that, his actions, perceptions, and so on pick up where they left off. This *isn't* a metabolic effect; it can afflict objects

Statistics: Affliction 1 (Will; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Temporal Stasis, +1,000%) [128].

Temporal Wall

Keywords: Obvious.

Full Cost: 72 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes, effects of passing through lasts 10 seconds.

Creates a thin barrier composed of the temporal mist-smoke. You do not have to concentrate to maintain it, Temporal Wall is "fire and forget." It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall dissipates once the duration runs out.

This wall blocks vision, but is otherwise permeable. Anyone passing through the wall in any direction must make a Will roll. Failure means that the creature gains the Decreased Time Rate (p. B129) and loses its sense of time, but only for 10 seconds. While in this state, the victim acts only once every other turn and has no sense of time - he is perpetually late, unable to function under any time restraints. This spell is merely an annoyance unless accurate timing is crucial. The victim's Basic Speed is lowered by 4 for the purpose of determining the turn order in combat. The victim loses the benefits of Combat Reflexes and Enhanced Time Sense for the duration of the effect. If the victim takes a Wait maneuver to coordinate his action with someone else, he makes an IQ-5 roll. If the victim succeeds, he performs the action normally. If the roll has failed, the action is lost. Additionally, the victim loses his ability to travel in time or affect time in any way. He automatically fails to cast time-affecting spells (such as Timeport, Timeslip, Haste, etc.) and use any similar abilities. He cannot be moved in time by external means too, which means that he becomes immune to Timeport Other, Timeslip Other, and other similar spells and abilities. He can function normally in areas of Suspend Time, Accelerate Time, and other temporal anomalies, but is still affected by the slowing effect of Temporal Wall.

To find the maximum square yardage available, look up the level of this spell on the Leveled Area Table (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Temporal Wall 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Temporal Wall 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Statistics: Affliction 1 (Will; Advantage, Temporal Disjunction, +270%; Area Effect, 2 yards, +50%; Based on Will, +20%; Disadvantage, Decreased Time Rate, +100%; Disadvantage, Divine Curse (Lateness), +5%; Extended Duration on Persistent, 30x, +60%; Fixed Duration, +0%; Persistent, +40%; Negated Advantage, Enhanced Time Sense, +45%; Reduced Duration, 1/10, -20%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [72]. Additional levels increase Area Effect (+50%) [+5]. *Note:* "Temporal Disjunction" is Static (Time-Based Abilities; Magical, -10%) [27].

Temporary Ageing

Keywords: Resisted (HT).

Full Cost: 16 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous; see text.

You temporarily make the living subject 1 year older. Every time the victim would heal 1 HP but is at full HP, he can instead roll against his or her "Original HT" meaning that if the victim had 13 HT originally, but lost a couple to aging rolls he would still roll against 13 not his "new" HT. Success returns 1 year, failure and critical failure do nothing.

Statistics: [Ageing Attack 1](#) (Accessibility, Only on living creatures, -10%; Based on HT, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Temporary, -50%) [16].

Test

Keywords: Information.

Full Cost: 1 point.

Casting Roll: Per.

Range: Unlimited.

Duration: Instantaneous.

After casting, the GM rolls against the sorcerer's Per modified by the distance to the subject. If the roll is successful, the spell reveals the caster whether a *specific* disease or poison affects the subject. Each disease and poison have their own Test spells, and it's likely that only serious illnesses have such spells. Only one attempt per subject per day is allowed.

Statistics: Detect Specific Disease or Poison (Increased Immunity 3, -30%; Selective Effect, +20%; Sorcery, -15%; Vague, -50%; Vision-Based, -20%) [1].

Test Air

Keywords: Information.

Full Cost: 36 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the air is safe to breathe. The GM will secretly roll against the caster's IQ to the subject, which the caster must be able to see or touch. The caster will know automatically if the air can be breathed safely, but a successful casting roll will let him know if there are any poisons or any impurities in the air.

Statistics: Detect (Air; Analysis Only, -50%; Analyzing, +100%; Sorcery, -15%; Touch- or Vision-Based, -15%) [36].

Test Food

Keywords: Information.

Full Cost: 24 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Determines whether the subject substance can be used normally as food. The GM will secretly roll against the caster's IQ to the subject, which the caster must be able to see or touch. The caster will know automatically if the substance can be used as food, but a successful casting roll will let him know if there are any poisons, dangerous decay, or foreign objects in the food.

Statistics: Detect (Food; Analysis Only, -50%; Analyzing, +100%; Sorcery, -15%; Touch- or Vision-Based, -15%) [24].

Test Fuel

Keywords: Information.

Full Cost: 24 points.

Casting Roll: IQ.
Range: Unlimited.
Duration: Instantaneous.

Determines whether the subject substance can be used normally as fuel. The GM will secretly roll against the caster's IQ to the subject, which the caster must be able to see or touch. The caster will know automatically if the substance can be used as fuel, but a successful casting roll will let him know if there are any impurities in the fuel.

Statistics: Detect (Fuel; Analysis Only, -50%; Analyzing, +100%; Sorcery, -15%; Touch- or Vision-Based, -15%) [24].

Test Load

Keywords: Information.
Full Cost: 1 points.
Casting Roll: None.
Range: Touch.
Duration: Instantaneous.

Tells the caster how much weight the subject can support before warping or breaking. This can reveal the capacity of bridges, baskets, ropes, etc.

Statistics: Accessory (Tensometer; Sorcery, -15%) [1].

Thaumatomancy

Keywords: Information.
Full Cost: 2 points.
Casting Roll: IQ. Special casting time.
Range: Self.
Duration: Instantaneous.

This spell acts like the Thaumatology skill (p. B225) with all normally applied penalties, but it can only answer questions about existing magic, disallowing original research into new magic. Unlike most sorcery spell, Thaumatomancy requires one hour of uninterrupted concentration to cast.

Statistics: Thaumatology (VH) IQ [8] modified with Accessibility, Only questions about existing magic, -10%; Immediate Preparation Required, 1 hour, -75%; Sorcery, -15% for a final cost of 2 points.

Thirst

Keywords: Resisted (HT).
Full Cost: 12 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

If the victim fails to resist, he takes 1d-2 fatigue damage. Treat FP lost to the spell identically to FP lost to dehydration (B426). Thus, the lost FP can only be recovered after a day of rest with ample water supplies.

Statistics: Fatigue Attack 1d-2 (HT; Based on HT, +20%; Dehydration, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [12].

Thoughtsense

Keywords: Information.
Full Cost: 65 points.
Casting Roll: Per.
Range: Self.
Duration: Indefinite.

When this spell is active, the caster can sense conscious minds and know their precise location. The GM will roll against your Per (plus Talent), minus the range penalty to the conscious mind, and inform you if you succeed. This allows the caster to cast spells on any of them for as long as they keep perceiving them.

Statistics: Detect (Conscious Minds; Cannot Analyze, -10%; Reflexive, +40%; Precise, +100%; Sorcery, -15%) [65].

Thousand-Legged Demise

Keywords: Resisted (Will).

Full Cost: 67 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 second.

This transforms the subject into a seething swarm of small, mindless creatures for 1 second. The magic is highly unstable and doesn't impart a group mind – rather than stay in a cohesive horde, the critters crawl, fly, or swim in all directions. The spell ends a second later, leaving small pieces of the victim's dead body scattered across a radius equal to his Move, with a few surviving creepy-crawlers dining on the carrion.

Someone who casts [Insect Control](#) on the subject immediately (on his first turn after Thousand-Legged Demise is cast) may roll a Quick Contest against Will + Talent of the caster. Victory keeps the swarm in one place, allowing the subject to reform unharmed.

Whatever happens, if transformation occurs, the subject's possessions aren't affected and end up on the ground.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, Victim can be saved with [Insect Control](#), -10%; Sorcery, -15%) [67]. *Note:* Fragile (Enhanced Unnatural) means the subject dies if reduced to 0 HP; therefore, since Heart Attack reduces the target's HP to 0, the target dies.

Throw Voice

Keywords: None.

Full Cost: 1 point.

Casting Roll: Ventriloquism or IQ-6.

Range: Unlimited.

Duration: Indefinite.

The caster makes their voice emerge from a distant point. This requires a Ventriloquism (p. B228) roll, at -1 per yard of distance; a subject without that skill uses IQ-6 (normally, Ventriloquism has no default), still at -1 per yard.

Statistics: Throw Voice (Sorcery, -15%) [1].

Thunderous Armor

Keywords: Armor Buff.

Full Cost: 36 points or 76 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Enchanted armor or shield rings loudly when struck, momentarily deafening attackers. Treat this as Obscure (p. B40) directed at hearing. The Hearing penalty equals half the damage stopped (round down), to a maximum of -10.

Against a melee attack, this affects everyone within a two-yard radius of the wearer after he is struck. Against a ranged attack, it affects a two-yard radius around the distant foe instead. These effects last until the wearer's next turn.

The basic (36-point) version penalizes the wearer's Hearing as well. The improved (76-point) version does not affect the wearer.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Thunderous Armor, +260%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Notes:* "Thunderous Armor" is 26 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). The improved removes a -5 penalty [+40]. This spell is based on the Thunderous Defense imbuelement skill from *Pyramid #3-4*.

Tickle

Keywords: Resisted (Will).

Full Cost: 39 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The subject feels he is being tickled. If he does not resist, he is helpless with laughter, jerking about to try to escape from his invisible tormentor. The victim is incapacitated as if by a seizure (see *Incapacitating Conditions*, p. B428). The subject must make a second Will roll if he tries to keep silent. High/Low Pain Threshold has no effect on the spell's outcome. Unfazeable characters get a +5 bonus to their resistance roll. After the spell is over the subject is stunned (p. B420) and may roll vs. Will once per second to recover.

Statistics: Affliction 1 (Will; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Seizure, +100%; Sorcery, -15%; Subject must make a Will roll to keep silent, +10%) [39].

Tide

Keywords: Area (Special).

Full Cost: 69 points for level 1 + 61 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can change the water level within the 0.1-mile-radius area around you by one yard per level of this spell. Every level of this spell give -1 or +1 to rolls that could be hindered or helped by tides, relative to the prevailing conditions. This can help with rolls for Boating, Seamanship, Survival and anything the GM allows.

Statistics: Control Tides 1 (Natural Phenomenon, +100%; Sorcery, -15%) [28] + Control Tides +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [41]. Additional levels add Control Tides +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [61/level]. *Note:* As this is one advantage (Control Tides) with the Sorcery limitation, not two, it costs only 1 FP to use.

Time Out

Keywords: Area (Leveled), Resisted (Will, Special).

Full Cost: 239 points for level 1 + 5 points/additional level.

Casting Roll: Will.

Range: Self.

Duration: An instant (outside time). Within the area, the caster and any other occupants have as much time as they need.

If the spell was not resisted successfully, the caster may try an immediate IQ roll to remove the area from the time stream as if using the Jumper advantage (p. B64). The area and all within it are

temporarily removed from the time stream; the effect is equivalent to having the area's time accelerated infinitely. Unlike Suspend Time, this spell can only be cast from the inside, centered on the caster (the spell ends as soon as he touches its edge). Should the caster die alone in the area, the spell will never end! The caster and any objects caught in the area would simply seem to vanish from the time stream.

As far as outside observers are concerned, the area "ages" instantaneously (which may or may not be perceptible). One moment five ogres were attacking the party while their wizard cast a spell, and the next moment the ogres were dead, the party magically healed, and everybody was in a different position and drinking rum to celebrate.

From the inside, the area is bounded by a wall (and covered by a ceiling) of utter blackness. Anyone or anything touching the edge of the area is immediately expelled from the area, back into normal time. This causes an automatic mental stun to anyone other than the caster. Missiles of any sort can be thrown blindly out of the area (see Shooting Blind, p. B389) but not into it. Note that, since all missiles fired out of the area will emerge at the same outside time, an archer could create an impressive burst of arrows by simply firing casually for a few subjective hours...

Spells involving the outside simply fail. Any spell requiring concentration and lying inside the area lapses immediately if its caster is left outside. Likewise, any inside spell whose maintenance comes due during the Time Out lapses unless its caster is also inside.

The "flow" of mana into the Timed Out area is effectively nil. Powerstones won't recharge, enchantment is impossible, etc. Mages still recover lost energy (the physical consequences of manipulating mana go away regardless of the local mana supply), but GMs may decree that spells cost much more, or are impossible, within the time-stopped area (since the power must be drawn entirely from the caster's personal life-force). This is entirely dependent on the GM's view of mana in his setting.

Unless everyone within the area is willing, the person with the highest effective Will resists. The spell is all-or-nothing; if that one person resists, then the spell fails, but if not, then it works. If the GM is uncertain of who has the best resistance roll (e.g., one person has high Will while another has modest Will but also Luck), he can pick two, roll for both, and average their margins of success for the Quick Contest.

Statistics: Affliction 1 (Will; Advantage, Time Out, +2,100%; All-or-Nothing, -10%; Area Effect, 2 yards, +50%; Based on Will, +20%; Emanation, -20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Terminal Condition, Caster touches the edge, -10%; Variable, Area, +5%) [239]. Additional levels add more Area Effect (+50%) [+5]. *Notes:* "Time Out" is Jumper (Time, Variant; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Reliable +10, +50%) [210]. The +10 for Reliable cancels the -10 for no preparation. The Improved enhancement removes the auto-fail on 14+.

Time Snare

Keywords: Resisted (Will).

Full Cost: 33 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: 10 seconds.

This spell creates a time loop in a sapient subject's mind that causes it to repeat this turn's action indefinitely. If the subject attacked, it attacks the same person in the same exact way, if possible. If it drank a potion, it drinks from the same bottle again (if the bottle is empty, it tries to drink another instance of this potion). Even if something happens to prevent this attempt (the opponent is dead, or someone takes the bottle away), the subject still strives to repeat its last action. You do not have to maintain concentration to control the subject. The victim gets a IQ roll to resist the effect every second. A successful save means that the effect is broken.

You can only affect a subject you can see or touch. To cast this spell, concentrate for one second and then roll a Quick Contest: your IQ vs. your subject's Will, applying the range penalties to the subject (p. B550). If you lose, you cannot attempt to control that subject again for 24 hours, and he feels a sense of mental coercion emanating from you.

Statistics: Mind Control (Accessibility, Only on sapient beings, -10%; Accessibility, Only to repeat actions, -30%; Fixed Duration, +0%; Independent, +70%; Reduced Duration, 1/10, -20%; Resistible, -30%; Sorcery, -15%) [33].

Time Stop

Keywords: None.

Full Cost: 90 points.

Casting Roll: IQ. Special casting time (see below).

Range: Self.

Duration: One hour of subjective time.

You exit the time stream along with equipment up to your No Encumbrance limit. To do so, you must concentrate for 10 seconds, and make a IQ roll. You may hurry the casting, but your roll will be at -1 per second of concentration omitted (-10 to cast with no preparation at all).

While outside the time steam, you perceive the world as frozen. You can't affect it (and vice versa) – only observe and move through it. You can interact with items you brought along; this lets you patch your wounds, reload your guns, and so forth. However, this does not let you attack others in any way. Time passes for you (you tire, grow hungry, age, etc.), but it's subjective.

You may stay in the timeless realm for a the subjective duration of one hour before you automatically return to the normal time stream. Once you come back, your body must adjust to the change – you cast this spell again for at least five minutes. You may return to the normal time stream at any moment by making an IQ roll.

Statistics: Jumper (Time Stop; Improved, +10%; Magical, -10%; Maximum Duration, 1 hour, -10%) [90]. *Note:* The Improved enhancement removes the auto-fail on 14+. This Jumper variant originally appeared in *Designer's Notes: GURPS Powers*, pyramid.sjgames.com/sample.html?id=5782.

Time Walk

Keywords: None.

Full Cost: 29 points.

Casting Roll: None.

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can rewind time for just a moment to try to defend against an attack one more time and take a Move maneuver. Usually this is done to move away from the attacker.

Once per hour of *play* (or once per day of game time, if you prefer to use game time), the caster may reroll a single active defense die roll twice and take the best of the three rolls, then perform a single Move maneuver! He must declare that he is using this spell immediately after he rolls the dice. Once he or anyone else has made another die roll, it is too late to use Time Walk. If the caster already has used Time Walk in the last hour of play (or day of game time, if you prefer to use game time) or other forms of the Luck advantage, he cannot use it again, until enough time passes, even if he switches to a different spell.

Statistics: Luck (Defensive, Only active defenses, -40%; Link, +10%; Magical, -10%) [9] + Altered Time Rate 1 (Accessibility, Only to perform a Move maneuver, -40%; Link, +10%; Maximum Duration, 1 second, -75%; Reflexive, +40%; Sorcery, -15%) [20].

Timeheal

Keywords: None.

Full Cost: 189 points.

Casting Roll: IQ.

Range: Touch.

Duration: Instantaneous.

This spell pushes the subject's body back in time, when it was in a better physical state. This heals back damage and all other additional effects of the last wound the subject has received, if the wounding happened within 2 seconds. For example, if the subject took a poisoned arrow two seconds ago, and did not receive any additional wounds afterwards, then this spell will heal all damage dealt by the arrow and negate poisoning. This spell does not work if the last attack dealt more than 20 points of damage.

You may heal any animate subjects, including undead and constructs.

Your casting roll is at -2 if the subject is unconscious. In addition, if used more than once per day on a given subject, you are at a cumulative -3 per successful healing. Failure costs you 1d FP instead of the usual 1 FP!

Statistics: Healing (Accessibility, Only a single wound dealt within last 2 seconds, -55%; Affects Self, +50%; All-or-Nothing, -10%; Capped, 10 FP, -5%; Cosmic, Negated all additional effects, +300%; Injuries Only, -20%; Magical, -10%; Reduced Fatigue Cost 9, +180%; Xenohealing, Anything Animate, +100%) [189].

Timeport

Keywords: None.

Full Cost: 130 points.

Casting Roll: IQ. Special casting time (see below).

Range: Self.

Duration: Instantaneous.

You travel through time. To initiate a jump, you must visualize your destination, concentrate for 10 seconds, and make a IQ roll. You may hurry the jump, but your roll will be at -1 per second of concentration omitted (-10 to jump with no preparation at all). On a success, you appear at your target destination. On a failure, you go nowhere. On a critical failure, you arrive at the wrong destination, which can be any place the GM wishes!

You appear at your destination at exactly the same place you left your previous time – or as close as possible. This means the same place, but in a different time. If there is no corresponding “safe” location within 100 yards of your destination – for instance, if you jump while on an airplane to a destination with no plane at your location, or from a half-mile deep mine to a destination with no corresponding mine – the jump will fail and you will know why it failed. This does not prevent you from jumping into other types of danger, such as radiation, gunfire, or wild animals. If you have Danger Sense, the GM should roll before you make a hazardous jump; on a success, you get a warning.

You can carry up to your Heavy Load when you travel.

Statistics: Jumper (Time; Extra Carrying Capacity, Heavy, +30%; Improved, +10%; Magical, -10%) [130]. *Note:* The Improved enhancement removes the auto-fail on 14+.

Timeport Other

Keywords: Resisted (Will).

Full Cost: 238 points.

Casting Roll: Will. IQ to timeport.

Range: Unlimited.

Duration: Instantaneous.

If the subject fails to resist, the caster may try an immediate IQ roll to shift the subject to another time as if using the Jumper advantage (p. B64).

Statistics: Affliction 1 (Will; Advantage, Timeport Other, +2,100%; Based on Will, +20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [238]. *Notes:* “Timeport Other” is Jumper (Time; Extra Carrying Capacity, Extra-Heavy, +50%; Improved, +10%; Reliable +10, +50%) [210]. The +10 for Reliable cancels the -10 for no preparation. The Improved enhancement removes the auto-fail on 14+.

Timeslip

Keywords: None.
Full Cost: 35 points.
Casting Roll: Power Dodge (IQ/2+3).
Range: Self.
Duration: Instantaneous.

While this spell is active, once per turn, you can “dodge” an incoming attack by timeporting away from it 1 second into the future. This works as if you had Jumper (Time) (p. B64), but with no -10 penalty for lack of preparation.

You can carry up to your Heavy Load when you timeslip.

Statistics: Jumper (Time; Active Defense, -40%; Extra Carrying Capacity, Heavy, +30%; Faster Concentration 5, +25%; Improved, +10%; Limited Jump, 1 second forward, -80%; Magical, -10%) [35].

Note: The Improved enhancement removes the auto-fail on 14+.

Timeslip Other

Keywords: Buff.
Full Cost: 38 points.
Casting Roll: Power Dodge (DX/2+3). Use Innate Attack (Gaze) to aim. IQ to timeport.
Range: 100 yards.
Duration: Instantaneous.

The caster may try an immediate IQ roll to timeport the subject away from an incoming attack 1 second into the future. This spell may only be used as an active defense.

Statistics: Affliction 1 (HT; Active Defense, -40%; Advantage, Timeport Other, +300%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [38]. *Note:* “Timeport Other” is Warp (Blink Only, -60%; Gyroscopic, +10%; Magical, -10%; Reappears one second later, -0%; Stays in place, -10%) [30].

Tongues

Keywords: Buff.
Full Cost: 72 or 128 points.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The basic (72-point) version of this spell grants the subject the ability to speak every language at Accented (or Native, if the subject has Language Talent), excluding alien languages. The improved (128-point) version of this spell includes alien languages, though the subject may need special technology (or the Mimicry advantage) to produce the correct sounds.

Statistics: Affliction 1 (HT; Advantage, Tongues, +560%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [72]. *Notes:* “Tongues” is Omnilingual (Cosmic, Universal Translator, +50%; Magical, -10%) [56]. The improved version improves Omnilingual to Xeno-Omnilingual [+56]. The advantages may be found in *Pyramid #3-54*, page 29.

Total Paralysis

Keywords: Resisted (HT).
Full Cost: 29 points.
Casting Roll: Will. Use DX or unarmed combat skills to hit.
Range: Touch.
Duration: 1 minute.

The caster must touch the subject on the head (-5 to caster’s attack roll). If the subject fails to resist, he is totally paralyzed (p. B428) and cannot move at all for one minute. After that the subject is stunned (p. B420) and may roll vs. HT once per second to recover.

Statistics: Affliction 1 (HT; Hard to Use 2, Variant, -10%; Melee Attack, Reach C, -30%; Malediction 1, +100%; Paralysis, +150%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [29].

Touch

Keywords: None.

Full Cost: 1 point.

Casting Roll: IQ.

Range: 10 yards.

Duration: Instantaneous.

The subject feels a light touch at a spot of the caster's choice. The touch is easily felt, even through armor, but has no effect other than to attract the subject's attention; it cannot cause pain or discomfort, but it is very likely to distract him.

Statistics: Touch (Sorcery, -15%) [1].

Touch of Bad Luck

Keywords: Resisted (Will).

Full Cost: 118 points.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: Permanent.

This spell lets the caster neutralize all of the subject's luck-manipulation abilities, such as Luck and Super Luck. He must touch the subject. This requires an Attack maneuver in melee combat. On a hit, roll a Quick Contest of Will.

If the caster wins, he neutralizes his victim's luck powers, until the spell is dispelled or the subject makes a critical success roll. If the caster loses or ties, there's no effect – but critical failure on the caster's Will roll cripples this spell for 1d hours.

Once the caster has neutralized a given subject, he can't affect him again until his powers recover. Multiple attackers can use Touch of Bad Luck or similar neutralizing abilities on the same target. Use only the longest duration; their abilities don't "add" in any way.

Statistics: Neutralize Luck (Extended Duration, Permanent, +150%; Sorcery, -15%) [118]. *Note:* By default, Neutralize affect a power source. I think it is reasonable to allow it to affect a class of abilities instead.

Touch of Fatigue

Keywords: Obvious.

Full Cost: 2 points/level.

Casting Roll: None. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

The caster must touch the subject to affect him. If the subject fails to resist with an HT roll, he takes 1d fatigue damage per level of this spell.

Statistics: Fatigue Attack 1d (HT; Melee Attack, Reach C, Cannot Parry, -35%; Resistible, HT, -30%; Sorcery, -15%) [2/level].

Touch of Idiocy

Keywords: Obvious, Resisted (Will).

Full Cost: 22 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 3 minutes.

Your touch mentally weakens the victim, if he fails to resist with Will. The victim temporarily loses 4 IQ. Lower all skills and spells based on IQ by a like amount. IQ reductions also apply to Will and Perception.

Statistics: Affliction 1 (Will; Attribute Penalty, IQ-4, +40%; Based on Will, +20%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, -30%; Sorcery, -15%) [22].

Touch of Weakness

Keywords: Resisted (HT).

Full Cost: 17 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 3 minutes.

Your touch physically weakens the victim, if he fails to resist with HT. The victim suffers temporary ST loss equal to your margin of victory (maximum -10). Lower all skills based on ST by a like amount. ST penalties also reduce BL and damage. HP is not otherwise affected. This spell can only affect living beings.

Statistics: Affliction 1 (HT; Accessibility, Only on living beings, -10%; Attribute Penalty, ST-10, +50%; Fixed Duration, +0%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Penalty cannot exceed margin of victory, -50%; Sorcery, -15%) [17].

Toughen

Keywords: Buff.

Full Cost: 14 points for level 1 + 4.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell increases the DR of an object by 1 per level. If the object takes basic damage equal to or greater than its (toughened) DR, the spell is broken, and must be recast. The GM may impose a cap on the maximum level of this spell.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Toughen 1, +50%; All-or-Nothing, -10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%; Terminal Condition, Broken, -10%) [14]. *Notes:* Each level of "Toughen" is DR 1 (Magical, -10%) [5]. Each level adds additional Toughen to the Advantage enhancement (+50%) [+4.5*].

* Calculate the total cost then round *down*.

Tower of Iron Will

Keywords: Area (Fixed).

Full Cost: 30 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

While this spell is active, you project a mental barrier that protects everyone within 4 yards of you. Add 3 to IQ or Will whenever you or anyone within the area resist an ability with the Telepathic limitation, a Communication and Empathy or a Mind Control spell, or a similar direct mental ability *from outside* the barrier. In addition, the barrier hinders attempts to locate the minds of those inside with supernatural abilities. Such abilities must win a Quick Contest against your Will + 3 to find the minds. You cannot drop this barrier without switching to another spell. Even if you or another creature within the barrier choose to waive the resistance roll against a beneficial ability, the Tower of Iron Will will try to resist, using 8 (or the normal resistance roll, if lower).

Statistics: Mind Shield 3 (Affect Others 1, +50%; Always On, -10%; Area Effect, 4 yards, +100%; Force Field, +20%; Sorcery, -15%) [30].

Towering Inferno

Keywords: Area (Leveled).

Full Cost: 7 points or more (see below).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You may call down a vertical column of flame in a two-yard-radius area. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

Everything in the area takes 1d burning damage. This is large-area injury (p. B400).

The basic (7-point) version of this spell lets you affect an area up to 2 yards across. Each additional doubling of area adds 2.5 to basic cost; the GM sets the cap on this increase, but 128 yards is the recommended maximum. For an additional +5 to base cost, the damage can be upgraded to 2d or 3d burning. This is summarized in the table below.

Damage	2 yards	4 yards	8 yards	16 yards	32 yards	64 yards	128 yards
1d	7 points	10 points	12 points	15 points	17 points	20 points	22 points
2d	14 points	19 points	24 points	29 points	34 points	39 points	44 points
3d	21 points	29 points	36 points	44 points	51 points	59 points	66 points

Statistics: Burning Attack 1d (Area Effect, 2 yards, +50%; Sorcery, -15%; Variable, Area, +5%) [7]. Further levels add Area Effect (+50%) to the advantage [+2.5*].

* Calculate the total cost, then round up.

Town Portal

Keywords: None.

Full Cost: 110 points or 130 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Touch.

Duration: 3d seconds.

This spell teleports the caster to the central fountain of a city or town the caster has visited before. After the caster teleports, he creates a gate behind him that persists for 3d seconds. Creatures that traverse the gate can carry up to Extra-Heavy Encumbrance when they travel.

The basic (110-point) version of this spell teleports the caster to the nearest town that meets the requirements, while the improved (130-point) version teleports him to any city or town with a central fountain that the caster has visited before. Creatures that traverse the gate can carry up to Extra-Heavy Encumbrance when they travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you have a “second-hand” view of the destination, you are at -2 per level of removal. For instance, seeing it on TV or through someone else’s eyes would give -2, while seeing it on a television set that you are viewing through someone else’s eyes would give -4. There is an additional -2 to teleport to a place you have visited but cannot see.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, the you to your target destination and leave the gate behind you. On a failure, the teleportation fails and you strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you teleport, but to the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

Statistics: Warp (Anchored, Nearest town with a central fountain that you have visited before, -50%; Extra Carrying Capacity, Extra-Heavy, +50%; Requires Concentrate, -15%; Sorcery, -15%; Tunnel, After, +40%) [110]. *Note:* The improved version replaces Anchored, Nearest town with a central fountain that you have visited before, -50% with Anchored, Town with a central fountain that you have visited before, -30% [+20].

Toxic Ball

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 13 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of contact poison that expands to cover an area. Use Innate Attack (Projectile) to hit, applying normal range penalties, but at +4 for targeting an area. Every creature without Sealed within four yards of that spot takes dice of toxic damage equal to your level of this spell, ignoring DR, unless they make a successful HT-5 roll to resist. The GM must determine what the maximum level available in the campaign is.

If your foe is within one yard of you, he may attempt to parry this attack (actually parrying your hand). If such a parry is successful, you must roll against DX to avoid dropping this at your own feet, where it erupts!

Statistics: Toxic Attack (Area Effect, 4 yards, +100%; Contact Agent, +150%; Nuisance Effect, Dangerous to be parried, -5%; Resistible, HT-5, -5%; Sorcery, -15%) [13/level].

Toxic Plant

Keywords: Buff.

Full Cost: 94 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell enchants a non-sentient plant with rudimentary intelligence (IQ 3) and a toxic attack. When anyone comes too close, it emits an incapacitating vapor, the effect of which is resisted with a HT roll. Pick one of the following effects before the spell roll: Coughing; Daze; Ecstasy; Itching; Sneezing; Paralysis; or Retching. Treat this as an Affliction with Reach C, Low Signature, and Respiratory Agent. See pp. B428-429 for the effects of these afflictions.

The vapor can be seen as a mist that lasts a fraction of a second before it dissipates. Roll Vision-4 to notice (or unmodified for someone actively looking for it). In an exterior setting with a breeze, the vapor may affect only someone whose face is no more than three inches from the plant.

Statistics: Affliction 1 (HT; Accessibility, Only on non-sentient plants, -50%; Advantage, Toxic Plant, +870%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [94].

Note: "Toxic Plant" is Affliction 1 (HT; Alternative Enhancements (Coughing, Daze, Ecstasy, Itching, Sneezing, Paralysis, Retching), +206%; Low Signature, +10%; Magical, -10%; Melee Attack, Reach C, Cannot Parry, -35%; Respiratory Agent, +50%) [33] + IQ 3 (Magical, -10%) [54].

Toxic Weapon

Keywords: Weapon Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell makes the target weapon exude deadly energies. This converts the damage of a non-toxic attack from its usual damage type to toxic. Toxic damage only harms living things and has no special damage effects – but it also leaves no bruises or, in this case, any other evidence!

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Toxic Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Toxic Weapon" is 22 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery, p. 11)*. This spell is based on the Toxic Strike imbue skill.

Trace

Keywords: Information.

Full Cost: 18 points.

Casting Roll: Per.

Range: Unlimited.

Duration: Indefinite.

The caster can track anyone or anything. As long as the spell is maintained, the caster will know the direction and distance to the subject. Either the subject must be visible to the caster when the spell is first cast, or the caster must first cast Seeker successfully.

The casting roll takes *Long-Distance Modifiers* (p. B241). If during the spell's duration the subject moves away enough to increase the range penalty, then the caster must make a new Per roll.

Statistics: Slotted Cosmic Power 1 (9) (Either/Or (Vision-Based, Reversed, -20% or Nuisance Effect, Must have tracked the subject with Seeker first, -5%), -1%; Limited, Trait, Detect, -50%; Sorcery, -15%) [18]. *Note:* Effectively, this spell emulates effects of the Detect (Subject; Rare) [5] advantage with Cannot Analyze, -10%; Reflexive, +40%; and Long-Range 1, +50% for the total cost of 9 points.

Trace Labyrinth

Keywords: None.

Full Cost: 3 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

As long as the spell is active, it will create a magical trace of the caster's movement, which everyone can see as a faintly glowing line. After the spell lapses, the trace extends no further, but remains visible as long as the caster is underground, and vanishes immediately when he leaves.

Statistics: Absolute Direction (Accessibility, Only underground, -30%; Sorcery, -15%; Trace Stays, +15%; Visible, -10%) [3].

Trace Teleport

Keywords: Information.

Full Cost: 15 points.

Casting Roll: Per. Use IQ for analysis.

Range: Unlimited.

Duration: Instantaneous.

When cast soon after someone or something teleports, timeports or plane-shifts in or out, this spell gives the caster a vision of the destination of the teleported subject. The GM will secretly roll against the caster's Per minus range penalties (p. B550) to the subject, teleportation of which the caster must have witnessed. The follow-up IQ roll will give the caster a good idea of the magnitude of the roll penalty involved to cast the spell or use the ability. On a critical success, the actual destination will be known, but any success gives the caster enough of a sense of the destination to follow, if he does so within a minute of casting Trace Teleport. The spell operates at a cumulative -1 for each minute that elapses between the teleport and the casting.

Statistics: Detect (Teleportation; Accessibility, The caster must witness the teleportation, -15%; Analyzing, +100%; Nuisance Effect, Time Penalties, -20%; Sorcery, -15%) [15].

Train Animal

Keywords: Buff.

Full Cost: 49 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Truly Permanent.

You increase the animal's effective IQ for the purpose of training only (p. B458-459) by 1 per level of this spell up to the maximum of IQ 5. This spell is Truly Permanent – it cannot be dispelled, even with Remove Curse, and the effects do not stop working in no-mana zones.

Statistics: Affliction 1 (HT; Accessibility, Animals Only, -25%; Advantage, Train Animal 1, +100%; Extended Duration, Truly Permanent, +300%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Nuisance Effect, Cannot raise IQ past 5, -5%; Sorcery, -15%) [49]. *Note:* Each level of "Train Animal" is IQ+1 (Only for the purpose of training, -50%) [10].

Train Teleport

Keywords: Resisted (Will).

Full Cost: 160 points.

Casting Roll: Will. IQ to teleport.
Range: Touch.
Duration: Instantaneous.

A moving train that the caster is currently inside is teleported. Any cars that are connected with it are transported; any that have been disconnected are left behind. It must be shifted to a track that it can move along, but it need not be part of the same system. For example, a metro train could be moved to the track of the metro system of another city (if it is within range), but it cannot be sent to a normal train track. The train continues to travel at the same velocity. The IQ roll to teleport is not affected by distance, preparation time, extra FP spent on casting, and being unable to see the destination. While the caster is effectively teleporting the subject blind, this spell is based not on spatial coordinates but on actual knowledge of the destination. This normally requires an IQ-5 roll, but roll vs. IQ if the caster has Eidetic Memory or IQ+5 with Photographic Memory – aided by Talent in all cases.

On a success, the train appears at the target destination. On a failure, it goes nowhere and the caster strains his teleporting ability: he is at -5 to cast this spell again in the next 10 minutes. On a critical failure, the train arrives at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience the caster. In addition, the caster's spell temporarily "burns out" and will not function again for 1d hours.

Statistics: Affliction 1 (Will; Advantage, Train Teleport, +1,400%; Based on Will, +20%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%) [160]. *Note:* "Train Teleport" is Warp (Accessibility, Only to another place appropriate track, -20%; Accessibility, Requires knowledge of destination, -10%; Accessibility, Must move at full Move, -30%; Blind Only, -50%; Cosmic, Based on memory of destination rather than spatial coordinates, +50%; Extra Carrying Capacity, Extra-Heavy, +50%; Reliable 10, +50%) [140]. The +10 for Reliable cancels the -10 for no preparation.

Transfer Pregnancy

Keywords: Resisted (HT).
Full Cost: 39 points.
Casting Roll: Will. IQ to transfer.
Range: Touch.
Duration: Instantaneous.

This spell transfers an embryo or fetus from the mother or an artificial growth tank to another female's womb or growth tank. If both subjects fail to resist, the caster may try an immediate IQ roll to teleport the embryo or fetus. The caster must be touching both subjects to do so.

Statistics: Affliction 1 (HT; Accessibility, Only to transfer a fetus/embryo, -80%; Advantage, Transfer Pregnancy, +300%; Affects the embryo/fetus instead of the mother/tank, +0%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [39]. *Notes:* "Transfer Pregnancy" is Warp (Anchored, Other subject, -60%; Range Limit, Touch, -60%; Reliable +10, +50%) [30]. The +10 for Reliable cancels the -10 for no preparation.

Transfer Water

Keywords: None.
Full Cost: 30 points for level 1 + 5 points/additional level.
Casting Roll: IQ. Use Innate Attack (Gaze) to aim. Special casting time and cost.
Range: 100 yards to the origin point. Unlimited to the destination point.
Duration: Instantaneous, but see text.

This spell teleports a volume of water leading to another place you are able to see with your own eyes, or view remotely, or visualize clearly (which is only possible if you have visited it previously in person). You may make the volume of water teleport gradually at a set rate instead of teleporting all at once. The water can only be teleported from the higher to the lower elevation; it can't be made to flow uphill even via teleportation.

The casting takes the penalties and bonuses as per Warp (p. B97). On a failure, the spell fails appear and you strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, the teleportation occurs, but to the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

At level 1, you may transfer 120 lbs. of water (14.4 gallons). Each additional level up to 5 increases this limit by 20 lbs. (thus, Transfer Water 5 may transfer 200 lbs.) Each additional level after that increases the limit by 40 lbs.

Statistics: Affliction 1 (HT; Accessibility, Only to move water, -30%; Advantage, Transfer Water 1, +200%; Increased 1/2D, x10, +15%; May set the rate of transfer, +10%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* “Transfer Water 1” is Warp (Accessibility, Only downhill, -50%; Exoteleport, -50%; Magical, -10%; Modified Capacity, Static, 120 lbs., +30%) [20]. Each additional level improves Modified Capacity, Static by one step (+5%) [+5].

Transference Bolt

Keywords: Missile, Obvious.

Full Cost: 103 points.

Casting Roll: None. Use Innate Attack (Beam) to hit. Special casting cost (see below).

Range: 100 yards.

Duration: Instantaneous.

The caster releases a ray of mana that may immediately heal the target 1 FP per each *additional* FP spent to cast this spell (this spell may cost any amount of FP to cast, unlike normal spells), but only if it hits another spellcaster. This spell cannot increase the subject’s FP score above its normal maximum.

The flow of mana mentally stuns the target, even if the target is not a spellcaster. The target resists with Will + DR. Mind Shield adds to resistance against this spell. If the target fails to resist, the target suffers mental stun. On subsequent turns, they can recover normally by making an unpenalized IQ roll.

Statistics: Affliction 1 (Will; Based on Will, +20%; Increased 1/2D, 10x, +15%; Link, +10%; Sorcery, -15%) [13] + Healing (Accessibility, Only on spellcasters, -30%; Cosmic, No die roll required, +100%; Heals Fatigue Only, -0%; Link, +10%; Magical, -10%; Ranged, +40%; Visible, -10%; Xenohealing, Anything Animate, +100%) [90].

Transfigure Object

Keywords: Buff.

Full Cost: 103 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

The caster transforms the subject inanimate object into a different inanimate object of the same weight. It cannot shift back on his own; it must wait for the spell to expire or be dispelled. The caster may only learn the form of an object with which he is familiar. If the subject is destroyed, it immediately reverts to its native form (which will also be destroyed).

The subject gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Transfigure Object, +800%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [103]. *Notes:* “Transfigure Object” is Morph (Can Carry Objects, No Encumbrance, +10%; Magical, -10%; Mass Conservation, -20%; Unliving Forms Only, -0%) [80]. This spell costs 103 points for a racial template worth no more than the subject’s native racial template. A more powerful form costs 103 points plus 90% of the difference in cost between the subject’s native template and that of the other form. The caster may learn to affect more powerful subjects by investing more points into this spell. Usually the GM should not bother making racial templates for the objects, so it is safe to say that the spell costs 103 points.

Transform Body

Keywords: None.

Full Cost: 25 points or more; see text.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

Take the form of another sapient race. Each race is a different spell, to be learned separately. The caster may only learn the form of a race with which he is familiar. If he is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The caster retains his intelligence, but gains all the physical attributes of the new form. Note that FP are not increased for spellcasting purposes.

If the caster has a single Transform Body spell, it costs 25 points for a racial template worth no more than his native racial template. A more powerful form costs 25 points plus 90% of the difference in cost between the caster's native template and that of his other form. If the caster has multiple Transform Body spells, he pays full cost for the most expensive form. The less powerful forms cost a flat 25 points apiece. Minimum cost per form is still 25 points.

Statistics: Alternate Form (Reduced Time 4, +80%; Sorcery, -15%) [25].

Transform Object

Keywords: Buff.

Full Cost: 85 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster transforms the subject inanimate object into a different inanimate object of the same weight. It cannot shift back on his own; it must wait for the spell to expire or be dispelled. The caster may only learn the form of an object with which he is familiar. If the subject is destroyed, it immediately reverts to its native form (which will also be destroyed).

The subject gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Transform Object, +700%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [85]. *Notes:* "Transform Object" is Morph (Magical, -10%; Mass Conservation, -20%; Unliving Forms Only, -0%) [70]. This spell costs 85 points for a racial template worth no more than the subject's native racial template. A more powerful form costs 85 points plus 90% of the difference in cost between the subject's native template and that of the other form. The caster may learn to affect more powerful subjects by investing more points into this spell. Usually the GM should not bother making racial templates for the objects, so it is safe to say that the spell costs 85 points.

Transform Other

Keywords: Buff.

Full Cost: 31 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster transforms the subject into a creature of another sapient race. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.) Each form is a different spell, to be learned separately. The caster may only learn the form of a race with which he is familiar. If the subject is knocked out or killed, he immediately reverts to his native form (which will also be unconscious or dead).

The subject retains his intelligence, but gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Advantage, Transform Other, +150%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [31]. *Notes:* “Transform Other” is Alternate Form (Sapient Race; Can Carry Objects, No Encumbrance, +10%; Magical, -10%) [15]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so. This spell costs 31 points for a racial template worth no more than the subject’s native racial template. A more powerful form costs 31 points plus 90% of the difference in cost between the subject’s native template and that of the other form. The caster may learn to affect more powerful subjects by investing more points into this spell.

Transmogrification

Keywords: Buff.

Full Cost: 96 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The caster transforms the subject into an inanimate object of a similar weight. Clothing and gear weighing no more than his BL change with him. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.) The caster may only learn the form of an object with which he is familiar. If the subject is destroyed, he immediately reverts to his native form (which will also be unconscious or dead).

The subject retains his intelligence, but gains all the physical attributes of the new form.

Statistics: Affliction 1 (HT; Advantage, Transmogrification, +800%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [96]. *Notes:* “Transmogrification” is Morph (Can Carry Objects, No Encumbrance, +10%; Magical, -10%; Mass Conservation, -20%; Unliving Forms Only, -0%) [80]. If turned into a “usually on” magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so. This spell costs 96 points for a racial template worth no more than the subject’s native racial template. A more powerful form costs 96 points plus 90% of the difference in cost between the subject’s native template and that of the other form. The caster may learn to affect more powerful subjects by investing more points into this spell.

Transmute Metal

Keywords: None.

Full Cost: 8 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to convert one type of metal into another. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

If the product is worth more than what you started with, it’s unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign’s average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it’s destroyed or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Transmute Metal to Metal, +50%; Transmutation Only, -100%; Magical, -10%) [8/level].

Transmute Metal to Wood

Keywords: None.

Full Cost: 8 points/level.

Casting Roll: IQ.

Range: Touch.

Duration: 10 seconds or permanent; see text.

This spell allows you to turn metal into wood. To do so, touch the matter you wish to transform, take a Concentrate maneuver and roll vs. IQ. Success means you transform the matter successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

Transmutation costs 1 FP per use.

The final product can weigh up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on. This limits the weight of the matter being transformed.

If the product is worth more than what you started with, it’s unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign’s average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object, the item is unmade when the matter vanishes. If it’s destroyed or transformed (e.g., eaten), you can’t reclaim your points – they’re gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Transmute Metal to Wood, +50%; Transmutation Only, -100%; Magical, -10%) [8/level].

Transmute Rock to Lava

Keywords: Area (Fixed).

Full Cost: 96 points/level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

You transform a hex of a rocky floor, wall, or ceiling into hot lava, which will burn regardless of fuel for the next five minutes. When the duration runs out, lava reverts to being rock. The lava emanates intense heat, dealing 6d damage per level of the spell in the center of the area of effect. For creatures and objects within 16 yards, divide damage by the distance in yards between the target and the center of the effect.

Statistics: Burning Attack 6d (Area Effect, 16 yards, +200%; Dissipation, -50%; Environmental, Rock, -20%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Variable, +5%) [96/level].

Transparency

Keywords: Buff.

Full Cost: 12 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Makes an object transparent. The object's outlines remain visible and its physical characteristics remain unchanged (hardness, weight, etc.). The caster can choose to tint the object as he desires instead of making it colorless.

Statistics: Affliction 1 (HT; Accessibility, Only on objects, -10%; Advantage, Transparency, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [12]. *Note:* "Transparency" is Transparency (Magical, -10%) [1].

Transport via Plants

Keywords: None.

Full Cost: 45 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

You can touch a plant and teleport to any other plant of the same kind you are able to see with your own eyes, or view it remotely, or visualize it clearly (which is only possible if you have seen it previously in person). You can carry up to Medium Encumbrance when you travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5

30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you have a “second-hand” view of the destination, you are at -2 per level of removal. For instance, seeing it on TV or through someone else’s eyes would give -2, while seeing it on a television set that you are viewing through someone else’s eyes would give -4. There is an additional -2 to teleport to a place you have visited but cannot see.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere and strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any location you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds!

Statistics: Warp (Accessibility, Only to plants of the same kind, -25%; Extra Carrying Capacity, Medium, +20%; Requires Concentrate, -15%; Sorcery, -15%; Special Portal, Plant, -20%) [45].

Trap Magical Essence

Keywords: Resisted (Will + Magery).

Full Cost: 66 points for level 1 + 8 points/additional level.

Casting Roll: IQ. Special casting time (see below).

Range: Touch.

Duration: Truly Permanent.

This spell permanently removes transfers a part of a living creature’s magical essence to the caster. The caster must perform a ritual that lasts one hour. This requires unbroken physical contact with the creature, so it usually is only possible when the victim is helpless. The victim must be killed by the caster at the end of the ritual, then roll a Quick Contest of IQ against the victim’s Will + Magery (or Sorcery Talent). If the caster wins, total the victim’s character points in magical traits, such as Energy Reserve (Magical), Magery, Improved Magic Resistance, Sorcerous Empowerment, Sorcery Talent. Optionally, the GM may let the caster include *any* abilities with the Magical limitation. For every *full* 30 points, the caster gains one point to spend on those advantages only. However, the caster cannot gain more points this way from a single sacrifice than this spell’s level. In any case, the caster must spend these point immediately, but he may supplement them with unspent points. Points insufficient to buy anything are lost.

If the victim is resurrected, they’ll be missing character points equal to what the caster stole. Details are up to the GM. This needn’t involve the abilities noted above.

This spell’s effect is Truly Permanent – it cannot be dispelled, even with Remove Curse. However, a critical failure with this spell costs the *caster* a level of Sorcery Talent (or a level of Magery or Sorcerous Empowerment; this is up to the GM)!

Statistics: Affliction 1 (HT; Accessibility, Self Only, -50%; Cumulative, +400%; Extended Duration, Truly Permanent, +300%; Immediate Preparation Required, 1 hour, -75%; Nuisance Effect, Magery loss on critical failure, -10%; Requires a Quick Contest of IQ vs. Will + Magery, -15%; Sorcery, -15%; Special Enhancement 1, +80%; Trigger, Killing a living creature with magical abilities, -60%) [66]. **Notes:** The victim adding their Magery level to their resistance roll is a special feature. Each level of Special Enhancement is Variable Enhancement, Any 1-point trait, Only magical abilities (-20%), +80%. Each additional level adds further Special Enhancement (+80%) [+8].

Trapped Light

Keywords: Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

This spell creates intense bright light inside a piece of wood, a branch, or a large seed (such as an acorn). When it is cracked (at least 1 HP of damage), the light pours out. Any person or creature that looks directly at it rolls against HT to avoid being blinded for 1 second. Beings with Protected Vision resist at +5. When the blindness wears off, it turns to distracting phosphenes (-1 to IQ and DX rolls) for a period of seconds equal to the margin of failure.

If the object is not obstructed by anything large and opaque, it illuminates a circular area extending 8 yards. If it is blocked, the front hex is fully illuminated, and the light extends 10 yards (in a 90° wedge). This light cancels up to -5 in darkness penalties. The light is cancelled when the spell ends or the projecting object is destroyed.

Statistics: Affliction 1 (HT; Accessibility, Only on branches, pieces of wood, or large seeds, -40%; Advantage, Trapped Light, +360%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Note:* "Trapped Light" is Affliction 1 (HT; Area Effect, 8 yards, +150%; Attribute Penalty, IQ-1 and DX-1, +20%; Disadvantage, Blindness, +50%; Emanation, -20%; Fixed Duration on Blindness, +0%; Link, +10%; Magical, -10%; Reduced Duration on Attribute Penalty, 1/60, -35%; Reduced Duration on Blindness, 1/180, -40%; Trigger, Damage, -30%; Vision-Based, +150%) [35] + Illumination (Link, +10%; Magical, -10%; Trigger, Damage, -30%) [1].

Traumatic Weapon

Keywords: Weapon Buff.

Full Cost: 32 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell enhances a damaging weapon's blunt trauma (p. B379). In effect, the attack gains the Double Blunt Trauma modifier (p. B104). Crushing weapons do 1 HP of blunt trauma per 2 points of basic damage resisted by flexible armor. Cutting, impaling, and piercing ones cause 1 HP of blunt trauma per 5 points of basic damage. Other weapons only inflict 1 HP of blunt trauma per 10 points of basic damage.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Traumatic Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. *Notes:* "Traumatic Weapon" is 22 points, per *Enhances or Transforms an Existing Attack (GURPS Thaumatology: Sorcery*, p. 11). This spell is based on the Traumatic Blow imbue skill.

Tree Bark Armor

Keywords: Buff.

Full Cost: 29 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject of this spell must be standing with his back against a tree that is at least one SM larger than he is. This spell causes a sizeable expanse of bark to peel off and wrap around the subject, armoring him! The tree replaces its missing bark one minute later – and can be used again. The suit provides DR 5 to all locations except the face and feet; it weighs 25 lbs. This assumes a SM 0 subject;

multiply weight by x2 for SM +1, x5 for SM +2, x10 for SM +3, x20 for SM +4, x50 for SM +5, and so on. If the subject removes any part of the armor, the spell ends and all of it vanishes.

Statistics: Affliction 1 (HT; Accessibility, The subject of this spell must be standing with his back against a tree that is at least one SM larger than he is, -50%; Advantage, Tree Bark Armor, +200%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Nuisance Effect, Weight, -10%; Sorcery, -15%; Terminal Condition, Remove any part, -10%) [29]. *Note:* “Tree Bark Armor” is Damage Resistance 5 (No Face and Feet, -10%; Magical, -10%) [20].

Tree Stride

Keywords: None.

Full Cost: 30 points.

Casting Roll: IQ; Special casting time and FP cost.

Range: Self.

Duration: Instantaneous.

You can touch a tree and teleport to any other tree of the same kind you are able to see with your own eyes, or view it remotely, or visualize it clearly (which is only possible if you have seen it previously in person). You can carry up to Medium Encumbrance when you travel.

As a Concentrate maneuver make an IQ + Talent roll to cast this spell, modified as follows:

Distance: Distance penalties appear on the table below. If actual distance falls between two values, use the higher.

Distance	Penalty
10 yards	0
20 yards	-1
100 yards	-2
500 yards	-3
2 miles	-4
10 miles	-5
100 miles	-6
1000 miles	-7

Add an additional -1 for each 10x increase in distance.

Preparation Time: The amount of time taken to prepare for the teleport affects the IQ roll, as follows:

Preparation Time	IQ Modifier
None	-10
1 second	-5
2 seconds	-4
4 seconds	-3
8 seconds	-2
15 seconds	-1
30 seconds	0
1 minute	+1
2 minutes	+2
4 minutes	+3
8 minutes	+4
15 minutes	+5
30 minutes	+6
1 hour	+7
2 hours	+8
4 hours	+9
8 hours	+10

This table is *not* open-ended; +10 is the maximum possible bonus.

Removal: If you have a “second-hand” view of the destination, you are at -2 per level of removal. For instance, seeing it on TV or through someone else’s eyes would give -2, while seeing it on a television set that you are viewing through someone else’s eyes would give -4. There is an additional -2 to teleport to a place you have visited but cannot see.

Fatigue Points: Apply a bonus of +1 per additional FP spent. You must declare this before you roll, and you lose the FP whether you succeed or fail. You never have to spend FP, but it is usually a good idea if you must travel far or without much preparation.

On a success, you appear at your target destination. On a failure, you go nowhere and strain your teleporting ability: you are at -5 to cast this spell again in the next 10 minutes. On a critical failure, you arrive at the wrong destination. This can be anywhere the GM wishes! It need not be dangerous, but it should seriously inconvenience you. In addition, your spell temporarily “burns out” and will not function again for 1d hours.

You can cast this spell to evade attacks in combat. Once per turn, you may teleport to any location you can see within 10 yards, instantly. This is considered a dodge. Of course, the IQ + Talent roll will be at -10 for instant use, so you might want to spend FP to improve your odds!

Statistics: Warp (Accessibility, Only to trees of the same kind, -35%; Extra Carrying Capacity, Medium, +20%; Requires Concentrate, -15%; Sorcery, -15%; Special Portal, Tree, -25%) [30].

Treetop Blink

Keywords: None.

Full Cost: 20 points.

Casting Roll: IQ.

Range: Self.

Duration: Instantaneous.

While this spell is active, once per turn, you can “dodge” an incoming attack by teleporting away from it to the top of the tallest tree within 20 yards. It must be thick enough to support his weight. For simplicity, assume a typical tree has at least one limb that can support 50 lbs. per point of SM.

The person appears on a limb that is attached 3/4 of the way up the trunk. Assume the tree’s height is the maximum for that SM. That’s 21’ in the example, so the limb is approximately 16’ above the ground.

When the person appears, he must make a Body Sense roll to be able to do anything, but defending in the next turn. Those with Perfect Balance need not roll.

Statistics: Warp (Anchored, Nearest Treetop, -30%; Blink Only, -60%; Reliable 1, +5%; Sorcery, -15%) [20].

Tremorsense

Keywords: Buff.

Full Cost: 23 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject can detect the location and size of objects by sensing the vibrations in the ground around him. He can locate an opponent in the dark, but you cannot detect details (e.g., whether he is armed). In a perfectly still environment, he would be able to sense a barrier before he runs into it due to the vibrations caused by his own footsteps.

To use Tremorsense, the subject must make a Sense roll. Consult the *Size and Speed/Range Table* (p. B550) and apply separate bonuses for the target’s size and speed, and a penalty for the range to the target. A successful roll reveals the rough size, location, speed, and direction of movement of the target. It does not provide any information about the object’s shape, color, etc. Once the subject has detected something, he may target it with an attack. The modifiers that applied to his Sense roll also apply to his attack roll, but can never give him a bonus to hit.

If the subject is not touching the ground, this ability does not work at all! Likewise, floating enemies are invisible to Tremorsense.

Statistics: Affliction 1 (HT; Advantage, Tremorsense, +70%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. *Note:* “Tremorsense” is Vibration Sense (Environmental, Ground, -20%; Magical, -10%) [7].

Tremorsense Invisibility

Keywords: Buff.

Full Cost: 92 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

You make the subject invisible to tremorsense (Vibration Sense based on the contact with ground or ground-based Subsonic Hearing). The subject still makes noise, leaves footprints, and has a scent – and anything the subject is carrying (up to the Medium encumbrance) becomes invisible to tremorsense too. The subject gets a +9 to Stealth in any situation where being detected with tremorsense would matter, if he is carrying no more than his Medium encumbrance.

Statistics: Affliction 1 (HT; Advantage, Tremorsense Invisibility, +680%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [84]. *Note:* “Tremorsense Invisibility” is Invisibility (Tremorsense; Affects Machines, +50%; Can Carry Objects, Medium, +50%; Magical, -10%) [76].

True King

Keywords: Buff.

Full Cost: 68 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

Gives +4 to reactions from the subordinates, and +4 to the subject’s Administration, Broadsword, Detect Lies, Diplomacy, Intimidation, Leadership, Public Speaking, Savoir-Faire (any), Shortsword, Staff, Strategy, Tactics, and Two-Handed Sword rolls. The spell will have no effect if it is cast on a female subject.

Statistics: Affliction 1 (HT; Accessibility, Only on men, -20%; Advantage, True King, +540%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [68]. *Note:* “True King” is Talent 4 (Custom – 13 skills; Magical, -10%) [54].

True Seeing

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell allows the subject to see through illusions of any kind.

Statistics: Affliction 1 (HT; Advantage, True Seeing, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Notes:* “True Seeing” is See Invisible (Illusion; Magical, -10%) [14].

Trusted Fellow

Keywords: Buff.

Full Cost: 28 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.
Duration: 30 minutes.

Gives +4 to reactions from any sapient male beings with whom the subject is able to speak or make eye contact. The spell provides no benefits with females or non-sapient creatures and has no effect if cast on a female subject.

Statistics: Affliction 1 (HT; Accessibility, Only on men, -20%; Advantage, Trusted Fellow, +140%; Extended Duration, x10, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [28]. *Note:* "Trusted Fellow" is Charisma 4 (Accessibility, Only on men, -20%; Magical, -10%) [14].

Truthsayer

Keywords: Resisted (IQ).
Full Cost: 8 points.
Casting Roll: Will.
Range: Unlimited.
Duration: Instantaneous.

Perform a Quick Contest of caster's Will versus the subject's IQ (or Fast-Talk or Acting skill, if appropriate). Success lets the caster pinpoint if a phrase spoken in the last five minutes by the subject was a lie, or if the last statement uttered by the subject was a lie, caster's choice. The caster can voluntarily penalize his casting roll; for each -1 penalty to the roll, he can reach an additional 5 minutes into the past.

Statistics: Unusual Training (Detect Lies) + Detect Lies (H) Per (Based on Will, +20%; No Signature, +20%; Sorcery, -15%; Time Spanning, Past, (Reduced Range, 1/200, 5 minute intervals instead of 24 hour intervals, -70% Short-Range 2, -1 penalty for every 5 minutes back, -20%), +10%) [7].

Turn Blade

Keywords: None.
Full Cost: 15 points.
Casting Roll: IQ/2 + 3
Range: Self.
Duration: Instantaneous.

While this spell is active, the caster can create a momentary force to twist blades that strike them. For the purpose of this spell a blade is any melee weapon being used in a manner that inflicts cutting damage. When the caster is attacked by such a weapon, they may roll to cast this spell as an active defense. Success means that caster is hit with the flat of the blade, not the cutting edge, so the attack does crushing damage rather than cutting. In addition, the sudden, wrenching turn of the weapon makes it difficult to hold onto; the attacker must roll against ST with the following modifiers: +2 for a two-handed weapon; +2 once the attacker is aware that his target is protected by this spell; -1 per 2 points of basic damage that he rolled (to no worse than -5). On a failure, he drops his weapon! On success by 0-2, his weapon becomes unready. Success by 3+ causes him no ill effects.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Turn Blade, they cannot cast this spell until *all* FP are replenished.

Statistics: Damage Resistance 10 (Accessibility, Only to disarm, not break, -20%; Active Defense, -40%; Limited, Cutting blades, -60%; Link, +10%; Provides no DR, -100%; Reflection, Variant, +100%; Sorcery, -15%) [10] + Injury Tolerance (Damage Reduction 1.5; Active Defense, -40%; Limited, Cutting blades, -60%; Link, +10%; Magical, -10%) [5]. As a special effect, the reduced damage is treated as crushing for all purposes. The damage-to-disarm rule unifies those from p. 11 of *GURPS Gun Fu* and p. B401. Injury Tolerance 1.5 has a base cost of 25 points, by induction.

Turn Metal Blade

Keywords: None.

Full Cost: 25 points.

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can create a momentary force to twist metal blades that strike them. For the purpose of this spell a metal blade is any metal melee weapon being used in a manner that inflicts cutting damage. When the caster is attacked by such a weapon, they may roll to cast this spell as an active defense. Success means that the caster is hit with the flat of the blade, not the cutting edge, so the attack does crushing damage rather than cutting. In addition, the sudden, wrenching turn of the weapon makes it difficult to hold onto; the attacker must roll against ST with the following modifiers: +2 for a two-handed weapon; +2 once the attacker is aware that his target is protected by this spell; -1 per 2 points of basic damage that he rolled (to no worse than -10). On a failure, he drops his weapon! On success by 0-2, his weapon becomes unready. Success by 3+ causes him no ill effects.

If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Turn Blade, they cannot cast this spell until *all* FP are replenished.

Statistics: Damage Resistance 20 (Accessibility, Only to disarm, not break, -20%; Active Defense, -40%; Limited, Cutting metal blades, -80%; Link, +10%; Provides no DR, -100%; Reflection, Variant, +100%; Sorcery, -15%) [20] + Injury Tolerance (Damage Reduction 1.5; Active Defense, -40%; Limited, Cutting metal blades, -80%; Link, +10%; Magical, -10%) [5]. As a special effect, the reduced damage is treated as crushing for all purposes. The damage-to-disarm rule unifies those from p. 11 of *GURPS Gun Fu* and p. B401. Injury Tolerance 1.5 has a base cost of 25 points, by induction.

Turn Spirit

Keywords: Resisted (Will).

Full Cost: 30 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

This spell causes a spirit to retreat from the caster and be unwilling to come within 10 yards of him.

Statistics: Affliction 1 (Will; Accessibility, Only spirits, -40%; Based on Will, +20%; Disadvantage, Dread (10 yards), +57%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [30].

Twinkle

Keywords: None.

Full Cost: 5 points for level 1 + 4 points/additional level.

Casting Roll: IQ.

Range: 100 yards.

Duration: One minute.

You can summon a tiny light equivalent to full daylight; you may make this light manifest anywhere within 100 yards. The light is bright enough to eliminate all darkness penalties in a single hex. By concentrating, you can move this effect at up to (spell level) yards per second.

Statistics: Create Visible Light 1 (Accessibility, Limited to lighting a 1-yard radius for one minute, -100%; Magical, -10%; Ranged, +40%; Reduced Fatigue Cost 1, +20%) [5]. Additional levels add Mobile (+40%) [+4].

Twister

Keywords: Area (Fixed).

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

The sorcerer spins existing air into a tiny tornado that hurls people around and stirs up dust and debris. The caster may move the area at Move 1 with a Concentrate maneuver.

Roll 2d as for crushing damage, determine knockback, and then double the distance; however, the victim suffers no actual damage or blunt trauma from the effect – just the consequences of being hurled around. The knockback is *vertical*, so the victims may take falling damage. Each victim must make an HT roll at -1 per each 2 points of injury that he would've taken if this spell dealt actual damage or get -2 to DX for (20 – HT) minutes due to dizziness and disorientation.

In addition, the twister gives -4 to all vision rolls made through it.

Statistics: Crushing Attack 2d (Area Effect, 2 yards, +50%; Double Knockback, +20%; Environmental, Air, -5%; Link, +10%; Mobile 1, +40%; No Blunt Trauma, -20%; No Wounding, -50%; Persistent, +40%; Side Effect, -2 DX, +70%; Sorcery, -15%; Vertical Knockback, +50%) [29] + Obscure Vision 4 (Environmental, Air, -5%; Link, +10%; Magical, -10%; Mobile 1, +40%; Ranged, +50%) [15].

Twisting Terror

Keywords: Area (Fixed).

Full Cost: 25 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 5 seconds.

Conjures a small tornado that rips across the ground, smashing everything in its way. To place the effect at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the starting point. The twister appears there and cuts a swath one yard wide on the next turn, traveling one yard per level of this spell for the duration of this spell. The caster does not control the path – each turn, roll for Scatter (p. B414) to determine the direction moved.

Anyone the tornado would touch may attempt to dive for cover (p. B377) to get out of its path. Other active defenses are ineffective. Those who fail to get out of the way are pummeled with a 2d crushing attack; this is large-area injury (p. B400). Use double damage to calculate the amount of knockback, and *Scatter* to determine its direction.

Statistics: Crushing Attack 2d (Area Effect, 1 yard, +25%; Cosmic, Dive for Cover Only, +50%; Double Knockback, +20%; Fixed Duration, +0%; Mobile 1, +40%; Nuisance Effect, Uncontrollable, -10%; Persistent, +40%; Reduced Duration, ½, -5%; Sorcery, -15%) [25]. Further levels add more levels of Mobile (+40%) to the advantage [+4].

Ubiquitous Touchscreen

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

The caster's touch moves the pointer or cursor on the screen, as if he was using a mouse.

Statistics: Accessory (Mouse; Sorcery, -15%) [1].

Ultravision

Keywords: Buff.

Full Cost: 25 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell allows the subject to ultraviolet light, as if he had the Ultravision (p. B94) advantage.

Statistics: Affliction 1 (HT; Advantage, Ultravision, +90%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [25]. *Note:* "Ultravision" is Ultravision (Magical, -10%) [9].

Unbreakable Bones

Keywords: Buff.

Full Cost: 29 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

This spell makes bones of the subject nearly indestructible. Damage to limbs and extremities still causes injury, subject to the usual maximums, but the injury needed to cripple these body parts is twice normal; that is, the amount usually required to dismember. Crippling is at worst lasting; the subject never suffers permanent crippling or dismemberment (see pp. B421-422). Skull is similarly protected - blows to the skull or eyes are treated no differently than a blow to the face (except that an eye injury can still cripple that eye). Injury that destroys the subject's body (-10xHP) breaks his skeleton. This spell can only affect creatures with an internal skeleton.

Statistics: Affliction 1 (HT; Accessibility, Only on creatures with a skeleton, -10%; Advantage, Unbreakable Bones, +140%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [29]. *Note:* "Unbreakable Bones" is Injury Tolerance (Unbreakable Bones; Magical, -10%) [9] + Injury Tolerance (No Brain; Magical, -10%) [5].

Uncork

Keywords: None.

Full Cost: 1 point.

Casting Roll: None.

Range: Touch.

Duration: Instantaneous.

The caster touches a bottle and instantly uncorks it.

Statistics: Accessory (Corkscrew; Sorcery, -15%) [1].

Undeath after Death

Keywords: Buff.

Full Cost: 42 points.

Casting Roll: None. Use DX or unarmed combat skill to hit. Special casting time and cost.

Range: 100 yards.

Duration: Permanent.

The subject must be a living, willing creature with a skeletal structure. You tear off a piece of a creature's life force, corrupt it with negative energy and the power of undeath, then bind it back to the same creature's body. This process initiates a blasphemous transformation when the creature dies. The subject of this spell loses 2 levels of HT upon casting. When it dies, the corrupted life force initiates a slow change in its body, causing it to animate as a crypt spawn at the next sunset. If the creature's remains are destroyed, the Undeath after Death spell cannot bring it back as an undead. Even if the spell is dispelled before the subject dies (Dispel Magic does not work, but Remove Curse does), it still does not regain its lost HT.

This 10-minute-long ritual requires a piece of obsidian shaped like a heart, which is placed on the subject's chest, and a black onyx gem that must be placed in the subject's mouth. Both gemstones disintegrate after casting.

Statistics: Affliction 1 (HT; Accessibility, Living creatures with a skeletal structure, -15%; Advantage, Undeath after Death, +220%; Attribute Penalty, HT-2, modified by Extended Duration, Truly Permanent, +40%; Cosmic, Immune to Dispel Magic, +50%; Extended Duration, Permanent, +150%; Immediate Preparation Required, 10 minutes, -45%; Melee Attack, Reach C, -30%; No Signature, +20%; Sorcery, -15%; Trigger, Heart-shaped piece of obsidian, -30%; Trigger, Black onyx, -30%) [42]. **Note:** "Undeath after Death" is Alternate Form (Crypt Spawn; Backlash, Instant Death, -300%; Delay, Sunset after death, +0%; Extended Duration, Truly Permanent, +300%; Magical, -10%; Single Use, Triggered Upon Death, x1/5) [22].

Undergrowth Ambush

Keywords: Area (Leveled).

Full Cost: 47 points for level 1 + 15 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You can direct existing tree roots to entangle and restrain everyone within an area. It requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). The roots can only entangle a subject, if the subject is within 4 yards of a tree. The binding has ST 15 and lasts for 10 seconds, continuing to entangle new people who blunder into it. Those already caught grow more tightly entangled, with +1 to the ST of their bonds for each additional second they remain grappled. This spell has no effect on sapient plants.

The basic (47-point) version of this spell affects subjects in a two-yard radius. For each additional 15 points, you may double this radius. The GM must determine the maximum level allowed; 128 yards is recommended. You may always choose to omit specific targets from the area of effect.

Statistics: Binding 15 (Area Effect, 2 yards, +50%; Environmental, Roots, -40%; Persistent, +40%; Selective Area, +20%; Sorcery, -15%) [47]. The additional levels add more levels of Area Effect (+50%) [+15].

Underwater Weapon

Keywords: Weapon Buff.

Full Cost: 32 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell negates all penalties associated with using a melee or ranged weapon underwater, or in similar conditions where the presence of denser-than-air fluids make attacks more difficult and/or less effective. See *GURPS Fathom Five* in *Pyramid #3/26: Underwater Adventures* for a detailed treatment of underwater combat.

Reach and Bulk of affected weapons is limited by the spell level.

Level	Reach	Bulk
1	C	-
2	1	-1
3	2	-2
+1	+1	-1

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Underwater Weapon, +220%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [32]. **Notes:** "Underwater Weapon" is 22 points, per *Enhances or Transforms an Existing Attack* (GURPS

Thaumatology: Sorcery, p. 11). Each additional level removes -1 in penalties [+8]. This spell is based on the Underwater Strike imbue skill from *Pyramid #3-36*.

Underworld Imprisonment

Keywords: Resisted (Will).

Full Cost: 71 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell causes an interplanar crack to open beneath the subject – who must be atop a solid surface (ground, floor, etc.) – whereupon he is dragged to the Underworld, if he fails to resist. The subject is considered dead by the deities, his life stricken from mortal rolls. Attempts to summon him back will conjure his corpse or, on a critical failure, a hostile ghost or demon.

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Leaves no trace of the victim and his gear, +50%; Disadvantage, Fragile (Enhanced Unnatural), +100%; Environmental, Ground, -20%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [71].

Undo

Keywords: None.

Full Cost: 45 points/level.

Casting Roll: None. Use DX (at +4) to undo knots.

Range: 10 yards.

Duration: Instantaneous.

Unties knots and fastenings of any kind that could normally be undone by hand (but not locks). Roll against DX+4. (Add Talent, as usual.) This is an instantaneous attempt. The effective ST of this spell is equal to 4*spell level.

Statistics: Telekinesis 4 (One Task, Undoing, -60%; Reduced Time 10, +200%; Sorcery, -15%) [45]. Each additional level adds Telekinesis 4 (One Task, Undoing, -60%; Reduced Time 10, +200%; Sorcery, -15%) [+45]. *Note:* The +4 is the usual fine-work task bonus for undoing.

Unholy Weapon

Keywords: Weapon Buff.

Full Cost: 11 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Allows the weapon enchanted to ignore DR (Not vs. Evil) of some creatures, such as angels, archons, etc., and deal additional damage to creatures with Vulnerability to unholy weapons.

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Unholy Weapon, +10%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [11]. *Note:* “Unholy Weapon” is Unholy Touch (Magical, -10%) [1].

Unshape Soulmeld

Keywords: Resisted (HT).

Full Cost: 55 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

This spell instantly unshapes a single soulmeld shaped by the subject. The subject adds his Meldshaping Talent or Totemism Talent to his HT when resisting this spell. The unshaped soulmeld can be shaped again by the subject, if he wishes.

Statistics: Neutralize Incarnum (Accessibility, One soulmeld at a time, -5%; Based on HT, +20%; Interruption, -50%; Precise, +20%; Ranged, +40%; Sorcery, -15%) [55].

Unsummon

Keywords: Resisted (Will).

Full Cost: 55 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

You attempt to unravel summoning magic that holds a creature in this world. Roll a Quick Contest of your Will versus the subject's Will. If you win, the subject summoned creature suffers an incapacitating heart attack, and will die and disappear in minutes unless treated; see *Mortal Conditions* (p. B429).

Statistics: Affliction 1 (Will; Accessibility, Only on summoned beings, -30%; Based on Will, +20%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [55].

Use Item

Keywords: None.

Full Cost: 1 point or 4 points.

Casting Roll: None.

Range: Self.

Duration: Indefinite.

This spell lets the caster use "Usable only by mages" magic items, as if they had Magery 0. When Use Item ends, so do ongoing effects of the used items.

If Sorcery is the only magic system in use, then the caster becomes able to use enchanted items with "Requires Sorcery", as if he had a single level of Sorcerous Empowerment. Obviously, this spell is only useful when enchanted onto an item and given to a non-sorcerer. Unlike the Magery version, this does not cause ongoing effects to disappear when Use Item ends.

Statistics: Magery 0 (Accessibility, Only to use magic items, -75%; Nuisance Effect, Ongoing effects end if the spell ends, -5%; Sorcery, -15%) [1]. The Sorcery variant replaces it with Sorcerous Empowerment 1 (Accessibility, Only to use magic items, -75%; Costs Fatigue, 1 FP, -5%) [4].

Utterdark

Keywords: Area (Fixed).

Full Cost: 213 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Permanent.

You cover the whole planet with utter darkness. No one can see into the affected area, and no one within the affected area can see anything; see p. B394 for combat rules. The Dark Vision advantage lets you see through a Blackout spell, but Night Vision, Infravision, and Ultravision do not. To place the area at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area.

You cannot cast this spell, if the spell fails to cover the whole planet (the planetary radius must be lower than 10,435 yards; Earth's radius is 6,978 yards). This spell cannot be undone via Dispel Magic (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires Remove Curse (*GURPS Thaumatology: Sorcery*, p. 21), but the caster still has to find the center of the area in the dark!

Statistics: Obscure Vision 10 (All-or-Nothing, -10%; Area Effect, 32,768 yards, +700%; Cosmic, Immune to Dispel Magic, +50%; Extended, Infravision and Ultravision, +40%; Extended Duration, Permanent, +150%; Ranged, +50%; Sorcery, -15%) [213].

Vacuum

Keywords: Area (Leveled).

Full Cost: 73 points for level 1 + 20 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous (but see below).

The sorcerer instantly lowers the air pressure in the area to zero. All creatures within the area without any breathing gear or without Vacuum Support immediately lose 2d FP to suffocation. In addition, the rushing air deals them 1d crushing damage as large-area injury. The knockback is directed to the center of the area. The rush of air produces a loud clap; creatures that take damage must roll against HT at -1 per two points of injury or be deafened for (20 – HT) minutes and physically stunned (they can roll against HT every second to recover). Protected Hearing gives +5, Hard of Hearing gives +4, and those with Deafness are immune. If the caster is within the area, he must roll as well, but at +5. Creatures outside the area, but within a radius equal to twice the area's radius, take 6d crushing damage. It does not deal any actual damage or blunt trauma, but deals knockback directed to the center of the area.

This sudden change of pressure does not cause the bends or explosive decompression.

Statistics: Crushing Attack 1d (Area Effect, 2 yards, +50%; Environmental, Air, -5%; Hearing-Based on Side Effect, -20%; Link, +10%; Magical, -10%; No Signature, +20%; Side Effect, Deafness and Stunning, +70%; Variable, Area, +5%) [11] + Crushing Attack 3d (Area Effect, 4 yards ring, 2 yard empty center, +50%; Double Knockback, +20%; Environmental, Air, -5%; Link, +10%; Magical, -10%; No Blunt Trauma, -20%; No Signature, +20%; No Wounding, -50%; Variable, Area, +5%) [18] + Fatigue Attack 2d (Area Effect, 2 yards, +50%; Environmental, Air, -5%; Link, +10%; No Signature, +20%; Respiratory Agent, +50%; Sorcery, -15%; Suffocation, +0%; Variable, Area, +5%) [43] + Protected Hearing (Accessibility, Only versus own Vacuum, -80%) [1]. Additional levels add Area Effect to Affliction, Crushing Attacks, and Fatigue Attack (+50%) [+20].

Valiant Spirit

Keywords: Buff, Incarnum.

Full Cost: 55 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: 1 hour or until awoken. After the awakening, the spell's bonuses last for 3 minutes.

You bestow a soul of an ancient hero on the subject. The soul lies dormant within the subject's body, until the subject decides to awaken it with a Concentrate maneuver and a successful Will roll or until the duration expires, whichever comes first. While awoken, the soul's prescience grants the subject a +1 bonus to DX and Fearlessness 1 (p. B55). The caster may pay 1 additional point of essentia during the casting to increase the bonus to DX to +2 and the level of Fearlessness to 2.

Statistics: Affliction 1 (HT; Advantage, Valiant Spirit, +200%; Advantage, Valiant Spirit (Accessibility, Costs 1 ER, -10%), +180%; Delay, Triggered, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [55]. *Note:* "Valiant Spirit" is DX+1 (Magical, -10%) [18] + Fearlessness 1 (Magical, -10%) [2].

Vampiric Weapon

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 40 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell infuses a melee weapon with vampiric properties. This converts the injury the wielder inflicts with the weapon into a “life force drain” that can heal his own injuries. For every *full* 3 HP of injury the weapon inflicts on a *living* victim, the wielder heals 1 HP. He can’t raise his HP above normal. The draining rate increases with the spell level

Level	Drain
1	1 HP per full 3 HP of injury
2	1 HP per full 2 HP of injury
3	1 HP per 1 HP of injury

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Vampiric Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Vampiric Weapon” is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). Each additional level removes -5 in penalties [+40]. This spell is based on the Vampiric Weapon imbue skill.

Vengeful Armor

Keywords: Armor Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

The enchanted armor creates a backlash of force that redirects some of the force of incoming blows back at the source. The armor or shield reflects the damage that it stops back on the attacker, exactly as per the Reflection enhancement (p. B47).

The attacker gets no active defense the first time this happens, but defends normally thereafter.

This spell cannot be combined with Energizing Armor.

Statistics: Affliction 1 (HT; Accessibility, Only on armor, -20%; Advantage, Vengeful Armor, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Vengeful Armor” is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Vengeful Defense imbue skill from *Pyramid* #3-4.

Vengeful Staff

Keywords: Buff.

Full Cost: 20 points for level 1 + 6 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The spell imbues a handheld item with the one-time ability to explode when broken. Accidental breakage never sets off the blast, although it does end the enchantment. To blow up the item, the wielder must grasp it with one or more hands (not remotely, as via a Movement spell or Telekinesis), declare the intention to activate it, and take one second – a maneuver in combat – to destroy it. Dashing it against something hard and immovable counts as an attack, deals the object maximum swing damage for the user’s ST, and can benefit from All-Out Attack (Strong). Snapping it is considered a Ready maneuver, involves winning a Quick Contest of (ST - artifact’s DR) vs. (artifact’s HP), and can involve extra effort. A spell such as Shatter must be cast by touch using the usual Concentrate maneuver(s).

Alternatively, if the item is broken by enemy action while in the owner’s hands – e.g., by an attack powerful enough to shatter it when used to parry (*Parrying Heavy Weapons*, p. B376), or by a hostile spell – the wielder can attempt to initiate the blast with a simple Will roll.

However the blast is triggered, it’s a crushing explosion that does 6d x square root of (object weight in lbs. x 4) damage, but no more than 6d per level of this spell. The holder always suffers this

damage – there's no workaround – while everyone else divides damage by distance in yards from the holder (not triple that).

Statistics: Affliction 1 (HT; Accessibility, Objects Only, -10%; Advantage, Vengeful Staff 1, +60%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Nuisance Effect, Weight-Limited, -10%; Sorcery, -15%) [20]. *Notes:* Each level of "Vengeful Staff" is Crushing Attack 6d (Backlash, Instant Death, -300%; Emanation, -20%; Explosion 3, +150%; Trigger, Breakage, -10%) [6]. Additional levels add more levels of Vengeful Staff (+60%) [+6].

Venom Missile

Keywords: Missile, Obvious.

Full Cost: 17 points for level 1 + 8 points/additional level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

The caster launches a dose of poison from the container he's holding. Use Innate Attack (Projectile) to hit. This has 1/2D 1, Max 10, Acc 3. The spell does not provide the poison, and the poison used works normally. Thus, a contact poison must hit unarmored skin, a blood agent or a follow-up agent must hit an open wound, and an inhaled poison creates cloud where it hits. The spell uses up a dose of the poison.

At level one, this spell can only be used once per 10 seconds. Additional levels reduce this recharge time.

Level	Recharge	Point cost	Level	Recharge	Point cost
1	10 seconds	17 points	6	5 seconds	57 points
2	9 seconds	25 points	7	4 seconds	65 points
3	8 seconds	33 points	8	3 seconds	73 points
4	7 seconds	41 points	9	2 seconds	81 points
5	6 seconds	49 points	10	1 second	89 points

Statistics: Imbue 3 (Limited Skill Access, Project Blow, -80%) [8] + Unusual Training [1] + Project Blow (VH) DX+0 [8] modified with Accessibility, Only poisons, -50%; Cosmic, No die roll required, +100%; Magical, -10%; Reduced Range, 1/10, -30%; Required Poison, -10% for a final cost of 17 points. Additional levels add more skill [+8].

Venomous Intoxication

Keywords: Resisted (HT).

Full Cost: 45 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 30 minutes.

The caster transforms poison that affects the subject, or poison in the venom glands of a poisonous creature into alcohol! This disables all poisonous attacks of the subject, if they cost less than 50 points, and temporarily neutralizes the poisons affecting the subject, but makes him drunk (p. B428) instead. For some very persistent poisons this is only a delay. When the spell ends, the subject may experience a hangover (p. B440). This spell does not affect poisons introduced into the victim's body after the spell was cast.

Statistics: Affliction 1 (HT; Accessibility, Only on poisoned or poisonous creatures, -50%; Advantage, Venomous Intoxication, +140%; Drunk, +20%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Poisons, +50%; No Signature, +20%; Nuisance Effect, Does not affect poisons introduced after the casting, -10%; Sorcery, -15%) [45]. *Note:* "Venomous Intoxication" is Immunity to Poison (Magical, -10%) [14].

Vermin Control

Keywords: Resisted (Will).

Full Cost: 23 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single vermin (insect, worm, or other creepy-crawly thing) – or of one square yard of a swarm of smaller vermin. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only vermin with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for vermin with IQ 6 and Bestial. In addition to range penalties, your casting roll is at –1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Vermin only, -40%; Sorcery, -15%) [23].

Vexation

Keywords: Resisted (Will).

Full Cost: 29 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The caster makes the subject being less persuasive to a single other person. When that other person makes a reaction roll to determine his reaction towards this spell's subject, the roll gets a -5 penalty. The spell ends once this reaction roll is made.

Statistics: Affliction 1 (Will; Based on Will, +20%; Disadvantage, Vexation, +12%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [29]. *Note:* "Vexation" is Social Stigma (-5 penalty; Accessibility, Only against the secondary subject, -50%) [-12].

Vigil

Keywords: Buff.

Full Cost: 41 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 1 day.

This spell allows the subject to go without sleep for a day with no ill effects. This spell can only affect sapient beings.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Vigil, +180%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [41]. *Note:* "Vigil" is Doesn't Sleep (Magical, -10%) [18].

Vigor

Keywords: Buff.

Full Cost: 21 points for level 1 + 9 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You increase the target's HT by 1 per level of this spell for 3 minutes. This affects the FP, Basic Speed, but does not heal fatigue. Fatigue gained from this spell cannot be used for spellcasting.

Statistics: Affliction 1 (HT; Advantage, Vigor 1, +90%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. Additional levels add further Vigor to the Advantage enhancement (+90%) [+9]. *Note:* Each level of "Vigor" is HT 1 (Magical, -10%) [9].

Vine Arrow

Keywords: Weapon Buff.

Full Cost: 43 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell converts a damaging ranged weapon's attack into a Binding (p. B40). The projectile trails vines, tying up the target. Roll the usual damage dice and read the result as the Binding's ST – no actual damage occurs. The Binding's DR is ST/3, rounded down.

Statistics: Affliction 1 (HT; Accessibility, Only on ranged weapons, -30%; Advantage, Vine Arrow, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [43]. *Notes:* "Vine Arrow" is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Binding Shot imbuelement skill.

Vine to Snake

Keywords: None.

Full Cost: 18 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite.

Transforms a vine touched by you into a rattlesnake (p. B458) that does your mental bidding while it exists. If the snake is killed, the summoner must wait a full day to call replacements. Dismissing the snake is a free action, but you may only dismiss it if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the snake's.

Statistics: Ally (Rattlesnake; Built on 50%; Constantly, no roll required; Conjured, +100%; Minion, +50%; Requires a vine, -10%; Sorcery, -15%) [18].

Viper Arrow

Keywords: Obvious.

Full Cost: 12 points/level.

Casting Roll: None. Use Bow or Crossbow to hit.

Range: Self.

Duration: Instantaneous, the snake injects poison for five seconds.

This spell is cast when firing a projectile from a bow or crossbow. The missile does its regular damage, plus 1d toxic follow-up damage per level. If it penetrates DR, it turns into a viper stuck in the victim. Starting on your next turn, it automatically deals half of its toxic damage once per turn until removed or until five such poison injections were made.

To remove the snake, a medic (or the victim) must first partially remove any armor or clothing at the affected hit location. This halves DR until donned again and requires a Ready maneuver and a successful DX roll. The viper has DR 0, SM-6, ST 2, and Dodge 9. The victim (or the medic) can grapple it, then pull it off with a Ready maneuver. Once removed, the snake transforms back into a normal projectile.

Statistics: Toxic Attack 1d (Follow-Up, Bow or crossbow, +30%; Link, Toxic Attack, +10%; Sorcery, -15%) [5/level] + Toxic Attack 1d-2 (Breakable, DR 0, SM-6, -30%; Cyclic, Variant, five 1-second cycles, can be removed, +250%; Follow-Up, Bow or crossbow, +30%; Link, Initial Toxic Attack, +10%; Magical, -10%) [7/level].

Vision of Doom

Keywords: Resisted (IQ).

Full Cost: 89 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Permanent, see text.

Shows the subject (who must be living, mortal, and sapient) the worst possible fate he might face. This spell bypasses Fearlessness, Mind Shield, Unfazeable, and other defensive advantages, and cracks the subject's sanity.

On a failed resistance roll, the victim goes mad and immediately tries to kill himself to avoid the revealed fate, in the most expedient way his environment and resources allow. Each failed suicide allows a new resistance roll to break the curse; otherwise, the only way to lift it is to die or receive a Remove Curse spell (Dispel Magic does not work), though the victim can be disabled or granted a temporary reprieve by Relieve Madness.

Statistics: Affliction 1 (IQ; Accessibility, Only on living, mortal, sapient beings, -15%; Based on IQ, +20%; Cosmic, Immune to Dispel Magic, +50%; Cosmic, Irresistible Attack, +300%; Heart Attack, Variant, +300%; Malediction 2, +150%; No Signature, +20%; Nuisance Effect, New resistance roll on a failed suicide attempt, -20%; Sorcery, -15%) [89].

Vital Seeker

Keywords: Weapon Buff.

Full Cost: 15 points or more.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The weapon is enchanted to seek out important targets. It gets a +1 bonus per level of this spell (maximum 3) that offsets hit location penalties for targeting vitals (including through chinks in armor).

Level	Cost
1	15 points
2	19 points
3	24 points

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Vital Seeker 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [15]. Each additional level adds more levels of Vital Seeker. *Note:* Each level of "Vital Seeker" is Higher Purpose 1 (Hit vitals; Magical, -10%) [5].

Void Bolt

Keywords: Missile, Obvious.

Full Cost: 41 points/level.

Casting Roll: None. Use Innate Attack (Projectile) to hit.

Range: 100 yards.

Duration: Instantaneous.

You throw a ball of pure magical energy at a single target. Use Innate Attack (Projectile) to hit, applying normal range penalties. It does 2d cosmic crushing damage per level of this spell. This spell ignores DR, protective spells, and can affect insubstantial beings. The GM must determine what the maximum level available in the campaign is. This spell has Acc 4, unlike most other missile spells.

Statistics: Crushing Attack 2d (Accurate 1, +5%; Affects Insubstantial, +20%; Cosmic, Irresistible Attack, +300%; Sorcery, -15%) [41/level].

Volatility

Keywords: Resisted (Will).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute or until a self-control roll is attempted, whichever comes first.

The subject, who must be a sapient being, gains a penalty equal to his margin of failure to their next self-control roll (pp. B120-121).

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Reduced Duration, 1/3, -10%; Sorcery, -15%; Volatility 1, Margin-Based, Single-Use, +6%) [27].

Volcanic Rain

Keywords: Area (Leveled).

Full Cost: 153 points for level 1 + 17.5 points/additional level*.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 seconds.

You cause drops of lava to pelt an area. Use Innate Attack (Gaze), at +4, to center the area; see *Scatter* (p. B414) if you miss. Everyone who spends even part of their turn in the area is attacked with an effective skill of 12, modified only for their SM. Anyone hit takes 3d(0.2) burning damage each second for 6 seconds. This cyclic damage can be stopped by extinguishing the flames. Victims may raise their shields as cover, at the risk of damaging them (p. B484). You may always choose (when casting) to scale back the area affected.

This spell also fills the area with bad smelling sulfuric smoke. This gives -5 to all vision rolls made through it. The cloud drifts from the origin point of the spell with the wind. Additionally, every creature that inhales the cloud, begins to cough (is at -3 to DX and -1 to IQ, and cannot use Stealth) for 3 minutes, if it fails a HT roll.

Statistics: Burning Attack 3d (Area Effect, 2 yards, +50%; Armor Divisor, (0.2), -50%; Bombardment, Skill-12, -10%; Cyclic, 5 1-second cycles, +500%; Extended Duration, 3x, +20%; Link, +10%; Overhead, +30%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%) [102] + Obscure Vision 5 (Drifting, +20%; Extended Duration, 3x, +20%; Link, +10%; Magical, -10%; Ranged, +50%; Variable, Area, +5%) [20] + Affliction 1 (HT; Area Effect, 2 yards, +50%; Coughing, +20%; Drifting, +20%; Extended Duration on Persistent, 3x, +20%; Fixed Duration, +0%; Link, +10%; Magical, -10%; Persistent, +40%; Respiratory Agent, +50%; Variable, Area, +5%) [31]. Improved versions add Area Effect (+50%/level) to all advantages [+17.5*].

* Calculate the total cost, then round up.

Volcano

Keywords: Area (Special).

Full Cost: 54 points for level 1 + 39 points/additional level.

Casting Roll: IQ. Special casting time.

Range: 100 yards.

Duration: One day.

Causes vapor and lava to spew from a chosen spot of ground. This is not a quick spell, but it is very serious! The volcano starts out small – a small hole spitting stones and vapors – and increase its diameter by a couple of yards per day, if the caster casts it repeatedly. The first effects become visible one hour after the casting, but multiple successive castings are required to create a fully functional

volcano. The caster must concentrate for 8 hours every day to keep the volcano growing. This spell can also reactivate a dormant volcano. When the spell is allowed to lapse, the volcano ceases to grow and will soon die (a formerly dormant volcano may stay active at the GM's discretion).

The first level of this spell can create a volcano 10 yards in radius. Every additional level adds one yard to this. Or, to put it another way, the volcano can have an area equal to (spell level)+9 yards in radius.

Statistics: Control Terrain (Accessibility, Only to create a volcano, -30%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 10,000x, +160%; Immediate Preparation Required, 8 hours, -90%; Nuisance Effect, Grows slowly, -15%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [54]. Additional levels add Control Terrain (Accessibility, Only to create a volcano, -30%; Cannot concentrate to extend duration, -10%; Extended Duration on Persistent, 10,000x, +160%; Immediate Preparation Required, 8 hours, -90%; Nuisance Effect, Grows slowly, -15%; Only increases area of effect, -50%; Persistent, +40%; Ranged, +40%; Sorcery, -15%) [39/level].

Vorpal Weapon

Keywords: Weapon Buff.

Full Cost: 18 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

Once cast upon a weapon, this spell causes it to do an additional 3d of follow-up (p. B105) cutting damage on neck hits, but only if the weapon deals cutting damage. This additional damage causes no blunt trauma and no knockback. Additionally, the wielder of the weapon gets a +1 bonus to his weapon skill when making cutting attacks that target necks.

Statistics: Affliction 1 (HT; Accessibility, Only on cutting weapons, -40%; Advantage, Vorpal Weapon, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [18]. *Note:* "Vorpal Weapon" is Cutting Attack 3d (Accessibility, Only on neck hits, -40%; Follow-Up, This weapon, +0%; Magical, -10%; No Blunt Trauma, -20%; No Knockback, -10%) [5] + Higher Purpose (Cut necks with this weapon; Magical, -10%) [5].

Vortex Ring

Keywords: Area (Fixed), Missile, Obvious.

Full Cost: 3 points.

Casting Roll: None. Use Innate Attack (Projectile) to aim.

Range: 20 yards.

Duration: Instantaneous.

The sorcerer conjures a vortex ring and send it through the air. This spell has no 1/2D, but it only works in the presence of air. This is a wide attack that covers an entire hex. Thus, it is aimed at a hex at +4, and it can only be dodged like an area attack. It deals 1d-3 crushing damage, doubled for the purpose of knockback, on direct collision with a solid target. However, it can bounce from a glancing impact.

To perform a ricochet shot, the sorcerer must be able to see the target clearly or know its *exact* position. The attacker must then describe the path the attack will take, bouncing it off as many surfaces as he likes. Ignore DR, HP, and angles of the surfaces; all that matters is that they are convincingly "hard." Figure the range penalty using the total path length to the target (not a straight line). If spotting the target required a penalized Sense roll, apply that penalty to the attack roll, too. And finally, there's an additional -2 per bounce.

If the attack roll succeeds, it may manage to surprise the target completely – there's no defense roll against an unexpected attack suddenly bouncing around the corner! If he's able to see the attack coming – even if it bounces behind him first – he may still defend, but at -1 per bounce. The attack does full damage if it hits.

Statistics: Crushing Attack 1d-3 (Area Effect, 1 yard, +25%; Double Knockback, +20%; Environmental, Air, -5%; Increased 1/2D, 10x, +15%; Reduced Range, 1/5, -20%; Ricochet, +10%; Sorcery, -15%) [3].

Walk on Air

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Air, smoke, and other gases are like solid ground beneath subject's feet, allowing it to walk up and down "invisible stairs" at its ground Move. This won't work in a vacuum – there has to be some kind of air present. If the subject gets knocked down or slips, it falls! The subject may attempt one DX roll per second of falling. If it succeeds, it stops in thin air, unharmed. Otherwise, it hits the ground for normal falling damage (see *Falling*, p. B431).

Statistics: Affliction 1 (HT; Advantage, Walk on Air, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Note*: "Walk on Air" is Walk on Air (Magical, -10%) [18].

Walk on Dust

Keywords: Buff.

Full Cost: 22 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Airborne dust is like solid ground beneath subject's feet, allowing them to walk on them at their ground Move. If the subject gets knocked down or slips, they fall! The subject may attempt one DX roll per second of falling. If they succeed, they stop in the dust, unharmed, if there is still any dust beneath them. Otherwise, they hit the ground for normal falling damage (see *Falling*, p. B431).

Statistics: Affliction 1 (HT; Advantage, Walk on Dust, +100%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [22]. *Notes*: "Walk on Dust" is Walk on Air (Magical, -10%; Specific, Dust, -40%) [10].

Walk on Fluid

Keywords: Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

Air, smoke, and other gases are like solid ground beneath subject's feet, allowing it to walk up and down "invisible stairs" at its ground Move. This won't work in a vacuum – there has to be some kind of air present. If the subject gets knocked down or slips, it falls! The subject may attempt one DX roll per second of falling. If it succeeds, it stops in thin air, unharmed. Otherwise, it hits the ground for normal falling damage (see *Falling*, B431).

In addition, the subject can walk on the surface of any liquid as if it were solid ground. He moves at his usual ground Move. This doesn't protect him from any damage that he would take from coming into contact with the liquid, however. He can't traverse volcanic lava or boiling acid without taking damage!

Statistics: Affliction 1 (HT; Advantage, Walk on Fluid, +320%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Note*: "Walk on Fluid" is Walk on Air (Magical, -10%) [18] + Walk on Liquid (Magical, -10%) [14].

Walk on Water

Keywords: Buff.

Full Cost: 26 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject can walk on the surface of any liquid as if it were solid ground. He moves at his usual ground Move. This doesn't protect him from any damage that he would take from coming into contact with the liquid, however. He can't traverse volcanic lava or boiling acid without taking damage!

Statistics: Affliction 1 (HT; Advantage, Walk on Water, +140%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [26]. *Note:* "Walk on Water" is Walk on Liquid (Magical, -10%) [14].

Walk Through Metal

Keywords: Buff.

Full Cost: 58 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Nine minutes.

This spell allows the subject to pass through metal as if they were not even there. He does not automatically sink into the ground; the metal beneath his feet is as solid as he wishes it to be. He will need to hold his breath on long trips (this spell does not provide air) and gains no special ability to see through metal. He may carry up to Light encumbrance while doing this.

Statistics: Affliction 1 (HT; Advantage, Walk Through Metal, +440%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [58]. *Note:* "Walk Through Metal" is Permeation (Metal; Can Carry Objects, Light Encumbrance, +20%; Magical, -10%) [44].

Walk Through Plants

Keywords: Buff.

Full Cost: 21 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject does not suffer DX or Move penalties for traversing through undergrowth, bushes, or other dense vegetation.

Statistics: Affliction 1 (HT; Advantage, Walk Through Plants, +50%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [21]. *Note:* "Walk Through Plants" is Terrain Adaptation (Dense Vegetation; Magical, -10%) [5].

Walk Through Water

Keywords: Buff.

Full Cost: 36 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Nine minutes.

This spell allows the subject to pass through water, snow, and ice as if they were not even there. He does not automatically sink to the bottom of bodies of water; the water beneath his feet is as solid

as he wishes it to be. He will need to hold his breath on long trips (this spell does not provide air) and gains no special ability to see through water. He may carry up to Light encumbrance while doing this.

Statistics: Affliction 1 (HT; Advantage, Walk Through Water, +220%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [36]. *Note:* "Walk Through Water" is Permeation (Water; Can Carry Objects, Light Encumbrance, +20%; Magical, -10%) [22].

Walk Through Wood

Keywords: Buff.

Full Cost: 58 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Nine minutes.

This spell allows the subject to pass through wood (dead or alive) as if it was not even there. He does not automatically sink into the wood; the wood beneath his feet is as solid as he wishes it to be. He will need to hold his breath on long trips (this spell does not provide air) and gains no special ability to see through wood. He may carry up to Light encumbrance while doing this.

Statistics: Affliction 1 (HT; Advantage, Walk Through Wood, +440%; Extended Duration, 3x, +20%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [58]. *Note:* "Walk Through Wood" is Permeation (Wood; Can Carry Objects, Light Encumbrance, +20%; Magical, -10%) [44].

Wall of Fire

Keywords: Obvious.

Full Cost: 30 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a transparent wall of fire. You do not have to concentrate to maintain it, Wall of Fire is "fire and forget." It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall dissipates once the duration runs out.

To find the maximum square yardage available, look up the level of this spell on the Levelled Area Table (*GURPS Thaumatology - Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Fire 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Fire 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Anything crossing the wall takes 2d burning damage.

Statistics: Burning Attack 2d (Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [30]. Additional levels increase Area Effect (+50%) [+5].

Wall of Ice

Keywords: Obvious.

Full Cost: 29 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a translucent wall of ice. You do not have to concentrate to maintain it, Wall of Ice is "fire and forget." It can be cast repeatedly, allowing the sorcerer to put up multiple walls as

needed, but each wall has a certain number of HP and dissipates once those are exceeded (or the duration runs out).

To find the maximum square yardage available, look up the level of this spell on the Levelled Area Table (*GURPS Thaumatology - Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Ice 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Ice 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Each wall has DR 6 and HP 1. A square yard of a wall melts naturally in 3 minutes, if the temperature is above freezing.

Statistics: Crushing Attack 2d (Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Melts Naturally, -10%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [29]. Additional levels increase Area Effect (+50%) [+5].

Wall of Incarnum

Keywords: Incarnum. Obvious.

Full Cost: 35 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell creates an opaque blue wall of incarnum. You do not have to concentrate to maintain it, Wall of Incarnum is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall dissipates once the duration runs out.

To find the maximum square yardage available, look up the level of this spell on the Levelled Area Table (*GURPS Thaumatology - Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Incarnum 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Incarnum 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Anything crossing the wall loses 1d points of essentia.

This spell can only be cast by spending an essential point instead of FP.

Statistics: Fatigue Attack 1d (Area Effect, 2 yards, +50%; Cosmic, Affects Essentia, +50%; Costs Essentia, -5%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [35]. Additional levels increase Area Effect (+50%) [+5].

Wall of Iron

Keywords: Obvious.

Full Cost: 60 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a wall of iron. You do not have to concentrate to maintain it, Wall of Iron is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall has a certain number of HP and dissipates once those are exceeded (or the duration runs out).

To find the maximum square yardage available, look up the level of this spell on the Levelled Area Table (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Iron 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Iron 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Each wall has DR 12 and HP 2.

Statistics: Crushing Attack 4d (Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [60]. Additional levels increase Area Effect (+50%) [+10].

Wall of Light

Keywords: Area (Leveled).

Full Cost: 32 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may encircle a two-yard-radius area with a 4-yard tall wall of light. This wall completely blocks vision and Infravision, but does nothing else. Bright Vision allows one to see through the wall. To place the wall at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect.

Statistics: Obscure Vision 10 (Extended, Infravision, +20%; Only around the border of the area, -0%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [32]. Further levels add Area Effect (+50%) to the advantage [+10].

Wall of Lightning

Keywords: Obvious.

Full Cost: 45 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a transparent wall of lightning. You do not have to concentrate to maintain it, Wall of Lightning is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall dissipates once the duration runs out.

To find the maximum square yardage available, look up the level of this spell on the Leveled Area Table (*GURPS Thaumatology - Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Lightning 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Lightning 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Anything crossing the wall takes 2d burning surge damage. Metallic armor counts as DR 1 against this attack, but nonmetallic armor protects normally. Targets stuck by this attack must make an HT roll, at -1 per 2 points of penetrating damage, or be physically stunned. On subsequent turns, they can roll HT to recover.

Statistics: Burning Attack 2d (Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Surge, Arcing, +100%; Side Effect, Stunning, +50%; Variable, Area, +5%; Wall, Shapeable, +60%) [45]. Additional levels increase Area Effect (+50%) [+5].

Wall of Smoke

Keywords: Area (Leveled).

Full Cost: 32 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 10 seconds.

You may encircle a two-yard-radius area with a 4-yard tall wall of smoke. This wall completely blocks vision and Infravision, but does nothing else. To place the wall at a distance, use Innate Attack (Gaze), with normal range penalties, but at +4 for affecting an area. The initial attack roll places the effect.

Statistics: Obscure Vision 10 (Extended, Infravision, +20%; Only around the border of the area, -0%; Ranged, +50%; Sorcery, -15%; Variable, Area, +5%) [32]. Further levels add Area Effect (+50%) to the advantage [+10].

Wall of Stone

Keywords: Obvious.

Full Cost: 140 points for level 1 + 25 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a wall of stone. You do not have to concentrate to maintain it, Wall of Stone is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall has a certain number of HP and dissipates once those are exceeded (or the duration runs out).

To find the maximum square yardage available, look up the level of this spell on the Levelled Area Table (*GURPS Thaumatology - Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Stone 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Stone 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Each wall has DR 30 and HP 5. The DR is semi-ablative - every 10 points of basic damage rolled removes one point of DR, regardless of whether the attack penetrates DR.

Statistics: Crushing Attack 10d (Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Persistent, +40%; Semi-Ablative, -20%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [140]. Additional levels increase Area Effect (+50%) [+25].

Wall of Thorns

Keywords: Obvious.

Full Cost: 30 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell creates a barrier of very tough, pliable, tangled brush bearing needle-sharp thorns as long as a human’s finger. You do not have to concentrate to maintain it, Wall of Thorns is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall has a certain number of HP and dissipates once those are exceeded (or the duration runs out).

To find the maximum square yardage available, look up the level of this spell on the Levelled Area Table (*GURPS Thaumatology - Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Thorns 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Thorns 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Each wall has DR 6 and HP 1. Creatures crashing into the wall take piercing damage.

Statistics: Piercing Attack 2d (Area Effect, 2 yards, +50%; Extended Duration, 30x, +60%; Persistent, +40%; Sorcery, -15%; Variable, Area, +5%; Wall, Shapeable, +60%) [30]. Additional levels increase Area Effect (+50%) [+5].

Wall of Wind

Keywords: Obvious.

Full Cost: 80 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Five minutes.

This spell conjures a wall of wind. You do not have to concentrate to maintain it, Wall of Wind is “fire and forget.” It can be cast repeatedly, allowing the sorcerer to put up multiple walls as needed, but each wall dissipates once the duration runs out.

To find the maximum square yardage available, look up the level of this spell on the Leveled Area Table (*GURPS Thaumatology: Sorcery*, p. 9) and multiply the given radius by 3. Alternatively, know that Wall of Wind 1 has a maximum area of six square yards, with each additional level doubling that cumulatively. For example, Wall of Wind 3 has a limit of 24 square yards, allowing the sorcerer to conjure a wall six yards long by four yards high, 12 yards long by two yards high, or any other valid combination. The caster may form this into any shape he wishes.

Low-tech missiles are buffeted off course as they cross the wall, and suffer a -6 penalty to hit. High-tech bullets suffer a -2 penalty to hit. Any creature trying to cross the wall, takes 4d knockback damage in a random direction. The wall also churns up loose ground material, such as dust, small leaves, insects, and twigs, if there are any in the area. Thus, any creatures crossing the wall must make a HT roll or be blinded for 3 seconds. Simply closing the eyes protects against this effect.

Statistics: Affliction 1 (HT; Area Effect, 2 yards, +50%; Disadvantage, Blindness, +50%; Environmental, Debris present, -20%; Extended Duration, 30x, +60%; Fixed Duration, +0%; Link, +10%; Persistent, +40%; Reduced Duration, 1/60, -35%; Sorcery, -15%; Variable, Area, +5%; Vision-Based, +150%; Wall, Shapeable, +60%) [46] + Crushing Attack 2d (Area Effect, 2 yards, +50%; Cosmic, Impedes Missile, +50%; Double Knockback, +20%; Extended Duration, 30x, +60%; Link, +10%; Magical, -10%; No Wounding, -50%; Persistent, +40%; Variable, Area, +5%; Wall, Shapeable, +60%) [34]. Additional levels increase Area Effect (+50%) to both advantages [+10].

Wallwalker

Keywords: Buff.

Full Cost: 30 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

The subject can walk or crawl on walls and ceilings. He can stop at any point and stick to the surface without fear of falling. Neither feat requires a roll against Climbing skill, provided the surface is one he can cling to. Move while clinging is half his Basic Move.

If the subject is falling and tries to grab a vertical surface to break his fall, the GM must first decide whether there is anything in reach. If there is, the subject makes a DX roll to touch the surface, and then makes a ST roll at -1 per 5 yards already fallen. If he succeeds, he stops his fall. Otherwise, he continues to fall – but he may subtract 5 yards from the height of the fall thanks to the slowing effect of the failed clinging attempt. Variations in gravity affect these distances; e.g., in 0.5G, the ST roll would be at -1 per 10 yards.

Statistics: Affliction 1 (HT; Advantage, Wallwalker, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [30]. *Note:* “Wallwalker” is Clinging (Magical, -10%) [18].

Ward

Keywords: None.

Full Cost: 43 points or fewer.

Casting Roll: IQ/2 + 3

Range: Self.

Duration: Instantaneous.

When this spell is active, the caster can attempt to cast this spell as an active defense, when somebody casts a spell that affects them or their personal equipment *directly*. Thus, Ward does not protect against missile spells. A successful casting nullifies the effects of the spell on the caster. To counter a given spell, the caster must also know the spell (or its close sorcerous equivalent if countering

a spell using some other magic system) they are countering, i.e. be able to cast it as a known spell or via normal or hardcore improvisation.

The casting roll is modified by Talent and Combat Reflexes. If the caster tries to cast Ward more than once in a turn, the casting roll takes a cumulative -4 penalty per attempt after the first. The caster rolls at -4 if stunned and cannot cast Ward in situations where they would not get an active defense. If the casting fails, all future castings cost an additional 1 FP until the next successful casting. If the caster drops to 3 FP or less from casting Ward, they cannot cast this spell until *all* FP are replenished. This spell does not count as an active defense for the purpose of cumulative defense penalties.

Statistics: Static (Magic; Accessibility, Only spells the caster could cast, -5%; Active Defense, -40%; Sorcery, -15%; Switchable, +100%) [42] + Rules Exemption (Magical abilities can coexist with anti-magical Static) [1]. *Notes:* Active Defense being IQ-based is a special feature. The limitation value of Accessibility, Only spells the caster could cast is equal to -5% if the caster's Sorcerous Empowerment is not limited in scope. If their Sorcerous Empowerment has the Limited Colleges or Limited Scope limitation, increase the value by the same number. Thus, this spell costs 40 points if the caster is limited to four colleges or the equivalent, 37 points if they are limited to three colleges, 24 points if they are limited to two colleges, and 31 points if they are limited to a single college.

Warm

Keywords: Area (Leveled).

Full Cost: 7 points for level 1 + 5 points/additional level (or more).

Casting Roll: None.

Range: 100 yards.

Duration: Indefinite.

This spell raises the ambient temperature of the area. The basic version can increase the temperature by up to 40°F. This will never do damage directly, but see Heat (p. B434) for effects.

More potent versions of Warm exist. Increasing the full cost of the spell increases the degree of potential temperature change by the same factor, as indicated by the table below.

Spell Strength	Full Cost
Warm (40°F)	7 points for level 1 + 5 points/additional level.
Warm (80°F)	14 points for level 1 + 10 points/additional level.
Warm (120°F)	21 points for level 1 + 15 points/additional level.
Warm (160°F)	28 points for level 1 + 20 points/additional level.
Warm (200°F)	35 points for level 1 + 25 points/additional level.

Statistics: Temperature Control 2 (Heat, -50%; Increased Range, 10x, +30%; Sorcery, -15%; Variable, Area, +5%) [7]. Additional levels add Area Effect (+50%) [+5]. The expanded versions raise the Temperature Control level.

Warp Fetus

Keywords: Resisted (mother's HT).

Full Cost: 52 points for level 1 + 10 points/additional level.

Casting Roll: Will.

Range: Unlimited.

Duration: Truly Permanent.

When this spell is cast on a developing embryo or fetus, it will be born deformed. The caster can impose 10 points of mundane disadvantages on the embryo or fetus per level of this spell. Only disadvantages that could conceivably be the result of birth defects or hereditary diseases are possible, e.g., Epilepsy or One Arm.

Statistics: Affliction 1 (HT; Accessibility, Can only target an embryo or fetus, -80%; Accessibility, Only birth defects and hereditary diseases, -60%; Variable Enhancements, +100%; Extended Duration,

Truly Permanent, +300%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [52]. Each additional level adds more Variable Enhancements, +100% [+10].

Water Jet

Keywords: Jet, Obvious.

Full Cost: 34 points for level 1 + 8 points per additional level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 20 yards.

Duration: Instantaneous.

You shoot a thin jet of water from your fingertip, which can strike any target up to 20 yards away (without range or speed penalties). It can be dodged or blocked, but not parried. This jet does 1d crushing damage per level, *doubled*, for the purposes of knockback, but does not deal injury or blunt trauma. It will extinguish a one-yard-radius area of normal fire.

Against enemies with Injury Tolerance (Diffuse), such as gaseous beings and swarms, and against creature of flame, this becomes a *much* more potent attack, doing full damage – including the doubling! Ignore the usual injury cap of 2 HP (*Injury to Unliving, Homogenous, and Diffuse Targets*, p. B380).

If the spell strikes the face, it causes no injury (unless the attack was against the aforementioned enemy types), but blinds the target for 3 seconds unless he makes a HT roll. Thick goggles, closed helmets, ultra-tech visors protect against this spell.

Statistics: Crushing Attack 1d (Blockable, -5%; Can extinguish fire, +10%; Cosmic, Does knockback-based damage against diffuse and flame targets, +50%; Double Knockback, +20%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; No Blunt Trauma, -20%; No Wounding*, -5%; Sorcery, -15%) [8/level] + Affliction 1 (HT; Accessibility, Must hit unprotected face, -20%; Blockable, -5%; Disadvantage, Blindness, +50%; Fixed Duration, +0%; Increased 1/2D, 2x, +5%; Increased Range, 2x, +10%; Jet, +0%; Link, +10%; Magical, -10%; Reduced Duration, 1/60, -35%; Vision-Based, +150%) [26].

* Except versus diffuse and flame targets, an exception which decreases the value of this limitation.

Water to Wine

Keywords: None.

Full Cost: 6 points/level.

Casting Roll: IQ or Professional Skill (Brewer).

Range: Touch.

Duration: Permanent.

This spell removes transforms water or other drinkable liquids into an appropriate alcoholic beverage. The nature of the resulting drink depends on the starting material. Water or grape juice becomes wine; fruit juices become “coolers.” To cast the spell, the caster touches the liquid he wishes to transform, takes a Concentrate maneuver and makes his casting roll. Success means he transforms it successfully. Failure means nothing happens. Critical failure means the transformation happens, but in a way that’s inconvenient or dangerous – the GM should be creative!

Transformation costs 1 FP per use.

The caster can transform an amount of liquid weighing up to 10 x (level squared) lbs. – 10 lbs. at level 1, 40 lbs. at level 2, 90 lbs. at level 3, and so on.

If the product is worth more than what you started with, it’s unstable and will revert to its original form after 10 seconds unless you stabilize it with your character points – in which case point cost depends on the difference in value. Each point spent stabilizes a quantity worth 10% of the campaign’s average starting wealth. (This is just the tradeoff used for Trading Points for Money, p. B26.) The GM determines the cash value per pound of matter – a ton of iron costs more to stabilize than a ton of stone.

Points spent to stabilize matter come from your “Creation Pool,” a number of points set aside for the purpose. You can’t apply any modifiers to these points. Points used to stabilize matter are unavailable until reclaimed – which causes the matter to vanish. If the matter is crafted into an object,

the item is unmade when the matter vanishes. If the matter is mixed with other materials (e.g., alloyed), you must separate it to reclaim your points; this can be a tedious process. If it's destroyed or transformed (e.g., eaten), you can't reclaim your points – they're gone. You can increase your Creation Pool with unspent points at any time.

Statistics: Create (Accessibility, Only to transform into an appropriate beverage, -10%; Transmute Drinkable Liquid to Alcoholic Beverage, +50%; Transmutation Only, -100%; Magical, -10%) [6/level].

Water Vision

Keywords: Buff.

Full Cost: 17 points for level 1 + 5 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell lets the subject see through water (including ice, snow, and steam). Each level of this spell allows the subject to see through up to six inches of water. The subject can just barely see the outline of the substance he is looking through – not enough to impair vision in any way. This spell automatically works in conjunction with all of the subject's other vision advantages (Infravision, Ultravision, etc.).

Statistics: Affliction 1 (HT; Advantage, Water Vision 1, +50%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. Additional levels add further Water Vision to the Advantage enhancement [+5]. *Note:* Each level of "Water Vision" is Penetrating Vision 1 (Magical, -10%; Specific, Water, -40%) [5].

Waterproof

Keywords: Buff.

Full Cost: 17 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

The subject (person, creature, or object) becomes waterproof. When cast on a bow or crossbow, it makes it usable underwater with usual penalties.

Statistics: Affliction 1 (HT; Advantage, Waterproof, +10%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [17]. *Note:* "Waterproof" is Sartorial Integrity (Variant; Magical, -10%) [1].

Waves

Keywords: Area (Special).

Full Cost: 69 points for level 1 + 61 points/additional level.

Casting Roll: IQ.

Range: Self.

Duration: Indefinite.

You can change the strength of waves within the 0.1-mile-radius area around you. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by waves, relative to the prevailing conditions. This can help with rolls for Boating, Seamanship, Survival and anything the GM allows.

Statistics: Control Waves 1 (Natural Phenomenon, +100%; Sorcery, -15%) [28] + Control Waves +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [41]. Additional levels add Control Waves +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [61/level]. *Note:* As this is one advantage (Control Waves) with the Sorcery limitation, not two, it costs only 1 FP to use.

Waves of Exhaustion

Keywords: Obvious.

Full Cost: 16 points/level.

Casting Roll: None. Use Innate Attack (Beam) to hit.

Range: 10 yards.

Duration: Instantaneous.

You fire a cone of negative energy that does 1d fatigue damage per level. The spell spreads to affect everyone in a cone-shaped area. Cones use special rules; see *Area and Spreading Attacks* (p. B413). The cone has a maximum width of 5 yards at the spell's maximum range. This spell has the 1/2D range of 2 yards.

Statistics: Fatigue Attack 1d (Cone 5, +100%; Increased 1/2D, x2, +5%; Reduced Range, 1/10, -30%; Sorcery, -15%) [16/level].

Weaken

Keywords: Resisted (HT).

Full Cost: 13.5 points/level.

Casting Roll: IQ.

Range: Unlimited.

Duration: Instantaneous.

Does 1d damage to the weakest part of the subject (works only on inanimate items) per level of the spell. See p. B557, for DR and HP of various items. No caster may use this spell on the same subject more than once per hour. DR does not protect against this! You may do less damage if you prefer.

Statistics: Crushing Attack 1d (Accessibility, Only on objects, -10%; Based on HT, +20%; Based on IQ, Own Roll, +20%; Increased Immunity 2, -20%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%; Variable, +5%) [13.5/level].

Weaken Blood

Keywords: Resisted (HT).

Full Cost: 41 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

The subject gets the Hemophilia (p. B138) disadvantage.

Statistics: Affliction 1 (HT; Disadvantage, Hemophilia, +30%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [41].

Weaken Will

Keywords: Resisted (Will).

Full Cost: 27 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 3 minutes.

The victim suffers temporary Will loss equal to your margin of victory (maximum -10). Lower all skills based on Will by a like amount. This spell only affects sapient (IQ 6+) beings.

Statistics: Affliction 1 (Will; Accessibility, Only on sapient beings, -10%; Based on Will, +20%; Disadvantage, Will-10, +50%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Penalty cannot exceed margin of victory, -50% Sorcery, -15%) [27].

Weapon of Puissance

Keywords: Weapon Buff.

Full Cost: 44 points for level 1 + 16 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: Three minutes.

Regardless of the type of damage the weapon does, it does more of it. The weapon does +1 basic damage. This is not a follow-up; add it directly to the damage roll before subtracting DR and calculating injury. This bonus is applied after the roll, and is thus unrelated to limitations of ST (e.g., minimum ST, draw ST).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Weapon of Puissance 1, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. Additional levels add further Weapon of Puissance to the Advantage enhancement (+160%) [+16]. *Note:* "Weapon of Puissance 1" is 34 points, per Enhances or Transforms an Existing Attack (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -2 in effect penalties. This spell is based on the [Mighty Blow](#) imbue by PK.

Weapon Self

Keywords: Resisted (Will).
Full Cost: 58 points for level 1 + 2 points/additional level.
Casting Roll: IQ.
Range: Touch.
Duration: 1 minute.

The caster's body magically melds with the melee weapon he is wielding. Equipment up to his Basic Lift meld with him, but the rest of his equipment falls to the ground. The weapon now dances through the air, as if wielded by an invisible opponent. The weapon has ST (9 + spell level) and Move 5, and the caster's weapon skills.

Once melded, the caster can use his senses from the weapon, and can breathe if any part of it is touching air. If the object takes damage, it affects the caster proportionally; e.g., 10 HP of injury to a 100 HP tree results in a 1 HP wound for a 10 HP man.

Statistics: Permeation (Weapons wielded by the caster; Can Carry Objects, No encumbrance, +10%; Link, +10%; Magical, -10%; Meld I, +150%) [13] + Possession (Link, +10%; Maximum Duration, 1 minute, -65%; Magical, -10%; No Memory Access, -10%; Specific, Weapons wielded by the caster, -40%) [20] + Telekinesis 10 (Lift Only, -20%; Link, +10%; One Task, Wielding Itself, -35%; Sorcery, -15%) [20] + Telekinesis 5 (Link, +10%; Move Only, -40%; One Task, Wielding Itself, -35%; Sorcery, -15%) [5]. Each additional level adds Telekinesis 1 (Lift Only, -20%; Link, +10%; One Task, Wielding Itself, -35%; Sorcery, -15%) [+2].

Weapon Spirit

Keywords: Buff.
Full Cost: 174 points.
Casting Roll: None. Special casting time.
Range: Touch.
Duration: Instantaneous.

Transfers the personality and some of the intelligence of a recently deceased being to a weapon. The spell is at -1 for each full day that elapsed between the donor's death and the casting (or the beginning of the enchantment). Most of the body must be present at the beginning of the enchantment or casting, but may be disposed of after it commences. The casting requires 1 hour of uninterrupted concentration, during which the caster must touch both the dead body and the weapon.

The caster can pass on as little or as much of the donor's IQ as he wishes to the weapon, as well as some of the donor's skills, advantages, and disadvantages. The weapon has no memory of its former existence. Although the weapon has no sensory organs, it possesses sight and hearing (these are

considered mental traits for the purpose of transferring). Quirks (or disadvantages reduced to quirk level) are sometimes transferred from the donor to the weapon, whether the caster wants them or not.

The subject's consciousness even can cast any spell that it knows at skill 20 or above (i.e., castable without speech or gesturing). It may communicate at a distance via telepathy-type spells, if it knows any.

If a new body comes near the weapon, the consciousness may try to take it by a Possession, Permanent Possession, or Exchange Bodies spell if it knows such a spell. In that case, the soul of that body goes into the weapon. But if the soul is in a weapon, anything that destroys the weapon will kill the consciousness permanently – beyond hope of resurrection.

Each time the weapon gets a new wielder, the weapon must make a single reaction roll, which sets the tone for its relationship with the wielder from that point on.

The weapon's skills cannot be improved, although skills such as History or Area Knowledge may be kept current through the absorption of new knowledge.

Statistics: Affliction 1 (HT; Accessibility, Requires a weapon nearby, -10%; Advantage, Weapon Spirit, +1,700%; Cosmic, Affects the dead, +50%; Immediate Preparation Required, 1 hour, -75%; Melee Attack, Reach C, -30%; No Signature, +20%; Nuisance Effect, Time penalties, -10%; Sorcery, -15%; Variable, +5%) [174]. *Notes:* "Weapon Spirit" is Possession (Accessibility, Only weapons, -20%; Cosmic, Retains senses, +100%; Magical, -10%) [170]. This version of Cosmic lets the caster affect the dead, but forbids using the spell on the living.

Web

Keywords: Area (Leveled).

Full Cost: 35 points for level 1 + 10 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Instantaneous.

You conjure a sticky web in an area. Placing the effect requires a roll against Innate Attack (Gaze) plus Talent; if you miss, see *Scatter* (p. B414). Anyone covered by the web is grappled with ST 10 and rooted in place. They cannot select the Move or Change Posture maneuvers or change facing, and are at -4 to DX. Each additional web cast over the area increases the ST by 1.

Anyone who touches a victim grappled by the Web within 10 seconds of the casting sticks to him, becoming grappled as well!

To break free, the victim must win a Quick Contest of ST or Escape skill against the ST of the Web. Each attempt takes one second. If the victim fails to break free, he loses 1 FP but may try again. Alternatively, he may try to destroy the Web. Innate Attacks hit automatically; other attacks are at -4. External attacks on the Web take no penalty, but risk hitting the victim on a miss (see *Striking Into a Close Combat*, p. B392). The Web has DR 3. Each point of damage reduces ST by one. At ST 0, the Web is destroyed and the victims are freed. The Web can only be damaged by cutting and burning attacks.

Statistics: Binding 10 (Area Effect, 2 yards, +50%; Only Damaged By Cutting and Burning, +20%; Sorcery, -15%; Sticky, +20%) [35]. Each additional level adds more Area Effect [+10].

Widen Shield

Keywords: Armor Buff.

Full Cost: 43 points for level 1 + 24 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell stretches the shield. This allows it to provide the wielder and possibly others cover from explosions, cones, and area-effect attacks. At level 1, the shield widens just enough to afford cover to the wielder and anybody within a step of him who successfully dives for cover (p. B377). The 2nd level allows the shield to cover a two-yard radius around the wielder, and each additional level doubles the radius.

A widened shield doesn't absolutely require a successful block to be useful. When casting the spell, the caster chooses an initial facing for the cover it provides. Against attacks from that direction, the wielder is considered to be behind cover without requiring a defense roll! This makes Widen Shield useful against normally unblockable attacks, such as beams and bullets.

To change the facing in response to an attack from another direction, however, the wielder must make a Block roll. In either case, success at the block defense counts as a successful attempt to dive for cover. Those behind a shield affected by this spell enjoy cover DR; see p. B408. Work this out normally for the shield. It isn't invulnerable!

Statistics: Affliction 1 (HT; Accessibility, Only on shields, -30%; Advantage, Widen Shield, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [43]. *Notes:* "Widen Shield" is 34 points, per *Enhances or Transforms an Existing Attack* (*GURPS Thaumatology: Sorcery*, p. 11). Each additional level removes -3 in penalties [+24]. This spell is based on the Widen Shield imbue skill from *Pyramid #3-4*.

Will Lock

Keywords: Area (Leveled), Resisted ((ST+Will)/2).

Full Cost: 115 points for level 1 + 25 points/additional level.

Casting Roll: IQ.

Range: Unlimited.

Duration: 1 day.

Creates a circular zone that traps sapient (IQ 6+) creatures inside at the moment of its creation. The barrier is purely mental, working on the wills of the people trapped. For this reason, the subjects must be aware they are being circled – if they are not, the Will Lock has no effect on them.

If you tie or lose, the subjects can sense coercion coming from you. In addition, you cannot try to affect them again within 24 hours. The spell can also be broken if an outside party scuffs the circles away.

Statistics: Mind Control (Accessibility, Caster must encircle the area somehow, -25%; Accessibility, Only on sapient creatures, -10%; Accessibility, Only to prevent the subjects from crossing the border, -60%; Accessibility, Subjects must be aware of being encircled, -10%; Area Effect, 2 yards, +50%; Based on (ST+Will)/2, +20%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Independent, +70%; Sorcery, -15%; Terminal Condition, Circle being erased, -10%) [115]. Additional levels add Area Effect (+50%) [+25].

Wilting

Keywords: Area (Fixed), Resisted (HT).

Full Cost: 25 points.

Casting Roll: Will.

Range: Unlimited.

Duration: Instantaneous.

Dehydrates creatures in a 4-yard-radius area. If a victim fails to resist, he takes 1d-2 fatigue damage and 1d-2 toxic damage, as water is being removed from the tissues of his body. Treat FP lost to the spell identically to FP lost to dehydration (p. B426). Thus, the lost FP can only be recovered after a day of rest with ample water supplies.

Statistics: Fatigue Attack 1d-2 (HT; Area Effect, 4 yards, +100%; Based on HT, +20%; Dehydration, +20%; Link, +10%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [17] + Toxic Attack 1d-2 (HT; Accessibility, Only on creatures with water in their tissues, -10%; Area Effect, 4 yards, +100%; Based on HT, +20%; Link, +10%; Magical, -10%; Malediction 2, +150%; No Signature, +20%) [8].

Wind

Keywords: Area (Special).

Full Cost: 69 points for level 1 + 61 points/additional level.

Casting Roll: IQ.

Range: Self.
Duration: Indefinite.

You can change the strength and direction of wind within the 0.1-mile-radius area around you. Every level of this spell gives -1 or +1 to rolls that could be hindered or helped by wind, relative to the prevailing conditions. This can help with rolls for Boating, Seamanship, Survival and anything the GM allows.

Statistics: Control Winds 1 (Natural Phenomenon, +100%; Sorcery, -15%) [28] + Control Winds +2 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [41]. Additional levels add Control Winds +3 (Does not increase area of effect, -50%; Natural Phenomenon, +100%; Sorcery, -15%) [61/level]. *Note:* As this is one advantage (Control Winds) with the Sorcery limitation, not two, it costs only 1 FP to use.

Wind Walk

Keywords: None.
Full Cost: 77 points.
Casting Roll: None.
Range: Self.
Duration: 10 seconds.

You become invisible. You still make noise, leave footprints, and have a scent – and anything you are carrying (up to the Medium encumbrance) becomes invisible too. You get a +9 to Stealth in any situation where being seen would matter, if you are carrying no more than your Medium encumbrance. While under effect of this spell, your Basic Move is increased by 4.

Individuals using paranormal remote viewing (crystal balls, Clairvoyance, etc.) cannot see you if you would be invisible to their normal vision. Paranormal abilities that detect enemies, life, and so on non-visually can still see you.

Invisibility only works against electromagnetic vision (which encompasses ordinary vision, Infravision, Ultravision, and radar). You do not cast a shadow and don't show up in mirrors.

This spell ends if you attack any creature. For purposes of this spell, an attack includes any spell targeting a foe or whose area or effect includes a foe. Exactly who is a foe depends on the invisible character's perceptions. Actions directed at unattended objects do not break the spell. Causing harm indirectly is not an attack. Thus, an invisible being can open doors, talk, eat, climb stairs, summon monsters and have them attack, cut the ropes holding a rope bridge while enemies are on the bridge, remotely trigger traps, open a portcullis to release attack dogs, and so forth. If you attack directly, however, you immediately become visible along with all your gear.

Statistics: Basic Move +4 (Dispels after an attack, -20%; Link, +10%; Magical, -10%; Reduced Duration, 1/6, -15%) [13] + Invisibility (Affects Machines, +50%; Can Carry Objects, Medium, +50%; Dispels after an attack, -20%; Link, +10%; Reduced Duration, 1/6, -15%; Sorcery, -15%) [64].

Windstorm

Keywords: Area (Leveled).
Full Cost: 126 points for level 1 + 25 points/additional level.
Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 10 seconds.

Create a circular windstorm with an “eye” of calm inside (a good place for the caster to stand). The radius of the eye can be up to half that of the storm – or smaller, if the caster wishes. The caster may move the area at Move 1 with a Concentrate maneuver.

Roll 4d as for crushing damage, determine knockback, and then double the distance; however, the victim suffers no actual damage or blunt trauma from the effect – just the consequences of being hurled around. As a special effect, knockback from this moves victims sideways (all clockwise or all anticlockwise; decide when triggering the attack) rather than away from the storm.

Second, Dodge values of all creatures within the area of effect is increased by 2 against projectile attacks.

Statistics: Crushing Attack 4d (Area Effect, 2 yards, +50%; Double Knockback, +20%; Environmental, Air, -5%; Link, +10%; Magical, -10%; Mobile 1, +40%; No Blunt Trauma, -20%; No Wounding, -50%; Persistent, +40%; Selective Area, Only to create an “eye”, +10%) [37] + Enhanced Dodge 2 (Affects Others 1, +50%; Area Effect, 2 yards, +50%; Environmental, Air, -5%; Force Field, +20%; Limited, Projectiles, -40%; Link, +10%; Mobile 1, +40%; Persistent, +40%; Ranged, +50%; Sorcery, -15%) [89]. Additional levels add further levels of Area Effect (+50%) to all advantages [+25].

Winged Knife

Keywords: None.

Full Cost: 4 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

You can pick up and throw weapons without touching them. You lift and throw weapons just as if you were grasping them in a pair of hands with ST equal to your (2*Winged Knife level). Regardless of level, for picking weapons up your maximum range is 10 yards. You cannot move weapons after you pick them up, your only options are to throw the weapon, keep holding it, or release your grasp.

Winged Knife requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn. Your Winged Knife may then perform one standard maneuver as if were a disembodied pair of hands at some point within your range: a Ready maneuver to pick up a weapon or an Attack maneuver to throw it. This works just as if you were throwing the object with ST equal to (2*your Winged Knife) level. Roll against Throwing or Thrown Weapon skill to hit, modified by Talent, depending on the weapon being hurled. For 1/2D and Max purposes, measure range from the object (not yourself!) to the target; for the purpose of range penalties, use the *sum* of the distance from you to the object and from the object to the target. Once you throw something, you have “released” your telekinetic grip – your Winged Knife must take a Ready maneuver to pick it up again.

No rolls are necessary for picking weapons up. In situations where you would roll against ST, roll against (2*your Winged Knife level) instead.

Statistics: Telekinesis 2 (Only to pick up and throw weapons, -45%; Sorcery, -15%) [4]. Each additional level adds Telekinesis 2 (Only to pick up and throw, -45%; Sorcery, -15%) [+4].

Wisdom

Keywords: Buff.

Full Cost: 29 points for level 1 + 18 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 3 minutes.

You increase the target’s IQ by 1 per level of this spell for 3 minutes. This affects the IQ-based skills, Will, Per, etc. Note that this increase of IQ will *not* affect casting rolls for spellcasters using such magic systems as *Ritual Path Magic* or *Incantation Magic*. The target must be a sapient (IQ 6+) creature.

Statistics: Affliction 1 (HT; Accessibility, Only on sapient beings, -10%; Advantage, Wisdom 1, +180%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [29]. Additional levels add further Wisdom to the Advantage enhancement (+180%) [+18]. *Note:* Each level of “Wisdom” is IQ 1 (Magical, -10%) [18].

Wish

Keywords: None.

Full Cost: 230 points.

Casting Roll: IQ. Special casting time.

Range: Self.

Duration: Instantaneous.

Once per hour of play (or one day of game time, decide with your GM what method you are going to use beforehand), you may make an IQ roll to specify the result of any one die roll made in your presence, just *after* that roll is made – except a die roll involving magic. This is not an “action.” It takes no time, and may be done at any time, but the spell must be active. Wholly impossible attempts cannot succeed (the effective skill level must be at least 3), but you can choose any result that would be possible – however improbable – on a single normal die roll. Time visibly rewinds and replays differently.

Statistics: Super Luck (Accessibility, Cannot affect magic rolls, -20%; Alter Reality, +75%; Requires IQ Roll, -10%; Sorcery, -15%; Wishing, +100%) [230].

Wither Limb

Keywords: None.

Full Cost: 5 points/level.

Casting Roll: None. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

The caster must strike the subject on a *limb* to trigger this spell (hits elsewhere have no effect). Armor does not protect. The subject's limb takes 1d toxic damage per level of this spell. If this damage is not enough to cripple the limb, the spell does nothing.

Statistics: Toxic Attack 1d (Accessibility, Limbs only, -15%; All-or-Nothing, -10%; Melee Attack, Reach C, Cannot Parry -35%; Malediction 1, +100%; Sorcery, -15%) [5/level].

Wither Plant

Keywords: Resisted (HT).

Full Cost: 53 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: Instantaneous.

The caster causes the subject plant to wither and die.

Statistics: Affliction 1 (HT; Accessibility, Only on plants, -40%; Disadvantage, Enhanced Unnatural, +100%; Heart Attack, Variant, +300%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Sorcery, -15%) [53].

Withering Weapon

Keywords: Weapon Buff.

Full Cost: 44 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

This spell makes the weapon desiccating. The weapon penetrates DR as usual but leaves no wound. Instead, it visibly drains the target's vital bodily fluids. Roll damage as usual but interpret it as fatigue damage that works like the FP loss under Dehydration (p. B426).

Statistics: Affliction 1 (HT; Accessibility, Only on weapons, -20%; Advantage, Withering Weapon, +340%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [44]. *Notes:* “Withering Weapon” is 34 points, per *Enhances or Transforms an Existing Attack* (GURPS Thaumatology: Sorcery, p. 11). This spell is based on the Withering Strike imbuelement skill.

Wizard Eye

Keywords: None.

Full Cost: 75 points.

Casting Roll: IQ.
Range: 10 yards.
Duration: Indefinite.

You can displace your sight to a point outside your body in a form of a floating eye. This “viewpoint” must be a specific location within 10 yards. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if your desired viewpoint is out of sight.

On a success, you can use your sight as if you were physically present at the viewpoint. You can see the environment around your body while using your ability. You can still only pay attention to one vision. At the start of each turn in combat, state whether you’re giving priority to your natural sight or your remote one. All tasks that depend on the sight you aren’t prioritizing – including attack rolls, defense rolls, and Sense rolls – are at -4.

Your vision ignores darkness penalties completely. You cannot see through solid objects, but if your viewpoint were inside (for example) a closed chest, you would see what was inside despite the lack of light. If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Wizard Eye for as long as you like.

On failure by 1, your sight goes to some other viewpoint of the GM’s choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced sight, move it elsewhere, or change its facing as a free action. A viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part.

Treat the visible eye as a creature with a Size Modifier equal to yours - 7 and with HP equal to your IQ/10. Destruction of your viewpoint causes you 1 point of injury and results in your ability being unusable for 1dx5 minutes.

Statistics: Clairsentience (Aware, +50%; Clairvoyance, -10%; Fixed Range, -5%; Second Nature, +70%; Sorcery, -15%; Takes Damage, -40%) [75]. Notes: *Takes Damage* is taken from Ravens N’ Pennies [blog post](#).

Wizard Hand

Keywords: None.
Full Cost: 58 points.
Casting Roll: IQ.
Range: 10 yards.
Duration: Indefinite.

You can displace your touch to a point outside your body in a form of a floating replica of your hand. This “viewpoint” must be a specific location within 10 yards. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if your desired viewpoint is out of sight.

On a success, you can use your touch as if you were physically present at the viewpoint. You can touch the environment around your body while using your ability. You can still only pay attention to one touch. At the start of each turn in combat, state whether you’re giving priority to your natural touch or your remote one. All tasks that depend on the touch you aren’t prioritizing – including Sense rolls – are at -4.

If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Wizard Hand for as long as you like.

On failure by 1, your touch goes to some other viewpoint of the GM’s choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced touch, move it elsewhere, or change its facing as a free action. A viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part.

Treat the visible hand as a creature with a Size Modifier equal to yours - 7 and with HP equal to your IQ/10. Destruction of your viewpoint causes you 1 point of injury and results in your ability being unusable for 1dx5 minutes.

You can manipulate objects with Wizard Hand, as if it had ST 2 and your DX.

Statistics: Clairsentience (Aware, +50%; Clairtelligence, -70%; Fixed Range, -5%; Link, +10%; Second Nature, +70%; Sorcery, -15%; Takes Damage, -40%) [50] + Telekinesis 2 (Link, +10%; Magical, -10%; Visible, -20%) [8]. Notes: *Clairtelligence* and *Takes Damage* are taken from Ravens N' Pennies [blog post](#).

Wizard Nose

Keywords: None.

Full Cost: 50 points.

Casting Roll: IQ.

Range: 10 yards.

Duration: Indefinite.

You can displace your smell to a point outside your body in a form of a floating replica of your nose. This "viewpoint" must be a specific location within 10 yards. Your ability is reflexive. You can initiate it as a free action and change viewpoints as quickly as you can shift your gaze.

To cast this spell, pick the desired viewpoint (which can be inside something) and its facing, and then make an IQ roll. You need to concentrate for a minute and make a IQ-5 roll if your desired viewpoint is out of sight.

On a success, you can use your smell as if you were physically present at the viewpoint. You can smell the environment around your body while using your ability. You can still only pay attention to one smell. At the start of each turn in combat, state whether you're giving priority to your natural smell or your remote one. All tasks that depend on the smell you aren't prioritizing – including Sense rolls – are at -4.

If you are using or subjected to range-dependent abilities (e.g., spells), calculate all ranges from your body, not your viewpoint. You can maintain Wizard Nose for as long as you like.

On failure by 1, your smell goes to some other viewpoint of the GM's choosing. On any greater failure, nothing happens at all. Critical failure cripples your ability for 1d hours.

You can return your displaced smell, move it elsewhere, or change its facing as a free action. A viewpoint inside a moving object (e.g., a car) will move with that object with no special concentration on your part.

Treat the visible nose as a creature with a Size Modifier equal to yours - 7 and with HP equal to your IQ/10. Destruction of your viewpoint causes you 1 point of injury and results in your ability being unusable for 1dx5 minutes.

Statistics: Clairsentience (Aware, +50%; Clairrosmia, -60%; Fixed Range, -5%; Second Nature, +70%; Sorcery, -15%; Takes Damage, -40%) [50]. Notes: *Takes Damage* is taken from Ravens N' Pennies [blog post](#).

Wizard's Bind

Keywords: None.

Full Cost: 3 points/level.

Casting Roll: None.

Range: 10 yards.

Duration: Indefinite.

This spell animates a length of rope or chain. The minimum level required to animate a rope or chain equals its HP/2. An animated rope or chain can grab, lift, strike, and throw with ST equal to (2*Wizard's Bind level needed to animate it). It has your DX. It can walk and jump if it isn't fixed in place;

Move equals to 2*Wizard's Bind level minus the level needed to animate it. You can use skills through animated ropes and chains (including Kusari to make swinging attacks) – but note that they have No Fine Manipulators. Ropes and chains return to their rest state once you give up control. Wizard's Bind requires constant concentration to use. In combat, this means you must take a Concentrate maneuver on your turn.

Statistics: Telekinesis 2 (Accessibility, Only chains and ropes, -35%; Animation, -20%; Sorcery, -15%) [3]. Every additional level adds 2 more levels of Telekinesis [+3].

Wizard's Escape

Keywords: None.

Full Cost: 6 points.

Casting Roll: IQ.

Range: Self.

Duration: Instantaneous.

While this spell is active, the caster can momentarily become hard to hold. When the caster is grappled, or when he squeezes through a narrow opening, he may cast this spell to grant himself +4 to all ST, DX, and Escape rolls to slip restraints, break free in close combat, or squeeze through.

Statistics: Slippery 4 (Requires IQ Roll, -10%; Sorcery, -15%) [6].

Wizardly Workshop

Keywords: Buff.

Full Cost: 20 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: 30 minutes.

For the duration, the subject can use one craft or repair skill specified at casting as if they had improvised equipment (p. B345). The GM decides what skills to permit. Armoury, Carpentry, Electrician, Electronics Repair, Machinist, Masonry, and Mechanic are reasonable. Alchemy, Bioengineering, Engineer, etc. probably aren't.

Statistics: Affliction 1 (HT; Advantage, Wizardly Workshop, +40%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [20]. *Note:* "Wizardly Workshop" is Cosmic Power 1 (Limited, One TK Tools Perk, -50%; Magical, -10%) [4].

Wood Golem

Keywords: None.

Full Cost: 34 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite, see text.

The caster animates a wood golem. The golem's body must be prepared in advance. See *GURPS Magic*, page 59 for the clay golem template, but add ST+2, HP+10, DR 4, and Fragile (Combustible).

If the golem is destroyed, the caster must wait a full day to create a new one. You can only cast this spell if your character's point total is at least 2 times bigger than the golem's.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Wood Golem; Built on 100%; Constantly, no roll required; Adjustable, Wood Golems, +50%; Magical, -10%; Minion, +50%; Requires preparation, -20%) [34].

Wooden Arm

Keywords: Buff.

Full Cost: 79 points.

Casting Roll: None. Use Innate Attack (Gaze) to aim.
Range: 100 yards.
Duration: 30 minutes.

The subject's arm (up to the top of the biceps) turns to hard wood. It looks almost normal, able to flex and grip as if it were unaltered. The subject gains the Wooden Arm meta-trait; see the footnote below for details. He cannot shift back on his own; he must wait for the spell to expire or be dispelled. (This does not change if the sorcerer is the subject.)

If cast on a bleeding arm, the bleeding stops. The flow does not resume when the spell returns to its normal state – this spell effectively stanches an open wound and can be cast solely for that purpose. The arm is immune to metabolic hazards, is homogenous, has no blood, has DR 4, and its punch damage is increased by +1 per die.

The spell could be cast on someone else as a curse. He may feel a need to hide his deformity until the spell ends.

The subject's wooden arm burns more easily than flesh. The subject makes a HT roll to avoid catching fire whenever the arm receives a major wound from a burning or explosive attack. The arm catches fire *automatically* if such an attack inflicts 10+ HP of injury. Once aflame, the arm suffers 1d-1 injury per second until it is extinguished by immersion in water, rolling on the ground (takes 3 seconds), etc.

Note that you must aim the spell at the arm and hit successfully for the spell to work. It won't work if you hit the torso or any other body part.

Statistics: Affliction 1 (HT; Accessibility, Arms and similar body parts only, -20%; Advantage, Wooden Arm, +650%; Extended Duration, 10x, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [79]. *Notes:* "Wooden Arm" is Alternate Form (Wooden Arm*; Magical, -10%) [65]. If turned into a "usually on" magical item (*GURPS Thaumatology: Sorcery*, pp. 27-28), the wearer can shift at will but it takes 10 seconds to do so.

* A meta-trait: Blunt Claws (One arm, -50%) [2]; DR 4 (One arm, -40%) [12]; Fragile (Combustible; One arm, -40%) [-3]; Immunity to Metabolic Hazards (One arm, -40%) [18]; Injury Tolerance (Homogenous, No Blood; One Arm, -40%) [27]; Arm can be affected by Plant spells [0]. 56 points.

Woodfall

Keywords: Missile.
Full Cost: 5 points.
Casting Roll: None. Use Dropping or Innate Attack (Projectile) to hit.
Range: 100 yards.
Duration: Instantaneous.

This spell detaches a part of a plant directly over the subject and propels it downward! The caster must roll against Dropping or Innate Attack (Projectile) to hit, applying range penalties from him to the target (not the object). This is an overhead attack – it bypasses any cover that does not provide overhead protection, and negates attack penalties to hit crouching, kneeling, sitting, or prone targets.

Statistics: Crushing Attack 2d (Environmental, Under a branch or a heavy fruit/nut, -65%; Overhead, +30%; Sorcery, -15%) [5].

Word of Chaos

Keywords: Area (Fixed), Obvious, Resisted (Will).
Full Cost: 59 points.
Casting Roll: Will.
Range: Self.
Duration: Instantaneous and 1 minute, see description.

The caster pronounces a word of chaos, and victims within 4 yards that can hear it must resist or begin to hallucinate (p. B429) for 1 minute. After that each subject is stunned (p. B420) and may roll vs. Will once per second to recover. The caster can exclude any beings from this effect.

In addition, when this spell is cast, every lawful being within four yards immediately takes 1d crushing damage, regardless of DR, insubstantiality, etc. They will see this attack clearly (as an explosion of chaotic energy coming from within you), but non-lawful people will see nothing. This damage does not cause knockback. Note that this secondary effect works even if the word of chaos was not heard.

Statistics: Affliction 1 (Will; Area Effect, 4 yards, +100%; Based on Will, +20%; Emanation, -20%; Fixed Duration, +0%; Hallucinating, +50%; Hearing-Based, -20%; Link, +10%; Malediction 1, +100%; No Signature, +20%; Reduced Duration, 1/3, -10%; Requires Magic Words, -10%; Selective Area, +20%; Sorcery, -15%) [35] + Crushing Attack 1d (Accessibility, Lawful Creatures Only, -40%; Affects Insubstantial, +20%; Area Effect, 4 yards, +100%; Cosmic, Irresistible Attack, +300%; Emanation, -20%; Link, +10%; Low Signature, +10%; Magical, -10%; No Knockback, -10%; Requires Magic Words, -10%) [24].

Worm Control

Keywords: Resisted (Will).

Full Cost: 18 points.

Casting Roll: IQ.

Range: Unlimited.

Duration: Special.

You can take control of any single worm – or of one square yard of a swarm of smaller worms. The victim obeys your every command, effectively gaining the Reprogrammable disadvantage with you as the master. Only worms with a racial IQ of 1-5 or less can be affected, though the GM may make exceptions for worms with IQ 6 and Bestial. In addition to range penalties, your casting roll is at -1 for each other animal currently under your control. If you tie, nothing happens, but if you lose the creature is immune to you for 24 hours and can sense your attempted coercion; the GM will make a new reaction roll at -2, using the worse of its existing or new reaction.

This spell has an indefinite duration if you take constant Concentrate maneuvers to keep it active (and pay the usual 1 FP per minute). Once you stop concentrating, it continues to last for a fixed duration (at no FP cost) in minutes equal to the margin by which you won the initial Quick Contest. If you lose consciousness, the spell ends immediately.

Statistics: Mind Control (Accessibility, Worms only, -50%; Sorcery, -15%) [18].

Wraith

Keywords: Buff.

Full Cost: 70 points + 0.9 x Wraith template cost. (280 if using the template from *GURPS Magic*).

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Truly Permanent.

Enchants a ring or an amulet that will turn the wearer into a wraith, an undead guardian sustained by magic. It attempts to affect the wearer every time it is put on. The spell is Resisted normally by HT. If the subject ever fails to resist (or chooses not to), he “dies” and rises as a wraith 24 hours later.

The GM determines the exact abilities of the wraith, but mental traits are preserved as per the Lich spell. The wraith always has a Dependency (p. B130) on the Wraith item (a rare item, required constantly, for -150 points), and shrivels and dies if it is removed or destroyed. This item isn’t Hexed; the victim can remove it and die if he wishes. Only Remove Enchantment can reverse the Wraith spell without harm.

Each Wraith item can sustain one wraith at a time. Once a given item has produced a wraith, it has no effect on other wearers until its wraith has been destroyed. The Wraith spell has no effect on the undead.

Typically, this spell can *only* be used to enchant items, but in some games the GM may allow it to be used as is.

Statistics: Affliction 1 (HT; Accessibility, Only living creatures, -10%; Advantage, Wraith, +560%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [70 + 0.9 x Wraith template cost]. Notes: "Wraith" is Alternate Form (Wraith*; Extended Duration, Truly Permanent, +300%; Magical, -10%) [59 + 0.9 x Wraith template cost]. If using the template from *GURPS Magic* the full cost is equal to 280.

* A meta-trait from p. 160 of *GURPS Magic*.

Wrathful Doom

Keywords: Incarnum, Resisted (HT).

Full Cost: 24 points.

Casting Roll: Will. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 5 seconds.

This caster turns his subject's *essentia* against him by beckoning to dark powers that prey on soulstuff. The caster must strike the subject to trigger this spell; hit location is irrelevant. Every second, the victim must roll against HT; on a failure (critical or not), he takes 1d-1 toxic damage and 1 point of damage to his *essentia* pool. On a success, he takes no damage that turn; on a critical success, the spell is broken. DR does not protect against this injury! Once the subject's *essentia* pool is depleted, the spell ends.

This spell can only be cast by spending an *essentia* point instead of a point of FP.

Statistics: Toxic Attack 1d-1 (HT; Costs *Essentia*, -5%; Cyclic, 1 second interval, 4 seconds, Resistible, +200%; Link, +10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Nuisance Effect, Stops when *essentia* is depleted, -10%; Sorcery, -15%) [11] + Fatigue Attack 1 (HT; Cyclic, 1 second interval, 4 seconds, Resistible, +200%; Cosmic, Affects *Essentia*, +50%; Costs *Essentia*, -5%; Link, +10%; Magical, -10%; Malediction 1, +100%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Nuisance Effect, Stops when *essentia* is depleted, -10%) [13].

Writer's Block

Keywords: Resisted (Will).

Full Cost: 46 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 day.

This spell curses someone so that his Writing skill rolls that succeed become failures, and those fail become critical failures. This cannot be undone via *Dispel Magic* (*GURPS Thaumatology: Sorcery*, p. 21); countering it requires *Remove Curse* (*GURPS Thaumatology: Sorcery*, p. 21).

Statistics: Affliction 1 (Will; Based on Will, +20%; Cosmic, Immune to *Dispel Magic*, +50%; Disadvantage, Divine Curse (Can't write successfully), +15%; Extended Duration, 1,000x, +120%; Fixed Duration, +0%; Malediction 2, +150%; No Signature, +20%; Sorcery, -15%) [46].

Youth

Keywords: Buff.

Full Cost: 97 points.

Casting Roll: None. Use Innate Attack (Gaze) to hit.

Range: 100 yards.

Duration: Instantaneous.

You make the living subject 1 year younger. Only 1 attempt per month is allowed on a given subject.

Statistics: Affliction 1 (HT; Accessibility, Only on living creatures, -10%; Advantage, Youth, +930%; Fixed Duration, +0%; Increased 1/2D, 10x, +10%; No Signature, +20%; Nuisance, 1 attempt per month, -30%; Reduced Duration, 1/180, -40%; Sorcery, -15%) [97]. *Note:* "Youth" is Unaging (Age Control, Only Backwards, +10%; Magical, -10%; Reduced Time 26, +520%) [93].

Zeno's First Paradox

Keywords: Area (Fixed), Resisted (IQ).

Full Cost: 200 points.

Casting Roll: Will.

Range: Self.

Duration: Indefinite.

In a race, the quickest runner can never overtake the slowest, since the pursuer must first reach the point whence the pursued started, so that the slower must always hold a lead. The caster must take a Concentrate maneuver and make a Will roll to bring up the aura that imposes this belief on an area around him. If successful, then the aura is active for the next minute. The caster may roll a Quick Contest of Will vs. the target's IQ (as a free action) when someone he wants to affect enters his area of effect. Success means that victim suffers the effects for seconds equal to the caster's margin of victory. On a failure, he may continue to roll once per second (again, as a free action) with no penalty or cost, until successful in affecting that subject.

Negative effects of the aura depend on the distance between the victim and the caster. Whenever the victim enters a band of the area of effect that imposes a penalty of a different severity, the caster must roll a Quick Contest to affect the victim again. The following table sums up the exact effects.

Distance Band	Effect on Basic Move in all mediums (round down)
32 yards	Basic Move x0.8, minimum 1
16 yards	Basic Move x0.6, minimum 1
8 yards	Basic Move x0.4, minimum 1
4 yards	Basic Move x0.2, minimum 1
2 yards	Basic Move drops to 0

The caster must make a new Will roll each minute to keep his aura up. If he fails, the aura drops; on any subsequent turn, he may pay 1 FP, take a Concentrate maneuver, and make a Will roll to bring it back up. He may also turn it off voluntarily at the beginning of his turn (as a free action).

The caster can omit any targets from the area of effect, but the spell affects victims the caster is unaware of.

Statistics: Affliction 1 (IQ; Area Effect, 32 yards, +250%; Aura, +80%; Based on IQ, +20%; Does not overlap with the smaller distance band, -50%; Link, +10%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Reduced Duration, 1/60, Only after the target leaves the area, -30%; Requires Will Roll, -5%; Selective Area, +20%; Slower Move, 0.8x, +10%; Sorcery, -15%; Takes Extra Time 1, -10%) [47] + Affliction 1 (IQ; Area Effect, 16 yards, +200%; Aura, +80%; Based on IQ, +20%; Does not overlap with the smaller distance band, -50%; Link, +10%; Magical, -10%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Reduced Duration, 1/60, Only after the target leaves the area, -30%; Requires Will Roll, -5%; Selective Area, +20%; Slower Move, 0.6x, +20%; Takes Extra Time 1, -10%) [43] + Affliction 1 (IQ; Area Effect, 8 yards, +150%; Aura, +80%; Based on IQ, +20%; Does not overlap with the smaller distance band, -50%; Link, +10%; Magical, -10%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Reduced Duration, 1/60, Only after the target leaves the area, -30%; Requires Will Roll, -5%; Selective Area, +20%; Slower Move, 0.4x, +30%; Takes Extra Time 1, -10%) [39] + Affliction 1 (IQ; Area Effect, 4 yards, +100%; Aura, +80%; Based on IQ, +20%; Does not overlap with the smaller distance band, -50%; Link, +10%; Magical, -10%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Reduced Duration, 1/60, Only after the target leaves the area, -30%; Requires Will Roll, -5%; Selective Area, +20%; Slower Move, 0.2x, +40%; Takes Extra Time 1, -10%) [35] + Affliction 1 (IQ; Area Effect, 2 yards, +50%; Aura, +80%; Based on IQ, +20%; Link, +10%; Magical, -10%; Malediction 1, +100%; Melee Attack, Reach C, -30%; No Signature, +20%; Reduced

Duration, 1/60, Only after the target leaves the area, -30%; Requires Will Roll, -5%; Selective Area, +20%; Slower Move, 0x, +50%; Takes Extra Time 1, -10%) [36].

Zeno's Second Paradox

Keywords: Resisted (IQ).

Full Cost: 56 points.

Casting Roll: Will.

Range: Unlimited.

Duration: 1 minute.

That which is in locomotion must arrive at the half-way stage before it arrives at the goal. Travel over any finite distance can neither be completed nor begun, and so all motion must be an illusion. This spell drops the victim's Basic Move in all mediums to 0, makes him unable to use the Warp advantage, and makes him immune to knockback.

Statistics: Affliction 1 (IQ; Advantage, Zeno's Second Paradox, +140%; Based on IQ, +20%; Fixed Duration, +0%; Malediction 2, +150%; Negated Advantage, Warp, +100%; No Signature, +20%; Reduced Duration, 1/3, -10%; Slower Move, 0x, +50%; Sorcery, -15%) [56]. *Note:* «Zeno's Second Paradox» is Immunity to Knockback (Magical, -10%) [14].

Zeno's Third Paradox

Keywords: Buff.

Full Cost: 16 points for level 1 + 4 points/additional level.

Casting Roll: None. Use Innate Attack (Gaze) to aim.

Range: 100 yards.

Duration: Three minutes.

If everything when it occupies an equal space is at rest, and if that which is in locomotion is always occupying such a space at any moment, the flying arrow is therefore motionless. The subject gains a form of all-or-nothing DR against ranged attacks, including energy weapons. If the damage dealt by the attack would've been stopped by this DR *fully*, then the projectile or energy stays motionless and inert right after beginning its motion for 1 second, then drops to the ground or dissipates. An arrow, a crossbow bolt, or a thrown weapon can be snatched by anyone within reach before it falls to the ground. If even a single point of damage would've penetrated this DR, then the spell has no effect against this attack.

This spell provides DR of this kind equal to the level of this spell.

Statistics: Affliction 1 (HT; Advantage, Zeno's Third Paradox 1, +40%; Fixed Duration, +0%; Increased 1/2D, 10x, +15%; No Signature, +20%; Sorcery, -15%) [23]. Additional levels add further Zeno's Third Paradox to the Advantage enhancement [+4]. *Note:* Each level of "Zeno's Third Paradox" is Damage Resistance 1 (All-or-Nothing, -10%; Force Field, +20%; Limited, Ranged Attacks, -20%; Magical, -10%) [4].

Zombie

Keywords: None.

Full Cost: 18 points.

Casting Roll: None.

Range: Touch.

Duration: Indefinite, see text.

The caster touches a corpse and animates it. The nature and condition of the corpse determines the nature of the undead creature produced. The animated corpse becomes an undead servant of the caster.

If the undead is destroyed, the summoner must wait a full day to call replacements. Dismissing the undead is a free action, but you may only dismiss him if he is physically present. You can only cast this spell if your character's point total is at least 2 times bigger than the undead creature's.

Unlike most spells with an Indefinite duration, this spell drains FP at a rate of 1 FP per *hour*, not minute.

Statistics: Ally (Zombie; Built on 50%; Constantly, no roll required; Adjustable, Small Class, Cannot provide information, +50%; Conjured, +100%; Magical, -10%; Minion, +0%; Requires a body, -20%) [18].

Zombie Summoning

Keywords: Resisted (Will).

Full Cost: 79 points.

Casting Roll: Per to detect, IQ to analyze, IQ to assume control.

Range: Unlimited.

Duration: 3 minutes.

After casting, the GM rolls against the sorcerer's Per, with a penalty based on the distance to the nearest zombie (any undead creature created with the Zombie spell). This spell uses long-distance modifiers. If successful, the caster knows the exact distance and direction to the zombie, and may first make a follow-up IQ roll to analyze the target (for example, to determine its physical health) and then make another follow-up IQ roll with the same penalty to call it to himself. It moves towards the caster as fast as it can, until the spell ends or the zombie reaches the immediate vicinity of the caster.

Once the zombie reaches the caster, it stays nearby, without attacking, until the spell ends. The spell is broken if the caster or one of his companions attacks the zombie.

Statistics: Detect Zombie (Link, +10%; Lock-On, +50%; Long-Range 1, +50%; Magical, -10%; Precise, +100%; Selective Effect, +20%) [16] + Mind Control (Accessibility, Zombies Only, -50%; Accessibility, Only to make the zombie travel to you, -80%; Cosmic, Affects zombies, +50%; Fixed Duration, +0%; Independent, +70%; Link, +10%; Long-Range 1, +50%; Sorcery, -15%; Terminal Condition, Broken if attacked, -10%) [63].

Zombie Vehicle

Keywords: Buff.

Full Cost: 227 points.

Casting Roll: None. Use DX or unarmed combat skill to hit.

Range: Touch.

Duration: 1 minute.

You can create a zombie vehicle (see *GURPS Spaceships* 7, p. 24), if it is disabled (0 HP or less), but not completely destroyed (-5xHP or worse). You must touch the wrecked vehicle to affect it. This vehicle recovers 60 HP in 1 minute – if this brings it back above -HP before the duration ends, it becomes a zombie vehicle! But if it's not enough, or if the initial HT roll fails, it cannot be brought to unlife.

Statistics: Affliction 1 (HT; Accessibility, Only on vehicles, -40%; Advantage, Zombie Vehicle, +2,250%; Fixed Duration, +0%; Melee Attack, Reach C, Cannot Parry, -35%; No Signature, +20%; Nuisance Effect, Brings the vehicle to unlife, -20%; Reduced Duration, 1/3, -10%; Sorcery, -15%) [227].
Notes: "Zombie Vehicle" is Regeneration (Very Fast; Cosmic, Works on disabled vehicles, +50%) [150] + Unkillable 1 (Cosmic, disabled vehicles, +50%) [75]. This version of Cosmic means it *only* works on disabled vehicles – not damaged functioning vehicles – and gives one try, ever.

Zombify

Keywords: Resisted (HT).

Full Cost: 15 points.

Casting Roll: Will. Use DX or unarmed combat skills to hit.

Range: Touch.

Duration: 10 minutes.

The caster must touch the subject to cast this spell. The subject begins to rot from within, taking 1d-1 toxic damage each minute for 10 minutes. Armor does not protect, but natural DR does. Each second the subject may resist the damage by making a successful HT roll. If the roll is a critical success, then the spell stops. A Cure Disease spell can dispel the spell.

If the subject loses $\frac{1}{2}$ of his HP or more to this spell, he begins experiencing terrible pain (B428) until he is healed above this threshold. Once the subject dies from this spell, he rises as a zombie. The zombie is not subservient to the caster, but can be purchased as an Ally.

Statistics: Toxic Attack 1d-1 (Based on HT, +20%; Cyclic, 1 minute interval, 10 minutes, +200%; Melee Attack, Reach C, Cannot Parry, -35%; Malediction 1, +100%; Nuisance Effect, Rises as a zombie, -10%; Sorcery, -15%; Symptoms, $\frac{1}{2}$ HP, Terrible Pain, +120%) [15].
